- There is a wider world out there with many more beings living in 29 more realms than the human and animal realms that we experience, AND the real suffering is in the lower four realms.
- This life is only a brief stop in our long journey through the cycle of rebirths called *samsāra*.
- Even in this life, there is hidden suffering even when one seems to be enjoying life, AND there is real suffering in old age and death that is inevitable for everyone. That last part is apparent to anyone but is not thought about much. As one gets old, when the real suffering starts, the mind could be too weak to learn Dhamma.

Importance of “Understanding the Big Picture”

7. **Analogy 1:** When a fish bites a bait, it does not see the suffering hidden in that action. Looking from the ground, we can see the whole picture and know what will happen to the fish if it bites the bait. But the fish cannot see that whole picture and thus does not see the hidden suffering. It only sees a delicious bit of food.

- In the same way, if we do not know about the wider world of 31 realms (with the suffering-laden four lowest realms) and that we have gone through unimaginable suffering in those realms in the past, we only focus on what is easily accessible to our six senses.
- That analogy is in the “[WebLink: suttacentral: *Balisa Sutta* \(SN 17.2\).](#)” You can read the translation there.

8. **Analogy 2:** Suppose someone makes you an offer. He says, “I will put you in one of the best resorts with all amenities paid for a month. But there is a catch. The food will taste great but have traces of poison that will become effective in a few months and lead to death within the year”.

Will anyone accept the offer, knowing it will lead to suffering and death? Of course not.

- But they would gladly accept the offer if they were not told about the poison in the food. They will have a good time but bear the same consequences as the fish in the above analogy.
- In the same way, we enjoy sensory pleasures without knowing their long-term consequences, especially if we do immoral things to get them.

Things to Contemplate (This is Meditation!)

9. We all have seen how a parent, a grandparent, or even an unrelated celebrity from past years transforms from a dynamic, self-confident, and sometimes imposing character to a feeble, helpless person in the latter years. Sometimes they die under pathetic conditions that would have been unimaginable for them when they were young. **But this change is gradual, and even they do not realize it until it is too late.**

- When one becomes too old, it may be too late to start thinking about these facts; one needs to spend a little time contemplating these “facts of life” now.
- Not to get depressed about this inevitability, but to DO SOMETHING ABOUT IT; this will enable one to enjoy the latter days of life with *nirāmisā sukha*, even if no stage of *Nibbāna* is attained.

10. However, it DOES NOT MEAN one should rush to get away from all sensory pleasures even if one becomes convinced of the core message of the Buddha.

- Abandoning everything abruptly may have even worse consequences if it is not done with true understanding. It takes time to digest the whole message. It has taken me several years to reach where I am now. I have not given up anything with remorse; I do not “miss” anything that I have given up. The only things one may want to “forcefully give up” are things that directly hurt other beings, like killing, stealing, etc., which most people don’t do anyway.
- Giving up sensory pleasures comes gradually with understanding when one sees the benefits of giving up.

11. There is no need to rush into taking drastic actions. **The urgent task is to get started.** Allocate a little time each day to learn Dhamma, preferably when the mind is a bit calmer so that one can focus and contemplate. As the Buddha said, this Dhamma differs from what we are used to.

- As one begins to understand the message of the Buddha, the learning process will become easier. What I hope to do with this site is to present all the background material I have gone through so that others do not have to repeat it all.
- Of course, you may want to do additional research. Each person evaluates things differently.

Summary

12. The First Noble Truth on suffering is NOT so much about current suffering, especially physical suffering. It is not about the *dukha vedanā* but needs to be UNDERSTOOD with wisdom (*paññā*).

- The Pāli word for suffering is *dukha*, with one “k.” The First Noble Truth (*Dukkha Sacca*) is not merely about *dukha* but how to get rid of it or *dukkha* (*dukha* + *khaya*); see “[Does the First Noble Truth Describe only Suffering?](#)”

4.3.4 Dhamma, Saṅkhāra, Sankata, Rūpa, Viññāṇa, Gati, Āsava, Anusaya

July 22, 2018

1. I recently realized that it would be a good idea to explain what is meant by key Pāli words like the above in one place.

- This information could be there spread over hundreds of posts on the website, but not many people have read even a fraction of what is at the web site.
- Since it is critical to understand these key terms, I will try to provide another condensed “big picture” in terms of these key words. In the last post we analyzed the big picture in terms of root causes; see, “[Six Root Causes – Loka Samudaya \(Arising of Suffering\) and Loka Nirodhaya \(Nibbāna\)](#).”

2. One way to look at this is to start with how the Buddha described “everything in this world.” We have two worlds to begin with: physical world (*bhautika loka*) and the mind world (*mano loka*).

- Everything that is in the physical world is detected by the five physical senses of eyes, ears, nose, tongue, and the body: *vaṇṇa rūpa* (visible objects), *sadda rūpa* (sounds), *gandha rūpa* (smells), *rasa rūpa* (tastes), and *pottabba rūpa* (touchable objects).
- **Therefore, everything that is in our physical world are called *rūpa*, and are included in the five types mentioned above.** Those *rūpa* are all above the *suddhaṭṭhaka* stage.
- For example, we can see *vaṇṇa rūpa* with eyes: “*cakkhuñca paṭicca rūpe ca uppajjati cakkhuvīññāṇaṃ*.” Similarly for other four.
- Some objects in the physical world can be detected with more than one sense faculty, and the more information we get the more knowledgeable we become of the object: we can see and touch an apple; if we can also smell it, the apple is probably ripe; if we taste it, we can confirm that it is ripe.

3. **We have a sixth sense faculty: *mana indriya*, which basically detects everything else in our world, and they are called *dhammā*:** “*manañca paṭicca dhamme ca uppajjati manovīññāṇaṃ*.” These *dhammā* are in our *mano loka* (mental world).

- These *dhammā* include everything that is not detected with the five physical senses. They include, for example, *kamma bīja*, *nāma gotta* (memory records or memories), mathematics, philosophy, Buddha Dhamma, etc.
- Those are also called *rūpa*, but those *rūpa* are different from the *rūpa* in the physical world: Some have energies that lie below the *suddhaṭṭhaka* stage (*kamma bīja*), and the rest of them are either just memories (*nāma gotta*) or concepts.
- These fine *rūpa* are described as, “*anidassanaṃ, appaṭighaṃ, dhammāyatana pariyāpanna rūpaṃ*” or “*rūpa* that cannot be seen, touched, and only detected via *dhammāyatana (mana indriya)*.”

4. **When one of our senses detects something in our physical world or the mental world, one of the six types of *viññāṇa* arise**, and we become aware of that “thing”, whether it is a *vaṇṇa rūpa*, *sadda rūpa*, or a *dhammā*.

- *Viññāṇa* is a very complex entity: it includes or encompasses the following: our feelings (*vedanā*), perceptions (*saññā*), and a set individual mental factors (*cetasika*). They all arise together, and the set of *cetasika* that arise is dependent on each person’s *gati*.

- For example, totally different sets of *vedanā*, *saññā*, *saṅkhāra* (i.e., *cetasika*) arise when a famous politician is seen by one of his supporters and a person from the opposition party.
 - But in addition, ***viññāṇa* also includes one's hopes for the future. That is important.**
5. The initial response in one's mind upon subjected to an external sense input (whether it is seeing, hearing or just a memory coming to the mind), is called a ***mano saṅkhāra***. Of course, that is part of *viññāṇa*.
- Now, we can see why different people generate different types of *viññāṇa* when exposed to the same sense input. Those *mano saṅkhāra* — that is generated instantaneously — depends on one's *gati* or set of *kilesa* (*lobha*, *dosa*, *moha*).
 - Each person has a set of *kilesa* called *āsava*, and one's *gati* (and therefore those *mano saṅkhāra*) closely follow those *āsava*; we will discuss that below.
6. If that sense input is an interesting one (a like or a dislike), then immediately one starts thinking about it. This is called “generating ***vacī saṅkhāra***” or basically “talking to oneself.” Now one is fully aware that one is thinking about that sense input, whether it is a picture, sound, a memory, or anything else.
- Furthermore, if one gets really animated about that object, one may speak about (still with *vacī saṅkhāra*), and may even take a bodily action which will involve ***kāya saṅkhāra***.
 - In contrast to *mano saṅkhāra* that arise AUTOMATICALLY, both *vacī* and *kāya saṅkhāra* are generated consciously. This is key to *Ānāpāna* and *Satipaṭṭhāna* meditation since we have the ability to stop or to continue with those *vacī* and *kāya saṅkhāra*.
 - Those three types are collectively called ***saṅkhāra***.
 - So, I hope you now have a better understanding of what is meant by *viññāṇa* and *saṅkhāra* and also how they are related. From #4 above, we can also see that *saṅkhāra* are part of *dhammā*.
7. By the way, *kāya kamma* are those actions done with the body, but we see that *kāya saṅkhāra* are responsible for such *kāya kamma*.
- In the same way, *vacī saṅkhāra* are responsible for *vacī kamma*, and *mano saṅkhāra* are responsible for *mano kamma*.
 - All ***kamma*** (actions) are done with *saṅkhāra*. They all have origins in the mind.
8. Now, such *saṅkhāra* can be “harmless” or “dangerous” or “beneficial.” Our actions, speech, and thoughts are all based on such *saṅkhāra*.
- When one gets hungry, one may generate *vacī* and *kāya saṅkhāra* to ask for food or to go walk to the kitchen and get something to eat. Such *saṅkhāra* are *kammically* neutral, in the sense that they don't lead to “good or bad *kamma vipāka*” in the future other than getting what one wanted to satisfy the hunger.
 - Of course, if one gets attached to that food while eating, one may generate strong *saṅkhāra* or *abhisāṅkhāra* that will have significant *kammic* consequences. That is an *apuñña abhisāṅkhāra* since that involves the *lobha cetasika*.
9. If one is planning to kill another human, then one would be generating very strong “*apuñña abhisāṅkhāra*” that involves *vacī saṅkhāra* and may lead to *kāya saṅkhāra* if one actually goes through the killing. Then one would have generated a strong *kamma bīja* that can bring a future birth in the *apāyā*.
- On the other hand, if one is studying Buddha Dhamma, one will be generating all three types of *puñña abhisāṅkhāra* (thinking, contemplating and doing things like downloading material from the internet). They will create good *kamma bīja* that will lead to good *vipāka*: either leading to *magga phala* or at least births in good realms so that one could continue on the Path.

10. Now we can begin to see how *saṅkhāra* can lead to the formation (or arising) of ***saṅkhata* (*sankata* in Sinhala)**. A potent *kamma bīja* generated via a strong *apuñña abhisāṅkhāra* can lead to say, animal *bhava*, and to the birth as an animal.

- Therefore, that *saṅkhata* (*sankata* in Sinhala) (animal) came to being because of that *kamma bīja*, and many *abhisāṅkhāra* could have contributed to that *kamma bīja*.
- In the same way, a strong “good *kamma bīja*” generated via *puñña abhisāṅkhāra* (*puñña kamma*) can lead to a human or a *deva* birth. That human or *deva* is a *saṅkhata* (*sankata* in Sinhala) too.

11. It is much more complex, but ALL material things arise in this world are due to *saṅkhāra*. I will take a simple example to show the basic idea.

- A house (a *saṅkhata* (*sankata* in Sinhala)) comes into being as a result of many types of *saṅkhāra*. First, one needs to get the idea to build a house. Then he/she may consult an architect and after much discussion (lot of *mano* and *vacī saṅkhāra* and also *kāya saṅkhāra*), they will come up with a blueprint (plan) for the house.
- Then many people will work to build the house. Innumerable *mano*, *vacī*, *kāya saṅkhāra* are involved in bringing the house to completion (of course, most of those are not *puñña* or *apuñña abhisāṅkhāra*; they are just mostly neutral *saṅkhāra*).
- The explanation of how a tree arises is a more complex one, but also has origins in the mind. We may get to that at a future time, but it is not necessary to attain *Nibbāna*. As the Buddha said: “mind is the precursor to everything in this world.”

12. **Any *saṅkhata* (*sankata* in Sinhala) has the following universal properties:** it comes into being and eventually is destroyed, and also it undergoes unexpected change while in existence. Think about anything in this world. Those three characteristics are associated with any of them.

- **This is why ANY *saṅkhata* (*sankata* in Sinhala) HAS the *anicca* nature.** It is said that “*uppāda vayattena aniccā*,” emphasizing those main properties: any *saṅkhata* (*sankata* in Sinhala) arises and eventually is subjected to decay and death, whether it is living or inert.

13. However, it is important to realize that a *saṅkhata* (*sankata* in Sinhala) WILL NOT bring suffering to anyone unless one gets attached to it. A *saṅkhata* (*sankata* in Sinhala) has the *anicca* nature (i.e., the potential to bring suffering), but it does not automatically lead to suffering.

- A bottle of poison sitting on a table has the potential to kill someone. But unless someone takes the bottle and drinks from it, he/she will not be affected.
- In the same way, we will be subjected to suffering ONLY IF we get attached to worldly things (*saṅkhata* (*sankata* in Sinhala)), whether it is a person, house, car, etc). Then why do we get attached to such things all the time? That is because we have not comprehended the real *anicca* nature of *saṅkhata* (*sankata* in Sinhala). It is not easy to see the *anicca* nature.

14. Therefore, a key point is that any type of *rūpa* (or any *saṅkhata* (*sankata* in Sinhala) in general) WILL NOT bring us *dukkha* unless we get attached to (or repulsed by it), i.e., it leads to *taṇhā* in the mind.

- This is why the Buddha said, “*..pañca upādānakkhandhā dukkhā*,” and NOT “*pañcakkhandhā dukkhā*.”
- There could be all kinds of attractive/hateful things around us, but if we don’t generate *upādāna* for them via craving (*lobha*) or hate (*dosa*), we will not be subjected to suffering.
- However, that is hard to do until one cultivates *paññā* (wisdom) by learning Buddha Dhamma and eventually grasping the *Tilakkhaṇa* (*anicca, dukkha, anatta*).

15. Until then, when we experience a sense input via any of the six senses (see above), we may automatically generate bad *mano saṅkhāra* and then willingly generate *vacī* and *kāya saṅkhāra* along the same lines, if we are not being mindful.

- As we discussed above, *mano saṅkhāra* arise AUTOMATICALLY according to our *gati*. Those *gati* are closely associated with *anusaya* (mental fermentations) that cannot be removed until one comprehends *Tilakkhaṇa*.
- Based on the sense input, those *āsava* may come to the surface and that is called *āsava*; see, “[Gathi \(Gati\), Anusaya, and Āsava.](#)”
- The only way to change those *gati* (i.e., to remove *āsava* from one's mind permanently) is to cultivate *Ānāpāna* and *Satipaṭṭhāna*, by being mindful of what kind of *saṅkhāra* arise in our minds as we are exposed to such external sense inputs.
- So, it is VERY IMPORTANT to both learn Buddha Dhamma (in particular *Tilakkhaṇa*) and ALSO to practice real *Ānāpāna/Satipaṭṭhāna bhāvanā*.

16. It must be clear now that the main cause of suffering is not *saṅkhata* (*sankata* in Sinhala), but *saṅkhāra*, specifically *apuñña abhisāṅkhāra*. This is why it is said that “*sabbe saṅkhāra aniccā*” and NOT “*sabbe saṅkhata* (*sankata* in Sinhala) *aniccā*” or “*sabbe dhamma aniccā*”

- Another word for *apuñña abhisāṅkhāra* is *dasa akusala*. Abstaining from *dasa akusala* is the same as stopping BAD *mano*, *vacī*, and *kāya saṅkhāra*.
- Some of that can be done via pure determination. However, that discipline becomes hard when one gets strong sense inputs. For example, one may not take a bribe, but if the offer is a million dollars one may be tempted to take the bribe.

17. That is the difference a real comprehension of *Tilakkhaṇa* will accomplish; one's tendency to do immoral things will naturally reduce as one's comprehension of *Tilakkhaṇa* increases. An *Arahant* will not be tempted by absolutely anything.

- An *Anāgāmī* will not be tempted by any “*kāma*” input, for example, seeing the most attractive person. But he/she will have a liking (craving) for Buddha Dhamma and possibly for *jhānic* pleasures.
- A *Sotāpanna* WILL NOT do any *apāyagāmi akusala* (i.e., will not generate such *apuñña abhisāṅkhāra*).
- Those controls take place automatically. The mind will automatically do that by not generating even spontaneous *mano saṅkhāra* belonging to those categories. **That is done via permanently changing one's *gati* for the better via *paññā*.**

18. Finally, another thing to remember is that most of what we experience are *dhammā*, via the *mana indriya*.

- Those five physical senses are active ONLY in bringing that sensory input, which means that sense experience is very brief.
- Let us take an example of watching a person walking towards you. When the person is 100 meters away, you see a snapshot of him. Then that mental imprint immediately goes to the past. By the time he is close to you, all those visual events of him walking towards you will have gone to the past; they can now be recalled only as *dhammā*.
- The same is true for all five physical senses. We experience them only DURING the sense event, only momentarily. After that we can only RECALL those events with the *mana indriya*. Those past sense events come back to as *nāma gottā* or memories. A day after meeting that person, you can visualize the whole event with the *mana indriya*.

19. Therefore, *pacakkhandha* (except for those arising at any given moment) are really *dhammā*, that are experienced by the mind via the *mana indriya*. This is a subtle point that may not be obvious immediately; also, see “[Pañcakkhandha or Five Aggregates – A Misinterpreted Concept.](#)”

- We get attached to only a small fraction of *pañcakkhandha*, and that is called *panca upādānakkhandha*; see, “[Pancupādānakkhandha – It is All Mental.](#)”

20. If you think deep enough you will realize the world that one experiences, is made up by one's mind to some extent (it is easy to see that our *vedanā*, *saññā*, *saṅkhāra*, and *viññāṇa* are all highly personal, and are based on one's *gati*).

- The physical world around us exists for sure and is real, but what we perceive is highly personal. What we really see and experience is our own “mental picture” of the world: our own *vedanā*, *saññā*, *saṅkhāra*, and *viññāṇa*.

21. This post became longer than I expected. However, it is not possible to even provide a basic outline in a short post. Still one would need to read other relevant posts to really understand this basic layout, and thereby understand those keywords better. But it is important to do if one is really interested in grasping the true teachings of the Buddha.

- As the Buddha said, “this *Dhamma* has never been known to the world, and it is not easy to comprehend.” It requires a real effort. On the other hand, getting released from the *apāyā* should not be expected to be done easily. Otherwise, none of us would still be here.

4.3.5 Complexity of the Mind – Viññāṇa and Saṅkhāra

April 28, 2019; revised November 8, 2019

Vipāka Viññāṇa and Kamma Viññāṇa

1. Even though science has made significant progress in the understanding of the material world, science has advanced very little on the subject of mental phenomena.

- The words *viññāṇa* and *saṅkhāra* have no corresponding words in English. It is absurd to translate *viññāṇa* as “consciousness.” There are two types of *viññāṇa*. *Vipāka viññāṇa* are only consciousness. However, *kamma viññāṇa* that arise via “*saṅkhāra paccayā viññāṇa*” are much more than just consciousness.
- I looked up the definition of consciousness. It is usually defined as “the state of being awake and aware of one's surroundings” or “the awareness or perception of something by a person.” That is not what is meant by *viññāṇa*.

2. ***Kamma viññāṇa* arises only when one acts with *avijjā*:** “*avijjā paccayā saṅkhāra*” and “*saṅkhāra paccayā viññāṇa*.” Thus, *kamma viññāṇa* can occur only if one acts with *avijjā* or ignorance.

- The Buddha did not act with *viññāṇa* (i.e., did not generate *kamma viññāṇa*) after attaining the Buddhahood. But he had perfectly good consciousness.
- *Viññāṇa* is a very complicated word. Even though I have simplified *viññāṇa* as “defiled consciousness,” that is also not adequate; see, “[Viññāṇa – Consciousness Together With Future Expectations](#).”

Different Categorizations of Saṅkhāra

3. In [WebLink: suttacentral: Paṭiccasamuppāda Vibhaṅga \(Vb 6\)](#), the term “*avijjā paccayā saṅkhārā*” in ***akusala-mūla Paticca Samuppāda (that leads to suffering)*** is explained as follows: “*Tattha katame avijjā paccayā saṅkhārā? Puññābhisaṅkhāro, apuññābhisaṅkhāro, āneñjābhisaṅkhāro, kāyasaṅkhāro, vacīsaṅkhāro, cittāsaṅkhāro.*”

Translated: “What is *avijjā paccayā saṅkhārā*? *Puññābhisaṅkhāra*, *apuññābhisaṅkhāra*, *āneñjābhisaṅkhāra*, *kāyasaṅkhāra*, *vacīsaṅkhāra*, *cittāsaṅkhāra*.” (here, *cittāsaṅkhāra* is the same as *manosaṅkhāra*).

- They are all ***abhisaṅkhāra***, even though the verse has simplified as “*avijjā paccayā saṅkhārā*ey.”

- There are two types of *abhisāṅkhāra* mentioned there: one kind refers to types of *kamma* accrued. The second categorization says whether it involves the body, speech, or just mind.
- Therefore, *saṅkhāra* has a much deeper meaning than just “mental formations,” even though that is better than the translation for *viññāṇa* as consciousness.
- Let us discuss those two types next.

Mano, vacī, and kāya Saṅkhāra

4. First, let us consider *mano saṅkhāra*, *vacī saṅkhāra*, and *kāya saṅkhāra*.

- They all arise in the mind, but have differences: thoughts that appear automatically in the mind are called *mano saṅkhāra*.
- When we consciously think about something, those are *vacī saṅkhāra* (speaking out is also included).
- When we move the body with our thoughts, those thoughts are *kāya saṅkhāra*.
- Of course, those *saṅkhāra* become *abhisāṅkhāra* when immoral or moral intentions play a role. Such *abhisāṅkhāra* lead to rebirth and future suffering (see #5 below).

4. In other words, *saṅkhāra* in “*avijjā paccayā saṅkhāra*” in *akusala-mūla Paṭicca Samuppāda* are ***abhisāṅkhāra*** that can lead to rebirth.

- Even an *Arahant* will generate *saṅkhāra* (all three types of *mano saṅkhāra*, *vacī saṅkhāra*, and *kāya saṅkhāra*) to live in this world the physical body dies.
- However, an *Arahant* will NOT generate any *abhisāṅkhāra*.

Apuñña, Puñña, and Āneñja abhisāṅkhāra

5. *Abhisāṅkhāra* falls into three categories of *apūñña abhisāṅkhāra*, *puñña abhisāṅkhāra*, and *āneñja abhisāṅkhāra*.

- *Apuñña abhisāṅkhāra* are immoral actions leading to births in the *apāyā*.
- *Puñña abhisāṅkhāra* are moral actions leading births in the “good” realms of human, *deva*, and *rūpāvacara brahma* realms (via cultivation of *rūpāvacara jhāna*).
- *Āneñja abhisāṅkhāra* are involved in the cultivation of *arūpāvacara jhāna* leading to rebirth in *arūpāvacara brahma* realms.
- Therefore, just translating *saṅkhāra* as “mental formations” is not very useful in describing what they are; see, “[Saṅkhāra – What It Really Means](#).”

Current Scientific Knowledge of Consciousness

6. Modern science is far behind the Buddha in the understanding of mental phenomena. To understand the severity of this problem, let us examine a presentation by the philosopher John Searle, “Our Shared Condition – Consciousness.”

[WebLink: youtube: John Searle: Our shared condition -- consciousness](#)

7. In my opinion, John Searle is one of few philosophers who comes even close to understanding mind phenomena. Some philosophers/scientists do not even believe that consciousness is real. They say: “..Science is objective, consciousness is subjective. Therefore there cannot be a science of consciousness.” Whether there can be a “science of consciousness” or not, consciousness is real, as Searle points out.

- Some others object, “..Maybe consciousness exists, but it can’t make any difference to the world. How could spirituality move anything?..” In response, Searle points out: “..I decide consciously to raise my arm, and the damn thing goes up.”

Consciousness Is Real

8. John Searle is also quite correct that consciousness is not an illusion. As he points out, only a conscious living being can decide to move a body part, say raise a hand.

- But to be perfectly correct, consciousness is not what moves an arm. One needs to make a “conscious effort” to move the arm, i.e., one must decide to raise the hand. Those thoughts are *kāya saṅkhāra*: conscious thoughts that lead to moving body parts.
- However, it is essential to realize that the energy to raise the hand does not come from the mind. The mind initiates the process, and the brain sends the necessary commands to the muscles to raise the hand; energy for such muscle movements comes from the food we eat.
- Just like an on-board computer carries out the commands of the pilot flying a plane, the brain acts like a computer and carries out the commands given by the mind.

Breathing Involves Basic *Kāya Saṅkhāra*

9. The definition of *kāya saṅkhāra* is “*assāsa passāsā kāya saṅkhāra*” or “breathing in and out is *kāya saṅkhāra*.” We all do such *kāya saṅkhāra* through our lives, and that is the most basic *kāya saṅkhāra*.

- Even though we do not realize it, breathing in and out involves “thinking at the lowest level” or with “*atiparittārammana citta vīthi*.” Those *citta vīthi* do not have *javana citta*, and thus, we do not “feel them.”
- In the fourth *jhāna samāpatti*, *kāya saṅkhāra* involved in breathing stop, i.e., breathing stops.
- *Kāya saṅkhāra* lead to any bodily movement. Unless those bodily movements lead to *kammic* effects (good or bad), they do not become *abhisāṅkhāra*, which could lead to rebirth.

Vacī Abhisāṅkhāra and *Kāya Abhisāṅkhāra* Can Lead to Rebirth

10. *Vacī saṅkhāra* also can be just *saṅkhāra* (thinking to oneself/speaking about normal activities) or *abhisāṅkhāra* with *kammic* consequences. See, “[Correct Meaning of Vacī Saṅkhāra](#).”

- Both *vacī* and *kāya abhisāṅkhāra* can lead to rebirth.
- *Mano saṅkhāra* — which arise automatically — do not lead to rebirths.

Some Pāli Words Should Not be Translated

11. Modern science cannot explain *saṅkhāra* (more correctly how a person moves body parts or speaks on his/her volition). The English language does not have an equivalent word for “*saṅkhāra*.” Furthermore, as explained above, “consciousness” should not be used as the English translation for “*viññāṇa*.”

- **We need to learn the Pāli words (*saṅkhāra* and *viññāṇa*) and then just use those words.**
- That is what has been the practice in the Sinhala language. **The same words *viññāṇa* and *saṅkhāra* appear in the Sinhala translations of the *Tipiṭaka*.** Just like in English, there are no Sinhala words assigned for *viññāṇa* and *saṅkhāra*.

4.3.6 Citta, Manō, Viññāṇa – Nine Stages of a Thought

January 24, 2018; revised January 6, 2019; July 26, 2020; August 23, 2022

***Citta, mano, viññāṇa* – All Different**

1. *Citta, mano*, and *viññāṇa* are common words used indiscriminately in many texts on Buddhism (Buddha Dhamma). **They are all related yet different.**

- A *citta* becomes “contaminated” in eight steps to *viññāṇa* (and in another step to becoming part of the *viññāṇakkhandha*.) That transformation happens in an unbelievably short time. The level of “contamination” depends on one’s *gati* (character/habits.)
- I hope this post will clarify some fundamental concepts, will be invaluable in understanding other concepts.
- I cringe when I see some online comments even say *viññāṇa* is *Nibbāna*. It is exactly the opposite. **One attains *Nibbāna* when one gets rid of *viññāṇa*** or more accurately, when one purifies one’s mind to the extent that a *citta* does not contaminate to the *viññāṇa* stage.
- *Viññāṇa* discussed at “[Viññāṇa Aggregate](#).”

Fundamentals of a *Citta*

2. The generic term in English, “thought,” cannot even begin to explain the complex process that happens within a fraction of a billionth of a second when a *citta* arises. A *citta* goes through three stages (*uppāda*, *ṭīṭhi*, *bhaṅga*) before terminated within a billionth of a second.

- When we see, hear, smell, taste, or touch, seventeen *cittā* flow uninterrupted. Such a series of *cittā* is called a *pañcadvāra citta vīthi*. For example, it happens in “*cakkhuṅca paṭicca rūpe ca uppajjati cakkhuvīññāṇam*.”
- Many such *citta vīthis* flow before we consciously become aware of that “thought.”
- If the thought object comes through the *māna indriya* (“*manaṅca paṭicca dhamme ca uppajjati manovīññāṇam*”), that *citta vīthi* is called a *manodvāra citta vīthi*, and it has 10-12 *citta*. Again, many such *citta vīthi* flow before we consciously become aware of that “thought.”

A “Thought” May Have Billions of *Citta*

3. Another essential point to remember is that the word “*citta*” is used loosely, even in Buddha Dhamma. It often gives the same impression as the word “thought.” We just say, “a *citta* comes to the mind.”

- The word “*citta*” has that “conventional” meaning, but it is the initial stage of a “thought” that is also called a *citta*. That *citta* has only the seven UNIVERSAL *cetasika*. That means those seven *cetasika* are in ANY *citta*, including a that of a Buddha or an Arahant. That means it is a “pure *citta*” (*pabhassara citta* in Pāli.)
- See “[Amazingly Fast Time Evolution of a Thought \(Citta\)](#).”

A Pure *Citta* Has Only Seven Universal *Cetasika*

4. A pure *citta* is analogous to a glass of purified water without any contaminant. It has only seven *cetasika* (mental factors): *Phassa* (contact); *vedanā* (feeling); *saññā* (perception); *cetanā* (volition); *ekaggatā* (One-pointedness) can become *Sammā Samādhi*; *jīvitindriya* (life faculty); *manasikāra* (memory).

- If we add a bit of sugar to that glass of water, the water becomes sweet. That is like adding “good” (*sobhana*) *cetasika*, like compassion, to a *citta*.
- But if we add a bit of dirt to that pure water, it becomes dirty. That is like adding “bad” (*asobhana*) *cetasika*, like anger, to a *citta*.
- Yet, we may still call either glass of water a “glass of water.”

- In the same way, we commonly refer to any thought as a *citta*. However, technically, only the first stage can be called a *citta*. Thus, “any thought” is a *viññāṇa* (a contaminated *citta*.)

The Nine Stages of the Evolution of a *Citta*

5. The initial, pure stage of *citta* becomes contaminated within an unbelievable short time. It evolves through nine steps in the following sequence: *citta, mano, mānasam, hadayaṃ, paṇḍaram, mano manāyatanaṃ, māna indriyaṃ, viññāṇa, viññākkhandho*. [*Yaṃ cittaṃ mano mānasam hadayaṃ paṇḍaram mano manāyatanaṃ manindriyaṃ viññāṇam viññākkhandho...*]

- By the time it gets to the *viññāṇa* stage, it is a contaminated *citta*. As we will discuss below, how contaminated it gets, depends on the thought object and one’s *gati*.
- What we experience is that last stage.

6. Before we proceed with the discussion, let me provide a reference to the above verse, which is in the “[WebLink: suttacentral: Pattecasamuppāda Vibhaṅga](#),” in Section [WebLink: suttacentral: 2.5.1. Akusalacitta](#) : “*Tattha katamaṃ saṅkhāra paccayā viññāṇam? Yaṃ cittaṃ mano mānasam hadayaṃ paṇḍaram mano manāyatanaṃ manindriyaṃ viññāṇam viññākkhandho tajjāmanoviññāṇadhātu—idaṃ vuccati “saṅkhārapaccayā viññāṇam.”*”

- Note that “*saṅkhāra paccayā viññāṇam*” happens in different ways depending on whether it is a “good thought” or “bad thought.”

The “Nine Stages of Evolution” Can Only be Seen by a Buddha

7. That fast process can be seen only by a Buddha. It is perceptible discernible (*gocara*) only to the highest purified mind.

- The Buddha explained that first to Ven. Sāriputta, when he first explained the key ideas of *Abhidhamma* to Ven. Sāriputta and it took several hundred years of effort by “the *bhikkhus* of the Sāriputta lineage” to do a systematic compilation of all mental phenomena.
- That is why the *Abhidhamma Piṭaka* was finalized only at the third *Sangāyanā* (Buddhist Council.) See “[Abhidhamma – Introduction](#).”

8. It is best to describe the actual process to understand these steps. Let us go back to the evolution of a single *citta* in nine steps.

- It starts with the *citta* stage, the purest stage (it has only the seven universal *cetasika* or mental factors). One is aware that one is alive.
- These deeper aspects are discussed in “[Pabhassara Citta, Radiant Mind, and Bhavaṅga](#).”

9. Now that we have stated that technical point (which is not critical for this discussion), we can proceed to the next stages.

- At the first stage of *citta*, the mind just knows that the world exists. That there is a sense impression coming through either of the five physical senses (*cakkhu, sota, jivhā, ghāṇa, or kāya indriya*) or the *māna indriya*.

The Nine Stages of Evolution

10. Let us take a specific event: Suppose it is seeing a woman.

As we said above, at the first *citta* stage, one is only aware that a thought object came to the mind via the eyes (*cakkhu indriya*).

- Then in the **mano** stage, the mind “measures” or “compares” (that is why it is called the “*mano*” stage) with past experiences to decide whether the object is a tree, a car, a man, a woman, etc. In this case it determines that it is a woman.
- The next “**mānasam**” stage is to decide a specific connection to him/herself. In this case, it turns out that it is a woman.

11. Now, those steps occur for any human, including an *Arahant* or even the Buddha. One cannot live without getting to this stage. The Buddha was able to differentiate between Ven. Ānanda, Ven. Sāriputta, Visaka, or King Kosala, and addressed them accordingly.

- In fact, in the *Karaniyamatta Sutta*, “*mānasambhāva ye aparimāṇam..*” means to cultivate “*mānasam*” to the optimum level. That way, one can quickly figure out how to deal with a given situation.

12. At the next step, an average human will generate the “*saññā* about the person seen” and may make a definite identification of that woman and generate some affection. See “[Saññā – What It Really Means](#).” That is called the “**hadayaṃ**” stage. Remember that all nine steps happen in a short time and do not involve conscious thinking.

- For example, it might reach the “*hadayaṃ*” stage if it was a distant relative.

13. Proceeding to the next stage of “**paṇḍaram**,” that feeling established at the “*hadayaṃ*” stage strengthens in the case of a close person like one’s mother. It is like allocating more “energy” to a closer person.

- It is also important to note that it may go the totally opposite way for an arch-enemy. Here, one will have strong bad feelings about such a person.

14. Now comes the next stage of “**mano manāyatanaṃ**.” Here one’s mind becomes an “*āyatana*” or “be receptive” (or hateful) to that person depending on the level of attachment (revulsion) formed at the *hadayaṃ* and *paṇḍaram* stages.

- That is strengthened (to a level based on the feelings generated in the previous steps) at the “*mana indriyaṃ*” stage.
- Note that this “*mana indriyaṃ*” stage is different from the *mana indriya* involved in “*manañca paṭicca dhamme ca uppajjati manoviññāṇam..*”

15. At the **viññāṇa** stage, one’s mind is removed from “*ñāṇa*” or wisdom or “the reality of nature.” As long as one has worldly desires (i.e., cravings), one has not stopped the *viññāṇa* stage (i.e., until one becomes an *Arahant*).

- Then at the last stage of **viññāṇakkhandha**, the mind strengthens attachments cultivated in the past, evaluates the current situation, and makes new hopes and plans for the future. That is the last stage.
- That last stage is what we experience. We do not experience one such “*citta*” or “*viññāṇa*.” Thousands of *citta vīthi* may flow within a fraction of second before we become aware of it.

16. However, in the case of an *Arahant*, the process stops at the *mānasam* stage and thus does not evolve further. The mind makes decisions based on recognizing a person, regardless of the connection between oneself and that person.

- Even under the threat of being killed, feelings towards that person will be no different from feelings towards one’s mother. That is why I say that we cannot even imagine the mind of an *Arahant*.

The Initial Citta Stage is a Pabhassara Citta

17. **Aṅguttara Nikāya 1; Accharāsaṅghātavagga; Sutta #51** is a very short *sutta*. Here is the complete *sutta*: “*Pabhassaramidaṃ, bhikkhave, cittaṃ. Tañca kho āgantukehi upakkilesehi upakkiliṭṭhaṃ. Taṃ*

assutavā puthujjano yathābhūtaṃ nappajānāti. Tasmā ‘assutavato puthujjanassa cittabhāvanā natthī’ti vadāmi’ti.

Translated: “*Bhikkhus*, a (pure) *citta* has *pabhassara* nature. That *citta* is contaminated by defilements (*keles* or *kielesa*). A normal human who has not heard my Dhamma (*assutavā puthujjano*) is unaware of this true nature. I do not recommend *citta bhāvanā* to them.”

- This *sutta* clearly states the importance of knowing that a pure *citta* becomes contaminated to the level of *viññāṇa*.

18. Once we have those basics, we can now build on that and try to make the picture clearer.

- For example, when seeing an attractive object, the mind may become greedy by incorporating *lobha*, *issa*, etc. (*asobhana cetasika*) that bends the mind immorally.
- Upon seeing a helpless person, one may generate compassionate thoughts by incorporating *metta*, *karuna*, etc. (some *sobhana cetasika*).

Contamination of a Thought Depends on *Gati* and *Ārammaṇa*

19. Therefore, we can now see why two factors play important roles in how the thought process would evolve. One is one’s *gati*, and the other is how strong the thought object (*ārammaṇa*) is.

- Someone with “*lobha gati*” can be easily influenced by a slightly attractive object or *ārammaṇa*. On the other hand, someone with less “*lobha gati*” may not be perturbed by it. Possible situations are endless, depending on the sense -object and one’s *gati*. That is a good *vipassanā* subject to contemplate.

Saṅkhāra Paccayā Viññāṇa

20. Another important thing is that when one repeatedly thinks about a given sense object, then one’s *viññāṇa* (expectations) for that objects will be cultivated. That, in turn will cultivate one’s *gati* in that direction, thus becoming a self-feeding cyclic process. A good example is an innocent teenager who gets addicted to alcohol or drugs.

- If we thought a bit more about the above case, we could see the involvement of “*saṅkhāra paccayā viññāṇa*.” When one starts thinking consciously (generating *vacī saṅkhāra*) about drinking and then also do it frequently (*kāya saṅkhāra*), then one’s “drinking *viññāṇa*” will grow in strength.
- That is why we must be careful about letting our thoughts “go wild” or “daydreaming.” See “[Correct Meaning of Vacī Saṅkhāra](#).”
- One should think about one’s bad habits or “bad *viññāṇa*” that keep popping up in mind regularly. By being mindful, we can suppress such thoughts (by thinking about their adverse consequences or *ādīnava*) and reduce such bad *gati*. Similarly, one can strengthen one’s “good *gati*” by engaging more in similar activities.
- That is the basis of *Ānāpāna* and *Satipaṭṭhāna*.

4.4 Living Dhamma – Fundamentals

October 27, 2016

- [What Are Kilesa \(Mental Impurities\)? – Connection to Cetasika](#)
- [Suffering in This Life – Role of Mental Impurities](#) (with *Desanā* 2)
- [Satipatthāna Sutta – Relevance to Suffering in This Life](#) (with *Desanā* 3)
- [How Are Gati and Kilesa Incorporated into Thoughts?](#) (with *Desanā* 4; in two parts)
- [Noble Eightfold Path – Role of Sobhana Cetasika](#)
- [Getting to Samādhi](#) (with *Desanā* 5)
- [Sexual Orientation – Effects of Kamma and Gati](#) (Saṅkhāra)

4.4.1 What Are Kilesa (Mental Impurities)? – Connection to Cetasika

August 26, 2016; revised June 7, 2020; February 18, 2021; August 24, 2022; re-written August 26, 2022; re-written August 27, 2022

We discuss *kilesa* (defilements) in terms of impure mental factors (*asobhana cetasika*.)

***Kilesā* Make a Mind Corrupt**

1. ***Kilesa* in Pāli or *Keles* in Sinhala** (where “කලසනව්‍ය” or *kelesanava*” means “make something impure”) are related to *gati* and *āsava* (in both Pāli and Sinhala.) They are the main reasons we do things (*saṅkhāra*) to perpetuate the *samsāric* journey. The closest English translation for *kilesa* is “impurities accumulated in mind.”

- ***Kilesā* gives rise to immoral thoughts or *akusala citta* via *asobhana cetasika*, as discussed below.** *Asobhana cetasika* is listed in “[Cetasika \(Mental Factors\)](#).”
- *Sobhana* or *asobhana cetasika* (moral or immoral mental factors) are what makes a given *citta* a moral (*kusala*) or corrupt (*akusala*); for details, see “Citta and Cetasika.”
- As you can guess, *sobhana* and *asobhana* mean “beautiful” and “non-beautiful,” respectively.

***Kilesā* Are Related to “San”**

2. There are several posts on related critical concepts of *san*, *saṅkhāra*, *samsāra*, etc. See, “[What is “San”? Meaning of Sansāra \(or Samsāra\)](#).”

- Also, repeated bad habits cultivate *gati* and *anusaya* (hidden cravings/defilements.) All these are related to *kilesa* and lead to a set of unique *kilesa* for each living being. Of course, they keep changing.
- When one removes all these mental impurities or *kilesa* (or *keles*), one attains ***kilesa parinibbāna*** or *saupadisesa Nibbāna*. That person is still “in this world of 31 realms.” That is the state of a living *Arahant*; they have removed all mental impurities from the mind.
- When that *Arahant* dies, there is no rebirth, and *Nibbāna* is “complete.” That is *Parinibbāna* or *anupadisesa Nibbāna*.

Kilesā* And *Upakkilesā

3. *Kilesa* are of different types:

- *Lobha* (excess greed), *dosa* (ill will), and *moha* (delusion) are, of course, the primary mental impurities or *kilesa*.
- The others arise because of the primary three and are called *upakkilesa* (“upa” means “close to”). There are several *Upakkilesa Suttas* describing them variously. “[WebLink: suttacentral: Upakkilesa Sutta \(AN 5.23\)](#)” provides an analogy. Just as gold becomes dull and hard to work if other metals are mixed in, *pañcanīvaraṇa* makes a *citta* dull.
- “[WebLink: suttacentral: Upakkilesa Sutta \(MN 128\)](#)” has a more detailed description. I have linked it to the start of that discussion.

Cetasika Analysis in Abhidhamma

4. *Abhidhamma* provides a more detailed description of *kilesa* and *upakkilesa* in terms of *cetasika*.

- *Kilesā* and *upakkilesā* are all *asobhana cetasika*. The three main *asobhana cetasika* (*lobha*, *dosa*, *moha*) are *kilesa*. The rest are *upakkilesa*. That observation will help us better identify *kilesa* and *upakkilesa*.
- The other 11 *asobhana cetasika* belonging to *upakkilesa* are the following: *Diṭṭhi* (wrong views), *vicikicchā* (inability to sort out moral from immoral), *thīna* (dullness of mind), *middha* (trapping of the mind somewhere and losing focus), *issa* (jealousy), *macchariya* (tendency to hide wealth), *kukkucca* (do lowly acts), *ahirika* (shamelessness in doing immoral), *anattappa* (fearlessness in doing immoral), *uddhacca* (tendency to become offended), and *māna* (self-importance).

Kilesā And Upakilesā Are Asobhana Cetasika

5. Identifying *kilesa* as *asobhana cetasika* makes it easier to see how *kilesa* (mental impurities) are systematically reduced and removed at each stage of *Nibbāna*.

- The *Abhidhamma Piṭaka* of the *Tiṭṭaka* was finalized after the Parinibbāna of the Buddha. So, in the *Sutta Piṭaka*, mostly the term *kilesa* was used.
- The Buddha briefly described *Abhidhamma* to Ven. Sāriputta. It took several generations of *Bhikkhus* of the “Sāriputta lineage” to fully assemble the *Abhidhamma* structure. It was finalized only at the third Buddhist Council; see “[Abhidhamma – Introduction](#).”
- Some say that the *citta/cetasika* analysis was “invented” by *bhikkhus* when compiling *Abhidhamma* after the *Parinibbāna* of the Buddha. But they are sadly uninformed. Various types of *cetasika* that can arise in *cittas* are discussed in *suttas*. See, for example, “[Kāya Sutta \(AN 10.23\)](#)” and “[Mahācunda Sutta \(AN 10.24\)](#).”

Removal (Non-appearance) of Asobhana Cetasika with Magga Phala

6. There are four universal *asobhana cetasika* that are in ALL *akusala citta*. They are *moha* (delusion), *uddhacca* (restlessness), *ahirika* (shameless of wrongdoings), and *anattappa* (fearlessness of misdeeds). See “[Cetasika \(Mental Factors\)](#).” It is easy to see that these four *asobhana cetasikā* or mental impurities are completely removed only at the *Arahant* stage. However, all *akusala cetasikā* reduce in strength at each stage of *magga phala*.

- The following *asobhana cetasika* stop arising after the *Sotāpanna* stage: *diṭṭhi*, *vicikicchā*, *thīna*, *middha*, *issā*, *macchariya*, *kukkucca*. Furthermore, *lobha*, *dosa*, and *moha* reduce the strength to become *rāga*, *paṭigha*, and *avijjā*.
- The above clarification could help one decide whether one has attained the *Sotāpanna* stage. (See the meanings of those Pāli terms in #4 above): for example, one should have lost jealousy, a tendency to hide wealth from others, etc.). This means that one has realized the worthlessness of material things to a significant extent; that comes with comprehending the *anicca* nature to some extent.

- At the *Sakadāgāmi* stage, *kāma rāga* (which is a part of *rāga*) and *paṭigha* reduce in strength (they still keep the same names). At the *Anāgāmi* stage, both *kāma rāga* and *paṭigha* stop arising.
- The remaining *asobhana cetasika* (*avijjā*, *ahirika*, *anatappa*, *uddhacca*, *mana*) stop arising at the *Arahant* stage.

Many Mental Impurities Removed at *Sotāpanna* Stage

7. Thus, we can see that many “mental impurities” or *kilesa* or *asobhana cetasika* stop arising after the *Sotāpanna* stage. Still, a *Sotāpanna* abstains entirely from only one *akusala kamma*, as discussed in “[What is the only Akusala Removed by a Sotāpanna?](#).”

- The Buddha said that the *kilesa* leftover for a *Sotāpanna* is equivalent to a thumb-full of sand compared to sand on Earth for an average human. Now we can see why. Many *asobhana cetasika* stop arising, and all others are reduced in strength at the *Sotāpanna* stage.
- Note that *akusala kamma* (immoral deeds) are different from *akusala citta* (immoral thoughts). There are ten *akusala kamma* and 12 *akusala citta*. See “[Ten Immoral Actions \(Dasa Akusala\)](#)” and “[Akusala Citta and Akusala Vipāka Citta](#).” The mind is a very complex entity, and all these parameters are needed to describe what happens in mind. But they are all inter-consistent. With time, one can grasp various aspects of the mind with these parameters.
- All different types of defilements removed or reduced at each stage of *Nibbāna* are listed in “[Conditions for the Four Stages of Nibbāna](#).” That table provides a complete summary in one place.

Kilesa in Twelve Types of *Akusala Citta*

8. Let us discuss some practical things when figuring out how different types of *cetasika* influence our thoughts (*citta*.)

- As shown from #6, *moha* (or its reduced form *avijjā*) is in all *akusala citta*. There are only 12 types of *akusala citta*, and 8 of them have *lobha* (or its reduced forms of *kāma rāga*, *rūpa rāga*, or *arūpa rāga*). When one is attracted to a sensory object, one of these eight *akusala citta* arises.
- *Lobha* and *dosa* do not arise together. There are only two *akusala citta* with the *dosa cetasika*. When repulsed by a sensory object, one of these two *akusala citta* arise.
- The other two *akusala citta* do not have either *lobha* or *dosa*, but only the *moha* as a root. These two *citta* arise not due to greed or hate but purely due to *moha* (or *avijjā*, its reduced form).
- More details can be found in the post, “[Akusala Citta and Akusala Vipāka Citta](#).”

Kilesā, *Asobhana Cetasika*, and Immoral *Gati*

9. Each person's *kilesā* are thus a combination of the 14 *asobhana cetasika* but keep changing/evolving. The goal is to stop them from arising. In practice, this happens by changing one's *gati* (habits) and *anusaya* (hidden cravings); see “[9. Key to Ānāpānasati – How to Change Habits and Character \(Gati\)](#).”

- Until the *Sotāpanna* stage, any of the *asobhana cetasika* can arise in a person. They may temporarily be subdued or lessened in strength but never removed.
- Therefore, these *kilesā* (or *asobhana cetasika*) do not always appear; they can stay hidden as *anusaya*. They can come to the surface when triggered by an external stimulus (like seeing an attractive person or an enemy). This “bubbling up to the surface” is called *āsava*. See, “[Āsava, Anusaya, and Gati \(Gathi\)](#).”
- When in a comprehensive *anāriya* meditation program (like a meditation retreat), these *kilesā* (or *asobhana cetasika*) do not get a chance to come to the surface; they stay hidden as *anusaya*. The environment at a retreat is such that “temptations” would be minimal. Thus one could be enjoying *nirāmisā sukha* at such a retreat.

- However, when one returns from the retreat, one is exposed to various sensory inputs. That WILL re-awaken the same old *akusala citta* burdened with *asobhana cetasika*.

Once Removed at a *Magga Phala*, *Kilesa* Cannot Return

10. However, when one removes a part of *kilesa* (*asobhana cetasika*) at each stage of *magga phala*, they are **PERMANENTLY removed or reduced per #6 above**. No external stimulus can trigger *asobhana cetasikā* that have been permanently removed.

- That is the difference between the temporary relief many have experienced at meditation retreats and the permanent relief upon becoming a *Sotāpanna*, i.e., between the *anāriya* and *Ariya* Paths.
- See “[Akusala Citta – How a Sotāpanna Avoids Apāyagāmi Citta.](#)”

An Analogy

11. Since all these Pāli words could confuse you at the first read, let us use an analogy to clarify what *kilesā* (*asobhana cetasikā*) do to our thoughts. **Here we compare *citta* (or thoughts) to a glass of pure water.** Most of our thoughts are like clear water. They are not immoral or moral, just neutral. We see, hear, etc., millions of things daily but generate moral or immoral thoughts in relatively few cases.

- In this analogy, immoral thoughts are like dirty water. Just like added dirt makes the water cloudy, *asobhana cetasikā* contaminate a *citta*. But how do these *asobhana cetasikā* get incorporated into a *citta*?
- Since a *citta* arises in a billionth of a second, **there is no way to control** what kinds of *cetasikā* get into a *citta*. It happens automatically, according to our *gati/anusaya*!

Anusaya Can Be Compared to Mud at the Bottom of the Glass

12. Even though a glass of water has dirt, most of it settles at the bottom. Thus, the water appears relatively clean. Our minds are like that too. **Most of the dirt (mental impurities, *kilesa*, or *asobhana cetasika*) remain hidden most of the time.** They stay as *anusaya*; see “[Āsava, Anusaya, and Gati \(Gathi\).](#)” Thus *anusaya* can be thought of as “the dirt accumulated” at the bottom of the water glass.

- However, if stirred with a straw, the dirt will make the water dirty.
- **In the mind’s case, the stirrer is a desired (attractive) or an undesired (repulsive) sense event.** Mainly the *asobhana cetasika* of greed and hate come to the surface (always accompanied by the four universal *cetasika* mentioned in #4, but could be accompanied by a few more of the other 11 *asobhana cetasika*, depending on the situation.
- The other two related parameters of *gati* and *anusaya* contribute to setting up the exact *asobhana cetasika* that will arise for a given sensory input. For example, an alcoholic only has to see a whiskey bottle to get the urge for a drink. Only a person with ingrained habits (*gati*) of a thief will steal on impulse, i.e., *anusaya* will be triggered automatically.

Connection to *Pañcanīvaraṇa*

13. **Another related point is that glass with dirt ALWAYS has some of it mixed in with water**, even though most of the “heavy stuff” goes to the bottom. **We can compare that “ever-present” muddy color to the *pañca nīvaraṇa* (five hindrances),** which makes our minds “covered” almost at all times.

- Just like the dirty water prevents us from seeing what is in the water, a mind covered with *pañca nīvaraṇa* cannot “see-through.”
- These “ever-present” *pañca nīvaraṇa* are responsible for the “sense of agitation” or “sense of unfulfillment” that is there with us most of the time.

- When engaged in a meditation program, the mind can become relatively pure for a considerable time. That is called *vikkhambhana pahāna* (or *pahāna*.) That is in contrast to *tadaṅga pahāna* (suppressing only for a short time) and *uccheda pahāna* (permanent removal). See [“Suffering in This Life – Role of Mental Impurities.”](#)
- By the way, while listening to a discourse or reading a Dhamma post, one could get into *tadaṅga pahāna*. Then the content may become easily understood, and one could momentarily feel the *nirāmisā sukha* too. That is why one should read these posts when the mind is relatively calm. That makes conditions for *tadaṅga pahāna* optimum and even extends to *vikkhambhana pahāna*, i.e., for a day or longer.

Nirāmisā Sukha Appears With Removal/Suppression of Kilesa

14. Now we can see how *nirāmisā sukha* comes during meditation sessions per the question raised in a previous post, i.e., “*Nirāmisā sukha* is felt by which *citta*?”.

- *Nirāmisā sukha* appears when the *asobhana cetasika* (or *kilesa*) and *pañca nīvaraṇa* are SUPPRESSED.
- The post [“Noble Eightfold Path – Role of Sobhana Cetasika”](#) addresses how a *Sotāpanna*’s mind automatically blocks certain types of *asobhana cetasika*.

Why Is It Necessary to Use Pāli Words?

15. I hope everyone will understand my reasons for emphasizing Pāli words. In many cases, it is difficult or even impossible to find a single English word to convey the meaning of a Pāli word (e.g., *anicca*); these are powerful words that pack a lot of content. Here, there is no equivalent word in English for *kilesa*.

- It is best to use Pāli words (and some Sinhala words like “*niveema*” or “*suva*”), but with an understanding of what they mean. See [“Why is it Necessary to Learn Key Pāli Words?”](#) So, don’t be discouraged by these Pāli terms; keep reading to the end, and you will see it start making sense. You can “fill in the gaps” by reading relevant posts afterward.

4.4.2 Suffering in This Life – Role of Mental Impurities

September 2, 2016

1. In the post, [“Starting on the Path Even without Belief in Rebirth”](#) in this series (“[Living Dhamma](#)”), we introduced two types of hidden suffering revealed to the world by the Buddha, and discussed the first type of suffering that we experience in this life.

- Here we continue that discussion, and figure out ways to relieve that suffering.

2. In the previous post, [“What Are Kilesa \(Mental Impurities\)? – Connection to Cetasika,”](#) we discussed how *asobhana cetasika* represent the mental impurities or *kilesas*.

- In this and a few more *desanās*, we will discuss that highly condensed post, in order to simplify and clarify the main ideas relevant to practice.

3. Here is the *desanā* ([You may need to adjust volume control on your computer](#)):

[WebLink: Audio Desana: Episode 2 - Suffering in This Life - Role of Mental Impurities](#)

4.4.3 **Satipatthāna Sutta – Relevance to Suffering in This Life**

September 10, 2016

1. This is the sixth post in this series. It is important to follow the series from the beginning. All posts are at: “[Living Dhamma.](#)”

- Here I want show that what we have been discussing in this section is exactly what is recommended in the beginning of the *Mahā Satipatthāna Sutta*.
- Here we will discuss the key verse, “*ātāpī sampajāno, satimā vineyya loke abhijjhā domanassam*” that appears in the *sutta* numerous times. It is also the basis of the *Ānāpānasati bhāvanā*.

2. Many people believe that the *Sutta* is basically a *kammattana* that one recites or “meditate on.” But it is much more than a *kammattana*. I will provide more evidence in future posts, but here is the audio on the basics of the *Mahā Satipatthāna Sutta* (you may need to control the volume in your computer):

[WebLink: Audio Desana: Episode 3 - Satipatthāna Sutta - Relevance to Suffering in This Life](#)

[WebLink: Audio Desana: Episode 3 - Satipatthāna Sutta - Relevance to Suffering in This Life](#) (Original - Larger file size)

3. **Links relevant to the *desanā*:**

Next post in the series, “[How Are Gati and Kilesa Incorporated into Thoughts?](#).”

4.4.4 **How Are Gati and Kilesa Incorporated into Thoughts?**

September 22, 2016

In this post, we will discuss why *mano saṅkhāra* are different from *kāya* and *vacī saṅkhāra*. Understanding this will help one to realize how our *gathi* can AUTOMATICALLY give rise to immoral thoughts.

- It will also help one understand how such initial immoral thoughts can be overcome by purposefully generating moral thoughts. This is actually the basis of the *Satipatthāna* and *Ānāpānasati bhāvanā*.
- Furthermore, we will discuss the issue of where our *gathi*, *kilesa*, or *cetasika* are “stored.”

This is the seventh post in this section: “[Living Dhamma.](#)” To get full benefits, one should start from the first post. I am using a combination of text and audio files to convey a lot of information in this section.

Here are the audio files :

[WebLink: Audio Desanā: Episode 4 - How Are Gati and Kilesa Incorporated into Thoughts?](#)

[WebLink: Audio Desanā: Episode 4 - How Are Gati and Kilesa Incorporated into Thoughts?](#) (Original - Larger file size)

October 22, 2017: I just listened to the above audio after one year. They are good and provide solid basis for understanding *gati* and how they can be changed by controlling *vacī* and *kāya saṅkhāra* that we have control over.

- It is important to realize that many *citta vīthi* flow in a second. But each subsequent *citta vīthi* is influenced by the previous one. So, they can take one on a downward path very quickly unless we intervene by being mindful.
- It is very important to realize that: *mano saṅkhāra* are generated AUTOMATICALLY based on our *gati*. *Vacī saṅkhāra* are generated when we “talk to ourselves, without getting the words out.” Both such “internal speech” and actual speech are associated with *vacī saṅkhāra*; bodily actions are *kāya saṅkhāra*.
- **July 26, 2019:** Reader Siebe just pointed out that at 14.30 mins I had defined speech as ‘*kāya saṅkhāra*. That is not correct, as explained in more detail in [“Correct Meaning of Vacī saṅkhāra.”](#)
- We become CONSCIOUS about both *vacī* and *kāya saṅkhāra* quickly and thus have control over them; see, [“Correct Meaning of Vacī saṅkhāra.”](#)

Posts mentioned in the *desanā*

1. Suicide statistics: [WebLink: Suicide and Depression](#)

- I know that most readers of this site do not have suicidal tendencies. But the point is that we underestimate the severity of mental suffering compared to our physical suffering.

2. If one has a hard time comprehending the *Tilakkhaṇa*, starting with *anicca*, one needs to first follow the mundane Eightfold Path, remove the first type of suffering, and experience the *nirāmisa sukha* as explained in the previous posts in this section.

- This is also pointed out in the [“Mahā Cattārīsaka Sutta \(Discourse on the Great Forty\)”](#) and [“Buddha Dhamma – In a Chart.”](#)

3. More details on how our minds control our physical bodies are in the sections: “Citta and Cetasika” and [“Gandhabba \(Manomaya Kāya\).”](#)

- In particular, the following post illustrates how we perceive our external world: [“Citta and Cetasika – How Viññāna \(Consciousness\) Arises.”](#)
- *Citta Vīthi* are discussed in [“Citta Vīthi – Processing of Sense Inputs.”](#)

4. How thoughts can affect other people: [“Transfer of Merits \(Pattidana\) – How Does it Happen?”](#)

5. The brain architecture of humans and animals: [“Truine Brain: How the Mind Rewires the Brain via Meditation/Habits.”](#)

6. The post mentioned in the discussion on the question “Where are these *gati* or *kilesa* or *cetasika* are maintained or stored?”: [“Our Two Worlds: Material and Immaterial.”](#)

Next in the series, [“Noble Eightfold Path – Role of Sobhana Cetasika.”](#)

4.4.5 Noble Eightfold Path – Role of Sobhana Cetasika

September 30, 2016; revised December 5, 2017 (#5); July 11, 2021; August 26, 2022

1. In previous posts in this section, we have discussed how *nirāmisā sukha* or “peace of mind” arises due to both removal of *asobhana cetasika* (non-beautiful mental factors) or *kilesa* AND the cultivation of *sobhana cetasika* (beautiful mental factors).

- In this post, I will point out that 7 of the 8 factors in the Noble Eightfold Path are in the set of *sobhana cetasika*.

2. The most important fact that one needs to comprehend from the posts in this series up to this point, is that our minds are heated/agitated by the presence of *asobhana cetasika* or *kilesa* or defilements.

- On the other hand, our minds are soothed and comforted, and made joyful by the presence of *sobhana cetasika*.
- One may not realize this until one comprehends this fact and practices cultivating *sobhana cetasika* while suppressing/removing *asobhana cetasika*.

3. As explained elsewhere at the site, *Abhidhamma*, with its methodical analysis of *citta* and *cetasika*, was not finalized for a few hundred years after the *Parinibbāna* of the Buddha at the Third Buddhist Council. This enlarged Canon completed at the Third Council was committed to writing in Sri Lanka in the first century BCE (29 BCE) at the Aluvihara Monastery at the Fourth Buddhist Council. This was the last Buddhist Council attended by *Arahants*.

- Soon after that, the decline of the pure Dhamma of the Buddha started its decline with the simultaneous rise of the Mahāyāna; see the section “[Historical Background](#).”
- When Buddhaghosa wrote the *Visuddhimagga*, presumed to be a summary of the *Tipiṭaka*, even *Theravadins* stopped using the *Tipiṭaka* for convenience.
- Therefore, no one seemed to have realized some important possible usages of *cetasika*: First, *kilesa* are the same as *asobhana cetasika*. Second, components of the Noble Eightfold Path are in the set of *sobhana cetasika*. This makes it easier to comprehend how one could systematically follow the Path, which is the post’s focus.
- I will discuss the details in the upcoming *desanās*, but here I would like to provide a summary that we can use for that discussion. Another summary post that will be used in these *desanās* is a summary given in one of the previous posts: “[What Are Kilesa \(Mental Impurities\)? – Connection to Cetasika](#).”

4. Let us start by continuing from the last *desanā*, where we discussed how **INITIAL thoughts in response to a sensory event arise without us even being conscious about it**. These initial thoughts arise AUTOMATICALLY due to our *gati* or set of *sobhana/asobhana cetasika*. Any *akusala* thoughts arise due to our *kilesa*, which are the same as *asobhana cetasika*.

- However, because our speech and bodily actions are much slower than the rising of those initial thoughts, we can keep vigilant and reverse any reactive *akusala* thoughts that are AUTOMATICALLY generated.
- This is the basis of both *Satipaṭṭhāna* and *Ānāpānasati Bhāvanā*. Please listen to that previous *desanā* on “[How Are Gati and Kilesa Incorporated into Thoughts?](#)” and fully comprehend this important concept. Here is the link to that *desanā* in two parts (there is volume control on the right, but for the second *desanā*, you may need to turn up the volume on your computer):

[WebLink: Audio Desanā: Episode 4 - How Are Gati and Kilesa Incorporated into Thoughts?](#)

[WebLink: Audio Desanā: Episode 4 - How Are Gati and Kilesa Incorporated into Thoughts?](#) (Original - Larger file size)

- We also discussed the evidence for such *gati* to be associated with any given person and addressed the question of where they are “stored.”

5. We also saw in the above *desanās* that those initial thoughts that arise in response to a sense event are called *mano saṅkhāra*. Therefore, we do not have conscious control over *mano saṅkhāra*, AND they arise within a fraction of a second DUE TO our *gati* (set of *sobhana/asobhana cetasika*).

- **December 5, 2017:** Such *akusala mano saṅkhāra* CAN then lead to the generation of *vacī saṅkhāra* (silent speech in our heads and speech) and *kāya saṅkhāra* (bodily actions). This differs from the *desanā*, and I have discussed the reasons for this revision in “[Correct Meaning of Vacī Saṅkhāra](#).”
- But, if we are mindful (*sati*), we can catch any such *akusala mano saṅkhāra* and make sure they do not lead to *akusala vacī* and *kāya saṅkhāra*.
- In the Eightfold Path, such deliberately generated *vacī saṅkhāra* are called ***sammā saṅkappa* or *sammā sankalpa***.
- And those *sammā saṅkappa* were generated because one acted with ***sammā sati***.

6. In the above *desanās*, we discussed an example of a person X finding a lost ring. If X had strong greedy *gati*, The initial thoughts (*mano saṅkhāra*) could be to keep the ring for himself. However, if X knows about being mindful, X has time to evaluate the situation with *vacī saṅkhāra* (in his head) and conclude that keeping the ring for himself is immoral.

- If he made that correct decision, even after thinking about it, he could prevent an *akusala kamma* of stealing. Not only that, he can do a *kusala kamma* by ensuring that the ring is returned to the rightful owner.
- So, now we can see the critical roles of *sammā sati* and *sammā saṅkappa* in the Eightfold Path. We have the opportunity (unlike animals) to rationally think about our initial REACTIVE decisions and to reverse them if they are immoral.

7. If X acted with *sammā sati* and realized the problem with the initial reaction and made the right decision with *sammā saṅkappa*, then he can take the next steps to ***sammā vācā*** (moral speech) and ***sammā kammanta*** (moral actions) to implement that decision. He can walk over to the counter, hand over the ring, and tell the office personnel to return the ring to the owner.

- This is just one possible example. We come across many such instances during the day. In another example, one may get annoyed by someone accidentally stepping on one's foot in a crowded place and start yelling at that person without thinking about the consequences. That person did not intentionally do that, especially since it was likely to be a stranger.
- Even if one started getting the words out, one could quickly stop and smile at the person indicating that it is no big deal. That would make that person be relieved because, most likely, he/she felt bad about it.
- This simple act of kindness would lead to a “cooling down” on both sides. The other person will feel relief and will thank for the kindness. Furthermore, it could have escalated into a shouting match and led to “heated minds” on both sides.

8. When one sees the benefits of such mindful behavior, one will start doing more. One will start living a moral life. This is ***sammā ājīva*** or moral livelihood.

- Not only that, one will make an extra effort to be mindful and catch any reactive thoughts that could lead to such *akusala kamma*. This is ***sammā vāyāma*** or moral effort.
- In a few weeks or months, this will start changing one's ingrained *gati*. When one stops using *asobhana cetasika*, their power will diminish with time. At the same time, one is cultivating *sobhana cetasikā* (i.e., *sammā sati*, *sammā saṅkappa*, *sammā vācā*, *sammā kammanta*, *sammā ājīva*, *sammā vāyāma*). Thus bad *gati* will diminish, and good *gati* will grow.

9. Now, X was able to think rationally about the bad consequences of his initial decision (*mano saṅkhāra*) to keep the ring because he had ***sammā diṭṭhi*** or moral vision, to some extent. Deep down, he knew that such an act of stealing was immoral and was able to fight off the tendency to keep it.

- *Sammā diṭṭhi* is related to the *sobhana cetasika* of *paññā*, which is loosely translated as “wisdom.” This “wisdom” cannot be cultivated by reading books, even by reading Dhamma. The *paññā cetasika* is cultivated by learning Dhamma and living it (i.e., by following the Eightfold Path), thereby getting rid of *moha*.

10. Now, let us examine the connection between the other factors in the Eightfold Path (here, the mundane version) and some of the *sobhana cetasika*.

- First, three factors in the Eightfold Path have the same names in the list of *sobhana cetasika*: *sammā vācā*, *sammā kammanta*, *sammā ājīva*; see “[Cetasika \(Mental Factors\)](#).”

11. *Sammā saṅkappa* are the *vacī saṅkhāra* that we deliberately generate even if we have *akusala mano saṅkhāra* arising due to sense inputs. *Vacī saṅkhāra* are described in the *suttā* as *vitakka* (pronounced “vithakka”) and *vicāra* (pronounced “vichaara”). *Vitakka* is turning the mind towards a thought object, and *vicāra* is keeping the mind around that thought object.

- Those who are familiar with *jhānā* know that *vitakka* and *vicāra* are two *jhāna* factors in *anāriya jhānā*. In the first *anāriya jhāna*, one can, for example, turn the mind into a *kasiṇa* object (*vitakka*) and keep it there (*vicāra*). In *Ariya jhānā*, they are called *savitakka* and *savicāra* because one is focused on *Nibbāna*.
- So, you can see that maintaining *sammā saṅkappa* is the same as generating “moral” *vitakka* and *vicāra* or *kusala vacī saṅkhāra*. Remember that these are generated in the head, not speaking out. They are called “*sankalpana*” in Sinhala.
- Also, we note that *vitakka* and *vicāra* could be used in immoral paths. A master thief planning a robbery will focus on that task and spend many hours thinking about the plan. So, those two *cetasikā* fall under the category called particulars or *pakiṇṇaka*; they can appear in *kusala* or *akusala* thoughts as needed.

12. Now, *sammā vāyāma* arises from another of these particulars, or *pakiṇṇaka cetasika*, the *virīya cetasika*.

- When one is making an effort to live a moral life, that *sammā vāyāma*. If one is making an effort towards an immoral life, like that master thief, he is making *micchā vāyāma*.
- Of course the *sati cetasika*, which is a *sobhana cetasika*, is *sammā sati*.

13. Now, we are left with ***sammā samādhi***. This is the only factor that is not related to a *cetasika* directly. Most people have the idea that *samādhi* is *jhāna* or at least is attained only in formal meditation. But it is much deeper. In the next *desanā*, I will discuss *samādhi* and the implications of what is summarized in this post.

- We are trying to comprehend and reinforce the FOUNDATION of Buddha Dhamma: How one can remove the “*thaapa*” or “heat” from the mind by getting rid of *asobhana cetasika* (*kilesa*) and SIMULTANEOUSLY “cool down” the mind and bring joy to it, by cultivating *sobhana cetasika*.

This was discussed in the first *desanā* in this series:

“The Hidden Suffering that We All Can Understand”

[WebLink: Audio Desanā: Episode 1 - The Hidden Suffering That We All Can Understand](#)

[WebLink: Audio Desanā: Episode 1 - The Hidden Suffering That We All Can Understand](#) (Original - Larger file size)

- More details were given in the following two *desanās*:

“Suffering in This Life – Role of Mental Impurities”

[WebLink: Audio Desanā: Episode 2 - Suffering in This Life - Role of Mental Impurities](#)

[WebLink: Audio Desanā: Episode 2 - Suffering in This Life - Role of Mental Impurities](#) (Original - Larger file size)

“Satipattana Sutta – Relevance to Suffering in This Life”

[WebLink: Audio Desanā: Episode 3 - Satipatthāna Sutta - Relevance to Suffering in This Life](#)

[WebLink: Audio Desanā: Episode 3 - Satipatthāna Sutta - Relevance to Suffering in This Life](#) (Original - Larger file size)

14. As discussed in the above *desanās*, *akusala* thoughts that arise with *asobhana cetasika* cloud our minds and keep us in the dark. *Moha* is darkness; it leads to *lobha* and *dosa*. That darkness can be temporarily lifted (*tadaṅga pahāna*) during listening or reading Dhamma.

- The next step is to keep that “light on” for days and weeks by being mindful and stopping *akusala* thoughts that lead to *akusala kamma* for an extended time. This is *vikkhambhana pahāna*, which is what we are trying to achieve now. It is done by being mindful, i.e., with *sammā sati*.
- The ultimate goal is to permanently remove such *asobhana cetasika* and to make that “cooling down” permanent (*uccheda pahāna*), even for future lives. We will get to that in future posts. But we need to establish a good foundation and experience the *nirāmisa sukha* for extended periods (*vikkhambhana pahāna*) first.

15. To get rid of darkness (*moha*), one has to bring light in. Light is *paññā* or “wisdom”, a *sobhana cetasika*. The Noble Eightfold Path is designed to optimize the *paññā cetasika* — via *sammā samādhi* — and to eliminate the *moha cetasika*.

- Other *sobhana cetasika*, like *karuṇā* and *mudita* (or *mudutā*) also help with this process.
- Ultimately, one will see how different pieces of the puzzle (including *Paṭicca Samuppāda*) all fit together to make an easy-to-see picture of the whole process. That will make it easier to grasp the *Tilakkhaṇa* and advance to the next stage.
- All of these can be shown to be consistent with the scheme of *sīla*, *samādhi*, and *paññā*. In the [WebLink: suttacentral: Cetanā Karanīya Sutta \(AN 11.2\)](#), the Buddha has detailed how *sīla* (moral conduct) leads to *nirāmisa sukha*, and *nirāmisa sukha* leads to *samādhi*, and *samādhi*, in turn, leads to *paññā*. We will discuss all these in the upcoming *desanās*.

Next in the series, “[Getting to Samādhi](#).”

4.4.6 Getting to Samadhi

October 7, 2016

1. In the post “[Noble Eightfold Path – Role of Sobhana Cetasika](#),” it was discussed how 7 of the 8 factors in the Noble Eightfold Path are related to some of the *sobhana cetasika* or moral mental factors.

2. In the following *desanā*, we discuss how the cultivation of those 7 factors lead to the 8th factor in the Noble Path, *Sammā Samādhi*, or at least the mundane version of it first (volume control will appear on right when you start playing):

“[Getting to Samādhi](#)”

[WebLink: Audio Desana: Episode 5 - Getting to Samādhi](#)

[WebLink: Audio Desana: Episode 5 - Getting to Samādhi](#) (Original - Larger file size)

Links mentioned in the *desanā*:

3. Before one can comprehend the *Tilakkhaṇa* (*anicca, dukkha, anatta*), one needs to get to mundane *Sammā Samādhi*. There are two kinds of *Sammā Samādhi* and also a *micchā samādhi*:

- [What is Samādhi? – Three Kinds of Mindfulness](#)
- [Three Kinds of Dīṭṭhi, Eightfold Paths, and Samādhi](#)

4. The role of the brain in changing one's *gathi*:

- [Brain – Interface between Mind and Body](#)

5. Two types of suffering discussed in:

- [Starting on the Path Even without Belief in Rebirth](#)

6. Suppressing and eliminating the *pancanivarana* in stages:

- [Suffering in This Life – Role of Mental Impurities](#)

Next in the series, “[Micchā Dīṭṭhi – Connection to Hethu Phala \(Cause and Effect\)](#)”, ...

4.4.7 Sexual Orientation – Effects of Kamma and Gati (Saṅkhāra)

January 14, 2017

This post will be helpful in not only clarifying Buddha's teachings on sexual orientation, but also that there can be many varieties of *saṅkhāra*, *viññāṇa*, and corresponding *bhava* and *jāti* arising according to *paṭicca samuppāda*.

1. In this beginning-less rebirth process, it is likely that we all had switched between male or female many times, just as we are likely to have been born in most of the 31 realms in the past.

- It is said that the *Bodhisattva* — before becoming Buddha Gotama — was a female when the *paramita* process to become a Buddha was initiated.
- However, once the *paramita* process progressed, and the *Bodhisattva* became a male, it never switched back to female.
- Only a male can actually be a Buddha.

2. Whether one is male or female is predominantly determined by one's *saṅkhāra*, and not due to a past *kamma*.

- But in some cases, *kamma* could be the direct cause. For example, if one intentionally severed or mutilated another's sexual organs, it is possible that one may be born without a sexual organ. Such a person is called a “*napunsaka*” in Sinhala (*pandaka* in Pāli), but I am not aware of a corresponding English word.
- An eunuch is a person who is castrated, so that also could be due to a *kamma vipāka* of a past *kamma*.

3. Male/female distinction is there only in the *kāma loka*. In the *brahma* realms (higher 20 realms), there is no such distinction. *Brahmā* do not have dense physical bodies or sexual organs.

- One is born in either the 16 *rūpa loka* realms or the 4 *arūpa loka* realms (*brahma* realms) because one has given up all desires for bodily pleasures, including sex, because one has seen the value of *nirāmisa sukha* (and *jhānic* pleasures) that can be achieved by giving up bodily pleasures.

4. One is born in *kāma loka* because one likes bodily pleasures, especially those associated with taste, smell, and sex. Of course, vision and sound that help satisfy those three bodily pleasures also come into play here.

- One is born in human or *deva* realms in the *kāma loka* because one has done meritorious deeds (*puñña kamma*). There are female *devas*, who have attained those births because of their *puñña kamma* just like male *devas*. One is born a female *deva*, because one has cultivated “*iththi saṅkhāra*”; see #5 below.
- One is born in the four *apāya* realms in the *kāma loka* because one has done immoral deeds (*pāpa kamma*). Here the corresponding *saṅkhāra* are *apuññabhi saṅkhāra*.

5. One is born male or female due to whether one cultivates “*purisa saṅkhāra*” or “*iththi saṅkhāra*” by thinking, speaking, and doing things accordingly. One does not do either *puñña abhisāṅkhāra* or *apuñña abhisāṅkhāra* here.

- Such *saṅkhāra* (*kaya*, *vacī*, and *mano*) are not necessarily meritorious (*puññabhi saṅkhāra*) or immoral (*apuññabhi saṅkhāra*). Those are in line with pure habits based on “*purisa gathī*” and “*iththi gathī*.”
- This can be compared to cultivating habits for playing a certain musical instrument. They are called “*vāsana keles*,” *keles* that do not have good or bad *kamma vipāka*, but more like ingrained habits.

6. *Purisa* is the Pāli or Sinhala word for a male and the word comes from “*pirī*” or “full.” A male is likely to give more (especially to the wife) than to take from the wife. *Iththi* is the Pāli (and old Sinhala) word for female, and means “*ithirī*” or “left over space to be filled.” For example, if a cup is full that is “*pirī*”; if it is not full, it needs more to become full, it has “*ithiri*.”

- So, a male is likely to willingly buy things for the wife, but does not care much about his appearance. Most wives expect gifts and sustenance.
- However, these “*purisa gathī*” and “*iththi gathī*” can have large variations. A male has more “*purisa gathī*” than “*iththi gathī*.” But we do see “alpha males” with close to 100% “*purisa gathī*” as well as females with very high “*iththi gathī*.”
- On the other hand, we also see females who like to act and dress more like males, and also males who like to act and dress more feminine. If they cultivate those *gathī* more, a sex change is possible in future lives (in rare cases even in this life).

7. In most families, if one examines the wardrobes of the husband and wife, one is likely to find many more items in the wife’s wardrobe (in particular, the man may have a couple of pairs of shoes but the wife will have many!). Females wear much more jewellery too.

- Furthermore, a female is more concerned about the appearance of her (and her husband). A guy usually grabs something to wear, but a woman is likely to pay much more attention. I know by experience that I have been “instructed politely” to change into something better many times when going out.
- Thus females constantly think about theirs (and their spouses and children’s) appearance. This is not necessarily due to greed, but mainly due to *sansāric* habits.

8. Therefore, as far as attaining *Nibbāna*, it does not matter whether one is a male, female, or somewhere in between (with mixed *gathī*).

- One is born in the *deva* realms due to good *kamma vipāka*, and there are male and female *devas*, just like in the human and animal realms. The type of sex is not determined by *kamma vipāka*.
- All *brahma* realms are “*unisex*.” They do not have *bhava dasaka*, which determine the sex type. *Brahmā* do not have dense bodies to experience touch, taste of foods, or smells. **They have very fine bodies with just the *hadaya vatthu*, *kaya dasaka*, *cakkhu dasaka*, and *sota dasaka*.**
- **Therefore, a *brahma* “body” has only a few *suddhaṭṭhaka*, and is much much smaller than an atom in modern science.** So, it is clear why sense pleasures are absent in *brahma loka*.

9. It is important to realize that there are moral *gathi* due to *puññābhisāṅkhāra* (*puñña abhisāṅkhāra*), immoral *gathi* due to *apuññābhisāṅkhāra* (*apuñña abhisāṅkhāra*), and “kammically neutral” *gathi* due to *saṅkhāra* that are not *abhisāṅkhāra*.

- While one is born in the human *bhava*, one would also have a “*iththi bhava*” (as a female) or “*purisa bhava*” (as a male).
- Not only that, one could be born in an “angry *bhava*” for a given period of time that would be triggered by a sense event such as seeing an enemy — if one has cultivated angry *gathi* by thinking, speaking, and acting with an angry mindset.
- One could be born in a “greedy *bhava*” the same way. If we start acting mindfully to think, speak, and act with less greed, those greedy *gathi* will reduce over time.
- The more one thinks, speaks, and acts in a “female way”, one will be cultivating “female *gathi*”; but these are not moral or immoral *saṅkhāra* as we discussed above.

10. In any of these cases, the more *saṅkhāra* one makes, one builds up the corresponding *viññāṇa* (*saṅkhāra paccayā viññāṇa*) and so on until it gets to strengthening *upādāna* and thus strengthening *bhava* (*upādāna paccayā bhava*).

- Therefore, *paṭicca samuppāda* explains not only how *bhava* in the rebirth process, but also in *bhava* that last only for short periods of time, like getting into an “angry state of mind” or “angry *bhava*.”

11. Another possibility that may come into play in a transgender person (a person whose sex is changed during the lifetime) can be understood if one understands the role of the *gandhabba* (mental body) that dictates the functioning of the physical body. *Gandhabba* is not a Mahāyāna concept: “[Gandhabba State – Evidence from Tipitaka](#).”

- When a *gandhabba* goes into a womb, it is not firmly attached to the zygote (the cell formed by the union of the father and the mother) during the first several weeks.
- Sometimes, the *gandhabba* just leaves the womb if it turns out to be not a good match with the parents. This is the reason for a miscarriage.
- If a *gandhabba* leaves the womb within such a short time period, in some cases another *gandhabba* can enter the womb and take possession of the partially formed physical body that was abandoned by the previous *gandhabba*. Now, it may happen that the second *gandhabba* is of opposite sex.
- For example, suppose the first *gandhabba* was a male and the second a female. So, this female is thus taking hold of a physical body that was taking shape to be a male and thus continue to form a male body. Once born as a male baby, and while growing the female character may start to convert the physical body to that of a female. This is what happens to a transgender person.

12. One is bound to the *kāma loka* because one has craving for bodily pleasures, whether it is tasting good food, watching movies, listening to music, smelling nice fragrances, or in engaging in sexual activities. **If one does those activities without engaging in immoral activities, then the only harm done is to be eligible to be born in the *kāma loka*.**

- One cannot be freed from even the higher realms in the *kāma loka* (human and *deva* realms), if one has desires for such bodily pleasures. However, it becomes relevant only at the *Anāgāmī* stage. A *Sotāpanna* or a *Sakadāgāmī* has not given up desires for sensual pleasures.
- **I have not seen anything in the *Tipitaka* that distinguishes between sexual activities based on who the partners are. So, it seems to me that homosexual or bisexual activities are not that different from heterosexual activities as far as *kammic* consequences are concerned. They are all done to achieve bodily pleasures.**

- However, if one engages in any immoral activities — in particular breaking the five precepts — then one would be eligible to be born in the lowest four realms of the *kāma loka*, the *apāyā*.
- I specifically made the comment on the homosexuality in answering a specific question by a reader. The main point is to make sure that **any pleasurable activity at the expense of hurting someone** will have bad consequences, and depending on the nature, could make one eligible to be born in the *apāyā*.

13. One way to understand the *anicca* nature is to take a good look at the transient nature of our physical body and that it can provide only temporary bodily pleasures, even though they are enjoyable.

- The *gandhabba* is the more long-lasting entity; a human *bhava* can last many hundreds to many thousands of years; a physical body is a temporary shell used by the *gandhabba* for about 100 years.
- The bodily pleasures that one experiences with this “physical shell” can last only part of that maximum 100 years. As one gets old, those pleasures go away, and there is no way to keep them the same.
- On the other hand, the *jhānic* pleasures — or at least *nirāmisa sukha* — can be enjoyed even at old age, as long as one keeps steps to maintain the brain in good condition. The *gandhabba* — since it is trapped inside the physical body — needs the brain to in order to be mindful and to cultivate good *vacī* and *mano saṅkhāra*; this is what is emphasized in the earlier posts in this section, and analyzed in detail (for those who need to go deeper) in the *Abhidhamma* section.

14. Finally, it is important to emphasize the point that it will take a concerted effort to understand these concepts fully. The more one reads, the more one will understand. It is not possible to gain insight by reading a few posts. One has to spend time and read relevant posts in order to “fill in the gaps.”

- A simple introduction to the concept of *gandhabbaya* is given in this section: “[Our Mental Body – Gandhabba](#).”
- A section in the *Abhidhamma* is devoted to the concept of *gandhabbaya*: “[Gandhabba \(Manomaya Kāya\)](#).” There are posts in other sections too, in relation to the material in those sections.

4.5 Mundane Sammā Samādhi

October 27, 2016

4.5.1 Micca Dīṭṭhi – Connection to Hethu Phala (Cause and Effect)

October 18, 2016

1. The main reason for many people having various types of *micchā dīṭṭhi* (or wrong views) can be traced back to the fact that the workings of cause and effect involving living beings — and in particular the mind of the sentient beings — is complex.

- Science has been able to have much success in the material realm, simply because it is easier to see how cause and effect work in the material realm.

2. In the discourse (*desanā*) below, we will talk about cause and effect (*hethu-pala*) in Buddha Dhamma, and how **conditions** (*paccaya*) play a critical role in mental phenomena. **The complex relationship between causes and effects in relation to the mind is the reason why it is hard for many to comprehend how and why *kamma* lead to *kamma vipāka*.** As we discuss in the *desanā*:

- Nothing in this world can come to existence without suitable causes AND conditions,
- Rebirth process must be valid, in order to fully implement the principle of causality (cause and effect).

3. The critical link between *hethu-pala* and *paṭicca samuppāda* is *paṭṭhāna dhammā*, which describe the conditions under which causes (*hethu*) bring about effects or results (*phala*).

- In the near future, I will start a new section on *paṭṭhāna dhammā*. It is a deep subject, but it can be simplified to easily understand the relationship between *hethu-pala* and *paṭicca samuppāda*.

4. Here is the *desanā* (**volume control on the right**):

4.5.2 Suffering in This Life and Paṭicca Samuppāda

October 28, 2016

In a previous *desanā* in this section, we discussed how suffering in this life is described in the beginning of the *Mahā Satipaṭṭhāna Sutta*. In this *desanā*, we will discuss how it is described by *Paṭicca Samuppāda*.

“Suffering in This Life – According to Paṭicca Samuppāda”

[WebLink: Audio Desana: Episode 7 - Suffering in This Life According to Paṭicca Samuppāda](#)

[WebLink: Audio Desana: Episode 7 - Suffering in This Life According to Paṭicca Samuppāda](#) (Original - Larger file size)

Links mentioned in the *desanā*:

1. Posts in the “[Paṭicca Samuppāda](#)” can be consulted for details on *Paṭicca Samuppāda* cycles.
2. *Taṇhā*: [Taṇhā – How We Attach Via Greed, Hate, and Ignorance](#)
3. *Mano saṅkhāra* arise automatically, without conscious thoughts. And conscious thoughts — **even without speech** — are *vacī saṅkhāra*:

[How Are Gati and Kilesa Incorporated into Thoughts?](#)

- In this *desanā*, I incorrectly said that speech is *vacī saṅkhāra* because the mouth and the tongue are moved during speech. However, whether one talks to oneself or actually get the words out loud, both are *vacī saṅkhāra*. There is a difference between moving body parts in general (as in walking) and moving the lips and tongues during speech: They are done with two types of *rūpa*: *kāya viññatti* and *vacī viññatti* respectively. I will discuss this in detail later.
- My thanks to the reader who pointed out my mistake in categorizing speech as *kāya saṅkhāra*. I had to dig deeper in *Abhidhamma* to find the explanation. I can and do make mistakes, and that is why I welcome your input. My goal is to have this website to be fully self-consistent.

4.6 Transition to Noble Eightfold Path

September 2, 2017

- [Is It Necessary for a Buddhist to Eliminate Sensual Desires?](#)
- [Sīla, Samādhi, Paññā to Paññā, Sīla, Samādhi](#)
- [Ye Dhammā Hetuppabhavā.. and Yam Kiñci Samudaya Dhammam..](#)

4.6.1 Is It Necessary for a Buddhist to Eliminate Sensual Desires?

September 28, 2018; revised June 1, 2021; December 13, 2021

Introduction

1. I saw the above question raised in a discussion forum recently (with a different title). The questioner stated: “Eliminating sensual desire as a lay follower doesn’t seem possible, or reasonable, especially if one plans on being in a relationship, or having motivation at work. ..”

- I think this is a critical question. Most people have not understood the fact that one MUST follow the Noble Path of the Buddha sequentially.
- **Getting rid of sense desires (including sex, craving for food, etc.) is unnecessary in the beginning and even up to the *Sotāpanna* stage.**
- Getting to the final stage of *Nibbāna* (*Arahanthood*) is a step-by-step process.

Following the Path Is a Step-by-Step Process

2. The necessary INITIAL steps involved are:

- (i). Be a moral person and hold the mundane five precepts (abstain from killing, stealing, sexual misconduct, outright lying, and getting intoxicated) and also gossiping, slandering, and harsh speech; see, “[2. The Basics in Meditation](#).”
- (ii). Understand the correct “wider world view” of the Buddha, and get rid of the ten types of *micchā diṭṭhi*; see, “[Mahā Cattārisaka Sutta \(Discourse on the Great Forty\)](#).”
- (iii). Learn about the “deeper world view of the Buddha,” stated by *Tilakkhaṇa* (*anicca, dukkha, anatta* nature); see, “[Anicca, Dukkha, Anatta](#).”

3. When one starts to understand the “*anicca* nature” (*anicca* means much more than just impermanence) of this world, one becomes a *Sotāpanna Anugāmi*. When that “correct vision” about “this wider world of 31 realms” sinks into the mind permanently, one becomes a *Sotāpanna*.

- **One does not need to even think about removing the desire for sex or any other sensory pleasure until one gets to the *Sotāpanna* stage.** That is a critical point that most people do not understand.

The futility of Starting at the End

4. Therefore, many people waste precious time by either first trying to suppress sense desires, and even in some cases, try to eliminate the innate sense of “me” or “a self.”

- But like one cannot learn algebra or advanced calculus without learning how to do addition, those people will not make any significant progress. It is impossible to do so.
- Furthermore, while one may get temporary relief from “stresses of day-to-day activities” by doing breath meditation, that will not provide the long-term release from suffering that the Buddha explained.

- Until one begins to understand *Tilakkhaṇa*, one will never get to the *Sotāpanna* stage.

Even a *Sotāpanna* Has Not Given Up Sensual Pleasures

5. Even during the time of the Buddha, many lay followers attained the *Sotāpanna* stage and continued to live “householder lives,” too. They were married and had regular jobs. There was no need to avoid sense pleasures, including sex, at all.

- For example, Vishākā (or Visākā), who was the leading female lay disciple at the time, attained the *Sotāpanna* stage at age seven and went on to get married and have twenty plus children.
- Many others were regular lay people with families who attained the *Sotāpanna* stage and continued to live that way.
- Of course, those who desired to attain higher stages of *Nibbāna* made an effort to eliminate the craving for sense pleasures. Most of them became *bhikkhus* who abstain from sex and other sense pleasures.

Only at *Anāgāmī* Stage One Will Lose Craving for Sensory Pleasures

6. One needs to completely abstain from sense pleasures entirely only to become an *Anāgāmī*. Even a *Sakadāgāmī* still enjoys sense pleasures, even though he/she would not have the desire to “own” things that provide sense pleasures.

- For example, a *Sakadāgāmī* would still enjoy some sense pleasures, but there would be no desire to own “things that provide sense pleasure” (houses, cars, etc.).

Losing Craving for Sensory Pleasures Comes After a Deeper Understanding of *Tilakkhaṇa*

7. One CANNOT just give up sense pleasures by sheer will power and become an *Anāgāmī*. One has to comprehend the “*anicca* nature” at a higher level than a *Sotāpanna*, and then those desires will NATURALLY go away.

- That maybe hard for most people to understand: how the desire for sense pleasures will naturally go away. That is why one should follow the Path SEQUENTIALLY, one step at a time.
- By the way, the sense of “me” or “a self” will go away only at the *Arahant* stage!

It is Necessary to See Harmful Consequences of Sensory Indulgences (*Kāmasukhallikānuyoga*)

8. However, it is also important to realize that one needs to stay away from both excessive sensory pleasures (*kāmasukhallikānuyoga*) and extreme ascetic practices of completely staying away from any comfort (*Attakilamathānuyoga*.) The Buddha recommended the “middle path,” where one would live a simple, comfortable life without going to either extreme.

- Therefore, one cannot become a *Sotāpanna* by enjoying sense pleasures to the full, i.e., maintaining a “playboy type” lifestyle.
- When one starts comprehending the *anicca* nature, one’s life WILL become simple.
- Even before one gets to the *Sotāpanna* stage, one will start feeling *nirāmisā sukha* due to lessened stress on the mind due to this simple lifestyle.

9. Of course, one can speed up the process of the *Sotāpanna* stage by giving up sense pleasures. Those who take this path become *bhikkhus*. They voluntarily give up most sense pleasures, including sex.

- If one is to attain *jhāna*, one must at least SUPPRESS all sense desires. For example, in “[WebLink: suttacentral: Tapussa Sutta \(AN 9.41\)](#),” “..So kho ahaṃ, ānanda, *vivicca kāmehi vivicca*

akusalehi dhammehi savitakkam savicāram vivekajam pītisukham paṭhamam jhānam upasampajja viharāmi.”

- That means one needs to have **all thoughts of sense pleasures and akusala kamma** removed from one's mind at the time of getting to the *jhāna*.
- That statement appears in every *sutta* describing *jhāna*.

The Wider World View

10. According to the “wider world view” of the Buddha, there are 31 realms in this world. **Suffering in those realms decreases as one goes from the lowest four realms (*apāyā*), where the suffering is intense, to the human realm (where there is both suffering and happiness). In *deva* realms and 20 *Brahma* realms, there is increasingly more happiness.**

- The peaceful feeling one experiences in a *jhāna* are the same sense experience of *Brahmā* in the corresponding realms. But getting to *jhāna* has nothing to do with getting to *magga phala*, even though *jhāna* can provide a better mindset to do insight meditation.
- None of those realms can provide permanent happiness because a lifetime in any realm is finite. Even though the *Brahma* realms have very long lifetimes, one would eventually die and be reborn in any realm.
- If one's goal is permanent happiness, one must eventually get to the *Arahant* stage of *Nibbāna*. However, if one can get to the *Sotāpanna* stage, one is guaranteed to get to the *Arahant* stage within a relatively few subsequent births.

Difference With Other World Religions

11. That is the main difference between Buddha Dhamma and other religions. Christianity and Islam promise permanent happiness in *deva* realms, and Hinduism promises lasting happiness in a *Brahma* realm.

- But the Buddha taught that nothing in this world is permanent. That holds for living beings and inert things in the whole universe.
- Scientists (including Einstein) believed as recently as 100 years ago that the universe is in a “steady state.” Now science has accepted that everything in our world is in constant flux.
- Therefore, one born in any realm will die from there and be reborn in another realm.

There Is Nowhere in This World Where Suffering Ends (*Anicca* Nature)

12. The above sub-title summarizes the *anicca* nature of this world. One gets to the *Sotāpanna* stage by “seeing that.” When one first realizes the *anicca* nature of this world, one can immediately see the dangers in doing the strongest of *dasa akusala*. That realization will make one's mind resistant to doing “*apāyagāmi* actions,” i.e., those that make one eligible to be born in the four lowest realms (*apāyā*.)

- That understanding registers permanently in the mind of a *Sotāpanna* and is unbreakable. That is why he/she will never do any such immoral deed, no matter how tempting.
- At that time, one will have unbreakable faith in Buddha, *Dhamma*, and *Saṅgha*. One can see at that time how valuable *Dhamma* is. Of course, the Buddha discovered that *Dhamma*. It can be conveyed accurately only by a Noble Person.
- That is the reason for “unbreakable faith,” or “*aveccappasāda*” (*avecca pasāda*) in Buddha, *Dhamma*, and *Saṅgha*; see #4 of “[Sotapatti Anga – The Four Qualities of a Sotāpanna](#).”
- One is also said to have “*Ariyakānta sīla*” or “unbreakable moral conduct” as a *Sotāpanna*. That does not mean one will not do any of the *dasa akusala*. But one will never again do a *dasa akusala* with strong *kamma vipāka* bringing rebirth in the *apāyā*. A *Sotāpanna* has permanently removed such a mindset.

Higher Stages of *Nibbāna* Come With Deeper Comprehension of *Anicca* Nature

13. A *Sotāpanna* would then get to the *Sakadāgāmī* and *Anāgāmī* stages by getting rid of the desire for sense pleasures in two phases.

- *Avijjā*, or the ignorance of the Four Noble Truths, is removed only at the *Arahant* stage. That is the time when one removes the “sense of me” or the “sense of a self.”
- It is a systematic, long process.
- As I said initially, one cannot expect to do advanced mathematics unless one first knows how to add/subtract, then how to do algebra, etc.
- Thus, moral conduct and getting rid of the ten types of *micchā diṭṭhi* are REQUIREMENTS for any stage of *magga phala*. Getting rid of the cravings for sense pleasures comes after that.

There Are Dangers in Craving for Sensory Pleasures

14. Finally, one may think that all one needs to do is get to the *Sotāpanna* stage. Because then one would be free from the *apāyā*. That is true. However, when one gets to the *Sotāpanna* stage, one will see the sufferings in the *kāma loka*, including the *deva* realms. **In a way, it is good to focus on getting to the *Sotāpanna* stage, and not worry about the higher stages.**

Still one needs to at least start **seeing** the dangers of excessive sensory pleasures, even before the *Sotāpanna* stage. That is necessary to get to *Sammā Diṭṭhi*. One would then remove the wrong perceptions (*saññā*) about the value in sensual pleasures at the *Anāgami* stage. See, “[Vipallāsa \(Diṭṭhi, Saññā, Citta\) Affect Saṅkhāra.](#)”

As stated in the [WebLink: suttacentral: Dhammika sutta \(Snp 2.14\)](#):

- *Abrahmacariyaṃ parivajjayeyya,*
Aṅgarakāsuṃ jalitaṃva viññū;
Asambhuṇanto pana brahmacariyaṃ,
Parassa dāraṃ na atikkameyya.

Translated:

- **A wise person would live a celibate life (avoiding sex), as one would avoid falling into a pit of fire.** But if one is not yet at the stage of abstaining from sensory pleasures, one should not engage in sexual **misconduct**.
- Furthermore, sensual pleasures are not restricted to sex. Excessive attachment to ALL sensory pleasures comes under *kāmasukhallikānuyoga* in #8 above. Also, see “[What is “Kāma”? It is not Just Sex](#)” and “[Craving for Pornography – How to Reduce the Tendency.](#)”

4.6.2 **Sīla, Samādhi, Paññā to Paññā, Sīla, Samādhi**

September 2, 2017; revised September 14, 2019; May 5, 2022; July 4, 2022; September 10, 2022

1. These days, it is customary to state that the Noble Eightfold Path consists of three steps: *sīla* (moral conduct), *samādhi* (Concentration), and *paññā* (wisdom). However, that sequence holds only for the **mundane Eightfold Path. It does not lead to *Nibbāna*** but only sets up the conditions to get into the Noble Eightfold Path.

- In this initial stage, one cultivates *sīla* by living a moral life by **making a determined effort** not to violate the five precepts; see “[2. The Basics in Meditation.](#)”

- *Samādhi* is much more than concentration; see, “[What is samādhi? – Three Kinds of Mindfulness.](#)” When one lives a moral life, one’s mindset will gradually change to a calm state (“*sama*” + “*adhi*”), as explained in that post.
- With this calm mindset, one will be able to get rid of the ten types of *micchā diṭṭhi* (“[Micchā Diṭṭhi, Gandhabba, and Sotāpanna Stage.](#)” Then one reaches **mundane *Sammā Diṭṭhi*** or the first level of wisdom.

2. One must follow the mundane Path before understanding *anicca*, *dukkha*, and *anatta*, and get into the Noble Path; see “[Buddha Dhamma – In a Chart](#)” and “[What is Unique in Buddha Dhamma?](#)” **Thus, there are three necessary steps to *Nibbāna*:**

- Follow the mundane Eightfold Path by living a moral life (*sīla*) to remove the ten types of *micchā diṭṭhi*. Those include not believing in *kamma vipāka*, rebirth, etc. Then one can get to mundane *samādhi* and gain the first level of wisdom (*paññā*): *sīla*, *samādhi*, *paññā*.
- Then start removing a DEEPER layer of *micchā diṭṭhi* (that this world can offer lasting happiness) by learning the CORRECT versions of *anicca*, *dukkha*, and *anatta* (*Tilakkhaṇa*).
- Once one grasps the basics of *Tilakkhaṇa*, one becomes a *Sotāpanna Anugāmi*. One then starts living with an **unbreakable *sīla*** to attain *Sammā samādhi* and the four stages of *Nibbāna* by following *paññā*, *sīla*, *samādhi*.

3. The first level of wisdom, achieved in the mundane path, is called ***kammassakata Sammā diṭṭhi***: understanding that one’s actions, speech, and thoughts (*kāya*, *vacī*, and *mano saṅkhāra*) — one’s *kamma* — WILL have consequences in the future, both in this life and in future lives.

- With *kammassakata sammā diṭṭhi*, one understands and accepts the fact that what we experience (*kamma vipāka*, good and bad) is due to our past *kamma*.
- One understands that to encounter good *kamma vipāka* in the future (including future lives), one needs to **cultivate** GOOD *kamma* (i.e., good *mano*, *vacī*, and *kāya saṅkhāra*).
- Even more importantly, one starts **avoiding** strong BAD *kamma*. Thus one starts getting rid of the coarse levels of *lobha*, *dosa*, and *moha*, which is the same as preventing *dasa akusala*.
- When one follows this “*sīla* step,” one will start experiencing the early stages of *Nibbāna* of “cooling down”; see “[Nirāmisa Sukha](#)” and “[How to Taste Nibbāna.](#)”

4. Some people think that if one kills animals without knowing that will have consequences, that will lead to *kamma vipāka*. That is not correct. “Intention to kill” must be there to bring *kamma vipāka*.

- There is no superhuman being that keeps track of what one is doing. **But when one intentionally kills an animal, one’s mind knows that, and one’s *viññāṇa* will adjust accordingly.** See “[Viññāṇa – What It Really Means.](#)”
- The more one kills animals that *viññāṇa* capable of killing will only grow. That will lead to a corresponding *bhava* in the *niraya* realm (hell), where similar suffering exists.
- Therefore, being ignorant of nature’s laws is not an excuse. Not knowing it was unlawful will not be an excuse when one gets caught doing an illegal act.
- There is another type of action where one kills animals unintentionally. For example, we kill many insects every time we take a walk. That does not lead to any *kamma vipāka*.
- So, only those *saṅkhāra* (or more correctly *abhisāṅkhāra*) **done with intention** lead to *viññāṇa* (via “*saṅkhāra paccayā viññāṇa*”), and subsequently lead to births in different realms via “*viññāṇa paccayā nāmarūpa*,” etc. to ... “*bhava paccayā jāti*.”

5. Most people also think that *kamma vipāka* arises only due to bodily actions (via *kāya saṅkhāra*.) But physical movements, speech, and thoughts all contribute to *kamma*. It is the *cetanā* (intention) involved in

thoughts, speech, and actions (i.e., *mano*, *vacī*, and *kāya saṅkhāra*) that is *kamma*. That is explained in the subsection, “[Living Dhamma – Fundamentals](#).”

- When one starts comprehending the laws of *kamma* (that causes lead to similar effects IF suitable conditions are present), one will gradually get to mundane *sammā samādhi*. Then one's ability to grasp more profound Dhamma concepts (*paññā*) will grow; see “[Mundane Sammā Samādhi](#).”
- One can stop future suffering only by eliminating the corresponding *abhisāṅkhāra*, i.e., “*saṅkhāra nirodho bhava* (and *jāti*) *nirodho*.”
- But *saṅkhāra* can only be stopped by the corresponding *abhisāṅkhāra*, i.e., “*saṅkhāra nirodho bhava* (and *jāti*) *nirodho*.”
- But *saṅkhāra* can be only stopped by removing *avijjā* since *saṅkhāra* are unavoidable as long as *avijjā* is there. “*Avijjā paccayā saṅkhārā*.” That is why *Sammā Dīṭṭhi* (understanding *Tilakkhaṇa*) is so important.
- One will have a good idea of how births in different realms are associated with different types of suffering. Furthermore, one would see how one's actions (*saṅkhāra*) lead to such births. I have summarized them in the table below.

Realm(s)	Level of Suffering	Causes	Generation/Stopping of <i>Saṅkhāra</i>
<i>Niraya</i> (Hell)	Incessant suffering	Dosa : Killing (especially humans), torture, rapes, etc	
Peta (Hungry Ghosts)	Starvation	Lobha or Excess greed (may I get all, not others)	
Vinipatha Asura [‘demons’, titans, evil ghosts]	Spend time aimlessly; mostly heavy bodies not movable	Moha : Tina middha, vicikicchā (lazy, lacking wisdom).	
Animal (<i>Tirisan</i> : “ <i>tiri</i> ” + “ <i>san</i> ” or with all 3 causes)	Combinations of above three types	Combinations of <i>lobha</i> , <i>dosa</i> , <i>moha</i>	
Human (<i>Manussa</i> : “ <i>mana</i> ” + “ <i>ussa</i> ” or with advanced mind)	In between lower and higher realms	In between lower and higher realms	Almost all <i>saṅkhāra</i> responsible births in all realms occur here.
Deva (similar to human bodies, but much less dense)	Mostly no physical suffering and abundant sense pleasures (<i>kāma</i>). But there is mental stress.	Good <i>kamma vipāka</i> (done with <i>alobha</i> , <i>adosa</i> , <i>amoha</i>). Mental stress arises due to <i>kāma rāga</i> .	
Rūpāvacara Brahma (only <i>manomaya kāya</i> ; cannot be even seen with a microscope)	Mental stress is much reduced. Mainly <i>jhānic</i> pleasures. <i>Vipariṇāma dukha</i> when close death.	Suppression of <i>kāma rāga</i> and cultivation of <i>rūpāvacara jhāna</i> (while in the human realm)	
Arūpāvacara Brahma (only <i>hadaya vatthu</i> and mind)	Only <i>arūpāvacara jhānic</i> pleasures. <i>Vipariṇāma dukha</i> when close death.	Cultivation of <i>arūpāvacara jhāna</i> (while in the human realm)	
Nibbāna	Permanent release from all suffering.	Elimination of all causes for existence, i.e.,	Mostly attained in the human realm, but

Realm(s)	Level of Suffering	Causes	Generation/Stopping of <i>Saṅkhāra</i>
		<i>rāgakkhaya,</i> <i>dosakkhaya,</i> <i>mohakkhaya.</i>	possible in higher realms, especially after the <i>Sotāpanna</i> stage.

6. Now, it is clear how future suffering arises via one's actions, speech, and thoughts (*saṅkhāra*). It is also clear that suffering decreases, and “*nirāmiṣa sukha*” grows at successively higher realms.

- When one lives a sinful life and engages in *dasa akusala* like killing, raping, etc., one is likely to be reborn in the lowest four realms (*apāyā*) and face much suffering. Such actions involve *kāya*, *vacī*, and *mano saṅkhāra* with *lobha*, *dosa*, *moha*.
- One is likely to be born in *rūpa* or *arūpa Brahma loka* when one cultivates *jhānā* by even abandoning *kāma rāga* (at least temporarily).
- When one has reduced *lobha*, *dosa*, *moha* to *rāga*, *paṭigha*, *avijjā* (see, “[Lobha, Dosa, Moha versus Rāga, Paṭigha, Avijjā](#)”) by following the mundane eightfold path, one is likely to be reborn in the human or *deva* realms. In these realms, suffering is much less, and most remaining suffering is mental, especially in the *deva* realms.

7. However, there is much suffering that we tend to ignore. *Saṅkhāra dukha* and *vipariṇāma dukha* belong to that category; see “[Introduction – What is Suffering?](#)” and the follow-up post.

- That suffering arises due to *kāma rāga*, i.e., craving (*upādāna*) for sense pleasures. Thus even if one is not engaged in *dasa akusala*, one would not be released from *kāma loka* as long as one has *kāma rāga*.
- At the next higher level in the *rūpa* and *arūpa* realms, *kāma rāga* is absent, and thus one enjoys *jhānic* pleasures.
- Unlike sense pleasures, *jhānic* pleasures can be sustained for longer times and are much-refined. However, that is still not permanent as the *Nibbānic* bliss arrived by eliminating all suffering.

8. As humans, we can overcome suffering in the *kāma loka* during this life itself, by cultivating *jhānā*. That means being able to “temporarily live” in *rūpāvacara* or *arupāvacara* realms.

- One gets to *rūpāvacara* and *arupāvacara jhāna* via either REMOVAL or SUPPRESSION of *kāma rāga* and *paṭigha*. Of course, that is not possible if one engages in *dasa akusala*.
- There are Buddhist and non-Buddhist meditation techniques to achieve this. See, “[Elephant in the Room 2 – Jhāna and Kasina](#).”
- If one develops *jhānā*, one will be born in *rūpa* or *arūpa* realms in the next birth. However, as we can see from the above table, any future births in those *rūpa* and *arūpa* realms are temporary. One could later be reborn in the *apāyā*.
- The only permanent solution to end all future suffering is to attain *Nibbāna*, as shown in the above table.

9. When one gets into mundane *sammā samādhi* by cultivating *sīla*, one can see the truth of the overall picture shown in the table above. At this stage – with this broader world picture — **one can take the second important step towards *Nibbāna* by comprehending the *Tilakkhaṇa***. However, one needs to know the correct versions of *Tilakkhaṇa*; see “[Anicca, Dukkha, Anatta](#).”

- That is the *paññā* (wisdom) associated with the first path factor (*Sammā Diṭṭhi*) in the Noble Eightfold Path.
- One will then be able to comprehend the First Noble Truth about the suffering in this world, the *Dukkha Sacca*.

10. The Buddha's key message is that one cannot find permanent happiness anywhere among the 31 realms in this world. Any such temporary happiness would be minuscule compared to suffering in the *apāyā* and *kāma loka*. That is very hard to comprehend (no matter how well-educated one may be).

- This fundamental fact of nature is called *anicca* nature. It means that NOTHING in this world can bring a permanent state of happiness (and WILL only bring suffering). The only permanent state of happiness is *Nibbāna*.
- When one has the opposite perception of *nicca* and focuses on seeking long-term happiness in this world, one WILL face suffering (*dukkha*) in the long run.
- Thus, eventually, one will become helpless in this rebirth process, which is the *anatta* nature.
- Those are the Three Characteristics of nature. See, "[Anicca, Dukkha, Anatta](#)." **Therefore, the crucial second step toward *Nibbāna* (permanent happiness) is to learn these critical characteristics of Nature from a true disciple of the Buddha.**

11. When one starts comprehending the *Tilakkhaṇa* to some extent, one becomes a *Sotāpanna Anugāmi* and enters the Noble Path; see, "[Sotāpanna Anugāmi and a Sotāpanna](#)."

- In this third and last step towards *Nibbāna*, one starts with a NEW mindset about this world's real nature. One can see that unimaginable suffering in the future if one does immoral things to get sensual pleasure.
- **Thus one starts to understand the First Noble Truth or the *Dukkha Sacca*:** There is unimaginable suffering in this world of 31 realms. At this initial stage, it is hard to see the dangers/suffering in the human and deva realms. But if one has comprehended the fact that *apāyā* (four lower realms) must exist for the laws of *kamma* to work, then one can see the unimaginable suffering in the *apāyā*.
- **The Buddha said one would simultaneously understand the other three Noble Truths when one understands the First Noble Truth.** One will see that *lobha*, *dosa*, and *moha* are the origins of that suffering (*Samudaya Sacca*). That one needs to remove those causes (*Nirodha Sacca*). And, the way to accomplish that is to follow the Noble Eightfold Path (*Magga Sacca*).

12. **This understanding becomes permanent forever (through future lives) when one attains the *Sotāpanna* stage.** From that point onward, one will NOT be CAPABLE of doing a *kamma* that could make one eligible for rebirth in the *apāyā*. Thus, one will be free from the worst suffering in the future.

- The post, "[Akusala Citta – How a Sotāpanna Avoids Apāyagāmī Citta](#)," explains how Nature enforces laws of *kamma*.
- One's mind will automatically reject any *apāyagāmī* action, even on an sudden impulse.

13. **Understanding *Paṭicca Samuppāda* is critical.** It explains how future *bhava* (existences) arise due to how one thinks, speaks, and acts (with *vacī* and *kāya saṅkhāra*). See "[Saṅkhāra – What It Really Means](#)" and "[Correct Meaning of Vacī Saṅkhāra](#)."

- If one can hurt and kill others, one is making conditions to face similar situations in the *niraya*.
- If one has excessive greed and is willing to hurt others for pleasure, one could be born a *peta* (hungry ghost).
- Those who are lazy and depend on others cultivate *asura saṅkhāra*. That leads to *asura viññāṇa* and thus gives rise to an *asura* existence.
- If one can think, speak, and act like an animal, one is cultivating animal *saṅkhāra*. Thus one could be born into an animal existence.

14. At this stage, one starts living by the *ariyakanta sīla*. This *sīla* is different from the *sīla* in the first step. [*ariyakanta* :[adj.] agreeable to the Ariyas. *kanta* : [adj.] pleasant; lovely; agreeable. (m.), the beloved one; husband. (pp. of *kamati*), gone; entered into.]

- In the first type of *sīla*, one forcefully avoided doing *pāpa kamma* or immoral acts. But there could have been occasions where one “could not help breaking the *sīla*” because the temptations were too strong.
- However, this new ***ariyakanta sīla* is unbreakable**, no matter how intense the temptation is. One’s mind has grasped that it is NOT WORTH to commit *apāyagāmī* actions. That is regardless of how much wealth or pleasures they could bring. [*apāyagāmī* : [adj.] going or conveying to the state of misery.]
- For example, it is not worthwhile to make a lot of money by killing animals or fish, selling drugs that can harm others, lying, bribing, etc.
- At this stage, one could still have cravings for sensual pleasures. Thus one could live everyday married life, i.e., “moral living.”

15. It is unnecessary to attain any *jhāna* to get to the *Sotāpanna* stage. These days there is too much emphasis on *jhāna*.

- **One must realize that *rūpāvacara* and *arūpāvacara jhāna* are sensory experiences in the *rūpa* and *arūpa* realms.** Therefore, such experiences belong to “this world” of 31 realms.
- The Buddha stated that any of his lay disciples with the *Sotāpanna* stage is million times well-off than a *yogi* who had attained all *jhānā* and all *abhiññā* powers.
- While those *jhānā* and *abhiññā* powers last only during this life, a *Sotāpanna* is freed from the *apāyā* FOREVER.
- However, understanding *jhānā* is important since it confirms the Buddha’s broader worldview in the above table. There are many in the world today who can experience *jhānā*.
- But some people mistakenly believe that *jhānā* are necessary to attain *magga phala*. But as the above table shows, *jhānā* are still part of “this world” and can be achieved even by following “non-Buddhist meditations.” More details in “[Elephants in the Room](#).”

4.6.3 Ye Dhammā Hetuppabhavā.. and Yam Kiñci Samudaya Dhammam..

August 16, 2018; Revised January 20, 2020

This post will analyze two famous key verses to show the interconnections among the Four Noble Truths, *Tilakkhaṇa*, *Paṭicca Samuppāda*, and the Noble Eightfold Path. These are the main concepts that must be comprehended to benefit from Buddha’s Dhamma.

Ye Dhammā Hetuppabhavā..

Background

*“Ye dhammā hetuppabhavā,
Tesaṃ hetuṃ tathāgato āha;
Tesaṃca yo nirodho,
Evaṃvādī mahāsamaṇo”*

- From just hearing this verse uttered by Ven. Assaji, Upatissa (later Ven. Sariputta) became a *Sotāpanna*. That is the fundamental concept of Buddha Dhamma and explained in detail in the *Paṭicca Samuppāda*.
- The correct translation is the following. “Whatever *dhammā* (which are *kamma bīja*) that give rise to the rebirth process, causes for those to arise have been declared by the Buddha; he has also explained how those causes can be stopped from arising (and thus end the rebirth process).”
- First, let us briefly discuss how we arrive at this translation.

What Does “*Hetuppabhavā*” Mean?

1. “*Ye dhammā*” means “those *dhammā*.” The compound word in the verse is *hetuppabhavā*: It is the combination of “*hetu*,” “*pa*,” and “*bhava*,” which respectively mean causes, repeated, and existence. The combination rhymes as *hetuppabhavā*, just as *dhamma cakka pavattana* rhymes as “*dhammacakkappavattana*.”

- Note that “*pa*” (meaning repeated) and “*bhava*” combine to rhyme as “*pabbhava*” with an additional “*b*.”
- So, *hetuppabhavā* means “causes leading to repeated birth or causes to sustain the rebirth process.”
- Note that both words *hetuppabhavā* and *pabhassara* have the words “*pa*” and “*bha*” embedded in them; see, “[Pabhassara Citta, Radiant Mind, and Bhavaṅga](#).”
- So, “*ye dhammā hetuppabhavā*” means “those *dhammā* that sustain the rebirth process or *saṃsāra*.”

Tesaṃ and *Tesaṅca* Both Have “*Saṇ*”

2. *Tesaṃ* is “*te*” + “*saṇ*” or three “*saṇ*” of *lobha*, *dosa*, *moha*. These are those *hetu* or causes.

- Even though there are six root causes, they all can be eliminated by eliminating just three (*lobha*, *dosa*, *moha*); see, “[Six Root Causes – Loka Samudaya \(Arising of Suffering\) and Loka Nirodhaya \(Nibbāna\)](#).”
- Of course “*saṇ*” are the defilements responsible for the rebirth process for anyone, which are *dasa akusala*; see, “[San](#).”
- Again, “*te*” and “*saṇ*” combine to rhyme as “*tesaṇ*.”
- So, “*Tesaṃ hetuṃ tathāgato āha*” means “The Buddha has declared what those three causes are.”

3. The next part, “*Tesaṅca yo nirodho*” or “*Te saṇ ca yo nirodho*” has the second complex keyword of *nirodha*, which comes from “*nir*”+“*udaya*,” where “*nir*” means stop and “*udaya*” means “arise.” [*te* + *saṇ* + *ca* = *tesaṅca*]

- Thus *nirodha* means to stop something from arising; see, “[Nirodha and Vaya – Two Different Concepts](#).”
- The easiest way to understand *nirodha* is to see that a plant can be stopped from arising (i.e., coming into being) by destroying the seed. Put in the real context of the word *nirodha*, a plant’s coming into being can be stopped by **stopping the creation of that seed**.
- In the same way, a future existence (*bhava*) can be stopped by stopping the formation of the corresponding *viññāṇa* (*kamma bīja*), i.e., ***bhava nirodha* is achieved by *viññāṇa nirodha***.

How Is *Viññāṇa Nirodha* Realized?

4. By going backward further in PS, *viññāṇa nirodha* in turn is done by (*abhi*)*saṅkhāra nirodha*; see below too. Of course, *abhisāṅkhāra nirodha* cannot be done by sheer will power. One must cultivate *paññā* (wisdom) and get rid of *avijjā*. That requires comprehending of *Tilakkhaṇa* or the futility of clinging to this suffering-filled world of 31 realms that will make one helpless in the end (especially when born in the four lowest realms or *apāyā*).

- We can thus see that *viññāṇa nirodha* leads to the stopping of initiation of ***akusala-mūla Paṭicca Samuppāda*** (PS) cycles starting at the “*avijjā paccayā saṅkhāra*” step.

5. Now it is clear what is meant by “*tesaṅca (te saṇ ca) yo nirodho, evaṃvādī mahāsamaṇo*.” The Buddha (*mahāsamaṇo*) has explained how those defilements can be stopped from arising.”

- *Viññāṇa nirodha* is achieved via stopping *abhisāṅkhāra* or — **to put in a practical statement — by abstaining from all *dasa akusala***. That involves the three *akusala* done by the body (via *kāya saṅkhāra*), four *akusala* by the speech and defiled conscious thoughts (via *vacī saṅkhāra*), and three *akusala* by the mind (via *mano saṅkhāra*).
- It is essential to understand what is meant by keywords like *saṅkhāra* and *viññāṇa*; see, “[Mental Aggregates](#).”
- It is essential to realize that conscious thoughts are also *vacī saṅkhāra*; see, “[Correct Meaning of Vacī Saṅkhāra](#).” It is not just immoral speech and deeds that matter, but immoral “daydreaming” counts too.

6. The way to achieve *viññāṇa nirodha* is, of course, the Noble Eightfold Path. When one follows the Noble Path, one’s *avijjā* will be removed and thus no more initiations of PS cycles, i.e., no more suffering (there will not be “*jāti paccayā jarā, maraṇa, soka*,...).

- In the [WebLink: suttacentral: Petakopadesa](#), this verse expresses the *four* Noble Truths (*cattāri ariyasaccāni*), and we can now see why.

Yaṃ Kiñci Samudaya Dhammaṃ..

Introduction

7. The second related verse “*yaṃ kiñci samudaya dhammaṃ sabbaṃ taṃ nirodha dhammaṃ*” is in the Dhammacakkappavattana Sutta (SN 56.11); see, “[WebLink: suttacentral: Dhammacakkappavattana Sutta \(SN56.11\)](#).” [*kiṃ* + *ci* = *kiñci* ; *kiṃ* or *kiṃ* :[rel. or inter. pron.] what? *ci* : *cid*, indecl. an indefinite interrogative particle. *koci* [whoever] , *kiñci* [whatever] , *kadāci* [whenever] , *kuhiñci* [wherever] . cf. *ca*, *cana*, *ce*.]

- **Translated:** “If there are *dhammā* that give rise to suffering (i.e., any *samudaya dhammā*), all such *dhammā* can be stopped from arising (via the Noble Eightfold Path).” [*samudaya* = *san* + *udaya* = rise of *san* (that leads to suffering)]
- “*yaṃ kiñci samudaya dhammaṃ*” means “any *dhammā* that eventually lead to suffering. And, “*sabbaṃ taṃ nirodha dhammaṃ*” means “all such *dhammā*” are *nirodha dhammā*, i.e., they can be stopped from arising.

Here *Viññāṇa* Is “Defiled Consciousness”

8. But we need to get the idea embedded in this verse, instead of just translating word-by-word.

- From what we have learned so far, we know that *samudaya dhamma* (or *kamma bīja*) are created by *viññāṇa*, for which the best translation is “**defiled consciousness**.”
- *Viññāṇa*, in turn, arise due to our own (*abhi*) *saṅkhāra*. And the reason that we do *abhisāṅkhāra* is that we are ignorant of the *anicca* nature, i.e., we have *avijjā*.
- That is what the *paṭicca samuppāda* states: “*avijjā paccayā saṅkhāra, saṅkhāra paccayā viññāṇa, viññāṇa paccayā nāmarūpa*,” leading to “*upādāna paccayā bhava, bhava paccayā jāti*,” which ends up in the whole mass of suffering: “*jāti paccayā jarā, maraṇa*,...”

9. So, again we can see that *samudaya dhamma* arises with defiled *viññāṇa* that occur due to *abhisāṅkhāra* done with *avijjā*!

- If we do not cultivate such defiled *viññāṇa* via *abhisāṅkhāra* (i.e., if we stop doing *dasa akusala*), then we will not end up with births leading to all types of suffering. Those are *jarā* (old age), *marāṇa* (death), *soka* (unhappiness), *parideva* (long lasting state of unhappiness where *soka* keeps bubbling up), *dukkha* (physical injuries, diseases, etc), *domanassa* (long bouts of depression), *upāsāya* (extreme distress where can faint or generates suicidal thoughts).”

- Those sufferings described above are mainly for the human realm. If one is born in the four lowest realms, it will be much worse, mostly physical suffering or *dukkha*.

Kamma Vipāka Are Not Deterministic

In the above, we have discussed how to stop the formation of *kamma bīja*. But what about that *kamma bīja* that we have already piled up during this life and from previous lives? Will not they bring *vipāka* and initiate new *bhava* and *jāti* filled with suffering?

10. The key is to understand that one gets a “second chance.” *Kamma vipāka* are not deterministic, i.e., *kamma bīja* cannot automatically bring *vipāka*.

- In a *upapatti* [rebirth] PS cycle, we saw that *kamma bīja* form with the first two steps in the PS cycle: “*avijjā paccayā saṅkhāra*” and “*saṅkhāra paccayā viññāṇa*.” This *viññāṇa* is called a *kamma viññāṇa*.
- But when *kamma bīja* try to bring back corresponding *vipāka* at a FUTURE time, they are brought back as *vipāka viññāṇa*. That means the mind is exposed to a “sign” called a “*nimitta*” that corresponds to the same *kamma* done to make that *kamma bīja*.

11. So, it is essential to realize that in a *upapatti* PS cycle, the “*viññāṇa paccayā nāmarūpa*” step starts much later, may be even in future life.

An Example

12. We can explain that with an example. Suppose person X kills another human being in this life. That involves a lot of *mano*, *vacī*, and *kāya abhisāṅkhāra* and all those contribute to a defiled mindset (*viññāṇa*) that led to a *kamma bīja* which got the most contribution at the moment of killing via a *kāya abhisāṅkhāra*.

- Now, that *kamma bīja* will be there waiting to bring its *vipāka* at a later time.
- Suppose X dies a few years later, but he has more *kammic* energy for this human *bhava* left. In that case, that *kamma bīja* cannot bring *vipāka*. He will leave a dead body as a *gandhabba* and wait for a suitable womb.
- However, if X had killed one of his parents, for example, that would be a *ānantariya kamma*, that *kamma bīja* will bring its *vipāka* at the end of this life.

13. In either case, the “*viññāṇa paccayā nāmarūpa*” step will start the rest of the PS cycle leading to a new *bhava* (let us say in the *niraya*) with the following way.

- So, X is now on the deathbed, whether in this life or a future life as a human. Just before the dying moment, that *kamma bīja* will bring a sign (called *nimitta*) of that *kamma* to X’s mind. It could be a scene from that killing event or a scene from the *niraya* that he is about to be born.
- Since he had done this act with intention, that mindset will come back, and he will have that defiled mindset (*viññāṇa*) responsible for the killing. Then he will have that *nimitta* come in, and this is the “*nāmarūpa*” that comes to his mind at that time: “*viññāṇa paccayā nāmarūpa*.”

14. All his six sense faculties will transform according to that sign or *nimitta*: “*nāmarūpa paccayā saḷāyatana*.” Of course, the *nimitta* will come through only one, let us say like a picture from that killing event or a sound.

- His mind will now make contact (*saḷāyatana paccayā phassa*) just as in any sense event, and that leads to “*phassa paccayā vedanā*,” i.e., now he is about to re-enact the crime in his mind, starting at the “*vedanā paccayā tanhā*” step.

The Difference for a *Sotāpanna*

15. But a critical point in these steps occur at the “*vedanā paccayā taṇhā*,” “*taṇhā paccayā upādāna*” steps. When one gets that *nimitta* of birth in the *niraya* appears at the moment of death, one WILL NOT grasp it if one has attained the *Sotāpanna* stage.

- A *Sotāpanna*’s mind has grasped the truth of the “*anicca* nature” and has a higher level of *paññā* (wisdom), so it WILL NOT grasp that *nimitta*. That is why Aṅgulimāla was able to attain *Arahanthood*, even after killing almost 1000 people. That past *kamma bīja* did not get to germinate.

16. Therefore, that *nimitta* will be ineffective if X had become a *Sotāpanna* in the intervening time, and a different (good or bad) next in line will appear. The process will continue until a suitable new *bhava* grasped at the “*upādāna paccayā bhava*” step.

- That is how a *Sotāpanna* avoids “*apāyagāmi kamma bīja*” from bringing their *vipāka*.
- Of course, if X had not attained the *Sotāpanna* stage, he would be born in *niraya*.

Further Reading

17. Please do not hesitate to ask questions at the forum if this is not clear. *Kamma viññāṇa* are discussed in detail at: “[Kamma Viññāṇa – Link Between Mind and Matter](#).”

- The process of how past *kamma* try to bring *vipāka* with *vipāka viññāṇa* discussed in detail at, “[Avyākata Paticca Samuppāda for Vipāka Viññāṇa](#).”
- Of course, one needs to understand what is meant by all these terms (*vedanā*, *taṇhā*, *upādāna*, etc.) to understand these processes; see, “[Mental Aggregates](#).”
- If one can truly comprehend this post, one could get to the *Sotāpanna* stage, because this is seeing the “way to *Nibbāna*,” i.e., stopping the future suffering permanently. That is about getting to *lokuttara Sammā Diṭṭhi*. [*lokuttara* : [adj.] super-mundane; transcendental.]

[Dhyāna is a Sanskrit word while Jhāna is a Pāli word.]

4.7.1 Samādhi, Jhāna, Magga Phala – Introduction

October 12, 2017; revised April 28, 2018; September 13, 2018; February 11, 2020; June 26, 2022

Introduction

1. Apparently, there are a considerable number of people who have attained *magga phala* (with or without *jhāna*) recently all over the world. We are indebted to the late Waharaka Thero for this great awakening with his correct interpretations of Buddha's teachings. Now many are working tirelessly to make those interpretations available to others; see, "[Parinibbāna of Waharaka Thero](#)."

- Over the years, I have seen some key issues related to *jhāna* and *magga phala* discussed at many online forums, without reaching a definitive conclusion. I hope this series of posts will be of use to bring more clarity.
- I will try to put together a consistent picture solely based on material from the *Tipiṭaka*. One common problem that I see in online forums is that many people put *Tipiṭaka* on the same footing as commentaries (such as *Visuddhimagga*) written much later by people (non-*Ariyā*) like Buddhaghosa or Nagarjuna. That leads to confusion because those accounts have many contradictions with the *Tipiṭaka*.
- These posts are supposed to be read in the given sequence. Please read carefully at a quiet time.

What Is *Samādhi*?

2. *Samādhi* ("sama"+"adhi" where "sama" means "equilibrium" and "adhi" means "dominance") means keeping the mind focused on a single *ārammaṇa* or a *nimitta*.

- The opposite of the Pāli word "sama" is "visama." When either the body or the mind gets "away from equilibrium," that is "visama" and we become uncomfortable.
- A good analogy is the following. We become restless if our environment becomes too hot. Then we try to find a way to cool ourselves. We get very uncomfortable if we are in a "too cold" environment also. Then we try to be warm by turning on a heater or wrapping ourselves with blankets.
- However, if the room temperature is moderate and away from both those extremes, then we feel comfortable. We feel contented.
- A similar effect takes place when the mind stops going to the extremes. A greedy or angry mind is in a "visama" state and is away from *samādhi*.
- However, if the focus is a *dhamma* concept, then the mind moves toward "equilibrium."

- *Samādhi* is essential to attain *Magga phala*. *Jhāna* is a special category of *samādhi* and are not essential to attain *magga phala*.

Sammā Samādhi Are Two Types

3. *Samādhi* can be of many types. What is essential to attain *magga phala* is *Sammā Samādhi*. As we have discussed before, there is mundane *sammā samādhi* that is reached by getting rid of the 10 types of *micchā diṭṭhi*. Then there is *lokuttara Sammā Samādhi* that is reached by comprehending *Tilakkhaṇa* to some extent; see, “[Buddha Dhamma – In a Chart](#).”

- As discussed in the previous post, “[Sīla, Samādhi, Paññā to Paññā, Sīla, Samādhi](#),” one gets to mundane *Sammā Samādhi* via “*Sīla, Samādhi, Paññā*.” Then one can comprehend the *Tilakkhaṇa* and follow the Noble Path via “*Paññā, Sīla, Samādhi*,” with *Sammā Diṭṭhi* taking the lead.
- There is nowhere in the *Tipiṭaka* that says one needs *jhāna* to attain *magga phala* or *Nibbāna*.
- *Magga phala* means one is starting to break the bonds (*dasa saṃyojana*) to this world; see, “[Dasa Saṃyojana – Bonds in Rebirth Process](#).” One attains *magga phala* by getting into *lokuttara Sammā Samādhi* (*samādhi* to remove “*saṇ*”: “*saṇ*” + “*mā*”; see, “[What is “San”? Meaning of Sansāra \(or Samsāra\)](#).”)

Jhāna Are Not Necessary to Attain Magga Phala

4. April 28, 2018: I found a *desanā* by Waharaka Thero where he presents clear evidence that *jhāna* are not necessary to attain *magga phala* (It is of course in the Sinhala language):

[WebLink: Download “Are Jhāna Required for Magga-Phala”](#)

- The main point the Thero makes is that we know that there are *jāti Sotāpannas* born in the human realm. But if a *jhāna* was REQUIRED to attain the *Sotāpanna* stage, then that person WOULD NOT be born in the human realm, but in a *brahma* realm corresponding that *jhāna*.
- However, the *Tipiṭaka* asserts that King Bimbisara (a *Sotāpanna*) was reborn in a lower *Deva* realm. Another is that *Sakka*, the king of the *Tāvātimsā Devas*, became a *Sotāpanna* while listening to a discourse by the Buddha and was reborn as *Sakka* (i.e., he died and was reborn a moment later; he did not even realize that until the Buddha told him.)

Attaining Jhāna Has Nothing to Do With Nibbāna

5. In simple terms, *jhāna* are mental states existing in the 16 *rūpa* realms and the four *arūpa* realms. Thus by definition, attaining *jhāna* has nothing to do with *Nibbāna*. This can be easily seen in “[The 89 \(121\) Types of Citta](#).”

Jhāna falls into two categories (*Ariya* and *anāriya*) and — depending on the category — could be an **asset** or **hindrance**, as we will discuss in this section.

- As discussed in “[31 Realms Associated with the Earth](#)” those 20 realms lie above the realms of *kāma loka*. Those *rūpi* and *arūpi Brahmā* enjoy only *jhānic* pleasures, which are better than **sensual pleasures**.
- We all have been born in most of the 31 realms (except for the realms reserved for the *Anāgāmis*) uncountable times, **and thus had attained those *jhānic* states uncountable times in previous lives**.
- As we know, **sensual pleasures** are present only in *kāma loka* (human realm, six *deva* realms, and the animal realm). The *jhānic* experience is discussed in, “[Jhānic Experience in Detail – Sāmaññaphala Sutta \(DN 2\)](#).”
- Humans can cultivate *jhāna* by **suppressing (*anāriya*) or removing (*Ariya*) the craving for sensual pleasures (*kāma rāga*)**.

- One could approach *Nibbāna* via *Ariya* or *anāriya jhāna*; see, “[Ascendancy to Nibbāna via Jhāna \(Dhyāna\)](#).”

Difference Between *Ariya* and *Anāriya Jhāna*

6. If those *Brahmā* are born there via cultivating mundane *jhāna*, then *kāma rāga* remain with them as *anusaya* (which means deeply hidden). So, when they die and are reborn in the lower realms, *kāma rāga* re-surface. The suppression is only during the time they live as *Brahmā* in those higher realms.

- In the same way, those humans who get into *jhāna* SUPPRESSING *kāma rāga* can lose the ability to get into *jhāna* even in this life. The best example from the *Tiṭṭhaka* is Devadatta, who developed not only *anāriya* (mundane) *jhāna* but also *abhiññā* powers, and then lost all that and ended up in an *apāya*. Even though Devadatta was obviously exposed to correct *Tilakkhaṇa* (he was ordained by the Buddha himself), he apparently did not comprehend.
- The ability to get into *jhāna* is also related to our *gati* (pronounced “gathi”; our habits from past lives). Those who have cultivated mundane *jhāna* in relatively recent past lives can easily get into mundane *jhāna*.
- However, if one gets into even the first *Ariya* (supramundane) *jhāna*, one has essentially attained the *Anāgāmī* stage by removing *kāma rāga*; see, “[Mundane versus Supramundane Jhāna](#).”

Magga Phala Require *Sammā Samādhi*

7. *Magga phala* (including the *Arahant* stage) can be reached via going through any of the *jhānic* states or without going through any *jhānic* state; see, “[The 89 \(121\) Types of Citta](#).”

- This is also discussed in “[WebLink: suttacentral: Paññāvimutta Sutta \(AN 9.44\)](#)” and “[WebLink: suttacentral: Susimāparibbājaka Sutta \(SN 12.70\)](#).”
- Furthermore, a *Sotāpanna* may attain *anāriya jhāna* and be born in *brahma* realms lying below the *Suddhāvāsa* realms reserved for the *Anāgāmis*. But they also do not come back to *kāma loka*; see, “[Pathama Metta Sutta](#).” Of course, those who attain *anāriya jhāna* without *magga phala*, will come back to *kāma loka* and could be born in the *apāyā* subsequently.

8. More detailed information with references to *suttā* at, “[Ascendancy to Nibbāna via Jhāna \(dhyāna\)](#),” “[Mundane versus Supramundane Jhāna](#),” “[Nirodha Samāpatti, Phala Samāpatti, Jhāna, and Jhāna Samāpatti](#).”

- There are a series of posts on *jhāna* (in simpler terms, without too many Pāli words) in an older section: “[Power of the Human Mind](#).” A new series with more details at “[Elephant in the Room 2 – Jhāna and Kasina](#).”

4.7.2 Vitakka, Vicāra, Savitakka, Savicāra, and Avitakka, Avicāra

March 7, 2019; revised December 3, 2019; July 27, 2022; August 29, 2022 (sutta refs. updated)

Introduction

1. It is important to understand the meanings of *vitakka/vicāra*, *savitakka/savicāra*, and *avitakka/avicāra*. I see many discussions on discussion forums without reaching a satisfactory conclusion, and most *sutta* translations are incorrect. In particular, *savitakka* and *savicāra* are incorrectly translated as “with *vitakka* and *vicāra*.”

- As always, one MUST start with the basics. Trying to extract the meanings of such keywords from deep *suttā* is counter-productive.

- We need to start with the basic definitions. Then the meanings of verses in deeper *suttā* CAN BE figured out using those basic definitions. I have seen that this method ALWAYS works within the *Tiṭṭaka*.
- Please comment on the discussion forum if someone can point out a *sutta* in the *Tiṭṭaka* that is inconsistent with this post.
- Possible inconsistencies MAY arise if one tries to make them compatible with late commentaries like the *Visuddhimagga*.

What Are *Vitakka* and *Vicāra*?

2. For the words *takka*, *vitakka*, *vicāra* (තර්කවිතර්කවිචාර in Sinhala), the closest English words could be “**think one way**,” **further/counter analysis**, **investigate in depth**. They are the same as *vacī saṅkhāra*.

- All those words describe conscious thinking about a thought object (*ārammaṇa*). One either silently “talks to oneself” or speaks out while analyzing the situation. [*takka* :[m.] thought; reasoning; logic. (nt.), butter-milk. *vitakka* :[m.] reflection; thought. *vicāra* :[m.] investigation; management; planning; discursive thinking.]

A clear explanation is given in *Abhidhamma*, in the discussion on *kāma dhātu*, *byāpāda dhātu*, *vihimsā dhātu*, *nekkhamma dhātu*, *abyāpāda dhātu*, *avihimsā dhātu*, in the following section: “[WebLink: suttacentral: Dhātuvibhaṅga](#).” [*avihimsa* : (Avihesa) (f.) [*a* + *vihimsā*] absence of cruelty, mercy, humanity, friendliness, love.]

- For example, “*Tattha katamā kāmadhātu? Kāmapaṭisaṃyutto takko vitakko saṅkappo appanā byappanā cetaso abhiniropanā micchāsaṅkappo—ayaṃ vuccati kāmadhātu.*”

Translated: “What is the **element of kāma (indulgence)?** *takka*, *vitakka*, *saṅkappa*, *appanā*, *byappanā* (remaining there, which is related to *vicāra*), which lead to **establishing wrong views**. That is the element of desire/indulgence.” In other words, when one constantly generates such thoughts, *kāma rāga* builds up.

3. The opposite, **element of nekkhamma** is defined as: “*Tattha katamā nekkhammadhātu? Nekkhammapaṭisaṃyutto takko vitakko, saṅkappa, ... pe ... sammā saṅkappo—ayaṃ vuccati “nekkhamma dhātu.”*”

- **Translated:** “what is the **element of renunciation?** *takka*, *vitakka*, *saṅkappa*, *appanā*, *byappanā* (remaining there, which is related to *vicāra*), which lead to **establishing correct views (leading to the removal of defilements)**. This is called the element of renunciation.” In other words, when one constantly generates such thoughts, *kāma rāga* is diminished.
- Similarly for *byāpāda dhātu*, *vihimsā dhātu*, and the opposites *abyāpāda dhātu*, *avihimsā dhātu*. [*vihimsā* : [f.] (& adj. °a) [abstr. fr. *vi*+*hims*, to injure] hurting, injuring, cruelty, injury. *himsā* : [f.] [Vedic *himsā*] injury, killing.]

Vacī Saṅkhāra Are *Saṅkappa* (Conscious Thoughts)

It is important to see the connection between *vacī saṅkhāra* and *saṅkappa* (as in *Sammā Saṅkappa*.)

4. We can now see that *kāma (abhijjhā) saṅkappa*, *byāpāda (or vyāpāda) saṅkappa*, *vihimsā saṅkappa* are all “bad” *vacī saṅkhāra*. They associate with greed, hate, and ignorance.

- Their opposites are associated with *Sammā Saṅkappa*: *nekkhamma*, *abyāpāda*, and *avihimsā saṅkappa*. [*nekkhamma* : [nt.] giving up the world; renunciation.]
- Note that *Sammā Saṅkappa* comes next to *Sammā Diṭṭhi* in the Noble Eightfold Path. Therefore, we can see the importance of *vacī saṅkhāra*.

5. Now we can also see the connection to *vacī saṅkhāra* as defined clearly in the “[WebLink: suttacentral: Cūlavedalla Sutta \(MN 44\)](#)”: ..” *vitakka vicārā vacī saṅkhāro*” OR “*vacī saṅkhāra* are *vitakka vicārā*.”

- ***Vacī saṅkhāra*** are “conscious thoughts that we silently generate” and also those thoughts that lead to the speech by moving the lips, tongue, etc. Hate speech is due to *apuññābhi vacī saṅkhāra*. Thinking about a *Dhamma* concept is a *puññābhi vacī saṅkhāra*; see “[Correct Meaning of Vacī Saṅkhāra](#).”

Vacī Saṅkhāra (Vitakka Vicārā) Are Saṅkappa

6. Another important *sutta* where this is discussed is “[WebLink: suttacentral: Mahācattārīsaka Sutta \(MN 117\)](#)”:

“*Katamo ca, bhikkhave, sammāsaṅkappo ariyo anāsavo lokuttaro maggaṅgo? Yo kho, bhikkhave, ariyacittassa anāsavacittassa ariyamaggasamaṅgino ariyamaggaṃ bhāvayato takko vitakko saṅkappo appanā byappanā cetaso abhiniropanā vacīsaṅkhāro—ayaṃ, bhikkhave, sammāsaṅkappo ariyo anāsavo lokuttaro maggaṅgo.*”

- **Translated:** “And what, *bhikkhus*, is ***Sammā Saṅkappa*** that is Noble, without *āsava*, supramundane, a factor of the Noble Path? Those are Noble thoughts (*ariyacittassa*) that are devoid of cravings (*anāsavacittassa*), belong to the Noble Path (*ariyamaggasamaṅgino ariyamaggaṃ bhāvayato*) with ***takko vitakko saṅkappo appanā byappanā cetaso abhiniropanā vacī saṅkhāro***: that is *Sammā Saṅkappa* that is Noble, a factor of the Noble Path.”

Vitakka is Usually Reserved for “Bad Saṅkappa”

7. “[WebLink: suttacentral: Akusala Vitakka Sutta \(SN 9.11\)](#)” provides one example: “*Tena kho pana samayena so bhikkhu divāvihāragato pāpake akusale vitakke vitakketi, seyyathidaṃ—kāma vitakkaṃ, byāpāda vitakkaṃ, vihiṃsā vitakkaṃ.*”

- **Meaning:** “That *bhikkhu* engaged in generating highly immoral (*pāpa*) and *akusala vitakka* during his resting time – they were sensual, ill-will, and cruel thoughts. (***pāpake akusale vitakke vitakkeyyātha, seyyathidaṃ—kāma vitakkaṃ, byāpāda vitakkaṃ, vihiṃsā vitakkaṃ***).
- Another verse in the same *sutta*: “*Ayoniso manasikārā, so vitakkehi khajjasi.*” or “with the wrong mindset (*ayoniso manasikāra*), he is burdened with such defiled thoughts.”

8. Succinct explanations can also be found in the “[WebLink: suttacentral: Vitakka Sutta \(SN 56.7\)](#).”

Following is the basic idea of the whole *sutta*:

- “*Bhikkhus*, do not engage in evil unwholesome thoughts, which are: sensual thoughts, thoughts of ill will, thoughts of harming others (***pāpake akusale vitakke vitakkeyyātha, seyyathidaṃ—kāma vitakkaṃ, byāpāda vitakkaṃ, vihiṃsā vitakkaṃ***).
- For what reason? These thoughts, *bhikkhus*, are without **real substance** (*Nete, bhikkhave, vitakkā attha samhitā*), irrelevant to the fundamentals of the holy life, and do not lead to escape from the sense world, to dispassion, to cessation, to peace, to direct knowledge, to enlightenment, to *Nibbāna*. When your mind starts such thoughts, *bhikkhus*, you should think: ‘This will lead to suffering.’
- Instead, you should think: ‘These are the causes of suffering’; you should think: ‘The way to the cessation of suffering by cultivating thoughts of renunciation and compassion.’ Such thoughts will lead to escape from the sense world, to dispassion, to cessation, to peace, to direct knowledge, to enlightenment, to *Nibbāna*.”

Vitakka/Vicāra and Savitakka and Savicāra

9. In many instances, the words *vitakka* and *vicāra* indicate “bad thoughts” or defiled thoughts.

- However, in some cases, they indicate “all kinds of thoughts, good or bad.”
- Therefore, one must identify which meaning to use in the words’ context. The above examples illustrate that point.

10. When one generates thoughts that specifically do not involve *kāma rāga* or other *akusala* — but the opposites (*nekkhamma/kusala*) — **those are called *savitakka* and *savicāra*.**

- That is how one gets into *jhāna*: Eliminating (or suppressing) *vitakka/vicāra* and cultivating *savitakka/savicāra*.

11. You can see that in any *sutta* that describes *jhāna*. For example, in “[WebLink: suttacentral: Tapussa Sutta \(AN 9.41\)](#)”: “..So kho ahaṃ, ānanda, *viviceva kāmehi vivicca akusalehi dhammehi savitakkaṃ savicāraṃ* vivekajaṃ pītisukhaṃ paṭhamañ *jhānaṃ* upasampajja viharāmi.”

- **Translated:** “Ānanda, when one stays away from *vitakka/vicāra* with *kāma rāga* and *akusala* and cultivates *savitakka/savicāra*, one will get into the first *jhāna*.”
- However, occasionally, *vitakka/vicāra* with *kāma rāga* and/or *akusala* may come to mind.
- Also see “[Tapussa Sutta \(AN 9.41\)– Akuppā Cētōvimutti.](#)”

Avitakka and Avicāra

12. **The absence of any “bad thoughts” is indicated by *avitakka*, *avicāra*.** In this case, one would only have *savitakka* and *savicāra* (good thoughts).

- This happens in the second *jhāna*, where only *savitakka/savicāra* remains.
- Therefore, it is important to realize that *avitakka/avicāra* DOES NOT mean “without thoughts”; it just means the absence of bad thoughts.

13. This is very clear at the end of the “[WebLink: suttacentral: Upakkilesa Sutta \(MN 128\)](#)”: “..So kho ahaṃ, anuruddhā, *savitakkampi savicāraṃ samādhīṃ bhāvesiṃ, avitakkampi vicāramattaṃ samādhīṃ bhāvesiṃ, avitakkampi avicāraṃ samādhīṃ bhāvesiṃ, sappītikampi samādhīṃ bhāvesiṃ, nippītikampi samādhīṃ bhāvesiṃ, sātasahagatampi samādhīṃ bhāvesiṃ, upekkhāsahagatampi samādhīṃ bhāvesiṃ.*”

- **Translated:** “Anuruddha, I systematically cultivated the following *samādhī* in this order. *Savitakka savicāra samādhī*, *avitakka vicāramattaṃ samādhī* (absence of *vitakka* with a trace of *vicāra* left), *avitakka avicāra samādhī* (absence of *vitakka* and *vicāra*), *sappītikampi samādhī* (with *pīti* or joy), *nippītikampi samādhī* (absence of *pīti* or joy), *sātasahagatampi samādhī* (with only *sukha* left), and *upekkhāsahagata samādhī* (*sukha* also removed to be in the *upekkhā* state).”
- What the Buddha described above is getting to the first *jhāna* with *savitakka savicāra*, and then to the second *jhāna* with the absence of *vitakka* and *vicāra* (with *pīti* and *sukha*), the third *jhāna* with just *sukha* (joy removed), and the fourth *jhāna* with *sukha* also removed and with just *upekkhā*.
- For a description of *Ariya jhāna* with *jhānaṅga* removed at each successive stage, see “[WebLink: suttacentral: Rahogata Sutta \(SN 36.11\)](#),” for example. [*jhānaṅga* : ‘constituents (or factors) of absorption’. *aṅga* : [nt.] 1. a constituent part; 2. a limb; 3. quality.]

Summary

14. *Saṅkhāra* is different types, so it is necessary to get an idea of how to use these basic definitions of *vitakka/vicāra*, *savitakka/savicāra*, and *avitakka/avicāra* in terms of different types of *saṅkhāra*: *puññābhisaṅkhāra*, *apuññābhisaṅkhāra*, *āneñjābhisaṅkhāra*; see, “[Correct Meaning of Vacī Saṅkhāra](#)” and “[Saṅkhāra – What It Really Means](#).”

- Further details in the post, “[Vacī Saṅkhāra – Saṅkappa \(Conscious Thoughts\) and Vācā \(Speech\).](#)”

15. Finally, the “[WebLink: suttacentral: Savitakkasavicāra Sutta \(SN 43.3\)](#)” clearly states that *Nibbāna* is reached (*asaṅkhatagāmi maggo*) via the following sequence. *Savitakka savicāra samādhi, avitakka vicāramatta samādhi, avitakka avicāra samādhi*.

“*Katamo ca, bhikkhave, asaṅkhatagāmimaggo? Savitakkasavicāro samādhi, avitakkavicāramatto samādhi, avitakkaavicāro samādhi—ayaṃ vuccati, bhikkhave, asaṅkhatagāmimaggo.*”

4.7.3 Jhānic Experience in Detail – Sāmaññaphala Sutta (DN 2)

March 2, 2019; revised January 3, 2021; revised #4 on February 14, 2022

Introduction

1. The *jhānic* experiences in the first four *jhāna* are clearly described by the Buddha in the “[WebLink: suttacentral: Sāmaññaphala Sutta \(DN 2\)](#).”

- There are many conceptions about what it feels like to be in different *jhānic* states. Therefore, it is good to have a description by the Buddha to get a good idea about the experience.
- It is a long *sutta*, and I will provide the English translation for the *sutta*’s relevant sections. The Pāli version can be found in the link above.

2. *Jhānic* experiences in *Ariya* and *anāriya jhānā* may have some common features since these *jhānā* correspond to mental states of *rūpāvacara brahma* realms. However, the Buddha clearly stated that *anāriya jhāna* are “burdened” and not as peaceful as *Ariya jhānā*; see, “[Tapussa Sutta \(AN 9.41\)–Akuppā Cetovimutti](#).”

- To get into *jhāna*, one must transcend (elevate one’s mindset above) the sensual realms (*kāma loka*).
- This means one’s mind needs to be devoid of any sensual thoughts (*kāma rāga*) and *dasa akusala* AND focused on thoughts of renunciation and compassion (*savitakka/savicāra*). In any *sutta* describing the *jhānic* experience, there is this phrase: “So *viviceva kāmehi, vivicca akusalehi dhammehi savitakkaṃ savicāraṃ vivekaṃ pītisukhaṃ paṭhamam jhānam upasampajja viharati...*”
- Translated: “Withdrawn from sensuality, withdrawn from *akusala* thoughts, and engaged in thoughts of renunciation and compassion, he enters and remains in the first *jhāna*...”

Experience in the First Jhāna

3. “Withdrawn from sense pleasures, withdrawn from *akusala* thoughts, he enters and dwells in the first *jhāna*, which is accompanied by *savitakka* and *savicāra* (applied and sustained moral thoughts). His mind is filled with joy (*pīti*) and the whole body is suffused and filled with bodily happiness (*sukha*) born from withdrawal from sense pleasures (*kāma*) and *akusala* thoughts. This rapture and happiness suffuse his entire body. (It should be noted that *vitakka/vicāra* or *kāma* and *akusala* thoughts are not completely removed in the first *jhāna*).

- “Great king, suppose a skilled bath attendant or his apprentice were to pour soap powder into a metal basin, sprinkle it with water, and knead it into a ball so that the ball of soap-powder be pervaded by moisture, encompassed by moisture, suffused with moisture inside and out, yet would not trickle. Similarly, the great king, the *bhikkhu*, drenches, steepes, saturates, and suffuses his entire body with the rapture and happiness born of seclusion. This, great king, is a visible fruit of a life abstaining from *kāma* and *akusala*.

Experience in the Second Jhāna

4. “Further, great king, with the **removal of *vitakka/vicāra* (but *savitakka/savicāra* remain)**, the *bhikkhu* enters and dwells in the second *jhāna*, which is accompanied by internal confidence and unification of mind, is without sensual (*kāma*) or immoral (*akusala*) thoughts [*vitakka* and *vicāra*], and is filled with the rapture and happiness born of concentration. He drenches, steepes, saturates, and suffuses his body with this rapture and happiness born of concentration so that there is no part of his entire body that is not suffused by this rapture and happiness. See, “[Vītakka, Vicāra, Savitakka, Savicāra, and Avītakka, Avicāra](#).”

- “Great king, suppose there was a deep lake whose waters welled up from below. It would have no inlet for water from the east, west, north, or south, nor would it be refilled from time to time with showers of rain; yet a current of cool water, seeping through underground channels, would maintain the water level, so that the entire lake is filled to the brim. Similarly, the great king, the *bhikkhu*, drenches, steepes, saturates and suffuses his body with the rapture and happiness born of concentration so that his entire body is suffused with this rapture and happiness. This too, great king, **is a visible fruit of a life abstaining from *kāma* and *akusala***.

Experience in the Third *Jhāna*

5. “Further, great king, with the fading away of rapture (***pīti* or joy is lost**), the *bhikkhu* dwells in equanimity, mindful and clearly comprehending, and experiences happiness with the body. Thus he enters and dwells in the third *jhāna*, of which the noble ones declare: ‘He dwells happily with equanimity and mindfulness.’ He drenches, steepes, saturates, and suffuses his body with this happiness free from rapture so that his entire body is suffused with this happiness.

- “Great king, suppose in a lotus pond there were blue, white, or red lotuses that have been born in the water, grow in the water, and never rise above the water, but flourish immersed in the water. From their tips to their roots, they would be drenched, steeped, saturated, and suffused with cool water, so that there would be no part of those lotuses not suffused with cool water. Similarly, the great king, the *bhikkhu*, drenches, steepes, saturates and suffuses his body with happiness free from rapture so that this happiness suffuses his entire body. This too, great king, **is a visible fruit of a life abstaining from *kāma* and *akusala***.

Experience in the Fourth *Jhāna*

6. “Further, great king, with the abandoning of bodily pleasure (***sukha***), the *bhikkhu* enters and dwells in the fourth *jhāna*, which is neither pleasant nor painful and contains mindfulness fully purified by equanimity. He sits suffusing his body with a pure bright mind so that there is no part of his entire body not suffused by a pure bright mind (**one’s physical body no longer is felt, and only a “white light” is discerned; that white light is the only “*rūpa*” left to be cognized**).

- “Great king, suppose a man were to be sitting covered from the head down by a white cloth so that there would be no part of his entire body not suffused by the white cloth. In the same way, great king, the *bhikkhu* sits suffusing his body with a pure bright mind, so that there is no part of his entire body not suffused by a pure bright mind. This, too, **is a visible fruit of a life abstaining from *kāma* and *akusala***.

The *sutta* now proceeds to describe what could be further accomplished by the *bhikkhu*.

- “With his mind thus concentrated, purified, and bright, unblemished, free from defects, pliant, malleable, steady, and attained to imperturbability, he directs and inclines it to knowledge and vision. He discerns: ‘This body of mine is endowed with form, composed of the four primary elements, born from mother and father, nourished with rice and porridge, subject to inconstancy, rubbing, pressing, dissolution, and dispersion. And this consciousness of mine is supported here and bound up here.’
- In other words, the *bhikkhu* can now see the *ādīnava* (drawbacks) and the burden of carrying one’s own physical body.

Essential Background to Attain *Jhāna*

7. *Sāmaññaphala Sutta* is an excellent *sutta* which also discusses in detail how one can setup the necessary background to attain *jhāna*.

- It is too long a *sutta* to be discussed in a post. One could read *Bhikkhu Bodhi's* English translation to get a good idea: "[WebLink: PDF Download: The Sāmaññaphala Sutta.](#)" It is a pdf file that one can download.

8. Also note that while the abandonment of the 10 types of *micchā diṭṭhi* is needed for even *anāriya jhānā*.

- *Ariya jhānā* require a level of comprehension of *Tilakkhaṇa* also, and thus only *Ariyā* (Noble Persons) can attain them; see, "[Tapussa Sutta \(AN 9.41\)– Akuppā Cetovimutti.](#)"

Eventual Outcomes of *Ariya* and *Anāriya Jhāna*

9. Both types of *jhāna* lead to rebirth in corresponding *Brahma* realms. However, those with *anāriya jhāna* will come back to the human realm at the end of their lifetime, and could be born in the *apāyā* in the future.

- On the other hand, those who have cultivated *Ariya jhānā* will never come back to *kāma loka*, let alone *apāyā*. They will attain *Nibbāna* (*Arahanthood*) in *Brahma* realms.

10. This is clearly explained in the "[WebLink: suttacentral: Paṭhamanānākarana Sutta \(AN 4.123\)](#)" and several other *suttā*.

For example, regarding those who have cultivated the first *anāriya jhāna*: "Idha, bhikkhave, ekacco puggalo vivicca kāmehi vivicca akusalehi dhammehi savitakkaṃ savicāraṃ vivekaṃ pītisukhaṃ paṭhamam jhānam upasampajja viharati. So tadassādeti, taṃ nikāmeti, tena ca vittiṃ āpajjati. Tattha tīto tadadhimutto tabbahulavihārī aparihīno kālaṃ kurumāno brahmakāyikānaṃ devānaṃ saḥabyataṃ upapajjati. Brahmakāyikānaṃ, bhikkhave, devānaṃ kappo āyupamāṇaṃ. Tattha puthujjano yāvatāyukaṃ thatvā yāvatakaṃ tesam devānaṃ āyupamāṇaṃ taṃ sabbaṃ khepetvā nirayampi gacchati tiracchānāyonimpi gacchati pettivisayampi gacchati."

- **Translated:** "An individual, withdrawn from *kāma rāga*, withdrawn *akusala*, enters and remains in the first *jhāna* filled with joy (*pīti*) and the whole body is suffused and filled with bodily happiness (*sukha*). If he does not lose the *jhāna* at death, he is born among the *Brahmakāyika devas*, who have a life span of an eon. **These normal humans (*puthujjano*), having used up all the life-span of those *devas*, may go to hell (*niraya*), to the animal realm, and the state of the hungry ghosts (*peta*)."**

On the other hand, those who have attained the first *Ariya jhāna*: "Bhagavato pana sāvako tattha yāvatāyukaṃ thatvā yāvatakaṃ tesam devānaṃ āyupamāṇaṃ taṃ sabbaṃ khepetvā tasmīṃyeva bhava parinibbāyati."

- **Translated:** "But a disciple of the Blessed One, having stayed there, attains *Nibbāna* from there."

11. The same is stated about those who have attained the second, third, and fourth *anāriya jhāna*. None of them is free from the *apāyā*.

- On the other hand, those who have cultivated *Ariya jhāna* attain *Nibbāna* from those corresponding *Brahma* realms.

12. Finally, this discussion about getting rid of (or at least suppressing) any sensual thoughts or *kāma rāga* may discourage those new to Buddha Dhamma.

- That should not be the case; see, "[Is It Necessary for a Buddhist to Eliminate Sensual Desires?](#)" and "[Starting on the Path Even without Belief in Rebirth.](#)"

4.7.4 Ascendancy to Nibbāna via Jhāna (Dhyāna)

October 4, 2017; #14 revised on October 5, 2017; November 15, 2017; November 30, 2018 (including #8)

1. There are three categories: One can attain *magga phala* without *jhāna*; one can attain *jhāna* and not have *magga phala*; one can attain *magga phala* and then cultivate *jhāna*. In order to sort these out, one needs to understand the difference between *Ariya* (supramundane) and *anāriya* (mundane) *jhāna*, and whether (and how) they are related to *magga phala*.

- In a series of posts based on material from the *Tipiṭaka*, I will try to put together a consistent picture. Please let me know (lal@puredhamma.net) if I make any mistakes, because this is of great importance to everyone.
- Even before the Buddha, ancient *yogis* cultivated *jhāna* and attained what they believed to be *cetovimutti* (liberation via calming the mind). But the Buddha showed that such *cetovimutti* is temporary; one would not attain *akuppā cetovimutti* (true and unshakable liberation) until *Nibbāna* is realized; see, “[Tapussa Sutta \(AN 9.41\)– Akuppā Cetovimutti.](#)”

2. *Nibbāna* can be approached two ways via *jhāna*: (i) through any of the *rūpavacara anāriya* (mundane) *jhāna*, (ii) first attaining the *Sotāpanna* stage and then through *Ariya* (supramundane) *jhāna*.

- Of course there is another way attain *Nibbāna*, without any *jhāna*, in *paññāvimutti* (liberation with wisdom); see below.
- If one takes the path via *Ariya jhāna*., then one would attain *cetovimutti* and *paññāvimutti* at the same time, and is said to be an *ubhatovimutti Arahant*. This is also called *akuppa cetovimutti* or unshakable/unbreakable *cetovimutti*. That is what the Buddha attained on the night of the Enlightenment. [*ubhato* : [ind.] in both ways or sides; twofold.][It is also called ‘unshakable deliverance of mind’ (*akuppa-cetovimutti*)] [*akuppa* : [adj.] steadfast; unshakable.]
- Those *yogis* who attain *cetovimutti* via *anāriya jhāna* have not removed *avijjā anusaya*; that is why they are not liberated. They can be reborn in the *kāma loka*; see #4 below.

3. As the table below shows, the level of suffering decreases AND levels of both mundane and *nirāmisā sukha* increases as one moves successively to higher realms.

- In the post, “[The Grand Unified Theory of Dhamma – Introduction](#),” we described a model that consisted of 31 concentric “shells.” The actuality is pretty much close to that analogy, with some additional features. I have compiled a summary of the 31 realms in the table “[31 Realms of Existence](#).”
- From those posts, it is clear that as one goes from the *apāyā* through higher *kāma loka* to *rūpa loka*, and finally to *arūpa loka*, attachments to “this world” get weaker AND actual suffering decreases too.
- **It seems that the highest *arūpa* realm is quite close to *Nibbāna*. In a way it is — but technically it is far away too.**

4. *Yogis* like Ājāra Kālāma and Uddakarāmaputta, who had attained highest *arūpa jhānā* at the time of the Buddha, believed that the highest *arūpavacara* state was *Nibbāna* (or final release, *vimutti*). Indeed, at that highest realm of *Ne’va saññā nā saññā*, connection to “this world” is ALMOST cutoff, and one can experience the “highest bliss” that can be attained without realizing *Nibbāna*.

- The Buddha (or rather the *Bodhisattva*), who learned to attain those highest *jhānā* from those *yogis*, realized that all living beings had attained those state many times in the rebirth process, and that is not the end of suffering.
- He realized that until one completely removes all ten *samsāric* bonds (see, “[Dasa Samyojana – Bonds in Rebirth Process](#)”), one will never be free of ANY of the 31 realms. As discussed in that post, one SUCCESSIVELY and PERMANENTLY leaves the lowest realms (*apāyā*), higher *kāma loka* realms,

and then *rūpa* and *arūpa* realms by breaking those bonds (*saṃyojana*) few at a time (by following the Noble Path).

5. However, one can TEMPORARILY enjoy the highest *arūpa* realms existence by cultivating even the corresponding MUNDANE *jhāna*, i.e., those attained without removing ANY *saṃyojana*.

- For example, while we live in this human realm we are not subjected to the harsh sufferings in the *apāyā*, and we can enjoy the sense pleasures, mixed in with some suffering.
- In the same way, when one is born in the *rūpa* realms, one will not be subjected to the sufferings in the human realm, and the suffering is even less going from *rūpa* to *arūpa* realms.
- However, since no *saṃyojana* are broken, one can be reborn in any of the realms in the future (just like a normal human can be born in the *apāyā* in the future).

6. The easiest way to understand *jhānic* states is to examine the properties of the *rūpa* and *arūpa* realms, in comparison to those of the lower realms. The following table can be useful here.

Realm(s)	Level of Suffering	Causes	Generation/Stopping of Saṅkhāra
Niraya (Hell)	Incessant suffering	Dosa: Killing (especially humans), torture, rapes, etc	
Peta (Hungry Ghosts)	Starvation	Excess greed (may I get all, not others)	
Vinipatha Asura	Spend time aimlessly; mostly heavy bodies not movable	Moha : <i>Thina middha</i> , <i>vicikicchā</i> (lazy, lacking wisdom).	
Animal (Tirisan: "tiri" + "san" or with all 3 causes)	Combinations of above three types	Combinations of <i>lobha</i> , <i>dosa</i> , <i>moha</i>	
Human (Manussa: "mana" + "ussa" or with advanced mind)	In between lower and higher realms	In between lower and higher realms	Almost all saṅkhāra responsible births in all realms occur here.
Deva (similar to human bodies, but much less dense)	Mostly no physical suffering and abundant sense pleasures (<i>kāma</i>). But there is mental stress.	Good <i>kamma vipāka</i> (done with <i>alobha</i> , <i>adosa</i> , <i>amoha</i>). Mental stress arises due to <i>kāma rāga</i> .	
Rupavacara Brahma (only <i>manomaya kāya</i> ; cannot be even seen with a microscope)	Mental stress is much reduced. Mainly <i>jhānic</i> pleasures. <i>Viparinama dukha</i> when close death.	Suppression of <i>kāma rāga</i> and cultivation of <i>rupavacara jhāna</i> (while in the human realm)	
Arupavacara Brahma (only <i>hadaya vatthu</i> and mind)	Only <i>arupavacara jhānic</i> pleasures. <i>Viparinama dukha</i> when close death.	Cultivation of <i>arupavacara jhāna</i> (while in the human realm)	
Nibbāna	Permanent release from all suffering.	Elimination of all causes for existence, i.e., <i>rāgakkhaya</i> ,	Mostly attained in the human realm, but possible in higher realms,

		<i>dosakkhaya,</i> <i>mohakkhaya.</i>	especially after the Sotāpanna stage.
--	--	--	--

7. If you look at any *sutta* describing *Ariya jhāna*, it always starts with verse, “..bhikkhu *viviceva kāmehi vivicca akusalehi dhammehi savitakkaṃ savicāraṃ vivekajaṃ pītisukhaṃ paṭhamañ jhānaṃ upasampajja viharati.*”

We can see why the above table is helpful in understanding how one gets to *jhānā* by first **abstaining from *akusala kamma* (*vivicca akusalehi dhammehi*)** and then ***kāma rāga* (*viviceva kāmehi*)**.

- Until one abstains from *akusala kamma*, one has no hope of escaping the *apāyā*. Here abstaining does not mean complete removal.
- Until one overcomes *kāma rāga*, one has no hope of escaping the *kāma loka* and ascending to the *rūpavacara* realms.
- However, one does not need to REMOVE *kāma rāga* (with *anusaya*) in order to attain mundane (*anāriya*) *jhāna*, even up to the highest in the *arūpa loka*. This is why Alara Kalama and Uddaka Rama Putta, who are in the *arūpa* realms right now, could be even reborn in the *apāyā* in future lives.
- All one needs to do is to have the mind focused on a neutral object in order to make it free of *akusala* thoughts and *kāma rāga* while in the *jhāna*.

8. We can summarize the above conclusions in the following way:

- One who is frequently engaged in *akusala kamma* is **LIKELY** to be born in the 4 lowest realms (*apāyā*).
- One who is frequently engaged in *kusala kamma*, AND avoids *akusala kamma*, but has *kāmacchanda*, is **LIKELY** to be born in the human or the *deva* realms.
- One who abstains from *akusala kamma* and *kāmacchanda*, can cultivate *rūpavacara* or *arūpavacara jhāna*. With those ***mahaggata kusala kamma* (*mahaggata* means higher)**, one **WILL** be reborn in *rūpa* or *arūpa loka* **at the next *cuti-paṭisandhi* transition**.
- However, one must not lose that *jhāna* until that moment, which means through possibly more births as a human within the current human *bhava*.
- **This also explains why some people can easily get to *jhāna*. Those had cultivated *jhāna* in recent human births within this human *bhava*.**
- However, if it is an *anāriya jhāna*, one has not been released from the *apāyā*, since one has not removed *avijjā* by comprehending *Tilakkhaṇa*.

9. If one can stay away from *akusala* and also suppress *kāma rāga*, then one's mind **AUTOMATICALLY moves to higher mental states**. In other words, one starts feeling *jhānic* pleasures (“*saṅkhāra paccayā viññāṇa*”).

- When one is striving to discard *kāma rāga*, one is said to be cultivating ***mahaggata kusala kamma***. Here one goes beyond mundane moral actions (*puñña kamma*) of giving, helping, etc, **and lose (or suppress) craving for *kāma rāga***.
- Therefore, while *kusala kamma* lead to rebirth in higher *kāma loka* (human and *deva* realms), *mahaggata kusala kamma* lead to rebirth in *rūpa* and *arūpa loka*. One of course experiences those *jhānic* states in this life as well.
- The *jhānic* experiences experienced by *yogis* correspond to various *rūpa* and *arūpa* realms; see, “[31 Realms of Existence](#).” It is like one is born in the corresponding *brahma* realm for the duration of the *jhānic* experience.

10. *Mahaggata kusala kamma* can be cultivated using *Ariya* (supramundane) or *anāriya* (mundane) meditation techniques, and get to the same mental states (the difference is in how one gets there and how permanent those states are).

- Now it is easy to see that the key to cultivating the first mundane *jhāna* is to stay away from *akusala* and also to suppress sense cravings. Then one's mind will automatically pointed to the first *rūpavacara* mental state, i.e., first *jhāna*.

11. One can get to the **first *anāriya jhāna*** by maintaining one's attention on a fixed **mundane object (breath or a *kaṣiṇa* object)**.

- When one does this for long periods of time and also abstains from sensual pleasures (like ancient *yogis* did), one can get in to the first *jhāna*, followed by successively higher *jhāna*, when one practices for longer times.
- The conventional breath meditation is a form of *kaṣiṇa* meditation, since it focuses on the breath.

12. In fact, this is how all living beings in the lower realms get into the *Abhassara Brahma* realm when our world system (*Cakkavata*) is destroyed in a "*loka vināsa*." When the Sun starts heating up, fine sense objects start being destroyed, and with time less and less sensual objects will be there to trigger *kāma rāga*. All humans and animal will move to higher realms (over an *antakkappa* which lasts billions of years).

- When the human and animal realms are destroyed, all those beings would be reborn in the first *rūpa* realms. When that is gradually destroyed, they will be reborn in the next higher realm and so on, until they are all in the *Abhassara* realm.
- Even though all dense material realms are all destroyed at the end of the *loka vinasaya*, all *rūpa* and *arūpa* realms at or above the *Abhassara* realm remain intact. When the Solar system is "re-formed" after billions of years, they all gradually come down to lower realms. I will discuss this in more detail when I start explaining the *Agganna Sutta*.
- **Just like none of those living beings had removed their *anusaya* (or broken the *saṃyojana*), one engaged in mundane *jhānā* has not removed them either.**

13. On the other hand, one gets to the **first *Ariya jhāna*** by **focusing on the "cooling down" (*Nibbāna*)** that one has seen. This is normally done by reciting/contemplating the verse "*etan santan etan paneetan...*", and also recalling one's own experience of *Nibbāna* (cooling down).

The best example from the *Tipiṭaka* is Ven. Moggallāna. We all know that Ven. Moggallāna (who was *Kolita* before becoming a *bhikkhu*), attained the *Sotāpanna* stage upon hearing a single verse uttered by Ven. Assaji and then conveyed to him by Upatissa.

- Then *Kolita* (and Upatissa) went to see the Buddha and were ordained. It took them a week to two weeks to attain the *Arahanthood*. The [WebLink: suttacentral: Moggallāna Saṃyutta in the Saṃyutta Nikāya](#) has 9 *suttā* that describe step-by-step how Ven. Moggallāna attained *Ariya jhānā* one by one **starting with the first *Ariya jhāna***. Thus it is quite clear that the *Sotāpanna* stage comes before any *Ariya* (supramundane) *jhāna*.
- In particular, the very first *sutta* there describes how the Buddha came to him by *iddhi bala* and encouraged him to cultivate the **first *Ariya jhāna*** ([WebLink: suttacentral: Pathamajhāna Pañhā Sutta: SN 40.1](#)): "*..Atha kho maṃ, āvuso, bhagavā iddhiyā upasaṅkamitvā etadavoca: 'moggallāna, moggallāna. Mā, brāhmaṇa, paṭhamañ jhānaṃ pamādo, paṭhame jhāne cittaṃ saṇṭhapehi, paṭhame jhāne cittaṃ ekodim karohi, paṭhame jhāne cittaṃ samādahā'ti..'*" OR "*..the Buddha came to me by *iddhi bala* and told me: Moggallāna, Moggallāna, Brahmana, do not become delayed, cultivate the first *jhāna*...*"
- The subsequent *suttā* in the *Moggallāna Saṃyutta* describe how the Buddha instructed him through each successive *rūpavacara* and *arūpavacara jhāna* all the way up to *nirodha samāpatti*, where Ven. Moggallāna developed all *iddhi bala* and became second only to the Buddha in supernatural powers.

14. Thus, one needs to be at least a *Sotāpanna* in order to start cultivating *Ariya jhāna*. However, one will truly be in the first *Ariya jhāna* only when one has REMOVED *kāma rāga*; see, for example, “[WebLink: suttacentral: Jhāna Sutta \(Aṅguttara Nikāya 9.36\)](#).” We will discuss this in detail in the next post.

- This means one is essentially an *Anāgāmī* by the time one is fully absorbed in the first *Ariya jhāna*. But a *Sotāpanna* could be in the vicinity of the first *Ariya jhāna*. There are three levels for a given *jhāna*: *hīna* (weak), *majjima* (middle), and *panīta* (strong).
- After that one gets to higher *Ariya jhānā* by doing *vipassana* (insight meditation) on the *anicca* nature of that *jhāna* that one is already in, i.e., by **eliminating successive *jhāna* factors** OR one may be able to attain *Nibbāna* directly from there; see, “[WebLink: suttacentral: Sallekha Sutta \(Majjhima Nikāya 8\)](#).”
- Since any *jhāna* is associated with either a *rūpa* realm or an *arūpa* realm, those states are subject to the *anicca* nature, just like everything else that belong to this world of 31 realms.

15. Those who have higher wisdom can attain even the *Arahant* stage **before** getting to any *jhāna* **or** from lower *Ariya* or *anāriya jhāna*; they are called *paññāvimutti Arahants*. They may cultivate (*Ariya*) *jhāna* after the *Arahanthood*, in order to seek relief until the end of the current life. *Jhānic* pleasures are the only “pleasures” recommended by the Buddha; of course, they are not sense pleasures belonging to *kāma loka*.

- It is said that those *Arahants* can cultivate all *Ariya jhāna* (and become *cetovimutti* as well) and then get into *nirodha samāpatti*, where full *Nibbānic* bliss can be experienced for up to 7 days at a time.
- Such *Arahants* are called “liberated both ways” or *ubhatovimutti*.

16. A question arises as to whether one can get into *anāriya jhāna* while cultivating *Ariya jhāna*, i.e., while following *kammatthana* that are based on contemplating the *Tilakkhaṇa* and taking *Nibbāna* as the *ārammana*. The unknown factor here is whether the meditator is really focused on those things.

- **Therefore, that is a question that can be answered only by the person in question.** Just because one is reciting *Ariya kammatthana* does not necessarily mean one will get to *Ariya jhāna*. What really matters is whether one has attained the *Sotāpanna* stage first, because one needs to keep *Nibbāna* as the *ārammana*, not a worldly object (even light).
- We know that Devadatta, who had cultivated *anāriya jhāna* AND attained *iddhi* powers, finally ended up in an *apāya*. This was despite the fact that he had been exposed to the correct interpretation of *Tilakkhaṇa*; apparently he had not grasped them.
- I will discuss more on this in the next post, where I will present evidence from the *Tiṭṭaka* itself to make things clear.

17. However, *anāriya jhāna* cannot be labelled as “bad.” They are higher mental states, and those who have cultivated *anāriya jhāna* will have an easier time attaining *magga phala*. One needs to contemplate the *anicca* nature of *jhānic* states.

- One can attain any *magga phala* up to full *Nibbāna* (*Arahanthood*) **from the vicinity of ANY of the *anāriya jhāna***. This is how the 89 *citta* become 121 *citta*; see, “[The 89 \(121\) Types of Citta](#).”
- When it is said, “**from the vicinity of ANY of the *anāriya jhāna***,” that includes the vicinity of the first mundane *jhāna*, i.e., just *upacara samādhi*. This is why *jhāna* are not NECESSARY to attain *magga phala*, and it is “*Sammā Samādhi*” in the Noble Eightfold Path that gets to *Sammā Ñāṇa* and *Sammā Vimutti* (i.e., *Arahanthood*).

18. The key question is “If mundane and supramundane *jhāna* seem to have the same characteristics that one feels, then how does one determine whether one has attained mundane or supramundane *jhāna*?”

- As we saw above, one gets to the first *Ariya jhāna* by REMOVING *kāma rāga*, not just by suppressing as in *anāriya jhāna*, i.e., one is essentially an *Anāgāmī* if one can be fully absorbed in the first *Ariya jhāna*.

- While it may not be straight forward to determine whether one is a *Sotāpanna* or not, it is fairly easy to determine whether one is an *Anāgāmi*, who has removed all *kāma rāga*: one's CRAVING for ALL sense pleasures (food, music, sex, etc) should not be there anymore. This DOES NOT mean, for example, one should not eat tasty foods, or that one will not taste the sweetness of sugar. But one will not have the urge to drink or to engage in sex, for example.

19. Finally, a common problem is that some people get attached to mundane *jhānic* pleasures, and get trapped there (for some people even a state of calmness is enough!). They need to realize that *anāriya* (mundane) *jhānic* states also belong to this world, and until those bonds to a given realm in this world are removed, one would remain in the rebirth process (and thus future suffering in the *apāyā* is not eliminated).

We all have attained highest *anāriya jhānā* numerous times in our deep past.

- Those who can easily get into *anāriya* (mundane) *jhāna*, can do so most likely because they had cultivated *jhāna* in recent past lives, possibly in the current human *bhava*.
- Furthermore, those who are unable to get into even *anāriya* (mundane) *jhāna*, should not be concerned. It could just be that they had not cultivated *jhāna* in recent births. As discussed above, *jhāna* are not necessary to attain *magga phala*. **Thus there could be some people who have even attained the *Sotāpanna* stage, but may be stressed unnecessarily because of their inability to get in to *jhāna*.**

The basic layout was presented in this post. We will get into details in the upcoming posts.

4.7.5 Paññāvimutti – Arahantship without Jhāna

September 12, 2018; revised February 24, 2019

[*paññāvimutti* : [f.] emancipation through insight.][[WebLink: suttacentral: Paññāvimutti Sutta \(AN 9:44\)](#)]

1. One could get to *magga phala* without ever going through *jhāna*. The Noble Eightfold Path, at its completion, takes one to *Sammā Samādhi*. Then one becomes an *Arahant* by completing the next two steps — *Sammā Ñāna* and *Sammā Vimutti* — to become an *Arahant*.

This is stated clearly in the [WebLink: suttacentral: Mahā Cattārīsika Sutta \(Majjhima Nikāya 117\)](#): “..Tatra, bhikkhave, *sammādiṭṭhi pubbaṅgamā hoti*. Kathañca, bhikkhave, *sammādiṭṭhi pubbaṅgamā hoti*? *Sammādiṭṭhissa, bhikkhave, sammāsaṅkappo pahoti, sammāsaṅkappassa sammāvācā pahoti, sammāvācassa sammākammanto pahoti, sammākammantassa sammāājīvo pahoti, sammāājīvassa sammāvāyāmo pahoti, sammāvāyāmassa sammāsati pahoti, sammāsatiassa sammāsamādhī pahoti, sammāsamādhissa sammāñāṇaṃ pahoti, sammāñāṇassa sammāvimutti pahoti. Iti kho, bhikkhave, aṭṭhaṅgasamannāgato sekkho, dasaṅgasamannāgato Arahā hoti. Tatrapi sammāñāṇena aneke pāpakā akusalā dhammā vigatā bhāvanāpāripūriṃ gacchanti..”*

- Thus the Noble Path starts with *Sammā Diṭṭhi* and gets to *Sammā Samādhi*, at which point one is said to have completed **8 steps and is still a sekkha (in training): aṭṭhaṅgasamannāgato sekkho.**
- Then one fully comprehends the real nature with *Sammā Ñāna* and attains full release or *Sammā Vimutti* (*Arahantship*). Now, one has completed all 10 steps and is no longer in training (*dasaṅgasamannāgato Arahā hoti*).

2. **Each and every one of us have had attained *anāriya jhāna* in many births during our deep past.** Thus attaining a *jhāna* is insignificant compared to attaining a *magga phala*.

- It is also clear that even a *Sotāpanna Anugāmi* is million-fold better than one with not just the ability to get into *jhāna*, but even *abhiññā* powers, including the ability to travel through the air, create things by mind power, etc.
- Attaining *jhānā* can sometimes become a hindrance since many people get attached to *jhāna* and stop making an effort towards *magga phala*, which is sad to see.

3. It takes time to cultivate *jhāna*, **especially for those who had not cultivated them in recent past lives**. People who have high wisdom (*paññā*) may attain *magga phala* (even *Arahanthood*) within a very short time, and they are called ***paññāvimutti Arahants*** or “wisdom-liberated.” Bahiya Daruchiriya, who attained *Arahantship* upon listening to a single verse by the Buddha is a good example; see, “[WebLink: suttacentral: Bahiya Sutta \(Udāna 1.10\)](#).”

- There are many who got to *magga phala* without ever getting to a *jhāna*. Alavaka Yaksā, Upatissa, Kolita, Aṅgulimāla, minister Santati, and many others attained various stages of *Nibbāna* by just listening to a single *desanā*.
- The *Susima Sutta*, also called “[WebLink: suttacentral: Susimaparibbājaka Sutta \(Sāmyutta Nikāya 12.70\)](#)” discusses a group of *Arahants* who were *paññāvimutti Arahants*.
- In that *sutta*, the Buddha explained to Susima that there are *Arahants* without any supernormal (*iddhi*) powers, because they were *paññāvimutti Arahants*. Once attaining *Arahanthood*, they have no desire to cultivate *iddhi* (*abhiññā*) powers, since they have seen the *anicca* nature of those powers too.

4. In some exceptional cases, one may simultaneously gain *abhiññā* powers together with the *Arahanthood*, within a very short time.

- There are many who got to *magga phala* without ever getting to a *jhāna*. Alavaka Yaksā, Upatissa, kolita, Aṅgulimāla, minister Santati, and many others attained various stages of *Nibbāna* by just listening to a single *desanā*. The account of Santati can be found at: “[WebLink: tipitaka.net: Dhammapada Verse 142](#).”
- Another prominent example in the *Tipiṭaka* is the story about the Culapanthaka Thero. He almost disrobed because he could not even memorize a single *gāthā* after trying hard for months. But with Buddha’s help, he was able to attain the *Arahanthood* in a day, and simultaneously achieved *abhiññā* powers as well: “[WebLink: suttacentral.net: Cūlapanthaka](#).”

5. Some argue that [WebLink: suttacentral: Sacca Vibhaṅga Sutta \(MN 141\)](#) states that *Sammā Samādhi* is attained ONLY WHEN one attains the first four *jhānā*. This is not correct. All one needs to do is to get to the vicinity of to ANY of those four *jhānā* (thus one could get to the *upcāra samādhi* for the first *jhāna*, for example), and attain *magga phala* from there.

- Here is the relevant verse from the above *sutta*: “..*Katamo cāvuso, sammāsamādhi? Idhāvuso, bhikkhu vivicceva kāmehi vivicca akusalehi dhammehi savitakkam savicāram vivekajam pītisukham paṭhamam jhānam upasampajja viharati, vitakkavicārānam vūpasamā ajjhantam sampasādanam cetaso ekodibhāvam avitakkam avicāram samādhijam pītisukham duttiyam jhānam upasampajja viharati, pītiyā ca virāgā upekkhako ca viharati ... pe ... tatiyam jhānam ... pe ... catuttham jhānam upasampajja viharati, ayam vuccatāvuso: ‘sammāsamādhi’...*”
- The key is “*upasampajja viharati*,” which means one stays close to any one of those *jhāna* (“*upa*” means close or in the vicinity), which means one can either get to that *jhāna* or can get to *upcāra samādhi* for that *jhāna*. This is why it is not labelled as “*Sammā Jhāna*” but “*Sammā Samādhi*.”
- This becomes clear when you analyze how 89 types of *citta* become 121 *citta*, as explained below.

6. The 89 (or 121) *citta* existing in the 31 realms are discussed in “[The 89 \(121\) Types of Citta](#).”

- There are 54 *citta* that could arise mainly in the *kamavacara* realms; 15 and 12 *citta* respectively mainly arise in the *rupāvacara* and *arupāvacara* realms respectively. The total so far is 81 *citta*.
- **Without going through any *jhāna* at all**, there are 8 *citta* associated with the attainment of the four stages of *Nibbāna* (4 *magga citta* and 4 *phala citta*). Then the total number of *citta* is 81 + 8 = 89.
- Now, one can attain each *magga phala* **from the vicinity** of 5 *rupāvacara jhāna*. For example, the *Arahanthood* can be reached from the vicinity of each of those five *jhāna*. Thus in this case, the total number of *citta* becomes 81 + 40 = 121.

- It is to be noted that the five *jhāna* in the terminology of *Abhidhamma* are the same as 4 *jhāna* in the terminology of the *suttā*; the first *jhāna* in *sutta* terminology is split into two in *Abhidhamma*.

7. In *Anhidhamma*, the above explanation becomes even more clear when one looks at the *citta vīthi* to attain a *magga phala*):

B B B B B “BC BU MD P U A G M P P” B B B B B.....

where, B = *bhavaṅga*, BC (*bhavaṅga calana*), BU (*bhavaṅga upacceda*), MD = mind door, P = *parikamma*, U = *upacāra*, A = *anuloma*, G = *gotrabhu* (change of lineage), M = *magga citta*, P = *phala citta*. [Here, “*anu*” means “through the understanding of *Tilakkhaṇa*,” “*lo*” means “craving for worldly things,” and “*ma*” means “removal,” and thus “*anuloma*” means “removal of craving for worldly things to some extent via the comprehension of *Tilakkhaṇa*.”]

- So, there is no *jhāna citta* preceding the *magga* or *phala citta* in the *citta vīthi* for a *magga phala*. Once one gets to the *upacāra samādhī*, it goes through *anuloma* and *gotrabhu* (change of lineage) to the *magga* and *phala citta*. This is why *upacāra samādhī* (which is *Sammā Samādhī*) is enough to attain even the *Arahanthood*.

8. On the other hand, a *citta vīthi* to attain a *jhāna*:

B B B B B “BC BU MD P U A G J” B B B B B.....

where, J = *jhāna citta*.

- Note that *upacāra citta* for *jhāna* is different from *upacāra citta* for *magga phala*, even though they are represented by the same symbol normally. *upacāra* means “close”, either to the *jhāna* or to *magga phala*, which are two different attainments. As we discussed earlier, *jhāna* are associated with “this world” and *magga phala* are associated with *Nibbāna*.
- *Gotrabhu* (change of lineage) *citta* is the one that induce either a *magga phala* or a *jhāna*, and those are two very different changes: *jhāna* is just change of lineage to one of the 31 realms, whereas *magga phala* is to be dissociate from the 31 realms.
- For a discussion on *citta vīthi*, see, “[Citta Vīthi – Processing of Sense Inputs.](#)”

9. There is another piece of strong evidence from the *Tiṭṭaka* that one does not need to attain even the first *Ariya jhāna* in order to attain the *Sotāpanna* stage. We all know that Ven. Moggallāna (who was Kolita before becoming a *bhikkhu*), attained the *Sotāpanna* stage upon hearing a single verse uttered by Ven. Assaji.

- Then Kolita (and Upatissa) went to see the Buddha and were ordained. It took them a week to two weeks to attain the *Arahanthood*. The [WebLink: suttacentral: Moggallāna Saṃyutta in the Saṃyutta Nikāya](#) has 9 *suttā* that describe step-by-step how Ven. Moggallāna attained *Ariya jhānā* one by one starting with the first *Ariya jhāna*. This is conclusive evidence that one does not need to attain any *Ariya jhāna* before attaining even the *Sotāpanna* stage.
- In particular, the very first *sutta* there describes how the Buddha came to him by *iddhi bala* and encouraged him to cultivate the first *Ariya jhāna* ([WebLink: suttacentral: Paṭhamajhāna Pañhā Sutta; SN 40.1](#)): “..Atha kho maṃ, āvuso, bhagavā iddhiyā upasaṅkamitvā etadavoca: ‘moggallāna, moggallāna. Mā, brāhmaṇa, paṭhamam jhānam pamādo, paṭhame jhāne cittaṃ saṇṭhapehi, paṭhame jhāne cittaṃ ekodim karohi, paṭhame jhāne cittaṃ samādahā’ti..” OR “..the Buddha came to me by *iddhi bala* and told me: Moggallāna, Moggallāna, Brahmana, do not become delayed, cultivate the first *jhāna*...”
- The subsequent *suttā* in the *Moggallāna Saṃyutta* describe how the Buddha instructed him through each successive *rupāvacara* and *arupāvacara jhānā*, where Ven. Moggallāna developed all *iddhi*

bala and became second only to the Buddha in supernormal powers; see, “[Ascendancy to Nibbāna via Jhāna \(Dhyāna\)](#).”

10. Therefore, one could get to the higher stages of *Nibbāna* via two paths.

- One could cultivate *jhāna* and attain successively higher *jhāna* by comprehending the *anicca* nature of those *jhāna* (as we mentioned above, they still belong to this world), and REMOVING successive *jhāna* factors.
- I will write more about this in the future, but the point is that those *jhānic* states are still subjected to both the *saṅkhāra dukkha* and the *viparināma dukkha*, even though exempt from *dukkha dukkha* temporarily.
- The second path does not require *jhāna*; *Sammā Samādhi* is enough. For those with higher levels of wisdom (*paññā*), higher stages of *Nibbāna* can be arrived without going through *jhāna*.

11. The second path is discussed in the [WebLink: suttacentral: Kimatthiya Sutta \(Aṅguttara Nikāya 11.1\)](#). Here one can start with comprehending *dukkha*, which leads to *Nibbāna* via the following steps: *saddhā*, *pīti*, *passadhi*, *sukha*, *samādhi*, *yathabhutanānadassana*, *nibbida*, *viraga*, and to *vimutti*; see, “[WebLink: suttacentral: Upanisa Sutta \(Sāriyutta Nikāya 12.23\)](#).”

- When one starts with *lokuttara Sammā Diṭṭhi* and follows the *ariyakānta sīla* (*Sammā Vaca*, *Sammā Kammanta*, *Sammā Ajiva*), one will automatically get to *Sammā Vāyāma*, *Sammā Sati* and *Sammā Samādhi* (these three path factors constitute *Samādhi*). By the way, *Sammā Diṭṭhi* and *Sammā Saṅkappa* constitute *paññā*. So, the sequence is *paññā*, *sīla*, *samādhi*.
- That *Sammā Samādhi* is all one needs to get to *Sammā Ñāna* (ultimate wisdom) and *Sammā Vimutti* (ultimate release) and thus to attain the *Arahanthood*; fulfilling all ten factors lead to the *Arahanthood* (“*dasahangehi samannagato*”).

12. One time a *bhikkhuni* asked Ven. Ānanda: “.. ‘yāyaṃ, bhante ānanda, **samādhi** na cābhinato na cāpanato na ca sasaṅkhāraniggayhavāritagato, vimuttattā ṭhito, ṭhitattā santusito, santusitattā no paritassati. Ayaṃ, bhante ānanda, *samādhi* kimphalo vutto bhagavatā’ti?” OR

“bhante ānanda, I have this **samādhi** which is stable, without defilements, contented, joyful, and without agitation. What did the Blessed One call this **samādhi**?”

Ven. Ānanda replied: “.. ‘yāyaṃ, bhagini, **samādhi** na cābhinato na cāpanato na ca sasaṅkhāraniggayhavāritagato, vimuttattā ṭhito, ṭhitattā santusito, santusitattā no paritassati. Ayaṃ, bhagini, *samādhi aññāphalo vutto bhagavatā’ti. Evaṃsaññāpi kho, āvuso, tadāyatanaṃ no paṭisaṃvedetī’ti*,” OR,

“Yes, *bhikkhuni*, there is such a **samādhi**. The Blessed One called it **Arahant phala samādhi** that is without any defilements.”

- This is in the [WebLink: suttacentral: Ānanda Sutta \(Aṅguttara Nikāya 9.37\)](#). She was an *Arahant* and she did not even realize that!
- That **samādhi**, is *tadāyatana* or *Nibbāna*; see, “[Nibbāna “Exists”, but Not in This World.](#)”

4.7.6 Mundane versus Supramundane Jhāna

October 12, 2017; revised February 9, 2018; June 8, 2018; June 17, 2022; August 17, 2022

Here we will discuss three key *suttā* from the *Tiṭṭaka* to resolve controversial arguments about mundane (*anāriya*) and supramundane (*Ariya*) *jhāna*. I would appreciate any comments (lal@puredhamma.net) pointing out any errors in my analysis or suggestions.

- **February 28, 2019:** I have found several *Tipiṭaka* references to *anāriya jhāna*, and a short one is discussed at the end. The post, “[Tapussa Sutta \(AN 9.41\)– Akuppā Cetovimutti](#)” clearly explains the difference between *Ariya* and *anāriya jhāna*.
- It is interesting to note that some *suttā* do not specifically label *jhāna* as *Ariya* or *anāriya*. One has to read a given *sutta* carefully to figure out which *jhāna* are discussed, but the conclusion always is that *anāriya jhāna* are worthless by themselves unless used as a platform to attain *magga phala*; see, “[Samādhi, Jhāna, Magga Phala – Introduction](#).”
- **June 8, 2018:** Some *suttā* discuss the **critical differences**; see “[Pathama Mettā Sutta](#).” As can be seen in this *sutta*, a *Sotāpanna* can cultivate *anāriya jhāna* (i.e., without removing *kāma rāga*) and be born in lower *Brahma* realms. However, unlike those with *anāriya jhāna* without *magga phala*, that person will not return to *kāma loka*.

1. The main characteristics and purposes of *Ariya* (supermundane) *jhāna* are described in detail in the “[WebLink: suttacentral: Jhāna Sutta \(Aṅguttara Nikāya 9.36\)](#).” The English translation ([WebLink: suttacentral: Mental Absorption](#)) at that site is not good, so that I will translate most of the *sutta* here. However, the Sinhala Translation ([WebLink: suttacentral: කමන්තරිකාසන සුත්ත \(AN 9.36\)](#)) is much better; of course, *anicca* and *anatta* are translated incorrectly there too.

- I will use key Pāli terms without translating since anyone reading the post will likely understand them. I think that would make it easier to read.

2. Now, I will translate the *sutta*, and the **numbers below** correspond to the paragraphs in the Pāli version: “[WebLink: suttacentral: Jhāna Sutta \(Aṅguttara Nikāya 9.36\)](#).”

#1. Bhikkhus, I will state the removal of āsava (mental fermentations) via the first *jhāna*, second *jhāna*, third *jhāna*, fourth *jhāna*, *ākāsānañcāyatana*, *viññāṇañcāyatana*, *ākīṇcaññāyatana*, *nevasaññānāsaññāyatana*, *saññāvedayitanirodha* (the last four are the *arūpavacara jhānic* states). Also, I have minimized wording to keep the paragraph short, just giving the meaning. [*āsava*: mental effluent, pollutant, or fermentation, (lit: influxes), ‘cankers’, taints, corruption's, intoxicant biases. There is a list of four (as in D. 16, Pts. M. , Vibh.): the canker of (wrong) views (*diṭṭhāsava*), of sense-desire (*kāmāsava*), of (desiring eternal) existence (*bhavāsava*), and of ignorance (*avijjāsava*).]

- Thus **the main purpose of jhānic states is to do insight meditation and remove āsava**, not to enjoy that *jhānic* “pleasure” or relief. *Nibbāna* is attained via the removal of *āsava*: “[The Way to Nibbāna – Removal of Āsavas](#).”
- There is a lot of important information in the next paragraph.

#2. Bhikkhus, I surely declare the removal of *āsava* (mental fermentations) via the first *jhāna*. On account of what do I say that? A *bhikkhu* abstaining from sense pleasures (*viviceva kāmehi*), abstaining from *akusala*, arrives in the vicinity of the first *jhāna* (*upasampajja viharati*). He thus contemplates the **anicca nature (aniccato), dukkha nature (dukkhato)**, disease-ridden nature (*rogato*), cancer-like nature (*gandato*), arrow-like nature (*sallato*), painful (*aghato*), danger-ridden (*ābādhato*), alien (*parato*), subject to destruction (*palokato*), an empty (*suññato*), **not-fruitful and leading to helplessness (anatto)** OF *rūpa*, *vedanā*, *saññā*, *saṅkhāra*, *viññāṇa* (*rūpagataṃ vedanāgataṃ saññāgataṃ saṅkhārāgataṃ viññāṇagataṃ*). He turns his mind away from those phenomena and, having done so, inclines his mind to *Nibbāna*: ‘*etaṃ santaṃ etaṃ paṇītaṃ yadidaṃ sabbasaṅkhārasamatho sabbūpadhipaṭinissaggo taṇhākkhayo virāgo nirodho nibbānaṃ*’*ti*. [“It is peaceful, it is serene, the expelling of all *saṅkhāra*, breaking of bonds, removing greed and hate; *Nibbāna*.”] Thus he gets rid of *āsava*. If he does not complete the removal of *āsava*, he would remove the first five *saṃyojana* and thus will be born *opapātika* (in *brahma loka*) and attain *parinibbāna* there and will not return to this world (*No ce āsavānaṃ khayam pāpuṇāti, teneva dhammarāgena tāya dhammanandiyā pañcannaṃ orambhāgiyānaṃ saṃyojanānaṃ parikkhayā opapātiko hoti tattha parinibbāyī anāvattidhammo tasmā lokā*).

- Thus one cannot attain *Ariya jhāna* without comprehending ***anicca, dukkha, and anatta*** nature of the *pañcakkhandha*.
- The common verse, “..(pathamam) *jhānam upasampajja viharati*..” is commonly translated as, “..enters and remains in the (first) *jhāna*..” However, “*upasampajja viharati*” (“*upa*” + “*san*” + “*pajja*”) means “abiding in the vicinity of clarifying and removing ‘*san*’”; of course ‘*san*’ are *lobha, dosa, moha* or *āsava*. The prefix “*upa*” means “near or close.” For example, “*upasampadā*” (“*upa*” + “*san*” + “*padā*”) means a *bhikkhu* has advanced and is getting close to “sorting out ‘*san*’” and thus to *magga phala*.
- **Now, let us recapture the three important steps in the above paragraph:** First, one gets to the *jhāna* by contemplating on a long list of faults (*ādinava*) of the five aggregates *rūpa, vedanā, saññā, saṅkhāra, viññāna* that make up one’s world; see, “[The Five Aggregates \(Pañcakkhandha\)](#).” [*ādinava*: m. 過患, 患難, 過失, 危難. bad consequences (suffering), difficult and dangerous situation (trouble), fault (inadvertent [not resulting from or achieved through deliberate planning] mistakes), danger and disaster (distress)]
- Once one gets to the vicinity of the first *jhāna*, one can intensify it and be fully absorbed in it by contemplating the relief that is already seen: ‘*etaṃ santam etaṃ paṇītam yadidaṃ sabbasaṅkhārasamatho sabbūpadhipaṭinissaggo taṇhākkhayo virāgo nirodho nibbāna*’*ti*. **This is the extra effort involved in cultivating the *jhāna* versus *paññāvimutti* path.** [It is peaceful, it is serene, the expelling of all *saṅkhāra*, breaking of bonds, removing greed and hate; *Nibbāna*.]
- Thirdly, one can get to the higher *jhāna* by again contemplating the faults (*ādinava*) of the five aggregates.

#3. “*Bhikkhus*, an archer or archer’s apprentice, were to practice on a straw man or mound of clay, after a while, he would become able to shoot long distances, to fire accurate shots in rapid succession, and pierce great masses; in the same way, a *bhikkhu* abstaining from sensuality, abstaining from *akusala*, arrives in the vicinity (*upasampajja*) of the first *jhāna*.”

- The rest is essentially the same as in #2 above from that point onward about how *āsava* are removed by contemplating those faults (*ādinava*) of the five aggregates, to the following confirmation statement at the end of the paragraph to emphasize the following: “*Bhikkhus*, I surely declare removal of *āsava* (mental fermentations) via the first *jhāna*.”

#4. This paragraph repeats the same paragraph of #2 above, for the second, third, and fourth *jhāna*. It is interesting that even at the fourth *jhāna*, one could only be guaranteed to become an *Anāgāmī*. However, as mentioned in #2, one could attain *Arahanthood* even from the first *jhāna* if all *āsava* are removed. That holds for any *jhāna* through the fourth.

#5. The same verse as #3 is repeated for the second, third, and fourth *jhāna*, with the paragraph ending, “..*Bhikkhus*, I surely declare the removal of *āsava* (mental fermentations) via the fourth *jhāna*.”

#6 , #7. The paragraphs in #2 and #3 for the first *jhāna* are now repeated for the first *arūpāvacara jhāna*: *ākāsānañcāyatana*.

#8 , #9. The paragraphs in #2 and #3 for the first *jhāna* are now repeated for the second and third *arūpāvacara jhāna*: *viññāṇaṇcāyatana* and *ākīṇcaṇṇāyatana*. Again, it is interesting that even at such higher *arūpāvacara jhānā*, one could only be guaranteed to become an *Anāgāmī*.

#10. “As for the two *saññāsamāpatti āyatana* – *nevasaññā nā saññāyatana samāpatti* and *saññāvedayitanirodho* – they remove *āsava* and will lead to the faultless state of *Nibbāna*.”

- Thus if one gets to the highest *arūpāvacara Ariya jhāna*, one will attain the *Arahantship*, and also will be able to get to *nirodha samāpatti* (*saññāvedayitanirodho*).

3. That is, in essence, the complete *sutta*, which provides many key insights that have been hidden surprisingly. I almost fell off my chair when I first read it. I am unsure how and why modern translators failed to understand the importance of this *sutta*.

- Then I started reading more *suttā* and realized that these key pieces of information are in many other *suttā*. See, for example, “[WebLink: suttacentral: Cūla Vvedalla Sutta \(MN 44\)](#)” AND “[WebLink: suttacentral: Kāyagatāsati Sutta \(MN 119\)](#).”

4. We can learn a lot of key aspects of *Ariya jhāna* from this important *sutta*. Let us begin with the fact that one gets to the vicinity (*upasampajja*) of the first *jhāna* **by contemplating the faults (*ādinava*) of *pañcakkhandha* (*rūpa, vedanā, saññā, saṅkhāra, viññāṇa*); once getting there, one further removes *āsava* by the same process.**

- Thus, one gets to *jhāna* with insight meditation (*Vipassanā*) on the unsuitability (faults of) *kāmāvacara* states, and then once getting to *jhāna*, starts doing *Vipassanā* on the unsuitability of any *jhānic* state to transcend that state.
- There is a long list of such faults (*ādinava*) (**from #1**): *anicca* nature (*aniccato*), *dukkha* nature (*dukkhato*), disease-ridden nature (*rogato*), cancer-like nature (*gandato*), arrow-like nature (*sallato*), painful (*aghatto*), danger-ridden (*ābādhato*), alien (*parato*), subject to destruction (*palokato*), an empty (*suññato*), not-fruitful and leading to helplessness (*anatto*).

5. Therefore, the main goal at any given *Ariya jhāna* is to contemplate all those faults (*ādinava*) of that state — thus move to the next higher state — and to finally arrive at *Nibbāna* at the last (8th) *jhāna*. Of course, one could completely remove all *āsava* and attain *Nibbāna* from any lower *jhāna*.

- If one attains *Nibbāna* from a lower *jhānic* state (below the highest *arūpāvacara jhāna*), one is said to attain *paññāvimutti*. If one goes through to that highest *jhāna* and attains *Nibbāna*, one is said to have attained *akuppā cetovimutti*. I will have a separate post on this.
- While the word “*jhāna*” has come to common use, a better word is “*dhyāna*” (ධ්‍යාන in Pāli and ද්‍යාන in Sinhala, meaning “burning”).
- We will stick with the word “*jhāna*” instead of “*dhyana*” since it is commonly used. It is just useful to know where the meaning comes from.

6. One can think clearly in any *jhāna*. Even intermittent *vitakka/vicāra* (“wheeling around” with stray thoughts) will be absent after the second *jhāna*, i.e., one is in the *avitakka/avicāra* (free of *vitakka/vicāra*) mode after the second *jhāna*; I will discuss *jhānanga* or *jhāna* factors in a future post.

- This is why *Ariya jhāna* is helpful in insight (*Vipassanā*) meditation. The mind becomes clear when more and more *saṅkhāra* are removed as one proceeds to higher *jhāna* states.

7. Even though the relief experienced in *Ariya jhāna* is the only “enjoyment” recommended by the Buddha, that is not the main purpose of *Ariya jhāna*. That is because if one gets attached to a *jhāna*, one cannot move up to the higher one. In any case, it is mainly those who get to *anāriya jhāna* who get attached to them (**however, it is possible to attain any stage of *magga phala* even with *anāriya jhāna* or even without any *jhāna***). If one has seen the *anicca* nature, one will not get attached to a *jhāna*.

- In that context, in a previous post, it was discussed that any *jhānic* state is a mental state corresponding to “this world”; see “[Ascendancy to Nibbāna via Jhāna \(Dhyāna\)](#).”

8. *Pancanīvarana* are also completely removed at the first *Ariya jhāna*. From the [WebLink: suttacentral: Mahāvedalla Sutta \(Majjhima Nikāya 43\)](#): “.. *Idhāvuso, paṭhamam jhānam samāpannāssa bhikkhuno kāmaccando pahīno hoti, byāpādo pahīno hoti, thinamiddham pahīnam hoti, uddhaccakukkuccam pahīnam hoti, vicikicchā pahīnā hoti..*”

- Many *suttā* clearly state such conditions for the first **supramundane** *jhāna*.

- In contrast, neither the five *saṃyojana* nor the *pañcanīvaraṇa* is removed in any **mundane jhāna**. The reasons are obvious: none of the *kilesa* (*klesha*/defilements) can be removed by taking a neutral object as the *ārammaṇa*.

9. This is why the Buddha told Ven. Saddhā: “..‘*Ājānīyajhāyitaṃ kho, saddhā, jhāya; mā khaḷuṅkajhāyitaṃ..*’, OR ‘Saddhā, cultivate the *ājānīya* (thoroughbred horse) *jhāna*, not the *khalunka* (mule) *jhāna*’: [WebLink: suttacentral: Saddhā Sutta \(Aṅguttara Nikāya 11.9\)](#).

- In the [WebLink: suttacentral: Sutta Central translation](#), *khalunka* is translated as a colt (a young horse). But the correct translation is a mule. As described in the *sutta*, a mule is lazy and useless compared to a thoroughbred horse.
- As described in the *sutta*, one who cultivates mundane *jhāna* takes worldly objects (*kaṣiṇa*, breath) as *ārammaṇa*, and even though can attain *jhāna*, they will not have the respect of the *devas* who can see the *ārammaṇa*.
- On the other hand, *devas* cannot see the *ārammaṇa* (*Nibbāna*) of those who have cultivated *Ariya jhāna*, and they pay to him from a distance.

10. Therefore, there is a HUGE difference in HOW one arrives at a given *jhāna*.

- One using the *anāriya* path gets to *jhāna* by focusing one’s mind on a mundane object, i.e., an object belonging to this world (for example, one’s breath or a *kaṣiṇa* object) and/or by contemplating mundane moral thoughts (benevolent, kind, etc.); we will discuss this in the next post.
- On the other hand, one on the Noble Path reaches a *jhāna* by contemplating *Nibbāna*, i.e., the *anicca*, *dukkha*, and *anatta* nature of this world of 31 realms. One may or may not get to *Ariya jhāna* that one can get into *samāpatti* (meaning uninterrupted *jhāna*, where the *jhāna citta* runs continuously without a break) before getting to the *Arahanthood*.
- However, *jhāna sukha* is the only *sukha* recommended by the Buddha since sense pleasures will bind one to the *kāma loka*. It is said that some *paññāvimutta Arahants* cultivate *jhāna* after attaining *Arahanthood*.

11. Also see the previous post where it is discussed how Ven. Moggallāna cultivated the first *jhāna* after attaining the *Sotāpanna* stage: “[Ascendance to Nibbāna via Jhāna \(Dhyāna\)](#).”

- One who can get fully absorbed in the first *Ariya jhāna* will be born in the *Suddhāvāsa* realms of the ***rūpa loka***, and will not come back to the *kāma loka*, i.e., one is an *Anāgāmī*, as clearly stated in the *Jhāna Sutta* and several other *sutta*.
- On the other hand, one who cultivates **mundane first jhāna** will be born in the **first rūpāvacara Brahma realm in the next birth**, but in later rebirths could even be born in the *apāyā* (since *kāma rāga* was only suppressed, not removed).

12. One can get into mundane (*anāriya*) *jhāna* via breath or *kaṣiṇa* meditation, and one could do *Vipassanā* from mundane *jhānic* states.

- But the problem is, in many cases, people get addicted to those states and cannot see their *anicca* nature of them.

13. In addition to the above *suttā* (and more that I found) on *Ariya jhāna*, I found other *suttā* that discussed *anāriya jhāna*. **In none of these *suttā*, there was a specific label saying *Ariya jhāna* or *anāriya jhāna***. However, one can see which is which when reading text.

- In the following reference, it is clearly stated that *kāma raga* is only suppressed (***vikkhambhanato***) in all *rūpāvacara* and *arūpāvacara jhāna*. On the other hand, it states that *kāma raga* is removed (***samucchedato***) in stages via *magga phala*.
- The difference between ***vikkhambhana pahāna*** and ***samuccheda pahāna*** is discussed in, “[Suffering in This Life – Role of Mental Impurities](#).”

The following are the two relevant passages from the *Khuddaka Nikāya*, *Mahāniddeśa*, *Aṭṭhakavagga*: [WebLink: suttacentral: 1. Kāmasuttaniddeśa \(Mnd 1\)](#) . There is no English translation there, but the Sinhala translation is given: [WebLink: suttacentral: කම ඝුඤ්ඤිකාදිකාය \(Mnd 1\)](#).

Paṭhamam jhānam bhāventopi vikkhambhanato kāme parivajjeti ... pe ... duttiyam jhānam bhāventopi ... tatiyam jhānam bhāventopi ... catuttham jhānam bhāventopi ... ākāsaññāyatanasamāpattiṃ bhāventopi ... viññāṇaṇcāyatanasamāpattiṃ bhāventopi ... ākiñcaññāyatanasamāpattiṃ bhāventopi ... nevaśaṇṇānāsaññāyatanasamāpattiṃ bhāventopi vikkhambhanato kāme parivajjeti. Evaṃ vikkhambhanato kāme parivajjeti.

- Translated: “*kāma*” is suppressed (*vikkhambhanato*) in the first *jhāna*, ...to *nevaśaṇṇānāsaññāyātana* (highest *arupavacara jhāna*). As we saw above, *kāma* is removed even before getting to *Ariya jhāna*. Thus, only *anāriya* (mundane) *jhāna* are meant here.
- See “[WebLink: suttacentral: Tapussa Sutta \(AN 9.41\)](#)” for another example.

Katham samucchedato kāme parivajjeti? Sotāpattimaggaṃ bhāventopi apāyagamanīye kāme samucchedato parivajjeti, sakadāgāmimaggaṃ bhāventopi oḷārike kāme samucchedato parivajjeti, anāgāmimaggaṃ bhāventopi anusahagata kāme samucchedato parivajjeti, arahattamaggaṃ bhāventopi sabbena sabbam sabbathā sabbam asesam nissesaṃ samucchedato kāme parivajjeti. Evaṃ samucchedato kāme parivajjetīti—yo kāme parivajjeti.

- Translated: “*kāma*” is removed (*samucchedato*) in stages via the *Sotāpanna*, *Sakadāgāmī* stages and is removed at the *Anāgāmī* stage; it is removed without a trace at the *Arahant* stage.

14. The following *sutta* clearly states the difference between *Ariya* and *anāriya jhānā*.

[WebLink: suttacentral: Pathamanānākarana Sutta \(AN 4. 123\)](#): “*Idha, bhikkhave, ekacco puggalo viviceva kāmehi vivicca akusalehi dhammehi savitakkaṃ savicāraṃ vivekajam pītisukham paṭhamam jhānam upasampajja viharati. So tadassādeti, tam nikāmeti, tena ca vittiṃ āpajjati. Tattha tṭhito tadadhimutto tabbahula-vihārī aparihīno kālam kurumāno brahmakāyikānaṃ devānaṃ saḥabyataṃ upapajjati. Brahmakāyikānaṃ, bhikkhave, devānaṃ kappo āyuppaṃāṇaṃ. Tattha puthujjano yāvātāyukam tṭhāvā yāvatakaṃ tesam devānaṃ āyuppaṃāṇaṃ tam sabbam khepetvā nirayampi gacchati tiracchānāyonimpi gacchati pettivisayampi gacchati. Bhagavato pana sāvako tattha yāvātāyukam tṭhāvā yāvatakaṃ tesam devānaṃ āyuppaṃāṇaṃ tam sabbam khepetvā tasmimīyeva bhava parinibbāyati. Ayam kho, bhikkhave, viseso ayam adhippayāso idam nānākaraṇaṃ sutavato ariyasāvakaṃ assutavatā puthujjanena, yadidaṃ gatiyā upapattiyā satī.*”

Translated: “There is the case where an individual, withdrawn from sensuality (*kāma*), withdrawn from *akusala*, enters & remains in the first *jhāna*: rapture & pleasure born from withdrawal, accompanied by directed thought & evaluation. He savors that, longs for that, and finds satisfaction through that. Staying there—fixed on that, dwelling there often, not losing the *jhāna*—then when he dies, he is born with the *devas* of Brahma’s retinue. The *devas* of Brahma’s retinue, monks, have a life span of an eon. **A run-of-the-mill person, having stayed there, having used up all the life-span of those *devas*, goes to hell, to the animal realm, or the state of the hungry ghosts. But a disciple of the Blessed One, having stayed there, having used up all the life-span of those *devas*, attains *Parinibbāna*.** This, monks, is the difference, this the distinction, this the distinguishing factor, between a Noble disciple and a normal person who had not heard the Noble Truths (*assutavatā puthujjanena*), in regards to the *gati* and birth.”

- When one attains the first *Ariya jhāna*, one has become an *Anāgāmī*. He/she will be born in that *Brahma* realm and attain *Parinibbāna* there, as stated in the above *sutta*.
- In other words, *kāma rāga* must be completely REMOVED to get to the first *Ariya jhāna*. It is only temporarily suppressed (*vikkhambhana pahāna*) for the *anāriya jhāna*.
- A *Sotāpanna* who gets to the first *anāriya jhāna* has not removed *kāma rāga*. But he/she will not come back to the *kāma loka* (will get the *Anāgāmī phala* moment in the *Brahma loka* and attain *Nibbāna* there). So, he/she is still an *Anāgāmī* (“*na*” + “*āgāmī*” or not coming back).

- Even some followers of Waharaka Thero in Sri Lanka do not seem to understand this point. However, Waharaka Thero has explained this in the following short *desanā* (in Sinhala): “[WebLink: Ariya and Anāriya Jhāna \(Audio\)](#).”

4.7.7 Nirodha Samāpatti, Phala Samāpatti, Jhāna, and Jhāna Samāpatti

February 13, 2018; revised July 3, 2022

Nirodha samāpatti and various *phala samāpatti* are related to *Nibbānā*. *Jhāna* and *jhāna samāpatti* belong to “this world”.

Introduction

1. *Nirodha samāpatti* and various *phala samāpatti* are different, and they are very different from *jhāna* and *jhāna samāpatti*.

- The first two are related to *Nibbāna*. *Jhāna* belong to “this world.” *Jhāna* are basically the mindsets that *rūpāvacara* and *arūpāvacara Brahmā* enjoy.

2. Before starting the discussion, I would like to emphasize the following. Concepts that we deal with in this post, as well as that of *Nibbānā* (*Arahanthood*, in particular), are virtually impossible to imagine for most people. However, there could be a few people who have studied these concepts in detail and have some “nagging questions”, and hopefully this information will be helpful.

- These concepts are contrary to ideas that normal humans are familiar with. Normal humans crave things in the material world so much, it is almost impossible to rationalize why one would want to stop the rebirth process (i.e, to attain *Arahanthood*). Therefore, it is a waste of time to spend too much time thinking about such abstract concepts, at least until one gets to the *Sotāpanna* stage; these concepts really start making sense only when one gets closer to the *Anāgāmi* stage.
- In the same way, it is hard to imagine for a normal human how *nirodha samāpatti* (where all thoughts are stopped) can provide happiness. This is why I have explained in the “*Nibbānā*” subsection that *Nibbānic* bliss is NOT a feeling of pleasure (that would involve the *vedanā cetasika*, and thus would belong to this world). It is more like the sense of relief one would feel when a long-lasting migraine headache goes away.
- With that out of the way, let us start the discussion.

Life Maintained by *Kammic* Energy

3. First, it is important to remember that life is maintained by *kammic* energy, not via *citta vīthi*. Therefore, *kammaja kāya* is present at ALL TIMES. *Kammaja* (“*kamma*” + “*ja*”) means “created by *kamma* (*vipāka*).”

- The *kammaja kāya* or the *gandhabba* (*hadaya vatthu* plus the five *pasāda rūpa*) is created at the *cuti-paṭisandhi* moment. The blueprint for our physical body is in the *kammaja kāya* (*gandhabba*), and thus the physical body grows according to the *kammaja kāya* (*gandhabba*).
- When one’s *kammaja kāya* for the present *bhava* runs out of *kammic* energy, a new *kammaja kāya* matching the next *bhava* is initiated by *kammic* energy for the new *bhava*, at the *cuti-paṭisandhi* moment.

4. Therefore, each of us has had a *kammaja kāya* corresponding to most of the realms in this world from a time that cannot be traced to a beginning!

- Those who are not familiar with a specific term can use the “Search box” to find relevant posts. For example, we have four types of “*kāya*”: *kammaja*, *cittaja*, *utuja*, and *karaja kāya*. That last one is our

physical body. Such a physical body is absent in *rūpāvacara* and *arūpāvacara* realms (basically just the *gandhabba*).

5. *Cittaja kāya* means the flow of *citta vīthi*. Remember that *kāya* is a “collection.” *Citta* arise in the *hadaya vatthu* in the *kammaja kāya*.

- *Cittā* always run in “series” or *vīthi*. Each *pañcadvāra* (arising due to the five physical senses) *citta vīthi* ALWAYS has 17 *cittā*.
- A *manodvāra* (arising directly in mind) *citta vīthi* normally has 10-12 *citta*. However, as we mentioned above, when in a *samāpatti*, *manodvāra citta vīthi* can run continuously. **Therefore, there is no set upper limit to the number of *manodvāra citta* running continuously when in a *samāpatti*.**
- The mind could be in different types of *bhavaṅga* states in between *manodvāra/pañcadvāra citta vīthi*.

Bhavaṅga State – Not a Citta

6. While the *kammaja kāya* is active AT ANY TIME, there CAN BE GAPS in the *cittaja kāya*.

- ***Bhavaṅga* is a “state of mind”** (other than *bhavaṅga citta* that sometimes come inside a *citta vīthi*); see, “[Bhava and Bhavaṅga – Simply Explained!](#)”
- When in a ***bhavaṅga* state**, there are no *citta vīthi* running, so there are not even universal *cetasika* present. **One just knows that one is living, but there is no thought object (*ārammaṇa*).** No *citta vīthi* run inside a ***bhavaṅga* state**.
- A crude analogy of the *bhavaṅga* state is a TV set that is not tuned to a station. We can see the flickering of white dots on the screen and hear a background “hum.” But there is no picture. So, the mind is “on” but has no thought object.
- When an *ārammaṇa* comes to the mind, the mind captures that sound, picture, smell, etc. That is like that TV being tuned to a station and one can see the picture.

Difference Between *Samāpatti* and *Jhāna*

7. The main difference between any *samāpatti* and *jhāna* is that *jhāna citta* do not run continuously. When one is in a *jhāna*, *jhāna citta vīthi* are interrupted by *pañcadvāra citta vīthi* running in between. *Pañcadvāra citta vīthi* are those coming through the five physical senses. Therefore, when one is in *jhāna*, one can see, hear, etc.

- But when one is in any type of *samāpatti*, corresponding *manodvāra citta vīthi* run continuously. Therefore, there is no opportunity for *pañcadvāra citta vīthi* to run, and thus **one in a *samāpatti* is totally unaware of the external environment.**

8. One could also be in a *jhāna samāpatti*. In this case also, there are no *pañcadvāra citta vīthi* interrupting the flow of *jhāna citta vīthi*. One in a *jhāna samāpatti* also will not see, hear, smell, etc.

- It is with practice that one who can get into *jhāna* can develop the ability to get into *jhāna samāpatti*. As one cultivates the *jhāna*, there will be less and less *pañcadvāra citta vīthi* coming in between successive *jhāna citta vīthi*. Initially, only 2-3 *jhāna citta vīthi* flow before a *pañcadvāra citta vīthi* comes in. With practice, one could be experiencing *jhāna citta vīthi* continuously for hours.

Citta Absent in the *Asaññā* Realm

9. However, in the *asaññā* realm, there is no *cittaja kāya* or even a *bhavaṅga* state. **One does not even know that one is alive.** There is a fine physical body that is kept alive by *kammic* energy. So, the *kammaja kāya* is there.

- This is why the Buddha said it is a waste of time to get a birth in the *asaññā* realm by cultivating *asaññā* meditation techniques. One will live in the *asaññā* realm for 500 *mahā kappa* (that is trillions of years), and just comes back to the human realm and start all over.
- In a previous post I provided evidence that *viññāṇa* cannot exist without a *rūpakkhanda*; see #10 of “[Gandhabba State – Evidence from Tipitaka](#).” However, *rūpakkhanda* can exist without *viññāṇa*.
- If we become unconscious for some reason, that is like living in the *asaññā* realm during that time.

Phala Samāpatti

10. When one is in a *phala samāpatti*, that *phala citta* runs continuously.

- For example, if one is in *Arahant phala samāpatti*, one has the *Arahant phala citta* running continuously.
- Not everyone with a *magga phala* can get into *phala samāpatti* automatically. Just like *jhāna*, they require a lot of practice unless one had cultivated *jhāna* in recent lives.

Nirodha Samāpatti Versus Asaññā Realm

11. When one is in *nirodha samāpatti*, there is no *citta vīthi* or a *bhavaṅga* state. It is sort of like in the *asaññā* realm.

- But of course, there is huge difference between *nirodha samāpatti* and being in the *asaññā* realm. One who can get to *nirodha samāpatti* has removed ALL DEFILEMENTS (and thus *avijjā*), but one in the *asaññā* realm has not. So, at the end of the life in the *asaññā* realm, that person would come back to the human realm and can be reborn even in the *apāyā* in later rebirths.
- This point actually explains why it is so peaceful not to have any *citta* running through the mind. That is the closest explanation that can be given to a normal human as to how having no *citta* can be so peaceful. But this is hard even to imagine for a normal human, as I mentioned at the beginning. Those who cultivate *jhāna*, and get to higher *jhānic* states, can start seeing that this is true. That is why they cultivate *jhāna* all the way up to the 8th *jhāna* (*neva saññā nā saññā*).

Nirodha Samāpatti

12. *Nirodha samāpatti* is succinctly described in a verse in the [WebLink: suttacentral: Mahāvedalla Sutta \(MN 43\)](#), where the difference between a dead body and the body of one in *nirodha samāpatti* is described: “*Yvāyaṃ, āvuso, mato kālaṅkato tassa kāyasaṅkhārā niruddhā paṭippassaddhā, vacīsaṅkhārā niruddhā paṭippassaddhā, cittasaṅkhārā niruddhā paṭippassaddhā, āyu parikkhīṇo, usmā vūpasantā, indriyāni paribhinnāni. Yo cāyaṃ bhikkhu saññāvedayitanirodham samāpanno tassapi kāyasaṅkhārā niruddhā paṭippassaddhā, vacīsaṅkhārā niruddhā paṭippassaddhā, cittasaṅkhārā niruddhā paṭippassaddhā, āyu na parikkhīṇo, usmā avūpasantā, indriyāni vipasannāni. Yvāyaṃ, āvuso, mato kālaṅkato, yo cāyaṃ bhikkhu saññāvedayitanirodham samāpanno—idaṃ nesaṃ nānākaraṇaṃ*”ti..”

Translated: “*āvuso*, a dead body does not generate any *kāyasaṅkhārā*, *vacīsaṅkhārā*, or *cittasaṅkhārā*; its lifetime expired and it does not breathe, and the body gets cold with all sense organs dead. But that *bhikkhu* in *saññāvedayita-nirodha samāpatti*, even though his *kāyasaṅkhārā*, *vacīsaṅkhārā*, and *cittasaṅkhārā* all have ceased, and does not breathe, his body does not get cold and all sense organs are kept alive. This, *āvuso*, is the difference between a dead body and that *bhikkhu* in *nirodha samāpatti*.”

- Since all *saṅkhārā* are stopped, there are no *citta* with even the universal *cetasika* when in *saññāvedayita nirodha samāpatti*.
- This also clarifies that *saññāvedayita* means without any *saññā* or *vedanā*.

Getting into *Nirodha Samāpatti*

13. Not all *Arahants* can get into *nirodha samāpatti*. Access to *nirodha samāpatti* is NOT by taking *Nibbāna* as the thought object, but via the 8th *jhāna*. As one gets to higher *jhāna*, number of *cetasika* in a *citta* get smaller, i.e., *citta* become less and less “burdened.”

- An *Arahant* has to go through the following sequence to get to *nirodha samāpatti*. Cultivate all the *jhānā*, get to the fourth *jhāna samāpatti*, and access all *arūpāvacara samāpatti* up to the *neva saññā nā saññā*. The *neva saññā nā saññā* state is just a step away from stopping the arising of any *citta*.
- From there, the *Arahant* can make a determination of how long to stay in *nirodha samāpatti*, and make the transition from the *neva saññā nā saññā* state to *nirodha samāpatti*.
- While *anāriya yogis* can get to the *neva saññā nā saññā* state, they can make the transition to *saññāvedayita nirodha samāpatti*. Even an *Anāgāmī* who has cultivated *arūpāvacara samāpatti* can not get into *saññāvedayita nirodha samāpatti*.
- By the way, this process of getting to *nirodha samāpatti* is described in the “[WebLink: suttacentral: Anupada Sutta \(MN 111\)](#)” and in the “[WebLink: suttacentral: Pañcakaṅga Sutta \(SN 36.19\)](#).”

Nibbānic Bliss Is not a Cetasika Vedanā

14. The “[WebLink: suttacentral: Pañcakaṅga Sutta \(SN 36.19\)](#)” also clarifies another important point. If there are no *cittā* (with *saññā* or *vedanā*) when one is in *saññāvedayita nirodha samāpatti*, how can one say that it is the ultimate happiness (*Nibbanic bliss*)?

- *Nibbānic bliss* is not a *cetasika vedanā*, which would belong to this world. I have compared it to the relief one feels when a long-experienced migraine headache finally goes away; see, the *Nibbāna* subsection.

The above *sutta*, in the last verse, put it this way: “*Thānam kho panetaṃ, ānanda, vijjati yaṃ aññatitthiyā paribbājakā evaṃ vadeyyuṃ: ‘saññāvedayitanirodhaṃ samaṇo gotamo āha, taṅca sukhasmiṃ paññapeti. Tayidaṃ kiṃsu, tayidaṃ kathaṃsū’ti.*”

Evaṃvādino, ānanda, aññatitthiyā paribbājakā evamassu vacanīyā: ‘na kho, āvuso, bhagavā sukhaññeva vedanaṃ sandhāya sukhasmiṃ paññapeti. Yattha yattha, āvuso, sukhaṃ upalabbhati, yaḥiṃ yaḥiṃ taṃ taṃ tathāgato sukhasmiṃ paññapeti’”ti.”

Translated: “It may happen, Ānanda, that Wanderers of other sects will be saying this: ‘The recluse Gotama speaks of the *saññāvedayita nirodha* and describes it as pleasure. What is this pleasure and how is this a pleasure?

“Those who say so should be told: ‘The Blessed One describes as pleasure **not the feeling of pleasure**. But a *Tathāgata* describes as pleasure absent of suffering.’ ”

Nirodha Samāpatti and Parinibbāna

15. No *citta vīthi* run in *nirodha samāpatti*, and *bhavaṅga* state is not present either. Life in the body is maintained with *kammic* energy. No *vedanā*, *saññā*, etc. The maximum time in *nirodha samāpatti* is 7 days. The *Arahant* can make a determination before getting into *nirodha samāpatti*, as to how long (up to 7 days) to stay in that state.

- *Parinibbāna* state is just like *nirodha samāpatti*. The only difference is that there is no “coming back” to this world upon entering *Parinibbāna*.
- Therefore, *Arahants* tend to get to *nirodha samāpatti* whenever possible, in order to experience the “*Nibbānic bliss*”, and to get away from the “burdensome worldly thoughts.” As I said, it is hard for normal humans to imagine this.

Nirodha Samāpatti and Arahant Phala Samāpatti

16. In other types of *samāpatti* (other than the *nirodha samāpatti*), *manodvāra citta vīthi* will flow continuously. There is no falling to *bhavaṅga* or taking an external object with a *pañcadvāra citta vīthi*. Thus one cannot see, hear, etc. Normally, *samāpatti* will eventually break on its own or (when one gets good at it) one can pre-set the time to be in *samāpatti*.

- *Arahant phala samāpatti* is where an *Arahant* experiences the *pabhassara citta*, a pure *citta* with just the universal *cetasika*, where the *saññā cetasika* is not contaminated. *Nibbāna* is the thought object made contact with *phassa cetasika* and *vedanā* and *saññā* are based on that (we have no idea about that). There, one does not hear, see, anything either, just like in *jhāna samāpatti*.
- When an *Arahant* is not in *nirodha samāpatti* or *Arahant phala samāpatti*, his/her *citta* gets only to the “*mano*” state, in the sequence that normally ends up in the *viññāṇakkhandha* state for a normal human; see #4 of “[Pabhassara Citta, Radiant Mind, and Bhavaṅga](#).”

We Can Discuss Any Unresolved Issues

17. Hopefully, that should cover the questions raised in the discussion forum under the topics: “[WebLink: Nirodha Samāpatti](#),” “[WebLink: Difference between “Arahant phala samāpatti” and “Nirodha samāpatti” ?](#),” and “[WebLink: Nirodha Samāpatti and Amoha](#).”

- If there are more questions on this and related issues, please ask them under the topic “[WebLink: Difference between “Arahant phala samāpatti” and “Nirodha samāpatti” ?](#).” I am going to close the other two topics, in order to not have too many parallel and related discussions.
- Please also include any references **from the *Tipiṭaka***, for above descriptions. This post was put together from what I have heard from Waharaka Thero’s *desanās*, and I will also add references as I come across them in the *Tipiṭaka*.

4.8.1 Our Mental Body – Gandhabba

December 26, 2016; revised February 1, 2020; July 14, 2022

Introduction

1. Grasping the message of the Buddha requires two essential ingredients. (i) **It is easier done with a mind that has fewer defilements** (*kilesa* or *keles* or *klesha*), and (ii) **One needs to go beyond learning mundane interpretations of crucial concepts.**

- If those two conditions are satisfied, grasping deeper Dhamma concepts will not be a difficult task. If one can comprehend — not merely to memorize — the key concepts, it becomes easy to avoid getting the “*viparīta saññā*” or the “incorrect impression” of a given concept. [*viparīta* : [adj.] reversed; changed; wrong.]
- This process gradually leads to the comprehension of “*anicca saññā*” which is the key to the *Sotāpanna* stage of *Nibbāna*.
- In this post, we will start a discussion that will lead to a better explanation of “*saññā*” (which is one of the five aggregates) generally translated as “perception.”

Mental Body Is Primary and Physical Body Is Secondary

2. We will discuss how we grasp a given concept using any one of many human languages that are in use today.

- It is essential to understand that the mental body (*manomaya kāya* or *gandhabba*) is primary — initiating all our thoughts, speech, and actions. The physical body that we value so much is secondary.
- **While our brains help us grasp what is expressed in a given language (and we have to learn a given language), a *gandhabba* can understand that message directly — without using a brain or eyes, ears, etc. that are associated with the physical body.** The *gandhabba* — when outside the physical body — can see and hear without using eyes and ears, and grasp what is expressed by thoughts of other beings **directly** (where allowed by their *kammic* potential).

- *Gandhabbā* — and most living beings — communicate among themselves via “*saññā*.” No “spoken language” is involved since they cannot “talk” like we do. See, “[Ghost 1990 Movie – Good Depiction of Gandhabba Concept](#).”
- That is somewhat similar to how we experience dreams. We do not use our ears to hear in our dreams. We “perceive” what others say in our dreams. That is the closest analogy to how a *gandhabba* hears when outside a physical body. Seeing is the same way. In dreams, we don’t use our eyes to see; our eyes remain closed when we dream. **Both hearing and seeing are done just with the *sota* and *cakkhu pasāda rūpa* and the mind.**

Why Do We Highly-Value Our Physical Bodies?

Of course, until a Buddha comes to this world and explains the existence of a mental body, we would not be even aware of that distinction. Even today, scientists believe that the physical body is all we have and that our thoughts arise in the inert brain!

3. We highly value our physical bodies because we enjoy sense pleasures associated with smells, tastes, and body touches.

- However, to experience those three types of sensory contact, our mental bodies need to be trapped inside physical bodies. We pay the price for those sense enjoyments because those physical bodies are subject to rapid and unexpected decay and have relatively short lifetimes around 100 years.
- Furthermore, when the mental body is enclosed or trapped inside a physical body, it loses the ability to see external objects directly, hear external sounds, and recall *dhammā* (memories/concepts). All six sensory inputs now need to be processed by the brain and converted to a form (“*saññā*”) that can be grasped by the trapped mental body (*gandhabba*). For a more in-depth analysis, see “[Brain – Interface between Mind and Body](#).”
- The sense of smell, taste, or body touch is unavailable to beings in the higher 20 (*Brahma*) realms. Those *Brahmā* have mental bodies (with just a trace of matter) like our *gandhabbā*. **Just like those *Brahmā*, the *gandhabbā* cannot sense smell, taste, or body touches, but can “directly see, hear, and grasp concepts” without the aid of a brain when outside a physical body.**
- Please contemplate and grasp what is meant by those statements before proceeding further.

The “Mental Body” Lives Much Longer!

4. Another critical factor is the difference between the lifetime of a physical body and that of a mental body (*gandhabba*).

- A human *gandhabba* born at the *cuti-paṭisandhi* moment can live for hundreds to thousands of years. Within a given “human *bhava*,” there can be many repeated births as a human with a human body; see “[Bhava and Jāti – States of Existence and Births Therein](#).”
- When a physical body dies (and if more *kammic* energy for the human *bhava* remains), that *gandhabba* comes out of the dead body and waits for a suitable womb to re-enter and make a new human body. This process can happen many times during a given human *bhava*. Each time a different physical body is acquired by the *gandhabba*, as discussed below.
- Therefore, it makes more sense to focus on the well-being of the mental body (*gandhabba*) than on the short-lived physical body.

Some Exceptions To The Above Rules

5. There are a few exceptions to the above process.

- If one commits a *ānantariya pāpa kamma* (killing a parent, for example), then *gandhabba* that comes out of a dead physical body “cannot survive.” Because of that strong *kamma vipāka*, it undergoes a *cuti-paṭisandhi* moment and will be instantaneously born in an *apāya* suitable for that strong *kamma*.
- If one develops *Ariya* or *anāriya jhāna*, it also becomes a “good” *ānantariya kamma*. One will be born in a *Brahma* realm (corresponding to the highest *jhānic* state attained) by skipping the remaining human births. However, those who get to *brahma* realms via *anāriya jhānā* will return to human or lower realms. Any *Ariya* (starting with a *Sotāpanna*) who attains *Ariya jhānā* will never come back to *kāma loka*. Of course, a *Sotāpanna* (*Sakadāgāmi*) without *Ariya jhānā* will be reborn in human (*deva*) realms.
- That is also why an *Arahant* is not reborn, even if there is *kammic* energy left over for the human *bhava*. The *gandhabba* that comes out “cannot bear” the mindset of an *Arahant*, and will instantaneously undergo a *cuti-paṭisandhi* moment. Still, since an *Arahant* will not grasp a new *bhava*, they will not be reborn.
- Those above cases — where the human *bhava* prematurely terminates — are similar to the burning of a heater coil used in an immersion heater, when the heated coil comes out of the water. The heater coil can “bear” the heat as long as it is in the water. But once out of the water, the heater coil will quickly burn out. The physical human body can “bear” any of those states (*ānantariya kamma*) discussed above. That is why a person who killed their mother will not be born in an *apāya* immediately; only when the *gandhabba* comes out of the body will it be burnt, and new birth in an *apāya* will start.

Why Are Most People Not Aware of The *Gandhabba* Concept?

6. Even though there is no discussion about the *gandhabba* in Buddhaghosa's Visuddhimagga, it is a critical concept in Buddha Dhamma. The Buddha compared a *gandhabba* coming out of a physical body to a sword coming out of its sheath. The *gandhabba* is sometimes called a *Tirokuddha* in *Suttā*.

- People with *abhiññā* powers can move the *gandhabba* out of the physical body at will.
- Some people had cultivated *abhiññā* powers in recent previous births and can do it at will even though they have less control over the mental body. One can float to the ceiling and watch one's physical body lying on the bed, for example. Furthermore, during heart operations, the *gandhabba* can come out and view the process from the above, and provide details about it later. See. “[Out-of-Body Experience \(OBE\) and Manomaya Kāya](#).”

7. The *gandhabba* has only a trace of matter even hard to imagine. It is our mental body or *manomaya kāya*.

- **To give an analogy: A barely seen dust particle may have millions of atoms. The “material stuff” in a *gandhabba* is million-fold smaller than an atom!** The *gandhabba* is more like an “energy field.”
- This mental body is like a fine mesh spread throughout the physical body with the seat of the mind (*hadaya vatthu*) overlapping the physical heart.
- If that mental body comes out of the physical body, the physical body becomes as inert as a piece of wood (as a dead body is).

How Can a “Mental Body” Control a Heavy Physical Body?

8. Let us start by addressing some fundamental objections to the mental body's control of the physical body. First, how can a “mental body” move a heavy physical body?

- A good analogy is to compare it to how a human operator controls a heavy military tank from the inside of that enclosed tank. There, the human operator plays the role of the *gandhabba*.

- The human operator, of course, does not have enough energy to move the tank. He merely controls the direction of the movement by instructing the on-board computer. **The power to move the tank comes from the fuel stored in the military tank.**
- In the same way, the mental body (*gandhabba*) instructs the brain to generate required bodily movements or speech. Here, the brain plays the role of the computer in the military tank analogy. The small amount of energy needed for the *gandhabba* comes from the *kammic* power that led to human *bhava*. **The energy required for bodily movements (including speech) comes from our food.**

Details of The “Operator Analogy”

9. In the above analogy, the operator is totally shielded from the external world. He can monitor the outside environment only via the audio and video equipment mounted on the tank. The video cameras, for example, can feed videos to an on-board computer, which analyzes and displays it on a monitor for the operator to see.

- In the same way, our physical eyes send a picture to our brain, which analyzes them, and converts them to a form (“*saññā*”) that can be “seen” — or comprehended — by the *gandhabba* inside. So, **our brain is the computer** that conveys the information to the *gandhabba* that is really trapped inside the solid physical body; see, “[Brain – Interface between Mind and Body](#).”
- The *gandhabba* accesses the other four sensory inputs the same way, with the help of the ears, tongue, nose, and the body.
- Our memories, plans, etc. (all mental) are also “out there” (in the *mano loka*) but, of course, cannot be seen. They are collectively called “*dhamma*”; see, “[What are Dhamma? – A Deeper Analysis](#).” *Gandhabba* accesses those with the help of the *mana indriya* in the brain, which is the sixth sense input (like eyes for seeing, ears for hearing, etc.), and has not been identified by science yet.
- The *mano loka* co-exists with the *rūpa loka* (material world); see, “[Our Two Worlds: Material and Mental](#).”

How Does A *Gandhabba* Hear When Outside a Physical Body?

10. Another possible question is: “How does the *gandhabba* see and hear when outside the human body?”

- It is only in the human (and animal) realms that beings communicate via speech (and bodily gestures). In other realms, living beings communicate directly via *saññā*, one of the five aggregates (*pañcakkhandha*). While not all living beings can communicate with all other (it depends on each realm), where it is possible, communications take place via *saññā* generated in one’s thoughts.
- This experience is similar to one’s experience with dreams. **In a dream, we do not “hear” what others say in the same way when we hear speech normally. In a dream, we perceive what they are saying.**
- That is how those with *abhiññā* powers (even a few of us with *gati* from previous lives where they had such *abhiññā* skills in recent lives) can communicate with beings in other realms.

Why Do People Have Different Physical Bodies in Successive Human Lives?

11. It is the “same” *gandhabba* that is born with human bodies in successive human lives. Then another question may arise, “Why do people look different in successive rebirths?” That is because the physical body in each human birth (within the same human *bhava*) arises with contributions from the parents for that life.

- Even though the *gandhabba* brings in his/her *gati* (habits), *āsava* (cravings), *kilesa* (mental impurities), etc from the previous life, the **physical body** for each birth has significant contributions from the new parents.
- Therefore, the DNA of the physical bodies of two successive lives could be different due to this reason. The building of a new physical body is described in the post, “[Buddhist Explanations of Conception, Abortion, and Contraception.](#)”
- Even then, a *gandhabba* needs to match the *gati* of the parents.

One Can Travel to *Deva* or *Brahma* Realms With the *Manomaya Kāya*

12. Another interesting piece of information comes from how the Buddha (and others with *Iddhi Bala*) traveled to *deva* or *Brahma loka* with the *manomaya kāya*. Here the physical body is left behind (the physical body does not die in this case, and is kept alive by the *rūpa jīvitindriya*). Upon returning, the *manomaya kāya* can re-enter the physical body.

- Those who attain the fourth *jhāna* can develop *iddhi* powers can separate the *manomaya kāya* from the physical body. Then they can travel far with that *manomaya kāya*. Just as a sword comes out of its sheath, those with *iddhi* powers can pull the *manomaya kāya* out of the physical body.
- *Suttā* state that the Buddha visited *deva* or *Brahma lokas* “within the time that takes a bent arm to be straightened.”
- It is also possible for some of those with *iddhi* powers to travel with their physical bodies. That involves a different mechanism that is not relevant to this discussion.

Connection to “Astral Travel”

13. Even today, some ordinary people can dissociate their mental body from the physical body and “astral travel.” That *manomaya kāya* can then go to distant places within short times (this is what is called astral travel in the present day; see the Wikipedia article, “[WebLink: WIKI: Astral projection.](#)”

- A *gandhabba* is the same as an “astral body” that is described in such accounts; see, for example, “Journeys Out of the Body: The Classic Work on Out-of-Body Experience,” by Robert Monroe (1992). There are two sequels to that book, as well as books by others. Accounts in at least some of those books are consistent with the above mechanism.
- Also, the *gandhabba* can come out of the physical body under stressful conditions, particularly during heart operations. Many such accounts by a cardiologist have been documented in the book, “Consciousness Beyond Life,” by Pim van Lommel (2010).

Explanation of the “Time Gap” Between Two Successive Human Births

14. Many rebirth account features can be explained by the correct interpretation where the *manomaya kāya* (*gandhabba*) inherits many successive (but time separated) physical bodies.

- In rebirth stories, there is always a “time gap” between successive human births (*jāti*). That time gap can be several years or at least few years. In between those successive lives, that lifestream lives as a *gandhabba*, without a physical body.
- In most rebirth stories, the previous human life was terminated unexpectedly, like in an accident or a killing. Therefore, the *kammic* energy for the human *bhava* had not been exhausted. And the *gandhabba* just came out of the dead body and waited for another womb to enter.
- The Buddha told Vacchagotta that the *gandhabba* survives that intervening time by using *taṇhā* as *āhāra*. Some *gandhabbā* can “inhale” aroma from plants, fruits, etc., too.

Further Information

15. If one has been following — and trying to “live” the moral life recommended in the previous posts in the “[Living Dhamma](#)” section — it would be easier to follow the upcoming posts as we will be diving deeper.

- One aspect of realizing the *anicca* nature is to see the futility of expecting a “future happy life” by trying to make one’s physical body the “main focus.”
- It is essential to keep one’s body in good condition by eating well and engaging in a good exercise program. It is ALSO important to realize that this body will only last about 100 years. On the other hand, the mental body or the *gandhabba* can last many hundreds of years.
- Thus one should try to improve the condition of the mental body (*gandhabba*) by cultivating good *gati* and getting rid of bad *gati*.
- A detailed analysis of life, in general, is in the “[Origin of Life](#)” section.

Next, “[Saṅgā – What It Really Means](#).”

4.8.2 Gandhabba State – Evidence from Tipiṭaka

September 16, 2017; revised September 30, 2107; November 14, 2018; August 31, 2019; July 8, 2022

Introduction

1. I will present extensive evidence from the *Tipiṭaka* that the *gandhabba* state is a necessary feature of human (and animal) *bhava*. It is not an *antarābhava* (a state “in-between two *bhava*”). It is within the same human *bhava*.

- **One’s mental body (*gandhabba* or *manomaya kāya*) controls the physical body.**
- *Gandhabba* state remains through many successive human births within a given human *bhava* (which can last many hundreds of years). When a given physical body dies, the *gandhabba* can get into another womb, when a matching one becomes available. Rebirth stories confirm this account.
- However, the *gandhabba* concept is different from the idea of a “soul.” A *gandhabba* will keep changing during its lifetime. Furthermore, it will make a drastic change when the lifetime of the human *bhava* comes to an end.

Clear Evidence from *Paṭṭhāna*

2. Those who believe that *paṭisandhi* takes place in a womb need to consult the “[Paṭṭhānapakarana](#)” a section on *Abhidhamma Piṭaka* in the *Tipiṭaka*.

- ***Paṭisandhi* is the moment of grasping a new *bhava*, for example, a human *bhava*. At that moment a human *gandhabba* is born.**
- That *gandhabba* gets into a womb at a later time and that event is ***okkanti***. Human *bhava* is long, into thousands of years, and that is the lifetime of a human *gandhabba*. During that time, there could be many *okkanti* events leading to many rebirths with “physical human bodies.”
- ***Paṭisandhi* takes place with *kamma paccaya* and *okkanti* takes place with *sahajāta paccaya*.**
- We know that birth in the human realm (*paṭisandhi*) is a rare event. However, once in the human realm, a human *gandhabba* can be reborn with different “physical bodies” (via many *okkanti* events.) Otherwise, how can we account for so many rebirth accounts by children?

Background

3. At the Third Buddhist Council, Moggaliputta Tissa *Thero* proved that there is no *antarābhava* in a debate with the *Mahāyānists*. That correct interpretation is in the *Kathavatthu* of the *Tiṭṭaka*.

- Most current *Thervādins* erroneously believe that the *gandhabba* state is an “*antarābhava*” state. That is not correct; see, “[Antarābhava and Gandhabba](#)” and “[Cutī-Patisandhi – An Abhidhamma Description](#).”
- A human *gandhabba* exists within the human *bhava*.

4. A critical factor that contributes to this erroneous belief that the *gandhabba* state is an “*antarābhava*” is the inability to distinguish between *bhava* and *jāti*. They erroneously believe that *paṭisandhi* takes place in the womb. But it is evident in the *sutta* passages above, that it is *okkanti* (of the *gandhabba*) that happens, not *paṭisandhi*.

- A human existence (*bhava*) could last many hundreds or even thousands of years. Many human births (*jāti*) can take place during that time; see, “[Bhava and jāti – States of Existence and Births Therein](#).”
- In rebirth stories, there is always a “time gap” (typically several years) between successive human births (*jāti*). In between those successive lives, that lifestream lives as a *gandhabba*, without a physical body.
- Even during a given human life (*jāti*), the *gandhabba* may come out of the physical body under certain conditions, see, “[Manomaya Kāya and Out-of-Body Experience \(OBE\)](#).”
- It is the human *bhava* that is hard to attain (“[Rebirth – Connection to Suffering in the First Noble Truth](#)”). However, within a given human *bhava*, there can be many births until the *kammic* energy for that human *bhava* runs out. Otherwise, how can one explain all these rebirth stories, where a human is reborn only a few years after dying in the previous human life?

5. I understand the reluctance of many to discard the deeply embedded idea that *gandhabba* is a *Mahāyāna* concept. I used to have that wrong view too. But as I have discussed above, many things will be left unexplained, and there will be many inconsistencies without it.

- Most importantly, rejecting the idea of a *gandhabba* (i.e., the existence of a *para loka*) is a *micchā diṭṭhi*. Thus one cannot even become a *Sotāpanna Anugami* with that *micchā diṭṭhi*; see, “[Micchā Diṭṭhi, Gandhabba, and Sotāpanna Stage](#)” and “[Hidden World of the Gandhabba: Netherworld \(Para loka\)](#).” So, I would urge everyone to sift through the evidence and make an informed decision.
- More evidence is in many other posts on the site. There are two subsections of the *gandhabba* state: “[Mental Body – Gandhabba](#)” and “[Gandhabba \(Manomaya Kāya\)](#).”
- One can also use the “Search” box on the top right to locate all relevant posts by typing “gandhabba.”
- A simple description of the human conception, according to Buddha Dhamma is in “[Buddhist Explanations of Conception, Abortion, and Contraception](#).” It could be useful to read that first.

Three Conditions for Conception per *Suttā*

6. The Buddha has described how three conditions must be satisfied for a conception to occur. That includes how a *gandhabba* (nominative case singular is *gandhabbo*; plural is *gandhabbā*) descending to the womb. For example, in the [WebLink: suttacentral: Mahā Tanhāsankhaya Sutta \(Majjhima Nikāya 38\)](#): “..*Tiṇṇaṃ kho pana, bhikkhave, sannipātā gabbhassāvakkanti hoti. Idha mātāpitāro ca sannipatitā honti, mātā ca na utunī hoti, gandhabbo ca na paccupaṭṭhito hoti, neva tāva gabbhassāvakkanti hoti. Idha mātāpitāro ca sannipatitā honti, mātā ca utunī hoti, gandhabbo ca na paccupaṭṭhito hoti, neva tāva gabbhassāvakkanti hoti. Yato ca kho, bhikkhave, mātāpitāro ca sannipatitā honti, mātā ca utunī hoti, gandhabbo ca paccupaṭṭhito hoti—evaṃ tiṇṇaṃ sannipātā gabbhassāvakkanti hoti. Tameva, bhikkhave, mātā nava vā dasa vā māse gabbhaṃ kucchinā pariharati mahatā saṃsayena garubhāraṃ...*”

Here is the [WebLink: suttacentral: English translation from the Sutta Central website](#) (I have slightly modified it): “..**Bhikkhus, the descent to the womb takes place through the union of three things.** Here, there is the union of the mother and father, but the mother is not in season, and the **gandhabba is not present**—in this case, no descent of an embryo takes place. Here, there is the union of the mother and father, and the mother is in season, but the **gandhabba is not present**—in this case too **no embryo can result**. All three following conditions must be met. Union of the mother and father, the mother is in season, and a **gandhabba is present. That leads to** the formation of an **embryo**. The mother then carries the embryo in her womb for nine or ten months with much anxiety, as a heavy burden..”

- Even though the venerable *Bhikkhus* who manage the Sutta Central website do not believe in the concept of a *gandhabba*, they have at least correctly translated most of the Pāli verse.
- By the way, the Sutta Central site is a useful resource. It provides access to not only the Pāli version but also translations into several languages. I encourage everyone to contribute to that website to maintain that valuable database.
- **One needs to keep in mind that some critical Pāli terms are mistranslated there. Those include *anicca* as impermanence and *anatta* as “no-self.” Furthermore, translating complex Pāli words like *viññāṇa* and *saṅkhāra* as just single words in English can lead to severe problems.**

7. In the [WebLink: suttacentral: Assalāyana Sutta \(Majjhima Nikāya 93\)](#), there is more evidence that for conception to occur, a *gandhabba* needs to descend into the mother’s womb at the right time. That needs to happen within a few days of the union of parents, and it needs to be during the mother’s season.

Here, the Buddha explains to Assalayana how the seer Asita Devala questioned seven *brahmanā* who had the wrong view that they were heirs to *Mahā Brahmā*. Here are the questions that seer Asita Devala asked:

“*Jānanti pana bhonto—yathā gabbhassa avakkanti hotī’ti?* ”

- “But do you, sirs, **know how there is a conception in the womb?**”

“*Jānāma mayam, bho—yathā gabbhassa avakkanti hoti ‘ti. Jānāma mayam, bho – yathā gabbhassa avakkanti hoti. Idha mātāpitāro ca sannipatitā honti, mātā ca utunī hoti, gandhabbo ca paccupaṭṭhito hoti; evaṃ tiṇṇaṃ sannipātā gabbhassa avakkanti hotī’ti.*”

- ‘We do know, sir, how there is conception. **There is coitus of the parents, it is the mother’s season, and a *gandhabba* is present**; it is on the conjunction of these three things that there is conception.’

“*Jānanti pana bhonto—taggha so gandhabbo khattiyo vā brāhmaṇo vā vesso vā suddo vā’ti?*.”

- “But do you, sirs, know whether that ***gandhabba*** is a noble or *brahman* or merchant or worker?”

“*Na mayam, bho, jānāma—taggha so gandhabbo khattiyo vā brāhmaṇo vā vesso vā suddo vā’ti.*”

- “We do not know, sir, whether that ***gandhabba*** is a noble or a *brahman* or a merchant or a worker.”

Therefore, the concept of a *gandhabba* was accepted even by other yogis in Buddha’s time.

8. In the [WebLink: suttacentral: Mahā Nidana Sutta \(Digha Nikāya 15\)](#): “..*Viññāṇapaccayā nāmarūpan’ti iti kho panetaṃ vuttaṃ, tadānanda, imināpetam pariyaṇena veditabbaṃ, yathā viññāṇapaccayā nāmarūpaṃ. Viññāṇaṇca hi, ānanda, mātukucchismiṃ na okkamissatha, api nu kho nāmarūpaṃ mātukucchismiṃ samuccissathā’ti? “No hetam, bhante.” “Viññāṇaṇca hi, ānanda, mātukucchismiṃ okkamitvā vakkamissatha, api nu kho nāmarūpaṃ itthattāya abhinibbattissathā’ti? “No hetam, bhante.”*

Translated: “..With consciousness as a condition, there is mentality-materiality (*nāmarūpa*). How that is so, Ānanda, should be understood in this way: If ***viññāṇa*** were not to **descend** into the mother’s womb, would mentality-materiality (*nāma rūpa*) take shape in the womb?” “Certainly not, venerable sir.” “If, the

descended *viññāṇa* were to depart, would mentality-materiality be generated into this present state of being?” “Certainly not, venerable sir.”

- Here, is it clear that by “a *viññāṇa* descending to the womb,” the Buddha meant the descent of the *manomaya kāya* (*gandhabba*), not the *paṭisandhi citta*. **A *paṭisandhi viññāṇa* cannot come out (depart) of the womb!** In #7 below, we will present evidence that the other four *khandhas* always accompany *viññāṇa*. That includes the *rūpakkhanda* (and a *gandhabba* has all five *khandhas*).
- The Pāli word “***Okkanti***” is often mistranslated as “rebirth.” But it means the “descend” of an already formed *manomaya kāya* (*gandhabba*). Rebirth happens (and a *gandhabba* is born) within a thought moment, at the *cuti-paṭisandhi* moment; see, “[Cuti-Paṭisandhi – An Abhidhamma Description](#).”

More Details from *Suttā*

9. In the [WebLink: suttacentral: Kutuhala Sutta \(Samyutta Nikāya 44.9\)](#), Vacca asked the Buddha, “*..Yasmiṇca pana, bho gotama, samaye imaṇca kāyaṃ nikkhipati, satto ca aññataram kāyaṃ anupapanno hoti, imassa pana bhavaṃ gotamo kiṃ upādānasmim paññāpeti*”ti? OR “..and, Master Gotama, when a being has given up this body but has not yet been reborn in another body, what food does it consume?”

- The Buddha answered, “*..Yasmiṃ kho, vaccha, samaye imaṇca kāyaṃ nikkhipati, satto ca aññataram kāyaṃ anupapanno hoti, tamahaṃ taṇhūpādānaṃ vadāmi*.” OR “..When, Vaccha, a being has given up this body but has not yet been reborn in another body, I declare that it uses craving as food.”
- Thus when a *gandhabba* leaves one physical and is not yet reborn in another body, its life is sustained by *taṇhā* (craving). That is similar to a *rūpi Brahma* making use of *pīti* (mental happiness) as food. Both *gandhabbā* and *rūpi Brahmā* have subtle bodies (smaller than an atom in modern science; only a few *suddhaṭṭhaka*). However, some *gandhabbā* can inhale *odors* for food and become relatively denser.

10. In the [WebLink: suttacentral: Sangiti Sutta \(Digha Nikāya 33\)](#), it is described how a *gandhabba* can enter a womb in four ways: “*..Catasso gabbhāvakkantiyo. Idhāvuso, ekacco asampajāno mātukucchim okkamati, asampajāno mātukucchismim thāti, asampajāno mātukucchimhā nikkhamati, ayaṃ paṭhamā gabbhāvakkanti. Puna caparaṃ, āvuso, idhekacco sampajāno mātukucchim okkamati, asampajāno mātukucchismim thāti, asampajāno mātukucchimhā nikkhamati, ayaṃ dutiyā gabbhāvakkanti. Puna caparaṃ, āvuso, idhekacco sampajāno mātukucchim okkamati, sampajāno mātukucchismim thāti, asampajāno mātukucchimhā nikkhamati, ayaṃ tatiyā gabbhāvakkanti. Puna caparaṃ, āvuso, idhekacco sampajāno mātukucchim okkamati, sampajāno mātukucchismim thāti, sampajāno mātukucchimhā nikkhamati, ayaṃ catutthā gabbhāvakkanti*.”

Translated: “..Four ways of **entering the womb**. Herein, *bhikkhus*, one descends into the **mother’s womb** unknowing, abides there unknowing, departs thence unknowing. That is the first class of conception. Another descends deliberately, but abides and departs unknowingly. Another descends and abides deliberately, but departs unknowingly. Lastly, another descends, abides, and departs **knowingly**.”

- That is ***okkanti*** (descending of the *gandhabba*) into the womb (*gabbha*), as described in the *Mahā Tanhāsāṅkhaya Sutta* discussed above.
- Almost the same description is in the “[WebLink: suttacentral: Sampasādanīya Sutta \(Digha Nikāya 28\)](#).” Another relevant sutta is “[WebLink: suttacentral: Tiṭṭhāyatana Sutta \(AN 3.61\)](#).”

11. It is a *Bodhisattva* in the last birth that, “.. descends, abides and departs the womb knowingly”, the fourth way of entering a womb, mentioned above.

- In the [WebLink: suttacentral: Mahāpadāna Sutta \(Digha Nikāya 14\)](#): “*..Atha kho, bhikkhave, vipassī bodhisatto tusitā kāyā cavitvā sato sampajāno mātukucchim okkami. Ayamettha dhammatā*.”

- Translated: “...Now Vipassī *bodhisattva*, *bhikkhus*, left the *Tusita* realm and **descended** into his mother’s womb mindful and knowingly. That is the **rule**.”
- At the *cuti-paṭisandhi* moment in the *Tusita* realm, the *deva* died, and a human *gandhabba* was born, who entered the mother’s womb on Earth.
- By the way, this *sutta* describes in detail the last seven Buddhas including Buddha Gotama, who have appeared in our *cakkāvāta* within the past 31 *mahā kappa* (great eons). English translation of the Sutta at Sutta Central provides a useful summary in a table [WebLink: suttacentral: English translation of the Sutta at Sutta Central](#).
- However, in this *sutta*, *gabbhāvakkantiyo* and *okkami* are mistranslated at Sutta Central.

Paṭisandhi Viññāṇa Same as Gandhabba

12. In the Bija Sutta ([WebLink: suttacentral: Saṃyutta Nikāya 22.54](#)), it is clear that *viññāṇa* cannot exist or “travel” without the other four aggregates, including the rūpakkhanda: “..Yo, bhikkhave, evaṃ vadeyya: ‘*ahamaññatra rūpā aññatra vedanāya aññatra saññāya aññatra saṅkhārehi viññāṇassa āgatiṃ vā gatiṃ vā cutiṃ vā upapattiṃ vā vuddhiṃ vā virūhiṃ vā vepullāṃ vā paññāpessāmi*’ti, *netarā thānaṃ vijjati*.”

“*Bhikkhus*, I say that it is impossible for *viññāṇa* to exist, to grow, and to move at rebirth in the absence of form, feeling, perception, and *saṅkhāra*..”

- Therefore, the descending of a *paṭisandhi viññāṇa* to a womb MUST be accompanied by all five *khandhas*, which is the *kammaja kaya* of the *gandhabba*. *Viññāṇa* can never exist without a *rūpa*; even the *Brahmā* in *arūpa* realms have *hadaya vatthu*, a *suddhaṭṭhaka* made of *cattāro mahā bhūta*.

Antarāparinibbaya State and Gandhabba

13. The first seven *saṃyojana* include *kāma rāga*, *rūpa rāga*, and *arūpa rāga*. In the absence of those three *saṃyojana*, one cannot be reborn in any of the 31 realms in the *kāma*, *rūpa*, and *arūpa loka*. For a discussion on *saṃyojana*, see, “[Dasa Saṃyojana – Bonds in Rebirth Process](#).”

- When a person dies, the *gandhabba* comes out of the dead body. If that person had removed the first seven *saṃyojana* by the time he dies, that *gandhabba* could not grasp a *bhava* in any of the 31 realms.
- However, since the last three *saṃyojana* of *māna*, *uddhacca*, and *avijjā* are still there, that person will not be able to attain *Parinibbāna* either. In other words, *gandhabba* cannot die either.
- Then “that person” will remain in the *gandhabba* state until his *kammic* energy for the human *bhava* runs out. That is called the “*Anatarāpainibbāyāni*” state.
- Th described in the “[WebLink: suttacentral: Saṃyojana Sutta \(Aṅguttara Nikāya 4:131\)](#): “..*Katamassa, bhikkhave, puggalassa orambhāgiyāni saṃyojanāni pahīnāni, upapattipaṭilābhīyāni saṃyojanāni pahīnāni, bhavapaṭilābhīyāni saṃyojanāni appahīnāni? Antarāparinibbāyissa*.”
- The first five *saṃyojanā* are called *orambhāgiyā saṃyojanā*. *Rūpa rāga* and *arūpa rāga* are collectively called *upapattipaṭilābhīyā saṃyojanā*, and *māna*, *uddhacca*, *avijjā* are collectively called *bhavapaṭilābhīyā saṃyojana*.

There are many posts on *gandhabba*: “[Mental Body – Gandhabba](#),” “[The Grand Unified Theory of Dhamma](#),” and “[Gandhabba \(Manomaya Kāya\)](#).”

4.8.3 ***Antarābhava and Gandhabba***

July 29, 2016; revised January 23, 2020; December 5, 2020; August 22, 2021

Title pronunciation:

[WebLink: Listen to Pronunciation: Antarabhava and Gandhabba](#)

What Is *Antarābhava*?

1. There are many misinterpretations about the term “*antarābhava*.” Just two to three hundred years after the *Parinibbāna* of the Buddha, Mahayanists started saying that there is an *antarābhava*, because they thought *gandhabba* belonged to an *antarābhava*.

- At the Third Buddhist Council, Moggaliputta Tissa *Thero* proved the non-existence of an *antarābhava* in a debate with the Mahāyānists. That correct interpretation is in the *Kathavatthu* of the *Tipiṭaka*.

2. *Antarābhava* (“*antara*” + “*bhava*,” where *antara* is “in-between”) means in between *bhava* or existences. For example, when a living being in the human *bhava* exhausts its *kammic* energy for that human existence, it grasps a new existence (*bhava*) at the *cuti-paṭisandhi* moment. Suppose the next existence or *bhava* is existence as a deer, for this example.

- The transition from a human to deer existence happens in a billionth of a second from the *cuti citta* (dying moment in the human *bhava*) to the *paṭisandhi citta* (first thought-moment in existence as a deer).
- **Therefore, indeed there is no *antarābhava*.** The time-lapse from the *cuti citta* to the *paṭisandhi citta* is negligibly small; see, “[Cutī-Patisandhi – An Abhidhamma Description](#).” **That was the point made by Moggaliputta Tissa Thero at the Third Buddhist Council:** there is no “*antarābhava*” between the “human *bhava*” and the “deer *bhava*” in the above example.
- *Gandhabba* is in the same “human *bhava*” until the human *bhava*’s *kammic* energy runs out (which could be many hundreds of years, compared to about 100 years of a lifetime for a human). In between successive human births within that human *bhava*, it is the *gandhabba* that lives in “*para loka*”; see, “[Hidden World of the Gandhabba: Netherworld \(Paraloka\)](#).”

Bhava and *Jāti* Are Two Different Concepts

3. **The critical point is that *bhava* and *jāti* are two different things.** That is why in *Paṭicca Samuppāda*, there is a step, “*bhava paccayā jāti*.” There can be many “*jāti*” or births as a human within a single human *bhava*; see, “[Bhava and Jāti – States of Existence and Births Therein](#).”

- Living beings in human and animal realms are not born with fully-formed physical bodies. In all other 29 realms, beings are born with fully-formed bodies called *opapātika* or instantaneous births. Thus a *deva* or *Brahma* is born with fully-formed bodies.
- That means a *deva* or *Brahma* will have the same body during that *bhava*, even though that body will change. **For them, there are only ONE *jāti* within that *bhava*.**

Humans (and Animals) Have Many *Jāti* Within That *Bhava*

4. In our example above, a human could have *kammic* energy supporting human existence (*bhava*) for thousands of years. However, a physical human body can last only for about 100 years.

- **The *kammic* energy of a human *bhava* is not in the physical body (*karaja kāya*) but is in the “mental body” or the *manomaya kāya* of the *gandhabba*.** There is a whole section on the *gandhabba* at this site; see “[Gandhabba \(Manomaya Kāya\)](#).”
- As explained in the post, “[Manomaya Kāya \(Gandhabba\) and the Physical Body](#),” a *gandhabba* will inherit “many physical bodies” during a given human existence.
- As discussed in the post, “[Ghost in the Machine – Synonym for the Manomaya Kāya?](#),” the physical body is inert, and it is the *gandhabba* that “gives life” to that inert body.

Āyukkhaya Maraṇa and Kammakkhaya Maraṇa

5. That is why the physical body's death does not necessarily imply a *cuti citta*, i.e., one may be NOT released from the human *bhava*. One will lose the human *bhava* only if it is a “*kammakkhaya maraṇa*” or death where the *kammic* energy is exhausted (“*marāṇa*” in Pail or Sinhala is for death).

- But most human deaths are “*āyukkhaya maraṇa*,” i.e., the end of life for the physical body (here “*āyu*” means the lifetime of a physical body.) More *kammic* energy for the human *bhava* left. **There is no *cuti citta* at that time.** In that case, there is no change in the *gandhabba* at the moment of death of the physical body.
- That *gandhabba* would come out of the dead body and wait for another womb.
- A housefly lives for about a week or so. But the “fly *bhava*” may last for thousands and millions of years. When a fly dies, a “fly *gandhabba*” comes out of that dead body. It will get into an egg laid by another fly and soon be born a fly. That process will repeat an uncountable number of times during that “fly *bhava*” (or the existence as a fly.)

6. Thus, if it is a “*āyukkhaya maraṇa*,” the *gandhabba* comes out of that dead body and waits for another womb. It is improbable that a matching womb will appear precisely at the death of a human physical body. In most cases, the *gandhabba* has to wait months and more likely years before a matching womb becomes available (*gati* of the *gandhabba* have to match the *gati* of the parents).

- Most deaths due to accidents are not due to “*kammakkhaya maraṇa*,” i.e., just the physical body dies. The human in question will be reborn with a new human body at a later time. That is why many rebirths accounts describe death in a previous life due to an accident, murder, etc.
- Of course, one could die with *āyukkhaya maraṇa* even at old age.

Mahāyāna Concept of *Antarābhava*

7. **The reason that the Mahāyānists say that there is an *antarābhava* is that they believe that the *gandhabba* is not human and is an “in-between state.”**

- **The irony is that many current Therāvadins even refuse to believe the EXISTENCE of a *gandhabba*** simply because they do not want to be seen as taking the side of the Mahāyānists. Those Therāvadins believe that when a human dies — with *kammic* energy left in the human *bhava* — the second human fetus starts INSTANTANEOUSLY in a womb. In other words, the previous human dies at the *cuti* moment, and a billionth of a second later appears as a new baby in a human womb (*paṭisandhi*).
- However, that approach leads to many inconsistencies: (i) Such precise timing is an impossibility. (ii) The step “*bhava paccayā jāti*” in *Paṭicca Samuppāda* does not make sense: Is that new human birth a new *bhava*? (iii) *Paṭisandhi* or grasping a new *bhava* happens within a thought-moment. However, the birth of a human body occurs via a series of steps described in #8 below. (iv) As discussed in #9 – #11 below, rebirth accounts are also not compatible with rebirth occurring in the womb. (v) There is more evidence from the *Tipiṭaka*, as discussed in #12, #13 below.

A Physical Human Body Versus *Manomaya Kāya* (*Gandhabba*)

8. According to the *Tipiṭaka*, a full-pledged human appears via a series of steps: “*jāti, sañjāti, okkanti, abhinibbatti, khandhānaṃ pātubhāvo, āyatānānaṃ pāṭilābho*. See, “[Vibhaṅga Sutta \(SN 12.2\)](#)” and “[Manomaya Kāya \(Gandhabba\) and the Physical Body.](#)”

- Here, *jāti* is the *paṭisandhi* moment, when the *kammaja kāya* for the new *bhava* appears in a thought-moment. Moments later, that *kammaja kāya* is augmented by the *cittaja kāya* and a *utuja kāya*, and a *manomaya kāya* (*gandhabba*) results. That is the *sañjāti* moment. This *gandhabba* comes out of the dead body in the previous life (*bhava*).

- When that *gandhabba* goes into a suitable womb, that is the *okkanti* moment. In many *suttā*, that is described as “*viññāṇa* of a boy or a girl descending into a womb.” Note that by the time descending into a womb, the sex is already determined. It is a human *gandhabba* that comes into a womb.
- There is no place in the *Tipiṭaka* that says *paṭisandhi* happens in a womb. Rather it says, “... *gandhabba okkanti hoti*.”

9. Many rebirth account features are consistent with that correct interpretation where the *manomaya kāya* (*gandhabba*) inherits many successive (but time separated) physical bodies.

- There is always a “time gap” between successive human births (*jāti*). They are always separated by several years or at least a few years. In between those successive lives, that lifestream survives as a *gandhabba*. The Buddha told Vacchagotta that the *gandhabba* survives that intervening time by using *taṇhā* as *āhāra*. Some *gandhabbā* can “inhale” aroma from plants, too.
- We all know that human existence is difficult to get; see “[Rebirth – Connection to Suffering in the First Noble Truth](#).” If each human birth is a “brand new human existence or *bhava*,” that would be inconsistent since human existence is a rare event.

Human Births Within the Human *Bhava*

10. Then another question may arise, “Why do people look different in successive rebirths?” The physical body in each human life (within the same human *bhava*) arises from the parents’ contributions to that life.

- Even though the *gandhabba* brings in *gati* (habits), *āsava* (cravings), *kilesa* (mental impurities), etc., from the previous life, the physical body for the new life has significant contributions from the parents. The DNA of the physical bodies of two successive lives will be very different due to this reason. For details, see “[Buddhist Explanations of Conception, Abortion, and Contraception](#).”

Gandhabba's Gati Will Change With Time

11. Furthermore, even the mental body of the *gandhabba* WILL change in the next life. Thus *gati* (habits), *āsava* (cravings), *kilesa* (mental impurities), etc., will also change as one grows up in a new environment under a different set of influences.

- For example, one could have lived a moral life in the previous birth but may be born into a family of drug addicts due to a bad *kamma vipāka*. In that case, the new life could drastically change to an immoral life.
- However, in most cases, the successive lives are not drastically different unless one makes drastic changes. If one could attain the *Sotāpanna* stage, then one will not be born into an immoral family. If one reaches the *Anāgāmi* stage of *Nibbāna*, one will never be born a human and born in the *Brahma* realm.
- On the other hand, even if one is born in a moral family but under the influence of bad friends becomes a drug addict and commits crimes, one is likely to be born into an immoral family in the next birth. If one commits a *ānantariya pāpa kammā* (say by killing a parent), then one will be born in the *apāyā* at death, even if there is more *kammic* energy left in the human *bhava*.

More Evidence From *Tipiṭaka*

12. Now, let us discuss more evidence from the *Tipiṭaka*. During the night of his Enlightenment, the Buddha (or more accurately the ascetic Siddhartha) first attained the “*pubbe nivāsānussati ñāṇa*,” before attaining the “*cutupapāda ñāṇa*” and finally the “*āsavakkhaya ñāṇa*.” It is the *āsavakkhaya ñāṇa* that led to the Buddhahood; see, “[The Way to Nibbāna – Removal of Āsavā](#).”

- The first two pieces of knowledge (*ñāṇa*; pronounced “*gnana*”;) can be attained even with *anāriya jhānā* (with limited capabilities). Both those deal with the ability to look back at previous lives. But with the first one, *pubbe nivāsānussati ñāṇa*, one could only look at the **previous human births**.

- Here, “*pubbe*” means “previous,” “*nivasa*” means “house,” and “*anussati*” means “recall,” i.e., the knowledge to recall successive residences of a given *gandhabba*. In a given human *bhava*, a *gandhabba* could have many different “houses,” i.e., physical bodies. Thus with this *ñāṇa*, one could look at human births in the past, in multiple human *bhava* going back to very long times, depending on the *yogi*’s capability.
- The second one, *cutupapāda ñāṇa*, extends the capability to see **all previous rebirths in any realm**. Here *cutupapāda* (*cuti* means the end of a *bhava* and *upapāda* means birth) refers to all types of rebirths in various realms (*niraya*, animal, *deva*, etc.) in the past.

Connection to *Pubbe Nivāsānussati Ñāṇa*

13. Furthermore, the Buddha described how he saw human *gandhabbā* moving from one physical body to the next (in a single human *bhava*) with the *pubbe nivāsānussati ñāṇa*. He explained that with the following simile: If one is in an upper level of a multi-story building (yes, there were multi-storied buildings at the time of the Buddha) located at a busy junction, one could see people meandering in the streets below.

- Some people stay on the street, sometimes sitting in a bench or standing by the road, etc.; this is analogous to *gandhabbā* just waiting for a physical body (i.e., a womb).
- Sometimes, a person enters a house and stays there for a long time; this is comparable to a *gandhabba* in a physical body for a long time, i.e., until old age.
- Other times, a person may enter a house and come out after a few hours. That is comparable to death at a young age.
- Also, a person could enter a house and immediately come out. That corresponds to abortion or an unsuccessful pregnancy.

14. Thus, the *pubbe nivāsānussati ñāṇa* is limited to looking at past human lives. That is an excellent example that the Buddha clearly stated the concept of the *gandhabba*. The *cutupapāda ñāṇa* extends the capability to see all previous rebirths in any realm.

- In the *Tirokudda Sutta*, the *gandhabba* is called a “*tirokudda*”; see, “[Hidden World of the Gandhabba: Netherworld \(Paraloka\)](#).”

Change of *Bhava*

15. If a human dies at the end of the *kammic* energy for the human *bhava*, then the *cuti-paṭisandhi* transition happens at the death moment. In the specific example of a human to deer transition, now a “deer *gandhabba*” comes out of that dead body and has to wait for a matching “deer womb” to become available.

- However, if the human was to become a *deva*, then a fully formed *deva* will appear instantaneously in a *deva* realm, the moment the human dies in a *kammakkhaya maraṇa*. A *gandhabba* is involved only in human and animal realms; see, “[Gandhabba – Only in Human and Animal Realms](#).”

Connection to Astral Travel

16. Another interesting piece of information is how the Buddha (and others with *iddhi* powers [*bala*]) traveled to *deva* or *Brahma loka* with the *manomaya kāya* (the same as *gandhabba*.) Here, the physical body is left behind. Yet, the physical body does not die, and is kept alive by the *rūpa jivitindriya* (*kammic* energy.) Upon returning, the *gandhabba* can re-enter the physical body.

- Those who attain the fourth *jhāna* can develop *iddhi* powers to be able to separate the *manomaya kāya* from the physical body and travel far with that *manomaya kāya*. The Buddha stated that just as a sword comes out of its sheath, those with *iddhi* powers can pull the *manomaya kāya* out of the physical body. There are many *suttā* in the *Dīgha Nikāya* with that exact statement.

- That *manomaya kāya* can then go to distant places within very short times (this is what is called “astral travel” in the present day; see the Wikipedia article, “[WebLink: Wiki: Astral projection.](#)” A *gandhabba* is the same as an “astral body.”
- In many *suttā*, it is stated that the Buddha visited *deva* or Brahma *lokā* “within the time that takes a bent arm to be straightened.”
- Some yogis with *iddhi* powers can travel with the physical body. Of course, the Buddha did that too. That involves a different mechanism that is not relevant to this discussion.

17. If you have any other questions or unresolved issues about this discussion, please send me a comment (lal@puredhamma.net) or post at the discussion forum. I can add to the post to address such questions.

4.8.4 Ānantarika Kamma – Connection to Gandhabba

June 2, 2018; revised December 14, 2021

1. *Ānantarika* or *ānantariya* comes from “*na*” + “*an*” + “*antara*.” That rhymes like “*ānantara*.” There are many words like this, meanings of which remain unclear to many. Pāli is a phonetic language, where some meanings can never be found grammatically.

- *Anatta* is the negation of “*atta*” or having refuge/having substance: “*na*” + “*atta*” (which rhymes as “*anatta*”): there is no substance/does not hold any ultimate truth; see, “[Anatta – the Opposite of Which Atta?](#).”
- The word *Anāgāmi* comes from “*na*” + “*āgāmi*” or “not coming back”: “*na*” + “*āgāmi*” rhymes as “*anāgāmi*.” It means “not coming back to the *kāma loka*.” He/she will attain *Nibbāna* from those *brahma* realms.
- Words like this cannot be analyzed grammatically. This is why current Pāli experts are wrong in interpreting such words (and are unable to interpret many key words).
- By the way, *anantara* means the opposite of *ānantara*; see, “[Anantara and Samanantara Paccaya.](#)”

2. Going back to the word “*ānantarika*”: “*An*” means food or, in this case, the *kamma* seed; “*antara*” means in storage, waiting to bear fruit. Thus, *anantara* (“*an*” + “*antara*”) means a *kamma* seed waiting to germinate. Now, “*na*” means “not.” Therefore, if a *kamma* can bring *vipāka* right away, it is “*na* + *anantara*” which rhymes like “*ānantara*.” Therefore, *ānantarika* means “not stored away to come back when conditions are right”, i.e., it will bring *vipāka* “right away.”

- When one does a *kamma* that is NOT *ānantarika*, its *kammic* energy is “stored away” at “*antara*” and can bring suitable *kamma vipāka*, when suitable CONDITIONS appear. Some *kamma vipāka* may not be realized for many lives simply because suitable conditions had not appeared.
- However, an *ānantarika kamma vipāka* SHOULD override any existing other *kamma vipāka*. Our life experiences (*citta vīthi*) ALWAYS start with a *kamma vipāka* (see, “[How Are Paticca Samuppāda Cycles Initiated?](#)”). Therefore, an *ānantarika kamma vipāka* SHOULD BE enforced right after the *kamma* is done, even before any other *pavutti kamma vipāka* (like a seeing, hearing event) is initiated, i.e., **instantaneously**. There should be no need for a delay until the death of the human. [*pavutti* : happening, proceeding, fate, event]

3. However, an *ānantarika kamma* will bring *vipāka* “right away” **ONLY in realms other than the human realm** (*ānantarika kamma* are not relevant in the animal realm). In order to see why that is, let us first look at what types of *kamma* belong to *ānantarika kamma*.

- The BAD *ānantarika kamma* are five: killing one’s mother, killing one’s father, killing an *Arahant*, shedding the blood of a Buddha, creating *Saṅgha bheda*. These are listed towards the end of the following link in the *Tiṭṭhaka*: [WEBLINK: suttacentral: Nānakathā](#) [*bheda* : [m.] breach; disunion; dissension.]

- Then, there are several GOOD *ānantarika kamma*: *magga phala* (stages of *Nibbāna*) and attainment of (*Ariya* or *anāriya*) *jhānā*.
- Any of these, by definition, should lead to their *vipāka* right away. However, there is another factor that comes into play for humans, which we will discuss now.

4. All of the five bad *ānantarika kamma* are done by humans. Therefore, we need look at the good *ānantarika kamma* in order to see how they work in other realms.

- For example, if a *deva* attains the *Anāgāmī* stage, that *deva* will instantaneously be born in a *rūpāvacara brahma* realm. [**deva** : (lit: the Radiant Ones; related to Lat. *deus*) : heavenly beings, deities, celestials, are beings who live in happy worlds, and who, as a rule, are invisible to the human eye. They are subject, however, just like all human and other beings, to ever-repeated rebirth, old age and death, and thus are not freed from the cycle of existence and from misery.]
- If a *rūpāvacara Brahma* attains the *Arahant* stage, that *Brahma* will instantaneously attain *Parinibbāna*, i.e., will cease to exist in the 31 realms.
- In both those cases, the true meaning of the term *ānantarika kamma* will be enforced, i.e., the *vipāka* will take place without a delay, instantaneously.

5. In the human realm, the enforcement of an *ānantarika kamma* will be DELAYED due to the following reason.

- The primary “body” that is directly subjected to *ānantarika kamma vipāka* is the *kammaja kaya*, the “primary body” created by *kamma* for that *bhava* at the *cuti-paṭisandhi* moment. All living beings are born with a “mental body” (called “*trija kaya*” or three bodies) consisting of the *kammaja kaya*, *cittaja kaya*, and *utuja kaya*.
- *Brahmā* only have *trija kaya*. Even though *devas* in the six *deva* realms have a fourth “physical body” or a “*karaja kaya*,” that is very fine. Thus, the *trija kaya* (specifically the *kammaja kaya*) of a *deva* is not shielded sufficiently and any *ānantarika kamma vipāka* will take place without a delay.
- This *trija kaya* in human and animal realms is given a special name “*gandhabba*.”

6. **The *trija kaya* or the *gandhabba* of a human is shielded by the “dense human physical body.”**

Therefore, the instantaneous enforcement of the *ānantarika kamma vipāka* on the *kammaja kaya* cannot take place. It will have to wait until the death of the physical body.

- When the physical body of a human dies, the *trija kaya* (which is given the special name *gandhabba*) comes out and is no longer shielded by the physical body. **At that time, the *ānantarika kamma vipāka* will be enforced instantaneously.**
- This is the reason that the term *ānantarika kamma vipāka* does not apply to a human in the true sense of *ānantarika* (no delay).
- **Therefore, the working of *ānantarika kamma vipāka* cannot be explained without the concept of *gandhabba*.**

7. Now we can explain many applications of the *ānantarika kamma vipāka* for humans.

- On the “bad side”, for example, one can kill a parent or cause *Saṅgha bheda* and can live a full life. However, at the death of the physical body, one would be instantaneously born in the *apāyā* (even if there is more *kammic* energy for the current human *bhava* left).
- On the “good side”, one attaining a *jhāna* will be born in the appropriate *Brahma* realm only after death. One attaining the *Anāgāmī* stage will be born in the appropriate *Brahma* realm only after death, and one attaining the *Arahant* stage would undergo *Parinibbāna* (i.e., cease to exist in the 31 realms and immediately get to *Nibbāna*) only at death.

8. Now, another question may come up regarding the following situation: an *Arahant*'s or an *Anāgāmī*'s *gandhabba* may have to come out of the physical body when performing a supernormal action (*abhiññā*). Wouldn't that *gandhabba* undergo instantaneous transformation at that time?

- The answer is no. The reason is that the *gandhabba* is still firmly connected to the living physical body (that is they can re-enter that body any time). It is as if the *gandhabba* is still protected by the physical body; the shielding is still active.
- This explanation holds also in the cases of astral projection and out-of-body experiences (OBE); see, "[Manomaya Kāya and Out-of-Body Experience \(OBE\)](#)." In the case of astral projection or astral travel, it is said that the astral body is kept "attached" to the physical body by "silver cord."

9. Now we can address another related issue. There seems to be two issues that may be difficult to grasp.

- A LIVING *Arahant* is subjected to *kamma vipāka* DURING his/her life.
- No *kamma vipāka* will come to an *Arahant* AFTER his/her death.

10. As we discussed above, a **human *Arahant*** will not attain *Parinibbāna* at the moment of attaining *Arahanthood*, because of the presence of the human physical body. Thus, a human *Arahant* has to wait until the death of the physical body to attain *Parinibbāna*.

- **Now, attaining a *magga phala* does NOT mean the removal of *kammic* energies for previous *kamma* (see below).** Therefore, those *kamma vipāka* will be still effective for the *Arahant* until death.
- This is why even the Buddha had to suffer from an injury to his toe, had back problems, and also had pains after the last meal.

11. There could be many more *kamma vipāka* left for an *Arahant* at the time of death. However, at death, the *gandhabba* comes out of the dead body and will instantaneously disappear from the 31 realms of this world, i.e., attain *Parinibbāna*.

- Therefore, any remaining *kamma vipāka* will NEVER be able to materialize. They are said to have become "*ahosi kamma*," or "ineffective *kamma*."
- So, now we have answers to the two questions raised in #9 above.

12. However, **some *kamma vipāka*** other than an *ānantarika kamma vipāka* **will be overcome** by attaining a *magga phala* (at least the *Sotāpanna* stage), i.e., some *kamma vipāka* will become *ahosi kamma*. Of course, **all *kamma vipāka*** will become *ahosi kamma* at *Parinibbāna*.

- Let us discuss how some *kamma vipāka* can become *ahosi kamma* upon attaining stages of *magga phala*.
- In order to do that we need first to discuss what happens at the *Arahant* stage.

13. One attains the final stage of *Nibbāna* (*Arahanthood*), not by removing or exhausting all *kamma vipāka* from the past.

- One attains the *Arahanthood* by cultivating one's *paññā* (wisdom) to the level where one truly understands the real nature of this world. **At that point, one's mind will not be tempted by ANY desire (*taṇhā*) to be born ANYWHERE in the 31 realms.** That is a CRITICAL POINT to understand.
- Now when the *gandhabba* comes out of the dead body of an *Arahant*, it immediately undergoes the ***cuti* (separation from the human *bhava*)**, due to the *ānantarika kamma vipāka* associated with the *Arahant phala*.
- But now, that lifestream CANNOT grasp a **new *bhava* (*paṭisandhi*)** anywhere in the 31 realms since there is no "*upādāna*" in the step of "*upādāna paccayā bhava*" in the *Paṭicca Samuppāda* process. This is because there is no *taṇhā* left for any existence in the 31 realms and thus "*taṇhā paccayā upādāna*" step will not happen.

14. Therefore, even though there are many good and bad *kamma vipāka* may be associated with that *Arahant*, all those will have become “*ahosi kamma*” (are not able to bring out *vipāka*), simply because one has lost ALL cravings (*taṇhā*).

- This is why *Āṅgulimāla* became free of the *apāyā*, even though he killed 999 people. That was not an *ānantarika kamma*. Only those *kamma* listed in #3 above are *ānantarika kamma*.

15. However, in the case of the death of an *Anāgāmī*, the *gandhabba* comes out, undergoes *cuti*, but can grasp a *bhava* in the *rūpāvacara brahma* realms reserved for the *Anāgāmīs*. Therefore, a *cuti-paṭisandhi* transition takes place leading to the rebirth in such a realm.

- But an *Anāgāmī*’s mind would not grasp a *bhava* anywhere in the *kāmāvacara* realms, since he/she has lost all “*upādāna*” (tied to cravings via *taṇhā*) for such realms. Therefore, any previous *kamma vipāka* that could have led to a rebirth in the lower realms will have become *ahosi kamma*.

16. In the same way, a *Sotāpanna*’s mind would not grasp a *bhava* in the *apāyā*. Any “*apāyagāmī kamma*” he/she had done have now become “*ahosi kamma*.” If one has “*apāyagāmī kamma vipāka*” waiting to bear fruit (as almost all normal humans do), attaining the *Sotāpanna* stage will OVERRIDE those *kamma vipāka*.

- To put it in another way: at the dying moment, a *Sotāpanna* WILL NOT grasp (*upādāna*) birth in the *apāyā*. His/her mindset has PERMANENTLY changed. Therefore, such *kamma vipāka* will NEVER materialize even in future lives for a *Sotāpanna*.
- His/her *diṭṭhi anusaya* and *diṭṭhāsava* have been permanently removed, and the three *samyojanā* that binds one to the *apāyā* have been cut off; these terms describe the *Sotāpanna* attainment in different ways; see below.

17. Even though one who attained an *anāriya jhāna* would grasp a *bhava* in the appropriate *Brahma* realm, that is just for that particular *cuti-paṭisandhi* transition.

- Since he/she had not attained a *magga phala* (and thus has not “seen” the futility/danger of “*apāyagāmī* actions”), a birth in the *apāyā* can happen in the future.
- One with an *anāriya jhāna* has only SUPPRESSED cravings for *kāma loka*, **but such cravings remain as anusaya**: One has not removed *avijjā* to the level of truly realizing the dangers of *kāma rāga*, by comprehending *Tilakkhaṇa*. Thus, *kāma rāga anusaya* remains together with *kāmāsava*, and one has not broken through the *kāma rāga samyojanā*. These terms are explained in, “[Gathi \(Gati\), Anusaya, and Āsava](#)” and “[Dasa Samyojana – Bonds in Rebirth Process](#).”

18. Therefore, ultimately it is the true understanding of *Tilakkhaṇa* at various levels that lead to various *magga phala*.

- However, understanding of *Tilakkhaṇa* is possible only for one who has cultivated the mundane eightfold path, via discarding ALL 10 types of *micchā diṭṭhi*. [See the 10 types of *micchā diṭṭhi* at [Mahā Chattārisaka Sutta \(Discourse on the Great Forty\)](#), [Micchā Diṭṭhi, Gandhabba, and Sotāpanna Stage](#), [Ten Immoral Actions \(Dasa Akusala\)](#), and [Three Kinds of Diṭṭhi, Eightfold Paths, and Samadhi](#)] [[WebLink: suttacentral: 62 views](#) at [WebLink: suttacentral: Brahmajala Sutta](#)]
- To put it another way, attaining *magga phala* at various stages is associated with getting rid of *dasa akusala* at various levels.
- *Micchā diṭṭhi* is the worst of the *dasa akusala*, and at the root of *micchā diṭṭhi* is are the 10 types of *micchā diṭṭhi*. The second level of *micchā diṭṭhi* is removed with the comprehension of *Tilakkhaṇa* (that is when one starts on the Noble Eightfold Path).
- All wrong views (*diṭṭhi*) are removed when one attains the *Arahanthood*. When all wrong views are removed, all other nine *akusala* are prevented. However, abstaining from other *dasa akusala* is necessary to remove wrong views, so they are all inter-connected.

- I keep repeating this, but I am not sure how many pay attention to these basic facts. Many people seem to waste time trying to comprehend *Tilakkhaṇa*, before getting rid of the 10 types of *micchā diṭṭhi*.

4.8.5 Mental Body (Gandhabba) – Personal Accounts

February 5, 2017; revised April 25, 2020

The evidence comes in three general types of accounts, as we discuss below.

1. Many people have at least briefly experienced an “out-of-body experience” (OBE), where the mental body just comes out of the physical body, and one sees one’s own physical body from above.

- In his book, “Travels”, the famous author of the Jurassic Park, Michael Crichton (1988, p. 307) mentions his ability to “shift my awareness out of my body and move it around the bedroom”, and he says, “..I didn’t think anything about it... I assumed that anybody could do it..”.
- A similar account has been given by a woman recently who also thought that “everybody could do it”: [WebLink: ABCNews: Woman Has ‘Out of Body’ Experiences Whenever She Wants.](#)
- Robert Monroe (see #6 below) says mental bodies of most of us come out and wander around even without us realizing it. Sometimes, we are in a dream state (we believe) and then feel a “sudden fall” and wake up. He says this “dream state” is actually the mental body wandering around and we feel the “sudden fall” when the mental body re-enters the physical body.
- **So it is not correct to assume that a *gandhabba* or the mental body as a “ghost.” In a sense, it is a better representation of us than our physical bodies that are discarded after about 100 years, because it may live for many hundreds of years until the *kammic* energy for this human *bhava* is exhausted.**

2. There are other — more dramatic — reported cases of OBE and some of them involve “near-death experiences” (NDE), where the person was presumed to be dead but revived later on. During that time, the mental body usually “went through a tunnel” to another dimension, but then came back to re-enter the body.

- Of course, there are many books written on OBE and NDE. “Consciousness Beyond Life”, by Pim van Lommel (2010) gives detailed accounts of case studies of OBE and NDE experienced by people undergoing heart operations, some of whom were declared dead but came back to life.
- A third category involves the rebirth accounts from children, who were killed in an accident in the previous life. They can recall that incident from the previous life, where the mental body came out of a physical body and they watched the accident scene from above. They have provided accurate accounts of that scene. I will discuss one such account at the end of the post.

3. The experiences described in the accounts below need to be evaluated with the following nuances (subtle aspects) in mind. Once the mental body comes out, first it can be an exhilarating experience to be free of the heavy physical body. So, most people describe it as a “liberating experience.”

- However, without the physical body, one cannot enjoy smells (in many cases), the taste of food, and also bodily pleasures. Thus, if one had to live without a physical body for a long-time, one could become frustrated, and one could suffer. This is the status of a *gandhabba* in between two consecutive human births.
- Therefore, even though it could be a “liberating experience” to come out from the shackles of the physical body for a short time as in OBE and NDE, **it may not be that pleasant to stay in that state if one has not given up the desire for sensual pleasures since one cannot “enjoy” sense pleasures without a physical body.**

4. The other point to keep in mind is that many experiences (especially those from the Western world) are from people who have other religious backgrounds. In a way, this is good because we can get an unbiased opinion. But, unfortunately, they have a different bias due to their own religious beliefs. For example, many people say they visited heaven, which in reality could be a “good locality” of the *gandhabbā*.

- It must be kept in mind that *gandhabba* world is not just “one place”, even though physical locations cannot be assigned. It is much better to say that “good *gandhabbā*” with higher moral values hang out together (such localities may be referred to as “heaven”), and “bad *gandhabbā*” segregate away from those. And there can be many varieties in between.
- It is similar to the case of people with similar *gathi* hanging together.
- So, it can be thought of as there being many “*gandhabbā* worlds” in the nether world or *para loka*.
- Some of the *gandhabbā* have very fine bodies, but others may have more dense bodies (still much less dense than our bodies). Some may “look” like humans, but some may have started already transforming to animal forms (due to types *saṅkhāra* they cultivate) and may look half human and half animal. It is a very complex world.

5. Robert Monroe has written several books about the OBE experiences of himself and others. Two of his books are: “Journeys Out of the Body: The Classic Work on Out-of-Body Experience” and “Far Journeys.”

- Here is how he describes his first OBE experience (there are many other youtube videos on his accounts):

[WebLink: Youtube: Robert Monroe explains his first OBE](#)

6. Here is an interesting documentary, “Beyond Our Sight – documentary.” Thanks to Mr. Johnny Lim from Singapore for sending me this video.

[WebLink: YouTube: Beyond Our Sight - documentary \(52'\)](#)

7. In their book, “Soul Survivor: The Reincarnation of a World War II Fighter Pilot”, by Bruce and Andrea Leininger detail the amazing story of their son’s recount of a past life, mentioned in the above video. There the little boy vividly describes how he died in his previous life. This falls into the third category that I mentioned in #1 above. Here is a ABC News report on the story:

[WebLink: YouTube: Reincarnation - Airplane Boy \(abc Primetime\)](#)

- Another youtube video link was sent to me by a reader from Sri Lanka who did not want to be identified. This video is in Sinhala and is the account of a boy. This boy was an adult in the previous life and was killed in an accident. He describes how his mental body came out of the dead body and how he watched from above the scene of the accident.
- The actual account starts at 3 minutes into the video.

[WebLink: YouTube: wenasa](#) (Video not available 21 August 2018)

Several years later (during which time he was in the *gandhabba* world or *para loka*), he was born to a family in a different village in Sri Lanka.

- As is evident from the above two stories, successive births within a given *bhava* are likely to be— but not always — in similar geographic regions because of the tendency to match one’s *gathi*.

8. Some scientists believe that these are mind-made hallucinations. Here is a researcher’s account of his investigations into that possibility. He started the project to prove that it is a hallucination but ended up convincing himself otherwise.

[WebLink: YouTube: Larry King Interview with Melvin Morse](#)

9. There are some people trying to make money saying they can teach how to do “astral projection.” Astral projection is another name for OBE.

- This is not something that can be taught. So, don't waste money.
- The only way to do it systematically is to cultivate *Ariya* or *anāriya jhānā* to the fourth *jhāna*. Then one can practice further and learn how to remove the mental body from the physical. The Buddha compared this to removing a sword from its sheath.
- However, most people who can naturally do it get it as a *sansāric* habit. They are likely to have cultivated *jhānā* and developed *abhiññā* powers in recent past lives.
- The most common situation is when the mental body just pops out of the physical body in highly stressful situations where the stress is affecting the heart. The *hadaya vatthu* of the *gandhabba* overlaps the physical heart, and thus when the heart is stressed out, *gandhabba* may just pop out of the physical body.

10. The idea of a mental body controlling the physical body discussed in the previous post in this section ("[Our Mental Body – Gandhabba](#).”)

By the way, the mental body is not all mental. It has a fine material component at *suddhaṭṭhaka* level; see, "[Gandhabba \(Manomaya Kaya\)- Introduction](#).”

- There are many reported instances of this mental body coming out of the physical body, and I have mentioned some of those in other posts. But I would like to have some of that evidence in one place so that one can get an idea of why it is not an alien concept.
- But there are many made-up stories too. *So, my advice is not to get carried away too much about watching these youtube videos. That is a waste of time.* I just wanted to provide some idea that the mental body (*gandhabba*) is real.
- More information at, "[Mental Body – Gandhabba](#),” "[Gandhabba \(Manomaya Kaya\)](#),” and "[The Grand Unified Theory of Dhamma](#).”

4.8.6 Abnormal Births Due to Gandhabba Transformations

September 30, 2017

1. Modern science and technology, especially the internet, is a very useful resource to understand and confirm some concepts in Buddha Dhamma. All of us can now access rare events in remote places, that we would never have known without the internet.

- I started thinking about this post when I received a youtube video of a “strange looking animal” sent to me by Mr. Tobias Große from Germany. Then I did a Google search and found that there are many such “abnormal” human and animal birth reports from all over the world.
- Such observations can be explained with the concept of *gandhabba*, which is an essential concept for describing the life in the human and animal realms. I have two sub-sections at the website devoted to the important concept of *gandhabba*: "[Mental Body – Gandhabba](#)" and "[Gandhabba \(Manomaya Kāya\)](#).”
- Of course, *gandhabba* is NOT a Mahāyāna concept, see, "[Gandhabba State – Evidence from Tipitaka](#),” and without that there will be many inconsistencies, including the observed fact that there are gaps of several years in between successive human rebirths; see, "[Bhava and Jāti – States of Existence and Births Therein](#).”

2. As we have discussed in those posts, a human *bhava* (existence) could last for many hundreds or even thousand of years. Within that time, one could be born with a human body many times. When one is born with a human body and when that “physical body” dies, the “mental body” or the *gandhabba* state could have many hundreds of years of life left.

- Thus, unless the kammic energy for that “human *bhava*” has been exhausted, the mental body (*gandhabba*) comes of the dead physical body unharmed. Since we cannot see that very fine body, it is

said that the *gandhabba* lives in “*paralowa*” (other world, sometime called nether world), compared to “this world” that we can see.

- That *gandhabba* has to wait for a suitable womb to become available, and at that time it is pulled into that “matching womb.” This is why there is normally a gap of several years exists in between successive rebirths per rebirth stories; see, “[Evidence for Rebirth.](#)”

3. During one’s lifetime, the *kammaja kaya* of the *gandhabba* changes, and sometimes those changes can be drastic. If one kills a parent, that *kammaja kaya* does not change instantly only because it is “enclosed” in the dense physical body.

- But when the physical body dies, the *gandhabba* is automatically kicked out of that body, and will instantly transform to a *kamma kaya* suitable for a being in an *apāya*. Therefore, even if the original *gandhabba* had more *kammic* energy left for the human *bhava*, a *cuti-paṭisandhi* to a “hell being” will occur, and he/she will be instantly born in an *apāya*.
- There are such *ānantariya kamma* that can instantly lead to births in *rūpa* and *arūpa loka*: If one had cultivated *jhāna*, then when the *gandhabba* comes out of the dead body, it will instantly undergo a *cuti-paṭisandhi* transition to a *brahma* and will be born instantly in the corresponding *brahma* realm.

4. Sometimes, a human *gandhabba* starts making the transformation to another *bhava* while in the *gandhabba* state after coming out of a dead body. This happens especially for those who are engaged in highly immoral deeds.

- For example, if one is cultivating “animal *gati*” (thinking and behaving like an animal), then the *gandhabba* will continue to generate such “animal *saṅkhāra*” after coming out of the dead body, and may gradually transform to an animal while in the *gandhabba* state. Then, if a matching animal womb comes available, that half-human creature will be pulled into that womb.
- Now, by “matching womb” what is meant is the mental state of the mother at that time. She could be a “good moral person”, but if for some reason her mental state at that time became “abnormal”, then it could become a matching womb for that creature, who could be half human, half animal.
- Depending on how far that transformation had taken place, that *gandhabba* could be pulled into a human womb or an animal womb, i.e., be born to a human or animal mother. Here is the video sent to me by Mr. Tobias Große from an animal birth that looks partly human:

[WebLink: gmx.net: Halb Mensch, halb Tier: Kuh sieht aus wie Fabelwesen](#)

5. The following are some more examples of (both abnormal human and animal births) available as youtube videos (of course, in some cases “photoshop” may have been used; there are many on the internet and I have picked a couple that appear to be genuine):

[WebLink: Youtube: Half Animal Half Human Found In Real Life](#)

[WebLink: Youtube: South African Sheep Births Half Human Half Beast](#) (Video not available 21 August 2018)

- Here is more information on the above “beast”:

[WebLink: Youtube: HALF HUMAN-HALF BEAST CREATURE SENT BY THE DEVIL](#)

- Thanks to Mr. C. Saket from India for the following video. Some abnormalities shown there could also be due to *gandhabba* transformation together with bad *kamma vipāka*:

[WebLink: Youtube: 10 REAL People With Shocking Genetic Mutations](#)

- Please send me any good videos that you come across, so that I can add them to this collection.

6. Anything and everything in this world happens due to a cause, or more correctly due to multiple causes. The foundation of science is causes and effects. If things happen arbitrarily, then there is no way to predict the outcome of a scientific experiment.

- But modern science deals mainly with the properties of material objects. Also, material objects only have a short “history”; a building or a car is assembled and eventually destroyed. Thus it is easier to see the link between causes and effects.
- But living beings have minds and each living being has a past that extends to the deep past (due to rebirth). So, the causes that bring about results now, may have been done in the deep past. That is why it is hard to see the connection between causes and effects for living beings.

7. My late Noble teacher, Waharaka Thero, has mentioned in several *desanās* how he saw such “*gandhabba* transformations” while in *samādhi*.

- When an immoral human dies, the *gandhabba* that comes out will keep cultivating those “*bad saṅkhāra*,” and if they get strong enough the fine body of the *gandhabba* will start changing to match those “*saṅkhāra*” and thus “*gati*”; see, “[Gati and Bhava – Many Varieties](#)” and “[Gati to Bhava to Jāti – Ours to Control](#).”
- For example, he had seen how a human *gandhabba* transforms to a bird. It started with the head getting longer and forming a beak. The rest of the body then changed gradually from top to bottom. When I heard that, those Egyptian pictures seen on pyramids of “bird men” with bird heads immediately came to my mind.

8. By the way, even some normal people can see those *gandhabbas* with fine bodies; this is due to “*puñña iddhi*” due to some past good *kamma*.

- There are different types of “*puñña iddhi*.” Surviving without food and water is known as “breatharianism” and has been documented or claimed by many. an extreme case of a Hindu *yogi*, Prahlad Jani, is baffling to many modern scientists:

[WebLink: Youtube: Snippet from "IN THE BEGINNING THERE WAS LIGHT" - Yogi Prahlad Jani](#)

- Thanks again to Mr. C. Saket for sending this video and the related comments above.
- The ability to have very detailed memories from this life is also such a “*puñña iddhi*,” see, “[Recent Evidence for Unbroken Memory Records \(HSAM\)](#)”, where a woman describes her memories from this life going back to many years. The level of detail she can remember is amazing.
- In fact, I am beginning to believe that in those early Buddhist Councils (*Sangāyana*), where *Arahants* recited the whole *Tiṭṭaka*, they were likely to have VERIFIED then by actually re-visiting each *sutta*’s delivery by *iddhi* power. When you listen to the woman describing past events in such detail, it is as if she is re-visiting that event.
- The ability of some people to see *gandhabbas* with fine bodies could be responsible for the misty “ghost figures” like the ones that we see in popular culture (in books, movies and on the internet).

9. A human *gandhabba* is a finer version of a human. When a human, say a middle aged person dies, the *gandhabba* that comes out looks very similar to that person (if one can see it). Then with time it will show normal changes that could be expected of a human: His hair and fingernails will grow, for example. In a few years, that *gandhabba* WILL look like ghost with long hair and long finger nails. **Imagine what will happen to one’s human body if one doesn’t cut one’s hair, finger nails, or shave. One will look like a ghost. That is why some *gandhabbas* look like ghosts, according to Waharaka Thero.**

- Some of them get a bit denser by inhaling aroma and may become easier to see for those people with “*puñña iddhi*” that we mentioned earlier. However, when that *gandhabba* is pulled into a womb, it will shed all “added” mass (*utuja kaya*), and only the basic “*kammaja kaya*” with the *hadaya vatthu* and the *pasāda rūpa* (combined to be smaller than an atom in modern science) will merge with the zygote (the single cell formed by the union of mother and father) that is in the womb.
- Now that “new baby” will have a different body than the body in the previous life, because it have many features inherited from the parents (via DNA) in the zygote.

- But it is essentially the evolved *kammaja kaya* formed at the *cuti-paṭisandhi* moment that is still there for that next “birth” in the human world. Thus while the *gandhabba* keep its *kammaja kaya*, but the physical body will be influenced by the parents.
- This is discussed in detail in, “[Buddhist Explanations of Conception, Abortion, and Contraception](#).”

This world is much more complex than we realize, and the “*paralowa*” of the *gandhabbas* is even more complex; see “[Hidden World of the Gandhabba: Netherworld \(Paraloka\)](#).”

4.8.7 Cattāro Āhāra for Mental Body or Gandhabba

February 11, 2017

1. As we have discussed in this subsection and elsewhere at the site, we have two bodies: the physical body (*karaja kāya*) and mental body (*gandhabba*). Both these bodies need food to survive.

- The food we eat to sustain the physical body is called *kabaliṅkāra āhāra*.
- Our mental body consumes three more types of food: *phassa*, *mano sañcetanā*, and *viññāṇa*.
- The four types of food are called “*sātara āhāra*.” We will see that all four can be food for the mental body (*gandhabba*).

2. Food is essential for all living beings. If one stops taking *kabaliṅkāra āhāra* (which includes water) for about seven days or so, one’s physical body will die.

- However, unless one is an *Arahant*, one will be reborn somewhere in the 31 realms upon death, because one’s mental body (*gandhabba*) will not die.
- We cannot stop suffering by committing suicide, i.e., via the death of the physical body. The mental body needs to die in order to stop the rebirth process.

3. If one can stop giving food to the mental body for seven days, **it will die**, and one will never be reborn anywhere in the 31 realms, i.e., one will attain *Nibbāna*; then that *Arahant* will not be reborn upon death of the physical body. Thus the unimaginable suffering associated with the rebirth process will be over (as I discussed in the beginning of this section on “[Living Dhamma](#),” stopping the rebirth process seems scary and it should not be contemplated when one is starting on the Path).

- This is why in the *Mahā Satipaṭṭhāna Sutta*, the Buddha said that if one can practice the *sutta* without making any mistakes, one will attain *Nibbāna* in seven days.
- Let us discuss how this is possible.

4. There are two conditions that must be satisfied to generate a new mental body at the *cuti-paṭisandhi* moment: (i) There must be a *kamma bīja* available to grasp, and (ii) one’s mind must willingly grasp that *kamma bīja*.

- We all have accumulated numerous *kamma bīja*, so the first condition is always satisfied for anyone. Therefore, it is the second condition — grasping a new existence (*bhava*) at the *cuti-paṭisandhi* moment that can stop the rebirth process.
- At the beginning, we need to just focus on not grasping a *bhava* in the four lowest realms (*apāyā*).
- As we have discussed before, this grasping of a new *bhava* is not done consciously, but automatically.
- For example, a *Sotāpanna*’s mind will not grasp a *bhava* in the *apāyā*; A *Sakadāgāmi*’s mind will not grasp a human *bhava* in addition, an *Anāgāmi* will not grasp a *bhava* in the *kāma loka*, and an *Arahant* will not grasp any.

5. There is another way to look at this mechanism of grasping a new *bhava* at the *cuti-paṭisandhi* moment. In the *upapatti Paṭicca Samuppāda* (PS) cycle, a certain *bhava* is grasped at “*upādāna paccayā bhava*.”

- When we trace the cycle backwards, we see that it starts at “*avijjā paccayā saṅkhāra*” and “*saṅkhāra paccayā viññāṇa*.”
- The grasping (*upādāna*) happens only if that PS starts with *avijjā* and generates an appropriate *viññāṇa* for grasping that *bhava*.

6. Therefore, it is important to realize the two roles that *viññāṇa* play. We can understand this by examining how a *Sotāpanna* avoids birth in the *apāyā*.

(i) If one cultivates “*apāyagāmī viññāṇa*” by doing extremely hateful/greedy actions, *viññāṇa* will keep GENERATING *kamma bīja* (energy) that fuel a new *bhava* in the *apāyā*. When one attains the *Sotāpanna* stage, one will automatically stop generating any more such *kamma bīja*, but those ones that had been created will be there.

(ii) However, after someone attains the *Sotāpanna* stage, his/her mind will not start a *upapatti* PS cycle with an *apāyagāmī viññāṇa*, because that level of *avijjā* has been removed. That type of *viññāṇa* has been “killed” or removed from her mind and is no longer able to grasp a new *bhava* in the *apāyā*, even though *apāyagāmī kamma bīja* will still be there.

7. A good example from the *Tipiṭaka* is Ven. Āṅgulimāla. He killed almost 1000 people and definitely had accumulated enough strong *kamma bīja* to be born in the *apāyā*.

- But at death his mind was devoid of that kind of bad *viññāṇa* to grasp any type of *bhava* in the 31 realms. Therefore, he was not reborn anywhere in the 31 realms.

8. Therefore, the word *viññāṇa* represents much more than just consciousness: It can be “food” for accumulating new *kamma bīja* AND also “food” or “fuel” that leads to grasping a new *bhava*.

- *Viññāṇa* is opposite of *ñāṇa* (pronounced “gnana”) or wisdom. When one cultivates *ñāṇa*, one’s *avijjā* is reduced and certain types of *viññāṇa* are concomitantly reduced.

- Pronunciation of *viññāṇa*:

[WebLink: Pronunciation of Viññāṇa](#)

- Pronunciation of *ñāṇa*:

[WebLink: Pronunciation of ñāṇa](#)

- There are many types of *viññāṇa*; see, “[2. Viññāṇa \(Consciousness\) can be of Many Different Types and Forms.](#)”

- As one attains the four stages of *Nibbāna*, *avijjā* is removed in four stages and the strength of all types of *viññāṇa* are accordingly reduced (removed) and all are eventually removed at the *Arahant* stage.

- This pure level of consciousness — without any defilements and thus any cravings — is called *pabhasvara citta*; see, “[Pabhassara Citta, Radiant Mind, and Bhavaṅga.](#)”

- In other words, an *Arahant* can experience the world with a purified mind that is not blemished by even a trace of greed, hate, or ignorance. Therefore, at death, his purified mind will not grasp any existence (*bhava*).

9. As long as one has *viññāṇa*, one will be born somewhere in the 31 realms. This is why *viññāṇa* is called a type of food for the mental body.

- As one proceeds at successive stages of *Nibbāna*, one will crave for less and less things in this world. For example, at the *Anāgāmī* stage, one would have lost all cravings (and hopes) — or *viññāṇa* — for any type of sensual pleasures.
- It must be noted that the birth in the *apāyā* is not due to cravings to be willingly born there (no one has such cravings), but due to immoral deeds one had done to enjoy sensual pleasures AND has not yet removed that mentality (desire to enjoy sense pleasures at any cost) or bad *viññāṇa*.

10. Any type of *viññāṇa* is cultivated by thinking, speaking, and acting in such a manner. Thinking, speaking, and acting is done based on *mano*, *vacī*, and *kāya saṅkhāra* which arise due to *sañcetanā* (“*san*” + “*cetanā*” or defiled intentions; *cetanā* is pronounced “chethanā”).

- For example, an alcoholic regularly thinks about drinking, likes to speak about it and likes to drink. The more he does those, the more that *viññāṇa* will grow.
- It is easy to see how a gambler, smoker, etc grow their corresponding *viññāṇa* the same way.
- Having such *viññāṇa* can lead to other immoral activities and corresponding *viññāṇa*, say tendency to lie, steal, and even murder.
- Therefore, all activities done in cultivating such *viññāṇa* are based on *mano sañcetanā*. **That is why *mano sañcetanā* are also food for the mental body.**

11. The triggers for such *sañcetanā* are sense contacts or *phassa*. These are not mere sense contacts, but those that give rise to “*samphassa ja vedanā*.”

- *Phassa* is a sense contact. When one just looks at something that is *phassa*. But if one looks at it with greed or hate (and ignorance) in mind, that is *samphassa* (“*san*” + “*phassa*”); see, “[Vedanā \(Feelings\) Arise in Two Ways](#).”
- **This is why sense contacts or *phassa* (more precisely *samphassa*) are food for the mental body.** Such sense contacts can lead to thoughts about bad actions and can give rise to future *kammaja kāya*.
- Therefore, one needs to avoid sense contacts with sense objects that one has *taṇhā* for. We need to remember that *taṇhā* is attachment to something via greed or hate; see, “[Taṇhā – How We Attach Via Greed, Hate, and Ignorance](#).”
- So, it is a bad idea for a gambler to visit casinos, an alcoholic to make visits to bars, etc. **Furthermore, one needs to avoid friends who encourage such activities too.**
- It is best to avoid any type of contacts that can lead to sense exposures that provide “food” for the mental body, i.e., get us started thinking about those bad activities.

12. Now we can see how those three types of food act in sequence to feed the mental body: Sense contacts (*phassa*) can lead to *mano sañcetanā*, which in turn cultivate *viññāṇa*.

- Such sense contacts (*samphassa*) automatically start *mano saṅkhāra*; then we start thinking and speaking about those favorite activities, i.e., we start *vacī saṅkhāra* (consciously think about them and even speaking about them). Then when the feelings get strong, we will start doing them (using *kāya saṅkhāra*).
- It is important to realize that ***mano saṅkhāra*, *vacī saṅkhāra*, and *kāya saṅkhāra* are all generated in the mind**: *Vacī saṅkhāra* are conscious thoughts that can lead to speech; *kāya saṅkhāra* are conscious thoughts that move the physical body.
- All three types of *saṅkhāra* arise due to ***mano sañcetanā***. We cannot think, speak or do things without generating appropriate *mano sañcetanā*.

13. As we discussed before, the physical body is just a shell; it is controlled by the mental body (*gandhabba*).

- Sense contacts come through the physical body. When we get attached to them, we generate *mano sañcetanā* and think, speak, and act accordingly, generating various types of *viññāṇa*.
- *Kabalinka āhāra* or the food that we eat are experienced through one of the six sense contacts (tongue or *jivha pasāda*). If we eat food with greed, that also lead to *mano sañcetanā* and corresponding “greedy *viññāṇa*.” Therefore, *kabalinkā āhāra* can also be a food for the mental body. More details can be found at “[Āhāra \(Food\) in Udayavaya Nāna](#).”
- That is why all four types can be food for the mental body.

A deeper discussion on the four types of food (*āhāra*) is in the post, “[Āhāra \(Food\) in Udayavaya Nāna](#).”

Next, “[Micchā Diṭṭhi, Gandhabba, and Sotāpanna Stage](#)”,...

4.8.8 Micchā Diṭṭhi, Gandhabba, and Sotāpanna Stage

May 6, 2017; Revised September 24, 2019; May 16, 2021; May 21, 2022

Two Eightfold Paths

1. There are two Eightfold Paths: **mundane** and **Noble**. See, “[Mahā Cattārīsaka Sutta \(Discourse on the Great Forty\)](#)..”

- First, one starts on the **mundane Eightfold Path** by removing the ten types of *micchā diṭṭhi* or wrong views.
- Only then one's mind can see the “bigger picture,” and one could comprehend the Three Characteristics or *Tilakkhaṇa* (*anicca, dukkha, anatta*) of this world of 31 realms. When one starts comprehending *Tilakkhaṇa*, one starts on the **Noble Eightfold Path**.
- Once one comprehends *Tilakkhaṇa* to some extent, one becomes a *Sotāpanna*. Subsequently, one can attain higher stages of *Nibbāna*.

2. Many people today have at least some of the 10 types of *micchā diṭṭhi* and believe that they are on the **Noble Path**. But it is clear from above that some may not even be on the **mundane Path**.

- **Just by saying to oneself that one believes in them, one cannot get rid of the 10 types of *micchā diṭṭhi*. One must be convinced of it, and that conviction comes by learning Dhamma, the true nature of this world.**
- This post focuses on the *para loka* and *gandhabba* because many *Theravadins* incorrectly assume that *gandhabba* is a *Mahāyāna* concept.

The Ten Types of *Micchā Diṭṭhi* (Wrong Views)

3. The 10 types of *micchā diṭṭhi* are listed in many *suttā*, including the [WebLink: suttacentral: Mahā Cattārīsaka Sutta \(MN 117\)](#) and *Pathama Niraya Sagga Sutta* ([WebLink: suttacentral: Aṅguttara Nikāya: AN 10.211](#)): “*Natthi dinnam, natthi yiṭṭham, natthi hutam, natthi sukata dukkaṭānam kammānam phalaṃ vipāko, natthi ayaṃ loko, natthi paro loko, natthi mātā, natthi pitā, natthi sattā opapātikā, natthi loke samaṇabrāhmaṇā sammaggaṭā sammāpaṭipannā ye imaṃca lokam paraṃca lokam sayam abhiññā sacchikatvā pavedentī'ti.*” Translated, the wrong views are:

- Giving (*dāna*) has no merits
- being grateful and responding in kind (for what others have done for oneself) has no merits
- respecting and making offerings to those with higher virtues has no merits
- We enjoy/suffer in this life not due to *kamma vipāka*, but they “just happen.”
- this world does not exist
- ***para loka* or the world of *gandhabba* does not exist**
- there is no special person as a mother
- no special person as a father
- **there are no *opapātika* (instantaneous) births**
- **there are no *Samana brahmana* (basically *Ariyā* or *yogis*) with *abhiññā* powers who can see both this world (*imanca lokam*) and *para loka* (*paranca lokam*)**

Micchā Dīṭṭhi (Wrong Views) About the Gandhabba

4. I have highlighted three types of *micchā dīṭṭhi* that are common. They are somewhat interrelated. But the one about the *gandhabba* is a common *micchā dīṭṭhi*. Even those who believe themselves to be “devout Buddhists” seem to have that wrong view. They believe that the Buddha did not teach about *gandhabba* or the *para loka*.

- There is [WebLink: suttcentral: Tirokutta petavatthu](#) in the *Petavatthu* in the *Khuddaka Nikāya* (KN). This has been translated to English (not very good), but one can get the idea: [WebLink: accesstoinsight: Tirokudda Kanda: Hungry Shades Outside the Walls](#).
- The following verse in “[15. Mogharājamānavapucchāniddesa](#)” of “*Cūlaniddesa*” of the *Tipiṭaka* clearly states that *para loka* is part of the “*manussa loka*” or the “human world:” “*Ayaṃ loko paro lokoti. Ayaṃ lokoti manussaloko. Paro lokoti manussalokaṃ ṭhapetvā sabbo paro lokoti—ayaṃ loko paro loko.*”
- Also, see “[Antarabhava and Gandhabba](#).”

5. In many *suttā*, including [WebLink: suttcentral: Mahāsaccaka Sutta \(MN 36\)](#) and [WebLink: suttcentral: Bodhirājakumāra Sutta \(MN 85\)](#) the Buddha described how he saw human *gandhabbā* moving from one physical body to the next (in a single human *bhava*) with the *Pubbenivāsānussati Ñāṇa* on the night he attained the *Buddhahood*.

- While *Ariyā* with *jhānā* can attain both the *Pubbenivāsānussati Ñāṇa* (about previous human rebirths) and the *Cutūpapāda Ñāṇa* (about past births in all realms), other *yogis* can mostly acquire only the first one, i.e., they can see only their previous human births. **Note that this is related to the last type of *micchā dīṭṭhi*, i.e., to believe that no such *Ariyā* or *yogis* exist.**
- In the *sutta* links above, the Pāli version is correct. Still, English and Sinhala translations are not correct, because there is no distinction made between the *Pubbenivāsānussati Ñāṇa* and the *Cutūpapāda Ñāṇa*. **With the first *Ñāṇa*, one can see previous human births, and with the second, one can see previous births in all 31 realms.**
- By the way, hereafter, I will try to provide *sutta* references at the [WebLink: suttcentral: SuttaCentral site](#). They have not only the Pāli version but also translations in different languages. **However, we must keep in mind that some translations are incorrect, as mentioned above, and with the translations of *anicca* and *anatta*.**

Gandhabba is a Human Without a Human Body

6. We also need to realize that *para loka*, or the world of *gandhabba* (of both humans and animals,) is NOT a separate realm.

- **In all other 29 realms, beings are born fully-formed instantaneously (*opapātika*) contrary to the 9th *micchā dīṭṭhi* on the list above.** Those instantaneous births, of course, do not involve a mother’s womb, and one *bhava* means just one *jāti* (birth). For example, a *deva* or a *Brahma* is born once instantaneously. That *Brahma* dies only once.
- The difference in the human and animal realms is that those dense physical bodies have lifetimes much smaller than the *kammic* energies for the two *bhava*; see, “[Gandhabba – Only in Human and Animal Realms](#).”
- When a human or an animal dies — and if there is leftover *kammic* energy for the human or animal *bhava* — then a *gandhabba* comes out of the dead body and waits for a suitable womb to be born (*jāti*) again in the same *bhava* (same realm).

- Thus, contrary to the widespread belief, *gandhabba* is not an “*antarābhava*” (in between *bhava*; “*antara*” means “in-between”), but rather is in the same *bhava*. The confusion arises with not knowing the difference between *bhava* and *jāti*.

Gandhabba Lives in Para Loka

7. Until they find a suitable womb, those *gandhabba* are in “*para loka*” or the netherworld, which co-exists with our world (but normally we cannot see those fine bodies of *gandhabbā*).

- **This is why one has *micchā diṭṭhi* if one does not believe in the *gandhabba* concept (*natthi paro loko* in #3 above.)**
- Thus a human may be reborn many times before switching to another existence (*deva*, *Brahma*, animal, *preta*, etc.).
- This is why rebirth stories are common. The “human *bhava*” is extremely hard to get as the Buddha explained. But once in the human *bhava*, one could be born many times as human; see, “[Rebirth – Connection to Suffering in the First Noble Truth](#).”
- The difference between *bhava* and *jāti* is explained in “[Bhava and Jāti – States of Existence and Births Therein](#).”

8. So, I hope one can understand that one still has *micchā diṭṭhi* if one adamantly rejects the concept of *gandhabba* or the concept of *opapatika* births.

- **If one has any one of the ten *micchā diṭṭhi*, one is not yet on even the mundane Eightfold Path;** see, “[Buddha Dhamma – In a Chart](#)” and the post referred to in that chart, “[What is Unique in Buddha Dhamma?](#).”
- The Buddha discussed this clearly in the “[Mahā Cattārīsaka Sutta \(Discourse on the Great Forty\)](#).”

It is a Step-by-Step Process

9. To get to the *Sotāpanna* stage, the first step is to make sure that one learns *Dhamma* and clear up any remaining doubts about those ten types of *micchā diṭṭhi*.

- When one gets rid of all ten *micchā diṭṭhi*, one is truly on the **Noble Eightfold Path**.
- At that point, one’s mind has been cleansed to a stage where one can comprehend deeper Dhamma concepts. In particular, the Three Characteristics of Nature (*Tilakkhaṇa*): *anicca*, *dukkha*, *anatta*. This is a deeper *micchā diṭṭhi*, the second type described in the *Mahā Cattārīsaka Sutta*.
- When one comprehends the *Tilakkhaṇa* to some extent, one attains the *Sotāpanna* stage of *Nibbāna*. **That is when one gets to the *Lokuttara* (Noble) Eightfold Path.**
- Then, by following the Noble Eightfold Path, one reaches the higher stages of *Nibbāna*, culminating at the *Arahant* stage.

10. **The Path to *Nibbāna* has been covered for hundreds of years because the above steps have not been clear. Furthermore, the meanings of those keywords, *anicca*, *dukkha*, and *anatta* have been distorted.**

- That slow process of degradation of Buddha Dhamma took place over about 1500 years. In the late 1800s, when the Europeans discovered the ancient Sanskrit and Pāli documents, they did more damage.
- They first discovered Sanskrit Hindu *Vedic* literature in India (Buddhism had disappeared from India long before). They later came across the Pāli *Tipiṭaka* in Sri Lanka, Burma, and other Asian countries.
- The key problem arose when they ASSUMED that Sanskrit words “*anitya*” and “*anātma*” are the same as the Pāli words “*anicca*” and “*anatta*.” **The Sanskrit words “*anitya*” and “*anātma*” do mean**

“impermanent” and “no-self,” but the Pāli words “*anicca*” and “*anatta*” have totally different meanings. See, “[Misinterpretation of Anicca and Anatta by Early European Scholars](#).”

More Information

11. Many posts in the “[Historical Background](#)” section fully explained that historical background. But at least read the posts starting with “[Incorrect Theravāda Interpretations – Historical Timeline](#).”

- The correct meanings of *anicca*, *dukkha*, and *anatta* have been discussed in the section, “[Anicca, Dukkha, Anatta](#).”

12. As for instantaneous births, instances of such *opapātika* births occur in many *suttā*. For example, in the [WebLink: suttaCentral: Mahā Parinibbāna Sutta \(DN 16\)](#), the Buddha told Ven. Ānanda about *opapātika* births of many people who died in a certain village: “..*Nandā, ānanda, bhikkhunī pañcannaṃ orambhāgiyānaṃ saṃyojanānaṃ parikkhayā opapātikā tattha parinibbāyinī anāvattidhammā tasmā lokā..*”

- As I mentioned, the translations are available in several languages in the above SuttaCentral link for the *sutta*. For example, the above verse is translated into English as “..The nun Nandā, Ānanda, through the destruction of the five lower fetters have arisen spontaneously in the *Brahmā* worlds, and will attain Final Emancipation there, without returning from that world...”
- In Sinhala as: “..අනන්දය, නන්දිනම්මිනික්ඛුණිය පස් ආකාර ඔරම්භණිය (සත්වයන් කාමලෝකයෙහි රඳවන) සංයෝජනයන් නතිකිරීම නිසා ඔපපාතිකව (බ්‍රහ්මලෝකයෙහි) උපන්නීය. ඒ (බ්‍රහ්ම) ලෝකයෙන් වනෙස්නාමන සම්මාන අත්පත් වන අතර ඔවුන්ට ඔවුන්ගේ ජාතීය...”
- However, please keep in mind that those SuttaCentral translations also can have errors (as is the case at most online sites and books), as I pointed out in #5 above.

Grasping the Real Nature

13. Finally, there may be people who attain *magga phala* but had never even heard about *gandhabba* in this life. If one comprehends the *Tilakkhaṇa*, that is all needed.

- In such cases, they had not rejected the concept of a *gandhabba*. If someone explained the concept to them, they would accept it since they can see that it must be true.
- However, if one hears those explanations and rejects them as “nonsense,” that is *micchā dīṭṭhi*. Those are the concept of a *gandhabba* (and *para loka*), instantaneous births, the existence of other realms, and the existence of *Ariyā* or *yogis* who have the ability to see such realms as well as *para loka*.
- The only way to get rid of such *micchā dīṭṭhi* is to examine those concepts and convince oneself that they must be true.

14. In that process, it is also necessary that one lives a moral life staying away from *dasa akusala* as much as possible, as explained in the “[Living Dhamma](#)” section. Anyone needs to experience the mental clarity (and the “peace of mind” or “*niveema*”) that comes with staying away from *dasa akusala*.

- By the way, the strongest of the *dasa akusala* is *micchā dīṭṭhi*, which includes not only the 10 types but also ignorance about *Tilakkhaṇa*. This is why a *Sotāpanna* removes 99% or more of the defilements by getting rid of the BOTH types of *micchā dīṭṭhi*; see, “[What is the only Akusala Removed by a Sotāpanna?](#).”
- **The first type of *micchā dīṭṭhi*** is about the 10 types discussed in #3 above, which includes believing that nothing happens without a cause; bad causes (*dasa akusala*) lead to bad consequences. **The second type** is about not knowing the true nature of this world of 31 realms, i.e., that it is not possible to maintain anything to one’s satisfaction (*anicca*), one is subjected to suffering because of that (*dukkha*), and thus, one is truly helpless in this rebirth process (*anatta*).

- However, it is difficult to “see” those *Tilakkhaṇa* until one believes in that bigger picture. That “bigger picture” includes the 31 realms, and the rebirth process, and the concept of *para loka* with *gandhabbā*.

4.8.9 Working of kammā – Critical Role of Conditions

May 21, 2017; revised May 11, 2022

1. We can see various human happiness/suffering levels around us. Some people live with relatively higher levels of health, wealth, and happiness, while others live in poverty, ill-health, and misery.
 - We become distraught upon hearing that a child died prematurely or someone brutally murdered. Of course, we should generate empathy and sympathy and do our utmost to prevent such horrible occurrences.
 - However, we also need to look at the CAUSES of such happenings. Once we understand the underlying causes, we will be able to prevent such things happening to us in the future, if not in this life, in future lives.
 - Nothing happens without reason or a cause (commonly multiple causes). If we understand that specific causes can lead to bad outcomes, we need to block such causes. If we suspect such causes are already there, we must stop making conditions for those causes to bear fruit.
 - That is the key message of the Buddha: It is not possible to eliminate the suffering that has arisen (we can minimize it), but we can eradicate FUTURE suffering.
2. The principle of cause and effect (*hetu/phala*) is a key principle in Buddha Dhamma, as in modern science.
 - Science is all about finding out HOW things HAPPEN around us due to CAUSES. A pebble on the ground will not go up by itself, i.e., we have to pick it up and throw it up.
 - We receive sunlight because the Sun puts out a vast amount of energy every second. And science has figured out how that happens: That energy comes from nuclear reactions; Sun is a giant fusion reactor.
 - With the development of modern science we have figured out that nothing happens without a cause; usually, more than one cause leads to an effect.
3. However, science has not yet figured out that humans (and other living beings) are also subject to the principle of causes and conditions. That is *Paṭicca Samuppāda* in Buddha Dhamma.
 - Does it just happen that X is born healthy and wealthy, Y is born healthy but poor, and Z is born handicapped and poor?
 - There must be REASONS why X, Y, and Z are born that way.
 - Not only that, a person born rich can become poor, and vice versa. Or a person in good health can die suddenly in an accident or by a heart attack. There must be reasons for such “turnarounds” too!
 - The laws of *kammā* can explain all the above. But the laws of *kammā* are not just based on causes and effects; they DEPEND on CONDITIONS. That is what prevents laws of *kammā* from being deterministic, i.e., one's future is NOT determined solely by past actions or *kammā*. Past *kamma* cannot bring *vipāka* unless suitable conditions are present.
4. Science has been unable to come up with explanations for the effects discussed above. There are two critical reasons for this lack of progress in science.
 - First, unlike inert objects like a pebble, a living being has a mind. When a person moves, the cause originates in that person's mind, i.e., the person decides to move. Your hand will not move until you choose to move it. And you have the power to STOP its movement too!
 - The second difference is that there is a rebirth process for living beings. The laws of *kammā* cannot operate without the rebirth process. That is why not believing in rebirth is wrong (*micchā diṭṭhi*.) With that wrong view, one will never be able to figure out the true nature of the world; see “[Complexity of Life](#)”

[and the Way to Seek “Good Rebirths”](#)” and [“Micchā Ditthi, Gandhabba, and Sotāpanna Stage.”](#) [May need this: [Vagaries of Life and the Way to Seek “Good Rebirths”](#)]

- The human life of about 100 years is extremely short compared to the saṁsāric journey (rebirth process). Our mental states and physical appearance change as we go from life to life; see [“What Reincarnates? – Concept of a Lifestream.”](#)

5. So, anything and everything happens due to reasons or causes. However, just because there is a cause, it is not guaranteed to give rise to the corresponding effect.

- In the terminology of Buddha Dhamma, past *kammā* do not necessarily lead to *kammā vipāka*.
- We can grasp this key idea with an example.

6. A seed CAN give rise to a tree. It has the POTENTIAL to bring a tree to existence. However, for that to happen, suitable CONDITIONS must be present.

- If we keep a seed in a cool, dry place, it will not give rise to a tree, and will remain a seed with that POTENTIAL for hundreds of years.
- Eventually, that potential to bring about a tree will disappear, and the seed will be “dead.”

7. A strong *kammā* creates a *kammā bīja*, or a *kammā* seed, that works pretty much like an ordinary seed that we discussed above.

- For that *kammā bīja* to bring about its result, i.e., *kammā vipāka*, suitable CONDITIONS must exist.
- If suitable conditions do not materialize for a long time, then that *kammā bīja* will lose its energy and it is said that it will become an *ahosi kammā*, i.e., that *kammā* will not bring about any *kammā vipāka*.

8. As mentioned above, the other important factor in this complex process is that a living being goes through a rebirth that has no discoverable beginning.

- In this unimaginably long rebirth process, we all have accumulated uncountable *kammā* seeds, both good and bad.
- Those good *kammā* seeds can bring about good results (health, wealth, beauty, etc.), and bad *kammā* seeds lead to bad results (ailments, handicaps, poverty, etc.).
- But either kind can run out of energy without giving results (*vipāka*), if suitable CONDITIONS do not appear.

9. A seed cannot germinate unless suitable CONDITIONS appear (i.e., it should be in the ground, and water, sunlight, and nutrients must be present).

- In the same way, we can avoid many possible bad *kammā vipāka* by being mindful and not providing conditions for them to appear. We can also MAKE conditions for good *kammā vipāka* to bring about good results.
- For example, if one goes into a bad neighborhood at night, that provides conditions for any suitable bad *kammā* seeds waiting to bring about their bad *vipāka*. On the other hand, we cannot be successful in any project unless we are willing to provide the right conditions: to pass an examination, we must study.
- Even if one is born poor, one could work hard and overcome poverty. If one is prone to catching diseases, one could eat healthily and exercise, to overcome at least some recurring ailments. *Kammā* is not deterministic, see, [“What is Karma? – Is Everything Determined by Karma?”](#).

====

10. But of course it will be difficult to overcome the results of very strong *kammā* seeds. One may be born handicapped due to a strong *kammā* seed that was generated in a previous birth.

- In the same way, strong good *kammā* seeds can bring about good results without much effort. Some are born rich, healthy, and wealthy due to a past strong good *kammā* seed coming to fruition.

11. So, I hope it is clear that one's happiness in this life could be determined by several different factors.

- In relatively few cases, one could automatically (without much effort) receive health, wealth, and RELATIVE happiness due to strong *kammā* seeds. In the same way, some others could be facing miserable lives.
- However, on the average, one's happiness in this life is to a large extent is determined by one's willingness to make right CONDITIONS for good *vipāka* to take place and prevent bad *vipāka* from appearing.
- Even more importantly, one could make conditions for health, wealth, etc in future lives by living moral lives and doing good deeds.

12. Now let us look at what happens when a result materializes due to a *kammā vipāka*. Once a bad *vipāka* materializes, we can certainly manage it to minimize its effects, and in some cases even get rid of it by working to making conditions for a good *kammā* seed to overcome it.

- For example, if one comes down with cancer, in some cases it can be overcome by good medical treatment, i.e., making conditions to counter the initial effect.
- If one is born tall or short, there is nothing much one can do about it. If one is born handicapped, one will have to live the whole life that way.
- As we can see, we can improve some of those *kammā vipāka*, while we cannot do much about some others.
- Even the Buddha could not avoid certain *vipāka*. He had back aches and Devadatta was able to injure his foot. Ven. Moggallāna was beaten to death.

13. Another observation we can make from the above discussion is that when one becomes an *Arahant* (or even a Buddha), his suffering is not completely ended at the *Arahanthood*. He still had to suffer due to the physical body that had already "started."

- So, what was meant by "removal of suffering" when one attains *Nibbāna*? It is the future suffering (i.e., suffering in future lives) that is ended. When an *Arahant* attains *Parinibbāna* (i.e., physical death), he/she will not be reborn in this suffering-filled world of 31 realms, and that is when the suffering completely ends.
- However, as we have discussed, part of suffering ends with the attainment of *Arahanthood*: suffering associated with "*saṅkhāra dukkhā*" or what is called "*samphassa jā vedanā*"; see, "[Vedanā \(Feelings\) Arise in Two Ways](#)."

14. Of course, IN THE LONG RUN (in the rebirth process), no matter how hard one strives, it will be IMPOSSIBLE to attain PERMANENT happiness **anywhere in this world**. This is called *anicca* nature. That is why we need to strive to attain *Nibbāna* to avoid future suffering.

- However, it is not an easy task to even to beginning to comprehend the *anicca* nature, until one enters the **mundane Eightfold Path** by getting rid of the 10 types of *micchā diṭṭhi*, **which include not believing in rebirth or the concept of a *gandhabba***; see, "[Micchā Diṭṭhi, Gandhabba, and Sotāpanna Stage](#)."
- Only when one enters the **mundane Eightfold Path** that one will be able to grasp the Three Characteristics of Nature (*anicca, dukkha, anatta*), and start on the **Noble Eightfold Path** to attain *Nibbāna*.
- The two types of Eightfold Paths were discussed by the Buddha in the "[Mahā Cattārīsaka Sutta \(Discourse on the Great Forty\)](#)." Also see, "[Buddha Dhamma – In a Chart](#)."

15. Finally, the role of conditions in the laws of *kammā* are inherent in the *Paṭicca Samuppāda*; see, “[What Does “Paccaya” Mean in Paticca Samuppāda?](#)” and “[Paṭṭhāna Dhamma – Connection to Cause and Effect \(Hetu Phala\)](#).”

- *Paṭicca Samuppāda* is discussed in the section: “[Paṭicca Samuppāda](#).”

V Dhamma and Science

- Dhamma and Science – Introduction
- **Subsection:** Origin of Life

5.1 Dhamma and Science – Introduction

Revised January 22, 2019; August 22, 2019; February 26, 2020; August 27, 2022

1. Whether it is a scientist or a Buddha, each is “discovering” the way nature works, i.e., revealing to the world what the fundamental laws of nature are. To appreciate a Buddha compared to a scientist, contemplate the following. The scientific knowledge we have today is the CUMULATIVE effort of thousands of scientists, each taking the knowledge base a little further. As Newton said, “I was fortunate to stand on the shoulders of giants to see further.”

- Not all scientists make similar contributions. Galileo, Newton, and Einstein made “giant leaps” compared to the smaller steps taken by other scientists.
- Now with cumulative effort over many hundreds of years, science has made significant advances concerning understanding some of the fundamental laws relevant to INERT MATTER.
- On the other hand, there is virtually no progress in understanding how the mind works; see [“Consciousness – A Dhamma Perspective.”](#)

2. As I build up this site, anyone can see that Buddha Dhamma is the ultimate Grand Unified Theory. It explains the behavior of inert matter and living beings that we can see. And it also describes the existence of an infinite number of worlds with living beings in 29 other realms (other than the human and animal realms that we cannot see). See [“The Grand Unified Theory of Dhamma.”](#)

- Buddha Dhamma is not a religion in the sense of providing salvation. The Buddha was not a God, a prophet, or a messenger. He was a human being who purified his mind to perfection so that he could see the whole of existence.
- The Buddha was the greatest scientist who investigated the problem of existence and found a complete solution. We all need to find our salvation by following his prescribed path to purify our minds.

3. Newton could not have discovered the laws of gravity if it were not for the efforts of scientists like Brahe and Copernicus. Similarly, Einstein could not have discovered relativity without the knowledge passed down by other scientists. Quantum mechanics would not have been possible without the efforts of multiple scientists who moved forward with the evidence gathered by hundreds of other scientists.

- The Buddha, in comparison, discovered the complete set of laws about the WHOLE EXISTENCE through his efforts. That includes the way inert matter behaves on this Earth and all of existence in the 31 realms (that science is not even aware of). That includes how inert matter behaves in all 31 realms AND the minds of beings in those 31 realms.
- I recently proposed an explanation for the controversy over the “non-locality” issue in quantum mechanics. Everything in this universe is inter-connected (or entangled) at a deep level; [“Quantum Mechanics and Dhamma.”](#)

4. We could say that the minds of the caliber of Newton and Einstein appear roughly every 100 years. The mind of a Buddha is infinitely more advanced and appears once in many billions of years if beings are lucky.

- There have been four Buddhas in this *Mahā kappā*, but the last Buddha before them was born 30 *Mahā kappā* ago. Thus, there was a gap of 30 *Mahā kappā* (roughly a trillion years) without a Buddha appearing in this world.
- The Buddhas use a method different from the “scientific method” used by scientists. Instead of conducting experiments on inert matter, they conduct mind experiments. Answers to ultimate questions on the existence of living beings with complex minds can be found only by PURIFYING a human mind to the ultimate level. That is what a Buddha does.

5. I will try to provide at least some details of the complex world view that the Buddha provided. Buddha Dhamma has been muddled and distorted over the past 2500 years.

- “Our world” is much more complicated than what is grasped by our senses; see “[The Grand Unified Theory of Dhamma](#).”
- And our lives do not end with this one; see “[Evidence for Rebirth](#).”
- Those two facts constitute the basis of the true nature of existence. They need to be thought about carefully. One cannot comprehend the message of the Buddha until one at least has some idea about this “big picture.”

Now let us examine one case where it took 2500 years for science to come to be consistent with one part of Buddha Dhamma's world view.

It Took 2500 Years...

Here is a picture of our Milky Way galaxy. We can see only a couple of thousand stars. But there are hundreds of BILLIONS of stars in our galaxy, and there are about an equal number of GALAXIES in our universe. Thus, there is a whole galaxy for each star in our galaxy. It is truly mind-boggling.

Milky Way

1. Even a few hundred years ago, even scientists believed our Earth was at the center of the universe:
[WebLink: WIKI: Geocentric model](#)

- Therefore, Buddha's view of the universe as consisting of innumerable “world systems” was not looked at favorably even a few hundred years ago.

- Of course, that has changed now. Buddha's statement that "there is no discernible beginning to life" is also becoming vindicated with each new scientific discovery. See "[Origin of Life](#)."
2. In Buddha Dhamma, there is no First Cause (no Creator): Life always existed and will always exist. Each living being has gone through innumerable birth-rebirth processes without a conceivable beginning. However, everything in the "world around us" is impermanent, including our universe (a "major world system" in Buddha Dhamma).
- Everything is born, has a transient existence, and finally decays. And this includes our universe as well. Like everything else, stars (and associated planetary systems) come into existence and eventually fade away.
3. if there is no beginning to life, then where did life exist before the "big bang," i.e., before our universe came into existence? (actually, life is believed to have evolved on Earth much later).
- People who lived even a hundred years ago had to take Buddha's words on this point solely on faith. But we are lucky to be assured by the fact that modern science gives us some rather persuasive reasons to believe that life existed forever. Let us look at the emerging evidence.
4. Even as recently as at the beginning of the 1900s, Lord Kelvin (one of the top scientists of the day) estimated that the age of the Sun was < 40 million years. He estimated that time based on gravitational contraction (scientists did not know about nuclear fusion then). Our knowledge of the universe was also pretty much limited to the Solar system. So, this meant the age of our "known universe" was very short, and thus the Buddha's teachings on a beginning-less *saṃsāra* (or *saṃsāra*) seemed like a myth.
- Vindication of the Buddha's teachings started at the beginning of the 1900s with the advent of quantum mechanics and relativity. The discovery of radioactivity in 1898 by Becquerel and Einstein's explanation of the photoelectric effect in 1905 led to the quantum theory of atomic structure. That, in turn, led to the correct picture of nuclear fusion as the source of solar energy.
 - So, by 1956, the solar system's age was > 4 billion years, and the universe's age was estimated to be around 14 billion years. Even billions of years are hardly the same as "beginning-less time"!
5. By 1929, Edwin Hubble proved that distant galaxies were moving away from each other. And that our galaxy is but just one of many galaxies. That was a vast understatement since now we know that there are 400 billion galaxies in our observable universe!
- The currently accepted theory of the "big bang" is the inflationary theory of Alan Guth. See [WebLink: PDF Download: "The Inflationary Universe" by Alan Guth \(1997\)](#).
 - However, a minority of scientists do not believe in the "Big Bang." They have proposed alternate theories; see [WebLink: PDF Download: "Endless Universe" by Paul J. Steinhardt and Neil Turok \(2007\)](#). In this view, universes are destroyed and reborn.
6. Buddha's world view does not have a "Big Bang" beginning either. Life always existed, and it will always exist in the future.
- See "[Origin of Life](#)."
 - The post "[Buddhism and Evolution – Aggañña Sutta \(DN 27\)](#)" also discusses some key concepts.
7. By the way, there are several theories currently being explored in quantum mechanics related to cosmology. One theory requires a universe to exist for each possible event! So, there may be an infinite number of parallel universes. For example, see "The Beginning of Infinity" by David Deutsch (2011). In all these theories, multiple universes always exist.
- In any case, the Buddha did not say which of these theories is correct. He just said life always existed, and it always will. But he did say that "star systems" — like our Solar system — come into being, survive for long times, and are destroyed at the end.

- And that process repeats over and over!
8. More information at “[Dhamma and Science](#)” and “[Quantum Mechanics and Dhamma](#).”

5.2.1 Origin of Life – There is No Traceable Origin

July 10, 2019; revised July 11, 2019; June 21, 2022

Why Is This Issue Important?

1. As I explained in my previous post, we CREATE OUR OWN future lives, as described by *Uppatti Paṭicca Samuppāda*; “[Uppatti Paṭicca Samuppāda \(How We Create Our Own Rebirths\)](#).”

- *Paṭicca Samuppāda* cycle starts with “*avijjā paccayā saṅkhāra*.” As long as there is *avijjā* (no comprehension of the Four Noble Truths), one is bound to do (*abhi*)*saṅkhāra* — and generate *kamma* — there will be *bhava* and *jāti* (i.e., rebirth). That cycle will continue forever (just as it had no beginning).
- All types of births (*jāti*) lead to suffering, without exception.
- **This cycle ends ONLY WHEN one’s *avijjā* is removed via comprehension of the real nature of this world of 31 realms and one voluntarily gives craving (*taṇhā*) for existence in this world of 31 realms.** That is the attainment of *Nibbāna* or *Arahanthood*.
- This understanding is the FOUNDATION of Buddha Dhamma.

2. Therefore, the question, “What is the origin of life?” is very much relevant to UNDERSTANDING Buddha Dhamma.

- Most scientists believe that our universe came to existence only about 14 billion years ago with the “Big Bang.”
- Furthermore, current scientific theories say that life first formed in a primitive state (single-cell entities) and evolved into more complex life forms. And that humans came into existence less than five hundred thousand years ago.

- Most scientists do not agree with the “Creation hypothesis” that is the foundation of Abrahamic religions (Christianity, Judaism, Islam) simply because it is not compatible with the Principle of Causality. It says nothing can come to existence without a cause(s). If a Creator created life, how did that Creator come into existence?
- The compatibility of a “Big Bang” origin with causality is also not clear. Scientists are exploring possibilities like the “multiverse theory”, but those are still speculative.
- **However, our focus in this series of posts is not on the actual origin of the universe, but on the origin of life on Earth.**

Buddha’s Explanation

3. According to the Buddha, life has no traceable beginning. This is certainly compatible with causality.

- For example, in the “[WebLink: suttacentral: Gaddulabaddha Sutta \(SN 22.99\)](#)”: “*Anamataggoyam, bhikkhave, saṃsāro*” means “***bhikkhus, there is no discernible beginning to the rebirth process.***” It also describes how living beings are bound to *saṃsāra*, because they do not realize the *anicca*, *dukkha*, and *anatta* nature, which we recently discussed: “[Sotāpanna Stage and Tilakkhana.](#)”
- The above verse appears in all *suttā* in the “[WebLink: suttacentral: Anamatagga Saṃyutta \(SN 15.1 ~ 15.20\)](#)” of the *Saṃyutta Nikāya*, where each *sutta* gives a simile to illustrate how long each of us has been in this rebirth process and **how much suffering we have endured.**
- **However, it must be noted that Buddha’s message is NOT a depressing one.**
- Whether there is a Buddha in the world or not, this suffering exists. This suffering is real but there is a way to overcome that suffering.
- Without a Buddha, we will not even be aware of this hidden suffering. **Furthermore, a Buddha FOUND A WAY (Noble Eightfold Path) to stop this perpetual suffering. That is the uplifting message.**

4. As many of you may have observed, learning deeper aspects of Buddha Dhamma is not easy. It requires one to spend considerable time learning and then contemplating.

- Without an understanding of how long the *sansāric* journey is and how much suffering is encountered in most births, it is difficult to generate the MOTIVATION to study Buddha Dhamma. Most people turn to Buddha Dhamma only when they come down with harsh suffering, seeking relief. But the best time to learn is when one is healthy with a sharp mind, and I hope I can motivate those people too with this series.
- In the “[WebLink: suttacentral: Upanisa Sutta \(SN 12.23\)](#),” the Buddha discussed the proximate causes/conditions (*upanisa*) for various factors leading to *Nibbāna*. Understanding how various births (*jāti*) arise and how ALL those births give rise to *dukkha* (suffering) is the key. When one comprehends the Four Noble Truths, one understands how *dukkha* arises (and that it can be stopped from arising); that leads to *saddhā* (faith). Starting there one can follow the Noble Eightfold Path and attain *Nibbāna*! That is the essence of the *sutta*, even though it may not be clear from the translation in the link.
- That understanding cannot be attained until one can clearly see that there has not been a BEGINNING to this rebirth process, and we all have suffered so much in each and every birth. Regarding the perpetual suffering, I will also discuss the “[WebLink: suttacentral: Pathama Niraya Sagga Sutta \(AN 10.211\)](#)” in the future. It explains the causes of rebirth in good and bad realms, and why most births are in bad realms.

5. Life has always existed, but planetary systems (like our Solar system) are destroyed periodically and re-formed over long times.

- This is the only explanation that is consistent with the Principle of Causality: There is no “first beginning to life.” Life always existed, and it evolves according to the Principle of Causality, which is *Paṭicca*

Samuppāda; see my previous post: "[Uppatti Paticca Samuppāda \(How We Create Our Own Rebirths\)](#)."

- If we go by the Principle of Causality (which is THE basis of modern science), there CANNOT be an origin of life, unless life can start with inert matter.
- **What the video below explains is that it is NOT POSSIBLE to create EVEN A SINGLE CELL (a basic building block of life) in the laboratory starting with inert matter.** If it cannot be created in a laboratory under controlled conditions, it WILL NOT be possible for life to arise in a natural process starting with inert matter.
- In a newly-formed Earth, the first cells are created by *kammic* energy. In other words, it is the "mental energy" in *javana citta* that is really responsible for a "first cell". I will discuss this in future posts on *Aggañña Sutta*.

Evolutionists Versus Creationists

6. Of course, there is an ongoing debate between the evolutionists and creationists. **Evolutionists** believe that life evolved into complex entities like humans over billions of years. Furthermore, they believe that even the first cell (which is the building block of all life forms) evolved in the early Earth starting with inert molecules. **Creationists**, on the other hand, believe that a Creator God created life.

- I am providing a few references at the end of the post for both sides.
- It is to be noted that most evolutionists do not discuss the origin of a cell that much. They mainly focus on the "evolution of the species" STARTING WITH a fully functioning cell and progressing into more complex species with more and more cells of complex structure. **Evolutionists are just speculating that a cell evolved in the primitive Earth due to random events.** For example, Dr. Richard Dawkins writes in the reference given below, "How long would we have to wait before random chemical events on a planet, random thermal jostling of atoms and molecules, resulted in a self-replicating molecule? Chemists don't know the answer to this question" (p. 144).
- On the other hand, creationists focus on the issue of why it is not possible to "create a cell" via evolution. Many of them agree that complex life possibly evolved starting with simpler life forms.
- I agree with the creationists that it is not possible for a cell to come to existence "starting with inert molecules" via random events. You can decide for yourself based on the videos below (and the references if you are really interested). Of course, we can discuss at the discussion forum.

7. The video below is by a scientist (Dr. James Tour) who has a different viewpoint than most other scientists. He provides solid evidence that life could not have evolved starting with inert matter. It is too complex to have evolved by natural processes.

- At the end of the video, Dr. Tour comes to the conclusion that since life is too complex to evolve, it must have been CREATED by a Creator God. That is the other extreme view.
- According to Buddha Dhamma, life did not evolve from inert matter, nor it was created by a Creator God. Life always existed and it just takes different forms when a given "lifestream" is reborn a human, animal, *deva*, etc. We all have been born in most of the 31 realms in our deep past! When the conditions on Earth became suitable cells came into existence via *kammic* energy.

Mind Is the Creator of (New Forms of) Life! No Beginning to Life

8. Of course, it is very likely that Dr. Tour is not aware of the extensive and scientific explanation by the Buddha in the *Aggañña sutta*: Life has ALWAYS existed. A given lifestream (you or I) have existed without a traceable beginning.

- I will not be able to discuss that complex process any time soon. But I have discussed the main points in the *Aggañña sutta* in the post: "[Buddhism and Evolution – Aggañña Sutta \(DN 27\)](#)."

- It is just that we ourselves CREATE OUR OWN future lives, as described via *Uppatti Paṭicca Samuppāda* (which I discussed in my previous post).

9. A cell is the building block of life. Setting aside a complex life form like a human (made of trillions of different types of cells), science WILL NOT be able to create even a single cell. **In fact, even in any CURRENT living being, individual cells are not formed. Instead, an existing cell divides to make two cells, and that is how more and more living cells come into existence!**

- **Each of our bodies started with just a single cell (zygote), and it became alive only when a *gandhabba* (or *paṭisandhi viññāṇa*) “descended to the womb” and merged with that single cell.** It is cell division that led to the current physical body with trillions of cells; see, “[Buddhist Explanations of Conception, Abortion, and Contraception](#).”
- No scientist has been able to CREATE even a primitive single cell. In cloning experiments, they deal only with existing cells; see, “[Cloning and Gandhabba](#).”
- As explained by Dr. Tour, a living cell is very complex and is like a working factory. He does a good job in his explanations.

[WebLink: youtube: James Tour: The Mystery of the Origin of Life](#)

10. Here is an introductory video on a living cell (you may need to copy the URL below and paste in a browser window if the video does not show up):

[WebLink: youtube: Introduction to Cells: The Grand Cell Tour](#)

REFERENCES

For evolution:

Richard Dawkins, “The Blind Watchmaker: Why the Evidence of Evolution Reveals a Universe without Design” (2015).

Jerry A. Coyne, “Why Evolution is True” (2010).

(Note that both these and other books/research papers do not provide ANY evidence for the evolution of a cell)

For creation:

Stephen Meyer, “Signature in the Cell: DNA and the Evidence for Intelligent Design” (2010).

Richard Behe, “Darwin’s Black Box: The Biochemical Challenge to Evolution” (2006).

Both evolution and creation not adequate:

Thomas Nagel, “Mind & Cosmos: Why the Materialist Neo-Darwinian Conception of Nature is Almost Certainly False” (2012).

- Professor Nagel (who is a philosopher) obviously has had no exposure to Buddha Dhamma. But I am very much impressed that he came to the conclusion that mind MUST play a central role. I will write more on that in future posts.

5.2.2 Human Life – A Mental Base (Gandhabba) and a Material Base (Cell)

July 15, 2019; revised July 16, 2019

Current Scientific Understanding of a Human Birth

1. Of course, science assumes that life is only associated with a physical body and when the physical body dies, that is the end of the story. This is what we called “*uccheda diṭṭhī*” in the post, “[Sakkāya Diṭṭhi – Getting Rid of Deeper Wrong Views](#).” Here is a summary of the current scientific understanding of the beginning of a human life.

- During the mother’s menstrual cycle, one **egg (ovum)** is usually released from one of the ovaries and is swept into the funnel-shaped end of one of the fallopian tubes.
- After intercourse with the father, If a **sperm** penetrates the egg there, fertilization results and the **fertilized egg (zygote)** moves down the fallopian tube and ends up in the uterus. This zygote divides into two cells, those two to four cells, etc.
- This collection of cells enters the uterus in 3 to 5 days. In the uterus, the cells continue to divide, becoming a ball of cells called a **blastocyst**. Inside the uterus, the blastocyst implants in the wall of the uterus, where it develops into an **embryo** attached to a placenta and surrounded by fluid-filled membranes; see, [WebLink: merckmanuals.com: Stages of Development of the Fetus](http://merckmanuals.com: Stages of Development of the Fetus)

2. This cell division is what causes that baby to grow (first inside the womb and then outside the womb) to become a full-grown human with trillions of cells. **It is that first cell (which cannot even be seen with the naked eye) that eventually multiplied to a mass of trillion of cells in a grown human!**

- However, there is much confusion about WHEN that zygote becomes alive, i.e., when it can be called “a human.” This “time of conception” varies widely based on personal and religious beliefs.
- Some people believe life starts at the moment of the merger of the egg and sperm (to form the zygote). At the other end, some say the actual birth of the baby (i.e., coming out of the womb) is the start of the human life! Some others define the life to start when the embryo’s heart starts beating.
- This confusion goes away when one understands the complete process described by the Buddha.

Buddhist Description of a Human Life – *Bhava* and *Jāti*

One needs to understand the concepts of *bhava*, *okkanti*, and *jāti* in order to understand how a human being is conceived in the womb (conception) and is born 9 months later.

3. According to the *suttā* as well as *Abhidhamma* in the *Tipiṭaka*, a **new human existence (*bhava*)** does not start in a womb. It starts at the *cuti-paṭisandhi* moment when the previous *bhava* comes to an end. For example, if a *deva* dies and becomes a human, a human *gandhabba* (fine mental body) will be formed at the time of death of that *deva*; see, “[Bhava and Jāti – States of Existence and Births Therein](#).”

- A human *bhava* can last thousands of years. On the other hand, a physical human body lasts only about 100 years. In between successive births with “human bodies”, the *gandhabba* (mental body) lives in what is called “*para loka*.” The *para loka* co-exists with our human *loka*, but we cannot see those fine mental bodies of *gandhabbas*; see, “[Micchā Diṭṭhi, Gandhabba, and Sotāpanna Stage](#).”
- It must be noted that all living beings have a mental body and it is called “*manomaya kāya*.” *Gandhabba* is a special case of a *manomaya kāya*; see #12 below.
- That human *gandhabba* will have to wait until a suitable womb becomes available. By “suitable” it means that the *gati* (loosely related to character/habits) of the *gandhabba* have to match those of the parents, especially the mother. *Gati* is an important concept in Buddha Dhamma that has been ignored for a long time; do a search for “*gati*” on the top right search box to find about “*gati*.” A starting post is, “[The Law of Attraction, Habits, Character \(Gati\), and Cravings \(Āsavas\)](#).”
- Anytime after the egg and sperm are merged to form the zygote, a “matching *gandhabba*” can descend to the womb. Now a new human life starts with a mental body and the seed for a physical body (zygote).

4. Therefore, the time of conception is very precise in Buddha Dhamma: It happens at the time when the lifeless zygote becomes “alive” with the merging of the *gandhabba*. **That is the time of conception and it happens very early, normally within a day after intercourse.**

- In *suttā*, this is called “*okkanthi*” (a *gandhabba* or a *paṭisandhi viññāṇa* descending to a womb); see, “[Gandhabba State – Evidence from Tipitaka](#).” When the baby is born that is *jāti*.
- The moral issues involving contraception and abortions are discussed in the post, “[Buddhist Explanations of Conception, Abortion, and Contraception](#).”

5. What happens in a womb (when an egg is fertilized with a sperm) is just to provide the “material basis” (zygote or the “first cell”) for the *gandhabba* to start a new “human being” that will eventually grow to become an adult with trillions of cells.

- The “blueprint” for that physical body (i.e., the *gandhabba*) was created at the dying moment in the previous life. The *gandhabba* brings his/her own *gati* as well as a set of *kamma vipāka* that would come into play during the existence of that human body.
- However, the physical body will also take into account the features of the mother and father via that zygote; see, #1 above.
- Therefore, the new baby will have a complex mixture of physical and mental characteristics of all three.
- All this is discussed in more detail in several posts, including “[Ghost in the Machine – Synonym for the Manomaya Kāya?](#),” “[Manomaya Kāya \(Gandhabba\) and the Physical Body](#)”, and a more technical description in “[Cuti-Paṭisandhi – An Abhidhamma Description](#).”

Connection to *Sakkāya Diṭṭhi*

6. I will take this opportunity to point out that it is only series of events that lead to a “new human being.” **That *gandhabba* which led to a new life arose due to a “*paṭisandhi viññāṇa*,” which is nothing other than a “packet of *kammic* energy” created in a previous life. Therefore, it was NOT an existing “living being” that “became the new human being.”**

- This is why the Buddha said there is no “self” traveling from life-to-life. Any living being just CREATES energy (*kammic* energy in terms of a *paṭisandhi viññāṇa*) to start a new “life form.”
- However, there is a “continuity of life” that was CAUSED in a previous life (when a strong *kamma* was done and this *paṭisandhi viññāṇa* was created). **Therefore, it is also not correct to say that a new life arises without a previous life making causes for it.** There is a causal connection between adjacent lives.
- If one can grasp this key point, that will help to remove *sakkāya diṭṭhi* (which is the key to the *Sotāpanna* stage).

7. There is no NEW living being and there has not been a FIXED living being (i.e., a “soul” or an “*atma*”) either. Life just moves from one existence to another based on what types of *paṭisandhi viññāṇa* have been created in the past!

- For example, one may be born many times with a human body while in the “human *bhava*,” but when the energy for that “human *bhava*” runs out, that lifestream gets hold of a new *bhava* (as a *brahma*, *deva*, animal, etc) which is the strongest *paṭisandhi viññāṇa*, i.e., the strongest *kamma* (good or bad) done in the past.
- If one is able to follow that “chain of past lives”, one will go through billions of past lives per minute, but will never be able to find a “beginning” life!
- According to the Buddha, life has no traceable beginning. “[WebLink: suttacentral: Gaddulabaddha Sutta \(SN 22.99\)](#)” is about how long the rebirth process. At the very beginning of the *sutta*: “*Anamataggoyam, bhikkhave, saṃsāro*” means “***bhikkhus*, there is no discernible beginning to**

the rebirth process.” This verse is in many *suttā* including all the *suttā* in the “[WebLink: suttacentral: Anamatagga Sāriyutta](#).”

A Mental Base (*Gandhabba*) and a Material Base (Cell)

8. A human life requires two basic components: a mental body (*gandhabba/paṭisandhi viññāṇa*) and a physical body (consisting of cells).

- A mental body or *gandhabba* (in different forms) has existed forever with any existing life-form, as explained in #6 and #7 above.
- The material body starts with a single cell created by the union of mother and father; that single cell (zygote) multiplies over time and the body of an adult has trillions of cells.

9. As I pointed out towards the end of the previous post, a cell is the basic building block of a live physical body. All living things (sentient beings and plants) are made of cells.

- **Each of these cells comes into existence from pre-existing cells! No new cells are produced individually.** This is a very important point.
- However, the first cells that appeared in the Earth were created by *kammic* energy (in *javana cittā*); I will discuss this below.
- **Therefore, both mental and physical components of a human life have origins in the MIND.**

10. Of course, there are many scientists today with the view that a “first cell” was created solely with inert matter early in Earth’s history, within a billion years of the formation of the Earth.

- This “first formation time” comes just from archeological studies. As new studies find fossilized cells going back to earlier rocks, the time it took to form the “first cell” has now been pushed back within 300 million years of the formation of the Earth!
- However, living cell is too complex to be formed via random combinations of inert molecules no matter how long a time is given. It not just forming complex molecules of DNA, **but those DNA strands have a built-in program for life**, just like a computer program.
- Random re-arrangement of inert molecules CANNOT lead to the formation of a “programmed cell.” More on that in the next post.

All Life on Earth is Made of Cells

11. All life that we see (whether sentient or not, i.e., whether have a mind or not) are made of cells. To be more precise, human and animal bodies — and plants — are made of cells.

- Some of them (plants) are not conscious, i.e., they do not have a mind.
- On the other hand, humans and animals are also made of cells, but they have a mind too.

12. So, we must realize that being alive and being conscious are two different things. Plants are alive but they cannot think: plant cells just mechanically perform “pre-programmed” functions. On the other hand, humans and animals are also made up of cells, but there is an additional entity associated with them: ***gandhabba* or the mental body!**

- (It must be noted that all living beings have a mental body, and it is called *manomaya kāya*. A *manomaya kāya* of a human or an animal is called a *gandhabba* because it can inhale aroma — *gandhabba* comes from “*gandha*” + “*abba*” or “taking in aroma or scents” —, and become dense; see, “[Manomaya Kāya and Out-of-Body Experience \(OBE\)](#)”).
- It is amazing to see that even plant cells are very active, buzzing with activity. All cells are programmed for various functions. Of course, different types of cells are programmed for carrying out different tasks.

This is an interesting topic that we do not want to get too much involved in, because that can be a real distraction to the main task of learning Dhamma and following the Noble Eightfold Path.

- However, having at least a rough idea about the complexities of life can be a motivation to learn more about Buddha Dhamma.

Complex Structure of a Cell

13. Here are two videos that explain the current status of understanding of cells. I will get to more relevant aspects in the next post.

[WebLink: youtube: Organelles of the Cell \(updated\)](#)

14. Energy for ALL cells come from Solar energy. Plant cells first convert Solar energy to forms of energy that can be used by animal cells. Therefore, plant cells play a major role in sustaining human and animal life!

[WebLink: youtube: Cells: Structure and Function](#)

5.2.3 Clarification of “Mental Body” and “Physical Body” – Different Types of “Kāya”

July 19, 2019; revised September 8, 2019

Introduction

1. There are words in Pāli that can have similar meanings. But one word may be better than another word in a particular situation. That is also true in English or any other language.

- In Buddha Dhamma, several Pāli words are used in different contexts regarding the “mental body.” They are *manomaya kāya*, *kammaja kāya*, *gandhabba*, and *paṭisandhi viññāṇa*. I will try to make things a bit clear in this post.
- We need to keep in mind that the mind is very complex, and living beings in different realms have different types of “mental bodies.” It is good to have a basic idea of these differences.

2. Most important here is to realize that these “mental bodies” are very different from the “physical bodies” we see in humans and animals.

- In particular, a *brahma* does not have a physical body at all. Then how can a *Brahma* see and hear without physical eyes and ears, and a brain to process those signals? These are questions that naturally arise in our minds. That is because we are not used to the concept of a “living being” without a solid body.
- The following discussion lays out a simple picture (with a few omissions to keep it more uncomplicated).

Mental Body and Physical Body

3. All living beings have a “mental body” (“*manomaya kāya*”). Living beings in some realms also have a “physical body” (*āhāraja kāya*).

- So, the very first thing we need to realize is that such a “*kāya*” is not the same as a “physical body” that we are used to, weighing tens of kilograms or hundreds of pounds. The Pāli word “*kāya*” means a **collection**. Even in English “body” sometimes implies a collection of parts. Some examples are, a “body of evidence” or “a body of water.” [*kāya* : (m.), a heap; a collection; the body.]
- “*Manomaya*” means “made by the mind.” Therefore, a *manomaya kāya* is a collection of very fine parts (*hadaya vatthu* and several *pasāda rūpa*) that are necessary for any living being. A *manomaya*

kāya arises out of *kammic* energy created in our thoughts (*citta*). *Abhidhamma* is even more specific and says that our *javana citta* generates this energy.

- **“*Kammaja kāya*” is the primary component of the *manomaya kāya*.** This is because it is the first *kāya* “created by *kammic* energy.”

4. Now we can look at the two words *kammaja kāya* and *āhāraja kāya*. Here each composite word is made from two parts: **The common component, in this case, is “*ja*,” which means “generated by” or “born due to.”**

- The collection of parts that arise due to *kammic* energy is “*kammaja kāya*.” This “*kāya*” or “body” is very fine. A whole “*kammaja kāya*” is a billion times smaller than an atom. **But as we will see, this “*kāya*” is the more powerful one.** That is where the seat of the mind (*hadaya vatthu*) and the five real sensing elements of “*pasāda rūpa*” are located.
- Those six elements are made of the smallest units of matter (*suddhaṭṭhaka*) in Buddha Dhamma.
- Therefore, a whole “*kammaja kāya*” is unimaginably small, by our standards. One would not be able to see one even with an electron microscope. As we see below, that is all a *brahma* has!

5. **“*Āhāra*” means “food,” and thus *āhāraja kāya* is the “collection of body parts” that grows via eating food.** In humans and animals, this is the “physical body” that we see.

- Therefore, an “*āhāraja kāya*” is a “collection of heavy components of a body” like the head, arms, legs, eyes, ears, etc. That is what we call the “physical body.” A physical body grows by using energy intake from the food we eat.
- For beings like us with solid physical bodies, the sensory signals are first received by the five physical senses (eyes, ears, nose, tongue, and body). Then the brain processes those signals and sends them to the *manomaya kāya*. The *manomaya kāya* senses those signals.
- **Eyes and ears, for example, do not actually see or hear.** Eyes and ears pass those signals to the brain. The brain processes those signals send them to the corresponding *pasāda rūpa* in the *manomaya kāya*; see, **“Brain – Interface between Mind and Body.”**
- In other words, for beings like us with physical bodies, the sensory signals received by the five physical senses (eyes, ears, nose, tongue, and body). Then processes those signals and send to the *manomaya kāya*. The *manomaya kāya* senses those signals.
- As we have discussed in recent posts in this series, a physical body (of a human or an animal) starts with a single cell called a zygote. The development of a complete human body, beginning with that one cell is another fascinating story. Scientists have no idea how that happens via a program that is in the DNA of that single cell. Who designed that program? See **“Origin of Life.”**

Beings in *Brahma* and *Deva* Realms

6. *Brahmā* do not have an *āhāraja kāya*, and just have the *kammaja kāya*. The *kammaja kāya* of a *brahma* has only a *hadaya vatthu* and TWO *pasāda rūpa* (*cakkhu* and *sota*) for seeing and hearing. Still, they can see and hear with that ultra-fine “body” without having any eyes or ears (and brains) like ours. **Of course, it is tough for us to imagine such a living being.**

- Therefore, a *brahma* with just a *manomaya kāya* has a mass less than that of an electron. We cannot see even a cell or an atom, let alone an electron. Now we can understand why we should not think of “*Brahma* bodies” in the same sense as a “solid body.”
- Those *Brahmā* cannot taste the food, smell odors, or touch things physically like we do. In other words, they do not have *ghāṇa*, *jivhā*, and *kāya pasāda rūpa*.
- By the way, *Brahmā* do not need food. *Kammic* energy sustains their lives. Only the *hadaya vatthu* and the two *pasāda rūpa* of *cakkhu pasāda* and *sota pasāda* need to be maintained.

7. *Devās* do have *āhāraja kāya*, but that is much finer, and we would not a *deva* if we come face-to-face with one.

- They have all five physical senses. Their food is just a drink called “*amurta*.” That is probably not the correct Pāli word, but that is the Sinhala — and probably Sanskrit — name for it.
- Therefore, we need to be careful not to carry over our perceptions of “heavy bodies” to bodies of other beings in other realms. Millions of *devas* and *Brahmā* were present to hear the first discourse by the Buddha, according to the *Vinaya Piṭaka*. However, those five ascetics probably did not even realize that at that time.

What is *Gandhabba*?

8. A human (or an animal) has a both a *manomaya kāya* and a *āhāraja kāya*. But the *manomaya kāya* of a human has a special name of *gandhabba* due to the following reason.

- A human *bhava* starts with the generation of a *manomaya kāya* (or *kammaja kāya*) by *kammic* energy. For example, if an animal dies and gets a human *bhava* (which is extremely rare), a human *manomaya kāya* will come out of that dead animal. If a *deva* dies and gets a human *bhava*, a human *manomaya kāya* will appear in the human realm.
- That human *manomaya kāya* has a *hadaya vatthu* and five *pasāda rūpa* as mentioned above. However, it has the ability to absorb aroma (scents from plants and even food), and to get a bit denser (unlike a *brahma*). Thus the name *gandhabba* (“*gandha*” + “*abba*” or “inhaling aroma”) for the *manomaya kāya* of a human (or an animal).
- Therefore, the name *gandhabba* is used only for the *manomaya kāya* of humans and animals.
- Normal humans cannot see that relatively dense “body” of a *gandhabba*. They are in the “*para loka*” (which is within the human realm).

What is the Connection of *Gandhabba* to *Paṭisandhi Viññāṇa*?

9. Another phrase used in some *suttā* to indicate a *manomaya kāya* of a human or animal (i.e., a *gandhabba*) is *paṭisandhi viññāṇa*.

- As we had discussed before, a human *gandhabba* could live for thousands of years until the end of that human existence of “human *bhava*.” During that time, it can give rise to many “human lives” (*jāti*) with different physical bodies.
- For example, suppose one of those human *jāti* ends. At that moment, the *gandhabba* comes out of the dead body and waits for another “matching womb.” (*Gati* of the *gandhabba* has to match those of the parents, especially the mother). When a matching womb becomes available, *gandhabba* is drawn to that womb. That is described in the post, “[Buddhist Explanations of Conception, Abortion, and Contraception](#).”
- The [WebLink: suttacentral: Mahā Tanhāsaṅkhaya Sutta \(Majjhima Nikāya 38\)](#), describes that as “descending of the *gandhabba* to the womb.” [WebLink: suttacentral: The Mahā Nidana Sutta \(Dīgha Nikāya 15\)](#) it is stated as “*paṭisandhi viññāṇa* descending to the womb.” That is because a *paṭisandhi viññāṇa* created that *gandhabba*. That is discussed in detail in the post, “[Gandhabba State – Evidence from Tipitaka](#).”

The Physical Body Shields *Manomaya Kāya* of Humans and Animals

10. A question may have come up in the mind of some readers. Why cannot a *gandhabba* in a human physical body directly sense the outside world without the help of the five physical senses (eyes, ears, etc), if the *brahmā* can do that?

- The dense physical body shields the *manomaya kāya* of the *gandhabba*. As long as the *gandhabba* is inside the physical body, it is unable to get those “sense inputs” directly. Those sensory inputs come through our “sense doors”, eyes, ears, nose, tongue, and the body. The brain processes those signal and transmit them to the *gandhabba* (*manomaya kāya*). See, “[Brain – Interface between Mind and Body](#).”
- We can compare this situation to a human operator inside an enclosed military tank. That operator cannot see or hear anything outside. Audio and video equipment mounted on the tank sends those signals to an on-board computer, which analyzes and displays them for the operator.
- In that analogy, video camera and audio equipment mounted on the tank act like the eyes and ears of a human. The computer is like the brain. Without getting those signals, the operator is totally blind and deaf to the outside world. In the same way, the *manomaya kāya* cannot receive those sense inputs if the eyes are ears are damaged.
- A detailed discussion at: “[Our Mental Body – Gandhabba](#).”

11. But that *manomaya kāya* can be “kicked out of the physical body” in a traumatic situation, mostly in cases of heart operations; such claims are categorized as “out-of-body experiences” (OBE). In such cases, some patients have reported being able to see doctors perform operations on their own bodies from the ceiling (with their *manomaya kāya*).

- It may also happen to people whom the doctors thought had died, but “come back to life” within a short time. They report being able to travel with their *manomaya kāya*. Such cases are “near-death experiences” (NDE).
- Some others report being able to do “astral travel” with their *manomaya kāya* whenever they like, see, “[WebLink: wikipedia.org: Astral projection](#).” At least some reports in this category seem to be valid. Reports of OBE and NDE are more trustworthy, because doctors and nurses confirm the accounts of those patients.
- These are discussed in the post, “[Manomaya Kāya and Out-of-Body Experience \(OBE\)](#).”

5.2.4 Four Types of Births in Buddhism

July 30, 2022 (revised #11, #12 same day); revised #3, #9 on Aug. 1, 2022

Buddha explained that there are four types of births: *jalābuja* (womb), *aṇḍaja* (egg), *saṃsedaja* (chemical), and *opapātika* (spontaneous). However, the other three types depend on an *opapātika* birth first occurring at the *cuti-paṭisandhi* moment. [*jalābuja* : [adj.] born in a placenta; viviparous. *aṇḍaja* : [adj.] oviparous; born of an egg. (m.) a bird; a serpent. *saṃsedaja* : [adj.] born from moisture. *opapātika* : [adj.] arisen without visible cause; born spontaneously.]

Introduction

1. There are several *suttas* where the Buddha explained the four types of births: *aṇḍaja*, *jalābuja*, *saṃsedaja*, and *opapātika*. For example, in “[WebLink: suttacentral: Mahāsīhanāda Sutta \(MN 12\)](#).” the Buddha explains, “*Catasso kho imā, sārīputta, yoniyo—Aṇḍajā yoni, jalābujā yoni, saṃsedajā yoni, opapātikā yoni.*” That means “**Sārīputta, there are four kinds of births—Born from an egg, from a womb, from chemical composition, or spontaneously.**”

- It is a good idea to read the English translation there, even if not perfect, to get an idea of not only the four types of birth but also about births in various realms, including the four lowest realms. One could start at, “Sārīputta, there are these four kinds of reproduction. What four?”

Spontaneous (*Opapātika*) Birth Is the “Seed” for the Other Three Types of Birth

2. Let us briefly discuss the four types of births listed above. As we will see below, the spontaneous or *opapātika* birth must occur first for the other three types to proceed (in situations where one or more of those three types come into play.) **Those three types of births are predominant only in the human and animal realms.**

- **In the six *Deva* and twenty *Brahma* realms, only *opapātika* births take place.** *Devas* and *Brahmas* are born in their “final form” spontaneously. They live their whole lives (ranging from millions to billions of years) in that form. Of course, they have subtle “energy bodies” that are invisible to us.
- When a human existence (*bhava*) is grasped at the *paṭisandhi* moment (after leaving previous existence in one of the 31 realms), *kammic* energy creates a *gandhabba/manomaya kāya* first via an *opapātika* birth. A *gandhabba* also has an invisible “energy body” (like *Devas* and *Brahmas*) with a *hadaya vatthu* and five *pasāda rūpa*. That *gandhabba* MAY NOT be born with a physical body of a human (with a *jalābuja* birth) for years after that.
- As explained in the post, “[Bhava and Jāti – States of Existence and Births Therein](#)” a human *gandhabba*’s lifetime could be many thousands of years. That *gandhabba* may be born with a physical human body many times during that lifetime. Many “rebirth accounts” by children worldwide confirm that rebirths with human bodies happen with gaps of several years between consecutive births. Those are consecutive “womb-born” (*jalābuja*) births for a single human *gandhabba*. On the other hand, getting another human *bhava* is extremely rare; see “[How the Buddha Described the Chance of Rebirth in the Human Realm](#).”

Births With Physical Human Bodies Are “*Jalābuja*” Births

3. Any birth among the 31 realms occurs due to a *kamma vipāka*. The first step is to be “born into a certain *bhava*,” for example, “human *bhava*” or *Deva bhava*. But there is a crucial difference between what happens next in those two cases.

- A fully-formed *Deva* is born with an *opapātika* birth and will live through the whole life in that *Deva* realm.
- Similarly, only the subtle (and invisible) *manomaya kāya* of a *gandhabba* is born when a human *bhava* is grasped with an *opapātika* birth. But that will be followed by a *jalābuja* birth at some point. That *gandhabba* is pulled into a mother’s womb when a “matching womb” becomes available. Then a human baby will be born with a physical body after nine months. Such a birth belongs to the “*jalābuja*” type of 31 above.
- A human with a physical body lives in “this world (*ayam loka*),” and that same human in the absence of a physical body lives in the “other world (*para loka*).” Thus, until the end of the human *bhava*, many “back and forth” between the “two worlds” occur. See “[Gandhabba Sensing the World – With and Without a Physical Body](#).”
- Let us summarize for clarity.

Devas/Brahmas Have Only *Opapātika* Births, Humans Have *Opapātika* and *Jalābuja* Births

4. Any *Deva* or a *Brahma* has only the *opapātika* birth (i.e., one *jāti* per *bhava*.)

- On the other hand, to be born with a physical human body like ours, there must be two stages. First, a human *gandhabba* is born in an *opapātika* birth (in the “*upādāna paccayā bhava*” step in *Paṭicca Samuppāda*.) Then that *gandhabba* gets into a mother’s womb and will be born a human baby nine months later. That second birth is a *jalābuja* birth or “birth from a womb” with “breaking out of the amniotic sac.” As mentioned above, there can be many *jalābuja* births for a human *gandhabba*. These are the “*bhava paccayā jātī*” in *Paṭicca Samuppāda*.

- That explains many rebirth accounts. The Buddha emphasized that it is extremely rare to be born human; see.”[How the Buddha Described the Chance of Rebirth in the Human Realm.](#)” Does that mean there is a contradiction with rebirth accounts? No.
- It is extremely rare to be born in the human realm as a human *gandhabba* with an *opapātika* birth. But once becoming a human *gandhabba*, there can be many births with different physical bodies (*jalābujā* birth). A physical human body dies in about 100 years. But that is not the end of the human *bhava*. The human *gandhabba* comes out of the dead body and can be reborn with a different body. There was a good discussion on a fascinating rebirth account at the forum that could be informative: “[WebLink: suttacentral: PureDhamma Forums: Rebirth Account of Dorothy Eady.](#)”

Animal Realm Has All Four Types of Births

5. For an animal, the first *opapātika* birth produces an animal *gandhabba*. Then, one of the remaining three modes can apply to give birth to an animal with a physical body that we can see.

- Some animal *gandhabbā* are born with physical bodies via womb-births (*jalābujā*) like humans. Some examples are monkeys, lions, deer, etc.
- Chicken, birds, etc., are born from an egg (*aṇḍajā* birth). Here, for example, a “chicken *gandhabba*” will be drawn into an egg growing inside a chicken. After the chicken lays eggs, those eggs will hatch, and chicks will come out.
- The last mode of *samsedaja* is rare for big animals and applies primarily to microscopic animals. Here the required “chemical base” for the *gandhabba* evolves naturally in rotten meat or leaves. This type of birth has not been confirmed by science yet.
- Note that in all those cases, a “seed” (*manomaya kāya/gandhabba*) must have been first produced by *kammic* energy, just like in the case of a human.

6. Let us discuss an animal’s birth for clarification.

- For example, a fly lives in a physical body only for a few weeks before dying. However, that “fly existence” (*bhava*) may last thousands/millions of years. When a fly dies, its *manomaya kāya/gandhabba* will come out and wait until getting into another “fly egg.” It will be reborn countless times as a fly with wings (of course, the “fly *gandhabba*” will be invisible, just like a “human *gandhabba*.”) That is an “egg-born” (*aṇḍaja*) birth.
- Many animals, especially small ones, have lifetimes much shorter than humans. But their “animal *bhava*” can be millions of years long. Regardless of which of the three types of births is followed by an *opapātika* birth of an animal, there will be many “births with physical bodies” for that “animal *gandhabba*.” That is why it is critical to understand that there can be many *jātis* within a *bhava* for humans and animals. See “[Jāti – Different Types of Births.](#)”

Current Confusion About “When a Baby Becomes Conscious/Human”

7. We see a lot of confusion these days about “when a baby can be called human”?

- These days in the US, there are many “theories/speculations” about when a baby becomes “fully conscious.” Then that evolves into arguments about “a baby not being human” up to a few days, a few months, or even at birth. Some even speculate that since a child cannot “think rationally” until at least a couple of years of age, they may not be “human.” That is ridiculous!
- With that argument, a person in sleep or under anesthesia can be categorized as a “non-person” because they are unconscious! That would mean killing a person while in sleep, under anesthesia, in a vegetative state due to brain damage, etc., would be legal!
- I have discussed situations where people in vegetative states fully recovered; see “[Persistent Vegetative State – Buddhist View.](#)” Further details in “[Brain and the Gandhabba.](#)”

8. A zygote in a womb becomes human as soon as a *gandhabba* merges with it!

- See “[Buddhist Explanations of Conception, Abortion, and Contraception](#)”
- It does not matter whether people can make ridiculous arguments like those in #7. Aborting a baby anytime after conception is a *pāṇātipātā* or “taking a life,” not just any life, but a human life!

The Physical Human Body Is Just a Shell – *Gandhabba* Makes It Alive

9. Recent accounts of Near-Death Experiences (NDE) show that human life is much more complex than many believe. A physical body without a *gandhabba* inside is lifeless.

- NDE accounts confirm that the physical body shows no sign of life (heartbeat, pulse, brain activity, etc.) for many minutes. The startling fact is that during that time, that person had been watching the whole situation from the ceiling of the hospital room!
- A *gandhabba* can see without “physical eyes” while outside a physical body. This critical point has been illustrated in the following video. The woman had never experienced vision (due to her physical eyes being damaged), and she could see for the first time in her life when she had an NDE. The ability to see goes away after the NDE experience once the *gandhabba* goes inside the physical body.

[WebLink: youtube: Near Death Experience - Blind woman 'sees' while out of body](#)

- Details: “[Near-Death Experiences \(NDE\): Brain Is Not the Mind.](#)”

Scientific Consensus – Life Begins With a Zygote

10. Most scientists agree that human life begins at conception, i.e., fertilization or the “joining of an egg and a sperm” to produce a zygote.

- See, for example, “[WebLink: PDF Download: Embryonic Human Persons-2009](#)” and “[WebLink: PDF Download: Personhood status of the human zygote, -2017.](#)”
- That position is close to the Buddhist position.
- The only difference is that, in Buddha Dhamma, a human *gandhabba* must merge with a zygote for that zygote to become alive. **A zygote by itself is inert, just like an egg or a sperm.**

11. We don’t need scientific evidence to realize that a fetus inside a womb is alive. How can anyone watching the following videos say that a baby growing inside a womb is not alive?

[WebLink: youtube: Is an Embryo a Person? | When Does Life Begin?](#)

[WebLink: youtube: Fetal Development Week by Week Overview](#)

- The following additional information may be helpful to some readers.

Javana Power in *Kamma Viññāṇa* Responsible for All Births

11. As discussed above, any type of birth starts with an *opapātika* birth. Furthermore, the subtle *manomaya kāya* produced by *kammic* energy is unimaginably “small.” We can consider an analogy to get an idea. If you take a drop of water and put it on a hot pan, it will vaporize instantly, and you will barely see a plume of water vapor. Now, imagine that drop of water to be a million-fold smaller. That is an analogy of the “size” of the *manomaya kāya*. That is why scientists cannot detect any change in the zygote when a *gandhabba* merges with a zygote at conception.

- When a baby grows inside a womb, food to grow the baby’s physical body comes from the mother through the umbilical cord. As that physical body grows, the *manomaya kāya/gandhabba* expands (like that plume of water vapor) to spread throughout the physical body.

- Several posts have explained that the all-important sensing elements (*hadaya vatthu* and five *pasāda rūpa*) are in that invisible *gandhabba kāya*. See “[Brain and the Gandhabba](#).”

12. It is a good idea to make the connection to *Paṭicca Samuppāda* as well.

- The *uppatti Paṭicca Samuppāda* starts with “*avijjā paccayā saṅkhāra*” and ends with “*upādāna paccayā bhava*” and “*bhava paccayā jāti*.” The “*upādāna paccayā bhava*” step is where a new *opapātika* birth takes place. (Then, the “*bhava paccayā jāti*” step leads to a *jalābujā* birth for a human; for an animal, it could be any of the *aṇḍajā*, *jalābujā*, or *samsedaja* birth, depending on the type of animal.)
- The steps “*avijjā paccayā (abhi)saṅkhāra*” through “*(kamma)viññāṇa paccayā nāmarūpa*” steps MUST produce energy to create the *manomaya kāya* associated with the *opapātika* birth. That energy is the *javana* power in *kamma viññāṇa*! See “[Javana of a Citta – The Root of Mental Power](#).”
- It is, in fact, in the key step of “*(kamma)viññāṇa paccayā nāmarūpa*” that the mind “combines *nāma* and *rūpa*” to generate *kammic* energy for future *salāyatana* (i.e., sensing elements) in *manomaya kāya* of future *opapātika* births. That is a subtle point. See “[Viññāṇa Paccayā Nāmarūpa](#).”

5.2.5 Buddhist Explanations of Conception, Abortion, and Contraception

Revised with a new title: November 10, 2018; revised November 14, 2018 (rewritten and replaces What does Buddha Dhamma (Buddhism) say about Birth Control?); revised January 5, 2020; revised #8 on December 28, 2020

Introduction

This completely revised post is necessary to continue our discussion on *Paṭicca Samuppāda*: “[Paṭicca Samuppāda – Not ‘Self’ or ‘No-Self’](#).”

1. Buddhist explanation of conception is in several *Tiṭṭaka suttā*. Following is a simple account based on those *suttā*. It is compatible with modern science but provides more details than science.

- **Moral issues regarding abortion and birth control have clear answers in Buddha Dhamma. In particular, at what stage of pregnancy does a human life first appear in a womb?**
- Modern science cannot determine the “time of conception” or “when a human life starts in a womb.”
- Let us first review the current scientific knowledge base.

Current Scientific Knowledge

2. First of all, there must be a fertilized egg (zygote) in the womb. The fertilization happens when a sperm from the father combines with an egg from the mother to form a zygote or a fertilized egg.

- During the mother’s menstrual cycle, one **egg (ovum)** is usually released from one of the ovaries and swept into the funnel-shaped end of one of the fallopian tubes.
- After intercourse with the father, If a **sperm** penetrates the egg there, fertilization results, and the **fertilized egg (zygote)** moves down the fallopian tube toward the uterus.
- The “live zygote” enters the uterus in 3 to 5 days. In the womb, the cells continue to divide, becoming a hollow ball of cells called a **blastocyst**. Inside the womb, the blastocyst implants in the wall of the uterus, where it develops into an **embryo** attached to the placenta and surrounded by fluid-filled membranes.
- See, “[WebLink: merckmanuals.com: Stages of Development of the Fetus](#).”

3. It is important to note that science does not have an answer to the question of why all zygotes do not result in pregnancies, and why some couples who could not have babies for many years all of a sudden have success.

- Science cannot explain how an inert zygote (a cell) becomes “alive” and a living baby comes out of the womb.
- Furthermore, science cannot say WHEN that inert cell, the zygote, becomes alive. Some say a live baby is there as soon as a zygote is formed, and others say there is no life there until a heartbeat can be seen.
- For more details on the controversy on the “time of conception” see, “[WebLink: wikipedia.org: Beginning of pregnancy controversy.](http://wikipedia.org:Beginning_of_pregnancy_controversy)”

Buddhist Explanation – Mind is in the “Mental Body” or *Manomaya Kāya*

4. We humans have two “bodies.” *Manomaya kāya* is the “mental body” (with a trace of matter) born at the beginning of the human existence or human *bhava*.

- Here is “body” means a “collection.” The physical body is a collection of “physical body parts.” The mental body has only a trace of matter and is a collection of “mental parts” (*vedanā*, *saññā*, *Saṅkhāra*, and *viññāṇa*.) For details, see “[Human Life – A Mental Base \(Gandhabba\) and a Material Base \(Cell\)](#)” and “[Clarification of “Mental Body” and “Physical Body” – Different Types of ‘Kāya’.](#)” Those two were posted earlier in this series of posts.
- The mental body is referred to as “*gandhabba*” in the Tipiṭaka. See, “[Gandhabba State – Evidence from Tipitika.](#)” However, for the current discussion, we do not need details on the *gandhabba*.
- Thus, a “human *gandhabba*” has only a trace of matter, and thus, we cannot see it. Some *suttā* refer to the *gandhabba* state as “*paṭisandhi viññāṇa*.” See, “[Gandhabba State – Evidence from Tipitika.](#)”

A Human Existence Can Last Thousands of Years

5. A human existence (*bhava*) can last thousands of years, and that is the lifetime of the *gandhabba* or the mental body.

- On the other hand, a physical human body lasts only about 100 years. With the death of the physical body, the *gandhabba* comes out and waits for another womb. Thus, there can be many births (*jāti*) as a human within a given human existence (*bhava*). See, “[Bhava and Jāti – States of Existence and Births Therein.](#)”
- In between successive births with “human bodies,” the *gandhabba* (mental “body”) lives in the “*para loka*.” The *para loka* co-exists with our human *loka*, but we cannot see those subtle “mental bodies” of *gandhabbas*.

6. A new human existence (*bhava*) does not start in a womb. It begins at the *cuti-paṭisandhi* moment when the previous *bhava* comes to an end. For example, if a *deva* dies and becomes a human, a human *gandhabba* (fine “mental body”) will be formed at the time of death of that *deva*.

- Then that human *gandhabba* will have to wait until a suitable womb becomes available. By “suitable,” it means that the *gati* (loosely related to character/habits) of the *gandhabba* have to match those of the parents, especially the mother.
- *Gati* is an essential concept in Buddha Dhamma. But it is absent in modern texts. Search “*gati*” on the top right search box to find about “*gati*.” I have discussed *Tipiṭaka* references in several posts. See, “[The Law of Attraction, Habits, Character \(Gati\), and Cravings \(Āsava\)](#)” and references therein.

A Zygote Becomes Alive When a *Gandhabba* Takes Possession of It

7. With the above background, now we can make the connection to current scientific understanding and extend that understanding. As science has shown, human life arises with a single cell called a zygote; see #2 and #3 above.

- A *gandhabba* may have to wait for even many years until a suitable womb becomes available. Then, *kammic* energy will pull it into that womb. And the *gandhabba* will merge with the zygote in the womb that was created by a sperm fertilizing an egg.
- A *gandhabba* entering a womb is sometimes referred to as “*paṭisandhi viññāṇa* descending to a womb” as stated in the *Mahā Nidāna Sutta* (DN 15.) In the *Mahā Taṇhāsankhaya Sutta* (MN 38) it is stated as, “a *gandhabba* descending to a womb.”
- As we saw above, Nature automatically matches the “*gati*” the parents (we can say that matching the zygote that was formed by the union of the mother and father), and a “matching” *gandhabba* will be “pulled in” by the *kammic* energy.
- However, the *gandhabba* concept is different from the idea of a “soul.” A *gandhabba* will keep changing during its lifetime. Furthermore, it will make a drastic change when the lifetime of the human *bhava* comes to an end. At that time, it can become an animal, a Deva, a Brahma, etc.

8. Therefore, a zygote just provides the “material basis” (zygote) for the *gandhabba* to form a physical body. (That zygote develops when an egg combines with a sperm.)

- The “blueprint” for that physical body (i.e., the *gandhabba*) is in the *paṭisandhi viññāṇa*. However, the physical body will also take into account the features of the mother and father via that zygote; see #3 and #4 above.
- If the mother (and father) are unable to have a child due to a previous *kamma vipāka*, the resulting zygote will be a “dud.” Thus no *gandhabba* can “descend to the womb,” i.e., pregnancy is not possible.
- All this is discussed in more detail in several posts, including “[Ghost in the Machine – Synonym for the Manomaya Kāya?](#),” “[Manomaya Kāya \(Gandhabba\) and the Physical Body](#),” and a more technical description in “[Cutī-Patisandhi – An Abhidhamma Description](#).”
- Once a *gandhabba* takes possession of a zygote that zygote grows into a baby in the mother’s womb via several steps (consistent with current science.) Those stages are listed in the “[WebLink: suttacentral: Indaka Sutta \(SN 10.1\)](#)”

The ‘Time of Conception’ is Precise

9. A *gandhabba* can take hold of that fertilized egg (zygote) any time after its formed.

- Therefore, the conception of a new baby happens when the life-less zygote becomes “alive” with the merging of the *gandhabba*. **That is the time of conception, and it happens very early, generally within a day after intercourse.**
- Once a *gandhabba* merges with the zygote, the cells of the zygote start repeatedly dividing as the zygote moves down the fallopian tube. **Thus cell division and the formation of a baby DOES NOT start unless and until a *gandhabba* merges with the zygote.**

Effects of Condoms/Birth Control Pills

10. Now let us see what happens with a condom or with birth control pills.

- With the use of a condom, an egg will not be able to come to contact with a sperm to form a zygote. Thus there will be no “material basis” or a zygote in the womb.
- If the mother is taking birth control pills, again, that will prevent the formation of a zygote for a *gandhabba* to start a new life.
- **Thus it is clear that there are no moral issues involved in either of those two cases. Terminating a life does not happen in either case.**

If a *Gandhabba* Is in the Womb, There Is a Human There

11. On the other hand, once a *gandhabba* “is in the womb,” then there is a living being in the womb.

- **Any procedure to remove the live *gandhabba* after this “real conception” is equivalent to killing a human. The exact time of the removal procedure does not matter. It could be a month before the birth of the baby or just a day after the *gandhabba* came into the womb.**
- The only uncertainty about the “time of conception” is a few days. Conception happens when the *gandhabba* takes hold of the zygote. That could happen immediately after intercourse or a few days after sex.
- Thus Buddha Dhamma provides an unambiguous picture of the moral issues involved in the birth control process.

Other Aspects

12. The death of a physical body of a human does not mean its existence as a human has ended. If there is remaining “*kammic* energy” for the human *bhava* left, the mental body (*gandhabba*) will come of the dead physical body and will wait for another suitable womb.

- However, if the “*kammic* energy for the present human *bhava*” is exhausted at the time of death, then the transition to the next “*bhava*” or existence happens at the dying moment. If that new existence is that of a cat, a “cat *gandhabba*” will leave the dead body.
- Here again, the “cat *gandhabba*” will have to wait until a suitable “cat womb” becomes available. At that time it will go into the womb of the “cat mother.” And a baby cat will be born later on.
- However, except for humans and animals, a *gandhabba* is not involved in most other realms. That is true, for example, in *Deva* and *Brahma* realms.

13. Sometimes the child may have different “*gati*” compared to the parents. For example, a “fairly moral” couple may have a child with violent character qualities. That could be due to a drastic change in the mindset of the mother during that “conception window.” (Between the formation of the zygote and a *gandhabba* “descending” to the womb.) Violent rape is one possibility.

- Furthermore, this is also why mothers who could not get pregnant for years, suddenly get pregnant. This happens during a time when the mother most likely has a “personality shift” or a significant change in her mental state.

Cloning – A Detailed Analysis

14. I have revised and updated another relevant post, “[Cloning and Gandhabba](#).”

- More details on the formation of the zygote are discussed there, before the discussion on cloning.
- We will make the connection to *Paṭicca Samuppāda* in the next post.

5.2.6 Cloning and Gandhabba

March 5, 2018; revised January 5, 2020; January 8, 2020

Introduction – Cloning of Dolly the Sheep

1. Cloning of various types of animals has become common since Dolly was cloned in 1996. Three sheep contributed to the birth of Dolly. One provided the egg, another the DNA (donor), and a third (surrogate mother) carried the cloned embryo to term.

- Obviously, a clone has most similarities with the donor and there is no “father” involved (no sperm is needed). Are these consistent with the Buddha Dhamma, and how does a *gandhabba* play a role?

- Also, there are some myths associated with cloning, such as whether “totally unexpected creatures or monsters” can result from cloning.
- Therefore, it is good to review the key steps in the cloning process and to clarify these issues.

What Happens in a Normal Conception?

2. But, first, we need to look at what happens in a “normal conception” where an egg and a sperm combine to form the unique cell called a zygote. This was explained in the post, “[Buddhist Explanations of Conception, Abortion, and Contraception](#).” Here, we will first extend that discussion.

- The “material base” for a new life is a zygote. In a natural conception, the zygote is formed by the fertilization of a female egg by a sperm from a male. Then a *gandhabba* can come into the womb and provide the “mental basis” for the new life, as explained in the above post.
- There are two things REQUIRED to make a zygote. **The first requirement** is the egg that comes from the mother and is unique. However, eggs have only 23 chromosomes instead of 46 chromosomes in all other cells. Therefore, **the second requirement** is to somehow have 46 chromosomes in the nucleus of an egg.
- Let us discuss the two factors in a bit more detail since this was not discussed in the previous post.

An Egg Is Unique

3. Eggs are the most remarkable of cells. They can give rise to a completely new individual within a matter of days or weeks in some animals. No other cell in a higher animal has this ability. Egg cells also contain many mitochondria which supply the energy required for cell replication and division.

- However, an egg must be “activated” first in order to start the cell division process. It is activated only when its nucleus has a full complement of 46 chromosomes or 23 pairs.
- You can read more about the role of the egg at, “[WebLink: discovermagazine.com: How Does a Single Cell Become a Whole Body?](#).”

Activation of the Egg by the Presence of 46 Chromosomes

4. Now, to the second factor. Most cells in a body have **23 pairs** of chromosomes, **for a total of 46**. The egg and sperm are different. **Each egg and each sperm has only one set of 23 chromosomes, not a pair.**

- When fertilization occurs in normal conception, the 23 chromosomes from the egg combine with the 23 from the sperm to create a zygote or a *fertilized egg* with the full complement of **23 pairs** of chromosomes. This is shown in the following diagram (**Fertilization**. Zygote is egg plus sperm genetically different individuals. Fusion of two haploid gametes to form a diploid zygote):

- In this case of normal conception, those two nuclei from mother and father will combine to form a single nucleus in the yellow cell (egg), which is now the zygote.
- So, we see that in normal conception, the nucleus of the zygote — or the result of the merger of the egg with the sperm — will be a cell with a nucleus that has half chromosomes from the mother and the other half from the father. Thus, DNA from mother and father BOTH contribute to the zygote in normal conception. This is why the baby will have bodily features from both parents (a mix).

Science Cannot Explain Why Some Zygotes Are “Duds”

5. When the above process is complete, the egg becomes a zygote. At this point, the cell division is supposed to activate. However, some zygotes do not activate and thus do not lead to a fetus or a baby.
 - Scientists do not know why the zygotes formed by the union of some couples do not lead to cell division, i.e., why certain couples cannot have babies.

It Is a *Gandhabba* That “Activates” the Zygote!

6. The only difference in Buddha Dhamma is that the cell division starts ONLY IF (and when) a *gandhabba* descends to the womb and merges with that zygote.
 - A new animal or human life cannot be initiated without a *gandhabba* (or the “mental body” or “*manomaya kāya*.”)
 - In the case of a natural conception, the matching *gandhabba* (or *paṭisandhi viññāṇa*) will descend to the womb and will be merged with that fertilized egg to complete the conception. However, if a previous *kamma vipāka* for the mother and father does not allow a conception, a *gandhabba* WILL NOT be drawn into the womb.
 - Otherwise, a matching *gandhabba* with *gati* that are a mix of *gati* of mother and father will be drawn into the womb. That is why a child is likely to have *gati* which are a mix of the two parents. That is in addition to having physical features of the parents.

A *Gandhabba* (Mental Body) Makes the Zygote Alive

7. Without the “mental component” or the *gandhabba*, there is no life! A zygote is an inert cell and has no “sentient life.” The zygote that results from the merger of the egg and the sperm is just the “material base” and not a “new life.”
 - It is only when the *gandhabba* descends to the womb and takes possession of that zygote that it “becomes alive.”

The Procedure of Cloning Versus Natural Conception

8. **The zygote formation is different in cloning compared to the natural conception.** In the case of cloning, a sperm from a father is not involved.

- Here the nucleus of the egg is REMOVED, and the nucleus of the “donor cell” with the full set of 46 chromosomes is INSERTED in the egg. That is the key difference in cloning. So, now the nucleus of the egg has the full set of chromosomes needed to start cell division. The basic process involved in **cloning** is nicely represented by the following diagram:

9. However, it seems that is not enough to initiate the cell division. An electric shock is required to activate the process (i.e., to initiate cell division of this artificially created zygote.) This is the second difference compared to the natural process.

- Therefore, the artificially modified egg is placed in the womb of the surrogate mother, and an electrical shock is applied to start the cell division.
- The above figure is from the article, **“20 years after Dolly: Everything you always wanted to know about the cloned sheep and what came next.”** You may want to read that article too.

A Gandhabba Is Still Needed in Cloning

10. Even though that is the whole picture according to science, Buddha Dhamma says, there **MUST** be a *gandhabba* merging with that cell in order to “give it life.”

- **Just like in the case of natural conception we discussed above, there is no “new life” created with cloning. It just created a suitable “temporary home” for the *gandhabba*.**
- When that physical body dies, the *gandhabba* would come out and wait for another womb to be ready. Dolly has now died and it is possible that she was reborn as another sheep somewhere.

Genetic Material Is From One Cell in Cloning

11. The main thing from the above figure in #8 on cloning for our discussion is that the **yellow cell is the egg from the mother. The other cell on the top is from the “donor.”** It is not sperm but any kind of cell. No sperm is in the picture. Instead of half the genetic material coming from sperm and half from an egg, it all comes from a single cell.

- **The unique feature of the egg** from the mother is that it allows the growth of a whole animal (**with many body parts for doing very different things**) **just starting with that single cell.**
- However, the egg needs to have a full set of 46 chromosomes to form the zygote. In cloning, the whole set comes from the “donor” as shown in the above figure. In a natural conception, half of the

chromosomes come from the mother (egg), and the other half comes from the father (sperm), as shown in the figure above in #4.

- When an egg starts cell division, it splits — first into 2, then 4, then 8, 16, 32, 64, and so on — it is not merely splitting. It is a complex process that produces descendant cells with a huge variety of shapes and functions: bone cells, nerve cells, red and white blood cells; the cells of the eyes, fingernails, stomach, skin, etc.

More Information From Scientific Studies

12. Now, in the case of cloning, the following should be clear, according to science:

- The mother that provides the egg, provides the all-important platform for cell division that leads to the formation of the new offspring.
- However, 99% of the DNA comes from the donor. Therefore, the physical resemblance of the offspring would be to the donor, as is the case with Dolly the sheep.
- The surrogate mother who carries the embryo to term would provide no real contribution to the physical appearance of the offspring, according to science.

No “Monsters” Will be Created With Cloning

13. Studies done over the past 20 years with different types of animals show that:

- Some people are afraid that cloning can lead to unexpected outcomes like “creating monsters.” However, from the above discussion, it is clear that monstrous creatures **cannot** be expected to form due to cloning. This is because the source of DNA is the donor. **Therefore, the clone will look like the donor.**
- It is not possible to clone an animal that is identical to the donor. Even if they look similar, their character traits are different.
- The success rate is low, around 10%.
- Those are observations from the cloning studies over the past 20 years. They are consistent with our picture of the *gandhabba* having *gati* close to that of the donor. No two animals can be the same. In the case of natural birth, *gandhabba*’s *gati* will be close to those of both parents.

Additional Points From Buddha Dhamma

14. That is pretty much the picture in Buddha Dhamma too, but with the following exceptions:

- All three involved in the cloning process would contribute to some extent to the “mental qualities” in selecting a matching *gandhabba* (which happens automatically.) However, the major contribution is likely to come from the donor.
- Of course, we can only make a guess, since the Buddha never had to explain this particular case. The Buddha specifically mentioned that the “mental state of the mother” at the time of *gandhabba* descending to the womb is a factor. This is why even the most moral mother may, in a few cases, end up with a baby who turns out to have immoral *gati*.
- Therefore, the surrogate mother — within whose womb the actual descending of the *gandhabba* would occur — could play some minor role in determining the behavior of the baby, but not the physical appearance, i.e., the developing embryo would be affected by the mood and health of the surrogate mother.

Conclusion – New Life Cannot Be Created

15. The word “clone” is defined as, “an organism or cell produced asexually from one ancestor or stock, to which they are genetically identical.”

- However, a clone will NEVER be exactly the same as the “donor.” They are two different “lifestreams.” The Buddha taught that each lifestream has existed “forever” and we discussed *Tipiṭaka* references in, [“Origin of Life – There is No Traceable Origin.”](#)
- All living beings in existence now have been in the rebirth process forever. The Buddha said that there is no discernible beginning to any living being.

16. The main point from Buddha Dhamma is that a new life cannot be created by any means, whether in a laboratory or anywhere in the universe. This is the only inconsistency with science here, and it is a major inconsistency.

- Living beings just keep switching from realm to realm, but most are trapped in the lower realms. While in the human or animal realms, they spend a lot of time as *gandhabbas*; see, [“Gandhabba – Only in Human and Animal Realms.”](#)
- So, an animal like Dolly would be switching from a “sheep *gandhabba*” to a sheep to a “sheep *gandhabba*” to a sheep...until the *kammic* energy for the “sheep *bhava*” or “sheep existence” runs out.
- When the *kammic* energy for the “sheep *bhava*” runs out, it will grasp another existence. There is no end to this process until reaching the *Arahanthood*.

17. So, I hope it is clear that cloning itself is consistent with Buddha Dhamma, and specifically with the concept of *gandhabba*.

- I wrote this post in response to a question at the discussion forum: [“Gandhabba and Cloning.”](#) If there are more questions or comments, we can discuss them there.

5.2.7 Living Cell – How Did the First Cell Come to Existence?

July 24, 2019

Relevance to Buddha Dhamma

1. A discussion on the origins of a first cell will help understand the fundamentals of Buddha Dhamma, in particular, **the power of *kammic* energy.**

- This discussion is about how modern science is beginning to confirm Buddha Dhamma. Modern science (biochemistry) provides additional information from a “material aspect,” i.e., on the basic building block of a physical body (cell). Even though many scientists believe that a living cell can arise by random combinations of inert molecules, there is no evidence to support that hypothesis.
- Of course, science has not yet even realized that there is a “mental body” too, i.e., the vital role of the *manomaya kāya*.

2. Human life requires two primary components: a mental body (*manomaya kāya* or a *kammaja kāya*) and a material body (*āhāraja kāya*), as I pointed out in the previous post; see, [“Clarification of “Mental Body” and “Physical Body” – Different Types of “Kāya.”](#)

- The mental body has existed forever (in different forms); **it is called a *gandhabba* for humans and animals.** Even though we are all humans at present, we had been born *devās*, *brahmā*, animals, and of course “hell beings”; it is just an unbroken “lifestream.”
- A cell is the basic building block of a physical body, which starts with a single cell (zygote) created by the union of mother and father. That single-cell multiplies over time (the physical body of an adult has trillions of cells); see, [“Buddhist Explanations of Conception, Abortion, and Contraception.”](#)
- **For any given conscious living being, there is no traceable beginning to a first *manomaya kāya*.** When an existing *manomaya kāya* dies, mental energy or *kammic* energy creates a “new *manomaya*”

kāya.” Furthermore, cells make up human (and animal) bodies, and the “first cells” on this Earth were created by *kammic* energy long ago as we discuss below. All cells of current living beings come from those first cells!

How Cells Come to Existence

3. Biochemistry says all cells existing now come from pre-existing cells. How did the first cells on Earth come to existence? Creationists and evolutionists say those “first cells” could only have come from one of two possible places:

- Spontaneous creation – Random chemical processes created the first living cell.
- Supernatural creation – God or some other supernatural power created the first living cell.
- However, both sides have not even realized that there is a third possibility, i.e., “first cells” were created via *kammic* energy, which is the same as “mental energy.”

4. The Buddha taught that there is “no traceable beginning” to life. **Therefore, it is not possible to trace back to a “first *manomaya kāya* (mental body).”** When a human (or an animal) is born, it has a physical body in addition to the *manomaya kāya*. That physical body is made with cells.

- Of course, the Buddha did not talk about cells. I am just bridging that part of the puzzle, based on modern science and *Aggañña Sutta*; see, “[Buddhism and Evolution – Aggañña Sutta \(DN 27\)](#).”
- Now scientists can perform the “cloning” of animals. **That is not the same as the creation of a new life form.** Two existing cells create a zygote, and then an existing *gandhabba* can the “take possession” of that zygote; see, “[Cloning and Gandhabba](#).”

Origins of “First Cells” on Earth

5. **It is essential to realize that Darwin’s theory of evolution is NOT about the “evolution of a cell.”** It is about the evolution of advanced species of plants and animals STARTING WITH simpler lifeforms with a single cell.

- Most scientists who believe in the theory of evolution of SPECIES do also think that it MAY BE possible that A FIRST CELL also evolved starting with inert matter.
- Some scientists have concluded that random interactions of inert molecules cannot lead to the formation of a living cell. But they erroneously concluded that therefore life must have been created by a Creator God.

6. Since Robert Hook discovered the existence of cells in 1665, scientists have uncovered a lot of information about cells. The current “cell theory” in biochemistry has two fundamental axioms:

- i. All living things (living beings or living plants) are made of cells,
- ii. New cells are made by “cell division,” i.e., by the division of existing cells.

- Biochemistry books do not discuss how “first cells” came into existence!

7. Therefore, the question remains as to how the “first cells” on Earth came to life. Evolutionists say random combinations of inert molecules created them.

- Despite what you may have heard in science fiction or popular science literature, scientists are NOT EVEN CLOSE to making even the simplest cell in a laboratory.
- They will NEVER be able to do so. Once we discuss the current status of cell research, you will see why.
- On the other hand, creationists say a Creator God created all life.

Buddhist Explanation of Life

According to Buddha Dhamma, a conscious living being has a mental body (*manomaya kāya*), and some **may** have a physical body (*āhāraja kāya*). In *Brahma* realms, there are no physical bodies like ours (therefore no cells).

8. A NEW living being can never be created starting from scratch. A **dying *manomaya kāya* gives rise to a new one**. Any living being creates CAUSES and CONDITIONS that lead to the next existence (*bhava*)!

- For example, one may be born many times with a human body while in the “human *bhava*,” but when the energy for that “human *bhava*” runs out, that lifestream gets hold of a new *bhava* (as a *Brahma*, *deva*, animal, etc.) because of a strong *kamma* done in the past, as we discussed in previous posts. **Therefore, it is *kammic* energy that gives rise to a *manomaya kāya*!**
- A new *manomaya kāya* is ALWAYS associated with a past life. It is just that the form of the *gandhabba* keeps changing from *bhava* to *bhava*, i.e., an “animal *gandhabba*” or “*Brahma manomaya kāya*” is different from a “human *gandhabba*,” but the same lifestream can take all those various forms.
- If one can follow that “chain of past lives,” one will go through billions of past lives a minute, but will never be able to find a “beginning” life! The Buddha did that upon attaining the Buddhahood, and stated: “***bhikkhus*, there is no discernible beginning to the rebirth process.**”; see, for example, “[WebLink: suttacentral: Gaddulabaddha Sutta \(SN 22.99\)](#)”:

9. A physical body for a human or an animal is a collection of cells. It starts with a single cell (called a zygote) and grows to a large mass with trillions of cells after a *gandhabba* (born of a *paṭisandhi viññāṇa*) “descends to the womb” and gets possession of that zygote. For *Tipiṭaka* references, see, “[Gandhabba State – Evidence from Tipiṭaka](#).”

- On the other hand, a *brahma* has no physical body made of cells. It is just the mental body (*gandhabba*) with a trace of matter at the *suddhaṭṭhaka* level.
- Below, we will discuss how “first cells” on Earth came to existence. We first need to consider how complex a cell is.

The complexity of a Cell

10. Even the simplest cell is very complex and surprising. Even though nanotechnology has made significant advances, it is nowhere close to being able to make a functioning cell.

- The critical issue is not making new complex DNA molecules, but the following: **Those DNA strands in a cell nucleus are “coded with information,” just like a computer is programmed.**
- Just like a computer program can run by itself and manage a factory, information coded in those DNA strands in the nucleus of the cell control cell’s functions.
- This “information” comes not by a Creator and not created via random jostling of molecules in early Earth. It comes from *kammic* energy, just like a *gandhabba* is created by *kammic* energy.

11. In the following video, one can get a good idea about the basic layout and the complexity of a cell.

[WebLink: youtube: Organelles of the Cell \(updated\)](#)

12. It becomes even more impressive when we look at how small an animal cell is. Here are some rough numbers (in comparison, a mustard seed is 1 to 2 mm in diameter):

- **Cell** (per side) 0.050 mm (or 50 micrometers).
- Cell membrane 0.000007 mm thick.

- Nucleus (diameter) 0.007 mm.
- Nucleolus (diameter) 0.0025 mm.
- Endoplasmic reticulum: each layer 0.0002 mm (0.0001 mm gap between layers)
- Golgi complex 0.007 mm thick, each layer.
- Ribosomes 0.00003 mm (30 nanometers) in diameter.

13. But the most amazing thing is not that such a small cell has all that complexity. It is that a cell has a “built-in computer-like program” that manages all cell functions, including what kind of proteins are to produce. Yes. A living cell is a factory that makes proteins in addition to making copies of its DNA.

- In humans, a copy of the entire **genome**—more than 3 billion DNA base pairs—is contained in **all cells** that have a nucleus. The DNA from a single human cell has a length of ~1.8 m or about 6 feet (but at a width of ~2.4 nanometers).
- This genome has the blueprint for a given human (animal) body.

14. The machinery and the activities inside a cell — which we cannot see with the naked eye — are impressive. As mentioned, a living cell is a pre-programmed, very sophisticated factory. Whatever progress that nanotechnology has made cannot even come close to the level of a cell, as can be seen with the following video:

[WebLink: youtube: Ron Vale \(UCSF, HHMI\) 1: Molecular Motor Proteins](https://www.youtube.com/watch?v=RonValeUCSFHHMI1)

First Cells on Earth Created via *Kammic* Energy (Same as a *Gandhabba*)

15. At present, the division of existing cells creates new cells of different properties (scientists do not understand how!). A new human baby starts with a single cell (zygote) that is formed by the merger of two cells from the mother and father.

- **In the newly-formed Earth, *kammic* energy created the first cells.** That happened a long time after the “first humans” who were without physical bodies. The early humans had very subtle bodies (like *brahmā*), and thus, they did not have physical bodies with cells. Hundreds of million years later, those early (*Brahma*-like) humans got back their “human *gati*,” and their bodies become visible with a physical body made of cells.
- The “first cells” come into existence via *kammic* energies from the past. Once they get started, then the “normal method” of cell division led to more cells (what we see now).
- In the same way, there are no new *gandhabbas* in the sense of starting a new lifestream. When an existing *gandhabba* dies (at *cuti-paṭisandhi*), a new *gandhabba* takes its place because of a new *paṭisandhi viññāṇa* (via *Paticca Samuppāda*).
- Therefore, the MIND is the precursor to EVERYTHING. Even plant life has origins in collective *kammic* energies of all conscious beings on Earth. Thus the Buddha declared, “[Manopubbangamā Dhammā..](#)” or “mind is at the forefront of everything in this world.”

16. It is essential to realize that the dense physical body, say of a human being, is not directly created by mental energy.

- Mind energy provides the two seeds: *gandhabba* and the first cell, the zygote. The fusion of two cells from mother and father creates a zygote.
- When a *gandhabba* merges with a zygote in a womb, that starts a process where no more *kammic* energy is needed. That first “live cell” multiplies and leads to more and more cells using sustenance from the mother, and that is how an embryo grows. After birth, a baby grows by eating its food.

17. Another critical point is that the cells of ALL LIVING THINGS are similar, and they depend on each other.

- Cells of humans and animals are very similar. The differences come from the variations in the genome (DNA that is inside the cell nucleus).
- Even cells of plants are not that different. The main difference in a plant cell is the presence of chloroplast, which generates energy using sunlight.
- Energy to sustain bodies of humans and animals can be traced back to plants. Even though humans and animals do eat other animals, it is those animals like cows who first extract energy from plants.
- Now we can see how inter-related and inter-dependent ALL LIFE is. And how complicated life is, even at the physical level.
- The mental body (*gandhabba*) is even more complicated. Only a Buddha can sort out these complexities of life. We are fortunate to live at a time when modern science helps us clarify some of his teachings.

5.2.8 Mystical Phenomena in Buddhism?

July 28, 2019; revised June 9, 2020

Introduction

Some phenomena may be labeled “mystical” or “incomprehensible” only because there are no rational explanations yet. However, logical explanations become available as science makes progress.

1. There are two essential points to make regarding the series of posts on the “origin of Life,” and in general, regarding Buddha’s teachings.

- Some characteristics of the other 29 realms in this world may not be compatible with our ordinary sensory experiences. Some phenomena are not “perceivable” or “easily understood” to humans. The Pāli word for “perceivable” is “*gocara*” pronounced “gochara.”
- The second issue is how *kammic* energy can create a *manomaya kāya* with the ability to “see” and “hear” without physical eyes or ears. Also, how did those “first living cells” on Earth come to existence? See. [“Origin of Life – There is No Traceable Origin.”](#)
- However, with the advances made in science, it is now possible to convince ourselves that such phenomena are scientifically plausible. There are no contradictions with science, at least theoretically (i.e., in principle).
- We are fortunate to live at a time when scientific findings show that some of the “hard-to-believe” phenomena discussed in the *Tipiṭaka* are consistent with science. In this post, I will start with a couple of such issues (associated with “supernormal powers”).

Non-Perceivability of Some Phenomena

2. First, let me clarify what I mean by “perceivable” or “easily understood.” Our six senses can “detect” only a tiny fraction of the “our world.”

- We directly experience only the human and animal realms, where living beings can be “seen with our eyes.” We have no idea about the “bodies” those living beings in other realms. If we visit a *Brahma* or a *deva* domain, for example, we may think that there is “no one there.” Their bodies are too wispy to be seen with our eyes.
- Even when scientists probe the universe with their best equipment, they also see only a small fraction of “things” out there. At a base level, science today can account for only 4 percent of the mass of our

universe; see, “The 4 Percent Universe: Dark Matter, Dark Energy, and the Race to Discover the Rest of Reality”, by Richard Panek (2011).

- Many things have not been “discovered” by science yet. In particular, nothing significant about the MIND.

Buddha Dhamma Is Self-Consistent

3. Trying to gauge the validity of Buddha Dhamma with just what we can see with our eyes is foolish. That is like a blind man trying to figure out what an elephant is like, by touching just a leg of the elephant; see, “[How do we Decide which View is Wrong View \(Ditthi\)?](#).”

- A frog living in a well does not know anything about the wider world of 31 realms. Similarly, an average human — including scientists — faces the problem of trying to figure out the “reality” by only using data available through our limited six senses. With the help of scientific instruments, we are making progress.
- Thus a scientific theory can’t be ever “complete” as proven by the mathematician Kurt Gödel; see, “[Gödel’s Incompleteness Theorem](#).” However, science is helping to clarify some concepts.
- Unless one attains *abhiññā* powers and can visit those realms, one would not be able to verify such characteristics of other domains. For example, we cannot see their ultra-fine bodies; see, “[Clarification of “Mental Body” and “Physical Body” – Different Types of “Kāya”](#).”
- However, if one spends time learning Dhamma, one would be able to see the truth of them. We will discuss a few examples below. Also, see “[Buddha Dhamma: Non-Perceivability and Self-Consistency](#).”

Touching the Sun – Is That Possible?

4. Some phenomena described in the *Tipiṭaka* seem to be “mystical” or “beyond comprehension.” But they are entirely feasible based on the advances in science. I will discuss a couple of examples in the *Tipiṭaka* to illustrate this point. In the “[WebLink: suttacentral: Sāmaññaphala Sutta \(DN 2\)](#)”, it is stated, “.. *imepi candimasūriye evaṃmahiddhike evaṃmahānubhāve pāṇinā parāmasati parimajjati..*” or, “.. **he touches and strokes the Sun** and the moon, so mighty and powerful..”

- This verse describes the powers of a *yogi* with supernormal capabilities (*Iddhividha ñāṇa*). How can one “touch and stroke the Sun?” Isn’t the Sun supposed to be extremely hot?
- Here, the *yogi* is in the *manomaya kāya*, not with his physical body. Of course, a physical body will burn well before it gets close to the Sun. The key is to note that the *manomaya kāya* has just a few *suddhaṭṭhaka*. For example, a human *manomaya kāya* has a *hadaya vatthu* and five *pasāda rūpa* and each is a *suddhaṭṭhaka*; see, “[Clarification of “Mental Body” and “Physical Body” – Different Types of “Kāya”](#).”
- **A *suddhaṭṭhaka* is the smallest unit of matter in Buddha Dhamma and is billion times smaller than an atom in modern science.** Therefore, the *manomaya kāya* of a *yogi* is unimaginably tiny; it is a “packet of energy.”

5. An entity at the level of *suddhaṭṭhaka* will not be affected by the Sun’s high temperatures or even by a supernova explosion. We can understand that from modern science as follows: A regular fire can burn dense things like wood or paper. At higher temperatures, melting ovens can melt steel bars. But neither of those can burn molecular gases like hydrogen or nitrogen. Those gases burn at even higher temperatures.

- However, even at the temperatures generated by a supernova explosion, matter at the *suddhaṭṭhaka* level is not affected. A supernova is the blowing up of a star.
- **The Earth and the Sun are destroyed at the end of a *mahā kappa*.** However, the *brahma* realms lying at or above the *Abhassara brahma* realm survive. Those *Brahmā* have very fine bodies (with only a trace of matter) that are not affected even by a supernova; see, “[Buddhism and Evolution – Aggañña Sutta \(DN 27\)](#).”

- Well before that destruction, all living beings in our world move up to the *Abhassara brahma* realm.
- Now we can see how a *yogi* with a *manomaya kāya* of a *Brahma* CAN indeed touch the Sun. **That is not a miracle. It is just that a *manomaya kāya* is so fine (subtle) that it is not affected by even a supernova, which has much more power than the Sun.**

How Can One Go Through Walls?

6. The same *sutta* (and many other *suttā*) also describe the ability of *yogis* with *iddhi* powers to go through walls and dive into the Earth and come out from a different location, among others.

The following verse appears in many *suttā* in the [WebLink: suttacentral: Iddhipāda Saṃyutta](#) of the *Saṃyutta Nikāya* (SN 51.11 through SN 51.32): “*Ye hi keci, bhikkhave, etarahi samaṇā vā brāhmaṇā vā anekavihiṭṭam iddhividham paccanubhonti—ekopi hutvā bahudhā honti, bahudhāpi hutvā eko honti; āvibhāvaṃ, tirobhāvaṃ; tirokuṭṭam tiropākāram tiropabbataṃ asajjamānā gacchanti, seyyathāpi ākāse; pathaviyāpi ummuḍḍanimujjam karonti, seyyathāpi udaye; udaye pi abhijjamāne gacchanti, seyyathāpi pathaviyaṃ; ākāsepi pallaṅkena kamanti, seyyathāpi pakkhī sakuṇo; imepi candimasūriye evaṃmahiddhike evaṃmahānubhāve pāṇinā parimasanti parimajjanti; yāva brahmalokāpi kāyena vasaṃ vattenti, ..*”

Translated: “*Bhikkhus, a bhikkhu or a brāhmaṇa* who has developed supernormal powers (*iddhi*) wields various psychic powers: He can become many copies of himself. He appears and vanishes. **He travels unimpeded through walls, ramparts, and mountains, and dives in and out of the Earth as if it were water.** He walks on water without sinking as if it were the Earth. Sitting cross-legged, he travels through space like a winged bird. With his hand, he touches and strokes the Sun and the Moon, so mighty and powerful. He displays mastery as far as the *brahmā*-realms...”

- It is also evident in this verse that it could be **anyone** who can cultivate these powers, not just Buddhists.
- Let us first clarify a few things with science, and then we will discuss how it is possible to “**go through walls and dive into the Earth.**”
- We need to first discuss some aspects of atoms and molecules uncovered by modern science.

An Atom is Virtually Empty!

7. Here is a simplified version of some relevant properties of an atom. An atom has a tiny nucleus with 99.9% of the mass (or “weight” in ordinary language.) It is surrounded by an “electron cloud” that takes up almost all the “space occupied by the atom.” In other words, it is analogous to a miniaturized version of our Solar system, where the massive Sun is at the center, and several planets revolve around the Sun.

- The main difference is that those electrons are not in circular orbits. They have complicated “orbitals,” and the easiest is to visualize an “electron cloud” around the nucleus.
- The nucleus is tiny but has all the mass of the atom essentially. Electrons are spread out in a large volume around the nucleus (core.)
- We can use the following analogy to get a perspective on the size of an atom compared to the nucleus. If a mustard seed with a millimeter diameter represents the nucleus, the “electron cloud” would occupy a volume with 100 meters in diameter. We could say a nucleus would be like a grain of sand in the chamber of a large cathedral or a football stadium.

8. Therefore, an atom (or a molecule) is mostly empty. **That means our bodies that we think are very solid are also basically empty.** Even steel or diamond would be similarly “empty.”

- **P.S.** If it is possible to take out all that empty space in our bodies (which of course, is not possible), all the matter in the physical bodies of 9 billion humans in the world today would fit inside a sugar cube!
- If our atoms are mostly space, why can't we pass through walls like those ghosts in movies?

- Electrical repulsion among the electron clouds of neighboring atoms forces them to stay away without getting close.
- Therefore, we cannot go through walls or any other “solid object” with our physical bodies.

Go Through Walls and Dive Into the Earth?

9. Even though our physical bodies cannot go through other “solid objects,” **our *manomaya kāya* (*gandhabba*) made of very fine *suddhaṭṭhaka* can!**

- That level of “matter” is much more refined and subtle than even electrons. Furthermore, “particles” at the *suddhaṭṭhaka* level are not electrically charged. So, they do not have any problem going through the electron cloud.
- Therefore, modern science (physics) helps us understand why this is not a miracle at all.

10. Those objects that appear to be “highly condensed” — such as walls or even steel — are mostly hollow at the atomic level. An atom has a tiny nucleus surrounded by an “electron cloud.” The size of an atom is defined by the electron cloud, which is spreads out over a relatively large volume. Two adjacent atoms cannot come too close to each other because of the mutual repulsion between their electron clouds.

- Therefore, an atom is “virtually empty.” The dense nucleus takes only a little volume, and the electron cloud is far away. Therefore, a *manomaya kāya* made of only a few *suddhaṭṭhaka* can freely move through “solid matter” made of atoms and molecules.
- A *yogi* with such *abhiññā* powers could use the *manomaya kāya* to travel through “solid objects.”
- One with even more developed abilities may be able to reduce one’s physical body to the *suddhaṭṭhaka* level, go through the “solid object” and then “reassemble” at the other end. That sounds like science fiction (“teleportation”), but that is precisely how it may be done in the future with further progress in science. Of course, one with such *abhiññā* powers would be able to do that right now.
- **P.S.** An account from the *Tipiṭaka* regarding “teleportation”: Ven. Ananda attained the *Arahanthood* only the day before the first Buddhist Council held 3 months after the *Parinibbāna* of the Buddha. Only *Arahants* participated. Everyone was waiting for the arrival of Ven. Ananda. In order to remove any doubts of those who were present that he had indeed attained the *Arahanthood* — complete with all *iddhi* powers — Ven. Ananda is said to have entered the room through the keyhole in the door. So, this is an example of teleportation.

Summary and Other Implications

11. Other “mysterious phenomena” in verse in #6 above can also be explained to be consistent with science. As science makes progress, these clarifications will have more support.

- I will be discussing some of those other phenomena in the future after covering the necessary background material.

12. On a side note, this clarification also helps us understand that our concept of “touching someone” is not as intimate as we think. When we “touch” something, it is only the outer electrons of the atoms (molecules) on our body “touching” the same on the other object.

- I am very serious about this. Suppose you are blind-folded and someone touches you on the arm. If you think it is your girl (boy) friend, that will make you generate sensual thoughts. However, you will feel only affectionate feelings of a different kind if you are under the impression that it is your parent. If you think it is a total stranger (and not good looking!), you may barely notice him/her.

Buddha Discouraged “Magic Shows” by Those With *Iddhi* Powers

13. I must also emphasize that the Buddha not only discouraged but banned in most cases, display of such supernormal powers by *bhikkhus*. The main reason for that was explained to Kevatta by the Buddha in the [WebLink: suttacentral: Kevatta Sutta \(DN 11\)](#). The English translation there: “[WebLink: suttacentral: To Kevatta \(DN 11\)](#).”

- So, there were people at the time of the Buddha who could do such “miracles” using special techniques like “*Gandhāra* magic trick” (*gandhārī nāma vījā*). Some others cultivated supernormal powers via *anāriya jhāna*. Then such people can put down Buddha Dhamma, saying that “I can also do those things without Buddha’s teachings.”
- Even today, some magicians perform such “miracles.” Here is a video showing “[WebLink: youtube: Criss Angel walking on water](#).”

Of course, it is an illusion. But it looks real! Criss Angel discusses these illusions or magic tricks in his book, “Mindfreak” (2007).

- However, only Buddha Dhamma can make it possible to stop future suffering, and that is not possible with magic tricks!

5.2.9.1 Views on Life – Wrong View of Materialism

August 4, 2019; revised August 15, 2021

Materialism says life has origins in inert matter. This view is held by many scientists and atheists. It was called “*uccheda ditṭhi*” by the Buddha.

Introduction

The issue of the origin of life is critical to *Sakkāya Ditṭhi*, which is one of the key wrong views to be removed to attain the *Sotāpanna* stage. I have discussed some background material in the past several posts. It is time to take an in-depth look at each of the three views on the origin of life.

1. As I have already mentioned in the past few posts, there are two wrong views regarding life.

- The materialistic view says life has origins in inert matter. Science says 108 or so atoms make everything in this world. Somehow consciousness with feelings, perceptions, desires, and hopes arise out of inert matter. Many scientists and atheists hold this view.
- Those who are faithful followers of the Abrahamic religions (Christianity, Judaism, Islam) or Hinduism believe that there is a separate “mental component” that makes the inert physical body “alive” with feelings, perceptions, desires, and hopes (four mental aggregates). A Creator God or *Mahā Brahma* created life according to them.

2. We also need to keep in mind the “endpoints of a life” according to those two views.

- In the materialistic view, one lives only the present life, and it all ends with the death of the physical body. **This view was called “*uccheda diṭṭhi*”** by the Buddha because here the life ends (*uccheda* means “cut off”) with the death of the physical body.
- In the opposite view, the “mental body” survives even after the physical body dies. In Abrahamic religions, the “soul” either is either born in heaven or “hell” forever. In Hinduism, the “*ātma*” keeps going through the rebirth process until one is born in the *Mahā Brahma* realm, which is again eternal. In either case, one will eventually live forever (in heaven, hell, or the Brahma realm). **This view was called “*sassata diṭṭhi*”** (*sassata* means “eternal”) by the Buddha.

3. In refuting those two views, the Buddha taught that there is a “mental component” to life, but that is not a “soul” or “a *ātma*” going from one life to the next.

- That is because everything in this world arises due to causes. Life can take many different forms (human, *deva*, *Brahma*, animal, *peta*, hell-beings, etc.). **When one such existence ends, another arises depending on which causes (*kamma vipāka*) come into play.**
- “Good” or “bad” forms of life arise due to “good” or “bad” actions done in the past, and the net result of existence in the “long term” is suffering (mainly because most *kammā* lead to “bad births”).
- There is no “soul” or a “*ātma*” that can be considered to be “me” or “my essence.” As long as one has that perception, the rebirth process will continue with much suffering.
- When one realizes the truth of this reality, one will stop grasping (*upādāna*) new existences.

The Conception and Birth of a Baby

4. Let us focus on human life. When the fertile mother (i.e., who has ovulated) has sex with the father, that leads to seed for a new life. The following is a summary extracted from “[WebLink: Stages of Development of the Fetus.](#)”

- During each normal menstrual cycle, one of the ovaries release an egg. The release of the egg is called ovulation. The egg enters the funnel-shaped end of one of the fallopian tubes.
- Within 5 minutes of having sex, sperms from the father move from the vagina to the fallopian tube.
- Suppose a sperm penetrates the egg, fertilization results. **The fusion of the egg and sperm produces a new cell called a zygote**, the seed of life for a brand new baby.

5. Tiny hairlike cilia lining the fallopian tube propel the zygote toward the uterus. The cells of the zygote repeatedly divide as the zygote moves down the fallopian tube. The zygote enters the uterus in 3 to 5 days.

- The cells continue to divide in the uterus, becoming a hollow ball of cells called a blastocyst. Between five and eight days after fertilization, the blastocyst attaches to the lining of the uterus lining, usually near the top. This process, called implantation, is completed by day 9 or 10. The inner cells develop into the embryo, and the outer cells develop into the placenta.
- Some of the cells from the placenta develop into an outer layer of membranes (chorion) around the developing blastocyst. Other cells develop into an inner layer of membranes (amnion), which form the amniotic sac. The blastocyst is considered an embryo when the sac is formed (by about day 10 to 12). The amniotic sac fills with a clear liquid (amniotic fluid) and expands to envelop the developing fetus, which floats within it.

6. Most internal organs and external body structures get built in this stage. Most organs begin to form about three weeks after fertilization, which equals five weeks of pregnancy. (Doctors date pregnancy from the first day of the woman’s last menstrual period, typically two weeks before fertilization).

- The embryo is considered a fetus at the end of the 8th week after fertilization (10 weeks of pregnancy). Almost all organs are formed about ten weeks after fertilization (which equals 12 weeks of pregnancy). The exceptions are the brain and spinal cord, which continue to form and develop throughout pregnancy.

- By about 24 weeks: The fetus has a chance of survival outside the uterus. The lungs continue to mature until near the time of delivery. The brain accumulates new cells throughout pregnancy and the first year of life after birth.

Materialistic View

7. The above process describes the steps in forming the “physical body” of a new human being. **It cannot identify the time “when the mental stuff” is activated, i.e., when that inert zygote becomes alive.**

- Some say “life of the new baby” starts when the heartbeat starts, and at the other extreme, some say when the baby is capable of surviving outside the womb; see, for example, “[WebLink: lozierinstitute.org: A Scientific View of When Life Begins](http://lozierinstitute.org: A Scientific View of When Life Begins).”
- According to Buddha Dhamma, the new life starts when a *gandhabba* (or *patisandhi viññāṇa*) “descends to the womb and takes possession of the zygote.” That happens very early, within a day or two of the formation of the zygote; see, “Buddhist Explanations of Conception, Abortion, and Contraception.”

8. Besides the above hurdle, the materialistic view cannot explain how that single cell or the zygote gives rise to a complex human with many trillions of different types of cells.

- Even though we all start with a single cell, the cells in different parts of our bodies are very different. Liver cells are different from heart cells, and the cells in the brain — called neural cells or neurons — are much more diverse.
- Furthermore, how do these cells know when to start building different cells for the liver, heart, brain, arms, legs, etc.?

9. These issues have been studied in detail even since Watson and Crick discovered the double-helix structure of the DNA (Deoxyribonucleic acid) molecule back in 1953. We have discussed the complexity of a cell, so now we can summarize these findings as follows: [\[WebLink: What is DNA?\]](http://WebLink: What is DNA?)

- DNA strand in a cell has the necessary “code” (similar to computer code) to build the whole body consisting of trillions of cells.
- This DNA, or the blueprint for the whole body, is in every cell. However, the proteins and body parts generated by each cell are different. How does each cell “know” which part of the “code” to read?
- I am skipping a lot of details. Those who are interested should read two excellent books (Ref. 1 and Ref. 2 below). The former is by an evolutionist and the latter by a creationist. However, studying this complex issue in detail; it is enough to “get the basic idea.”

The structure of the DNA double helix. The atoms in the structure are colour-coded by element and the detailed structures of two base pairs are shown in the bottom right.

Fundamental Problems with the Materialistic View

10. Two key issues remain unresolved. The first is, how did this complex DNA structure evolve, starting with simple molecules?

- In 1953, Stanley Miller and Harold Urey mixed chemicals in a simulated “early-Earth atmosphere” and produced amino acids — precursors of DNA. It received much publicity as a significant clue to the origin

of life. But that is a far cry from making a working cell in a laboratory. No one has even come close to that in the 65 years following that “breakthrough.”

- The videos in my previous posts discuss this problem at length; see “[Origin of Life – There is No Traceable Origin](#)” and “[Living Cell – How Did the First Cell Come to Existence?](#).”

11. There is an even more critical issue: Is it even possible for such a complex “genetic code” to evolve?

- Those of us who have written computer programs know that even a simple program requires “planning” and would not work unless it is free of “bugs.” Even though it is relatively easy to “fix a bug” with KNOWLEDGE of the code, it is unimaginable that a bug in such a sophisticated program can “get fixed” via a random “trial and error” process. It is more likely to “add more errors” to code than fixing an existing error in such a random process.
- The following review paper summarizes current status: “[WebLink: pdf file: Koonin and Novozhilov- Origin and Evolution of Universal Genetic Code – 2017.](#)”
- For those who like to find more details, I recommend [Ref. 3](#) below. The author is offering 10 million dollars to anyone illustrating the feasibility of genetic code evolution; see, “[WebLink: evo2.org: Evolution 2.0.](#)” I recommend watching the video there. It is not really about the prize; he explains why it is an impossibility.

12. Darwin’s original theory of evolution predicted a “gradual evolution” of SPECIES, i.e., simple lifeforms evolving to complex lifeforms. However, the “neo Darwinism” of the present time is trying to tackling the following key issues.

- Recent studies reveal that the GENETIC CODE is virtually the same for many species, ranging from mice to humans (in animals with a few cells, the genome is small). In other words, the DNA in mice essentially has the code to start a human life, but those sections in the program are NOT TRIGGERED for mice; see [Ref. 1](#) for details.
- **That is a critical point. The CODE Is virtually the same in many lifeforms, but the “correct sections of the code” must be triggered for each species. It is as if someone had planned for all lifeforms in advance!**
- It is just that different parts of the code get activated for different species! **That raises another issue. WHO (or WHAT in the code) triggers specific genes to be enabled in different species AND at the right time (e.g., fingers come after the arms)?**
- That is possibly why some evolutionist scientists are switching to the creationist side (Dr. Francis Collins, the director of the Human Genome Project, is an example). There has not been a third alternative (because most people do not know — or understand — Buddha’s version).

In the next post, I will discuss problems associated with the creationist view (*sassata dīṭṭhi*).

5.2.9.2 Wrong View of Creationism (and Eternal Future Life) – Part 1

August 12, 2019

Introduction

1. The concept of eternal future life is built into most of the religions today. It comes in two varieties.

- In Abrahamic religions (Christianity, Judaism, and Islam), one is born only once. Then at the end of this life, one is either taken to heaven or hell for eternity.
- In Hinduism, one has born before, will reborn again and again, until one is born in the *Mahā Brahma* realm. Then one will live there forever.
- Both varieties require a Creator (God or *Mahā Brahma*).
- (Please note that the intent of my post is just to lay down the **facts** (to my knowledge). If I have miswritten something, please post a comment at the discussion forum or send me an email at lal@puredhamma.net. I would be happy to correct any errors.)

2. In the time of the Buddha, there was only the latter view associated with a future eternal life. However, in both the above cases, the expectation is that one will have eternal life at the end. Such a view of eternal life was called *sassata diṭṭhi* by the Buddha (“*sassata*” means eternal).

- As we recall from my previous post, “[Views on Life – Wrong View of Materialism](#),” this is the opposite of the wrong that life ends with death in this life. That was called *uccheda diṭṭhi* (“*ucceda*” means cut off) by the Buddha.
- As we know, the Buddha explained 62 types of wrong views in the [WebLink: suttacentral: *Brahmajāla Sutta* \(DN 1\)](#). However, the two main wrong views REGARDING LIFE are the above. Some of those 62 wrong views are on whether the world is eternal or not, and whether the world is finite or not.

Eternal Life in Hinduism and Abrahamic Religions

3. In the [WebLink: suttacentral: *Brahmajāla Sutta* \(DN 1\)](#), the Buddha explained how some people at that time concluded eternal soul or *atta* (*ātma* in Sanskrit/Hinduism).

- There were *yogis*, even before the Buddha, who could attain (*anāriya*) *jhāna* and with them the ability to recall past lives. Some were able to recall hundreds and thousands of past lives. One may change the form of birth (human, *deva*, etc.), but each birth associated with “oneself.”
- Some of them had cultivated *abhiññā* powers to higher levels, where they could “see” very far back. They could see many destructions/re-formations of the world (i.e., many *mahā kappās*). Even for such long times, they could see their “*ātma*” or “*atta*” taking different forms, but it was the “same self” who acquired such various forms.
- The Buddha gave an analogy in the *Brahmajāla Sutta*. A person may live in a particular city for several years during childhood, move to another to go to school, get a job in a yet another city, and eventually retire in yet a different country. But that person has the perception that it was “me” who was at all those different places, with different physical bodies. Going through different lives is similar; there is a perception of “me” or “self” or “soul” (*ātma/atta*).

4. Now we can see a difference in views of Abrahamic religions and Hinduism.

- The concept of rebirth is firmly in Hinduism. That is coming for a long time even before the Buddha Gotama. It is based on the experience of ancient *yogis* who had cultivated the ability to look at past lives.
- On the other hand, rebirth is entirely absent in Abrahamic religions. So, the origin of human life in Abrahamic religions is purely materialistic. The only requirement is to have a zygote created by the union of the mother’s egg and father’s sperm. Therefore, there is some overlap here with the materialistic view of life; see, “[Views on Life – Wrong View of Materialism](#).”
- However, as far as the end of life is concerned, both Abrahamic religions and Hinduism have a similar view. That one attains eternal life at the end.

Issues Only Relevant to Abrahamic Religions

5. The other difference between Abrahamic religions and Hinduism is that in the former, one is born only once AND gets only this life to work towards getting eternal life in heaven. If one misses that opportunity, one will be committed to the hell for eternity.

- The Bible clearly says one dies only once and then faces judgment ([WebLink: biblia.com: Hebrews 9:27](http://biblia.com/Hebrews%209%3A27)). The Bible never mentions people having a second chance at life or coming back as different people or animals. [WebLink: biblia.com: Matthew 25:46](http://biblia.com/Matthew%2025%3A46) says explicitly that believers go on to eternal life while unbelievers go onto eternal punishment. As I understand, Judaism and Islam have the same concept.
- I wonder what happens to a baby dying very young. Does it go to heaven or hell? What about a mentally disabled person? It does not seem to be fair if they are committed to hell for eternity. If they do get qualified to be born in heaven, it would be better to skip this life (be killed as a baby) and be born in heaven right away.
- I may not be aware of the details on that issue. But it is an important issue. As I mentioned earlier, I welcome comments. The goal is to have a clear and correct picture of different world views.

6. Since this is the “first life” for any human alive today (since there is no rebirth process in Abrahamic religions), the following question arises. Why is it that people are born healthy/with disabilities, poor/rich, beautiful/ugly, etc.?

- To put it another way, is each of us a “new creations of the Creator”? If so, why did he choose to create some of us with disabilities, for example? If we did not have prior lives, there was no basis to differentiate among new births.
- Furthermore, was the “soul” of an existing individual created at the time of his/her conception or birth?
- There are simple questions that need answers, in my opinion.

7. I do understand that the Creator God is supposed to have “breathed life” to Adam and Eve made them in his image. But not to animals; they do not have a soul in Abrahamic religions).

- Animals are made of the same “stuff” as humans. As I discussed in the previous post, many animals have DNA that is 99% the same as those for humans; see, “[Views on Life – Wrong View of Materialism.](#)”
- Animals are supposed to be there for the consumption of humans. That also does not seem to be logical.

Issues Only Relevant to Hinduism

8. The *Purush-Sukta*, a section of the *Rig Veda*, describes the divine origin of human beings into the four social groups, or castes, that comprise Hindu society: *Brahmin*, *Kshatriya*, *Vaishya*, and *Sudra*. According to the *Purush-Sukta*, *brahmins* born from the mouth of the Brahma, *kshatriya* from the arms, *vaishya* from the thighs, and *sudra* from the calves.

- This categorization comes at the beginning of the *Agganna Sutta* (DN 27). Vāseṭṭha, himself a *brahmin*, tells the Buddha that other *brahmins* say to him that he should not associate with lower-caste people. Followers of the Buddha came from all four castes. They tell him that, “Only *brahmins* are genuine children of *Brahmā*, born of his mouth, offspring of *Brahmā*, created by *Brahmā*, heirs of *Brahmā*.”
- The Buddha tells Vāseṭṭha that all people today are womb-born.
- Then he proceeded to give an account of how all “first humans” at the beginning of this *Mahā Kappa* were born instantaneously (*opapātika* births) with *brahma*-like bodies, and how they “evolved” over the past several billions of years to end up with “womb-born births”; see, “[Buddhism and Evolution – Aggañña Sutta \(DN 27\).](#)”
- The current series on the “[Origin of Life](#)” will provide more details from that *sutta*. Darwin’s theory of evolution is somewhat correct for the appearance of increasingly complex animal species over time. It is

not right to say that humans have “evolved from animals.” Furthermore, a “first living cell” can’t evolve from inert matter to form the primitive animal species either, as we have discussed in recent posts.

9. As in the case of a Creator God in Abrahamic religions, why did *Mahā Brahma* create four classes of humans at the beginning, per #7 above? Why not create them all equal?

- Did *Mahā Brahma* also create animals as well? Can humans be born as animals? If so, do animals have a *ātma*?
- I may be ignorant of these issues. One problem that I have had with Hinduism is that there are so many different versions. One good example is that in some Hindu temples animal sacrifice is carried out regularly. On the other hand, there are other Hindus who abstain from eating meat, let alone killing animals!
- The best way to clarify these issues is to start a discussion at the discussion forum. Then I can revise this post based on that discussion if needed. I have opened a new topic to discuss any of the posts in the “Origin of Life” series: “[Questions on Posts in the “Origin of Life” Subsection.](#)”

I will discuss apparent problems associated with all creator-based religions in the next post.

5.2.9.3 Wrong View of Creationism (and Eternal Future Life) – Part 2

August 19, 2019; revised August 28, 2022

In the previous post, “[Wrong View of Creationism \(and Eternal Future Life\) – Part 1](#),” we discussed some problems associated with creationism. We will continue that discussion.

How Did the Creator Come to Existence?

Now we can get to the issues common to Abrahamic religions and Hinduism.

1. First, the inevitable question is, how did the Creator (God or *Mahā Brahma*) come to existence? The Principle of Causality, the foundation of modern science, says things do not happen or materialize without causes.

- The idea of a Creator as “the First Cause” has a long history; see the Wikipedia article, “[WebLink: wikipedia: Cosmological argument.](#)”
- Logically it cannot be defended, but it has come to be a belief for those who have faith in a Creator.

2. In the previous post, we saw a crucial difference between Buddhism and Hinduism. (Even though the concept of rebirth is there in both.) In Hinduism, there is the belief in an everlasting existence in the *Mahā Brahma* realm (or reunification with the *Brahman*).

- Of course, a similar concept is there with Abrahamic religions, with eternal life in heaven or hell.
- However, the idea of rebirth is absent in Abrahamic faiths.
- **Let us now focus on the issue of “eternal life” after death** in Abrahamic religions and Hinduism.

3. In Abrahamic religions, the Creator God lives in the heavens. If one lives a moral life, one will get to live “in the heavens” forever; see the Wikipedia article, “[WebLink: wikipedia: Heaven in Christianity.](#)”

- In Hinduism, the Creator *Brahma* lives in a *Brahma* realm; see the Wikipedia article, “[WebLink: wikipedia: Brahma.](#)” One can be born there by living a moral life and cultivating *jhāna*.
- Therefore, all Creator-based religions assume the existence of a heavenly plane where life is permanent. Once born there, one will live forever without ever dying.

Nothing in This World Is Forever

4. Stars in the heavens appear to be serene and shiny. Even though we see beautiful and calm “starry nights,” outer space is a violent place.

- In reality, a typical star converts *millions of tons of mass into energy every second*, with ***each gram releasing as much energy as an atomic bomb!***
- Within the range of our telescopes, there are several supernova explosions per second. A supernova is the explosion of a star at the end of its lifetime.
- Therefore, even though our ancestors thought that Gods reside among those nice-looking stars and the heavens are stable and peaceful, the reality is very different.

5. The Buddha's worldview (as discussed in upcoming posts) is that no existence is everlasting. Life in any heavenly realm (*Deva* or *Brahma* realms) is finite, even though some can be long lifetimes.

- At the time of the Buddha, Abrahamic religions were not there. He has addressed the issue of everlasting life in the *Mahā Brahma* realm in several *suttā*. We will discuss that in future posts.
- Before that, let us look at the scientific evidence that any type of matter (which is essential for life) has a finite lifetime.

6. A permanently-existing heavenly body contradicts modern science as well as with Buddha's description of 31 realms where every life ends at some point. Even though *Deva* and *Brahma* realms have long lifetimes, they are not free of death.

- According to current scientific theories, the whole universe will run down in several billion years. In contrast, the Buddha taught that life has no “discernible beginning.” See “[Origin of Life](#).”
- Furthermore, each star is either destroyed in a violent blast (some are called “supernova”) or will be subjected to “heat death” reaching the white dwarf stage; see the Wikipedia article, “[WebLink: wikipedia: Star](#).”
- In Buddha Dhamma, clusters of star systems (*cakkavāla*) get destroyed periodically. Even though higher-lying realms survive, living beings in those realms also have finite lifetimes. After many billions of years, those star systems reformed. So, it is a cyclic process where destruction is followed by rebirth (re-formation), just like for a living being; see “[Buddhism and Evolution – Aggañña Sutta \(DN 27\)](#).”

The Problem of Suffering

7. Then there is the critical issue of why a Creator would let the man he created suffer. He could have created a suffering-free world.

- The general explanation in Christianity is that Adam and Eve sinned.
- But the Creator could have made it not possible for Adam and Eve to sin. Furthermore, it does not make sense for the descendants to be punished for Adam and Eve's sins.
- And why are some born to suffer (mentally retarded or handicapped, for example)? What is the explanation for some people born that way? Also, why are some born poor compared to others born rich?

8. As I mentioned in a previous post, “[Views on Life – Wrong View of Materialism](#),” some scientists like Francis Collins and James Tour have given up their belief in the theory of evolution. They have become proponents of creationism since they do not see another option.

- We discussed James Tour's views in the post, “[Origin of Life – There is No Traceable Origin](#).”

9. Francis Collins has written a book about why he changed his views to become a creationist. I have written a post to critically examine the issues he could not explain with creationism: “[“The Language of God” by Francis Collins](#).” Please read that post for details, but the following are the key points.

- As I pointed out, Dr. Collins faced the same difficulties as C. S. Lewis in explaining why God left room for suffering.
- Why would God allow the existence of Satan and the associated immoral behavior by people? The main conclusion was that God chose to give man free will, and man abused it. But God could have given free will without the existence of Satan or the ability to sin.
- The existence of “Moral Law” (the ability to differentiate right from wrong) is the fundamental basis for his belief in God. However, that argument works for all religions.
- These are critical issues that do not have answers in the creationism worldview.

Debate Between Materialists and Creationists

10. In the last few posts, I presented the two sides as Evolutionists and creationists. However, some creationists do not have a problem with Darwin’s theory of evolution if it just pertains to the “evolution of species.”

- The critical issue for them is about the “origin of life” and not the evolution of species. In other words, many creationists agree that once life started with simple life forms, more complex life forms evolved gradually.
- In fundamental terms, the critical question is, “how did the first cell come to existence”?

11. Of course, evolutionists believe that the first living cell also evolved, starting from inert atoms and molecules.

- However, evolutionists have very little to say about how the first cell came into existence. I have read many books by evolutionists, and they mainly discuss just the evolution of species. They have little evidence or feasibility of how complex DNA molecules are assembled, starting with simple atoms and molecules in random chemical reactions.
- They have even less to say about how the genetic code could have evolved. As I emphasized in previous posts, it is hard to imagine how such a program could develop in a random process. We know that computer codes do not “evolve.” Furthermore, any accidental changes in the working computer code will only break that code, not make it better!

Intelligent Design Argument

12. As I mentioned above, some scientists have been convinced that a living cell with DNA code can’t evolve. However, they are not comfortable with the concept of a Creator God.

- They have come up with the concept of “intelligent design.” They do not explicitly invoke a Creator God but insist that a higher intelligence must have designed a living cell.
- That is also called the “Teleological argument.” See the Wikipedia article, “[WebLink: wikipedia: Teleological argument](#).”

13. As explained in that Wikipedia article, the phrase “argument from design” was first used by William Paley, an English clergyman, in 1802. He said that if one finds a clock on the beach, one can safely conclude that the watch must have had a designer. In the same way, complex living beings must have had a “designer.”

- Modern advocates of the intelligent design argument point out that a cell is much more complicated than a watch and could not have evolved due to random processes.
- However, that does not solve the problem. Such a “designer” must have super-human capabilities and thus is not that different from the idea of a Creator. The idea of a creator or a designer runs contradictory to the Principle of Causation, upon which science is based (see #1 above).

Summary

14. The existence of permanent life and suffering are two critical problems with the creator-based origin of life. However, there are many related issues.

- Can the life of a human arise randomly? In other words, why are humans born under very different health, wealth, beauty, etc.? Neither evolutionists nor creationists (or “intelligent designers”) can explain it. They all say, “it just happens that way.”
- The second issue concerns the origin of life (not the evolution of species). How did life originate? For example, how did the first cell with its complex double-helix DNA structure AND genetic code come into existence? The two sides have different explanations for that issue.

15. Materialists believe that a living cell can arise via random jostling of atoms and molecules which are inert “matter.” The critical question is, is it possible for that to happen in a random process? **Another significant issue that we have not even discussed is: How can feelings, perceptions, desires, hopes, etc. arise from “dead matter”?**

- Creationists (and those who believe that a creator or a designer with super-human intelligence in “intelligent design”) created living cells. That creator gave life to inert matter. The question is, how did that creator or designer come to existence?

Buddhist Explanation

16. **In Buddha Dhamma, this “intelligent designer” is none other than Nature.** Life itself was not created but has existed forever. That is consistent with the Principle of Causality. Of course, Buddha provided (indirect) evidence in terms of a fully self-consistent “theory.”

- **Furthermore, the mental qualities of a human are the CAUSES of existence (rebirth):** It is impossible to create a lifestream. All existing life-streams have ALWAYS existed. That life-form takes different forms in different existences (not only human and animal, but among 31 possible realms). See [“What Reincarnates? – Concept of a Lifestream.”](#)
- **Future existences of a given lifestream DEPEND on the “mental qualities” (and actions, speech, thoughts that arise BASED ON those mental qualities) of that lifestream.**
- **Suffering and pleasure exist in this world. Both arise due to previous actions (*kamma*). And one’s deeds are based on one’s mental state.**

17. **When one understands those key concepts, one will “see” that there is no “attā” or “soul” or “ātma” going from birth to birth.** That is the first stage of *Sammā Diṭṭhi*. Causes (*kamma*) and conditions lead to corresponding outcomes (*kamma vipāka*) per *Paṭicca Samuppāda*. That understanding is the key to removing “*sakkāya diṭṭhi*.”

- We will first discuss those “mental qualities” next. It is essential to understand those to discuss Buddha’s teachings of life. **His world views were not speculation but based on his ability to “see” how life progressed over trillions of years in the past.** It is NOT JUST a logical or philosophical argument, even though it is self-consistent.
- Understanding the essential points discussed so far is critical to continue with upcoming posts. I recommend re-reading #16 and #17 until those key ideas are grasped, at least vaguely.

18. The [“Origin of Life”](#) section discusses all possible theories in detail.

5.2.9.4 Buddhist Worldview – Introduction .1

August 26, 2019

Introduction

1. The Buddhist worldview is somewhat complicated but is self-consistent. In the previous three posts, we discussed the two dominant world views of evolutionism and creationism. The Buddha categorized them respectively as *uccheda diṭṭhi* and *sassata diṭṭhi* in the “[WebLink: suttacentral: Brahmajāla Sutta \(DN 1\)](#).” **When one removes both those wrong views, one would have removed *sakkāya diṭṭhi* and attained the *Sotāpanna* stage of *Nibbāna*.**

- In both those world views, there is the idea of an “existing person.” Evolutionists say that “a person” ends with the death of the physical body. Creationists say that the “soul” or the “ātma” of “a person” will get an “everlasting life” at some point. See the discussion so far at “[Origin of Life](#).”
- The Buddha taught that the existence of such “a person” is illusory. At each moment, there is an experience that arises due to past causes AND based on prevailing conditions. That “conditional cause and effect” or the Principle of Causality is called *Paticca Samuppāda*. **However, those experiences and any physical sufferings are real.**

2. Thus, in the Buddhist worldview, “a person,” at a given time, may be defined as a “set of *gati*” or “character qualities.” Those *gati* are the conditions to bring about the results (*vipāka*) of past actions (*kamma*). When one gets rid of those “*gati*,” that will lead to the stopping of those sense experiences burdened with suffering. That is *Parinibbāna* or “full release from suffering.” **However, the perception (*saññā*) of such “a person” will be there until one attains the *Arahanthood*.**

- That is a very brief summary. With this post, we will start discussing the details.

3. The “material or physical world” takes precedence in current dominant world views of evolutionism and creationism. Evolutionists consider mental aspects as secondary and to arise from inert matter. Thus, they believe the mind is an emergent phenomenon.

- Even the creationists do not pay much attention to the diverse mind phenomena. They believe that the mind is separate from matter and that the Creator created both.
- Buddha has taught material aspects briefly but focused on the mind in great detail. Furthermore, he has explained that the opposite of materialism is the correct worldview. **That is, instead of mind phenomena arising from inert matter, the mind is the precursor to matter.**
- That may sound astounding. That is why we need to go through the steps slowly. But it is essential first to remind ourselves that it is not possible to create a brand-new “lifestream” or a “new living being.”

A Life-Stream (Rebirth Process) Has No Beginning

4. All living beings (an infinite number of them) have lived from a time that has “no traceable beginning.” That is a cornerstone of the Buddhist worldview.

- The Buddha declared that as, “*Anamataggoyam, bhikkhave, saṃsāro*.” That means “***bhikkhus, there is no discernible beginning to the rebirth process.***” This statement is in every *sutta* in the “[WebLink: suttacentral: Anamatagga Sāmyutta](#)” in *Sāmyutta Nikāya* (SN).
- You and I have existed “forever.” We will continue to live in one of the 31 realms until we attain the *Arahanthood* and then attain *Parinibbāna*. *Parinibbāna* means “complete *Nibbāna*.” That is completely separating from this world of 31 realms. No more rebirths in this world. No more suffering.
- I have discussed this in detail in the post, “[Origin of Life – There is No Traceable Origin](#).”

5. The above statement of a life existing from a time with no traceable beginning may seem to be contradictory to the fundamental concept that nothing in this world lasts forever. There is no contradiction.

- At any time, a given “lifestream” has a *hadaya vatthu* (seat of mind) and several *pasāda rūpa* ranging from zero (in *arūpāvacara* realms or planes) to five (in *kāma* realms). *Hadaya vatthu* and a set of *pasāda rūpa* are the “*manomaya kāya*” that every living being has. It is unimaginably small (smaller than

an atom in modern science). That *manomaya kāya* keeps changing as the lifestream moves among the 31 realms.

- The *manomaya kāya* is a “mental body.” But “body” here means a “collection,” the collection of *hadaya vatthu* and a set of *pasāda rūpa*. One’s “mental body” weighs much less than a mustard seed. In fact, at the moment of conception (“*paṭisandhi viññāṇa*” descending to the womb), our “physical body” consists only of a single cell (zygote), as we discussed in “[Clarification of “Mental Body” and “Physical Body” – Different Types of “Kāya”](#).”
- In humans and animals, this *manomaya kāya* is the same as *gandhabba*. For *brahmā*, *manomaya kāya* is all they have!
- The “mental body” (*gandhabba*) is what controls the massive physical body of a human or an animal.

A Worldview Based on Experience

6. The Buddhist worldview is not a theory or speculation. The Buddha could “see” each of the 31 realms of this world. He could “see” how a lifestream moves from one realm to another based on *kamma vipāka* and prevailing conditions, i.e., *Paticca Samuppāda*.

- Many suttā describe Buddha’s and his disciples’ visits to *brahma* and *deva* planes. Others describe visits of *brahmā* and *devas* to the human world (mainly to listen to the discourses of the Buddha and to ask questions from the Buddha).
- For example, in the *Vinaya Piṭaka*, it is described that billions of *devas* and *brahmā* were there to listen to the first discourse of the Buddha, *Dhammacappavattana Sutta* (SN 56.11). The *Brahmanimantanika Sutta* (MN 49), describes how the Buddha visited the realm of the *Mahā Brahma* to explain to him that his existence is not eternal; see, “[Anidassana Viññāṇa – What It Really Means](#).”
- One time, a brahmin came to the Buddha and asked whether the Buddha believes in the existence of *devas*, *brahmā*, *apāyā*, etc. The Buddha told him that he “sees” them and communicates with them. If someone comes across the name of that sutta, please let me know: lal@puredhamma.net. I will add that reference here.
- August 28, 2019: Reader Siebe sent me the following reference: “[WebLink: suttacentral: Devadūta Sutta \(MN 130\)](#)” that describes “hells” or “*niraya*.” A translation at: “[WebLink: accesstoinsight.org: Devaduta Sutta: The Deva Messengers](#).” A similar sutta about some realms located close to Earth are described in the “[WebLink: suttacentral: Ātānātiya Sutta \(DN 23\)](#).” A translation there, “[WebLink: suttacentral: The Ātānātiya Discourse \(DN 23\)](#).” Also, see my post on August 28, 2019, at the discussion forum on, “[WebLink: Pure Dhamma Forums: Questions on Posts in the “Origin of Life” Subsection](#).” It discusses “life in hell.”
- More information on hells at: “[Does the Hell \(Niraya\) Exist?](#).” I revised and updated that post on August 29, 2019.

7. More than 2500 years ago, the Buddha described the “physical world” consisting of billions of galaxies with billions of stars in each galaxy (with different names of course).

- On the other hand, even a few hundred years ago, modern science’s view of the universe was that it included only the Solar system.
- In the early 1600s, Galileo invented the telescope. He first saw that the Moon is similar to the Earth in composition, that the stars are no different from our Sun. With more powerful telescopes, we now know that there is an unbelievable number of stars (with planets around them) out there.

8. However, the Buddha taught that studying the physical structure of the universe is not beneficial. While it is an exciting subject, studying that would not solve the “problem of suffering.” We have only a limited time in this life, and we must focus on the task of removing future suffering.

- Regarding that aspect, one should focus on one's inner world. In particular, on the issue of how suffering-filled rebirths materialize due to one's thoughts, speech, and actions. We do not need telescopes or other fancy instruments for that. We can use our minds.
- By the way, by focusing on the mental phenomena, one can also find much more about the physical world with billions of galaxies WITHOUT any scientific instrument. That is how the Buddha knew more about the universe than modern scientists.
- Therefore, the Buddhist worldview can provide a complete description of how our world. The Buddha explained how an infinite number of "lifestreams" takes different forms in a rebirth process that has no beginning.

What is One's World?

9. A given person's world is what he/she experiences. What exactly do we experience?

- We see forms with our eyes, hear sounds with ears, taste with tongues, smell with the nose, body touches with physical bodies. Those are the five physical sense faculties and the five types of "external entities" experienced by them. Modern science still thinks the mind is an "emergent phenomenon" arising from the brain.
- However, in Buddha Dhamma, the mind is much more critical than those five physical senses, and we will see why.

10. With the mind, we remember past events, think about concepts like mathematics or Buddha Dhamma, and plan for the future. That latter is the most crucial task by the mind. We think about, plan, and initiate activities by generating *saṅkhāra* in mind.

- Most such activities start due to ignorance (*avijjā*) about the real nature of this world. That is why the *akusala-mūla* Paticca Samuppāda cycle begins with "*avijjā paccayā saṅkhāra*." We create good/bad kamma via *saṅkhāra*, which lead to defiled *viññāṇa* via "*saṅkhāra paccayā viññāṇa*."
- When *viññāṇa* become strong enough, they can become *paṭisandhi viññāṇa* that fuel the rebirth process. We will discuss this later. **That is how the mind creates future existences in the Buddhist worldview.**

Our World Consists of Twelve *Āyatanas*

11. The "[WebLink: suttacentral: Chachakka Sutta \(MN 148\)](#)" describes in detail the sensory experience in the Buddhist worldview. For an English translation see, "[WebLink: suttacentral: The Six Sets of Six \(MN 148\)](#)." We will discuss this *sutta* in detail.

- In that *sutta*, the Buddha labeled our six types of internal sense faculties as six "internal *āyatana*" (*ajjhāttikāni āyatanāni*). Furthermore, he called the six external entities sensed by them as "external *āyatana*" (*bāhirāni āyatanāni*). From now on, we will use the terms "internal *āyatana*" and "external *āyatana*."
- As I emphasize often, it is best to learn what is meant by some critical Pāli words and use those Pāli words. In many cases, there are no exact English translations. Note that in the above English translation of the *sutta*, the word "*āyatana*" translated as "base." When we start discussing *Paticca Samuppāda*, you will see why it is better to use the Pāli term, *āyatana*.
- In summary, our world consists of twelve *āyatana*. Material wise, there is NOTHING ELSE in the world. The Buddha called those twelve "*sabba*" or "all"; see, [WebLink: suttacentral: Sabba Sutta \(SN 35.23\)](#).

12. The [WebLink: suttacentral: Āyatanavibhaṅga](#) provides details on the twelve *āyatana*. For example: "*Tattha katamaṃ cakkhāyatanam? Yaṃ cakkhu catunnaṃ mahābhūtānaṃ upādāya pasādo attabhāvapariyāpanno anidassano sappaṭigho, yena cakkhunā anidassanena sappaṭighena rūpaṃ*

sanidassanaṃ sappaṭighaṃ passi vā passati vā passissati vā passe vā, cakkhumpetaṃ cakkhāyatanaṃ cakkhudhātupesā cakkhundriyampetaṃ lokopeso dvārāpesā samuddopeso paṇḍarampetaṃ khetampetaṃ vatthumpetaṃ nettampetaṃ nayanampetaṃ orimaṃ tīrampetaṃ suñño gāmapeso. Idaṃ vuccati “cakkhāyatanaṃ.”

Translated: “What is *cakkhāyatana*? It is that *cakkhu pasāda* derived from the four great elements. It is *invisible (anidassano)*, makes contact (*sappaṭighena*) with visible (object).”

- I have just translated the first part with an important fact: One cannot see the *cakkhāyatana*. **It is NOT the eyes.** We will discuss in the next post how eyes act like cameras, just capturing the signal from the object. The brain processes that signal, which then is passed on to the *cakkhāyatana*.
- **In the same way, *sotāyatana*, *ghāṇāyatana*, *jivhāyatana*, *kāyāyatana* are all invisible.** Those five are the *pasāda rūpa* that I mentioned above. They are in the *manomaya kāya*, around the *hadaya vatthu* (seat of mind). Also see, “[Rūpa \(Material Form\)](#).”
- The *hadaya vatthu* and five *pasāda rūpa* are in the *manomaya kāya* overlap the heart in the physical body. That is why the *manomaya kāya* comes out when the heart is stressed, like during some heart operations; see, “[Manomaya Kāya and Out-of-Body Experience \(OBE\)](#).”

Internal and External Āyatana

13. The six INTERNAL *āyatana* (*cakkhu*, *sota*, *ghāṇa*, *jivhā*, *kāya*, and *mana*) are responsible for detecting sensory inputs.

- They are all very fine *rūpa* (traces of matter) at the *suddhaṭṭhaka* level, i.e., they are the smallest units of matter.
- However, their ability to detect external *rūpa* comes from the *kammic* energy embedded in them. Those *kammic* energies induce rotation and spin modes, i.e., those *suddhaṭṭhaka* start turning and spinning just like electrons in an atom. That is why they called units of ten or *dasaka*. For example, *cakkhu rūpa* is called a *cakkhu dasaka*. It has a *suddhaṭṭhaka* (eight units of matter) and two units of energy (one in rotation and one in spin). See, “[The Origin of Matter – Suddhatthaka](#).”
- Yes. The Buddha knew about rotation and spin before modern science. “Energy” can be in **spin** (*bramaṇa* in Pāli; *bramaṇa* or බ්‍රමණ in Sinhala) and **rotation** (*paribbraṇa* in Pāli; *bramaṇa* or පරිබ්‍රමණ in Sinhala). See, “[31 Realms Associated with the Earth](#).”

14. There are six types of EXTERNAL *āyatana* (*vaṇṇa rūpa*, *sadda rūpa*, *gandha rūpa*, *rasa rūpa*, *phoṭṭhabba rūpa*, and *dhamma rūpa* or *dhammā*).

- Most times, *vaṇṇa rūpa* are called *rūpa rūpa* or just *rūpa*. In the *Chachakka Sutta*, they are just called *rūpa*. Those are the ones we see with our eyes. Many people assume that those are the only *rūpa*. That is because they do not perceive sound as a form of *rūpa*, for example. But a sound-wave carries energy.
- Even modern science accepted that energy and matter are indistinguishable only after Einstein found the connection between energy and matter with his famous equation, $E = mc^2$.
- *Gandha* or smell is associated with fine particles of odor that flow through the air and get into our noses. *Rasa* or taste comes from the food we eat. *Phoṭṭhabba* or touch is with solid matter. So, those are also *rūpa*.
- Yes. Some of *dhamma rūpa* or *dhammā* (sensed by the mind) are also *rūpa*. *Dhammā* are called *sukhuma rūpa* because they are below the *suddhaṭṭhaka* stage. See, “[What are Rūpa? – Dhammā are Rūpa too!](#).” Also, the mind can detect memories (*nama gotta*) and concepts (like mathematics) too.

15. We have discussed all types of matter (and energy) in our world within the Buddhist worldview. In the next post, we will discuss how our mental experience (through *vedanā*, *saññā*, *saṅkhāra*, and *viññāṇa*) arise when internal *āyatana* come into contact with external *āyatana*.

5.2.9.4 Contact Between Āyatana Leads to Vipāka Viññāṇa

September 2, 2019; revised November 14, 2019; January 15, 2021 (#8)

Introduction

1. *Vipāka viññāṇa* arise due to *kamma vipāka*. In the previous post, we introduced the concept that our sensory experiences occur due to six internal *rūpā* and six external *rūpā*.

- Those six types of internal types of *rūpā* are “internal *āyatana*.” In mundane terms, those are our eyes, ears, nose, tongue, body, and the mind.
- With those, we experience sights, sounds, smells, tastes, body touches, and *dhammā* (memories, concepts, and our hopes). Those *rūpā* are external to us, and they are “external *āyatana*.”
- You may wish to review the previous post, “[Buddhist Worldview – Introduction](#).”

Awareness of Living Things and Living Beings

2. When we look at a tree, for example, that is contact between our internal *āyatana* (eyes or more correctly *cakkhu pasāda rūpa*) and external *āyatana* (tree in this case). That leads to a mental phenomenon that we call consciousness (in this case *cakkhu viññāṇa*). It just means we are “aware of that tree.”

- Humans and animals generate such “awareness” or consciousness when seeing, hearing, smelling, tasting, external *rūpā*.
- However, we know that plants and trees also seem to be aware of the external world and can even respond in some cases. For example, a plant or a tree can “turn” towards sunlight. Their roots grow towards sources of water, and away from dry soil, etc.

3. There are a couple of “mental factors” (or *cetasika*) that are not exclusively “mental.” They can arise even without a mind. Those two are *vedanā* and *saññā*.

- *Vedanā* comes from (“ve” + “danā”) which means “විම දනවිම”(vīma dānavīma meaning “being aware”) in Sinhala. That means to “become aware of something.” **When we make contact with an “external *āyatana*” via our six senses, we become aware of that external *rūpā*; that is *vedanā*.** See, “[Vedanā \(Feelings\)](#).”
- At the fundamental level, *Saññā* means “recognition” of an object or a person or a concept, for example. In general, it is the recognition of an “external *āyatana*” or “external *rūpā*.” See, “[Saññā – What It Really Means](#).”
- Therefore, plants and trees have a basic form of *vedanā* and *saññā*. **A plant can “feel” when sunlight falls on it (*vedanā*), and recognize that as sunlight (*saññā*).**

4. However, a plant CANNOT generate *saṅkhārā* (thoughts) about those *vedanā* and *saññā*. One may ask: “Then how does a plant turn towards sunlight?”

- Plants are like robots. A moving robot may have sensors that can detect obstacles in the way. That involves *vedanā* and *saññā* in the elementary sense.
- That robot may also have a computer in it which can instruct how to go around an obstacle, for example.

- The working of a plant is very similar. A plant seed has necessary “programs” installed in its cells to deal with the external environment. We discussed this a little bit in my posts on “living cells.” See, the old posts in [“Origin of Life.”](#)
- Therefore, some “live things” like plants can generate *vedanā* and *saññā*, but they CANNOT create *saṅkhārā* and *viññāṇa*. We remember that *saṅkhārā* and *viññāṇa* arise via, “*avijjā paccayā saṅkhārā*” and “*saṅkhārā paccayā viññāṇa*.”

Two Types of *Viññāṇa* of a Living Being

5. A **living thing** like a tree may have *vedanā* and *saññā*. But only a **living being** like a human or an animal has a full set of mental phenomena: *vedanā*, *saññā*, *saṅkhārā*, and *viññāṇa*.

- In other words, only living beings have minds with which they can generate *saṅkhārā* (loosely called thoughts), which in turn leads to *viññāṇa*.
- Now we will focus on two types of *viññāṇa* that arise in a living being upon a sensory contact between one of its “internal *āyatana*” and the corresponding “external *āyatana*.”
- For simplicity, let us consider the contact between *cakkhu* and *vaṇṇa rūpā* (or *rūpā rūpā* or simply *rūpā*). In mundane terms, this means “contact” between eyes and a form or an object (such as a tree).
- However, It is essential to keep in mind that **it is the *cakkhu pasāda rūpā* in the mental body (*gandhabba*) that “sees” the *vaṇṇa rūpā* or the image captured by the eyes.** See, #11 through #14 in the post, [“Buddhist Worldview – Introduction.”](#)

Vipāka Viññāṇa – No Strong *Kamma* Done

All our INITIAL sensory experiences are due to the results of our past *kamma*, i.e., they are *kamma vipāka*.

6. When eyes (or more correctly *cakkhu pasāda rūpā*) and *vaṇṇa rūpā* come into contact, *cakkhu viññāṇa* arises. ***Cakkhu viññāṇa* is “seeing.”**

- ***Cakkhu viññāṇa* arises due to *kamma vipāka*. In the same way, *sota*, *ghāṇa*, *jivhā*, and *kāya viññāṇa* are ALL “*vipāka viññāṇa*.”**
- Some *mano viññāṇa* are *vipāka viññāṇa*. For example, when we recall a past event that is a *mano viññāṇa* that cannot generate strong *kamma*.
- **There is no strong *kamma* done by *vipāka viññāṇa*.** By “strong *kamma*,” I mean *kamma* that can lead to future rebirths. Only *mano saṅkhārā* are involved in *kamma viññāṇa* (via “*avijjā paccayā saṅkhārā*” and “*saṅkhārā paccayā viññāṇa*.” I will discuss that in the sub-section, [“*Paticca Samuppāda* – Not “Self” or “No-Self.”](#)
- What is essential at this point is to remember that only *mano viññāṇa* can be either *vipāka viññāṇa* or *kamma viññāṇa* (we discuss below the second category). The other five types of *viññāṇa* (*cakkhu*, *sota*, *ghāṇa*, *jivhā*, and *kāya viññāṇa*) are only *vipāka viññāṇa*.

7. [“WebLink: suttacentral: Chachakka Sutta \(MN 148\)”](#) describes the arising of such *vipāka viññāṇa*: “*Cakkhuñca paṭicca rūpe ca uppajjati cakkhuvīññāṇaṃ, sotañca paṭicca sadde ca uppajjati sotavīññāṇaṃ, ghāṇañca paṭicca gandhe ca uppajjati ghānavīññāṇaṃ, jivhāñca paṭicca rase ca uppajjati jivhāvīññāṇaṃ, kāyañca paṭicca phoṭṭhabbe ca uppajjati kāyavīññāṇaṃ, manañca paṭicca dhamme ca uppajjati manovīññāṇaṃ.*”

- For example, *cakkhu viññāṇa* arises when a *rūpā* makes contact (*paṭicca*) with *cakkhu pasāda rūpā*. As we discussed in #12 of the previous post [“Buddhist Worldview – Introduction,”](#) *cakkhu* here DOES NOT mean “eyes”; it means “*cakkhu pasāda rūpā*.”

- When the eyes capture an image of a tree, that image is processed by the brain and then passed along to the *cakkhu pasāda rūpa* that is in the mental body or *manomaya kāya*. In the case of a human or an animal, *manomaya kāya* is the same as *gandhabba*.
- *Vipāka viññāṇa* do not generate strong *kamma*. For example, *cakkhu viññāṇa* means just “seeing,” *sota viññāṇa* means only “hearing,” etc. Just because one sees or hears, one does not do any strong *kamma*.

Vipāka Viññāṇa Could be “Consciousness”?

8. Therefore, *vipāka viññāṇa* DO NOT arise directly with *Paṭicca Samuppāda*. They occur when our sense faculties come to contact with external *rūpā*, as described in #7 above. Those *rūpā* can be six types: *vaṇṇa rūpā*, *sadda*, *gandha*, *rasa*, *phoṭṭhabba*, and *dhammā*.

- **Note:** However, immediately following the arising of a *vipāka viññāṇa* a *Paṭicca Samuppāda* process takes place in the very next *citta*. This is a deeper aspect that would of interest to those who are deep into *Abhidhamma*: “[Avyākata Paticca Samuppāda for Vipāka Viññāṇa](#).”
- The contact of an internal *āyatana* with an external *āyatana* leads to the “awareness” of that external *rūpā*.
- Therefore, *vipāka viññāṇa* could be the closest to the English word, “consciousness.” Even then, there are some *mano saṅkhārā* that arise with a *vipāka viññāṇa*. Therefore, it is better not to refer to even *vipāka viññāṇa* as just consciousness.
- **That is why the Buddha described *viññāṇa* as a magician.** But this “magic show nature” is easier to see with *kamma viññāṇa* that we discuss below. The mind on its own creates *kamma viññāṇa* via *saṅkhārā* (“*saṅkhārā paccayā viññāṇa*”).

9. When we become conscious of an external *āyatana* (or an external *rūpā*), we may get interested in it. (We need to remember that external *rūpā* include visible objects, sounds, smells, tastes, bodily touches, or memories),

- That is when we start generating NEW *KAMMA*. That will happen **IF** we get attached to that sensory experience via greed or anger, for example.
- Those CONSCIOUS thoughts (called *saṅkhārā*) lead to a new type of *mano viññāṇa*. Those *viññāṇa* arise via “*avijjā paccayā saṅkhārā*” followed by “*saṅkhārā paccayā viññāṇa*.” Such *viññāṇa* are *kamma viññāṇa*.
- Such *kamma viññāṇa* MAY arise as the next step following the generation of any of the six types of *vipāka viññāṇa*. **That happens ONLY IF we get attached to the initial *vipāka viññāṇa*.**

Kamma Viññāṇa – How We Create New Kamma

10. We do *kamma* when we start generating conscious thoughts (*vacī* and *kāya saṅkhārā*) with INTENTION. The Buddha said, “*Cetanāhaṃ, bhikkhave, kammaṃ vadāmi*” or, “*bhikkhus*, I say that *kamma* is one’s intention.” ([WebLink: suttacentral: Nibbedhika Sutta – AN 6.63](#).) When we think, speak, and act with specific INTENTION (good or bad) that leads to the generation of *kamma* (good or bad).

- However, **those initial *mano saṅkhārā* (associated with *vipāka viññāṇa*) arise AUTOMATICALLY.** Since the intention is involved indirectly, those *mano saṅkhārā* cannot bring about rebirth.
- To generate strong *kamma*, we must CONSCIOUSLY and DELIBERATELY create *saṅkhārā*.
- Such “strong *saṅkhārā*” are *vacī* and *kāya saṅkhārā*. As we have discussed before, *vacī saṅkhārā* involves “talking to oneself” and also speech. *Kāya saṅkhārā* leads to bodily actions.

- In other words, **we do *vacī kamma* and *kāya kamma* with those *vacī saṅkhārā* and *kāya saṅkhārā***. Of course, *vacī kammā* are lying, gossiping, etc., and *kāya kammā* are stealing, killing, etc.
- Stated yet another way, we generate speech and actions that can lead to future rebirths only via *vacī* and *kāya saṅkhārā*.

11. For those who are familiar with *Abhidhamma* (others can skip this and move on to #12): A sensory event discussed in #7 starts a *pañcadvāra citta vīthi* with 17 *cittā*. The *vipāka viññāṇa* occurs at the beginning of the *citta vīthi*. For example, in a “seeing event,” it is a *cakkhu viññāṇa*.

- Then, the mind accepts that sensory input with *sampaticchana* and *santirana citta*. It is in the next *citta* of *votthapana* that our minds MAKE decisions on how to respond to that sense input BASED ON our *gati* (character qualities).
- Then based on that determination, seven *javana citta* run consecutively. It is with *javana citta* that we respond (think, speak, and act).
- That is a very brief summary. More details at “[Citta Vīthi – Processing of Sense Inputs](#).”

Kamma Viññāṇa Arise Due to “Saṅkhāra Paccayā Viññāṇa”

12. Suppose one sees an appealing object and gets attached to it. One may then start thinking, speaking, and even taking action on trying to enjoy that sight again and again. That leads to the generation of *kamma* via *mano viññāṇa* (generated via *vacī* and *kāya saṅkhārā*.)

- The same happens if one gets annoyed or angry about something we see. Then one would be generating angry thoughts, speech, action. Those are also *mano viññāṇa*. **Such *mano viññāṇa* are “*kamma viññāṇa*.”**
- Of course, both those cases arise due to *avijjā*. **We get attached (or get stuck) to a given sensory input because we like it or dislike it (both are done with *taṇhā*; see below).** Both happen due to *avijjā*, not knowing the “true nature.” One comprehends the true nature when one attains “*yathābhūta ṇāṇa*.” We will discuss this in future posts.

13. **We can sort out the difference by seeing that all *kamma viññāṇa* have *saṅkhārā* as precursors.** They arise when we think, speak, act based on greed, anger, and ignorance. I will explain just the case of attachment (*taṇhā*) via greed.

- For example, when we first see something attractive, we AUTOMATICALLY get the perception of “liking it.” Those INITIAL and AUTOMATIC thoughts are *mano saṅkhārā*. These arise due to our *gati*.
- If we start pursuing such thoughts CONSCIOUSLY AND WILLFULLY, then we are generating *vitakka* and *vicāra* (which means consciously thinking about it). Those are *vacī saṅkhārā*. We may also speak out with such *vitakka/vicāra*, and *vacī saṅkhārā* are also responsible for speech.
- If our mind gets firmly attached, we may take actions using the body. Those bodily actions are due to *kāya saṅkhārā* generated in mind.

14. Now, we can see the difference between *vipāka viññāṇa* and *kamma viññāṇa*. *Vipāka viññāṇa* do not have *saṅkhārā* involved.

- On the other hand, *kamma viññāṇa* ALWAYS arise due to *saṅkhārā* generated via *avijjā*. Those are the *viññāṇa* that can lead to future *vipāka* (and even rebirth) via *akusala-mūla Paṭicca Samuppāda*.
- In other words, *kamma viññāṇa* are the *viññāṇa* arising via “*avijjā paccayā saṅkhārā*” followed by “*saṅkhārā paccayā viññāṇa*.”
- That process continues with “*viññāṇa paccayā nāmarūpa*,” etc. and ends up in “*bhava paccayā jāti*,” “*jāti paccayā jarā, maraṇa*,” and “the whole mass of suffering.”

- That is why those created with *saṅkhārā* are *kamma viññāṇa*.

Summary

15. To summarize what we discussed in this post:

- *Cakkhu, sota, ghāṇa, jivhā, and kāya viññāṇa* are **ONLY vipāka viññāṇa**. They cannot lead to new rebirths.
- *Kamma viññāṇa* are those *viññāṇa* that **COULD** lead to future rebirths.
- *Mano viññāṇa* can be “*vipāka viññāṇa*” or “*kamma viññāṇa*.”

16. We will discuss more details in the next post. I am proceeding slowly to emphasize these fundamental ideas. It is crucial to be able to understand what is MEANT by a given critical key Pāli word. Then we can use that Pāli word, without having to explain its meaning again.

- I hope by now you can appreciate why it is not correct to translate *viññāṇa* as just “consciousness”.
- In the same way, *taṇhā* is NOT just greed. *Taṇhā* includes getting attached via anger too; see, “[Tanhā – How We Attach Via Greed, Hate, and Ignorance](#).” Also, see #12 above.
- There are several keywords like that, including *anicca* and *anatta*.
- It is critical to understand the meanings of such key Pāli words since there are no equivalent English words.

5.2.9.4 How Do Sense Faculties Become Internal Āyatana?

September 8, 2019

Introduction

1. Sense faculties are a key concept in Buddha Dhamma. In mundane usage, we are used to identifying sense faculties as eyes, ears, nose, tongue, and the body.

- However, in Buddha Dhamma, there are two different Pāli words depending on the usage of those sense faculties.
- The sense faculties of a normal human are “**internal āyatana**.” With those, an average person experiences the outside world AND **forms attachments to them**.
- Then those external *rūpā* become “**external āyatana**” (for example, “my house”, “my friend”, etc); see, “[Contact Between Āyatana Leads to Vipāka Viññāṇa](#).” **Therefore, external āyatana are the external rūpā that one gets attached to.**

2. An *Arahant* has removed all greed, anger, and ignorance from the mind. The sense faculties of an *Arahant* are *indriya*. With his sensory faculties, an *Arahant* experiences “**external rūpā**” such as “a house”, “a person”, etc. without any attachment. That house may be an elegant house where he lived some time back. But now it is just a house. That person could have been a “close friend” at that time, but now just another human being. Of course, the *Arahant* will recognize the house to be the one he lived in as a child and that the person was his friend.

- In brief, a sense faculty is an *indriya* if there is no “attachment.” It becomes an **internal āyatana** if one is attracted to it or repulsed by it. In the same way, an **external rūpā** becomes an **external āyatana** if one becomes attached to it.

- The Pāli word for attachment is “*taṇhā*.” It is critical to realize “attachment” can take place via greed, anger, revulsion, or ignorance. Once “attached”, one just keeps thinking about it (that means generating *saṅkhāra*; see below). Also, see “[Tanhā – How We Attach Via Greed, Hate, and Ignorance.](#)”

How Do *Indriya* Become Internal *Āyatana*?

3. First, let us further clarify the difference between an *internal āyatana* and an *indriya*.

- We have six sense faculties, not just the five mentioned above. They are eyes (*cakkhu*), ears (*sota*), nose (*ghāṇa*), tongue (*jivhā*), body (*kāya*), and the mind (*mano*).
- Our initial sense inputs (what we see, hear, etc) are due to *kamma vipāka*. **At the moment we experience them, we are using our sense faculties as *indriya*.** For example, when we see an attractive person while on the road, that is just “seeing the event” with the *cakkhu indriya*.
- However, based on those initial sense experience, we may INTENTIONALLY use those *indriya* to enjoy that sensory experience again and again. Then those *indriya* become *āyatana*. In the above example, if we get attached to that attractive person and keep looking at that person, then we are using our eyes as *cakkhāyatana* (*cakkhu āyatana* rhymes as *cakkhāyatana*.)
- **Therefore, an initial sensory event is captured by an *indriya*.** But just after receiving that sensory input, we tend to use that sense faculty as an internal *āyatana*. That happens if we get attached or form “*taṇhā*”; see #2 above.
- There is no equivalent English word for *āyatana*, so we will keep using *indriya* and *āyatana* from now on.

4. Let us take the example of two people eating a delicious cake. One is an average human (X) and the other a *Arahant*. Here the sense faculty is taste (*jivhā*).

- Both will generate the same kind of *jivhā viññāṇa* when they first taste it. That is just the taste of the cake. If the sensory elements in the tongue and the brain are working normally, both will be likely to find that cake “tasty.” That “good taste” is a *kamma vipāka*. (By the way, there is an infinite number of *kamma bīja* waiting to bear fruit, including such a “small *vipāka*” as tasting a piece of cake.)
- The difference becomes apparent just after tasting the cake. The *Arahant* would forget all about that taste, even though he/she would have felt the “good taste.” It was just a sensory experience and thus the *Arahant* was using that sense faculty as an *indriya*.
- On the other hand, X may “fall in love” with that tasty cake. She may ask for another serving. **Now she is using that sense faculty as an *āyatana*.** She will be accumulating NEW *kamma* with such actions.

How One *Indriya* Can Lead to Many *Āyatana* (*Salāyatana*)

5. In many cases, when we experience a sensory event due to one *indriya*, we may start using some or all of the six *indriya* as *āyatana*. Then the set of *indriya* becomes *salāyatana*.

- In the above example of a tasty cake (which is a *kamma vipāka* for both), they both experience “a tasty cake.” While the *Arahant* will not have any more thoughts about that taste, the average human (X) may be just getting started. She may ask for another piece even if she is not hungry.
- Let us analyze the situation carefully. The *Arahant* may accept for a second piece if he is hungry. That request was not made because of a greedy thought. Thus, the tongue (or more precisely the *jivhā pasāda*) has NOT become a *āyatana*.
- If X asks for another piece even if she is not hungry, that is definitely due to craving for that taste. Then her tongue has become a *āyatana*. If she is hungry, her request could be based on BOTH hunger and craving. So, now her tongue (more precisely *jivhā pasāda*) is still a *āyatana*, but the difference is not as clear cut.

6. Whether or not X's *jivhā pasāda rūpā* (internal *indriya* for tasting) has truly become a *āyatana* or not may become more clear if she takes further action.

- She may smell it and say, “it smells good too.” She may keep saying how good the taste is, and ask for the recipe or inquire about where to buy one.
- Now many of her sense faculties have become *āyatana*. *Ghāṇa pasāda rūpā* (for smelling) has now become *ghāṇāyatana* (*ghāṇa* + *āyatana*).
- She is thinking about how to go about tasting that cake again. Therefore, the mind (*mana*) has become *manāyatana* (*mana* + *āyatana*).
- If she starts writing down the recipe, her body (*kāya*) is helping out too, acting as a *kāyāyatana* (*kāya* + *āyatana*).
- Therefore, when more than one *āyatana* become engaged, the set of *āyatana* (called *saḷāyatana*), may come into play. But it all started with just one sensory input, in this case eating a piece of cake.

Indriya Become Āyatana With Saṅkhāra

7. The easiest way to figure out whether an *indriya* has become an *āyatana* or not is to check whether one has started generating CONSCIOUS thoughts about that sensory input or experience.

- Interest in a sensory input leads to attachment to it via greed, revulsion, or ignorance.
- For example, the smell of good perfume can lead to thinking about buying it. Seeing an enemy, one may generate angry thoughts. In some situations, one may get confused about what to do and make the wrong decisions.
- **Such CONSCIOUS thoughts are *vacī* and *kāya saṅkhāra*.**
- *Vacī saṅkhāra* are “talks to oneself” and possibly speaking too. First, greedy/angry/ignorant thoughts are generated and those may lead to speaking out (lying, gossiping, etc).
- *Kāya saṅkhāra* involve bodily actions, for example, hitting, stealing, killings, etc. Here one would be using *āyatana* since one would need to look and hear in addition to moving body parts.

8. Most of the time we use our sense faculties as *indriya*: we see, hear, etc many things in a day but ignore most of them. But when we experience something we have a craving for, then we start using our sense faculties as *āyatana*.

- The *akusala-mūla Paṭicca Samuppāda* cycle operates only when we use our sense faculties as *āyatana*.
- Those *saṅkhāra* do not arise in an *Arahant*. That is because such *saṅkhāra* arise due to *avijjā*, i.e., they arise via “*avijjā paccayā saṅkhāra*.”
- An *Arahant* ALWAYS uses his/her sense faculties as *indriya*. He/she will see, hear, etc just like an average human, but will not get “attached to” anything. Therefore, the *akusala-mūla Paṭicca Samuppāda* cycle does not operate for an *Arahant*.

Abhisāṅkhāra Are Stronger Versions of Saṅkhāra

9. Some of those “extra activities” that we do with *āyatana* could be *abhisāṅkhāra*. Just eating a cake is not *abhisāṅkhāra*; see, “[Kāma Guna, Kāma, Kāma Rāga, Kāmacchanda](#).”

- The distinction between *saṅkhāra* and *abhisāṅkhāra* is clear-cut when those conscious thoughts (and therefore speech and actions) become immoral.
- Generating thoughts of anger on a person is *abhisāṅkhāra*. Then telling a lie about that person is also *abhisāṅkhāra*. Both are *vacī kamma* done with *vacī (abhi)saṅkhāra*.
- Stealing something or hitting someone is a *kāya kamma* done with *kāya (abhi)saṅkhāra*.

- Therefore, obviously immoral thoughts, speech, and actions are based on *abhisaṅkhāra*. They are *apuññābhisāṅkhāra* (*apuñña* + *abhi* + *saṅkhāra*) or immoral strong *saṅkhāra*.

10. We can get some insights by analyzing the case of a young person (Z) becoming an alcoholic due to association with bad friends. As a child, Z may see a bottle of alcohol and would not generate any second thoughts about it. It would just be a “seeing event” and Z would be only using his eyes (or more precisely *cakkhu pasāda rūpā*) as *cakkhu indriya*.

- But Z had some bad friends and they persuaded him to start drinking. He has now become an alcoholic. If he sees a bottle of alcohol now, he would immediately think about having a drink. Of course, he would have a drink if he is at a party. If he is at home, and the bottle belongs to his father, he may steal a drink from it. If he is traveling by himself and sees a bar, he may go in and have a drink.
- It could get even worse. He may be drinking at a party and may get into an argument with someone. Suppose that leads to a fight and he kills that person. He may get the death sentence or at least go to jail for a long time. But a much worse outcome awaits him at his death. He would be born in an *apāya*.
- I hope you can see that *vacī* and *kāya saṅkhāra* are behind all those. In fact, they are strong *saṅkhāra*. They are thus *abhisāṅkhāra*. If he kills someone, that is due to an *apuññābhisāṅkhāra*. That would qualify him to be born in an *apāya*.

11. There are also *puññābhisāṅkhāra* (*puñña* + *abhi* + *saṅkhāra*) or moral strong *saṅkhāra*.

- For example, feeding a hungry person or giving to charity are *kāya kamma* done with strong *kāya saṅkhāra*. They are both *puññābhisāṅkhāra*.
- Such strong *puñña kamma* done with *puññābhisāṅkhāra* lead to good rebirths (in human and higher realms).

How Do External *Rūpā* Become External *Āyatana*?

12. The moment an *indriya* becomes an internal *āyatana*, the corresponding external *rūpā* becomes an external *āyatana*.

- Let us consider the following example. You are walking down a street and see a person coming toward you at a distance. Without recognizing who it is, your eyes are working only as *indriya*. But as the person gets closer, you recognize him as one of your friends. At that moment, your *cakkhu indriya* has become a *cakkhāyatana*. At the same time, that external *rūpā* of a “person” has now become a “friend.”
- To take that one step further, suppose after some time you get into an argument with that friend and it escalates to the point that he has become an enemy. Now if you see him on the road, you will recognize him as an enemy. At that moment of seeing him, your *cakkhu indriya* will again become an internal *āyatana*, and his body that you see will become an external *āyatana*.
- However, those two external *āyatana* are very different. In one case you saw a friend and in the other an enemy, even though that external *rūpā* (body of that other person) was the same.

13. We can find many examples in our daily lives to see how an *indriya* becomes a *āyatana*. In another example, suppose you park the car on the side of the road and go to a restaurant to eat. When you come back, you see that someone has bumped his car into it and there is a scratch on it. You, of course, get upset.

- Suppose after a while you sell that car. Then a few days later, you see that it has been totally destroyed in an accident. But now you are not upset about the same car getting destroyed. When you see that badly-damaged car, your *cakkhu indriya* does not become an internal *āyatana*. And that external *rūpā* (the car) does not become an external *āyatana*.
- The only difference was that you had given up the attachment to that car the moment you sold it. It is no longer “your car.” It became just another car, the moment you gave up the “ownership” of the car.

How to Stop *Indriya* Becoming *Āyatana*?

14. That last example illustrates how one ends suffering at the *Arahanthood*. When one no longer attaches to ANYTHING in this world, one's mind will not be perturbed by anything. That includes knowing that one day one's own body will die.

- However, **that state of mind of *Arahanthood* cannot even be comprehended by an average human.** It is a long process from being an average human to an *Arahant*.
- We must follow the path step-by-step. Those attachments to “worldly things” CANNOT be forcefully removed from one's mind. The first step is to comprehend the unfruitfulness and danger of doing IMMORAL things in order to get sensory enjoyment. See, “[Is It Necessary for a Buddhist to Eliminate Sensual Desires?](#).”
- However, it is good to get an overview of the “big picture” or the fundamentals of Buddha Dhamma at the beginning. That is necessary to discard the wrong views about this world including *kamma* and *kamma vipāka*, and the validity of the rebirth process. With wrong views about such fundamental concepts, one cannot even start on the Noble Eightfold Path.
- That is why this series on “[Origin of Life](#)” is so important. One must evaluate all existing views (which we summarized in the early posts in this series). The Buddhist view is more complex and it will take several more posts to complete.

5.2.9.4 *Indriya* Make Phassa and *Āyatana* Make Samphassa

September 15, 2019; revised November 13, 2019; August 4, 2022

Summary of “Worldview of The Buddha” So Far

1. We are discussing the “[WebLink: suttacentral: Chachakka Sutta \(MN 148\)](#)” which describes the sensory experience in the Buddhist worldview in detail. As we will see, this *sutta* explains how each person's world arises due to his/her actions.

- Each living being's existence as a human, *deva*, animal, etc. has arisen due to past actions. Those previous actions (*kamma*) resulted due to sensory experiences.
- If one does immoral actions (*pāpa kamma*) to gain/maintain sensory pleasures, *kamma vipāka* of those *kamma* lead to rebirths in “bad realms” called *dugati*. The word *dugati* comes from “*du*” + “*gati*” or “bad *gati*.” [*du*- : *dur*- prefix [Sk. duḥ, duṣ] Evil, bad, difficult. 惡的, 不好的, (困)難的.]
- On the other hand, meritorious deeds (*puñña kamma*) lead to rebirths in “good realms” or *sugati* realms. The word *sugati* comes from “*su*” + “*gati*” or “good *gati*.” [*su*- prefix : kind, good, easy. 善的, 好的, 容易的]
- However, due to ignorance, living beings tend to do many more immoral deeds than moral ones. Therefore, more than 99% of the rebirths are in *dugati* realms. That is why the rebirth process is “filled with suffering.” See, “[Rebirth – Connection to Suffering in the First Noble Truth](#).”

With *Taṇhā*, *Indriya* Become *Āyatana*

2. Our sensory experiences constitute “our world.” We experience six types of sensory inputs (*rūpa rūpa*, *sadda rūpa*, *gandha rūpa*, *rasa rūpa*, *phoṭṭhabba rūpa*, *dhammā rūpa*) with six kinds of *indriya* we have (*cakkhu*, *sota*, *ghāṇa*, *jivhā*, *kāya*, *mano*). When the corresponding pairs make “contact” (*phassa*), one of the six matching types of *viññāṇa* arise (*cakkhu*, *sota*, *ghāṇa*, *jivhā*, *kāya*, and *mano viññāṇa*.) Those are *vipāka viññāṇa*. See, “[Buddhist Worldview – Introduction](#).”

- Average humans go beyond experiencing *vipāka viññāṇa*. They deliberately make more sensory contacts to “enjoy them more.” Then the six *indriya* become six internal *āyatana*, and the six types of external *rūpa* become external *āyatana*. See, “[Contact Between Āyatana Leads to Vipāka Viññāṇa](#).”
- An *indriya* makes “just contact” or “*phassa*.” **When sensory contacts are done “with attachment or *taṇhā*,” those *indriya* become internal *āyatana*.** That is the crucial concept explained in the previous post, “[How Do Sense Faculties Become Internal Āyatana?](#).”
- You may want to re-read the above posts if something is not clear. Of course, I would be happy to answer any questions.

The Transition from Just a Sensory Contact to *Kamma* Formation

3. Even for an average human, the INITIAL CONTACT between an internal *āyatana* and an external *āyatana* does not lead to the generation of strong *kamma*. For example, only when we see a beautiful thing or a person (called *rūpa rūpa* or just *rūpa*), that we become aware of that *rūpa*. (There are *mano saṅkhāra* that arise automatically. *Mano saṅkhāra* cannot lead to a strong *kamma* responsible for rebirth. We will discuss that later.)

- However, for anyone who has not reached the *Arahant* stage, sense faculties is labeled as “internal *āyatana*,” and external *rūpa* are labeled “external *āyatana*.” That is evident in the *Chachakka Sutta* (MN 148).
- Only *Arahant* uses his/her sense faculties as *indriya* all the time.

4. In the *Chachakka Sutta* (MN 148), that initial contact — for example between *cakkhāyatana* (*cakkhu*) and *rūpāyatana* (*rūpa*) — is stated as “***Cakkhuṇca paṭicca rūpe ca uppajjati cakkhu viññāṇaṃ***.” Similar statements are there for the other five pairs, the last one being “*manāṇca paṭicca dhamme ca uppajjati mano viññāṇaṃ*.”

- We will focus on the progression of what happens due to the contact between *cakkhu* and *rūpa* (eyes and an external object in mundane terms.) Other types of contacts will lead to similar results.
- The *sutta* states that the “attachment” step starts with the next paragraph. Regarding the contact between *cakkhu* and *rūpa*, it says, “*Cakkhuṇca paṭicca rūpe ca uppajjati cakkhu viññāṇaṃ, **tiṇṇaṃ saṅgati phasso***.” (Note that each successive paragraph of the *sutta* is the next step the mind takes.)

What is “*tiṇṇaṃ saṅgati phasso*”?

5. The phrase “*tiṇṇaṃ saṅgati phasso*” is commonly mistranslated as “the meeting of the three is contact.” What are those three? Are they *cakkhu*, *rūpa*, and *cakkhuvīññāṇa*? That is not correct because the “contact” (*phasso*) leads to “*phassa paccayā vedanā*,” as we will discuss below. This “*phassa paccayā vedanā*” arises AFTER *cakkhu viññāṇa*.

- **That short verse is a KEY verse in the whole *sutta*.** It expresses how an *indriya* becomes *āyatana* due to one’s *gati*. Those are the *gati* for attachment (*taṇhā*) via craving or dislike.
- “*Tiṇṇaṃ*” is three and “*saṅgati*” (“*san*” + “*gati*”) are “*gati* contaminated with *san*.” Normal humans have *gati* based on three fundamental root causes: *lobha* (greed), *dosa* (anger/hate), and *moha* (no comprehension of the Four Noble Truths). That is why “*san*” is a keyword in Buddha Dhamma; see, “[What is “San”? Meaning of Sansāra \(or Samsāra\)](#).” [*saṅgati* :[f.] association with. *gati* :[f.] going; career; course; passing on to another existence; destiny; behaviour.]
- Just like the word “*san*,” another critical Pāli word that has lost its significance over the years is “*gati*.” I have explained this word in detail in many posts. See, for example, “[The Law of Attraction, Habits, Character \(Gati\), and Cravings \(Asavas\)](#)” and “[9. Key to Anapanasati – How to Change Habits and Character \(Gati\)](#).”

Phassa in “*Tiṇṇaṃ Saṅgati Phasso*” Is *Samphassa*

6. Therefore, following that initial sensory contact, one MAY form a like/dislike for the seen, heard, smelled, tasted, touched, or memory that came to mind (*dhammā*). But it happens within a fraction of a second of the initial *cakkhu viññāṇa*.

- For example, a young lady looking at a dress may form a liking for it. Another person seeing his enemy will develop a dislike. A teenager may get attached to a particular song, etc.
- Such mental contacts — with likes/dislikes or “*san*” — happen instantaneously due to our “*gati*.” We do not have any control over it.
- However, there is a lag between that initial reaction and our subsequent conscious actions. Therefore, we still have time to control our speech or bodily actions. Even if bad thoughts come to our minds, we can stop speech or bodily actions. That is what we do in “*kāyānupassanā*” in *Satipatṭhāna* meditations. See “[9. Key to Anapanasati – How to Change Habits and Character \(Gati\)](#)” and “[Mahā Satipatṭhāna Sutta](#).”
- Those contacts (*phassa*) done with “*san*” are *samphassa*. **Here, “*san*” + “*phassa*” combine to rhyme as “*sanphassa*.” But “*samphassa*” rhymes better.** In the same way, “*saṅsāra*” (“*san*” + “*sāra*” or “good”) is commonly pronounced — and written — as “*samsāra*.”

No *Samphassa* for an *Arahant*

7. An *Arahant* has no “*gati*” left. All defiled “*gati*” arise due to *lobha*, *dosa*, *moha*. Therefore, an *Arahant* does not attach (*taṇhā*) to any sensory event. In other words, “*tiṇṇaṃ saṅgati phasso*” does not take place in an *Arahant*’s mind. Also, note that attachment (*taṇhā*) can be due to attraction (liking) or aversion (dislike). See “[Tanhā – How We Attach Via Greed, Hate, and Ignorance](#).”

- That is why an *Arahant* will never elevate his *indriya* to “internal *āyatana*.” Therefore, any external *rūpa* sensed by a given *indriya* will be “just a *rūpa*.” No matter how attractive a person is or how tasty a given food, etc., there will be no attachment to it. A bribe of any value will not be able to entice an *Arahant*.
- In the same way, even if someone cuts his/her arm off, there will be no anger generated in *Arahant*’s mind.
- Such a mindset is incomprehensible to an average human. **That is WHY one should not even contemplate that far on the Path.** When on a long journey on foot, we focus on the next mile, not the final stretch hundreds of miles down the road. However, having a general idea about the whole terrain is good.

8. The state of mind of an *Arahant* could seem “hard to achieve” even to an *Anāgāmi*, even though it may no longer seem incomprehensible.

- For a *Sotāpanna*, the mindset of an *Anāgāmi* seems “out-of-reach.” As we know, the *Anāgāmi* stage is reached by getting rid of cravings for sensory pleasures. It is not easy to remove our deeply-embedded desires for sensory pleasures. For an average human, this would be impossible. But a *Sotāpanna* has seen the “*anicca* nature.”
- However, a *Sotāpanna* will not be tempted to do immoral actions to enjoy sensory pleasures. A *Sotāpanna* could be living a normal life of a “householder” but will NEVER engage in any “*apāyagāmi* actions.” Those immoral deeds make one eligible to be born in the *apāyā*. For example, a *Sotāpanna* will not engage in extra-marital affairs.

“*Phassa Paccayā Vedanā*” Is Actually “*Samphassa jā Vedanā*”

9. Now we get to the next verse in the *Chachakka Sutta* (MN 148): “*Cakkhuñca paṭicca rūpe ca uppajjati cakkhu viññāṇaṃ, tiṇṇaṃ saṅgati phasso, phassa paccayā vedanā.*”

- (I hope you see the way the *sutta* makes gradual progression. “*Phassa paccayā vedanā*” is the third step in the progress of the sensory experience. But all these steps — including more steps in the rest of *sutta* — happen within a split second. Only a Buddha can “see” these details in this fast process that occurs in mind.)
- From the above discussion, it is clear that “*phassa paccayā vedanā*” should be “*samphassa paccayā vedanā.*” *In some suttā, it is written as “samphassa jā vedanā.”* Here “*jā*” means “born due to.” **In other words, a *vedanā* arises due to “*samphassa.*”**
- Therefore, this is the SECOND TYPE of *vedanā* that can arise due to a sensory event. That CAN BE stopped from arising. That type of *vedanā* does not occur in an *Arahant*.

The difference in Sensory Experience Between an Average Human and an *Arahant*

10. “*Tiṇṇaṃ saṅgati phasso*” and “*phassa paccayā vedanā*” are two critical steps in the progression of the sensory experience.

- Those two steps state how anyone without full comprehension of *Tilakkhaṇa* (*anicca, dukkha, anatta* nature) COULD generate additional types of *vedanā*.
- Now we need to recall something important from the earlier posts, “[Contact Between Āyatana Leads to Vipāka Viññāṇa](#)” and “[How Do Sense Faculties Become Internal Āyatana?](#)” In those two posts, we discussed the initial sensory contact, for example, “*cakkhuñca paṭicca rūpe ca uppajjati cakkhu viññāṇaṃ.*” That gave rise to a *vedanā* common to an average human and an *Arahant*.
- As we discussed in the previous post, an average human and an *Arahant* would feel the “sweetness” of a piece of cake. You may want to go back and read those two posts to refresh your memory.
- Now it is those two steps of “*tiṇṇaṃ saṅgati phasso*” and “*phassa paccayā vedanā*” that COULD generate ADDITIONAL *vedanā* of attachment (to the cake in that example) in an average human. Such *vedanā* DO NOT arise in an *Arahant* since there are no attachments left.

Summary

11. I am taking the two extreme cases of an average human and an *Arahant* to explain the critical concepts in the *Chachakka Sutta* (MN 148). In many *suttā*, key ideas are just briefly stated, i.e., they are in either “*uddesa*” or “*niddesa*” versions. See “[Sutta Interpretation – Uddesa, Niddesa, Patiniddesa.](#)”

- I hope you can see that key *suttā* like the *Chachakka Sutta* (MN 148) need detailed explanations. That is the “*paṭiniddesa*” version of a *sutta*.
- That is why translating such a *sutta* word-by-word is of minimal benefit. There is no need to study many *suttā*. Understanding a few *suttā* in detail can lead to a good understanding of the Buddha’s core teachings.
- Therefore, it is essential to understand these fundamental ideas. If something is not clear, I would be happy to explain further.

12. We will discuss the types of *vedanā* that can arise due to “*phassa paccayā vedanā*” or more accurately, “*samphassa jā vedanā.*” See, “[Vipāka Vedanā and “Samphassa jā Vedanā” in a Sensory Event.](#)”

An Aside (Extra Information)

13. The steps we have discussed so far, “*Cakkhuñca paṭicca rūpe ca uppajjati cakkhu viññāṇam, tiṇṇam saṅgati phasso, phassa paccayā vedanā*” are just a part of the more general statement, “*saḷāyatana paccayā phasso; phassapaccayā vedanā*,..” in *Paṭicca Samuppāda*.

- In the [WebLink: suttacentral: Vibhaṅga Sutta \(SN 12.2\)](#), the terms “*phassa*” and “*vedanā*” are clarified as “*samphassa*” and “*samphassa jā vedanā*.” That applies only to the average human acting with *avijjā* (i.e., in *Paṭicca Samuppāda* and the *Chachakka Sutta* (MN 148).
- “*Phassa*” in *Paṭicca Samuppāda* is explained in the *Vibhaṅga Sutta* (SN 12.2): “*Katamo ca, bhikkhave, phasso? Chayime, bhikkhave, phassakāyā—cakkhusamphasso, sotasamphasso, ghānasamphasso, jivhāsamphasso, kāyasamphasso, manosamphasso. Ayam vuccati, bhikkhave, phasso.*”
- “*Vedana*” in *Paṭicca Samuppāda* is explained in the *Vibhaṅga Sutta* (SN 12.2): “*Katamā ca, bhikkhave, vedanā? Chayime, bhikkhave, vedanākāyā—cakkhusamphassajā vedanā, sotasamphassajā vedanā, ghānasamphassajā vedanā, jivhāsamphassajā vedanā, kāyasamphassajā vedanā, manosamphassajā vedanā. Ayam vuccati, bhikkhave, vedanā.*”
- If you do not see the connection, don’t worry about it. We will discuss all types of *vedanā* in the next post, “[Vipāka Vedanā and “Samphassa jā Vedanā” in a Sensory Event.](#)” Understanding that will help get rid of *sakkāya diṭṭhi*; see “[Paṭicca Samuppāda – A “Self” Exists Due to Avijjā.](#)”

5.2.9.5 Wider Worldview of the Buddha

[The Framework of Buddha Dhamma](#)

[The Suffering \(Dukkha\) in the First Noble Truth](#)

[Dangers of Ten Types of Wrong Views and Four Possible Paths](#)

[Sammā Diṭṭhī – Only One Leads to the Noble Path](#)

[Fear of Nibbāna \(Enlightenment\)](#)

5.2.9.5 The Framework of Buddha Dhamma .1

February 22, 2020; revised February 25, 2020

Introduction

The framework of Buddha Dhamma identifies the critical foundation upon which Buddha’s teachings can be understood.

1. We have finished the section on “[Worldview of the Buddha](#).” There we discussed Buddha’s analysis of sensory events, i.e., how we experience the external world. However, we have not addressed the “real nature” of that external world.

- With this post, I will be starting a new section on the “Wider Worldview of the Buddha.” This section describes a world that includes 29 more realms than the two that we are familiar with, i.e., human and animal realms. The Buddha explained how any living being keeps moving from one realm to another in the rebirth process that has no discernible beginning (and no end until attaining *Nibbāna*.)
- The First Noble Truth on suffering is NOT about the suffering that we feel due to diseases, bodily pains, etc. **even though that is a tiny fraction.** It is about the much worse possible suffering in future lives, where most suffering will be in “undesirable realms.”
- To understand the “suffering” that the Buddha said we could stop, it is essential to understand that “wider worldview.”

- The Buddha laid out the critical components of that framework in the first two discourses that he delivered. In the word-by-word translations of the *sutta*, this “wider worldview” of the Buddha is just glossed over. No one seems to pay much attention to these key concepts, without which there is no point in doing further analysis. It is like trying to learn calculus without learning addition/subtraction first.

The First Two Discourses of the Buddha

2. *Dhammacakkappavattana Sutta* (SN 56.11) was the first discourse delivered by the Buddha. The five ascetics Koṇḍañña, Bhaddiya, Vappa, Mahānāma, and Assaji, listened to it several days after the Buddha attained Enlightenment (*Buddhahood*.) All five ascetics reached the *Sotāpanna* stage after several days of explaining by the Buddha.

- Then with the delivery of the second *sutta*, [WebLink: suttacentral: Anattalakkhana Sutta \(SN 22.59\)](#), all five ascetics attained the *Arahanthood*.
- Later on, Ven. Sariputta delivered the [WebLink: suttacentral: Saccavibhaṅga Sutta \(MN 141\)](#) to a gathering of *bhikkhus* to explain further details of the *Dhammacakkappavattana Sutta*.
- Therefore, a good understanding of Buddha Dhamma is possible with a discussion of those three *suttā*.

The Framework of Buddha Dhamma

3. *Dhammacakkappavattana Sutta* has most of the essential concepts, even though it is in a highly condensed form.

In the document, [WebLink: pdf download: Dhammacakkappavattana Sutta – Printout](#), I have divided the *sutta* to 14 sections, You may want to download and print for reference. We will discuss that document first. It has the framework of Buddha Dhamma.

- The name of the *sutta* comes from the combination of three terms: *Dhamma*, *Cakka*, and *Pavattana*. *Dhamma* here means the Buddha Dhamma or the true nature of existence. *Cakka* means “wheel.” *Pavattana* means to “set in motion” AND to “maintain.”
- Therefore, this first *sutta* “gets the Wheel of Dhamma in Motion.” **It has all the critical concepts of Buddha Dhamma.**
- As in many Pāli terms, the word “*dhammacakkappavattana*” comes from the combination of three above words, with an additional “p” just before *pavattana*. As we discussed before, *pañcakkhandha* is the combination of *pañca* with *khandha* with an extra k in tying up the two words.
- Sometimes the *sutta* referred to as the *Dhamma Cakka Pavattana Sutta* without combining those three words.
- Let us go through the *sutta* from the beginning. I will refer to sections #1 through #14 in the document above. We will first go through the main ideas without going to detail.

The “Middle Path” Recommended by the Buddha – Sections 1 and 2

4. Section #1 can be summarized as follows. “*Bhikkhus*, two extremes should not be followed by you. What two? The pursuit of sensual pleasures, which is low, vulgar, the way of the average ignorant person. The other is the pursuit of rituals that involve subjecting one to extreme hardships. Without veering towards either of these extremes, the *Tathāgata* followed the middle way of living a simple life leading to *Nibbāna*.”

- That middle path is the Noble Eightfold Path of *Sammā Ditṭhi*, *Sammā Saṅkappa*, *Sammā Vācā*, *Sammā Kammanta*, *Sammā Ājīva*, *Sammā Vāyāma*, *Sammā Sati*, and, *Sammā Samādhi*.

Four Noble Truths – Section 3

5. **The First Noble Truth of suffering:** Birth is suffering, aging is suffering, illness is suffering; death is suffering. Union with what is undesirable is suffering. Separation from what is desirable is suffering. **Not to get what one wants (*icchā*)** is suffering. In brief, clinging (*upādāna*) to the five aggregates is suffering.

- **The Second Noble Truth of the origin of suffering:** It is this *taṇhā* which leads to repeated rebirths. That *taṇhā* is three-fold: *kāma taṇhā*, *bhava taṇhā*, *vibhava taṇhā*.
- **The Third Noble Truth of the cessation of suffering:** It is the remainderless fading away and cessation of the three types of *taṇhā*.
- **The Fourth Noble Truth of the way to the cessation of suffering:** It is the Noble Eightfold Path or the Middle Path of *Sammā Diṭṭhi*, *Sammā Saṅkappa*, *Sammā Vācā*, *Sammā Kammanta*, *Sammā Ājīva*, *Sammā Vāyāma*, *Sammā Sati*, and, *Sammā Samādhi*.

The Previously Unheard *Dhamma* (Teaching) of Suffering in The Wider World – Sections 4 – 7

6. Sections 4 through 7 state how the Buddha attained the *Buddhahood* via comprehending — through *Paticca Samuppāda* — the *tiparivaṭṭaya* (three ramparts or walls of bondage to this world) that has never been known to the world (except during the times of previous Buddhā): “..*pubbe ananussutesu dhammesu*..”

- We will discuss Sections 4 through 7 in more detail later. Right now, we are taking a quick look at the framework of Buddha Dhamma outlined in the *sutta*.
- However, it is essential to discuss the verse, “..*pubbe ananussutesu dhammesu cakkhuṃ udapādi, ñāṇaṃ udapādi, paññā udapādi, vijjā udapādi, āloko udapādi*,” that appears 12 times in the Sections 4 through 7. It is critical to understand this verse.

7. When the Buddha attained the Buddhahood via comprehending this Dhamma that has never been known to the world, five unique pieces of knowledge arose in him at that moment: *cakkhu*, *ñāṇa*, *paññā*, *vijjā*, and *āloka*.

- Here “*cakkhu*” is the “Dhamma eye,” the ability to “see” the true nature of this world. We can loosely translate *ñāṇa* and *paññā* as “knowledge” and “wisdom.”
- The next one is “*vijjā*” (the Sanskrit word is “*vidyā*”). That is the “ultimate science” about the world, what I called the “[The Grand Unified Theory of Dhamma](#).” A Buddha Is the greatest scientist that comes to the world very infrequently.
- Simultaneously with the comprehension of *vijjā*, one is removed from “this material world” or “*āloka*” (“*ā*” + “*loka*”). The word “*āloka*” has other meanings, including “light,” which we will discuss later.

Three “Rounds” or Bondage to Overcome – Section 8

8. “*Tiparivaṭṭa*” means the **three rounds** of bondage. One may visualize a living-being trapped inside the inner wall, a prison with three concentric walls or ramparts. To be freed (i.e., to get to *Nibbāna*,) all three barriers must be overcome. The 31 realms of this world (discussed below) divide into three sections with those three walls.

- **The first** is to be released from the *apāyā* (four lowest realms), via the *Sotāpanna* stage, by removing the wrong views about existence in the 31 realms. **This requires the first stage of *Sammā Diṭṭhi* or grasping the framework of Buddha Dhamma that we are discussing now.**
- **In the second round**, one overcomes the *kāma loka* (realms 5 through 11, which include the human realm and 6 *Deva* realms). That happens via two stages. A *Sakadāgāmi* will not be reborn with bodies subjected to diseases. Thus there will be no more rebirths for a *Sakadāgāmi* in the five lowest realms

(*apāyā* and the human realm.) Then, at the *Anāgāmi* stage, *kāma rāga* and *paṭigha* go away, and one is released from births anywhere in the *kāma loka*. That means complete cessation of *kāma taṇhā*.

- In the **third round**, any linkage to anywhere in the 31 realms removed. The mind becomes free of attachment to any trace of matter, and the *Arahant* stage attained. See, “[What Are Rūpa? \(Relation to Nibbāna\)](#).” That is complete cessation of *bhava taṇhā* and *vibhava taṇhā*.

The Result of *Arahanthood (Parinibbāna)* Is No More Rebirths – Section 9

9. The rebirth process among the 31 realms in this world is a crucial concept to understand. More details in #13 below. The “suffering” in the First Noble Truth is the harsh levels of suffering in the four lowest realms (*apāyā*.) **Even if one spends millions of years in a *Deva* realm, that “pleasurable time” is insignificant because one will spend much more time in the *apāyā* in the LONG RUN.**

- We will discuss that in detail, with *Tipiṭaka* references, as we proceed. But here I want to point out that the verse, “*Nāṇaṇṇa pana me dassanaṃ udapādi: ‘akuppā me vimutti, ayamantimā jāti, natthi dāni punabbhavo’*” *ti*.
- There, *ayamantimā* is “*ayam antima*,” where “*ayam*” is “this” and “*antima*” means “last”), and *punabbhavo* is “*puna bhava*,” where “*puna*” is “repeated,” and “*bhava*” is “existence in THIS WORLD.”
- Thus, the above verse means: “The knowledge and vision arose in me: ‘Unshakable is the liberation of my mind. **This is my last birth. There will be no more rebirths for me.**’”
- Upon *Parinibbāna*, one is no longer born anywhere in the 31 realms of THIS WORLD. One is free of any future suffering.

Venerable Koṇḍañña Attains The *Sotāpanna* Stage – Section 10 and 14

10. At the end of the discourse, Venerable Koṇḍañña attained the *Sotāpanna* stage of *Nibbāna*. Venerable Koṇḍañña understood the essence of the “framework of Buddha Dhamma”: “*yaṃ kiñci samudaya dhammaṃ sabbaṃ taṃ nirodha dhammaṃ*” *ti*.

- That verse means: “Whatever *dhammā* that give rise to things in this world are subject to cessation.” **Therefore, it is possible to stop any existence in this world from arising.**”
- We all have gone through innumerable lives filled with suffering in the rebirth process because we never understood how to stop future lives from arising. **Of course, until a Buddha is born in the world, humans are NOT AWARE of the existence of the other 29 realms, including the four lowest realms (*apāyā*) filled with suffering.**
- Many of you must be wondering WHY would one ever want to stop future lives! That is an important issue that we will discuss in the next post.
- That involves the rebirth process in the “wider world of 31 realms” that only a Buddha can “see” upon Enlightenment. That is the “*.pubbe ananussutesu dhammesu..*” or “**previously unknown nature of this world**” that we discussed in #6 above.

11. At the end of the *sutta* (in Section 13), it says that the Buddha saw that Ven. Koṇḍañña has attained the *Sotāpanna* stage and declared: “Koṇḍañña has understood! Koṇḍañña has indeed understood!”

- That is how Venerable Koṇḍañña acquired the name “*Añña Koṇḍañña—Koṇḍañña Who Has Understood.*”

The Wheel of the Dhamma Set in Motion – Section 11 and 12

12. With the Wheel of the Dhamma set in motion by the Blessed One, the earth-dwelling *devā* (*bhumṃā devā*) belonging to the *cātumahārājikā devā* realm raised a cry. “At Baraṇasi, in the Deer Park at Isipatana, the **Wheel of the Dhamma has been set in motion** by the Blessed One. It cannot be stopped by any ascetic or brahmin or *Deva* or *Māra* or *Brahma* or by anyone in the world.”

- **That Wheel of the Dhamma is still in motion.** It is supposed to be in effect for roughly 2500 more years for a total of 5000 years.
- Those *bhumṃā devā* are part of the *Cātumahārājika Deva* realm but reside among humans (even though we cannot see them). They first became aware of the *desanā* and notified their higher-lying main realm with their cries.
- *Devā* of the higher-lying *cātumahārājikā devā* realm then repeated that cry which then progressively transmitted to the other *Deva* realms lying further away from the Earth.

The 31 Realms of Existence – Section 13

13. Section 13 is long and takes a significant part of the *sutta*. That section names the 6 *Deva* realms and 15 out of 16 *rūpi Brahma* realms. See the document, [WebLink: pdf download: Dhammacakkappavattana Sutta – Printout](#). Most of this section missing in many published versions of the *sutta*, including that at Sutta Central. However, this section is essential for a couple of reasons.

- First, it clearly shows that the Buddha indeed described a “wider world” than experienced by us, consisting of 31 realms; see, [“The Grand Unified Theory of Dhamma”](#) and [“31 Realms of Existence.”](#)
- Second, it says that many *Devā/Brahmā* from those realms listened to the *desanā*. Starting from the 6 *Deva* realms, it lists 15 *rūpi Brahma* realms (except the *asañña* realms, where beings have only a physical body and thus cannot listen to a *desanā*). Numerous *Devā* and *Brahmā* attained various stages of *Nibbāna*.
- Note that the Buddha discussed the contents of the *sutta* in detail with the five ascetics overnight, until Ven. Koṇḍañña reached the *Sotāpanna* stage. It took further discussions over several days before all five reached the *Sotāpanna* stage. Delivery of the second *sutta*, *Anattalakkhaṇa Sutta* (SN 22.59), took place after that.

14. Section 13 lists how the news progressively propagated to higher-lying realms, and eventually, *Devā* from all those 21 realms came to listen to the *desanā*.

- As you can see those realms match the names listed in the following post: [“31 Realms of Existence”](#) and [“31 Realms Associated with the Earth.”](#)
- Note that all of those realms referred to as *Deva* realms in the *sutta*, regardless of whether they belong to the 6 *Deva* realms or the *rūpi Brahma* realms.
- Of course, only five humans (the five ascetics) were present. Any living-being in the lowest four realms cannot comprehend Dhamma. Also, *Brahmā* in the four *arūpi* realms do not have ears to listen to. Thus section 13 lists 21 realms. Not listed are the four lowest realms, the *asañña* realm, and the four *arūpi Brahma* realms. Many other *suttā* mention those other realms.

We will discuss the details of this “framework of Buddha Dhamma” in upcoming posts.

5.2.9.5 The Suffering (Dukkha) in the First Noble Truth

.2

February 29, 2020

Introduction

1. In the previous post, “[The Framework of Buddha Dhamma](#)” we discussed the framework of Buddha Dhamma as laid out by the Buddha in the *Dhammacakkappavattana Sutta* (SN 56.11.) That is the “view from the 30,000 feet.”

- The “30,000-foot view” is a common phrase that describes getting to a high enough level to see the “big picture.” The next time you are in a commercial airplane and cruising around 30,000 feet, take a look out the window and note what you see—some clouds, large swaths of land, maybe a mountain range. The reality is you’re too high up to see much of anything with any precision.
- Take a helicopter-ride between 500 to 1,000 feet, and you’ll be able to recognize what you’re looking at, with the benefit of seeing it from a new, higher perspective.
- Starting with this post, we will take a “1000-foot view” of the Buddha Dhamma by getting into a bit more detail, specifically on the First Noble Truth.
- First of all, we need to figure out “the suffering” that the Buddha wanted us to understand.
- By the way, I have discussed these ideas previously over the past five years. However, the website now has over 500 posts. Therefore, this series of posts is an excellent way to present a systematic approach. I will refer to existing posts as needed. Please make sure to read them.

What Is the “Previous Unheard” Suffering (*Dukkha*)?

2. In #6 and #7 of the previous post, we mentioned that the verse, “*.pubbe ananussutesu dhammesu cakkhuṃ udapādi, ñāṇaṃ udapādi, paññā udapādi, vijjā udapādi, āloko udapādi,*” that appears **12 times** in the Sections 4 through 7 of the *sutta*. See, [WebLink: pdf download: Dhammacakkappavattana Sutta – Printout](#).

- The word “*ananussutesu*” comes from “*na*” + “*anussuta*” or “not heard.” *Pubbe* means “previous,” and thus “*.pubbe ananussutesu dhammesu..*” means a **Dhamma (teaching) that has never been known to the world** (except during the times of previous Buddhā.)
- The First Noble Truth is “*Dukkha Sacca*” so it should state “the previously unheard suffering.” That is in Section 3 of the printout and #5 of the previous post. Remember that “*sacca*” is pronounced as “sachcha.” See the two posts on “*Tipitaka English*” at “[“Tipitaka English” Convention Adopted by Early European Scholars – Part 1](#)” and “[“Tipitaka English” Convention Adopted by Early European Scholars – Part 2](#).”
- **The First Noble Truth of suffering: Birth is suffering**, aging is suffering, illness is suffering, death is suffering. Union with what is undesirable is suffering. Separation from what is desirable is suffering. **Not to get what one wants (*icchā*) is suffering. In brief, clinging (*upādāna*) to the five aggregates is suffering.**

First Noble Truth of suffering

3. In the above statement on the **First Noble Truth of suffering**, I have highlighted **in orange the “previously unheard parts.”**

- Anyone knows that “aging is suffering, illness is suffering, death is suffering. Union with what is undesirable is suffering. Separation from what is desirable is suffering.”
- Anyone would also agree that “**Not to get what one wants (*icchā*) is suffering.**” But it has more profound implications that an average human would not contemplate. One needs to know the “broader worldview” to see those more profound implications, as we will see later.
- But why did the Buddha say that “**Birth is suffering?**” Why did he state that “**In brief, clinging (*upādāna*) to the five aggregates is suffering?**”

- It is NOT correct to translate the word “*saṅkhittena*” as “in brief.” The verse, *saṅkhittena pañcupādānakkhandhā dukkhā* has a deeper meaning than “In brief, clinging (*upādāna*) to the five aggregates is suffering”? We will discuss that later. [*saṅkhittena* means being overthrown by defilements]
- Instead, it is easier to get started with Section 8 of the printout on “*Tiparivaṭṭa*.” We discussed that briefly in #8 of the previous post. We will expand it a bit more here.

Tiparivaṭṭa – The Three Rounds of Bondage

4. The word “*tiparivaṭṭa*” comes from “*tī*” for three and “*vaṭṭa*” for “round” (actually a circular wall.) A “*parivaṭṭa*” is a complete circular wall. Thus, the word *tiparivaṭṭa* provides a good visualization of a living-being trapped in the middle of prison with three concentric walls.

- Most suffering is within the first barrier or the first round. Once one overcomes the first barrier, one is free from the four lowest realms (*niraya*, *peta*, *asura*, and animal.)
- The next reduced level of suffering is in between the first and second walls, which correspond to seven realms (human and six *Deva* realms.) Suffering and happiness both present in the human realm. The six *Deva* realms have much less suffering and much higher levels of “pleasures” compared to the human realm.
- The twenty *Brahma* realms lie between the second and third “walls.” Sixteen of those are in the *rūpāvacara Brahma* realms and the other four in higher *arupāvacara Brahma* realms. There is hardly any suffering in these higher realms. Even humans, who can cultivate *jhāna*, can experience such “*jhānic* pleasures.”
- The 31 realms discussed in “[31 Realms of Existence](#)” and “[31 Realms Associated with the Earth](#).”

Much More Suffering Than Pleasures in the Rebirth Process

5. So, why don't we just do good deeds (*kamma*) and be born in a *Deva* realm and enjoy such “heavenly pleasures”? Or, cultivate *jhāna*, be born in a *Brahma* realm, and enjoy *jhānic* pleasures” for millions of years? **The problem is that such “pleasures” are very short-lived (in the rebirth process.)** The overall rebirth process subjects any living-being to much more suffering due to the following reasons.

- Any given living-being spends MUCH MORE time in the lowest four realms compared to the higher-lying realms. In particular, getting a human existence is VERY rare. See “[Rebirth – Connection to Suffering in the First Noble Truth](#).”
- Suffering in the lowest four realms is unbearable, as described in many *suttā*, for example, *Devadūta Sutta* (MN 130.) The animal realm is relatively better than the other three, and we can see the suffering in that realm.

Power of Kammic Energy

6. Birth in any realm is due to one's deeds (*kamma*.) Good deeds lead to “good births” and evil deeds to “bad births.” There is a high-level of “mental energy” (*kammic* energy) associated with strong (good or bad) *kamma*.

We can get a good idea of this “*kammic* energy” by looking at an angry person. Angry thoughts manifest as changes in the physical body. His/her face becomes distorted and unpleasant to look at. That angry person also has “pumped up” energy to strike another person or even to kill another person.

- Such “powerful thoughts” (*javana citta*) can arise while doing bad or good deeds. **They are the source of *kammic* energy that gives rise to births in different realms.**
- The lifetime in any realm depends on the strength of the corresponding *kammic* energy.

- Humans tend to do immoral deeds (*akusala kamma*) in their desire (*icchā*) to “enjoy life.” *Akusala kamma* lead to rebirths in the lowest four realms (*apāyā*.) Thus it is essential to learn about the laws of *kamma*. However, they are NOT deterministic, as we will discuss.
- A good sutta to read about rebirths in bad realms due to *dasa akusala* and also rebirths in good realms due to the avoidance of *dasa akusala* is “[WebLink: suttacentral: Pathamanirayasagga Sutta \(AN 10.211\)](#).” That link gives two English translations.
- Also, see “[Āṅguttara Nikāya – Suttā on Key Concepts](#)” where *dasa akusala* and *dasa kusala* discussed with many short *suttā*.

Wider Worldview Is Necessary to Understand the “Previously Unheard Suffering”

7. From the above, it must be clear that “suffering” in the First Noble Truth is NOT what we perceive to be suffering. Everyone KNOWS about that “mundane suffering” associated with aches and pains, diseases, injuries, etc.

- As we saw in #4 above, we need to be MOST concerned with possible future suffering in the four lowest realms (*apāyā*.) Thus, we first need to figure out how to stop rebirths in the *apāyā*. As we saw in the previous post, that is accomplished by reaching the *Sotāpanna* stage of *Nibbāna*.
- **Some people engage in “breath meditation” to alleviate their day-to-day stresses, or even to cultivate mundane *jhāna*.** Although that will give temporary relief, **that is not the “suffering” that the Buddha was concerned with.**
- To put it in a different way, the “mundane suffering” is included in *vedanā*. Specifically, it is the “*kāyika dukkha vedanā*” associated with the physical body or “*domanassa vedanā*” associated with mental stress. **Even “*jhānic* pleasures” are *vedanā* and belong to “this world” (specifically to *Brahma* realms.)**
- But one needs to “see” the “previously unheard suffering” in future rebirths (especially in the *apāyā*) with wisdom (*paññā*.) That is “*lokuttara Sammā Diṭṭhi*” needed to comprehend the First Noble Truth.

How Can We Believe This “Previously Unheard Teachings” of the Buddha?

8. This is another critical issue that we need to discuss. Many concepts discussed above are not self-evident. We have not seen first hand any harsh suffering in the *apāyā*, except for in the animal realm.

- We do that by first looking at the “preliminary material” taught by the Buddha. When we can see the self-evident truth in them, our confidence in Buddha’s teachings on things that we cannot see for ourselves will grow. That is building faith/confidence (or *saddhā*) in the Buddha and his teachings (Buddha Dhamma.)
- One needs to go through primary and secondary schools before being eligible for a college education. In the same way, one needs to learn the fundamental principles in Buddha Dhamma first.
- **Understanding the laws of *kamma*, the validity of the rebirth process and associated concepts are essential.** That is cultivating “conventional *Sammā Diṭṭhi*.”
- **Only after that one can comprehend “*lokuttara Sammā Diṭṭhi*” (and the ability to “see” the harsh sufferings in the *apāyā*.)**
- The Buddha clarified that in the *Mahā Cattārīsaka Sutta* (MN 117). I will discuss it in the next post.

Good or Bad Deeds May Bring Their Results Much Later

9. That is another CRITICAL issue. We tend to think only about “near-term results” of our actions. For example, person X may kill someone while robbing that person’s house. X may not be caught and live a luxurious life with the valuables stolen from that house.

- However, person X’s immoral deed (*kamma*) will not go unpunished by Nature. The corresponding result (*kamma vipāka*) can materialize in a future life, if not in this life. A strong bad *kamma* like killing a human can even be responsible for rebirth in one of the four lowest realms. In the same way, one who does a good *kamma* like engaging in compassionate deeds may be reborn in a *Deva* realm.
- *Kammic* consequences of either kind of action (good and bad) are stringent. Nature enforces them automatically. There is no “higher-being” reviewing one’s deeds. There is a built-in mechanism in Nature to take into account various complexities automatically. Such laws of *kamma* can be complicated, but we can get a good general idea. We will discuss them in the future.
- But most people tend to believe just what they can experience for themselves. Not believing in rebirth is a strong wrong view that, by itself, can lead to rebirth in the *apāyā*. **That is why one needs to remove the ten types of wrong views well before being able to grasp the “previously-unheard teachings” of the Buddha.**

There is No Permanently “Good” or “Bad” Person

10. No one is a “good person” or a “bad person” forever. Until one becomes at least a *Sotāpanna Anugāmi*, one’s character/habits (*gati*) can change. *Gati* (pronounced “gathi”) is a crucial Pāli word even though very few people are aware of it these days. So, that is another topic that I will be discussing in detail.

- One with “good *gati*” is likely to do more “good deeds,” and another with “bad *gati*” is likely to do more of “bad deeds.”
- However, even one with “good character” may do evil deeds if the temptation is high enough. For example, we often hear about “good people” arrested for bribery or rape charges.
- In the same way, even a person labeled as a “bad person” may do meritorious deeds under certain conditions.
- One’s family, friends, and associates play significant roles in the formation of new *gati* and getting rid of old *gati* (good or bad.)
- More details at, “[9. Key to Ānāpānasati – How to Change Habits and Character \(Gati\).](#)”

Having Wrong Views Is a Major *Akusala Kamma*

11. Any realm has a finite lifetime. One will NEVER live in a “good realm” forever or be trapped forever in a “bad realm.” **Each of us has been in most of the 31 realms, many times over.** The rebirth process has no discernible beginning. See, “[Origin of Life – There is No Traceable Origin.](#)”

- In general, good deeds (*kusala kamma*) lead to good rebirths (those in the human and higher realms.) Evil deeds (*akusala kamma*) lead to bad existences (the lowest four realms or the *apāyā*.)
- One key factor that many people are not aware of is the following. Even if one does not do any “conventional immoral deeds,” **just having wrong views about the world is one of the *dasa akusala*.** See “[Ten Immoral Actions \(Dasa Akusala\).](#)”
- Most people consider immoral deeds to be only “bad bodily deeds” (killing, stealing, sexual misconduct) and “bad speech” (lying, gossiping, slandering, harsh speech.)
- That is the key to understand the first stage (first round in the *tiparivatta*) of the First Noble Truth.

12. However, there are three *akusala kamma* done with the mind, i.e., just with one’s THOUGHTS. Those are greedy thoughts (*abhijjhā*), angry thoughts (*vyāpāda*), and wrong views (*micchā diṭṭhi*).

- Those three kinds of evil THOUGHTS lead to bad speech and bodily actions. Furthermore, wrong views are the root cause of greed and anger as well, as we will see.
- **It may be hard to believe, but wrong views are the main reason that most humans are reborn in the *apāyā*.** See “[Rebirth – Connection to Suffering in the First Noble Truth](#).”
- With this post, we are just expanding the worldview a bit more. Some people may be aware of these facts, but many people are not aware of them. I want to make sure everyone is on-board.

In the upcoming posts, we will discuss the above issues in detail. It is not beneficial to try to understand deep *suttā* without having a good understanding of the “essential fundamentals.”

5.2.9.5 Dangers of Ten Types of Wrong Views and Four Possible Paths

March 7, 2020; revised March 9, 2020; August 20, 2022; August 29, 2022

Introduction

1. We started this series of posts with “[The Framework of Buddha Dhamma](#)” to understand the details in the *Dhammacakkappavattana Sutta* (SN 56.11.) As we noted, *Dhammacakkappavattana Sutta* provides only an outline of the framework of Buddha Dhamma. Then in the subsequent post, “[The Suffering \(Dukkha\) in the First Noble Truth](#),” we noted that the Buddha pointed out that there are two “good paths” and “two bad paths.”

The [WebLink: suttacentral: Mahācattārīsaka Sutta \(MN 117\)](#) describes those four paths. Any person is on one of those four paths at a given time.

- One could be on **two paths leading to much suffering in the *apāyā*.**
- There are also **two “good” paths**. One COULD lead to rebirths in “good” realms. The other is the Noble Path leading to *Nibbāna*.
- **It all depends on the types of views about the world.** One with the **ten types of *micchā diṭṭhī* (wrong views) will be on one of the two paths leading to much future suffering.**
- We will discuss the “two bad paths” in this post and the “two good paths” in the next post.

2. **One who has removed the ten types of *micchā diṭṭhī* initially have mundane *Sammā Diṭṭhī*.** They are on the path toward “good rebirths.” However, that is NOT a guarantee for all future rebirths since one could switch back to having wrong views in the future.

- **Someone who has removed the ten types of *micchā diṭṭhī* CAN go beyond that and remove the possibility of switching back to wrong views by comprehending the “real Nature,” i.e., gain “*yathābhūta ñāṇa*.”** That means comprehending *Tilakkhaṇa* or the *anicca*, *dukkha*, and *anatta* nature. At that point, one will be on the Noble Path and reach *Nibbāna* within a limited number of rebirths in good realms.
- I will only discuss sections of the [WebLink: suttacentral: Mahācattārīsaka Sutta \(MN 117\)](#) to discuss the four types of possible paths. The Pāli version and translations to several languages are at that link.

Steps to *Nibbāna* – *Sammā diṭṭhi*, *Sammā Samādhi*, *Sammā Vimutti*

3. At the beginning of the *sutta*, the Buddha says: “*Bhikkhus*, I shall teach you ***sammā samādhi* with its necessary supports (*saupanisaṃ* or “with *upanisa*”) and essentials (*saparikkhāraṃ* or “with *parikkhāra*.”)**”

“What is Noble *sammā samādhi* with its necessary supports? Those are *sammā diṭṭhi*, *sammā saṅkappo*, *sammā vācā*, *sammā kammanto*, *sammā ājīvo*, *sammā vāyāmo*, *sammā sati*. That is *sammā samādhi*, reached with the purification of mind, and equipped with those seven supporting factors.”

- It is to be noted that one starts the Noble Path with *Sammā Diṭṭhi* or the “right views.” That sequentially leads to *Sammā Samādhi* or the eighth factor.
- *Sammā Diṭṭhi* leading to *Sammā Vimutti* (or *Arahanthood*) is reached in TWO STEPS. The first stage of mundane *Sammā Diṭṭhi* is reached by getting rid of the ten types of wrong views (*micchā diṭṭhī*.)
- Once one completes the mundane path with mundane *Sammā Diṭṭhi*, one can start comprehending *Tilakkhaṇa* (*anicca*, *dukkha*, and *anatta*.) At that point, one is a *Sotāpanna Anugāmi* and is on the Noble Path. He/she can get to “total release from all suffering” (*Sammā Vimutti*) via four stages of *Sotāpanna*, *Sakadāgāmi*, *Anāgāmi*, and *Arahant*.

Ten types of wrong views (*Micchā Diṭṭhī*)

4. “**Therein, bhikkhus, sammā diṭṭhi (right view) comes first.** And how does the right view come first? One understands the wrong views (*micchā diṭṭhī*) as the wrong views and the right view as the correct view. That is one’s right view.

“And what are the wrong views?”

- (i) No profit in giving (*dāna*.)
 - (ii) No corresponding benefits in making offerings on a large scale.
 - (iii) Respecting and offering to those with higher virtues has no merit.
 - (iv) Good and bad actions (*kamma*) do not lead to corresponding results (*vipāka*.)
 - (v) This world (*ayam loka*) does not exist.
 - (vi) *Para loka* (of *gandhabba*) does not exist.
 - (vii) Mother is not a special person.
 - (viii) Father is not a special person.
 - (ix) Living beings cannot be reborn spontaneously (*sattā opapātikā*.)
 - (x) No virtuous recluses in the world who have seen for themselves by direct knowledge and declare this world and the *para loka* exist.
- **Those are the wrong views.** These are stated the same way in over 30 *suttā* in the *Tiṭṭaka* because of their importance. A partial list for such *suttā*: SN 24.5, AN 3.117 through AN 3.119, AN 10. 211, MN 42, MN 110, MN 41, MN 60, MN 76, DN 5, DN 34.

Why Are Those Views Bad? – Laws of *Kamma*

5. Before proceeding with the *sutta*, we must ask, “why are those views bad, and why are they so critical?”
- As we have discussed in the previous two posts, the worldview of the Buddha is VERY different from that of an average human. An average human is unaware of the existence of 31 realms and the endless rebirth process within those 31 realms.
 - The mechanism that sustains the rebirth process within the 31 realms is that *kammā* (specifically meritorious and immoral actions) have their corresponding *vipāka*. The **first four wrong views** are associated with not having a good understanding of *kamma/kamma vipāka*.
 - Rebirths among the 31 realms are based on *kamma vipāka* (results of previous *kamma*.) We discussed that briefly in #6 in the previous post, “[The Suffering \(Dukkha\) in the First Noble Truth](#).”

6. There is a rebirth process WITHIN the human existence (human *bhava*) where one is repeatedly reborn with a human body many times. Between those human rebirths, that life-stream is in the *para loka* as a *gandhabba* (i.e., just with a “mostly mental” body.) That is why there are so many rebirth stories, where especially children, talk about their previous human lives (*jāti*.) On the other hand, it is very difficult to get a human existence (*bhava*.) **It is necessary to understand the difference between *bhava* and *jāti*.**

- Most people reject the laws of *kamma* because they cannot “see” the consequences of some deeds (*kamma*) in this life. But all causes lead to results. But there **must be the right conditions** for the results to appear. A seed does not germinate until the right conditions arise. See “[What Does “Paccayā” Mean in Paticca Samuppāda?](#)” That is why there is a “time delay” between *kamma* and *kamma vipāka*.
- Buddha Dhamma is amazingly self-consistent. It just takes an effort to see these “interconnections.” If one becomes interested and makes an effort, there will be many “Aha!” moments. That is when one starts having “real faith” or “*saddhā*.”

Why Are Those Views Bad? – Rebirth Process Within 31 Realms

7. It is frustrating to be in the *para loka* as a *gandhabba* without a physical body. One cannot eat, smell, or touch (and have sex.) One is in the *kāma loka* BECAUSE one craves those sensory pleasures. **On the spiritual side, it is impossible to concentrate and, thus, make progress on the path.** That is why one should be grateful to the mother and father for providing an opportunity to be born with a physical body. The **wrong views number five through eight** arise because one is unaware of that process involving “this world that we experience” and the “*para loka* of the *gandhabbā*.”

- For a crude, but good, visualization of the *gandhabba* and *para loka* see the post, “[Ghost 1990 Movie – Good Depiction of Gandhabba Concept.](#)”
- The **ninth wrong view** arises because one is unaware of realms other than the human and animal realms. Many living beings (*sattā*) are reborn spontaneously (*opapātikā*) in many realms. In such births — unlike in the human and animal realms — one is not born a baby and grows to an adult; rather, the birth is in the “final form.” Of course, many living beings do not have dense physical bodies like ours.
- Finally, it is possible to cultivate (*Ariya* or *anāriya*) *jhāna* and see one’s previous lives. It is not easy to develop *abhiññā* powers to see previous other existences (*bhava*), such as previous existence in animal or *Deva* realms. However, it is relatively easy to see one’s past human lives WITHIN the current human *bhava*. Many can do that even today, including some children (rebirth accounts.) Discarding such true statements as “mere speculation” is the **tenth wrong view**.

Those With *Micchā Diṭṭhi* Are Destined to be Reborn in *Niraya*

8. As clearly stated in the following *sutta*, those with ***micchā diṭṭhi*** end up in *niraya* (the lowest of the *apāyā*.) On the other hand, those who do not have any of the ten types of ***micchā diṭṭhi*** (and thus have mundane *sammā diṭṭhi*) are likely to be reborn in the higher realms at or above the human realm (collectively labeled *sagga*.)

The [WebLink: suttacentral: *Diṭṭhi Sutta* \(AN 4.212\)](#) is short:

- “*Catūhi, bhikkhave, dhammehi samannāgato yathābhataṃ nikkhitto evaṃ **niraye**. Katamehi catūhi? Kāyaduccaritena, vacīduccaritena, manoduccaritena, **micchā diṭṭhiyā**—imehi kho, bhikkhave, catūhi dhammehi samannāgato yathābhataṃ nikkhitto evaṃ niraye.*
- *Catūhi, bhikkhave, dhammehi samannāgato yathābhataṃ nikkhitto evaṃ **sagge**. Katamehi catūhi? Kāyasucaritena, vacīsucaritena, manosucaritena, **sammā diṭṭhiyā**—imehi kho, bhikkhave, catūhi dhammehi samannāgato yathābhataṃ nikkhitto evaṃ sagge”ti.*

Translated:

- “*Bhikkhave*, those who are proficient in four types of *dhammā* (these are sometimes specifically called *adhammā* or “bad *dhammā*”), are bound to be born in the *niraya*. Those four types are bad conduct with body, speech, and mind, and **having wrong views.**” **Those are *dasa akusala*.**
- “*Bhikkhave*, those proficient in four types of *dhammā*, are bound to be born in the good realms. Those four types are good conduct with body, speech, and mind, and **having removed wrong views.**” **They are *dasa kusala*.**
- Of course, *niraya* (hell) is the lowest realm of the 31 realms. A good *sutta* to read about rebirths in bad realms due to *dasa akusala* and rebirths in good realms due to the avoidance of *dasa akusala* is “[WebLink: suttacentral: Pathamanirayasagga Sutta \(AN 10.211\)](#).” That link gives two English translations.

Two Paths for Those With *Micchā Diṭṭhi*

9. Towards the end of the *Mahācattārīsaka Sutta*, the Buddha states that there are two paths (and 20 factors) with correct views (***vīsati kusala pakkhā***) and two paths (and 20 factors) with wrong views (***vīsati akusala pakkhā***). There are forty factors in all, and hence the name *mahā cattārīsaka*: “*Iti kho, bhikkhave, vīsati kusala pakkhā, vīsati akusala pakkhā—mahā cattārīsako dhammapariyāyo pavattito appaṭivattiyo samaṇena vā brāhmaṇena vā devena vā mārena vā brahmunā vā kenaci vā lokasmim.*”

Mahācattārīsaka Sutta (MN 117) does not go into details about the two paths with wrong views. However, several *suttā* in the *Aṅguttara Nikāya* (AN 4.204 through AN 4. 210) specifically discuss those two paths for those with wrong views.

- [WebLink: suttacentral: Dasakamma Sutta \(AN 4.204\)](#) states that one who engages in *dasa akusala* (that includes having wrong views) is an **immoral person (*asappuriso*).**
- If that person also encourages or teaches others to engage in such activities, then he/she becomes a **highly-immoral person (*asappurisena asappurisataro*).** Here, *asappurisataro* with “*taro*” at the end emphasizes the intense immorality. **Note that a highly-immoral person has the same wrong views, but they are much more ingrained or established in mind.**
- The opposites are valid for a **moral person (*sappuriso*)** and a **highly-moral person (*sappurisena sappurisataro*).**
- *Dasa akusala* discussed at, “[Ten Immoral Actions \(Dasa Akusala\)](#).”

10. The [WebLink: suttacentral: Pathamapāpadhamma Sutta \(AN 4.207\)](#) states the same in another revealing way. “*Katamo ca, bhikkhave, pāpo? Idha, bhikkhave, ekacco pāṇātipātī hoti ... pe ... micchādiṭṭhiko hoti. Ayaṃ vuccati, bhikkhave, pāpo.*”

- That means a person who engages in *dasa akusala* (including killing, stealing,...wrong views) is a ***pāpo* or immoral.**

The next verse: “*Katamo ca, bhikkhave, pāpena pāpataro? Idha, bhikkhave, ekacco attanā ca pāṇātipātī hoti, paraṇca pāṇātipāte samādapeti ... pe ... attanā ca micchādiṭṭhiko hoti, paraṇca micchādiṭṭhiyā samādapeti. Ayaṃ vuccati, bhikkhave, pāpena pāpataro.*”

- If that person encourages others to engage in such activities (or teaches wrong views), he/she becomes a **highly-immoral person (*pāpena pāpataro*).**

Note that the two *suttā* use different words to indicate an immoral person, ***asappuriso*** and ***pāpo***. Both mean “an immoral person.”

Summary

11. Those **with extreme wrong views** (i.e., highly-immoral persons) can get to *micchā vimutti* (and become someone like Hitler or Pol Pot in Cambodia.) It is extremely difficult to change the mindset of such a person. However, it is possible to do that, as illustrated in the example of Aṅgulimāla, who had killed almost a thousand people but attained *Arahanthood*, see “[Account of Aṅgulimāla – Many Insights to Buddha Dhamma](#).”

- In the next post, we will discuss the two “good paths” with two corresponding “correct views” in detail. Here one first gets to the **mundane *Sammā Diṭṭhi* by cultivating ten factors that are opposites of the ten factors in *micchā diṭṭhi*.**
- We will see that one with mundane *Sammā Diṭṭhi* can get to **Ariya *sammā diṭṭhi* by learning the true teachings of the Buddha on the Four Noble Truths.** Specifically, one needs to comprehend that the “suffering” in the First Noble Truth is the suffering associated with the rebirth process.
- When one starts comprehending the First Noble Truth by grasping the *anicca, dukkha, anatta* nature of this world, one becomes a *Sotāpanna Anugāmi*. That understanding becomes complete at *Arahanthood* and one attains ***Sammā Ñāṇa* (by fully comprehending “*yathābhūta ñāṇa*”) and *Sammā Vimutti* (release from all future suffering.)**
- We will discuss that in the next post and complete the discussion on the *Mahācattārīsaka Sutta* regarding the four possible paths.

5.2.9.5 **Sammā Diṭṭhī – Only One Leads to the Noble Path**

.4

March 14, 2020; revised August 20, 2022

Introduction

There are two types of *sammā diṭṭhī* or “right views.” Only one belongs to the Noble Path and leads to *Nibbāna*.

1. We are continuing the series of posts on “[Wider Worldview of the Buddha](#).” In the previous post, we started a discussion on the [WebLink: suttacentral: Mahācattārīsaka Sutta \(MN 117\)](#) to clarify the four worldviews and four possible paths.

- There are “two good paths” and the Noble Eightfold Path is the only path to *Nibbāna*.
- The previous post, “[Dangers of Ten Types of Wrong Views and Four Possible Paths](#),” discussed the “two bad paths.” In this post, we will discuss the “two good paths.”

Two Types of *Sammā Diṭṭhi*

2. After discussing the two “bad paths” for those with the ten types of *micchā diṭṭhī* in the *Mahācattārīsaka Sutta*, the Buddha asks: “What, *bhikkhus*, is the right view? **The right view, I say, is twofold:**

- **There is the right view that is tainted with cravings (*sāsavā* or with *āsavā*), meritorious and bringing good *vipāka*.**
- That “good path” is available even without a Buddha. Ancient *yogis* were there before the Buddha (like Ālāra Kālāma and Uddaka Rāmaputta), who lived morally and even cultivated the highest *jhāna*. They were able to get “good rebirths.” However, that is a temporary solution to the *samsāric* suffering since one can “fall back” from that “good path” and be born in the *apāyā* in the future.
- **Then there is the right view that is Noble (*Ariya*) and without cravings (*anāsavā* or without *āsavā*), supramundane (*lokuttarā*), a factor of the Noble Path.”**

Sammā Diṭṭhi* for the Noble Path Includes Comprehension of *Tilakkhaṇa

3. The difference between those two paths is CRITICAL. We need to discuss that in detail.

- The first, mundane right view, is mostly followed by those who “live a moral life.” That could be just following the five precepts, for example, as many people do. However, to attain *Nibbāna*, one needs to comprehend the “unfruitful, and dangerous nature” of this world (*Tilakkhaṇa*) or the “real Nature,” i.e., gain “*yathābhūta ñāṇa*.”
- **Upon Enlightenment, the Buddha discovered that living a moral life, by itself, CANNOT solve the problem of suffering in the rebirth process.** Following a moral life COULD lead to a future “good rebirth.” However, since we have also done both good and bad deeds in our past lives, such bad deeds can bring birth in a bad realm. Of course, we do not know what kind of good/bad deeds we have done in our past lives.
- To start on the Noble Path leading to *Nibbāna*, we need to understand that our cravings for sensory pleasures are ultimately the root cause of suffering. Those cravings (*āśava*) lead to *taṇhā*. See “[Taṇhā – The Origin of Suffering](#).”
- Then the “*taṇhā paccayā upādāna*” step in *Paṭicca Samuppāda* leads to “*upādāna paccayā bhavo, bhava paccayā jāti, jāti paccayā jarā, maraṇa, soka-parideva-dukkha-domanassupāyasā sambhavan’ti*,” i.e., the “whole mass of suffering.”
- That is a brief summary. We will discuss that in detail in upcoming posts. Let us first discuss *sammā diṭṭhī* for the mundane path.

Mundane *Sammā Diṭṭhī*

4. After saying that there are two right views (#2 above,) the Buddha asks: “And what, *bhikkhus*, is the **right view that is tainted with cravings (*sāsavā* or with *āsavā*)**, meritorious and bringing good *vipāka*? ” and explains that is the view where one believes that,

- (i) There is profit in giving (*dāna*.)
- (ii) More profit in giving generously.
- (iii) Respecting and making offerings to those with higher virtues is beneficial (*bhikkhus*, Noble Persons, *yogis*, etc.)
- (iv) Good and bad actions (*kamma*) lead to corresponding results (*vipāka*.)
- (v) This world (*ayam loka*) does exist.
- (vi) *Para loka* (of *gandhabba*) does exist.
- (vii) Mother is a special person.
- (viii) Father is a special person.
- (ix) Living-beings can be reborn spontaneously (*sattā opapātikā*.)
- (x) There are virtuous recluses (like Āḷāra Kālāma and Uddaka Rāmaputta) in the world who have seen for themselves by direct knowledge and declare this world and the *para loka* exist.

Those are the **(mundane) right views that are tainted with cravings**. They are meritorious and bring good *vipāka*.

- As you remember from the previous post, the above are the opposites of the ten types of wrong views (*micchā diṭṭhī*.) Those who have those ten “good factors” can get “good rebirths,” as discussed in #2.

Why Is Mundane *Sammā Diṭṭhī* a Prerequisite for *Ariya Sammā Diṭṭhī*?

5. The main goal of a Buddhist is to STOP all future suffering in the rebirth process.

- How can one start on the Noble Path to stop rebirth, if one does not even believe in the rebirth process?
- But how do we know that there is a rebirth process with much suffering? How can we believe that there are 31 realms in this world instead of just two realms that we can see?

6. As discussed in #2 above, those were known to the world even before the Buddha. There were *yogis* like Ālāra Kālāma and Uddaka Rāmaputta. They had cultivated *abhiññā* powers and could see their past lives as well as could confirm the existence of higher *Deva* and *Brahma* realms.

- Therefore, it is possible to verify the above ten factors even without a Buddha in the world.
- Even without *abhiññā* powers, one can logically conclude that those ten factors are indeed true. Accounts of past lives from children worldwide and Near-Death Experiences (NDE) of many heart-patients provide evidence. See “[Evidence for Rebirth](#)” and “[Out-of-Body Experience \(OBE\) and Manomaya Kāya](#).”

Inviolable Axioms – Could Be Self-Evident for an Undefined Mind

7. The core teaching of the Buddha is that our efforts in seeking happiness within the rebirth process are futile. **The only way to reach a state where there is absolutely NO suffering is to disengage from the rebirth process.**

- Seeking that goal REQUIRES the following “axioms” in scientific terminology.
 1. Existence of the 31 realms.
 2. The rebirth process.
 3. The laws of *kamma* determine how rebirths take place.
 4. Existence of *gandhabba* and *para loka* makes it possible for many human (and animal) rebirths within a single existence.
- An axiom in science is a “fundamental truth” that is “self-evident.” However, the above axioms may not be “self-evident” until explained logically. After all, there were *yogis* like Ālāra Kālāma and Uddaka Rāmaputta these days who could see past lives. Waharaka Thero had some such capabilities, but unfortunately, we have lost that resource.
- By the way, evidence for the *gandhabba* from the *Tipiṭaka* is discussed in “[Gandhabba State – Evidence from Tipitaka](#).” Other evidence is discussed in “[Evidence for Rebirth](#)” and “[Out-of-Body Experience \(OBE\) and Manomaya Kāya](#).”

Buddha Dhamma: Non-Perceivability and Self-Consistency

8. **However, those axioms CAN become self-evident** if one spends enough time contemplating the laws of *kamma*. They are logical and self-consistence. For example, see “[Complexity of Life and the Way to Seek ‘Good Rebirths’](#)” and “[What is Kamma? – Is Everything Determined by Kamma?](#)”

- One cannot learn higher mathematics like calculus without learning basic arithmetic first, then algebra, and so on. Buddha Dhamma describes the laws of nature. **Nature’s laws are much more complex than advanced mathematics or quantum mechanics.**

9. There is an additional factor involved too. The ability to understand becomes easier when one starts “cleansing one’s mind.” That does not just mean following some precepts (even though they are an important part). See “[The Importance of Purifying the Mind](#).”

- One has to start on the mundane path, and live a simple life (away from both too much sensory pleasures and also hardships). One’s mind will become less stressful and less agitated.
- As one lives a moral life and keeps learning (and seeing the self-consistencies) one’s faith in the teachings will grow. See “[Buddha Dhamma: Non-Perceivability and Self-Consistency](#).”

The “Previously Unheard” Teaching

10. Even though the “good path” followed by *yogis* like Ālāra Kālāma and Uddaka Rāmaputta led to the cultivation of *abhiññā* powers and even “good rebirths,” it did not lead to the end of suffering. That is because one would still be engaged in the rebirth process.

- All births, even in the highest *Brahma* realms, have finite lifetimes. At the end of those long lifetimes, previous bad *kamma* can bring rebirths in lower realms.
- Rebirths in the lowest four realms (*apāyā*) are unavoidable until one starts comprehending the true nature of this world described by the Three Characteristics of Nature or *Tilakkhaṇa* (*anicca, dukkha, anatta*.) That means any “good” existence in the 31 realms cannot be maintained. Future rebirths in the *apāyā* cannot be avoided until one comprehends *Tilakkhaṇa*.

All Births (*Jāti*) End Up in Suffering

11. From *Paṭicca Samuppāda*: “*avijjā paccayā saṅkhāra; saṅkhāra paccayā viññāṇa; viññāṇa paccayā nāmarūpa, nāmarūpa paccayā salāyatana, salāyatana paccayā phasso, phassa paccayā vedanā, vedanā paccayā taṇhā, taṇhā paccayā upādāna, upādāna paccayā bhavo, bhava paccayā jāti, jāti paccayā jarā, maraṇa, soka-parideva-dukkha-domanassupāyasā sambhavan’ti*”

- “The whole mass of suffering” is inevitable for each *jāti* (birth) because each birth ends in death. Any birth (even in good realms) MUST come to an end. That is the harshest suffering to face (in the sense of leaving behind everything.)
- A birth does not happen without *bhava* (existence.) Therefore it is critical to understand what *bhava* and *jāti* are. That is why one needs to understand the mundane right views of (v) through (viii) in #4 above, BEFORE trying to understand what is meant by *Nibbāna* (the stopping of ALL future suffering by stopping ALL future *jāti*.)
- One grasps a new *bhava* (existence) at the end of the current *bhava*, ONLY because one has cravings for “worldly pleasures” (whether sensual pleasures or *jhānic* pleasures). Those inevitably lead to *taṇhā, upādāna, bhava, jāti*, and then “the whole mass of suffering” is inevitable.
- One CANNOT stop those cravings as long as one values those sensory/*jhānic* pleasures; in other words, until one gets rid of *avijjā* or the ignorance of the Four Noble Truths.
- Now we get to the verse that requires a good discussion to understand the *Ariya Sammā Diṭṭhi* that comes at the forefront of the *Ariya Aṭṭhaṅgika Magga* or the Noble Eight-fold Path.

The *Ariya Sammā Diṭṭhi*

12. Next verse from the *Mahācattārīsaka Sutta* (after the verse in #4): “*Katamā ca, bhikkhave, sammādiṭṭhi ariyā anāsavā lokuttarā maggaṅgā? Yā kho, bhikkhave, ariyacittassa anāsavacittassa ariyamaggasamaṅgino ariyamaggaṃ bhāvayato paññā paññindriyaṃ paññābalaṃ dhammavicayasambojjhaṅgo sammādiṭṭhi maggaṅgaṃ—ayaṃ vuccati, bhikkhave, sammādiṭṭhi ariyā anāsavā lokuttarā maggaṅgā.*”

- There are many factors summarized in that verse. But we can get started with the following.

“And what is the right view that is Noble, without cravings (*anāsavā* or without *āsavā*), and is a factor of the Noble Path leading to *Nibbāna*? Note that in the *sutta*, the word *lokuttarā* means “*loka*” + “*uttara*” where *loka* is “this world” and *uttara* implies “better than.” Thus, *lokuttarā maggaṅgā* means “a factor of the Noble Path that overcomes this world, leading to *Nibbāna*.”

- As we mentioned in the first two posts in this series on “[Wider Worldview of the Buddha](#),” Buddha’s teachings were “previously unknown to the world.”

- That “previously unknown part” is seeing the suffering hidden in what we perceive as “pleasures.” Such pleasures — sensory or *jhānic* as pleasures — belong to this world. They are temporary. Furthermore, people tend to do immoral things in seeking such pleasures.

The Suffering Hidden in Sensory Pleasures

13. *Anusaya* are our hidden cravings. They come to the surface triggered by mind-pleasing (or unpleasant) thought-objects (*ārammaṇa*.) See, “[Paticca Samuppāda – A “Self” Exists Due to Avijjā.](#)”

- Then one attaches to that *ārammaṇa* via greed or anger depending on whether the *ārammaṇa* is mind-pleasing or distasteful. That is *taṇhā*. Whether one gets attached or not depends on one’s *gati*. We have discussed this in detail in earlier posts in the “[Worldview of the Buddha.](#)”
- The key to attaining *Nibbāna* (*āsavakkhaya* or the removal of *āsava*) is to understand how to get rid of our *gati* to attach (*taṇhā*) to various *ārammaṇa*. As we will see, that originates from our ignorance of this world’s true (*anicca*, *dukkha*, and *anatta*) nature. What we perceive to provide happiness leads to suffering.
- The best analogy is a fish who bites into a tasty bait, not realizing the dangers hidden in that bait (a tasty worm.) Imagine the suffering associated with a hook piercing one’s mouth. Of course, that suffering ends up in an agonizing death due to lack of oxygen since the fish cannot breathe outside water.
- In the same way, we do not “see” the long-term consequences of our cravings for sensory/*jhānic* pleasures. That is the core idea embedded in *Tilakkhaṇa*. We will discuss that in detail in the upcoming posts.

5.2.9.5 Fear of Nibbāna (Enlightenment)

March 18, 2020

Introduction

1. I have presented an outline of the Buddha Dhamma in the “[Wider Worldview of the Buddha](#)” subsection. As explained there, the key message of the Buddha is that future suffering can be stopped only by stopping the rebirth process, i.e., by attaining *Nibbāna*. Now I need to clarify a few things.

- The main issue that I want to address is the “fear of *Nibbāna*.” **That arises with the wrong view of “I exist.”** Then the implication is that by stopping the rebirth process “I will be extinct.” **It is also a wrong view to say that “I do not exist.”** It is true that “I exist now as a human.” In the future, I may exist as *Deva*, *Brahma*, or an animal, based on the cumulative effect of my *kamma* (causes) up to now.
- If I attain the *Arahanthood* in this life, then after my death I will not exist anywhere in the 31 realms of this world. I would merge with *Nibbāna*.
- These days there are many unfruitful discussions about whether a “self” exists or not. As the Buddha pointed out, that is the wrong starting point to discuss life-cycle. **A given lifestream evolves according to causes (*kamma*.)** When the ability for past *kamma* to bring their *vipāka* is stopped (i.e., *taṇhā* or *upādāna* stopped,) then that process will stop and one merges with *Nibbāna* at the death of that last physical body.
- The Buddha clearly stated that *Nibbāna* exists. See, “*Nibbāna* “Exists”, but Not in This World.”
- I have discussed the Buddhist concept that while a “self with *gati*” exists until one attains *Nibbāna*, that is NOT a “permanent self” like a soul. See, for example, “[Anattā \(Mundane Interpretation\) – No ‘Unchanging Self’.](#)” “[An Apparent “Self” Is Involved in Kamma Generation.](#)” and “[Paticca Samuppāda – A “Self” Exists Due to Avijjā.](#)” Also see, “[Yamaka Sutta \(SN 22.85\) – Arahanthood Is Not Annihilation but End of Suffering.](#)”

2. We will re-visit that deeper concept in upcoming posts again, in a systematic way.

- First, I would like to explain in simple terms that there is no need to be fearful about “stopping the rebirth process.”
- I did a Google search and found the following comments by two people in online discussion forums. Those are representative of the comments of many others and thus I would like to address those.

First Myth – Fear of “Vanishing” or “Extinction” Equated to *Nibbāna*

3. The following are extractions from the comments of Person 1.

- “I started taking the Buddhist path not long ago, less than three years ago. At that time, life felt too heavy and it felt like it was pushing me towards not wanting to *play the game* anymore. So Buddhism seemed like the way to go.”
- “I can’t forget the first time I faced the idea of vanishing from this existence forever, the true death; never being able to come back once I ‘saw it’. Nevertheless, I kept investigating.”
- “Then I contemplated the idea of being trapped in this. Existence has no way out, anywhere you go there is still existence. In other words ‘What if it has been like this for millions, billions of years, maybe even for eternity?’”
- “But if enlightenment is the only escape, I am afraid of never being able to come back. I am afraid everything is just an illusion, that there aren’t others, just images and I’m alone. Sometimes I fear there isn’t even enlightenment to save me. My question is: Am I going crazy? Am I getting it all wrong?”

There Are Those Who Want to “End the Existence”

4. First of all, think about the mindset of those who commit suicide. Why do those people want to leave this world? Most of them probably do not believe in rebirth. But they just “wanted out” because they could not bear whatever the suffering that they were experiencing.

- In fact, that is the mindset of living-beings in the *apāyā*. They just want to “end it all.” But no matter how much they “want out,” that will not happen. That is a good example of the suffering expressed by the Buddha in the verse, “*yampicchaṃ na labhati tampi dukkhaṃ*,” or “not to get what one desires (*icchā*) is suffering”, in the *Dhammacakkappavattana Sutta* (SN 56.11.)
- In the [WebLink: suttacentral: Saccavibhaṅga Sutta \(MN 141\)](#), Ven. Sariputta explains the meaning of that verse: “*Katamañcāvuso, yampicchaṃ na labhati tampi dukkhaṃ? Jātidhammānaṃ, āvuso, sattānaṃ evaṃ icchā uppajjati: ‘aho vata mayaṃ na jātidhammā assāma; na ca vata no jāti āgaccheyā’ti. Na kho panetaṃ icchāya pattabbaṃ.*”
- **Translated:** “In a living-being subject to (some) births the **wish (desire) arises**, ‘Oh, may I not be subject to such a birth, and may that birth not come to me.’ But **such a desire will not be fulfilled** (and thus one will be subjected to suffering.)”

5. Thus, it is only when faced with physical pain/mental stress that one wishes it would just go away. Many people become interested in Buddhism when they run into either physical problems (getting sick or starting various body ailments due to old age) or mental problems (day-to-day stresses or even depression.)

- They can, of course, get relief from those issues by living a simple life and abstaining from immoral deeds.
- But then they start reading about *Nibbāna* as “ending of one’s existence” and then they freak out. That is what happened to Person 1 above.

Life in “Good Realms” Is Short-Lived

6. We normally do not realize the kind of harsh suffering experienced by many living beings. Of course, we can see only the animal realm other than the human realm. Even then, we do not pay much attention to the suffering of animals. In fact, we are conditioned to “not see” or “not recognize” the suffering of many animals that is in full display.

- For example, people enjoy watching animal shows on TV where, for example, a tiger chases a deer, catches up with it and eats it alive.
- Those who enjoy fishing do not see the suffering of a fish that is subjected to excruciating pain, with its mouth pierced by the hook, and unable to breathe outside water. But unlike some animals, fish cannot show emotion, which is a part of their *kamma vipāka*.
- On the other hand, we can clearly see many animals showing their suffering by either yelling out or by their facial expressions.
- **All those animals had been humans at some point in the rebirth process!**

7. Suffering in the other three realms of the *apāyā* is much worse. Therefore, those are the births (*jāti*) that we would not want for sure.

- The point is that as long as we are in the rebirth process, such births cannot be avoided. Such births are much more likely than human birth just based on the statistics we can verify.
- For example, there are less than eight billion people on Earth. But there are a million times more ants on Earth! There are a trillion TYPES OF lifeforms on Earth; see, “[WebLink: sciencealert.com: The Largest Study of Life Forms Ever Has Estimated That Earth Is Home to 1 TRILLION Species](http://sciencealert.com/The-Largest-Study-of-Life-Forms-Ever-Has-Estimated-That-Earth-Is-Home-to-1-TRILLION-Species).” These are mind-boggling numbers! That is not counting the other three realms in the *apāyā* that we cannot see.
- That is why the Buddha said that a human *bhava* (existence) is VERY rare. Any “pleasures” that we experience as a human is of VERY SHORT duration. The suffering that the Buddha taught was the suffering in the rebirth process where a given living-being spends much more time in the *apāyā*.
- Now we turn to the issue of “fear of non-existence in this world.”

We Are “Effectively Not in Existence” During at Least a Third of a Day

8. Even though we may fear “extinction out of existence,” we are not aware of “our existence” during sleep. We are not conscious while we sleep, especially during the deep sleep cycle. Most of the time, we go to sleep and until we wake up the next morning, we are completely unaware of our existence in the world.

- We don’t think about that normally. But I became acutely aware of this fact when I was made unconscious for over 9 hours during my brain surgery. I remember losing consciousness after the injection of the drug. The next thing I was aware of was when I came out of the drug-induced unconsciousness state.
- While unconscious or in deep sleep, we are (effectively) “not in this world.”
- When an *Arahant* dies, it will be like in such an “unconscious state (as far as this world is concerned)” forever. But he/she would have merged with *Nibbāna*. The Buddha clearly stated that *Nibbāna* exists. We just cannot explain it in terms of the concepts (*rūpa, citta, cetasika*) in this world. See, “[Nibbāna “Exists”, but Not in This World](#).”
- There is no overlap between “this world of 31 realms” and *Nibbāna* (full *Nibbāna* or *Parinibbāna*.) They are mutually exclusive. One is either “in this world” or “in *Parinibbāna*.” Either the Buddha or any of the *Arahants* who have passed away are not in this world anymore.
- Once an *Arahant* dies and merges with *Nibbāna*, there will be no more deaths. Attainment of *Nibbāna* is by removing ALL causes for the birth and death cycle (with complete removal of *avijjā*.) That is why *Nibbāna* is also called “deathless.”

Comments of Person 2

9. The second comment that I chose was from Person 2. Some of the selected parts are below.

- “..I was meditating yesterday and had this weird “experience.” **It freaks me the hell out because it was like I was never there.** I’m just feeling scared now after that experience. It felt extremely beautiful to me yesterday but right now I’m just freaking out for some reason. My mind is just racing with the thought “I don’t want to die” and I’m just having an existential crisis.”
- “I’m wishing I never did any of this meditation or consciousness work in the first place because it’s making me think that I can delude myself into thinking I’m alive but I’ve always been dead and have just been an empty void. I feel like I’m going insane. I’m just feeling a wave of negativity.”
- “I know that the way I’m phrasing it is silly but **I’m just curious about people who are completely enlightened (if such a thing is 100% possible).** Are these people like talking corpses? All these words can come out their mouth and it looks like they’re alive, but they’re really dead?”

Can One Lose Perception While Meditating?

10. The first part of Person 2’s comment is to do with meditation. What he experienced was a “perception-less meditative state” or an “*asañña samādhi*.”

- Such a state is reached by focusing on getting rid of ALL thoughts that come to the mind. That is NOT Buddhist meditation. In Buddhist meditation, one stops ONLY those thoughts that are immoral. One would CULTIVATE good or moral thoughts.
- One who cultivates such an *anāriya* meditation may be reborn in the *asañña* realm. That realm has a very long lifetime and there are no thoughts arising. It is like being unconscious for a billion years! Of course, that life will also end and one would be back in another realm.

Is An Arahant a Zombie?

11. Now, let us discuss the second highlighted comment from Person 2. An *Arahant* does not lose perception like in the case above in #10. A living *Arahant* “engages with the external world” just like anyone else.

- The only difference is that a living *Arahant* WILL NOT generate greedy, angry, or unwise thoughts.
- But he/she will recognize people as his/her mother, friend, an attractive person/object. He/she will experience the sweetness of sugar or the bitterness of vinegar, etc. Until the death of the physical body, an *Arahant* will live like any other human.

Nibbāna is Escape From Suffering – Two Types of Nibbāna

12. The Sinhala word for *Nibbāna* is “*Nivana*” or “*Niveema*” (නිවන/නිවීම.) That means “a cooling down.”

- [WebLink: suttacentral: Ādittapariyāya Sutta \(SN 35.28\)](#) is one of the early discourses of the Buddha. In that *sutta*, the Buddha compared said that the world is burning. That means the mind of anyone who embraces the world as good and fruitful is always “burning” or “under stress.” That stress goes away at the first stage of *Nibbāna* (*saupādisesa Nibbāna*) experienced by a living *Arahant*.
- However, a living *Arahant* has a physical body that arose due to past *kamma*. That body can experience bad *kamma vipāka* from the past. After the death of that physical body, an *Arahant* will not be reborn and that is the end of any and all suffering. That is *anupādisesa Nibbāna* or *Parinibbāna* (full *Nibbāna*.)

13. Finally, if anyone has other issues related to this topic, this is a good time to discuss them. This kind of discussion will help clarify issues that I may not have thought about, but others may have.

5.2.9.6 Worldview of the Buddha – Explanatory Material

[Ghost 1990 Movie – Good Depiction of Gandhabba Concept](#)

[Mental Body Versus the Physical Body](#)

[“Tipitaka English” Convention Adopted by Early European Scholars – Part 1](#)

[“Tipitaka English” Convention Adopted by Early European Scholars – Part 2](#)

5.2.9.6 Ghost 1990 Movie – Good Depiction of Gandhabba Concept .1

January 17, 2020; revised August 29, 2022 (added #1; other minor revisions)

Introduction

1. I have been trying to convey the concept of a *gandhabba* (mental body or *manomaya kāya*) for several years. But I don’t think many readers grasp the concept well. One critical problem is that sometimes it is tough to explain a new concept with just words.

- When we see the word “*kāya*” (body), We immediately perceive a “solid body” like our physical body. But the “*manomaya kāya*” or the “*gandhabba kāya*” of a *gandhabba* has no “matter” as in solid objects.
- In Buddha Dhamma, “*rūpa*” includes energy and “tangible matter.” Modern science has also adopted this after Einstein showed that matter and energy are related by his famous equation, $E = mc^2$. Also, see “[Photons Are Particles Not Waves.](#)” Radio waves are also photons.
- We can listen to a radio in the house because radio waves can go through walls. **A *gandhabba* is like radio waves and can go through walls.** That is how those with *iddhi* powers go through walls, as described in many *suttas*; see “[Pāṭihāriya \(Supernormal Abilities\) of a Buddha – Part I.](#)”

2. The 1990 movie “Ghost” provides a good visualization of *gandhabba*. That movie is about the *gandhabba* of Sam Wheat, who dies tragically.

- A description of the movie and the plot is in the Wikipedia article “[Ghost \(1990 film\)](#).” **However, one MUST watch the movie and read the following discussion to understand the *gandhabba* concept.** A free version of the full movie is available online; make sure it is the 1990 version.

The Background (Up to 23 Minutes)

3. From the above article: “Sam Wheat, a banker, and his girlfriend Molly Jensen, a potter, renovate and move into an apartment in Manhattan with the help of Sam’s friend and co-worker Carl Bruner. One afternoon, Sam confides in Carl about his discovery of unusually high balances in obscure bank accounts. He decides to investigate the matter himself, declining Carl’s offer of assistance. That night, Sam and Molly are attacked by a mugger who shoots and kills Sam in a scuffle before stealing his wallet. Sam sees Molly crying over his body and discovers **he is now a ghost**, invisible and unable to interact with the mortal world.”

- The ghost, of course, is the *gandhabba* or the *manomaya kāya* of Sam. The movie clearly shows some of the features of the *gandhabba* that I have tried to explain with words. When Sam dies, his *gandhabba* comes out of the dead body. Initially, he does not even realize that he has died. By the way, if one dies such a sudden death, there is no time to feel the physical pain.
- So, Sam is confused when he sees his dead body and his girlfriend, Molly, crying. It takes him a little while to realize what happened. He sees his own bloodied body held up by Molly. He tries to touch the body, and his fingers “go through the dead body.” We can disregard the next few moments showing the “white light” coming to “take him to heaven.” This will be discussed in #12 below.

- When a human dies suddenly by a gunshot, his “*bhava*” will likely not change. So, Sam probably has more time left in the human *bhava*, but he now has to stay in the “*gandhabba* state” until a matching mother’s womb becomes available for his next human birth. See, “[Bhava and Jāti – States of Existence and Births Therein.](#)”
- According to the movie script, Sam’s mind is focused on Molly, and thus the “white light” goes back without him.

***Gandhabba* Is Not a “Scary Misty Ghost”**

4. Many of you may have imagined that a *gandhabba* is like a “scary misty ghost” as in popular cartoons. However, a *gandhabba* coming out of a body is a “complete imprint” of that human including the clothes he/she had been wearing.

- Thus, Sam’s ghost or Sam’s *gandhabba* looks just like Sam when he died, complete with whatever he was wearing. That is part of the “*utuja kāya*” or the “fine body” around the “mental body.” That mental body by itself is just a few *suddhaṭṭhaka*.
- However, when that *gandhabba* is pulled into a womb, the *utuja kāya* is shed and only the “pure mental body” of a few *suddhaṭṭhaka* merge with the zygote in the womb. See, “[Buddhist Explanations of Conception, Abortion, and Contraception](#)” and “[Cloning and Gandhabba.](#)”

At the Hospital (Up to 26 minutes)

5. An ambulance takes Sam’s body to the hospital, and he stays by the dead body trying to make sense of things. Of course, with that “mental body,” he can go anywhere he wishes.

- While sitting by his dead body, another *gandhabba* (old guy) comes and talks to him. They also watch another patient dying and his “ghost” or *gandhabba* taken to heaven with the “white light.” As the old guy says, most of the dead go to hell not heaven.
- **Then an attendant comes and takes his dead body “right through him.” That is what I try to say that a *gandhabba* has a “very subtle fine body.” It is an “energy body” or a “force field.”**
- His *gandhabba* body” has only a trace of matter. Solid objects can go right through, and “he” can go through solid objects!

Sam’s Ghost (*Gandhabba*) Learning About the *Gandhabba* World (*Para Loka*) – (Up to 54 minutes)

6. Sam sees another “*gandhabba* woman” walking through a tombstone at his funeral. Later, at Molly’s place, he goes “through a door” for the first time. Sam’s killer comes to Molly’s apartment, and Sam follows him back to the killer’s apartment. On the subway train ride, Sam meets a violent “subway ghost” who has learned to move physical objects with mind power. Later on, Sam would learn from him how to focus on mental energy and move physical objects.

- That is possible per Buddha Dhamma. Even though most *gandhabbā* do not have such an ability, a few of them may also get such capability due to “*puñña iddhi*” or due to exceptional past *kamma vipāka*.

7. Anyway, Sam finds out that the name of his killer is Willie. In Willie’s neighborhood, Sam also meets psychic Oda Mae, a charlatan pretending to communicate with the spirits of the dead. However, it turns out that Oda’s mother had such capabilities, and after the meeting with “Sam’s ghost,” Oda can also hear his voice.

- That is also possible per Buddha Dhamma. Some humans are born with *puñña iddhi* to be able to hear and/or see *gandhabbā*. Such accounts (over long periods) may be responsible for the “cartoon versions” we come across in books and movies such as this.

- Sam persuades Oda Mae to help him. They still have a hard time convincing Molly. But Molly is convinced by the personal details Sam provides through Oda.

At this point, you may want to watch the movie. **I will be revealing the storyline from this point.** If you want to enjoy the film, it is a good idea to finish watching it and then read the rest of this post.

Sam's Friend Carl – (Up to 72 minutes)

8. Molly decides to contact Carl, a friend and co-worker of Sam. She tells him that Sam's ghost discovered his killer was Willie. Carl promises to check on that.

- Molly goes to the police, and they don't believe the story either. The detective says there is no record of Willie, but Oda Mae has a history of deceiving people.
- Meanwhile, Carl goes to meet Willie and Sam follows him. Sam is shocked to find out that it was Carl who hired Willie. It turns out that Sam had a bank code in his wallet for an account that had four million dollars, and Carl wanted Willie to get Sam's wallet. But things did not go as planned, and Willie shot and killed Sam.
- Later on, Carl goes back to Molly and tries to seduce her. Sam gets into a rage and lunges at Carl. Of course, he could not make contact, but he was astonished to see that he could knock a picture off a table.

Sam's Ghost Learns How to Make Bodily Contact – (Up to 78 minutes)

9. Sam remembers the "subway ghost" who can move physical objects with mind power. He returns to the subway and learns how to focus the mind's power to move physical objects.

- In Buddha Dhamma, that is possible via cultivating *jhāna*. As we discussed before, there are rare cases where a *gandhabba* would be able to make physical contact via *puñña iddhi*. However, this movie aspect is unlikely to happen in real life.
- This is why it is not fun to be a *gandhabba*. Some *gandhabbā* (ghosts in the movie) can see and hear humans. But they are frustrated that they cannot touch, eat food, or smell scents like humans do. There is a scene in the movie where the "subway ghost" says he would give anything to smoke a cigarette (@ 76 minutes.)
- (I have mentioned in previous posts that a *gandhabba* can "take in various types of scents" and become a bit denser. That is a different mechanism than inhaling through the nose (a *gandhabba* only has an imprint of a nose and not a real nose.)

Mind Power – (Up to 78 minutes)

10. The "subway ghost" explains to Sam that he has no physical body even though he seems to be wearing clothes etc. He says, "you've got no body (meaning no physical body), son. It is all up here" and points to the head. (But of course, the seat of the mind is not in the head. It is close to where the physical heart normally is.)

- Subway ghost says, "If you want to move something, you've got to move it with your mind. You've got to focus all your anger, love, and hate, and push from all the way here, **from the middle of your stomach**. And let it explode like a reactor." (That turns out to be the right place!)
- That is a CRITICAL point. Even from our own experience, we know that when we try to do something hard, the "push" comes from the heart area, and not the head.
- The real power is in our thoughts (specifically *javana citta*.) That power can be highly focused on when one is in a *jhāna*. But when one is in *jhāna samāpatti*, one can focus the mind power and even

CREATE matter! See, "[Mystical Phenomena in Buddhism?](#)" [*samāpatti* :[f.] attainment; an enjoying stage of meditation.]

Oda Mae Is Now a Genuine Psychic Reader – (Up to 80 minutes)

11. Oda Mae is no longer a fake. She can make contact with many “ghosts” or *gandhabbas* in the *para loka*. As you see, the *para loka* co-exists with our *loka*; it is just that we cannot see those in the *para loka*.

- However, she is now in trouble since Carl knows her identity. The story gets interesting now and there are no more “technical details” that need to be discussed here.
- If there are questions, we can discuss them at the discussion forum. This is a very complex subject, but I hope you get a general idea.

Other Relevant Points – Births in Different Realms

12. A human *gandhabba* (ghost in the movie) comes out of a dead body ONLY IF that person has more *kammic* energy left for human *bhava*. That is the case in many instances, especially if one dies by a gunshot as in this case.

- However, if the *kammic* energy for human *bhava* runs out at the moment of death, then an entirely different event occurs. Let us consider specific cases of a human dying and grasping an animal, *Deva*, and *Brahma bhava*.
- If the dying human grasps an animal *bhava* (say a dog), then instead of a “human ghost” it is a “dog ghost” or a “dog *gandhabba*” that comes out of the dead body. That “dog *gandhabba*” will not stay in that vicinity. It will be attracted to somewhere there are dogs with matching *gati*. Then it will stay there until a suitable womb becomes available, and at that time it will be drawn into that womb.
- A very different thing happens if a dying human grasps a *Deva bhava*. In that case, **no “ghost” or *gandhabba* will come out of the dead body.** Instead, a full-blown *Deva* will appear in a matching *Deva* realm instantaneously. If a *Brahma bhava* is grasped, a *Brahma* will appear in the matching *Brahma* realm.
- What we discussed in that last bullet is a critical point. **There is no “being” going from here to the *Deva* or *Brahma* realm** (located far above the Earth.) The human dies here and *Deva* (or *Brahma*) is born there. Due to a past cause (*kamma*), a *Deva* or a *Brahma* is born at the appropriate location.

Other Misconceptions in the Movie

13. The movie shows that “good people” like Sam get to go to heaven (though the white light) and “bad people” like Carl and Willie are taken to hell by “hell beings.” But Buddha Dhamma has a different picture of rebirth.

- First, hell and heaven (*Deva* realms) are not the only two “destinations.” One can be born among any of the 31 realms, including the animal realm we see.
- The second is that one’s human *bhava* does not normally end at death. A human *bhava* can last thousands of years and unless one has used up all *kammic* energy for the human *bhava*, one could be reborn with a human body again. In that case, the “mental body” corresponding to the human *bhava* (i.e., human *gandhabba*) comes out of the dead body and has to wait until a matching womb becomes available.
- There is an exception to the rule in the last bullet. If one has done a *ānantariya kamma* (like killing a parent or cultivating a *jhāna*) then one’s **human *bhava* will end at the death of the physical body** even if there is more *kammic* energy left. In the first case, one will be born in hell and in the second (*jhāna*) one will be born in a *Brahma* realm.
- There are a few other inconsistencies in the movie, but those are the major ones.

Pāli Word for Ghost is “*Bhūta*“

14. Another interesting point is that the Pāli word for “ghost” is “*bhūta*.”

- *Bhūta* in Pāli (and Sinhala, භූත) means an entity that one cannot grasp.
- For example, scientists are trying to figure out the fundamental “blocks” that all matter is made of. They initially thought an atom would be the smallest unit of matter. Then they discovered that an atom is made of electrons, protons, and neutrons. They kept probing deeper and now are down to levels where it is hard to distinguish between “matter” and “energy.”
- The four great elements (*cattāri mahābhūtāni*) in Buddha Dhamma are *paṭhavī*, *āpo*, *tejo*, and *vāyo*. But they can NEVER be detected individually. They ALWAYS come in packets called “*suddhaṭṭhaka*.” A *suddhaṭṭhaka* has those four great elements and four more elementary units. Even that unit cannot be “seen” and is said to be at the “*bhūta* stage.”
- A *gandhabba* (ghost in the above discussion) has only three *suddhaṭṭhaka* (they are called *dasaka* because when vibrational and rotational “modes” are added to become “ten units each.”
- To be visible to our eyes, billions and billions of such *suddhaṭṭhaka* need to be piled up. We can see that a *gandhabba* hardly has any “tangible matter.” That is why it is called a “ghost” or a “*bhūta*.”

One Last Thing

15. At 109 minutes, Oda Mae “lets” Sam get into her physical body so that Molly will be able to “touch him” for the last time.

- That is possible according to Buddha Dhamma. A *gandhabba* can “get into” that physical body of a willing human.
- Even if the human is not willing but has a “weak mind,” a rogue *gandhabba* can “get in.” It is said that human is now “possessed.” Such cases are still reported in Sri Lanka and the human is said to be “possessed by a demon.” But it is usually a *gandhabba* with bad character and not a demon.
- By the way, I was very much moved by that last scene. This is part of the suffering we tend to be unaware of or even disregard. It is a good example of “*piyehi vippayogo dukkho*” OR “separation from what is loved is suffering.” We will all face that at least at the moment of death. We will have no choice but to leave all that we love.

There are many more details like that. But the above discussion should provide the basic ideas involved with a *gandhabba*. As the Buddha admonished, we will never be able to uncover and sort out all such complexities. But it is good to be aware of the general ideas involved.

5.2.9.6 Mental Body Versus the Physical Body

.2

February 2, 2020; revised August 24, 2021

Essential Facts for this post

1. The mental body is far more important than the physical body. Let me first summarize the relevant conclusions from the “[Origin of Life](#)” section for this post.

- The mind does not exist by itself. **There must be at least a trace of matter for the mind to exist.** That is a critical point in Buddha Dhamma that many people do not realize. The “seat of the mind” is called “*hadaya vatthu*.” It is unbelievably small and is created by *kammic* energy when a living being grasps a new existence. In addition to *hadaya vatthu*, up to five “*pasāda rūpa*” are created by the *kammic* energy at that time.

- That package, *hadaya vatthu* together with the set of *pasāda rūpa* is the “smallest unit of existence.” It is called the “*manomaya kāya*” because the energy for its creation comes from the *kammic* energy based on a strong past *kamma*. See, “[Origin of Life – One Creates One’s Own Future Lives.](#)”
- In the 20 *Brahma* realms (out of 31 realms in this world) that “*manomaya kāya*” is all they have. They do not need a physical body with “flesh and blood” because those *Brahmā* do not experience taste, smell, or touch.
- When a living being is born in the human realm, it is born with that “*manomaya kāya*” which is given a special name of *gandhabba*. When a suitable womb with “matching *gati*” appears, that *gandhabba* is drawn into it and merges with the zygote there. That “living zygote” first grows into a baby (by taking in food from the mother.). After being born, that baby grows into an adult with a body weighing a hundred plus pounds (or tens of kg.) Details in #4 below.
- Thus, it is clear that virtually all physical matter in the human body comes from food.

The Critical “Body” Is Not “Physical Body” But “Mental Body” (*Manomaya Kāya*)

2. Therefore, in most of the realms below the *Brahma* realms, there is an “additional body,” the “physical body.”

- That physical body is required ONLY to provide sensory inputs on tastes, smells, and touches.
- In contrast to the physical body, the mental body has “something extra” that makes it ALIVE, as we will discuss below. It is quite clear that the “physical body” is secondary to the “mental body” (*manomaya kāya* or the *gandhabba*.)
- In fact, the mental body can perform the other functions (seeing and hearing) BETTER if it is not trapped inside the physical body.
- The lady in the following video was born blind. She could not see only because there was something wrong with her PHYSICAL eyes, the optic nerve, or the visual cortex in the brain. Once the *gandhabba* (mental body) came out, she was able to see for the first time in her life:

[WebLink: youtube: Near Death Experience - Blind woman 'sees' while out of body](#)

- In the previous post, “[Origin of Life – One Creates One’s Own Future Lives.](#)” I added another relevant video a day after that post was published. You may want to watch that video too. Both these videos present powerful evidence of not only the existence of *gandhabba* but also why it is the “essence of a human.” The physical body is just a shell.
- **All mental activity occurs in the *gandhabba* or the mental body.** However, we cannot taste, smell, or touch without that physical body.

Relevance to *Satipaṭṭhāna Bhāvanā – Paṭikūlamanasikāra Pabba*

3. In the [Mahā Satipaṭṭhāna Sutta](#) (DN 22,) the Buddha allocated several sections under the *Kāyānupassanā* section to discuss the physical human body.

- The subsection on 1.4. *Kāyānupassanā Paṭikūlamanasikāra Pabba* describes the 32 parts of the human body. That title is incorrectly translated as “Applying the Mind to **Repulsiveness** of the Body.” That section shows that the physical body of a human is just a “collection of parts.”
- The Buddha never emphasized “repulsiveness” of anything. (He only emphasized the “unfruitfulness” of getting attached to “mind-pleasing” things in this world.)
- If one starts contemplating that one’s body is repulsive (as many people mistakenly do,) that only leads to *paṭigha* (friction) in mind. Such a mindset is not conducive to meditation.

Relevance to *Satipaṭṭhāna Bhāvanā – Dhātumanasikāra Pabba*

4. The next subsection, 1.5. *Kāyānupassanā Dhātumanasikāra Pabba*, points out that the physical body only has four great elements (*pathavī dhātu, āpo dhātu, tejo dhātu, vāyo dhātu*.) Bodies of any other living beings are, as well as inert objects, also have the same four great elements. There is NOTHING in the PHYSICAL BODY of a human being that is different from an animal or an inert object.

- In the language of modern science, all those have the same atoms and molecules.
- There is nothing special about the composition of the human body. The basic unit of a living cell is the same for a human as an animal. See the video in #9 of the post, “[Origin of Life – There is No Traceable Origin](#).” That post started the series of posts on “[Origin of Life](#).” We will be referring back to those posts often.
- If there is anything “special” in a human or animal body, that is the cell. We remember that a human physical body starts with just a single cell (zygote) and, of course, a *gandhabba*. See, “[Buddhist Explanations of Conception, Abortion, and Contraception](#)” and “[Cloning and Gandhabba](#).”
- By the way, plants have cells too. A tiny seed grows into a big tree because of cell division. However, only humans and animals have mental bodies, that set them apart from plants. Plants cannot think.

Relevance to *Satipaṭṭhāna Bhāvanā – Navasivathika Pabba*

5. Then the section on 1.6. *Kāyānupassanā Navasivathika Pabba* is about contemplating on what happens to that physical body after one dies.

- Once the *gandhabba* or the *manomaya kāya* leaves a dead physical body, that physical body is no different from a log of wood.
- It is the *manomaya kāya* that keeps a physical body “live” and “warm.” As soon as the *gandhabba* leaves for good, the physical body loses the “aliveness.” Our dog died several years ago, and I was shocked when I touched its dead body. It was cold and rigid, just like a piece of wood. The body warmth may be there for a little while because it takes some time to lose the body heat.
- In the days of the Buddha, most dead bodies were taken deep into the forests and discarded. Then wild animals would come and eat those bodies. If animals do not eat such a body, it will start decaying and will start smelling bad. Then it will lose the flesh over time, and only the bones would be left. Even those bones will degrade and become dust in the long term.
- This *Navasivathika Bhāvanā* needs to be done in that fashion, to realize the unfruitfulness of getting overly attached to the physical body. Of course, we need to keep it in good shape by eating healthy and exercising regularly. If the physical body becomes out-of-shape that will lead to illnesses and much discomfort. We need to live a comfortable (not luxurious) life to make progress on the Path.

The Uniqueness of the Mental Body (*Manomaya Kāya*)

6. It helps a lot to realize that one’s physical body cannot be taken as one’s essence.

- Even the mental body does not have an essence since that also will be discarded when a new existence (*bhava*) is grasped.
- However, the mental body is ESSENTIAL to make progress on the Path. The mental body of human existence is “hard to get.” Thus, we should utilize it now that we have that rare opportunity.

Why Is Mental Body Unique?

7. **The mental body (*gandhabba*) is VERY DIFFERENT from the physical body.** The mental body has a few of the smallest units of matter (*suddhaṭṭhaka*) TOGETHER with the essential elements of LIFE.

Those ESSENTIAL elements are the *hadaya vatthu* and a set of five *pasāda rūpa*. **Those are the only LIVE things in a human (or an animal.)**

- The *hadaya vatthu* is the “seat of the mind” and where thoughts (*citta*) arise.
- We experience the five physical, sensory inputs with the five *pasāda rūpa*.
- **Those essential items (collectively called *gandhabba*) are created by *kammic* energy and sustain the human *bhava*.**

How the Mental Body Controls the Physical Body

8. A live physical body has a *gandhabba* (mental body) in it. In the post “[Our Mental Body – Gandhabba](#),” we discussed a good analogy of how the mental body controls the physical body (see #8 in that post.)

- That *gandhabba* consists of a UNIQUE set of seven items called “*dasaka*” or “packages of tens.” Those are listed in #9 of the post “[Gandhabba Sensing the World – With and Without a Physical Body](#).” In many posts, I often refer to six entities: *hadaya vatthu* and five *pasāda rūpa*.
- Different types of *dasaka* are formed just by incorporating **one mode of spin (*bramana*) and one mode of rotation (*paribramana*)** to a *suddhaṭṭhaka* (smallest unit of matter.) That is how an inert *suddhaṭṭhaka* becomes ALIVE. **When the *kammic* energy wears out, those motions stop, which is the end of that existence (*bhava*.)**
- Details are in the two posts, “[Our Mental Body – Gandhabba](#),” and “[Gandhabba Sensing the World – With and Without a Physical Body](#).” One can get a deeper understanding by reading those posts. It is good to have at least a general idea.

Kammic Energy creates the Mental Body

9. In fact, as we have discussed, when ANY living being grasps ANY new existence, a corresponding mental body is created by the *kammic* energy. That mental body matches the particular *kamma* that was responsible for the new existence (*bhava*.)

- If that *kamma* was a *pāpa kamma* done with anger (say the killing of a human,) then the new *bhava* could be in a *niraya* (hell.) If that *kamma* was a *puñña kamma* done with compassion (say taking care of an invalid or sick person,) then the new *bhava* could be in a *Deva* realm. See, “[Kilesa – Relationship To Akusala, Kusala, And Puñña Kamma](#).”
- Both those two scenarios could be true of ANY person who is below the *Sotāpanna Anugāmi* stage.
- The point is that even if one did not kill a human in the CURRENT life, such crimes might have been done in a previous life. **We have no idea what we have done in our previous lives. That is the danger in the rebirth process.**

Gandhabba (Mental Body) Is Unique to Human and Animal Realms

10. We started the series with five posts (“[Origin of Life – There is No Traceable Origin](#)” to “[Cloning and Gandhabba](#)” that laid the basic foundation of the Buddha’s description of life. As summarized in that first post, Buddha taught that there is no “traceable beginning” to life. That means each of us has existed (among the 31 realms of this world) “forever.”

- The next four posts specifically dealt with life in the human realm. It is a bit complex because human life involves a physical body (collection of material body parts) in addition to the mental body created by *kammic* energy. That same picture also holds for the animal realm.
- Living beings in all other realms have “one integrated body.” For example, a *Brahma* only has a “body” very similar to the human mental body (*gandhabba*.) Such a “body” is “mostly mental” and the amount

of matter is million-times smaller than a mustard seed. Of course, it expands to the size of the human body while inside the human body (it is like an energy field.)

- A *Deva* has a bit more dense “material body” but is still invisible to us. Again, it has no *gandhabba*-type separate mental body.
- Beings in the lower realms may have denser bodies but again do not have separate mental bodies.
- We need to focus more on human life. Without the concept of *gandhabba*, we cannot explain the growth of a “human body” in the mother’s womb (**starting with an inert single cell**.) That is why I published those four posts on *gandhabba* at the beginning of the series.

Summary

11. The mental body is much more important than the physical body due to the following reasons.

- The “essence of a human” is the mental body that has the *hadaya vatthu* (seat of the mind) and the five *pasāda rūpa* (that “sense” visuals, sounds, tastes, smells, and touches.) Those entities are what constitute “the mind.” The ONLY WAY those six entities created is via our *kammic* energy in our thoughts (specifically *javana cittā*.)
- The mental body (*gandhabba*) controls the physical body.
- A physical body lives only about a hundred years, while the mental body (*gandhabba*) may last hundreds of years.
- However, we also need a healthy physical body to live a healthy life. We especially need a healthy brain. The brain first processes all external sensory inputs.

5.2.9.6 “Tipiṭaka English” Convention Adopted by Early European Scholars – Part 1

February 8, 2020; added #13 (pronunciation guide) on July 23, 2020; August 25, 2022

Background

1. Just three months after the Buddha’s *Parinibbāna* (passing away), the First Buddhist Council (*Dhamma Sangāyanā*) took place. The leading disciples of the Buddha realized the importance of organizing the teachings of the Buddha accumulated over 45 years. Organizing the material into “three baskets” (*Tipiṭaka*) was completed only at the Third Council held 200 years after the *Parinibbāna* of the Buddha.

- The material in the *Tipiṭaka* was transmitted mostly verbally from one generation to the next over roughly the first four hundred years. It was only at the Fourth Council that the *Tipiṭaka* was written down.
- The *Tipiṭaka* (or the Pāli Canon) was written down in Matale, Sri Lanka, at the turn of the first century, 2000 years ago. Pāli is a spoken language and does not have its script. The *Tipiṭaka* was written in the Sinhala script.
- See details in “[Preservation of the Buddha Dhamma](#).”

Writing Pāli Words in English – Different Convention

2. There are two specific issues in writing Pāli words in any language. Note that this is **not** regarding **translation to English**.

- Pāli is a phonetic language, meaning words must provide original sounds. Many words have their meanings explicit in the way they sound. See “[Why is it Necessary to Learn Key Pāli Words?](#)”
- However, In “Standard English,” the same letter combinations may yield different sounds. For example, “**th**” is pronounced differently in “**them**” than in “**thief**.” Therefore, “Standard English” writing will lead to problems writing Pāli words.

- The second problem is that Pāli words written with “Standard English” become very long. I see many Sri Lankans writing “*anicca*” as “*anichcha*” (අනිච්ඡා in Sinhala) because that is how it is pronounced. I also used to write “*gati*” as “*gathi*” since that is how it is pronounced.
- However, we must adhere to the convention adopted by the Early Europeans (in the late 1800s) to avoid confusion.

3. When the early Europeans started writing the Pāli *Tipiṭaka* using the English alphabet (a Latin alphabet), they realized the necessity to represent the original sounds in an “unambiguous and efficient” way.

- We will call the convention they adopted “*Tipiṭaka* English.”
- That “*Tipiṭaka* English” convention is **DIFFERENT** from “Standard English.”
- Let us first address the “sound” issue.

English “th” Sound Depends on the Word

4. We know that “th” represents a different sound in the word “them” than in “thief.”

- A **phoneme** is the smallest contrastive segment in a language. In other words, they are the smallest building blocks that make the difference between two words. The term **digraph** describes a combination of two letters representing only a single phoneme.
- In words like them, father, and writhe, the **digraph** is **th (voiced)**, and the **phoneme** is /th/. This is the “ඳ” sound in Sinhala, as we will see below.
- On the other hand, in words like a thief, Catholic, and both, the **digraph** is **th (voiceless)** and the **phoneme** is /th/. This is the “ත” sound in Sinhala.
- Don’t worry about the above technical terms. **The point here is that one MUST be aware of the correct “Standard English” when pronouncing those English words.**
- That was one reason to adopt a new “*Tipiṭaka* English” convention. Now, let us discuss the second reason.

Pāli Words can become very long in “Standard English”

5. Now, let us see why the “Standard English” convention leads to long words written with the English (Latin) alphabet. Let us take a simple Pāli word, “*citta*.” In the original *Tipiṭaka*, it was written as “චිත්ත” in Sinhala.

The “ch” sound in English is seen, for example, in “china” and “chain.” It takes two English letters to produce the “ච” sound. In the same way, the “ත” sound requires two letters, “th,” in English as in “Thailand” or “both.”

- Therefore, in “Standard English,” “චිත්ත” would be reproduced as “**chiththa**.”
- As you can see, writing that word using “Standard English” would take eight letters instead of five letters in “*citta*.”
- With more complex Pāli words, the corresponding “Standard English” reproduction would be cumbersome. **That seems to be the second reason for using a different “*Tipiṭaka* English” convention; see below.**

Evolution of “*Tipiṭaka* English”

To address the above issues, a “*Tipiṭaka* English” convention was adopted in the 1800s, as we discussed below. You will see it below if you have not grasped what I am trying to get to.

6. I came across an old book by James D’Alwis, published in **1870** ([Ref. 1](#)), that describes the historical process of cataloging the Pāli literature found in Sri Lanka (called Ceylon at that time.) The book is available on Amazon.

- The seed for the project was a request by a government agent in 1868 to the “Chief Translator to Government” to assist with a project in India to collect and compile Sanskrit literature.
- In 1869, the Chief Translator to Government replied that nearly all Sanskrit manuscripts in Ceylon were “importations from India.” He suggested that it would be worthwhile to initiate a similar effort to collect and compile the Pāli and Sinhalese manuscripts in Ceylon.
- That proposal was approved in early 1870. James D’Alwis, who had done some work on Pāli/Sinhalese literature and Buddhism, was selected to collect and compile such manuscripts mainly from Buddhist temples (“*pansalas*.”)
- Mr. D’Alwis was a civil servant of the British Government at that time. At that time, there was a concerted effort by the English civil servants to recover and preserve all ancient literature that they came across in Asian countries. See “[Background on the Current Revival of Buddhism \(Buddha Dhamma\)](#).”
- Dr. Malalasekera’s account confirms the above background in [Ref. 2](#), pp. xv-xvii.

The Original Convention for “*Tipiṭaka* English”

7. The goal was to collect all Pāli manuscripts and write them with the English (Latin) alphabet. The early work by Mr. D’Alwis followed (as quoted from p. xxvii of the book) “the system sanctioned by Government in the Minute, which is published in the Appendix.”

- A full page in the Appendix has the complete alphabet of the Sinhala language (and the corresponding English script adopted.) Download here: [WebLink: PureDhamma Picture: Complete Orthography – Sinhala to English](#)
- That page (on p. 234 of the book) has the Sinhala alphabet, together with the Latin letters adopted to represent those sounds (**adopted on August 28, 1866.**) That was the first version of the “*Tipiṭaka* English” convention. As we will see below, one more change was adopted based on a recommendation by D’Alwis.
- It may be difficult to read that page. The following is an enlarged section containing the consonants.

<i>Consonants.</i>					
Gutturals ...	ක k	ඛ kh	ග g	ඝ gh	ඛ ඛ

Labials	ප p	ඵ ph	බ b	භ bh	ම m
Semi vowels	ය y	ර r	ල l	ළ l	ව v
Sibilants	ස s	ශ s'	ෂ sh	හ h	

- Now, let us discuss some of the adopted conventions in “*Tipiṭaka* English.”

Only “t” Represents the “ත” Sound

8. The letter “ත” in Sinhala represents the sound “th” is in Thailand or north. But the “*Tipiṭaka* convention” is to use “t.”

- Therefore, Thailand in “ordinary English” becomes “Tailand” in “*Tipiṭaka* English.”
- The word “gati” is pronounced as “gathi,” where the sound “th” is in Thailand. But the “*Tipiṭaka* English” convention is to write as “gati.”
- The word “*Tipiṭaka*” also starts with the “ත” sound. In “Standard English,” it would be, “*Thipiṭaka*.”

Anatta in “Standard English” would be “anaththa.”

- Therefore, words become significantly shorter with the “*Tipiṭaka* English” convention. With more complex words with the “ch” and “th” sounds, the corresponding English words can become very long.

Only “d” Represents the “ද” Sound

9. Another is the “ද” sound, pronounced like “this.” In “*Tipiṭaka* English,” the letter “d” represents the “th” sound in “this” or “that.”

- For example, the Pāli word “දස” in “*Tipiṭaka* English” is “dasa.” which needs to be pronounced like the “th” sound in “the” or “that.”
- Of course, the word “dasa” appears in “dasa akusala” for “ten immoral deeds.”
- More examples are sadda, hadaya and Deva.

The “ච” Sound In the Above Table is With “ch”

10. It is interesting to see that the above Table (in #7) has the “ච” sound In the represented with “ch” as in “Standard English.” Thus the decision to just use “c” to represent the “ච” sound was made later on.

- The text in D’Alwis’s book represented that “mixed convention.” On p. 136, for example, the name “Kacchchāna” appears. In modern texts, it is “Kaccāna.”
- The word “vivichchati” (විච්ඡති in Sinhala) appears on p. 73 as “vivichchati,” where “ch” represents the “ච” sound and “chh” represented the “ඡ” sound. We can see why they decided to make that change too!
- By the time “The Dhammasangani” by Edward Müller came out in 1885 (Ref. 3), they had adopted the current convention to use “c” to represent the “ච” sound.

Current Convention – Only “c” Represents the “ච” Sound

11. For example, the letter “ච” frequently appears in Pāli verses, and it has the “ch” sound (as in chai tea). In “ordinary English,” the Pāli word *anicca* (අනිච්ඡ) would be “anichcha.” You can see why that would lead to very long words in English. I used to do that too, and I still see some Sri Lankans writing words that way.

- Therefore, in almost all cases, a single English letter “c” represents the “ch” sound in “Tipiṭaka English.”
- Note that “chai tea” would be “cai tea” in “Tipiṭaka English”!

“Tipiṭaka English” Conventions Hold Everywhere

12. The “ṭ” sound is ALWAYS represented by “t,” and the following are some examples we use often.

- Atta, Anatta, gati, sota, tanhā, tejo, Tilakkhana, Tisarana, āyatana

The “ḍ” sound is ALWAYS represented by “d” as in the following:

- Hadaya, sadda, dosa, Deva, desanā, diṭṭhi, dukkha, dugati, pasāda

Finally, the “ḷ” sound is ALWAYS represented by “c” as in the following:

- Anicca, citta, cakkhu, cuti, paccayā, sacca, rūpāvacara, cetasika, cetanā

The above words are pronounced in the audio below:

[Pāli-words-Tipiṭaka-English-Post-1](#)

Pāli Alphabet with Illustrations & subtitles

13. The following video could be very useful in learning the Pāli alphabet (in English.) Moreover, it provides excellent instructions on pronunciation.

5.2.9.6 “Tipiṭaka English” Convention Adopted by Early European Scholars – Part 2

.4

February 15, 2020; revised on July 23, 2020 added #12 (pronunciation guide); August 25, 2022

Introduction

1. In the previous post, we discussed the reasons for adopting a “Tipiṭaka English” convention to write Pāli words by European scholars in the 1800s. It is necessary to read that post first: [“Tipiṭaka English” Convention Adopted by Early European Scholars – Part 1](#).”

- As we discussed, those early European scholars realized the importance of the need to preserve the “Pāli sounds” as much as possible. Of course, the other requirement was to keep the corresponding English version short.
- In that post, we discussed the adoption of “t,” “d,” and “c” to represent the “ṭ,” “ḍ,” and the “ḷ” sounds in Pāli.
- Here we will continue that discussion. The “ṭ” (with a “dot” underneath the “t”) represents the “ḷ” sound in Pāli.

- Then there are **aspirated** sounds “**th**”, “**dh**”, “**ch**”, and “**ṭh**” respectively for the “**t**,” “**d**,” “**c**,” and “**ṭ**” sounds. Some of those “aspirated words” represent “emphasized versions” of the “unaspirated words.” I will explain it below.

We Need to Be Familiar With the “*Tipiṭaka* English” Convention

2. As I mentioned in the previous post, the above convention went into effect before **1900**. Thus all Pāli documents compiled by the Pāli Text Society are consistent with this convention.

- The **Pāli texts (with the English alphabet)** available on the Sutta Central website are directly from the Pāli Text Society. **Those texts are accurate.** For example, here is the “[WebLink: suttacentral: Dhammacakkappavattana Sutta \(SN 56.11\)](#)” that was the first discourse delivered by the Buddha.
- It is an excellent idea to examine that *sutta* (and try pronunciations of those Pāli words) with the guidelines provided in my two posts on the “*Tipiṭaka* English” Convention.
- Many of my posts at the [puredhamma.net](#) website are not entirely consistent with the “*Tipiṭaka* English” Convention, but I will try to make them compatible gradually. I have been trying to “upgrade” several weekly posts in recent months.
- Of course, as I have repeatedly pointed out, many **English translations** of Pāli words at the Sutta Central site are **not correct**. Examples include *anicca*, *anatta*, *Ānāpāna Bhāvanā*, and *viññāṇa*. See, for example, “[Misinterpretation of Anicca and Anatta by Early European Scholars](#).”
- Now let us continue introducing the “*Tipiṭaka* English” convention.

Only “**ṭ**” Represents the “**ṭ**” Sound

2. The “**ṭ**” sound in Pāli is the “**ta**” sound in English, as in “**Tom**.” The “**ṭ**” sound in Pāli is ALWAYS represented by “**ṭ.**” **Note the “dot” underneath the “t.”**

- Some examples are *Paṭṭicca*, *paṭṭigha*, *paṭṭiloma*, *paṭṭisandhi*, *paṭṭipadā*.
- In the previous post, we saw that the “**ṭ**” sound is ALWAYS represented by “**t**” (without the “dot” underneath the t.)
- The word *Tipiṭaka* is an excellent example of both sounds, the “**t**” and the “**ṭ.**” I hope you can catch the difference in the audio in #4 below.

Aspirated Versions

3. Now, let us consider the “aspirated versions” of those four sounds we have discussed. We must remember that we are dealing with “*Tipiṭaka* English” and NOT “Standard English.”

- **The aspirated version accompanies a forceful expulsion of air.** If you hold a thin piece of paper in front of the mouth, it should move when you make an “aspirated sound.”
- The following video explains that for English words. But it is the same idea.

[WebLink: youtube: Aspirated sounds](#)

Putting Emphasis on “**ṭ**” Sound to Make the “**ṭ**” Sound

4. The “**ṭ**” (“**ṭ**”) sound, when aspirated with “**th**,” becomes the “**ṭ**” sound. It is not that common to have the “**th**” by itself. An example is *ṭhapetvā*, meaning “placement.”

- In most cases, the “**ṭ**” sound is in a word just before the “**th**” sound as in *aṭṭha* (ṭṭha for number 8.)

- Here are more examples of the “t” (“ට”) AND “th” (“ඨ”) sounds coming together: *diṭṭhi* (දිට්ඨි for view), *sandiṭṭhika* (සන්දිට්ඨික for “seeing ‘saṇ’”), *aṭṭha* as in *aṭṭha purisapuggalā* and *aṭṭhaṅgika*, *kammaṭṭhāna*, *satipaṭṭhāna*.
- In #2, we mentioned some example words with the “t” sound: *Paṭicca*, *paṭigha*, *paṭiloma*, *paṭisandhi*, *paṭipadā*.
- Compare all those with the following words with just the “t” (“ට”) sound: *atta* (අත්ත for the truth), *satta* (සත්ත for living being; note that *Bodhisatta* is a living being who is striving to attain the *Buddhahood*.)
- Here is the pronunciation of the unaspirated *paṭicca*, *paṭigha*, *paṭiloma*, *paṭisandhi*, *paṭipadā* AND aspirated *ṭhapetvā*. Both aspirated and unaspirated in *aṭṭha*, *diṭṭhi*, *sandiṭṭhika*, *aṭṭhaṅgika*, *kammaṭṭhāna*, and *satipaṭṭhāna*. Also, *Tipiṭaka*.

[WebLink: mp3 file: Pali words Tipitaka English Post 2-1](#)

Putting Emphasis on “th” Sound to Make “t” Sound

5. The sound “th” is the “aspirated version” of “t” as in *Samatha* (සමථ in Sinhala) in *Samatha Bhāvanā*. The word *ratha* (රථ for “vehicle”) is another.

- Here are more words with both the “t” and the “th” sounds: *tathāgata* (තථගත), *natthi*, *atthi*, *yathābhūta*, *hadaya vatthu*.
- 6. There are a few words with both aspirated and unaspirated versions. For example, when the “*atta*” (අත්ත) refers to the meaning “truth,” it is (the “true-ness”) emphasized with the word “*attha*” (අත්ථ).
 - There are a few words like that where the **meaning is emphasized with the aspirated version**. We will discuss that with examples from the *Tipiṭaka* later on. Two more such words addressed in #8 below.
 - Many other words do not have such an “emphasized” and “non-emphasized” versions. Here are some examples with ONLY the “th” sound: *vithi*, *Itthi*, *Samatha*, *Thero*. For example, **there are no words as** *viti*, *Itti*, *Samata*, or *Tero*.
 - Here is the pronunciation of *Samatha*, *ratha*, *tathāgata*, *natthi*, *atthi*, *yathābhūta*, *hadaya vatthu*, *vūthi*, *Itthi*, *Samatha*, *Thero*.

[WebLink: mp3 file: Pali words Tipitaka English Post 2-2](#)

Putting Emphasis on “d” Sound to Make the “ḍ” Sound

7. The sound “dh” is the “aspirated version” of “d” as in *Dhamma* (ධම්ම). More examples of words with the “dh” sound: *Dhamma*, *adhamma*, *dhātu*, *gandha*, *gandhabba*, *middha*, *nirodha*, *saddhā*, *andha*, *sandhi*, *sādhū*, *paṭisandhi*, *samādhī*.

- Both the unaspirated and the aspirated sounds are in words, *Dhammapada* (ධම්මපද in Sinhala) and *Buddha* (බුද්ධ), i.e., both the **dh** and **d** sounds appear. More examples: *passaddhi*, *iddhi*, *middha*.
- Here is the pronunciation of *Dhamma*, *adhamma*, *dhātu*, *gandha*, *gandhabba*, *middha*, *nirodha*, *saddhā*, *andha*, *sandhi*, *sādhū*, *paṭisandhi*, *samādhī*, *Dhammapada*, *Buddha*, *passaddhi*, *iddhi*, *middha*.

[WebLink: mp3 file: Pali words Tipitaka English Post 2-3](#)

Putting Emphasis on “ch” Sound to Make the “ṣ” Sound

8. The sound “ch” (“ඡ”) is the “aspirated version” of “c” (“ච”) as in *chanda* (ඡන්ද meaning “desire.” The unaspirated is in *calana* (චලන), meaning “movement.”

- Most Pāli words with the “**ch**” sound also have the “**c**” sound coming first. Some examples are, *iccha*, *vicikicchā*, *appiccha* (*appa iccha*), *macchariya*, *micchā*, *micchācāra*, *micchāvācā*, *pariccheda*, *gacchati*, *uccheda*.
- Two more critical Pāli words have the aspirated version emphasizing the meaning of the unaspirated version, just like in the case of *atta/attha* discussed above in #6.
- Those two are *icca/iccha* (ඉච්ච/ඉච්ඡ) and *anicca/aniccha* (අනිච්ච/අනිච්ඡ). The two aspirated words emphasize the meanings of unaspirated words. We will discuss that in the next post.
- Here is the pronunciation of *chanda*, *calana*, *iccha*, *vicikicchā*, *appiccha*, *macchariya*, *micchā*, *micchācāra*, *micchāvācā*, *pariccheda*, *gacchati*, *uccheda*, *icca*, *iccha*, *anicca*, *aniccha*.

[WebLink: mp3 file: Pali words Tipitaka English Post 2-4](#)

Connection to Key Concepts in Buddha Dhamma

9. Over the past year, I have realized that many misconceptions could be easily avoided by looking at a few Pāli words and their inherent meanings.

- For example, the Pāli word *atta* has two different meanings. Furthermore, the word *attha* emphasizes just one of those two meanings.
- Similarly, the meanings of the words *icca* and *anicca* become emphasized in *iccha* and *aniccha*.
- See “[Icca, Nicca, Anicca – Important Connections.](#)”

Many of Posts at Puredhamma.net May Not be Up To the “*Tipiṭaka* English” Convention

10. I gradually became aware of this issue over the past several months. During that time, I have progressively followed the above rules. I will try to stick to this convention in future posts and gradually revise old posts to be compatible. That will take some time.

- All Pāli literature on the Sutta Central website is compatible with the “*Tipiṭaka* English” convention.
- Once you select a *sutta*, you can access translations to several languages using the “hamburger icon” on the top left.
- Of course, all translations there have errors, especially with keywords like *anicca*, *anatta*, *Ānāpāna Bhāvanā*, and *viññāṇa*.

Singular to Plural in Pāli

11. The following issue is somewhat unrelated, and many people could be aware of it. But I would mention it here since it is essential to know.

- Many Pāli nouns ending in “short *a* (/ə/)” converted to plural by replacing that “short *a*” with a “long *a*” or *ā*.
- For example, *Deva*, *Brahma*, *sutta*, *citta*, *apāya*, *gandhabba*, *jhāna* are singular and the corresponding plural are *Devā*, *Brahmā*, *suttā*, *cittā*, *apāyā*, *gandhabbā*, *jhānā*.
- Finally, Pāli Glossary pages with pronunciation are available at “[Tables and Summaries.](#)”

Pāli Alphabet with Illustrations & subtitles

12. The following video could be very useful in learning the Pāli alphabet (in English.) Moreover, it provides excellent instructions on pronunciation.

[WebLink: youtube: PALI 101 – Pāli for Beginners – Level 1 - Pāli Alphabet with Illustrations & subtitles](#)

5.2.10 Origin of Life – One Creates One’s Own Future Lives

January 25, 2020; revised January 26, 2020 (video inserted in #15)

Introduction – Origin of Life

1. In the first post in this series, I pointed out that there is no traceable “beginning” to the life of any existing living being. See, “[Origin of Life – There is No Traceable Origin](#).”

- However, any living being’s FUTURE LIVES are created by that living being.
- It is critical to understand how one’s mindset and thoughts (in particular *abhisāṅkhāra*) can lead to different types of rebirths. That is the basis of Buddha Dhamma and is explained in *Paṭicca Samuppāda* (PS.)
- In simple terms, “bad thoughts/mindset” lead to “bad births” and “good thoughts/mindset” lead to “good births.” The problem is that most are “bad births” and those infrequent “good births” do not last long.
- The Buddha said, “One who sees *Paṭicca Samuppāda* sees the Dhamma. One who sees the Dhamma sees *Paṭicca Samuppāda*.” See, “[Paṭicca Samuppāda – “Pati+ichcha” + “Sama+uppāda”](#).”

2. In the first several posts in “[Origin of Life](#),” we discussed the background material necessary to understand how a complex **physical body of a human** starts with a single cell, a zygote.

- However, **the most important part of a human is not the physical body, but the mental body**. It goes by various names in Buddha Dhamma, *manomaya kāya* and *gandhabba* being the most common. However, that mental body arises due to a *paṭisandhi viññāṇa* and remains as a *kamma bīja* until coming to the mind of a living being at the beginning of a new existence (*bhava*) as a *dhammā*.
- Average humans focus only on keeping the physical body in good condition. It is much more beneficial to improve the “mental body.” That way, one will be able to stop ALL FUTURE SUFFERING.

Critical Role of *Paṭicca Samuppāda*

3. The seed (*kamma bīja*) for a future existence (*bhava*) is the *paṭisandhi viññāṇa* cultivated via “*saṅkhāra paccayā viññāṇa*” in PS. I briefly discussed/explained that with [nine recent posts on *Paṭicca Samuppāda*](#) (PS.) The last of those posts, “[Paṭicca Samuppāda – From Mind to Matter](#)” came to that conclusion.

- In many previous posts, we have discussed that *paṭisandhi viññāṇa*, *gandhabba*, *kamma bīja*, and *dhammā* are very similar terms. See, “[Dhammā, Kamma, Saṅkhāra, Mind – Critical Connections](#).”
- When grasping a new human existence, that *paṭisandhi viññāṇa* becomes a human *gandhabba* with the complete blueprint of that human. See, “[Dhammā, Kamma, Saṅkhāra, Mind – Critical Connections](#).”
- Then we discussed the 1990 movie “ghost” to provide visualization of a human *gandhabba*. A *gandhabba* has only a trace matter. An average human cannot see a *gandhabba*. **However, it has the complete “blueprint” for a human**. See, “[Ghost 1990 Movie – Good Depiction of Gandhabba Concept](#).”
- That *gandhabba* then gives rise to a fully-grown human as explained in the two posts, “[Buddhist Explanations of Conception, Abortion, and Contraception](#)” and “[Cloning and Gandhabba](#).”

4. There is a lot of information summarized above using different terms. In the following, I will try to organize that in a systematic way and will also describe the “bigger picture” within the 31 realms of existence.

The General Process of Grasping an Existence (*Bhava*)

5. In broad terms, there are three main existences (*bhava*) but they branch out to thirty-one. Existence in the *kāma bhava* (i.e., 11 realms in *kāma loka*), *rūpa bhava* (16 realms in *rūpāvacara Brahma loka*), and *arūpa bhava* (4 realms in *arūpāvacara Brahma loka*.) The 11 realms in *kāma loka* are the 4 realms in the *apāya*, one human, and six *Deva* realms.)

- **Thus, there are 31 existences (*bhava*) in this world. Any living being belongs to one of those.** Each such existence has a finite lifetime. Some are fixed and others are variable. *Deva* and *Brahma* realms have fixed lifetimes. Lower realms starting with the human realm have variable lifetimes. See, “[31 Realms of Existence](#).”
- However, when a living being grasps a new existence in ANY realm, the duration of that existence WILL BE fixed. For the human and lower realms, that lifetime depends on the *kammic* energy that “feeds” that particular existence. For example, one human may have that human existence for 10,000 years and another may have only 900 years.

Each *Bhava* Starts With a Mind-Made Body (*Manomaya Kāya*)

6. Any living being (other than an *Arahant*) will grasp (or latch onto) a new existence when the current existence runs out of its lifetime. At that moment, *kammic* energy for the new existence creates a “**mind-made body**” or a *manomaya kāya*.

- That transition from one existence (*bhava*) to another happens with an *upapatti* PS process. Specifically, that happens with the “*upādāna paccayā bhava*” step in that *upapatti* PS cycle.
- But it is a *paṭisandhi viññāṇa*” created via “*saṅkhāra paccayā viññāṇa*” step in PS that is responsible for that new existence (*bhava*.)
- In other words, the *kammic* energy embedded in that *paṭisandhi viññāṇa* is the energy that creates the *manomaya kāya* of the new existence (*bhava*.) **Thus, *manomaya kāya* has only a tiny bit of energy that was created by the mind.**
- **That *manomaya kāya* does not die until the end of that *bhava*. Living beings in each and every realm will have a *manomaya kāya*.**
- Details are at the nine posts on PS, “[Paticca Samuppāda – Not ‘Self’ or ‘No-Self’](#).”

Brahma Realms Only Have *Manomaya Kāya*

7. A *manomaya kāya* has a *hadaya vatthu* (seat of the mind) and UP TO five *pasāda rūpa* (that enable experiencing the external world.) The *hadaya vatthu* is different for different realms and also has INDIVIDUAL characteristics. **Thus even two humans will have different *hadaya vatthu* embedding their personal characteristics.** The following is a brief summary of different realms.

- The four highest *Brahma* realms (*arūpāvacara Brahma* realms) have ONLY the *hadaya vatthu*. Those *Brahmā* can only think.
- *Brahmā* in the 16 *rūpāvacara Brahma* realms have *hadaya vatthu* and TWO *pasāda rūpa*: *cakkhu* and *sota pasāda rūpa*. They can see and hear with just those *pasāda rūpa*. They do not have physical bodies, and thus do not have eyes and ears like us. Their “seeing” does not require light and they “see” things far away. In the same way, they can hear sounds that are far away. But they need to “direct their attention” to a particular location to see or hear.
- All those *Brahmā* in the 20 *Brahma* realms have only *manomaya kāya*.

Living Beings in *Kāma Loka* Realms Have Denser Bodies In Addition to *Manomaya Kāya*

8. Things become complex when we get to the 11 realms in the *kāma loka*.

- *Devā* in the six *Deva* realms have *manomaya kāya* with *hadaya vatthu* and five *pasāda rūpa*. They also have “physical bodies” like ours but at a much finer level. Those “subtle bodies” are also created by *kammic* energy and thus *Devā* are born with their “full bodies.” That means they do not grow or get old but just die at the end of their lifetimes. There is only one “*jāti*” within a *Brahma* or *Deva bhava*. We cannot see either *Brahmā* or *Devā*.
- Human “structure” is the same as that of the *Devā* but, of course, human physical bodies are much denser. Furthermore, human “structure” has many common features with the animal realm. The other three lower realms in the *kāma loka* are more complex and we will not discuss them here.
- Let us briefly discuss the features of the human and animal realm. I will address only the human realm, but most of those features are the same for the animal realm.

There are Multiple *Jāti* Within a Human *Bhava*

9. A human also has a *manomaya kāya* with a *hadaya vatthu* and five *pasāda rūpa*. But a human can exist in TWO forms.

- **ONE:** Much of the time in the human *bhava*, it stays with JUST the *manomaya kāya*. That state is normally referred to as the *gandhabba* state. A *gandhabba* is like a *Brahma* in the following aspect. A *gandhabba* can see and hear without the aid of physical eyes and physical ears. Even though it has five *pasāda rūpa*, it cannot touch, taste, or smell since there is no dense physical body.
- **TWO:** A human will have a “dense physical body” only after that *gandhabba* (*manomaya kāya*) gets into a womb and creates a physical human body.
- It is good to contemplate how such a tiny amount of energy in a *manomaya kāya* can “build” a human body that can weigh over a hundred pounds (or many kilograms.)

A *Gandhabba* for a Human Is Like a Seed for a Tree

10. A good point to start is to think about how a tiny seed grows into a huge oak tree.

- That seed has the blueprint for the whole tree. The seed germinates and pulls in food and water from the soil to grow into a large tree. The tree trunk, limbs, and leaves are all made from the food and water extracted from the soil.
- In the same way, the “seed” for a full-grown human is a zygote, which is a single cell. But a zygote by itself cannot grow into a human. A “human mental body” (or a *gandhabba*) needs to merge with the zygote to start the process. See, “[Buddhist Explanations of Conception, Abortion, and Contraception](#)” and “[Cloning and Gandhabba](#).”
- The mental body or the *gandhabba* has the blueprint for a full-grown human. Some features of the physical body come from the parents via the zygote.

11. We saw that the seed takes all the “building material” from the soil to grow to a tree. A “live zygote” grows first by taking food from the mother to become a baby. Once outside the womb, that baby starts eating food and becomes a grown human.

- This is why the physical body is secondary to the mental body (*gandhabba*.) **All mental activities are with the *gandhabba*. Furthermore, a *gandhabba* is fully human. It just does not have a dense body to be able to touch, eat, or to smell odors.** See, “[Ghost 1990 Movie – Good Depiction of Gandhabba Concept](#).”
- The physical body is just a shell. The *gandhabba* makes all the decisions. The physical body is needed for the *gandhabba* to experience touches, tastes, and odors. See, “[Gandhabba Sensing the World – With and Without a Physical Body](#).”

The Lifetime of a *Gandhabba* Is the Length of Human *Bhava*

12. Therefore, within a human *bhava*, there can be many “human births” (*jāti*.) See, “[Bhava and Jāti – States of Existence and Births Therein](#).”

- When a physical body dies, the *gandhabba* comes out and waits for another womb. However, **that *gandhabba* state in between two human lives is not an *antarābhava* because it is within the SAME human *bhava***. See, “[Antarābhava and Gandhabba](#).”
- A human *jāti* lasts around a hundred years, but a human *bhava* may last thousands of years.
- Those different human births (*jāti*) within a human *bhava* will have similar characteristics. The physical appearance will change since those of parents influence via the zygote. But the successive lives usually have similar *gati* and also tend to have close geographic locations of birth.
- A good example is Dhammuwan, who is now a Sri Lankan, but was born in India at the time of Buddhaghosa 1500 years ago; see, “[Boy Who Remembered Pāli Suttā for 1500 Years](#).” More rebirth accounts at, “[Evidence for Rebirth](#).”

How Does a *Gandhabba* (or a *Brahma*) See and Hear Without Eyes and Ears?

13. In the movie “ghost” we saw that a *gandhabba* can see not only other *gandhabbā* (which is the plural for *gandhabba*) but also humans and anything else in the world. See, “[Ghost 1990 Movie – Good Depiction of Gandhabba Concept](#).” How is that possible without having physical eyes and ears?

- Our understanding of nature is extremely limited. Before modern science made some technical breakthroughs within the past hundred years or so, we would not have believed that it would be possible to “see” an event happening thousands of miles away, in real-time. Yet, we do that with televisions now and don’t think twice about it.
- These days we can record such visuals with micro-sensors that are so small that they are hard to see. Details at, “[Gandhabba Sensing the World – With and Without a Physical Body](#).”

14. When a human *gandhabba* is born (at a *cuti-paṭisandhi* moment of grasping a new *bhava*), the following amazingly miniature “sensors” are made by *kammic* energy.

- They are *hadaya vatthu* (seat of the mind) and five *pasāda rūpa* (*cakkhu*, *sota*, *ghāna*, *jivhā*, *kāya*.) Of course, the *ghāna*, *jivhā*, and *kāya pasāda rūpa* REQUIRE signals from a physical body (of odors, tastes, and touches) to function.
- The *cakkhu* and *sota pasāda rūpa* can detect visuals and sounds without the aid of eyes and ears. The *cakkhu pasāda rūpa* is the smallest entity that can “see.” *Sota pasāda rūpa* is the smallest entity that can hear.
- Evidence for the existence of *gandhabba* (*manomaya kāya*) has accumulated over the recent years, as we discuss now.

Seeing and Hearing With the “Mental Body” (*Gandhabba*)

15. People who had Near-Death Experiences (NDE) say they could see and hear even though their physical bodies (and the brains) were “clinically dead.” They say they were watching doctors operating on their bodies from the ceiling. Their “mental bodies” (*gandhabbā*) had come out of the physical body. The book “Consciousness Beyond Life” by physician Pim van Lommel (2010) gives detailed accounts of case studies of NDE experienced by people undergoing heart operations. Here is a youtube video on the subject:

[WebLink: youtube: Near Death Experiences & Evidence of the Afterlife](#)

- Some people can have Out-of-Body Experiences at will; see, “[Manomaya Kāya and Out-of-Body Experience \(OBE\)](#).” They can remove their *gandhabba kāya* from the physical body at will. Then they do not need eyes and ears to see and hear.

- Even though there are people who say they can teach others how to do that, I don't think that is possible. That ability is due to a *puñña iddhi* or due to past good *kamma*.

16. It is critical to realize that there phenomena that cannot be explained with our ordinary sensory experiences. Only a Buddha can discover these “hidden” facts about a wider world with 31 realms.

- However, the Buddha said that average humans are not capable of fully comprehending the characteristics of living beings in various realms. It is good to know the basic facts, but it does not serve any purpose to try to rationalize them with the limited sensory faculties we have.
- Yet any average human is capable of figuring out that these explanations are self-consistent and help clarify many of our experiences. That confidence will grow as one starts following the Path (i.e., not only living a moral life but also learn the true nature of this world.) The mind becomes purified and is able to “see” at deeper levels.

Why Do We Have Physical Bodies?

17. We need physical bodies to be able to touch (and for sex), taste foods, and to smell odors. But a physical body comes with a price. We have to endure all kinds of diseases including cancer, body aches, the decay of body parts, etc. *Brahmā* and *Devā* do not experience those, but of course, death is inevitable to all.

- Furthermore, it is a burden to “carry around” this heavy body. As I have mentioned before, even breathing requires an effort (but only asthma patients feel that.) It is such a relief to come out of the physical body, as described by those who have had NDE or OBE experiences.
- However, **if one is forced to stay with the *gandhabba* body for a long time**, one will start “missing” the ability to touch, taste, and smell. That is why all human *gandhabbā* desperately wish to be able to get into a womb to get a human birth.
- The point is that a *gandhabba* with an unimaginably small “body” can experience everything better, except the ability to touch, taste, and smell.

Why Are There So Many Different Terms for *Kammic* Energy?

18. Even though *viññāṇa*, *kamma bīja*, *dhammā*, and *gandhabba* are related, those terms are used in different contexts. Here is one way to remember how these different terms appear in different situations.

- First, energy for future *vipāka* (including future rebirths) created via “(abhi)saṅkhāra paccayā viññāṇa.”
- Such tiny amounts of energies stay in the “*nāma loka*” (out there) as *kamma bīja* (*kamma* seeds.) See, [“Our Two Worlds: Material and Immaterial.”](#)
- When the conditions are right, a strong *kamma bīja* can give rise to a new existence (*bhava*) when those *kammic* energies come back to the mind as *dhammā*.
- Such a new existence are grasped as *paṭisandhi viññāṇa*. That *paṭisandhi viññāṇa* gives rise to a *manomaya kāya*, which has a special name of *gandhabba* for human and animal realms.
- *Manomaya kāya* means “a body made by the mind.” **That is how we create our own future lives!**
- If you do not fully understand the above, you can read the previous posts in this series, or ask questions. It may take a little while to fully comprehend all relationships.

19. We have now finished the first phase of Buddha Dhamma dealing with the origin of life. **Life is not created by a Creator. It does not arise arbitrarily either.** We discussed those two extreme views earlier in [“Origin of Life”](#) series.

- Those concepts discussed above could be new to many, and thus may take some time to understand or get used to. But I assure that there is complete self-consistency of what I have described and also

consistency with the *Tiṭṭaka*. My suggestion is to print out this series of posts and to have them ready for quick reference. If there are any questions, please comment at the forum or send an email: lal@puredhamma.net.

- We will discuss several significant implications that can be reached with this “correct world view” of the Buddha in future posts.

5.3 Good Explanations – Key to Weeding Out Bad Versions of Dhamma

1. Today, we have many different religions, world views, cults, and even different versions of the Buddha Dhamma: *Theravāda*, *Mahāyāna*, *Zen*, *Vajrayana* (Tibetan), etc. Actually, *Zen* and *Vajrayana* both originated from *Mahāyāna* (see, “[Historical Timeline of Edward Conze](#)”); thus *Theravāda* and *Mahāyāna* are the two main categories. How could one decide which one to choose?

2. Here is a good example of an obvious inconsistency:

In *Mahāyāna* Buddhism, one is supposed to take a vow as to not to attain Enlightenment (*Nibbāna*) until ALL BEINGS are ready to attain *Nibbāna*. Whoever came up with this idea did not understand that there are an infinite number of beings.

- On this Earth alone, scientists estimate that there are 10 trillion of just ants (million ants for each human being!). It also displays a lack of understanding that most beings are incapable of attaining *Nibbāna*, until a human or *deva* birth is attained, which are rare events; see, “[The Grand Unified Theory of Dhamma](#).”
- As the Buddha advised in the *Kalama Sutta*, everyone needs to examine the different options and choose the one that is without any contradictions.

3. In Buddha’s time, there was of course no “science” that educated the masses about the physical world. Even though the Buddha referred to the innumerable world systems and innumerable beings in them, people just had to believe those only based on faith. Today we are fortunate to have a well-established scientific method to rule out “bad theories” and to focus on “good theories.”

- This method cannot match the Buddha’s method of deciding by EXPERIENCE that he advised in the *Kalama Sutta* as mentioned above, but it gives a filtering mechanism to weed out the stuff that is clearly not worth pursuing. Thus the scientific method can be used as “pre-screening” to get rid of obviously unsuitable paths or “theories.”

4. What is the “scientific method”?

An acceptable “theory” must have,

- power (ability) to explain as many things that we experience in this world,
- consistency, i.e., not one explanation can be inconsistent with another within the same theory,
- the power to predict, i.e., point out things that are still unknown but could be verified in the future.

5. If one would want to read more about the scientific method, I can recommend two books: “The structure of scientific Revolutions” by Thomas Kuhn is a classic; “The Beginning of Infinity” by David Deutsch is a recent and more easy-to-read book which also discusses infinity which is a key concept in Dhamma.

6. Thus explanatory power, consistency, and the power of prediction are the three measures of the validity of a scientific theory. Buddha Dhamma is a theory about existence for someone who has not yet “seen” its validity.

- My goal with this website is to present the Dhamma as a scientific theory. I will try to point out the explanatory power of the Dhamma, that there are no inconsistencies in Dhamma, and that many things in the Dhamma that were so far ahead of the times and only now are being confirmed by science.
- In the following video Dr. Deutsch explains the start of the scientific revolution on a few hundred years ago.

[WebLink: YOUTUBE David Deutsch: A new way to explain explanation](#)

- As explained above, science proceeds via conjectures (theories) that are continually tested. There are no conjectures in Buddha Dhamma. The truths revealed in Dhamma are still being re-discovered by science. The vagaries of life can only be explained in terms of Buddha Dhamma; see, “[Complexity of Life and the Way to Seek Good Rebirths](#).”

7. Buddha Dhamma is not a religion in the normally accepted sense of the word “religion.” The Buddha never said that he can take someone to “salvation” if someone believed in him. **One attains *Nibbāna* by purifying ONE'S OWN mind.** The Buddha just showed WHY one should strive for *Nibbāna* and HOW to purify one's mind by following the Noble Eightfold Path.

- Buddha Dhamma is a complete description of existence, or nature. A Buddha discovers the laws of nature appears by his own mental efforts. It is for us to decide whether that world view makes sense to us, and then to use the Path he showed to attain *Nibbāna*, the state of unconditioned, permanent happiness.
- One could start on the Path of the Buddha in a gradual manner, verifying for oneself the benefits at each step; see, “[Living Dhamma](#).”

5.3.1 Consciousness and the Brain

I think Professor John Searle is one of the great philosophers of today who have the right ideas about consciousness. If he comes to learn about pure Dhamma, he may be able to articulate his points even better. Here is one of his presentations:

[WebLink: YOUTUBE: Consciousness & the Brain](#)

5.3.2 Matter Creates Mind or Mind Creates Matter?

Re-written August 29, 2022

1. The deep meaning of “*Manopubbangama Dhamma, mano setta manomaya*” is that the mind is the origin of everything. This is unfathomably a strange statement at first, but when one studies Abhidhamma, it becomes clear why this is true.

- Before I get into the details, it is important to know that some scientists are beginning to realize that the mind could be the precursor to matter. Even though they cannot yet make the right connection, they can see that the reality has to be that way. It will be interesting to see how much progress they can make, without approaching the problem other than from Buddha Dhamma.
- Let us listen to these “new ideas” from a special group of scientists. They are new ideas from their perspective, since they have not been exposed to Buddha Dhamma.

2. In the following video a group of scientists discusses why the time has come to change the paradigm:

[WebLink: YOUTUBE: Consciousness & Quantum Physics](#)

3. Here is a presentation by Dr. Robert Lanza, whose book “Biocentrism” basically says that life did not arise from matter (universe). Still, the universe arose from life (pretty much agreeing with the Buddha Dhamma):

[WebLink: YOUTUBE: Robert Lanza on theory of Biocentrism](#)

4. In addition, philosophers are joining the discussion as well: Thomas Nagel, “Mind & Cosmos: Why the Materialist Neo-Darwinian Conception of Nature Is Almost Certainly False” (2012). The following is a lengthy review of this book.

[WebLink: youtube: Analysis of Thomas Nagel's Mind and Cosmos - Alexander Fink](#)

- Even though some scientists and philosophers are beginning to realize that the mind could be the precursor to matter, they have no idea HOW that happens.

5. However, the Buddha explained that the mind creates EVERYTHING in this world via *Paṭicca Samuppāda*.

- Up to now, we have only discussed how *Paṭicca Samuppāda* explains the rebirth process for living beings. See “[Paṭicca Samuppāda](#).”
- But *Paṭicca Samuppāda* can also explain the formation of planetary systems in the universe. In the future, I will start writing about that process.
- Also, see “[Manōpubbangamā Dhammā..](#)” and the references therein.

5.4 Consciousness – A Dhamma Perspective

5.4.1 Consciousness Dependence on Number of Dimensions

Revised August 23, 2022

For an introduction to consciousness, see [“What is Consciousness?”](#)

1. When we look deeply into the issue of consciousness, we realize the unimaginable possible varieties of life. Let us start with the issue of dimensionality. Humans live in a four dimensional world; in other words, humans are aware of four dimensions -three dimensions of space plus time.

- Even though we used to think of time as being different from spatial dimensions, with his Theory of General Relativity, Einstein demonstrated that space and time are interrelated. He showed that the force of gravity could be explained as perturbations in the space-time fabric due to mass.
- Can living beings exist in higher dimensions that we are not aware of?

2. Of course, we cannot even begin to imagine more than four dimensions (or more than three spatial dimensions). However, it is easier to think of and visualize the lower number of dimensions.

- Imagine a two-dimensional creature living on your kitchen table. An ant will be the closest real example if we imagine that the ant cannot see above the table (a real two-dimensional creature would have only a length and width and no height). Now, if we put a hand on the table, the 2D creature could see part of the projection of the hand on the table. Now if we take the hand off the table, as far as the 2D creature is concerned, the “hand” disappears; it cannot “see” any part of the hand if it is off the table, and thus it has no “awareness” of that hand existing anywhere. It does not exist in its “2-D universe.”
- For an amusing story of a 2D creature, see “Flatland: A Romance of Many Dimensions” by Edwin A. Abbott (2002). It was written in 1884 by Abbott, a mathematician.
- Here is a “fun video” from Dr. Quantum which illustrates the idea:

[WebLink: YOUTUBE Dr. Quantum in Flatland](#)

3. Therefore, the “awareness” of the 2D creature on the kitchen table surface is limited to its 2D world. It is not aware of anything outside the surface of the table (if it is a “2D world,” the surface can extend to infinity and as far as our 2D creature is concerned, it would not have “an end”). Furthermore, a 1-D world embedded in that 2D world would be a line on that surface. A 1-D creature in that 1-D world will not see anything that lies outside the line. Thus, the 2-D creatures can go in and out of the 1-D world by crossing that line!

- Clearly, the consciousness of a 1-D creature is very limited, not necessarily by its mental capabilities, but by the dimensions of the “world” that it is in. A 2-D creature has an expanded consciousness compared to a 1-D creature. We in the 3-D world have even further expanded consciousness. (It must be kept in mind that one needs to incorporate the time dimension in all the above cases where only the space dimensionality was considered).

4. Therefore, if our world has more than three spatial dimensions, there may be other worlds we are unaware of since our consciousness is limited to the three spatial dimensions.

- Thus, there may be beings in different dimensions that we are not aware of. We may be able to see “projections” of them if there is some overlap in 1, 2, or 3 dimensions. If there is no overlap, then we will not be able to see them at all, i.e., we will not be “conscious” of their presence.
- For example, in the low dimensionality case we considered above, if a 2-D creature crosses over the “1-D line world”, the 1-D creature will see a “dot” when there is an overlap of the 2-D creature with the line. Yet, if the “1D world” lies above the tabletop, there is no overlap, and both creatures will not be conscious of the presence of each other’s worlds.

5. It is possible the “see” living beings other than humans and animals by developing certain *jhānic* (*abhiññā*) powers. Even before the Buddha, many yogis could access other realms and interact with such beings. One does not have to attain *Nibbāna* to do that, and some *Arahants* have not developed such powers. The Buddha discouraged people from interacting with such beings, particularly those in the lower realms.

- “Our world” is much more complex than what is grasped by our senses, even though technology has enabled us to expand our consciousness; see “[Expanding Consciousness using Technology](#).” Yet, we can expand consciousness even more by purifying our minds; see, “[Expanding Consciousness by Purifying the Mind](#).” A purified mind can see the truth in the Buddha’s wider world; see, “[The Grand Unified Theory of Dhamma](#).”
- And our lives do not end with this one; see “[Evidence for Rebirth](#).”
- Those two facts constitute the basis of the true nature of existence and need to be thought about critically; one cannot comprehend the message of the Buddha until one at least has some idea about this “big picture.”

Next, “[Six Kinds of Consciousness in our 3-D World](#)”,

5.4.2 Six Kinds of Consciousness in Our 3-D World

Revised August 23, 2022

Having looked into the issue of the “awareness” or consciousness issue related to dimensions, we now turn to our familiar 3-D space. Even here the possibilities are endless, as we see below.

1. We become aware of our surrounding “objects” (i.e., visual objects, sound, smell, taste, tangible objects) using the five “external senses” of eye, ear, nose, tongue, and body. We see visual objects with our eyes, sounds with our ears, smell with our nose, taste with the tongue, and touch or feel with our body.

- Correspondingly, the Buddha stated that there is eye-consciousness, ear-consciousness, nose-consciousness, tongue-consciousness, and body-consciousness. The cognitive processes that involve those “five physical doors” are called five-door processes.
- In addition to those five traditional physical senses, in Buddha Dhamma, there is the mind and the associated mind-consciousness since we are also conscious of mind-objects such as thoughts and visual images. The mind-consciousness is also involved in each of the five-physical-door processes.

2. Note that the Buddha did not mention the brain in the mind-consciousness, and he used the term “mental element” without mentioning the brain. This is because the mind belongs to the “*manomaya kāya*” and the brain belongs to the “physical body”; see, “[Manomaya Kāya \(Gandhabba\) and the Physical Body](#).”

- Also note that five “*indriya*” (eye, ear, etc.) are not the physical eye, physical ear, etc. The five *indriya*, are called internal *rūpa* or *pasāda rūpa*, are invisible and unknown to modern science. The physical eye is different from the *cakkhu pasāda rūpa*; but the physical eye is needed for seeing.

- When one develops the mind, it is possible to see without the physical eye and much more (like beings in other realms). **Similarly, the mind is not the brain, but the brain is needed for a normal human for mind to work.**
3. Therefore, our five physical senses limit our consciousness; we perceive the “world” as we sense it with our five physical senses of eyes, ears, nose, tongue, and body.
- The “world” or “the universe” is much more complex than we perceive. This is one reason we think everything around us is permanent, and is why it is so hard for us to understand the true nature of “this world,” i.e., *anicca*, *dukkha*, and *anatta*.
 - With our “enhanced consciousness” from our scientific and technological advances, we have recently realized that even our universe is not permanent; it came into being some 14 billion years ago and will eventually re-collapse or disintegrate.
 - Furthermore, as I mentioned elsewhere, we can still “see” only 4%-6%% of the “stuff” in the universe. The other 96% or so is termed “dark energy” and “dark matter” by scientists because we do not know what that 96% consists of; see, “The Four Percent Universe” by Richard Panek (2011). Thus, even though we have vastly expanded our awareness, we are far from conscious of the “world as it is.”
4. In Buddha Dhamma, the above discussion with six sense bases applies specifically to humans, but in general applies to many but not all animals as well as other beings in the “sense sphere” (*kāmaloka*).
- The Buddha categorized all the living beings subject to the rebirth process in the *samsāra*, and the categorization is according to consciousness. Beings in the other planes of existence have different consciousness than humans or animals.
 - For example, beings in the *Arupaloka* (“form-less sphere”) have only the mind consciousness since they do not have physical bodies. Before getting into that discussion, let us first discuss different aspects of consciousness that we see around us.
5. Even though the “beings” in the “sense-sphere” that includes humans and animals in general have five external sense-doors (eye, ear, nose, tongue, and body), there are many exceptions.
- For example, some animals do not have fully-developed five external senses. Others have different types of sense doors; a jellyfish has eyes but no brain for information processing, so its visual consciousness is still very limited. It can distinguish between dark and illuminated areas, and that is about all. On the other hand, a dog has visual consciousness comparable to humans, and it can catch a rabbit by chasing it.
 - A bat does not have visual consciousness, so it cannot hunt during the daytime but has different consciousness using radar that enables it to hunt at night. So, it is clear that “consciousness” or “awareness” has many different “avenues” (for example, humans become aware of their surroundings by using sight, hearing, smell, taste, touch, and thoughts).
 - Lower life forms may have fewer avenues of consciousness, and the degree of consciousness can vary too (a jellyfish has minimal visual consciousness). In a few cases, we may be less conscious than an animal. For example, a bat would be much more conscious about its dark surroundings than a human.
6. Even though most animals have the same five physical senses as humans, they are “aware” of only their immediate environment.
- But contemporary humans are aware of a huge Black hole at the center of our Milky Way universe, millions of light years away.
 - Humans used to have much limited awareness even a few hundred years ago, before the advent of the telescope and the microscope. Since then, humans have slowly built up our awareness using technology; see “[Expanding Consciousness by Using Technology](#).”

- However, we must remember that a complete theory of consciousness (Buddha Dhamma) was described by the Buddha 2500 years ago. It had been hidden for nearly 2000 years, at least in its pure form.

7. Therefore, it is clear that “the awareness” or the “consciousness” can come in different flavors as well as different levels of intensity, even within the “sense sphere” (*kāmaloka*):

- The humans and *devas* in the *kāmaloka* have the highest levels of consciousness (especially mind-consciousness).
- In the “form-sphere” (*rūpaloka*), the consciousness level in general is higher, even though they have only visual, auditory, and mind-consciousness; their minds are much higher.
- The beings in the “form-less sphere” (*arūpa loka*) do not have physical bodies at all and have highly developed minds and thus have even higher levels of consciousness.
- Those three levels of consciousness are called *lokiya* (mundane).
- Beings in the three mundane levels have finite lifetimes, and a given “being” wanders through all these different planes in the unfathomably-long *samsāra* (rebirth process). Even a sentient being born in the *arūpaloka* may end up in the lowest level (*apāya*) in the *kāmaloka*, depending on the unspent *kamma*.

8. The higher levels of consciousness are supermundane or “beyond mundane” (*lokuttara*), and there are four levels of supermundane consciousness, with *Nibbāna* achieved by the *Arahants* being the highest.

- The first three levels of supermundane consciousness are Stream Enterer (*Sotāpanna*), Once-Returner (*Sakadāgāmi*), and Non-Returner (*Anāgāmi*).
- As one progresses on the Path, the consciousness starts to clear up, first by removing the five hindrances (*panca nivarana*) at the *Sotāpanna* stage.
- The *Arahant* stage purified consciousness. The undefiled mind becomes separated from any trace of matter (four great elements or *cattāro mahā bhūta*) at the death of the *Arahant*. Thus the *Arahant* is not reborn anywhere in the 31 realms, and his/her mind becomes free, *Nibbāna*.
- All the suffering we experience is due to trying to satisfy the physical body attached to the mind. When attachment to that body (which is subjected to decay and death) is severed, the worldly bonds are broken (*Nibbāna*), and the mind attains the complete “cooled down” (*Nivana*); see “[How to Taste Nibbāna](#),” and “[Nibbāna – Is It Difficult to Understand?](#).”

Next, “[Expanding Consciousness by Using Technology](#)”,

5.4.3 Expanding “Consciousness” by Using Technology

1. Focusing on the human world, we can expand our “awareness” or consciousness in two ways so that we can be more “aware” of the “world” around us.

- One is using the scientific approach and by developing new techniques that enable us to “see” or “be aware” of things that are not directly accessible to our senses.
- For example, we have infrared sensors that allow us to see in the dark; we have constructed particle accelerators that allow us to “see” elementary particles; we can even “see” supernova explosions that happen millions of light years away using our sophisticated instruments. In the latter two cases, we do not actually see with our eyes, but we are aware of the existence of these events.

2. However, it must be noted that we can “see” only about 6% of the “stuff” that our universe is made of. Scientists don’t know what the rest of the “stuff” is made of and have labelled it as “dark matter” and “dark energy.”

- This means we are “not aware” of 94% of our own universe! For those interested, you can also do a Google search on dark energy and dark matter and learn more.

3. The scientific methods which have been developed over only the past few hundred years are still at a very early stage; even though science and technology has greatly expanded our “awareness” of the external world, according to Buddhism there is much more to be explored, i.e., our consciousness is still very limited.

- We have not been able to contact any life form outside the Earth, even though scientists now accept the existence of life outside the earth to be a certainty.
- Possible existence of life forms that exist in the “form-sphere” and the “form-less sphere” are not even contemplated at this time.

Next, “[Expanding Consciousness by Purifying the Mind](#)”,

Also see, “[Quantum Mechanics and Dhamma](#).”

5.4.4 Expanding “Consciousness” by Purifying the Mind

Revised December 18, 2020; August 28, 2022

According to the Buddha, expanding consciousness means to “see things as they are” (yathābhūta ñāṇa.)

1. Twenty-five hundred years ago, the Buddha achieved the ultimate state of mind and became “all-knowing” (or “perfectly conscious”). He learned about the boundless universe, the endless cycle of rebirths, and the complex process of cause and effect (*Paṭicca Samuppāda*), which sustains everything in the universe.

2. By developing scientific instruments (starting with simple telescopes and microscopes, we have now developed very sophisticated instruments), we have expanded our “awareness.”

- For example, within the past century, we have expanded our awareness of the vast space around us, and now we know not only that our universe is possibly infinite in extent, but there may be other parallel universes as well. Yet, what science has achieved so far is nowhere close to the level achieved by the Buddha.

3. As humans, we may get close to the ultimate knowledge using the scientific approach someday well into the future.

- **But we can get there in a lifetime by developing our minds by following the path the Buddha laid out.**
- For all their impressive “material achievements,” today’s science and technology are still at very early stages concerning mental phenomena.

4. According to Buddha Dhamma, one is said to achieve full and clear consciousness (*anidassana viññāṇa*), i.e., that person will be able to “see the whole world as it is” when he/she achieves *Nibbāna*. See, #11 of “[Pabhassara Citta, Radiant Mind, and Bhavaṅga](#).”

- This does not mean that a person who achieves *Nibbāna* will be an expert in relativity or quantum mechanics. Relativity and quantum mechanics provide only partial explanations, and even then, just for material aspects of the world.
- When one achieves the ultimate knowledge (*Nibbāna*), relativity or quantum mechanics become irrelevant since they account for only some of the impermanent and transient behavior. The matter is secondary to the mind.

5. Furthermore, people with good meditative skills can expand their consciousness by accessing higher meditative states (*jhāna*), i.e., controlling and focusing the mind.

- Even before the Buddha, ancient Yogis could access such meditative states via concentration meditation (*Samatha Bhāvanā*). For example, when Prince Siddhartha became an ascetic on the way to the Buddhahood, he first followed two well-known *yogis* at that time, Āḷāra Kālāma and Uddaka

Rāmaputta. They achieve very high states of *jhāna* (that belong in the *rūpa loka* and *arūpa loka*) via concentration meditation.

- However, it will be explained in the future that these *jhānic* achievements of such *yogis* can be traced back to Buddha Kassapa, who lived before Buddha Gotama.

6. Even today, people from other religions could experience such states when they get deeply absorbed in prayer or any deep mental concentration; this has nothing to do with a particular religion. However, like everything else, such states are transitory; none of these states is permanent other than *Nibbāna*.

- And *Nibbāna* is not possible to attain via concentration meditation alone. For that, the unique Buddhist system of insight meditation (*vipassana Bhāvanā*) is needed whereby *anicca*, *dukkha*, *anatta*, *Paṭicca Samuppāda* (Dependent Origination or “cause and effect”) and the Four Noble Truths (that the existence in *samsāra* is *dukkha*, attachment or craving as the origin of the *dukkha*, *Nibbāna* is the cessation of *dukkha*, and the Eightfold Path is the path to the cessation of *dukkha*) are understood.

7. To recap, according to Buddha Dhamma, “beings” exist in different planes of existence with different levels of consciousness; different planes can exist in different dimensions and different physical locations (such as planetary systems in this or other universes, for example). Beings are categorized according to their level of consciousness, and the humans lie somewhere in the middle (but still at a unique place, as is discussed in [“The Grand Unified Theory of Dhamma”](#))

8. Being “aware” or having consciousness is only one aspect of a living being’s mental composition; in Pāli, consciousness is *viññāṇa*. The other mental constituents that make up a living being are feeling (*vedanā*), perception (*saññā*), and mental volitions (*saṅkhāra*). Consciousness (*citta*) is nothing more than “being aware.” The other three, called mental factors (*cetasika*), arise with *citta*.

- For example, when we “see” an object, that is pure visual consciousness. Based on the visual, we next recognize the object based on our familiarity with the object. This is perception (*saññā*).
- Then the mind may start forming an “expectation” if that object is desirable. That is when “pure *citta*” evolves into *viññāṇa*, which is “defiled consciousness.” See [“Viññāṇa \(Defiled Consciousness\)”](#).

9. The chief characteristic of perception is the cognition of an object by a previous acquaintance. It is a perception that enables one to recognize an object. According to Abhidhamma, “Its procedure is likened to the carpenter’s recognition of certain kinds of wood by the mark he had made on each; to the treasurer’s specifying certain articles of jewelry by the ticket on each...”

- It happens automatically since the mind compares the observed image with the stored images of people we know and quickly makes the “match.” (I was happy to see that scientist Jeff Hawkins has described this very well in scientific terms in his book “On Intelligence”; this book is a worthwhile read to see how scientists are slowly making progress!). Of course, the more frequently the memory is refreshed of the image, the easier it is to recognize.
- Sometimes people, especially young children, can recognize people and material objects from their past lives.

10. Modern neuroscientists and philosophers are struggling with how even to define these “mental characteristics.” They have coined the term “qualia” to represent the subjective aspect of sense experience.

- In his book “Second Nature: Brain Science and Human Knowledge” (2006), Gerald M. Edelman, a neuroscientist, states (p. 14): “The property most often described as particularly mysterious is the phenomenological aspect of consciousness, the experience of qualia. Qualia are, for example, the greenness of green and the warmth of warmth. But several students, myself included, go beyond these simple qualities and consider the whole ensemble of conscious senses or experiences to be qualia. Many consider explaining qualia to be the acid test of a consciousness theory. How can we explain not only qualia but all the other features of consciousness? The answer I propose is to look into how the brain works, formulating a global brain theory that can be extended to explain consciousness...”

- **In Buddha Dhamma, the qualia are the mental factors (*cetasika*), and they are built-in to a sentient being and are strictly individualistic. By definition, they cannot arise just from inert matter, but scientists are trying to derive them from matter.**

11. An interesting read on various ideas of different philosophers' and scientists' reasoning on how to explain consciousness and associated mental aspects such as qualia is given in the book "Conversations on Consciousness" by Susan Blackmore (2006).

12. Let us consider, for example, the visual recognition of a person, say Joe Smith. With the recognition of Joe Smith, "feelings" arise together with a whole host of mental volitions, which are fifty-two in total. We immediately feel a certain way about Joe Smith based on our experience.

- For example, if hatred, one of the possible 52 mental volitions, arises when we see Joe Smith, we could be acquiring bad *kamma* and let our mind cultivate those feelings further.

13. It needs to be emphasized that pure consciousness does not entail the recognition of an object. It is only a sort of awareness—awareness of the presence of an object. When the eye comes in contact with a color, for instance, blue, visual consciousness arises, which is awareness of the presence of color. But it does not recognize that it is blue. There is no recognition at this stage. It is perception (*saññā*) that recognizes that it is blue. The term "visual consciousness" is a philosophical expression denoting the same idea conveyed by the ordinary word "seeing." Seeing does not mean recognizing. The same is true for other forms of consciousness.

- *Viññāṇa*, which incorporates all mental factors, including *saññā*, *vedanā*, etc., has all these mental factors in addition to pure awareness.

14. Using a somewhat different nomenclature, a "being" in the sense sphere can also be represented by just five "heaps of things" or aggregates (*khandha*), i.e., *pañcakkhandhā* (pronounced as "pañchakkhandha," *pañca* meaning five and *khandha* means a "heap"); consciousness (*viññāṇa*), feeling (*vedanā*), perception (*saññā*), volitions (*saṅkhāra*), and form or materiality (*rūpa*); see, "[The Five Aggregates \(Pañcakkhandha\)](#)."

- These five components co-exist; they are born together at conception. It is not possible to separate *nāma* from *rūpa* or the four mental aggregates from each other. Therefore, *nāma* does not arise from *rūpa* as scientists believe today; ***nāma* and *rūpa* arise together from the moment of conception in the mother's womb.**
- ***Nāma* and *rūpa* (associated with a human) arise together from conception in the mother's womb.** Here, *nāma* is the "*paṭisandhi viññāṇa*" (or *gandhabba*), and *rūpa* is the zygote made by the mother's egg and father's sperm; see "[Buddhist Explanations of Conception, Abortion, and Contraception](#)."

15. The Buddha told his disciples that what he taught them was just a minute fraction of his knowledge about "this world." What he taught was sufficient to achieve *Nibbāna* and cut short the *saṃsāric* journey filled with *dukkha* (unsatisfactoriness and suffering). He did not want people to spend their precious time in this human life studying things like the origin of the universe or the origin of life which would serve no purpose in achieving *Nibbāna*. The following passages are from the *Simsāpa Sutta*:

- Once the Buddha was staying at Kosambi in the *Simsāpa* forest. Then, picking up a few *Simsāpa* leaves with his hand, he asked the monks, "What do you think, monks: Which are more numerous, the few *Simsāpa* leaves in my hand or those overhead in the *Simsāpa* forest?"
- "The leaves in the hand of the Blessed One are few, Lord. Those in the *Simsāpa* forest are much more numerous."
- "In the same way, monks, those things that I have known with direct knowledge but have not taught are far more numerous [than what I have taught]. And why haven't I taught them? Because they are not connected with the goal, do not relate to the rudiments of the holy life, and do not lead to

disenchantment, dispassion, cessation, calm, direct knowledge, self-awakening, to Unbinding. That is why I have not taught them.”

- “And what have I taught? ‘This is *dukkha*... This is the origination of *dukkha*... This is the cessation of *dukkha*... This is the path of practice leading to *dukkha*’s cessation: This is what I have taught. And why have I taught these things? Because they are connected with the goal, relate to the basics of the holy life, lead to disenchantment, dispassion, cessation, calm, direct knowledge, self-awakening, and unbinding. This is why I have taught them.”

16. But nowadays, one may be justified to spend a little time convincing oneself that Buddha Dhamma is compatible with contemporary “scientific knowledge” because that will enable one to build faith in Buddha Dhamma.

- **However, when one probes deeper into Dhamma, one realizes that it is not a matter of science proving Dhamma to be correct. Rather, as described by Dhamma, science is at a very early stage of discovering the world’s true nature.**

17. Let me close with an example of the difference between technological progress in expanding consciousness and the mind’s purification. The modern world was unaware of microscopic living beings’ existence until the advent of the microscope by Leeuwenhoek in the late 17th century: [WebLink: WIKI: Antonie van Leeuwenhoek](#).

- However, a person who has developed meditation and attained higher *jhānā* can “see” such microscopic beings. There is this story in the *Tipiṭaka* about a *bhikkhu* who had developed *abhiññā* powers but had not yet attained *Arahanthood*. One day he was about to drink a glass of water when he realized that there were numerous microscopic living beings in the water. He tried to filter them out in vain and got depressed. The Buddha saw this and told him that “it is not possible to live “in this world” without hurting other beings; the only thing we can do is to attain Nibbāna as soon as possible and get out of this world.”
- Thus one can attain much more “knowledge” about this world by developing the mind. We can probe deeper into the microscopic world using the scientific knowledge achieved over hundreds of years, but we can “see” much more by purifying the mind in a lifetime.

Also see “[Quantum Mechanics and Dhamma](#).”

5.5 Consistencies with Science

- [Second Law of Thermodynamics is Part of Anicca!](#)

The following posts discuss cases where current theories of science are consistent with Buddha Dhamma.

- [Quantum Entanglement – We Are All Connected](#)
- [Infinity – How Big Is It?](#)
- [Gödel's Incompleteness Theorem](#)
- [Truine Brain: How the Mind Rewires the Brain via Meditation/Habits](#)
- [How Habits are Formed and Broken – A Scientific View](#)

5.5.1 Second Law of Thermodynamics is Part of Anicca!

Revised January 12, 2020; re-written July 20, 2021

Anicca – Inability to Maintain Things the Way We Like

1. As we saw in the post, "[Anicca – True Meaning](#)," *anicca* describes one of the three primary characteristics of "this world," namely, no matter how hard we try, "we cannot maintain things to our satisfaction in the long term."

- When things evolve in a way we don't like, we suffer. First, we suffer mentally. Then we have to work hard to try to change it to the way we like. It is a constant struggle.
- That is only the mundane meaning. The real suffering arises when we get rebirths that we don't like!
- But it is good to first contemplate the suffering that we experience due to our physical bodies (and people and things we like.)

Physical World Naturally Evolve Towards Disorder

2. What does the Second Law of Thermodynamics say? It says, "things in a closed system go from order to disorder unless energy is put into the system to keep the order."

- Thus we can maintain a sort of stability (or "keep things the way we like them to be") by striving or working hard. This is part of "*saṅkhāra dukkha*." See, "[Introduction -2 – The Three Categories of Suffering](#)."
- But as we get old, our ability to do that wanes, and ultimately we become too weak to do anything or die. It does not matter how much money we have accumulated. All sense pleasures lose their vigor as the body gets old, and money or will power cannot maintain them.

3. A successful business person could say, "look at all the wealth that I created. I have achieved what I wanted." It is a good accomplishment, but can he enjoy all that in the long term? How much effort does he make to keep them that way?

- Even all that money cannot maintain a simple thing like the taste of food when he gets really old, not to mention the fact that all that wealth will be left behind at death.
- However, when we are young, it SEEMS that we CAN maintain things to our satisfaction. That is why it is hard to explain *anicca* to a young person. A young boy will say, "look at the muscles I built over the past year by working out at the gym! I am invincible." A young woman will say, "I look much more beautiful now than I was a year ago."

- Yet, blossoming at around twenty or so years is just the beginning of a slippery slope. In the end all those strong muscles will fade, and the beautiful figure will sag and decay. That is the reality.

[WebLink: YOUTUBE: Done Got Old](#)

Everyday Examples

4. We can see the effects of the Second Law of Thermodynamics at different levels. A nice hot cup of coffee will cool down with time, and we will have to re-heat to enjoy it again. An ice cream bowl will melt if not kept cold by putting it in the refrigerator, which uses energy to run.

- Mom will come and clean a child's room, only to find the next day that it is back to the chaotic state; she will need to go through all that work again to get it back to presentable condition.
- We build a house with a beautiful garden, only to find that we will have to do repairs to the home, and much work is needed to keep the weeds out of the garden and grass cut, etc.
- The Sun will power our planet for another few billion years, and then it will die. Long before the Sun dies, the Earth will get destroyed.
- Even our universe will “run down” in 15 billion or so more years.

Anicca Is a Universal Characteristic

5. Thus, we can see that the concept of *anicca* is a universal characteristic of this world. Things can be maintained, EVEN WITH AN EFFORT, only up to a certain time, and NOT forever.

- The Second Law of Thermodynamics describes the impermanence or the “root cause” for *anicca*. Even though the scientists understand this impermanence, they do not necessarily PERCEIVE that in their minds with regards to themselves. That is the difference between “impermanence” and *anicca*.
- **Just like a scientist who has contemplated on the Second Law of Thermodynamics, anyone who is trying to cultivate “*anicca saññā*” by contemplating on impermanence is nowhere close to *Nibbāna*; see, “[Saññā – What It Really Means](#).”**
- Thus, like those young people mentioned above, we all have the wrong PERCEPTION that “we can maintain things to our satisfaction,” i.e., we have the false perception of *nicca*, not the actual reality of *anicca*.

6. Even when our universe dies, many come into existence. This process has been going on for eternity, and so have we. We have been in the rebirth process forever.

- The problem is that most of those lives were not as good as this one; we have suffered unimaginably, and unless we get out of this predicament, such future suffering is not avoidable. That is the *anicca* nature; see, “[Anicca – Inability to Keep What We Like](#).”
- Of course, *anicca* has other related meanings too; see, “[Anicca – True Meaning](#).”

Nibbāna is of Nicca Nature

7. The opposite of “*anicca*” is “*nicca*.” *Nicca* nature means one will never be subjected to suffering. For a comprehensive discussion, see “[Basic Framework of Buddha Dhamma](#).”

- **Therefore, the good news is that our minds can become free of this non-stop rebirth process by decoupling from this unstable material base.** We are reborn in this “material world” because of our perception of “*nicca*,” i.e., we believe that we CAN find some suitable place with permanent happiness in this world.

- Once we grasp the reality of “*anicca*,” our minds will automatically start becoming free, and we will start feeling the *nirāmisā sukha* arising from this detachment from the material world; see, “[Three Kinds of Happiness – What is Nirāmisā Sukha?](#).”
- That is another way to look at reality and our choices.

5.5.2 Quantum Entanglement – We Are All Connected

Revised January 21, 2016 (#6); March 13, 2018; September 22, 2019; June 25, 2022

Quantum entanglement is the ability of two spatially separated “entangled particles” to be able to respond to each other instantaneously. This proven interconnectedness has Implications for the rebirth process.

1. When we get deep into Buddha Dhamma, we will see that the mind creates EVERYTHING in this world. That is why the Buddha said, “*mano pubbangama dhamma.....*”, i.e., the mind is the precursor to everything. But let us proceed at a slow pace.

- By the way, dhamma is “what we bear” in this world (“*darana deya*” in Sinhala); this means absolutely everything in this world. And all dhamma are *anatta*, i.e., fruitless, or there is nothing substantial in any dhamma (it does not mean “no-self” or “*anātma*”); see, “[Anicca, Dukkha, Anatta – Wrong Interpretations](#),” and “[Anicca – True Meanings](#).”

2. Everything happens due to causes and conditions; see, “[What is Kamma? – Is Everything Determined by Kamma?](#).” Also, this world is not four-dimensional (3 space dimensions and time) as we experience, but is multi-dimensional; see, “[What Happens in Other Dimensions](#).” That is why we see only two realms (human and animal) out of the 31 realms of existence; see, “[The Grand Unified Theory of Dhamma](#).” Just because we cannot experience directly or is not proven by science YET is not reason to discard them. **But the current string theories do predict a ten or 11-dimensional world.**

- What can we explain with Buddha Dhamma? Everything in this world. See “[Vagaries of Life and the Way to seek “Good Rebirths”](#),” for some examples.
- Also, see “[Origin of Life](#).” This series explains how the mind creates EVERYTHING in this world.

3. Furthermore, science has been confirming many things that ordinary people rejected as “impossible” over the past few hundred years; and that activity started increasing over the past hundred years since the advent of quantum mechanics and relativity; see, “[Dhamma and Science – Introduction](#).” That should give us more confidence in Buddha Dhamma. **That is *saddhā* or faith-based evidence.**

4. Here, we will discuss yet another recent finding in science that makes the process of rebirth more easily “explainable.” **Please note that I am not trying to verify Buddha Dhamma by science. It is the other way around. I am saying that science is far behind Buddha Dhamma.** Science is now trying to catch up just the material aspects of how this world works and has not made any significant progress on how the mind works.

- In the essay “[Evidence for Rebirth](#),” we saw that a person who dies in one geographical location is reborn in another. The consciousness does NOT transmigrate as is believed in some other religions. However, some form of energy leaving one place must instantly appear at another.
- What about the speed of the light barrier for anything or any information to travel, based on Einstein’s Special Theory of Relativity? It turns out that we are in a unique time in history. Buddha’s teachings are beginning to be, even if not confirmed, at least elevated to the level of possibility by Western science. For millennia, numerous people had strong enough faith to believe Buddha’s words and commit their entire lives to pursuing *Nibbāna*. (Actually, it is not blind faith. If one studied the Dhamma / Abhidhamma carefully, one can verify that it must be true).

5. In 1935, Einstein, Podolsky, and Rosen published a paper that showed that if quantum mechanics is correct, then a particle can somehow “know” what another particle, even if separated from it by a large distance, is doing. Einstein derisively called this “spooky action at a distance” and dismissed the prediction.

Even though his theories led to quantum mechanics, Einstein was firmly opposed to quantum mechanics throughout his lifetime.

- However, in 1964, physicist John Bell proposed an experiment to test this concept. Those are experiments on “violation of Bell's inequality.” Several experiments carried out since 1997 proved that Einstein was wrong. The experimenters created “entangled particles,” which shared a wave function. In 1997 Nicholas Gisin did the first experiment with entangled photons, in which they were sent seven miles apart via optical fibers. When they reached the ends of these fibers, the two photons were forced to make random choices between alternative, equally possible pathways.
- There was no way for the photons to communicate with each other. Thus, “classical” physics would predict that their independent choices would bear no relationship to each other. But when the paths of the two photons were adjusted correctly and the results compared, the independent decisions by the paired photons always matched. There was no real way for them to communicate with each other. The responses were instantaneous, even though the two events were separated by about 26 milliseconds at the speed of light.

6. Since then, that same experiment has been repeated with electrons and ions as well. This effect is called the “quantum entanglement,” It leads directly to other related concepts such as “holographic universe” and “interconnectedness.” **The conclusion is that entangled particles can be interconnected even if they are situated across the universe!**

- In late 2015, “nonlocality of nature” or the violation of Bell's inequality was confirmed in three “loophole-free” experiments; see the pdf, [“WebLink: PDF File: Wiseman-Death by experiment for local realism-Nature-2015.”](#)
- And the first of those experiments is: [“WebLink: Hensen-Loophole-free Bell Inequality-Nature-2015.”](#)
- Details at [“Quantum Mechanics and Dhamma.”](#)

7. The following fun video by Dr. Quantum illustrates the basic idea of quantum entanglement:

[WebLink: YOUTUBE: Dr Quantum - Entanglement](#)

8. Quantum entanglement could be intimately connected (and can be “explained” easier) with a universe that is multi-dimensional (like the proposed 11-dimensional string theory). If you have read the post on [“Consciousness Dependence on Number of Dimensions,”](#) it will be easier to follow my simple (and crude) illustration:

- Think about a two-dimensional “world,” say, the kitchen floor, and consider an ant on the floor as a “two-dimensional being,”; which means we assume that the ant can see only those things that make direct contact with the floor. If a chair is there, the ant can see only four “impenetrable circles” where the chair's legs touch the floor. For the ant, those four “circles” are not connected. They lie far apart from each other. However, if we lift that chair, all four “circles” will be removed simultaneously. That means that, for the ant, this means that the four “circles” were “entangled” or connected to each other. Of course, we can see that they were connected via the rest of the chair in the third dimension, above the floor.
- Similarly, things that appear to us as “far apart” (say New York and Houston) may be connected via a dimension that we cannot see. A person dying in New York may be born instantaneously in Houston because those two “places” may have a direct path via a hidden dimension.
- Those “entangled particles” in #5 above may travel far apart from each other. But they could be connected via a hidden dimension. Just like the ant in the above example is not aware of the rest of the chair, we are not aware of such hidden dimensions.

9. However, quantum mechanics is not restricted to working on “intellectual” problems such as above. Those are what the man-on-the-street calls “abstract stuff.” Most of the “things” that we have grown accustomed to happen to be byproducts of quantum mechanics. Those vary from computers and cell phones to lasers and nuclear bombs.

- So, these new observations do indeed make more plausible the concept of a connection across the universe. But there is no point in wasting valuable time trying to find answers to questions such as the end of the universe or the beginning of life. That is what the Buddha advised.
- We are fortunate to be born in the human world, which is an infrequent event. See, "[Rebirth – Connection to Suffering in the First Noble Truth.](#)") Thus, one should diligently work towards achieving liberation (*Nibbāna*). In realms below the human world, life is too painful, and life in heavenly worlds is too blissful for one to focus on working toward *Nibbāna*.

Is the Universe Multi-Dimensional? – Another Emerging Possibility

It was Einstein's dream to work out such a Grand Unified Theory, but he was unable to do so. Many scientists are trying to accomplish this goal, and the newest theories are called string theories. No Grand Unified Theory exists yet, but the closest is a version of the M-theory's string theory. M-theory says that the universe is 11-dimensional universe, even though we can see only four dimensions (including time). So, could there be life existing in other dimensions that we cannot observe? That is another possibility. I briefly discuss this possibility under the heading, "[What Happens in Other Dimensions?](#)" [Consciousness Dependence on Number of Dimensions]

Consciousness and Quantum Mechanics

March 13, 2018: I have started a new section, "[Quantum Mechanics and Dhamma](#)," where a new interpretation of quantum mechanics is presented. I explain why quantum theory cannot explain consciousness.

Next, "[What is Mind? - How do we Experience the Outside World?](#)",

5.5.3 Infinity – How Big Is It?

Revised June 3, 2018; January 19, 2020; August 9, 2021; September 23, 2022

Infinity is a concept that is hard to comprehend. The rebirth process (or *samsāra*) does not have a traceable beginning, i.e., it extends back to infinity. Mathematicians have concluded that there are many levels of infinity!

Introduction

1. What is the largest number you can think of? Well, add one, and you have a larger number! There are some large numbers that we are aware of. With record budget deficits of the developed nations in trillions of dollars (and the total nominal value of all the derivatives traded around the world approaching a thousand trillion dollars, or a quadrillion dollars), trillion and quadrillions are indeed large numbers.

- Even though a trillion rolls off the tongue, not very different from a billion, a trillion is much bigger than a billion. Spending a billion dollars a day will take a thousand days to spend a trillion dollars.

How to Represent Large Numbers?

2. The number of molecules in a cubic centimeter of gas is 2.7×10^{18} or 2.7×10^{18} (this is a simple way to express big numbers; instead of 10000, we write 10^4 or 10^4). Since electrons are even smaller, you would think there would be a humongous number of electrons in the observable universe; the estimated number is around 10^{87} . That is, of course, a huge number, but it is not infinity by any means.

- That should give you an idea of the power of an exponent. Each time the exponent increases by one, the number becomes ten times bigger. So, even though 10^{87} may not look that big compared to 10^{18} , it is a

humongous increase. Another large number should be the distance from the Earth to the edge of the observable universe, estimated to be about 46 billion light-years or around 10^{23} miles. Even though such large numbers are hard to be contemplated in our minds, they are all finite.

What Is a Googol?

3. There are some famous large numbers. A Googol is 10^{100} , which is unimaginably vast compared to even the number of electrons in the universe (10^{87}). As an aside, the internet company Google was to be named Googol, but someone made a mistake, and Google was the name given. A Googolplex is a whopper; it is 10^{Googol} or $10^{(10^{100})}$. There are many such “famous large numbers.”

- Yet, you can add one to any of these large numbers and always get a bigger number. Therefore, no number, however large, is still finite.

[WebLink: YOUTUBE: Googol and Googolplex by Carl Sagan](#)

Infinity – Beyond Any Conceivable Number

4. So, the mathematicians coined the term “infinity” to denote an indefinitely high number; The word comes from the Latin “infinitas” or “unboundedness.” Since infinity is uncountable, it has some strange characteristics: whatever you add to (or multiply by) an infinity (even if it is another infinity), you still end up with infinity.

- The famous German mathematician David Hilbert illustrated the “abnormal” properties associated with infinity using the idea of an “infinity hotel,” which has an infinite number of rooms. The “infinity hotel” always has a vacancy: the management can always ask the person occupying the N^{th} room to move to the $(N+1)^{\text{th}}$ room, $(N+1)^{\text{th}}$ room to move to the $(N+2)^{\text{th}}$ room, and so on, and thus give the N^{th} room to the new guest. Even if an infinite number of new guests arrive, the hotel can accommodate all of them!

Infinity Is Real

5. That is not to say that infinity is a useless or bogus concept. The arguments described above are valid. Mathematicians cannot do many integrations without infinity. Physicists deal with infinity all the time (but they try to end up with finite physical values).

- The concept of infinity is real (and weird). For example, a line of any finite length has infinite points, whether it is an inch or thousand miles. The invention of calculus by Newton and Leibniz helped handle some problems arising from such situations.

Space and Time – Infinite!

6. In the physical sense, infinity is a rather vague concept meaning “larger than anything that could in principle be encompassed by experience.” For example, space is infinite, and as far as our sophisticated instruments allow us to “see,” there is no end.

- Our universe is possibly spatially infinite since scientists can “see” only to a finite extent. So, space is unlimited.
- What about the time? If our universe started at the Big Bang, that inflationary theory says multiple, parallel universes exist.
- According to the “cyclic theory” model, an alternate theory, the same universe comes to a “Big Crunch,” which leads to another Big Bang, and the whole process keeps repeating. So, there is no beginning to time either; time is infinite.

- By the way, both those theories are not correct, according to Buddha Dhamma. Individual star systems (“*Cakkāvāla*” or “*Cakkāvāta*”) undergo the birth-destruction cyclic process.
- I will write more in the future, but see the discussion: “[WebLink: Multiverse: Different Physical Laws and Different Dhamma?](#).” The lifetime of a *Cakkāvāta* (like our Solar system) is called a *Mahā Kappa* (great eon) in Buddha Dhamma.

***Samsāra* (Rebirth Process) Goes Back Infinite Time!**

7. The Buddha used a great eon as the measurement unit to help his followers visualize the enormous length of *samsāra*. A great eon (*mahā kalpa* [in Sinhala] or *mahā kappa*) is said by the Buddha to be longer than the time it would take a man to wear away a mountain of solid granite one *yojana* (about 7 miles) around and one *yojana* high, by stroking it once every hundred years with a silk cloth.

- These days scientists use the word “eon” to denote the duration of a universe (from the “big bang” either to a “big crunch” or just fading away). But a *Maha Kappa* means the lifetime of our Solar system. Our universe has “no beginning.” I believe that in the future, science will conclude that the “Big Bang Theory” is not correct (which says that our universe came into existence from nowhere in a “Big Bang.”) See the discussion: “[WebLink: Multiverse: Different Physical Laws and Different Dhamma?](#).”

Another Analogy of the Buddha

8. One day, the *Bhikkhus* asked the Buddha how many “great eons” had already passed and gone by. The Buddha told them, “Suppose, *Bhikkhus*, there were four disciples here, each with a lifespan of hundred years, and each day they were each to recollect a hundred thousand great eons. There would still be great eons not yet recollected by them when those four disciples pass away at the end of a hundred years. Because, *Bhikkhus*, this *samsāra* is without discoverable beginning.”

- A fascinating book about such hard-to-grasp ideas (in science) involving infinity is “The Beginning of Infinity: Explanations That Transform the World” by David Deutsch.
- Infinity is a mind-boggling concept. For example, one question that comes up frequently is the following. We have had infinite time to attain *Nibbāna*. So, why have all living beings not attained *Nibbāna* yet?
- I have discussed that in “[The Infinity Problem in Buddhism](#).”

Summary

9. Each of us (including all living beings today) has “lived” for an infinite time. There is no traceable beginning to life, per Buddha. See “[Origin of Life – There is No Traceable Origin](#).”

- During much of that time, each of us suffered much more than any brief stretches of pleasure. That is because births in “good realms” (like human, Deva, and Brahma realms) are rare. See “[Rebirth – Connection to Suffering in the First Noble Truth](#).”
- Most of our past births had been in the four lower realms (including the animal realm), where suffering dominates.
- That is why the Buddha admonished us to strive to attain *Nibbāna* to avoid such harsh suffering in future rebirths.

Detailed discussion in the subsection, “[Origin of Life](#).”

5.5.4 Gödel’s Incompleteness Theorem

Revised March 6, 2021; #2 added March 24, 2021

Introduction

1. Mathematician Kurt Gödel, in his Incompleteness Theorem, proved that it is impossible to find complete “truth” or “complete explanations” of a system from WITHIN a system.

- No theory that any scientist discovers is, thus, cannot be proven to be the “ultimate truth.” This is another way of saying that one cannot comprehend the complete picture of the system IF one is within the system. Then only parts of the system can be studied.

A Simple Description of Gödel’s Incompleteness Theorem

2. The following video provides a simple explanation without going into details.

- At 8 minutes, he says, “What is outside ‘this world’ is not ‘matter’, not energy, not space, and outside of time.” It may be possible to get a “complete and self-consistent picture only from the “outside” That is *Nibbāna*.
- The Buddha, once attaining *Nibbāna*, was able to “look from the outside and “see things as they are.”
- No one else, looking from within can EVER figure out the ultimate truth about this world.
- The second video below is interesting. He assigns “outside of the universe” to God. **Other than that, his conclusion is perfect.**

Wrong Conclusion

[WebLink: youtube: Kurt Gödel's Incompleteness Theorem and the Origin of the Universe \(part 2\)](#)

- The key question regarding a “God” or “Creator” is: Is He (God) inside the system or outside? If He is inside, then He is also subjected to Gödel’s theorem. If He is outside, how can He affect things from the outside? “Inside” and “outside” are mutually exclusive!

Nibbāna Is Outside This World

3. The Buddha transcended “this world” by developing his mind; see “[The Grand Unified Theory of Dhamma](#)” for a description of the 31 realms of existence.

- This is again something that a human being cannot prove. One accepts, as I have, of the truth of that by examining the evidence: that the Buddha was able to explain so much about “this world” 2500 years ago. By “this world,” it means not only the Earth or even this universe but also total existence.
- Of course, the Buddha lived in this world until the death of the physical body. However, his mind had transcended this world. Attaining *Nibbāna* is reached at the *Buddhahood* or the *Arahanthood*. That *Nibbāna* would be complete at *Parinibbāna* at the death of the physical body.

4. The only way to disprove what I stated above is to find inconsistencies within the Buddha Dhamma (this is the same method used by the scientists in assessing scientific theories). I have not found any. See, “[Buddha Dhamma: Non-Perceivability and Self-Consistency](#).”

- If you find anything inconsistent about the Buddha Dhamma, that is because there have been numerous “alterations” over the past 2500 years. But if you find any inconsistencies at this site, please let me know. If there are any, that is due to my possible carelessness or ignorance, and I would fix them.
- In fact, this is the only way to get rid of any inconsistent “bits and pieces.” Just like if you have a piece of a puzzle at the wrong place that will only hinder the progress of solving the puzzle, having wrong information somewhere will only slow down our progress in “figuring out the pure version of the Buddha Dhamma.”
- However, I do believe that the “big pieces of the puzzle” are in correct places here.

I Hope Scientists Would Become Interested in Buddha Dhamma

5. Kurt Gödel would have really enjoyed Buddha Dhamma. It would have been tremendous if he was alive to go through the material here and point out any inconsistencies. Many of the scientists that I admire, including Einstein, Feynman, Gödel, Heisenberg, de Broglie, Sagan, and many more, would have easily grasped the message of the Buddha. Unfortunately, they never came across the pure Dhamma; David Bohm came close.

- I hope the current generation of scientists and philosophers will get an opportunity to examine the pure Dhamma.

6. I do not want wrong impressions to come out of this post. I love science and physics in particular. Before discovering the pure Dhamma, physics was my passion, and I still try to keep up with new findings.

- Yet, I have realized that discovering how inert matter behaves is a minute fraction of the whole existence's knowledge. We cannot even discover everything about "matter" until we start finding out more about the "mind." The Buddha said, "*mano pubbaṅgamā dhammā...*" or "the mind precedes everything in this world....".

7. Let me give some examples. Albert Einstein introduced his Special Theory of Relativity in 1905 and his General Theory of Relativity in 1915. The first showed that Newton's Three Laws of Motion were only approximately correct, breaking down when velocities approached that of light. The second showed that Newton's Law of Gravitation was also only approximately correct, breaking down when gravitation became very strong.

- We could not see anything wrong with Newton's laws of motion until we developed technologies that transcended our "level of consciousness"; see, "[Expanding 'Consciousness' by Using Technology](#)." They worked well within our "probing sensitivities." Even today, scientists do not use relativity equations to map out rocket trajectories to the Moon; Newton's equations are good enough to that.
- In the same way, everything that science discovers expands our horizons but never will provide the "ultimate answers." We can find "everything about this world" just by purifying our minds; see, "[Expanding 'Consciousness' by Purifying the Mind](#)."
- The above statements may not mean much right now. However, I ask you to be patient and go through the material at the website, and gradually you may realize what I am trying to say.

Testable Predictions

8. A "good theory" is all about "testable predictions." As I stated on the home page, I try to present material on Buddha Dhamma as a "theory on how nature works." As I pointed out in many essays, many of the "predictions" or "statements" about this world's nature have proven to be correct by science over the years, especially during the past few hundred years.

- I can make another prediction just for the records. Darwin's theory of evolution will be proven to be only partly correct and only for limited spans of time. The theory of evolution is correct only over the recent past of this planet, where we can trace past events using radiocarbon dating techniques. The oldest dates that can be reliably measured by radiocarbon dating go back to around 50,000 years ago. Even if we put the limit at a million years, that is only a tiny fraction of over four billion years lifespan of the planet.
- What is correctly stated in the theory of evolution is that species arise when conditions become suitable for them to arise AND for them to survive.

Some Aspects of Buddha Dhamma Not Amenable to Mundane Interpretations

9. However, it is dangerous to talk about concepts that are not amenable to our minds. That will lead only to “loss of faith.” It would be impossible to explain to someone who time-traveled to the present time from several hundred years ago how a light bulb can light up just by flipping a switch. There is no way for that person to “grasp” the concept of an electric current; he/she would believe it to be a “magic trick.”

- The Buddha never revealed any details of nature that were not discernible to at least his top disciples at that time. Let me give an example from the *Tipiṭaka*. One time Ven. Moggallana, who was only second to the Buddha in *abhiññā* (supernormal) powers, saw many beings in the *peta* realm near the Gijjakuta mountain. Beings in the *peta* realm have invisible bodies that only those with *abhiññā* powers can see.
- So, none of the *Arahants* who had *abhiññā* powers could see those *petas*, and they told Ven. Moggallana, “how come we cannot see them?.” Ven. Moggallana told them to ask the Buddha. The Buddha told those *Arahants* that he had actually seen them previously. When the *bhikkhus* asked why the Buddha did not mention it to them, he told them that, “If I tell you something that you cannot verify by yourselves, that will only lead to doubts. That is why I did not mention it. But now that Moggallana has seen them, there is at least one person there to confirm it.”
- See, “[Buddhahood Associated Controversies](#)” and “[Buddha Dhamma – A Scientific Approach](#).”

10. Even today, there are people with *abhiññā* powers that can see some of these beings in other realms. My teacher *Thero* says he can see them, and I have no reason to doubt them. Developing *abhiññā* powers requires being able to get to the fourth *jhāna* AND then working to develop those powers. So, it is not an easy task. If I ever get to that stage, I will mention that here.

- Developing *abhiññā* powers or even *jhānā* is not necessary to attain *Nibbāna*. One can even attain the *Arahanthood* without developing any *jhāna* ahead of time.
- It is important to experience the “cooling down” of *Nibbāna* even without getting to the *Sotāpanna* stage. That itself provides an incentive to continue with the practice; see, “[How to Taste Nibbāna](#).”

References

For those who would like to read more on this subject, the following references could be useful. However, I do not encourage anyone to “go off track.” I included this section to point out that all existing scientific theories are incomplete because they all were generated within the system. The Buddha was able to transcend “this world” and thus was able to provide a complete world view.

5.5.5 **Triune Brain: How the Mind Rewires the Brain via Meditation/Habits**

Revised December 20, 2016; September 21, 2020

The triune brain model of the brain is no longer widely discussed. However, it provides a simple way to look at three major functions of the brain, as we will see below.

Triune Brain – Three Major Components of the Brain

1. Triune means “consisting of three.” The human brain, which is the most advanced for all animals, shows how different animals have “different levels” of consciousness.

- The brain has three distinctive regions (see the figure below): (1) brain stem (labeled “reptilian” in the figure), (2) limbic system, (3) cerebral cortex or just cortex (labeled “neo-cortex” in the figure).
- Details in Ref. 1. We will summarize very basic features of the “three parts” of the brain.

Reptilian Brain (Brain Stem and the Cerebellum)

2. The brain stem (reptilian brain maybe a misnomer, since reptiles have limbic systems) is the most primitive and all developed animals have it. It governs automatic physiological functions such as the heart rate, respiration, digestion, etc.

- And that is all lowest-ranked animals can do (automatically). They are almost like fully-automated robots.

The Limbic System

3. Animals with somewhat higher intelligence have a limbic system in addition to the brain stem. But still no triune brain.

- It coordinates sensory reception, memory, and unconscious emotional reactions. These animals with the limbic system — like snakes and lizards — just react spontaneously to external influences.
- Humans tend to do that too. In case of a threat, the limbic system instantaneously and automatically makes the “fight or flight” decision. We could say that automatic *mano saṅkhāra* arise via the limbic system. See, “[Saṅkhāra – What It Really Means](#).”
- It is quite clear from the definition of an *Arahant* that even this instantaneous response can be completely tamed by cultivating wisdom (*paññā*), i.e., by following the eightfold path.

The Cerebral Cortex (Neocortex)

4. The cerebral cortex (learning brain; neo-cortex in the figure) is the most advanced part of the brain; it can make “rational decisions” by contemplation but it is time delayed. Therefore, it is called the “thinking brain.” The cortex is responsible for language capability, logic, reasoning, learning and critical thinking, the good stuff. All primates have it, but of course the humans have the largest.

- The cortex is responsible for language capability, logic, reasoning, learning and critical thinking, the good stuff. All primates have it, but of course the humans have the largest.
- The cortex is involved in generating *vacī* and *kaya saṅkhāra* that arise with a time delay. By controlling our *vacī* and *kaya saṅkhāra*, we have the ability to change our *gathi*. This is the “modern scientific rationale” behind the basis of Buddha Dhamma; see the “[Living Dhamma](#)” section.

5. All our sense inputs are processed in the cortex before they are sent to the *hadaya vatthu* or the “seat of the mind” that is located in the *gandhabba* close to our physical heart.

- Since it takes time for our brains to analyze the “incoming data”, normally there is about 100th of a second time delay between incoming sense inputs and our mind generating thoughts about that sense input.
- The brain can handle only one sense input at a time. This means it can handle only about 100 sense inputs in a second. So, even though our minds generate an initial response quickly, the follow-up “thoughts” are delayed due to this “processing delay” in the brain.
- I will discuss this in more detail (and it has been discussed in bits and pieces in the posts on the *gandhabba*, but the key point is that our actions and thoughts are “slowed down” by this pre-processing in the cortex.
- That pre-processing is minimal in even in “higher animals” with small cortexes, like dogs and apes. This is why humans are unique. We have a large cortex that not only slows down the response time, but also helps us “analyze the situation” rationally.

Ways to Improve Brain Functionality

6. Neural pathways in the brain strengthened by:

- Repeated application (meditation included). Repeated activity forms both good and bad habits as we discussed in several posts, and is the key in molding the character (*gati*); see, “[The Law of Attraction, Habits, Character \(Gati\), and Cravings \(Āsavā\)](#),” and other related posts.
- Good foods and regular exercise increase the production of Dopamine and other good chemicals.
- Exercise and meditate! It will keep you healthy and alert; see, “[‘Spark’ by John Ratey](#)” for information on the value of a good exercise program.

Brain Plasticity

7. Until about the late 1980s there was wide belief that one had just to live with the brain that one was born with. But since then the ability of the brain to change (neuroplasticity of the brain) has been demonstrated and studies on the effects of meditation on the brain have become an active research field.

- Of course, 2500 years ago the Buddha said that the mind is the precursor to everything. The mind does not arise from the brain. It controls all body parts, including the brain. See, “[Brain and the Gandhabba](#).”
- The key is that insight meditation should DRASTICALLY change neural wirings. However, there have not been any brain scans of someone who has cultivated the “correct versions” of *Satipaṭṭhāna* and *Ānāpānasati* meditation.
- There are other posts at the site which describe this “re-wiring” of the cortex that leads to change in our *gati*. See, for example, “[9. Key to Ānāpānasati – How to Change Habits and Character \(Gati\)](#).”

Effects of Meditation on the Brain

8. As shown in the references below, there is compelling scientific evidence that even mundane versions of meditation improve both the cortex AND the limbic system.

- Those studies show that basic *Samatha* meditation helps, but *Mettā Bhāvanā* (compassion meditation) is particularly effective.
- It must be noted that Tibetan *Samatha* (breath meditation) or *Mettā Bhāvanā* (mundane version) are *anariya* versions. For the *Ariya* versions, see, “[6. Ānāpānasati Bhāvanā \(Introduction\)](#)” and “[5. Ariya Mettā Bhāvanā \(Loving Kindness Meditation\)](#).” I am quite positive that a brain scan of an *Ariya* (Noble person) will yield more interesting results.

- For example, we also know that meditation affects breathing patterns (thus the brain stem). Therefore, meditation affects overall brain function. An *Arahant* can stop breathing for up to 7 days in *Nirodha Samapatti*. It will be extremely interesting to see a brain scan of an *Arahant*.

The malleability of the Neocortex and the Limbic System

9. The following case illustrates the complex role played by the brain. A developed left brain (of the neo-cortex) indicates compassion for others and enhanced happiness for oneself, and a relatively larger right side indicates aggressive character.

- Here is the link to a video showing the results of brain scans of an advanced meditator who had done loving-kindness meditation for a long period of time compared to 150 non-meditators.

[WebLink: YOUTUBE: Matthieu Ricard: The habits of happiness](#)

The discussion on the brain scan data is from about 17:00 to about 18:20 minutes if you don't want to watch the full video.

- We must also keep in mind that Tibetan loving-kindness meditation is an *anariya* version of the *Mettā Bhāvanā*; see below.

Humans Have Control Over Their Lives

10. Furthermore, we are not programmed by our genes, environment, or even our past *kamma*. However, all of those can affect our destiny. The most powerful is our mind. In other words, *citta niyama* dominates *kamma niyama*.

- As the saying goes, “you can do anything that you put your mind to.” This is the true basis of free will.

11. Even though the scientists are making some progress regarding the mind, the brain is not the mind, just as the physical eye is not the *cakkhu pasada rūpa*; see, “[Manomaya Kaya \(Gandhabba\) and the Physical Body](#),” and other related posts. Yet it is essential to keep the physical eye (and other physical sense faculties) as well as the brain in good condition for the whole body and the mind to work properly.

- Finally, the triune brain model is no longer widely discussed. However, it provides a simple way to look at three major functions of the brain.

5.5.6 How Habits are Formed and Broken – A Scientific View

Revised November 26, 2018

1. We are lucky to be in an age when many of the Buddha's teachings are not only confirmed but also strongly supported with additional evidence that were not possible during the time of the Buddha.

- This is another instance where the evidence is coming from research on the workings of the brain.

2. The Buddha basically said to follow the following procedure to break a bad habit and to instill a good habit:

- i. understand the reasons why a certain habit is bad,
- ii. stop engaging in activities that enhances the habit,
- iii. deviate the mind from such bad activities by focusing on opposing good activities,
- iv. contemplate on the “release” or “cooling down” that has already resulted by following the above procedure, strengthen the resolve to stay on course, and keep doing (i) through (iii).

With time, the bad habit(s) will go away and the good habit(s) will take hold. There comes a time when one will automatically follow this procedure; it becomes a “way of life.”

3. The reasoning behind is based on the key factors that we discussed in the previous posts; see, [“The Law of Attraction, Habits, Character \(Gati\), and Cravings \(Asavas\)”](#) and [“Habits, Goals, and Character \(Gati or Gathi\)”](#):

- We do many things automatically (i.e., without being mindful or without deliberate thinking); these are done via our habits that we formed during this life or even coming from previous lives.
- There are both good and bad habits. We want to keep and cultivate good habits and discard bad habits.
- Changing (cultivating) habits first require some “external adjustments” like one's physical environment, friends, etc and, more importantly, the four steps listed above.

4. Beginning in the early 1990's or so, scientific investigations in several fields (effects of meditation on the brain, behavioral studies on animals and humans, neurology, etc) have come to similar conclusions.

- We will discuss these in detail in the future, but here I want to just point out the main similarities. Furthermore, discussing how the mechanism takes place in the brain provides an alternative way to visualize these changes.
- We are indeed fortunate to live at a time when we have evidence from science to provide additional evidence.

5. As I pointed out in the posts on the *manomaya kāya* (*gandhabba*) and physical body, our physical body is “prepared” by the *kamma* seed that was the cause for this life. But the *manomaya kāya* is constantly making “adjustments” to the physical body based on the current status of the mind.

- Many *kamma vipāka* are “built-in” even at the conception; some may be avoidable by taking care of the body (exercise, food, etc), and the mind (contemplation, meditation, etc), but some may not be avoidable because they are so strong: We will never know when a cancer, an accident, or even a natural calamity can drastically change our lives; this is *anicca*, “the inability to maintain our lives the way we would like to.”
- Thus we need to spend at least sometime to work towards a meaningful solution to the “problem of existence.”
- Another factor we need to remember is that our “*sansāric* habits” are built-in to our brain. We keep changing/adding such habits as we grow up, influenced by our family, friends, and the society in general.

Thus one's "character" (*gati*; pronounced "gathī") are in constant flux, either by choice or influenced by the environment.

6. This is a key point: We need to make sure that we do not "go with the flow", i.e., let past *kamma* or our environment determine our future.

- As humans, we have the capability to change our destiny. We DO HAVE free will, unlike an animal. Since we do not know what our next existence is going to be, we need to make sure to get on the "right path" as soon as possible.
- Even 100 years of this life is NOTHING compared to trillions of years in the past and possibly billions of years life in "unknown territory" in the future; thus we need to make use of this opportunity.

7. As we discussed in the "[Truine Brain – How the Mind Rewires the Brain via Meditation/Habits](#)", only the humans have a developed neocortex, that makes possible "thinking, and decision making." The animals either do not have it, or have a primitive version of it.

- Therefore, the animals basically only use the "mid brain" or the "limbic system", where decisions are made FOR THEM according to their ingrained habits that have evolved over many, many lives (as we discussed, the physical body is formed based on the *manomaya kaya*). The response from the limbic system is instantaneous, and the animals can only REACT to external stimuli.
- All *sansāric* habits are built-in to the limbic system, and the animals react according to the way the limbic system is wired up; this may change some during growing up due to external environment, but the main "character qualities" (*gati*) do not change very much. That is why you see adorable dogs as well as vicious dogs. Even our pets have "a personality."
- We can change their personalities by teaching them things, but they are unable to do it on their own. It is easier to "teach" more evolved animals like monkeys because they have a bit of a neocortex.

8. But we humans have a neocortex that is well-developed and is capable of much more than we normally believe it to be capable of. **It is this neocortex that makes us, humans, different from animals (actually, it is more accurate to say that "our current *bhava*" is superior to an "animal *bhava*").**

- Even though we also REACT first, especially to a threatening stimuli, our "thinking brain" starts to kick in quickly, especially with training. Many people get into trouble because they are "REACTIVE", i.e., they do not try to develop the habit of using the "thinking brain."
- But we can be PROACTIVE. We can teach ourselves to "take corrective actions" even if we do some things on impulse. Even if the initial reaction to a sudden temptation is to "take it and enjoy it" or "hit him" or "kill that annoying dog", we can always take a breath, stop ourselves, and think about the consequences of such actions. This is what we call "mindfulness."
- Some people are more proactive than others even at birth (via *sansāric* habits). Some people change from being reactive to proactive or other way around even without knowing due to the particular environment they grow up in.
- The key point is that we can WILLFULLY change from being reactive to proactive; we all are reactive at least to some stimuli: the one's we have "*taṇhā*" for! In other words, we like to get attached to certain things and like to dislike other things with PASSION; see, "[Tanhā – How we Attach via Greed, Hate, and Ignorance.](#)"

9. In terms of science the key is in the neurons in the brain, and how we can train our neocortex to fire the right sets of neurons more frequently. The "frontal lobes" of the neocortex is the command center for brain activities.

- The frontal lobes can be visualized as the boss. If it is a lazy boss, it will just assign duties to the limbic system to carry out things "as usual."

- But if the boss is energetic and always looking for ways to “improve things”, then it will start investigating new approaches. And once better approaches are found, it will get them “hard wired” and they will essentially become the “new limbic system.”
- This is the key to “developing a new you” by discarding bad habits and developing good habits. Essentially you need to get the frontal lobes to be an active, energetic boss for the brain.

10. Dr. Jeffrey Schwartz is a psychiatrist specializing in treating Obsessive Compulsive Disorders (OCD), and has pioneered in using “habit makeovers” to treat OCD. He has written several books, but I highly recommend the two books, “The Mind and the Brain” and “You are not Your Brain.”

He has developed a “Four Step” method to change one’s habits that give rise to OCD:

1. Identify the problem area.
2. Recognize the need to change.
3. Deviate from automatically “going along” with old ways and re-direct attention to “new paths.”
4. Re-assess the situation, and keep working on accelerating the process.

11. He has kept records of brain scans of his patients which clearly show the improvements in the brain with time, and of course most patients are able to get rid of their compulsive behavior.

- The key is to slow down the “firing of neurons” associated with a bad habit and to increase the firing of neurons associated with an opposing good habit.
- There is a rule called Hebb’s rule that says, ‘neurons that fire together, wire together.’ The more one keeps doing a certain activity, a set of neurons start to fire together and that neural connection gets stronger by the day. It is just like strengthening one’s arm by “doing more liftings” with it.
- In the same way, when one is decreasing the use of a certain activity, the set of neurons allocated for that activity gets weaker, fewer neurons participate, and eventually it loses being a habitual act.

12. Here is a figure from Dr. Schwartz’s book, “The Mind and the Brain” (p. 362), that illustrates the “re-wiring” of a new network in the brain and the concomitant weakening of a network for an undesirable habit :

4 The quantum rules allow both states—“release” and “don’t release”—to co-exist. Early in therapy, however, the wave representing “release neurotransmitter” in the OCD circuit has a higher probability than the wave representing “release neurotransmitter” in the garden circuit. The patient is much more likely to go to the sink.

increases the probability that neurotransmitter will be released in that circuit, not the “wash” circuit.

5 By expending mental effort and thus unleashing mental force, however, the OCD patient is able, by virtue of the laws of quantum mechanics, to change the odds. Focusing attention on the “garden” thought

6 The OCD patient can now act on this thought and go to the garden. This increases the chance that, in the future, the “garden” circuit will prevail over the “wash” circuit.

7 If the patient regularly goes to the garden instead of the sink, neuroplasticity kicks in: brain metabolism changes in a way that strengthens the therapeutic circuit. As a result, future OCD urges are easier to overcome.

[WebLink: PDF file: Habit Formation Figure](#)

This figure explains how a patient who had an obsessive disorder to constantly wash his hand, got rid of that habit by WILLFULLY stepping outside to the garden when he got the urge to wash hands. As he kept doing it, the wiring to “wash hands” got weakened, and instead wiring for “stepping outside” got stronger, and eventually he lost the compulsive urge to wash his hands too often.

13. The same principle has been used to get rid of such annoying habits as well as serious disorders. We can use the same procedure to stay away from immoral habits and cultivating moral habits; this is the basis of “*ānāpāna*,” see, “[9. Key to Ānāpānasati – How to Change Character and Habits \(Gati\)](#).”

5.6 Inconsistencies with Science

Revised March 4, 2018; December 16, 2020

Previous title “Abhidhamma via Science”, renamed to “Inconsistencies with Science” on March 4, 2018. Reinstate on February 16, 2021 after revision at “[Abhidhamma via Science](#)”.

1. We all are impressed by the scientific advances made during the past 100 years or so making our lives easier and more productive. I am actually a cheerleader for scientific and technological advances.

- Physics had been my passion since high school days, and that changed when I started learning Buddha Dhamma several years ago.
- I still love and work on topics of interest in physics (and science in general). Fortunately, I am finding that those two interests are not mutually exclusive, and there is significant overlap. In fact, this section is the result of my two overlapping interests.

2. The following posts discuss cases where current theories of science are not consistent with Buddha Dhamma. I believe that science will recognize the primary nature of the mind in the future, and will discard the current notion that the mind (consciousness) arises out of inert matter.

- [Neuroscience says there is no Free Will? – That is a Misinterpretation!](#)
- [The Double Slit Experiment – Correlation between Mind and Matter?](#)
- [Vision \(Cakkhu Viññāna\) is Not Just Seeing](#)
- [Mystical Phenomena in Buddhism?](#)
- [Buddhism and Evolution – Aggañña Sutta \(DN 27\)](#)

Many other issues relating to life discussed in the section: “[Origin of Life](#)”

3. Despite the advances in science and technology, there is much about the human mind that science does not understand, and has not even begun to understand. **Western science is based on the five physical senses, leaving out the most important one, the mind.**

- At the present time, in 2016, scientists have the wrong view that consciousness originates in the brain.
- All scientific theories relating to the mind are based on this wrong hypothesis. However, Buddha Dhamma says not only that the mind is a sense of its own, but it is the most powerful of all six senses.

Here is a post from the Abhidhamma section that has a deeper analysis of the brain-mind connection:

[Brain – Interface between Mind and Body](#)

5.6.1 Neuroscience says there is no Free Will? – That is a Misinterpretation!

Revised April 22, 2016; revised November 15, 2019; September 6, 2020 (update at the end of the post)

Libet’s Experiment

1. In 1983, Benjamin Libet conducted an experiment **apparently showing** that our brain makes decisions before we become aware of it. When a person moves a finger, the brain activity appears to start before the person actually makes that decision.

- There have been numerous follow-up experiments since then. All those experiments seemed to confirm this observation, even though the time delays vary.

- Scientists and philosophers are quite puzzled and some are very worried that we are just zombies run by a program in our brain.

2. Here is a video clip that illustrates the basic experiment:

[WebLink: VIMEO: Neuroscience and Free Will](#)

Here is a recent youtube video on the same subject:

[WebLink: Youtube: Do humans truly have Free Will?](#)

Does Libet's Experiment Prove There is No Free-Will?

3. Since Libet published his results, scientists and philosophers have been debating whether these experiments show that man has no free will:

[WebLink: WIKI: Neuroscience of free will](#)

- Also, see the recent post, "[Mind Is Not in the Brain](#)" and follow-up posts at "[Buddha Dhamma – A Scientific Approach](#)"

Refined Follow-Up Experiments

4. The second recent experiment is a bit more refined. Let us summarize that experiment:

- The person randomly decides (no pre-planning) to press a button at some time. Let us take this time to be TM (M for the mind) making the decision.
- He presses the button at TF, which is recorded electronically (F for using the finger to press the button).
- At the same time that he decides to press the button, he is watching the clock and makes a mental note of the "time" and after hitting the button, records that time too: TE (E for using the eye to see the time on the clock. It is important to note that TE is the time that the MIND says it saw the clock).
- Finally, his brain activity is recorded by the sensors attached to his head. Let us take the recorded start of brain activity to be TB.

Here is a summary from the researchers (you can click on the figure to expand and then hit the back button on the browser to get back):

So, the researchers conclude that since brain activity started at TB before, either (i) him pressing the button (at time TF) , or (ii) him recording the "clock" **at the time TE when he made the decision**, the brain activity started before he made the decision.

- The problem is that they ASSUME that the time, TE, that one gets off the clock is the same as the time, TM, that the mind makes the decision to press the button.

Explanation From Buddha Dhamma

5. In Buddha Dhamma, the mind is the precursor to every action that we do with the body. The mind's decisions are implemented by the brain. The brain is just a very sophisticated computer.

- Buddha's explanation of the mind is very thorough. The basic ideas at "[Moral Living and Fundamentals](#)" and "[Essential Abhidhamma – The Basics](#)."
- More detailed analyses on how the mind and the brain work together at "[Buddha Dhamma – A Scientific Approach](#)," "[The Grand Unified Theory of Dhamma](#)" and "[Mental Body – Gandhabba](#),"
- Deeper aspects discussed in the "[Abhidhamma](#)" section.
- Some of the basic aspects are discussed below.

Brain Is The “Control Center”

6. The brain is the control center for the mechanical body to carry out both these tasks ASSIGNED BY THE MIND. The brain gets the finger to push the button and the physical eye to look at the watch.

- Now the mind is in the *manomaya kāya* and is lined up with the heart of the physical body. The mind and the brain are connected by a signal system that is analogous to how television or radio signals are transmitted (very fast, possibly electromagnetic). The brain communicates with the five senses via the nervous system, and those communications are slower.
- Thus the brain gets the message from the mind to “press the button” and to “watch the clock.” Thus TB is ALWAYS later than TM.
- Modern science has shown that, “It normally takes 0.4 – 0.6 seconds for the nervous system to activate available muscle motor units to contract,.....” (see, at the very end of the article: [WebLink: WIKI: Motor control](#)). The finger movement involves muscles in the arm, and the eye movement involves muscles in the head and the eye).
- Both actions of “watch the clock” and “press the button” are initiated by the brain (with the help of the central nervous system) per mind's instructions. The eye function circuitry can be logically thought to be a bit faster than the mechanical finger moving. Thus “watching clock” gets done first with the eye, and a little time later the finger has pushed the button. So, here is the time sequence per Buddha Dhamma (you can click on the figure to expand and then hit the back button on the browser to get back):

6. The mind initiates all movements of the body. Here, it is the mind that starts off the brain activity, i.e., TB is later than TM. The brain activity starts AFTER the mind decides to take action because the brain needs to

get the signal from the mind. The seat of the mind (*hadaya vatthu*) lies close to the physical heart, far away from the brain.

- Now the brain needs to carry out those two functions of pressing the button and look at the clock. The vision circuitry is faster. The mechanical movement of the fingers is slower (it involves moving muscles), and thus pushing the button happens a bit later.

Back to Libet's Experiment

7. **Now, let us go back to the first experiment.** The only difference here is that the person is not recording the time. He just presses the left or right button. So, there are just two events recorded now instead of three events. All we have to do is to remove TE from the above two graphs.

- It is simpler: His mind decides to push the button. The mind directs the brain to push either the left or right finger, and it takes some time for the brain to mobilize the muscles to move the finger. The time sequence is the same as in the same figure. The mind decides (TM), the brain starts working on it (TB), and the sensors attached to his head record that brain activity (wiggly line). Finally, the finger pushes the button (TF).
- As in the other experiment, **the mistake is to assume that finger pushing happens SIMULTANEOUS with the mind's decision.** But the mind only gets the brain (the computer) to initiate the complex sequence of events to work the muscles in the arm and hand to move the finger, and that is the lag time.

An Analogy

8. The body is like a mechanical instrument, say, a sophisticated tank that is used to fire at the distant object. The operator is like the mind. He aims the gun barrel using sophisticated computer-controlled circuitry and then fires the gun. He can drive the tank where ever he wants. But things do not, **and cannot**, happen simultaneously with the operator's decision. The gun needs to be moved into position before it is fired.

- The mind is controlling the body just like that. The finger (and the eye) in the above case(s) are just two instruments helping with the two tasks of pressing the button (and reading the clock), and the brain is the "control center" that oversees both those activities on the command of the mind.
- The connection between the body and the mind is explained in the post, "[Brain – Interface between Mind and Body](#)" and other posts on the *gandhabba*.

Thoughts Arise in Hadaya Vatthu, Not In The Brain

9. The "seat of the mind" (*hadaya vatthu*) is in the *manomaya kāya* (also called *gandhabba*). Thoughts arise there, not in the brain. The brain is a very sophisticated computer and controls the physical body per instructions given by the mind. At death, the *manomaya kāya* with the mind leaves the body and both the body and the brain become lifeless. See, "[Ghost in the Machine – Synonym for the Manomaya Kāya?](#)," "[Manomaya Kāya \(Gandhabba\) and the Physical Body](#)," and "[Manomaya Kāya and Out-of-Body \(OBE\) Experience](#)."

- Therefore, we are not robots controlled by a program running in our brain. The brain is just a sophisticated mechanical instrument that helps the mind with coordinating the tasks (like the computer in the tank in the above example that is helping the tank operator). But there are certain functions like breathing that the brain carries out without input from the mind. We will discuss those in an upcoming post soon.
- Any person has the POTENTIAL to do things in a scale that is unimaginable to us. We just do not realize the power of our minds; see, "[Power of the Human Mind – Introduction](#)," and the follow-up posts.

September 6, 2020 update:

There have been a few recent experiments that reduce the delay between TE and TF in #4 above. The following is the most recent paper on the subject: “[WebLink: sciencedirect.com: Sanford-Libet’s Intention Reports are Invalid-2020](https://www.sciencedirect.com/science/article/pii/S0010028520300000)”

- To quote from the abstract of the above paper: “..We argue that Libet’s intention reports are invalid and explore the phenomenology of intention in the Libet’s experiment.”

5.6.2 The Double Slit Experiment – Correlation between Mind and Matter?

Revised March 13, 2018; November 15, 2019

Introduction

1. The failure of the materialistic approach to explaining consciousness is becoming ever more apparent; see [Ref. 1](#) and [Ref. 2](#) below.
 - The materialistic approach, of course, is to explain mental phenomena to arise in the brain that is composed of inert matter.
2. A number of scientists/philosophers are hoping that quantum mechanics can come to the rescue ([Ref. 3](#), and [Ref. 4](#)).
 - They say that even though the deterministic Newtonian mechanics is unable to explain consciousness, quantum mechanics can (because quantum mechanics does not have such an apparent deterministic nature.)

Quantum Mechanics to the Rescue?

3. Quantum mechanics (QM) is different from other branches of physics where one can get an intuitive idea of what is taking place.
 - What we are currently doing with QM can be called a “black box” approach. When we apply the correct equations, we get the right results. Einstein did not like this at all. Yet, to his frustration, all his predictions of the inadequacy of QM did not materialize AND the predictions of QM have been correct to amazing accuracy.
4. Those experiments, the results of which can only be explained by QM, **appear to be** non-deterministic in nature.
 - This has compelled some scientists to investigate whether there is a connection between QM and the mind, which IS non-deterministic. Two experiments, in particular, have been at the forefront of these discussions. The “double-slit experiment” and the “Schrödinger’s cat experiment.”
5. My intent in this essay is to challenge the two prominent assumptions on this postulated relationship between QM and the mind:
 - i. Even if QM and the mind are non-deterministic in their own rights, there is no special reason to believe that there is an apparent connection between them.
 - ii. There is nothing really “non-deterministic” about QM, other than the indeterminacy depicted by the Heisenberg uncertainty principle. That is just on the accuracy of a given measurement.

Quantum Mechanics Is Not Intrinsically Psychophysical

6. Let us look into (i) first. Henry Stapp is a leading physicist who argues that quantum theory will ultimately provide an explanation for consciousness. In his book, “Mindful Universe” he says (p.2), “... quantum theory itself is intrinsically psychophysical as designed by its founders, and as used in actual scientific practice, it is

ultimately a theory about the structure of our experience that is erected upon a radical mathematical generalization of the laws of classical physics.”

- My basic point is that quantum theory is NOT psychophysical; there is no way to accommodate “subjectivity” in QM. Where is the “mind connection” in the theory of QM?
- There are others who work on theories that try to explain consciousness as arising from quantum effects in the brain; see, for example, “Conversations on Consciousness”, by Susan Blackmore (2006). No one has clarified how these theories make the connection between “psyche” and “physical” in “psychophysical.”

The “Observer Effect” in QM

7. Let us review one experiment that has become the main demonstration for the “observer effect” in QM, the “double-slit experiment.” Here is a short video by Dr Quantum to illustrate the “paradox” of the double slit experiment:

[WebLink: YOUTUBE: Dr Quantum Double Slit Experiment](#)

8. The two main points of this experiment are:

- a. the particles behave like waves when both slits are open, and
- b. this “wave nature” goes away when the path of the particle is “observed” or monitored.

Bohmian theory of Quantum Mechanics

9. There is a version of QM called the Bohmian theory or the Pilot Wave theory that was developed by the late David Bohm. It does use Schrodinger’s equation which is used to track the propagation of a “pilot wave.” That theory is explicitly non-local, i.e., quantum entanglement is built-in.

- With this theory, each solution of the wave equation describes a DETERMINISTIC path for the particle, and the statistical average agrees with the experiments and the results of the standard QM calculations.
- The actual trajectories have been harder to measure not because of a “mind effect,” but because observation can disturb the particle trajectory itself. Recent experiments have been conducted to “weakly” measure a system without appreciably disturbing the trajectories. Those experimental results are consistent with the predictions of Bohmian theory ([Ref. 5](#)).

Thus the role played by Bohmian mechanics in these “QM experiments” is just like the role statistical mechanics played in thermodynamics.

- Here is a very short video showing INDIVIDUAL trajectories for a double-slit experiment calculated using the Bohmian theory. There is nothing “mysterious.” **Each particle has a definite trajectory. There is no “observer effect.”**

[WebLink: YOUTUBE: Bohmian Trajectories in the Double-Slit Experiment](#)

- When it is attempted to observe the path of an individual particle, the coherence of the system or the pilot wave is disturbed and the interference pattern goes away. Thus there is no “observer effect,” in the sense of bringing “subjectivity” in.

“Schrödinger’s Cat” Thought Experiment

10. Another famous experiment that has been the subject of much discussion is the “Schrödinger’s cat” thought experiment. This experiment suggested by Schrödinger back in 1935, involves a cat in a closed chamber.

- A radioactive sample in the chamber, if undergoes decay within a given period of time, triggers the release of a hammer that breaks a vial of a toxic gas that kills the cat. If a conscious observation is required to collapse the wave function, then the fate of the cat is not known until the box is opened. Unfortunately, both the consciousness-based and consciousness-free interpretations of quantum measurement are indistinguishable to the observer outside the box.
- In 2006, an actual experiment was conducted to simulate this experiment. It was reported that “... measurement alone, rather than conscious observation of measurement, is sufficient”; see [Ref. 6](#).

No Real “Observer Effect”

11. Thus there is no real “observer effect” in the double-slit experiments or in the Schrödinger cat experiment.

- In the double-slit experiment, what an “observer” does is to disturb the coherence of the system, if the disturbance is strong. It does not matter whether the “observer” is human or a mechanical device (in most cases it is non-human); one ALWAYS gets the same result. This is in contrast to real subjective situations. For example, in the stock market, complex subjective decisions are made by millions of people.
- So, where does the “objectivity” or “intention” – in the sense of the mind affecting the experimental result – come from? “Intent to monitor” is not really a significant subjective decision; just a simple “yes” or “no.”

12. Therefore, it is clear that there was no evidence for “subjectivity” in those experiments even before Bohmian mechanics or the Schrödinger’s cat experiment. Those two pieces of evidence really make that point undeniable. There is no evidence of the mind affecting the outcomes of those experiments.

The Mind Creates Matter, Not the Other Way Around

13. The Buddha stated that the mind is at the forefront; “[Manopubbangamā Dhammā..](#)” A deeper *Abhidhamma* analysis is available at “[The Origin of Matter – Suddhatthaka.](#)”

- Even though mind affects matter and even CREATES matter, science has not advanced enough yet to confirm that.

14. There has to be a paradigm change in science to explain consciousness. **Any theory based on matter and attempt to treat mental phenomena as a byproduct will not succeed.** The mind is the more fundamental entity and takes precedence over matter.

- Some philosophers are beginning to sense this reality. Even though he does not appear to know anything about Buddha Dhamma, philosopher Thomas Nagel says the following. “The great advances in the physical and biological sciences were made possible by excluding the mind from the physical world... ..But at some point it will be necessary to make a new start on a more comprehensive understanding that includes the mind.” ([Ref. 1](#), p.8). Then on p. 15, “...The possibility opens up of a persuasive conception of the natural order very different from materialism – one that makes mind central, rather than a side effect of physical law.”

Consciousness and Quantum Mechanics

March 13, 2018: I have started a new section “[Quantum Mechanics and Dhamma](#),” where a new interpretation of quantum mechanics is presented, and it is discussed why a connection between quantum theory and consciousness **will not be possible**.

5.6.3 Vision (Cakkhu Viññāṇa) is Not Just Seeing

July 15, 2016; revised October 19, 2020

Introduction

1. In 1988, Dee Fletcher almost died due to carbon monoxide poisoning. Her husband found her unconscious just in time to save her life. However, when she recovered, she had lost "sight" in the normal sense of the word.

- She could not see and recognize someone standing right in front or read a book.

2. But soon she realized that she had some peculiar abilities. She could grab a pencil from the hand of a person who held it in front of her, even though she could not actually "see" the pencil or the person.

- Her vision is good enough for picking something up, but not good enough for seeing it!

Dee Fletcher's Case Provided Many Clues on Vision

Since then researchers have done numerous experiments on her, which have led to some astonishing findings of how vision works.

- For example, they tested her with a mailbox with a narrow slit for inserting letters. Even though she could not see the mailbox — let alone the slit or the envelope — she could insert the letter in the slot without any effort. Even when they tilted the slit, she did not have a problem at all! It was as if a phantom inside her was doing that task for her.

3. Another ability of Dee was to be able to walk around the house without bumping into furniture or walls. Since that ability could be due to her familiarity with the house, they took her to an unfamiliar trail and she did not have any problem walking there without tripping over rocks or bumping into trees.

- This disorder is known as **visual agnosia**.
- It turns out that there are two relatively independent visual systems in the brain: One for conscious perception (**visual cortex**), which was severely damaged in Dee. The other was for unconscious control of action (**superior colliculus**), which is largely preserved.

Two Ways of Visual Processing

4. The following figure shows the optical nerve splitting and connecting to those two areas in the brain.

You can download the figure [here](#).

5. The presence of two streams of visual processing in the brain had been known only since 1982. Even though the role of the **visual cortex** in the brain (in producing a “picture in the mind”) had been known before that, the role of a second processing area in the brain (**superior colliculus**) that helps with figuring out the “depth of vision” or how far a given object was proposed in 1982 by Leslie Ungerleider and Mort Mishkin.

- Of course, their model helped explain the symptoms experienced by Dee Fletcher. She had parts of her visual cortex damaged by the carbon monoxide poisoning, while her superior colliculus was left mostly intact. Her eyes were sending the signals to the visual cortex, but the damaged visual cortex could not process that signal.
- By the way, you do not need to know the details of the visual cortex, superior colliculus, or any other technical term to get the idea that I plan to convey. I do not know details about them either.

How Vision Happens – Still a Mystery for Science

6. Of course, scientists are only aware that those two areas in the brain **contribute** to those two functions. They do not know exactly how the visual cortex gleans information about what the object is (i.e., its visual characteristics.) Also, it is not known how the superior colliculus figures out the dimensions of the object and how far it is at (in order to correctly grab an item both types of information are needed).

- We need to realize that there is “no light” going to the visual cortex and there is no screen at the back of the head that displays the object in question. The optical nerve only transmits a chemical (and electrical) signal. **The visual cortex somehow generates a “picture” for our minds to see.**
- Even more mysterious is how the **superior colliculus figures out the depth of vision** just from that chemical signal coming through the optical nerve.
- We will come back to these issues in upcoming posts, but first, let us continue with our discussion on what the scientists know at this time and how they found them.

Further Details of Dee Fletcher’s Case

7. There are many research papers that describe experiments involving Dee Fletcher, and the two principal researchers have written a book on this research: “Sight Unseen – An Exploration of Conscious and Unconscious Vision” by M. A. Goodale and A. D. Milner (2004).

- The above book is a bit expensive. Chapter 4 of V. S. Ramachandran's popular book, "Phantoms in the Brain" (1998) provides a less technical description. That book also describes some other interesting findings of the brain. I hope to discuss a couple of those observations (particularly his and others' work on "phantom limbs") in future posts.
- There is also a Wikipedia article on the [WebLink: WIKI: Two-streams hypothesis](#) on vision.

8. The book by Goodale and Milner also describes a visual problem that is the opposite of that of Ms. Fletcher. This syndrome is called the "**optic ataxia**," and those who have it can "see" and recognize objects very well, but they have difficulty in actions involving objects.

- Those who suffer from optic ataxia, for example, can see the mail box and the slit described in #2 above. However, they have much difficulty in putting a letter through the slit.
- It turns out that these people have their superior colliculus damaged, but the visual cortex works fine.

How Does the Mind Figure out the Distances to Objects Around Us?

9. Have you thought about how we can move around without bumping into each other and other objects like trees on the ground and cars on the road? The presence of the two processing streams can BEGIN TO explain how the brain figures out not only "what is in front of us (a human, tree, or a car)" but also "how far is it at and how big it is."

- As mentioned above, part of the signal going through the optical nerve to the visual cortex deals with the first task, and the other part going to the superior colliculus deals with the "how far and how big" issue.

10. Even though scientists have figured out that those two areas in the brain (visual cortex and the superior colliculus) somehow extract the two kinds of information, **they have absolutely no idea how those areas extract that information from the chemical signal that comes through the optical nerve.**

- Scientists do know that the lens in an eye projects an image of the object to the back of the eye (retina); see the figure above. It is pretty much the same as an image you can see with a lens:

This is pretty much how a camera captures an image:

How Can a Chemical Signal Provide the Perception of Sight (and Light)?

11. Of course, the film in an old camera undergoes some chemical changes when the image falls on it. Then that film is chemically processed to reveal the picture.

- In the same way, when the image of an object falls on the retina of an eye, the cells on the retina generate a chemical (and electrical) signal. The optical nerve transmits this signal to the visual cortex and the superior colliculus in the brain. There is no “picture” transmitted to the brain.
- So, how does the visual cortex generate a visual of the object starting with the chemical signal that comes from the eye?
- Even more puzzling is how the superior colliculus figures out the distance to the object (and the dimensions of the object), solely based on that same signal.

12. Even within the visual cortex itself, there are 30 different areas specialized to carry out different tasks. They all help provide a “comprehensive picture” of the object.

- For example, the area called V4 deals with the color of the object, but does not care about the direction of motion.
- On the other hand, area MT (also called V5) responds to targets in the visual field based on their direction of motion, but does not care about the color of the object. Specialized sub-areas in the visual cortex carry out multiple tasks.

The brain is Not a Computer – It Can Change

13. Brain is indeed a very sophisticated machine! However, as we will find out in upcoming posts, it is not a typical machine like a computer. **It can change on its own!**

- **While a computer cannot get rid of parts that go bad, the brain can indeed replace or repair bad parts and even make new parts in some cases** (however, when a whole section is damaged, like in the case of the visual cortex or superior colliculus such a rejuvenation is not possible). This is what is puzzling the neuroscientists right now. **They have confirmed that these things happen (I will discuss examples in future posts), but have no idea HOW the brain does that.**
- The key to this puzzle is the following. Our “mental body” or the *gandhabba* controls the physical body. The *gandhabba* has three components: *kammaja kāya*, *cittaja kāya*, and the *utuja kāya*. **It is actually the *cittaja kāya* that plays the dominant role in CHANGING brain functions.** In other words, it is OUR THOUGHTS that can change the brain!
- Ultimately, one attains *Nibbāna* by gradually transforming one’s own brain. **In other words, getting rid of greed, hate, and ignorance can change one’s brain!** However, even a Buddha can only show the way, and one has to make the effort.
- The four types of bodies that we have and the *gandhabba* are discussed in the section “[Gandhabba \(Manomaya Kāya\)](#).” The key functions of the *cittaja kāya* are also discussed in the post, “[Udayavaya Ñāna – Importance of the Cittaja Kāya](#).”

Buddha Dhamma and Science – a Symbiotic Relationship

14. We live in a truly opportune time to comprehend the value of Buddha Dhamma. Modern science provides clues that can be used with Buddha Dhamma to clarify many issues and vice versa. See, “[Buddha Dhamma – A Scientific Approach](#)” and “[Quantum Mechanics and Dhamma](#).”

- In this series of posts, I hope to suggest some such avenues for scientists to explore, based on Buddha Dhamma, which can also explain many of these “new findings.”
- As I have mentioned many times, attaining *Nibbāna* does not require such details. However, for most people, future confirmation of such “predictions” hopefully will help build confidence in Buddha Dhamma, and to appreciate its value.

- Of course, the real value of Buddha Dhamma is not in exposing such mundane things, but showing the path to liberation from suffering (*Nibbāna*). But it is good to have faith in Buddha Dhamma, so that one can feel confident that one is not wasting one's precious time in learning Buddha Dhamma.

VI Elephants in the Room

February 28, 2022

The goal is to highlight the obvious contradictions in current English (and other languages) translations of key concepts in Buddha Dhamma.

- I call these “elephants in the room” because these obvious contradictions have gone unnoticed for all these years. It is a puzzling phenomenon because it is not necessary to have knowledge of Pāli to see some of these contradictions. Even a child should be able to see some of these contradictions!
- Note that there are several posts within each section and some of them branch out to even more posts.

First Elephant: “[Elephant in the Room 1 – Direct Translation of the Tipitaka](#)”

Second Elephant: “[Elephant in the Room 2 – Jhāna and Kasiṇa](#)”

Third Elephant: “[Elephant in the Room 3 – Ānāpānasati](#)”

6.1 Word-for-Word Translation of the Tipiṭaka

Ānāpānasati Not About Breath – Icchānaṅgala Sutta

6.1.1 Elephant in the Room 1 – Direct Translation of the Tipiṭaka

February 28, 2022; revised March 1, 2022 (#2)

Direct (word-for-word) translation of *Tipiṭaka suttas* is a major problem. Many people are confused by contradictions that inevitably arise due to this practice.

“Elephant in the Room”

1. To quote Wikipedia: “The expression “the elephant in the room” (or “the elephant in the living room”) is a metaphorical idiom in English for an important or enormous topic, question, or controversial issue that is obvious or that everyone knows about, but no one mentions or wants to discuss because it makes at least some of them uncomfortable and is personally, socially, or politically embarrassing, controversial, inflammatory, or dangerous.” See, “[WebLink: en.wikipedia.org: Elephant in the room](http://en.wikipedia.org: Elephant in the room).”

- Even though the Pāli *Tipiṭaka* remains intact, these days Buddha’s teachings are NOT communicated correctly. After many years of writing an English website on Buddha Dhamma and participating in discussion forums, the root cause has slowly dawned on me. **The main problem is the word-for-word translation of the *suttas*.**
- I have pointed out this problem in several posts during the past few months. Even after providing clear evidence, many people seem to ignore this “elephant in the room.” **I then realized that many people**

do not have the basic understanding necessary to see the problem! They simply don't see the elephant. Thus the need for this series of posts.

- ***Tipiṭaka* was not translated word-for-word to any language until the 1800s.** That practice started with European scholars in the 1800s trying their best to understand the vast amount of Pāli and Sanskrit texts found in India, Sri Lanka, and many other Asian countries.

2. For example, a direct translation of the *Tipiṭaka* to the Sinhala language took place only in 2005. The *Tipiṭaka* had remained in the Pāli language (written with Sinhala script) since first written down in 29 BCE (2000 years ago). [[WebLink: ocbs.org: The Historical Authenticity of Early Buddhist Literature - A Critical Evaluation](http://ocbs.org: The Historical Authenticity of Early Buddhist Literature - A Critical Evaluation) by Alexander Wynne - Page 37.]

- During that time, *bhikkhus* clarified key concepts with long discourses or written commentaries. Many *suttas* in the *Tipiṭaka* are in a highly-condensed form (*uddesa* version) suitable for oral transmission ([Ref. 1.](#)) That was necessary because the *Tipiṭaka* was transmitted orally in the first 500 years after the passing away of the Buddha.
- Deep concepts in those *suttas* were explained to the general public in their native languages by *bhikkhus*. Furthermore, three commentaries were composed in Pāli during the time of the Buddha. Per the Sinhala version of those three commentaries, one was the work of Ven. Sāriputta and the other two attributed to Ven. Mahākaccāna (or Mahākaccāyana.)
- About 200 years after the passing away of the Buddha (i.e., about 2300 years ago), Ven. Mahinda in Sri Lanka started writing commentaries in the Sinhala language (Sinhala *Atthakathā*.)
- When writing on leaves became more widespread (but still tedious) around 2000 years ago, an assembly of *Arahants* wrote down the Pāli *Tipiṭaka* together with the three original commentaries. That constitutes the about 60 volumes of the *Tipiṭaka* that we have today.

Mahāyāna Influence on Theravāda

3. Within 500 years of the passing away of the Buddha, the Indian *Mahāyānists* started not only refining but incorporating concepts that were alien to *Theravāda* Buddha Dhamma.

Those who started this revision process tried to make things “simpler” and “innovative” by replacing *anicca* and *anatta*. So, they defined those in their terms (*anitya* and *anātma*) and then got into a slippery slope in explaining those terms by inventing more concepts. It snowballed, and in the words of Edward Conze, who translated many *Mahāyāna* texts to English ([Ref. 2](#)):

- “.....About 100 BCE (roughly 400 years after the Buddha's *Parinibbāna*), many Buddhists in India felt that the existing statements of the doctrine had become stale and useless. They were convinced that Dhamma required new re-formulations to meet the needs of new ages, new populations, and new social circumstances. So they set out to produce new literature, which ultimately came to be known as *Mahāyāna* Buddhism. The creation of this literature was one of the most significant outbursts of creative energy known to human history and sustained for about four to five centuries. Repetition alone, they believed, cannot sustain a living religion. Unless counterbalanced by constant innovation, it will become fossilized and lose its life-giving qualities, they believed”.

Poor Status of Buddhism in the 1800s

4. To complete the historical background relevant to this discussion, let me quickly summarize the sad status of Buddhism in the 1800s.

- The invasions by the Portuguese, Dutch, and finally the British spanned over four centuries starting in 1498; see “[WebLink: en.wikipedia.org: Portugues' presence in Asia](http://en.wikipedia.org: Portugues' presence in Asia).” That led to a drastic decline of Buddha Dhamma (Buddhism) in all Asian countries (Sri Lanka, India, Burma, Thailand, etc.)

- Buddhism was non-existent in India by the 1800s. However, *Mahāyāna* Buddhism arose in India just 500 years after the Buddha and flourished for several centuries. **Within those heydays of *Mahāyāna* Buddhism, it corrupted *Theravāda* Buddhism in Sri Lanka and other Asian countries.** See [Ref. 2](#).
- The following video is in the Sinhala language. It provides an account of the restoration of *Ruwanvalisāya*, one of the largest *stupās* in Sri Lanka. That project took many years and was completed with assistance from the British Governor in Sri Lanka at that time. You can see the status of Buddhist temples and *stupās* in the 1800s before their restoration:
[WebLink: youtube: History of Ruwanwelisaya \(in Sinhala\) | ඉතිහාසයේ අලුතෙන් ගොඩනැගුණු නාමාවිහාරය](#)
[Naranvita Sumanasara Thero](#)
- A picture of *Ruwanvalisāya* in the early 1800s is at @1:10 minutes. By 1869, a small residence for *bhikkhus* had been built (@1:30 mins.) Even by 1921, complete restoration had not taken place. Also, see the Wikipedia article, "[WebLink: en.wikipedia.org: Ruwanwelisaya](#)."

Revival of Buddhism Starting in the 1800s

5. In the 1800s Buddhism underwent a period of revival due to the efforts of some British civil servants.
- They found many key Buddhist sites like Lumbini and even the Asoka pillars in India in ruins. They also found a vast number of Sanskrit texts in India and Pāli texts in Sri Lanka, Burma, etc.
 - Those civil servants made a coordinated effort to collect the vast historical documents found in the Asian countries. Those included not only *Tipiṭaka* documents but *Mahāyāna* and *Vedic* documents as well. Scholars in European countries tried to sort them out and figure out those new concepts.
 - **However, even *Theravāda bhikkhus* had already made the mistake of mistranslating *anicca* and *anatta* to be the same as Sanskrit *anitya* and *anātma* by that time.** That was due to the influence of the *Mahāyāna* Buddhism just 500 years after the Buddha; see #4 above and in [Ref. 3](#).

The Book “In Search of the Buddha” by Charles Allen

6. To get an idea of how those European pioneers struggled to interpret the inscriptions on Ashoka pillars and the vast collection of Pāli and Sanskrit texts, I highly recommend the book, “In Search of the Buddha” by Charles Allen (2003). His family had been in India for generations serving in the British governments, and he was born in India.

- The book has a lot of information and pictures of many historical sites in India before their restoration. For example, a photo of The *Mahābodhi* Temple taken in 1799 is on p. 147.
- It is truly fascinating to read about the efforts of those who dedicated their lives to the effort of uncovering Buddha Dhamma. Even though not shown in that book, historical sites in Sri Lanka and other Buddhist countries were also dilapidated, as shown in the video of #3. Charles Allen's book focuses on India.
- **Those civil servants/European scholars were largely responsible for the current revival of Buddhism.** However, they inadvertently solidified some key damages previously done to *Theravāda* concepts (especially misinterpretation of *anicca* and *anatta*), of course unintentionally.

Imagine the Task of Deciphering Three Novel Religious Concepts Written in Two Foreign Languages!

7. There were Sanskrit documents in India. No Pāli documents on *Theravāda* or Sanskrit documents on *Mahāyāna* were found in India.

- Mostly, Pāli texts on *Theravāda* were found in Sri Lanka. Sanskrit texts on *Mahāyāna* as well as Pāli texts on *Theravāda* were found in other Asian countries. See, “[WebLink: en.wikipedia.org: Sanskrit Buddhist Literature](http://en.wikipedia.org: Sanskrit Buddhist Literature).”
- The enormity of the task faced by those European scholars becomes apparent when one realizes that three sets of different concepts were involved in *Theravāda*, *Mahāyāna*, and *Vedic* texts.
- Many academics in European universities then started translating the *Tipiṭaka* to English, German, and French languages. They needed to learn the concepts of Buddhism (as well as Pāli and Sanskrit languages) from “local experts,” but at that time, there were no *bhikkhus* with in-depth knowledge of Buddha Dhamma.
- **That is when the practice of translating the *Tipiṭaka* word-for-word to another language started.**

Academic Credentials Not Enough to Teach Buddha Dhamma

8. Those European scholars truly did their best to interpret the vast collection of historical documents. Those efforts are well-documented in Charles Allen’s book. **Professor Rhys Davids was among those scholars, and most current interpretations are based on his work.**

- Following the original translations by Rhys Davids, Eugene Burnouf, and others, contemporary Sinhala scholars like Malalasekara (a doctoral student of Rhys Davids) “learned” Buddhism from the Europeans and thus started using wrong interpretations.
- Other Sinhala scholars like Kalupahana and Jayathilake also learned “Buddhism” at universities in the United Kingdom (received Doctoral degrees on Buddhism) and wrote books in English and Sinhala.
- Of course, scholars in other Buddhist countries did the same in their languages, and the incorrect interpretations spread throughout the world.

9. I hope I have provided enough information to contemplate why the opinions of “scholars” are likely to be wrong due to reasons beyond their control. Again, I admire and appreciate what Rhys Davids, Burnouf, Muller, and others did those days, and it was not their intention to distort Buddha Dhamma. It is not the fault of current scholars either.

- **To emphasize, one needs to learn Buddha Dhamma from a true disciple of the Buddha who has attained at least the *Sotāpanna* stage.**
- Academic credentials mean NOTHING as far as teaching Buddha Dhamma is concerned. With all due respect to those European scholars, they DID NOT understand the key message of the Buddha. That message is that the rebirth process is filled with suffering, and the goal of a true Buddhist is to stop the rebirth process and attain *Nibbāna*. See, “[Basic Framework of Buddha Dhamma](#).”

Summary and Future Posts

10. The description above provides the necessary historical background.

- The main point that I will focus on in the upcoming posts is the following: **Confusion caused by the word-for-word translation of the *Tipiṭaka*.** I will address that in detail in the next post.
- Of course, those European scholars who started that practice had no idea it was the wrong approach.
- Within the past 20 years or so, the correct interpretations of the *Tipiṭaka* started to circulate. Explanations by Waharaka *Thero* became increasingly widespread, first in Sri Lanka and then in other countries by Sri Lankans who resided in those countries.

11. How was Waharaka *Thero* able to make those correct interpretations?

- Waharaka *Thero* was a *jāti Sotāpanna*, as he had declared. Once one attains the *Sotāpanna* stage, one would not lose that deeper understanding through future lives.
- However, Waharaka *Thero* was more than just a *jāti Sotāpanna*. A *Sotāpanna* may not have the ability to explain concepts to others, even if they understand them. That is a unique ability of only those with “*Paṭisambhidā Ñāṇa*.”

12. How can we trust those interpretations to be correct?

- **Just as in modern science, the ultimate test is self-consistency.** The *Tipiṭaka*, compiled AND written down by *Arahants*, is fully self-consistent. **Therefore, any interpretation must be self-consistent within the *Tipiṭaka* as well.**
- I will first show that most current interpretations are blatantly self-contradictory. Even a child can see those contradictions. I will first provide many instances of such contradictions.
- Then I will also show that the interpretations of Waharaka *Thero* are entirely self-consistent.
- I welcome comments at the discussion forum.

3. “[Misinterpretation of Anicca and Anatta by Early European Scholars](#).” I will expand that analysis later in this series.

6.1.1.1 Niddesa (Brief Description) of Paṭicca Samuppāda

March 7, 2022

Niddesa version (Brief Description) of *Paṭicca Samuppāda* provides a bit more clarity than the *uddesa* (utterance) version. We discuss the *niddesa* version in this post.

Three “Elephants in the Room”

1. During the emergence of *Mahāyāna* (with Sanskrit literature) around 2000 years ago had distorted meanings of keywords like *anicca* and *anatta*. Misinterpretation of *Ānāpānasati* as “breath meditation” by Buddhaghosa got incorporated into *Theravāda* Buddhism about 1500 years ago.

- Buddha Dhamma (Buddhism) came out of yet another recent dark period of 300-400 years thanks to the efforts of some British civil servants and European scholars starting in the 1800s. However, they (unintentionally) made those earlier distortions permanent using the newly discovered printing press. Furthermore, they started the practice of translating the Pāli *Tipiṭaka* word-for-word to English.
- The adoption of wrong interpretations of keywords like *anicca* and *anatta* due to the influence of *Mahāyāna* would be ONE issue to tackle. Misinterpretation of *Ānāpānasati* as “breath meditation” is the SECOND. I have discussed those two issues in the past but will address them again in this series of posts.
- Before that, I need to address the more urgent THIRD issue that resulted from translating the *Tipiṭaka* word-by-word. Most of these contradictions can be seen even by a child without any knowledge of Pāli. **That is what I will call the FIRST “Elephant in the Room.” It is impossible to translate the *Tipiṭaka* word-for-word and convey the embedded deep concepts.**

The First “Elephant in the Room”

2. The following verse (**in the *uddesa* form**) is from the “[WebLink: suttacentral: Dutiyabodhi Sutta \(Ud 1.2\)](#)”. The Pāli version of the corresponding verses are in [Ref. 1](#):

“In the second part of the night, he reflected on dependent origination in reverse order:

When this doesn’t exist, that is not; due to the cessation of this, that ceases. That is: **When ignorance ceases, choices cease. When choices cease, consciousness ceases. When consciousness ceases, name and form cease. When name and form cease, the six sense fields cease. When the six sense fields cease, contact ceases. When contact ceases, feeling ceases.** When feeling ceases, craving ceases. When craving ceases, grasping ceases. When grasping ceases, continued existence ceases. When continued existence ceases, rebirth ceases. When rebirth ceases, old age and death, sorrow, lamentation, pain, sadness, and distress cease. That is how this entire mass of suffering ceases.”

- The second translation at Sutta Central is almost the same: “[WebLink: suttacentral: The Second Discourse about the Awakening Tree.](#)”
- Such translations have existed for many years without anyone asking questions about their apparent incorrectness.

Insane Discussions in Discussion Forums

3. There is a recent ongoing discussion at Dhamma Wheel: “[WebLink: dhammawheel.com: Do Arhats experience contact with their sixfold sense media? What about vedanā?](#)” It is a clear example of the confusion caused by such translations. The participants are understandably confused by translations like in the *sutta* in #2 above.

- The translation in #2 plainly says that when ignorance (*avijjā*) is not there, choices (*saṅkhāra*), **consciousness (*viññāṇa*), and the rest of the entities cease to exist.**
- We all agree that the Buddha and *Arahants* do not have even a trace of *avijjā* (ignorance about the Four Noble Truths) left.
- Then, according to the translations in #2 above, they would not generate any more *saṅkhāra* and **would not have consciousness (*viññāṇa*).** That means they would essentially not be living! **That is what confused those people in that discussion forum in the above link.**
- On the contrary, we know that the Buddha lived for 45 years after Enlightenment. He experienced all six sensory faculties, used them optimally, and had the best mind. He could recall any event in the past as far as he desired. But he also felt all types of *vedanā*, including bodily *dukkha vedanā* (he had back problems and once was injured by Devadatta).

4. So, where is the problem? Is that *sutta* wrong?

- The *sutta* is perfectly fine. **Such problems arise when translators start translating Pāli suttas word-for-word without paying attention (or not understanding) to the basic concepts in Buddha Dhamma.**
- The critical point here is that many *suttas* are in the highly-condensed *uddesa* version. There are THREE levels of explanations as discussed in “[Sutta Interpretation – Uddesa, Niddesa, Patiniddesa.](#)”
- The *niddesa* form provides a slightly expanded version. Then the *paṭiniddesa* form provides details with examples. **If someone tries to translate the *uddesa* version to English word-for-word, that leads to severe problems as we saw in #2 and #3 above.**
- Many keywords have different usages depending on the context. For example, *viññāṇa* cannot be translated as “consciousness” for all cases because there are many types of *viññāṇa* (for instance, *vipāka viññāṇa* and *kamma viññāṇa* are two VERY different types.) One needs to know which kind of *viññāṇa* a given *sutta* discusses.

How Can One Learn *Paṭicca Samuppāda* by Reading These Translations?

5. There are “[WebLink: suttacentral: 32 results for avijjā AND nirodhā AND saṅkhāranirodho](#),” meaning there are at least 32 *suttas* with the INCORRECT verse of [Ref. 1](#). **Many of the *suttas* in this list are from the *Saṃyutta Nikāya* 12, discussing *Paṭicca Samuppāda*.** I don't see how anyone can learn *Paṭicca Samuppāda* by reading those English translations!

- In all those instances, the standard verse in *Paṭiloma* (Backward) *Paṭicca Samuppāda*, “*avijjā nirodhā saṅkhāranirodho, saṅkhāra nirodhā viññāṇa nirodho*,” is translated to English as “**When ignorance ceases, choices cease. When choices cease, consciousness ceases...**”
- Did the Buddha lose consciousness upon attaining the Buddhahood? Does an *Arahant* lose consciousness when reaching the *Arahanthood*? On the contrary, we know that the Buddha lived for 45 years after the Enlightenment, and many *Arahants* lived for long times after *Arahanthood* teaching *Dhamma* to others.
- The problem is worse because it does not matter who the translator is. All English translations I have seen have the exact direct, word-for-word translation.

The problem of Word-for-Word Translations Is Much Deeper

6. Of course, the problem is much more severe. Even the *Anuloma* (Forward) *Paṭicca Samuppāda* is incomprehensible with such word-by-word translations.

- The *sutta* in [Ref. 2](#) (and all the *suttas* of the list in #5) states: “*avijjā paccayā saṅkhārā, saṅkhāra paccayā viññāṇam*..” which they translate as “Ignorance is a condition for choices. Choices are a condition for consciousness..”
- There are MANY types of *saṅkhāra*. Some arise due to *avijjā*, but *Arahants* who have no *avijjā* generate other types of *saṅkhāra*.

What Are “Choices” and “Volitional Formations”?

7. Another problem is translating *saṅkhāra* as “choices” and “volitional formations.” No one has explained what those words mean. Here is an instance where that question came up and a “non-answer” was given: “[WebLink: discourse.suttacentral.net: Explaining saṅkhāra= “choices.”](#)” Here is another discussion that ended without a resolution: “[WebLink: dhammadownload.com: The way I analyzed Saṅkhāra](#).”

- *Mano saṅkhāra* (defined as *vedanā* and *saññā*) arises with any sensory event. Thus any *vipāka viññāṇa* would have *mano saṅkhāra*.
- However, *saṅkhāra* in “*avijjā paccayā saṅkhārā*” are *abhisāṅkhāra*. We accumulate *kamma* based on our thoughts, speech, and actions based on *abhisāṅkhāra*. That is the *niddesa* explanation. Thus, *kamma viññāṇa* arise due to *abhisāṅkhāra*.
- I have explained the above in detail in the *paṭiniddesa* version in many posts previously, but we will discuss them again here in upcoming posts.
- Only *kamma viññāṇa* cease to arise for an *Arahant*. They do experience *vipāka viññāṇa*.

8. Stated in another way, anyone (even without a basic understanding of Buddha Dhamma) can do word-for-word translations. It is just a matter of keeping a dictionary by the side and translating word-by-word. **But that leads to utter confusion, as we saw above.**

- Many standard dictionaries are those compiled by early European scholars like Rhys Davids. They had no understanding of Buddha's profound teachings. They learned Pāli (and Sanskrit) from the locals and then translated the *Tipiṭaka* word-for-word!

- Think about that. That is equivalent to saying that anyone who understands French and English can translate a textbook on medicine from French to English! Would that make sense?

Niddesa Version of Explanation

9. The steps in the *Paṭiloma Paṭicca Samuppāda* (in the *sutta* of #2 above) are in the “utterance (*uddesa*)” form. That is to recite the 11 steps. Those steps need explanations in either the *niddesa* (brief descriptions) or the *paṭiniddesa* (detailed explanations.)

- We can begin to see some clarity in the *niddesa* version below, which is the next level of explanation. This version uses more specific types of *saṅkhāra*, *viññāṇa*, etc.

10. In the ***niddesa version***, the steps would be: “.. when *avijjā* ceases ***abhisāṅkhāra*** cease, when ***abhisāṅkhāra*** cease ***kamma viññāṇa*** cease, when ***kamma viññāṇa*** cease ***nāmarūpa*** cease, when ***nāmarūpa*** cease ***saḷāyatana*** cease, when ***saḷāyatana*** cease ***samphassa*** cease, when ***samphassa*** cease ***samphassa-jā-vedanā*** cease, when ***samphassa-jā-vedanā*** cease ***taṇhā*** cease, when ***taṇhā*** cease ***upādāna*** cease, when ***upādāna*** cease ***bhava*** cease, when ***bhava*** cease ***jāti*** cease, when ***jāti*** cease ***jarāmaraṇaṃ sokaparidevadukkhadomanassupāyāsā*** cease.” That is the end of the whole mass of suffering.

- We are beginning to see some clarity on the question discussed at the Dhamma Wheel forum in #3 above.
- All those terms in orange WILL cease to exist for an *Arahant*. But the *Arahant* WILL experience *vipāka viññāṇa* (ordinary consciousness via the six senses) and normal feelings (*vedanā*) that arise with such consciousness, for example.
- Of course, *jāti* refers to future births in the *Uppatti Paṭicca Samuppāda*. All births (including the one that *Arahant* was born to) will undergo old age, decay, suffering, and eventual death. Thus even an *Arahant* will be subjected to them until the death of the physical body. But no more births and no more suffering after that!

11. Note that I have not translated key Pāli words to English in #10 above. In many cases, there are no equivalent English words!

- **It is only *kamma viññāṇa* that would stop arising for a Buddha or an *Arahant*. Ordinary consciousness (*vipāka viññāṇa*) would be there until their death (*Parinibbāna*).**
- Of course, the reader needs to know what is meant by ***kamma viññāṇa*** and ***vipāka viññāṇa***. See, [“Abhisāṅkhāra Lead to Kamma Viññāṇa.”](#)

Why Don’t Others See the “Elephant in the Room”?

12. How is it that such apparent contradictions have gone unnoticed for so long? We may never fully understand that. But I think it is due to several factors.

- Many people who turn to Buddhism may accept certain concepts without bothering to even look for inconsistencies. Some may think Buddhism has some “mystical features” that they are not supposed to question.
- Another is people’s high respect towards *bhikkhus*/scholars who have written “books” on Buddhism. While honoring *bhikkhus* is undoubtedly an exemplary aspect, the Buddha taught not to believe even his own words without asking questions to clarify any doubtful concept.
- **But the main reason most English-speaking people do not “see the elephant” is the following.** Most simply don’t understand that words like *saṅkhāra* and *viññāṇa* cannot be just translated word-by-word as “formations” and “consciousness.” They do not even have a basic idea of *Paṭicca Samuppāda*. I will be spending most time clarifying these basic concepts in this series. **But we all need first to agree that there is a problem!**

- Recent comments in discussion forums have led me to conclude the above. No matter how obvious the error that I point out, they say, “Oh, I just believe so and so.” They will not even acknowledge that there is a problem. I say something like, “Person X says 2 plus 3 is 6 – Is that not a contradiction?” They ignore that and start commenting about an entirely different issue.

Concept of *Paṭicca Samuppāda* in Simple Terms

13. It will be quite beneficial to understand the basic framework of *Paṭicca Samuppāda*.

- In the next post, I will explain that using simple examples. As the Buddha instructed, one needs to grasp the concepts. Memorization of words/verses is of no benefit.

6.1.1.2 Idappaccayatā Paṭicca Samuppāda – Bhava and Jāti Within a Lifetime

March 14, 2022

Idappaccayatā Paṭicca Samuppāda explains the accumulation of *kammic* energies within the current life. One is “born” in various temporary “existences” numerous times during a lifetime. Understanding that helps clarify how future rebirths arise.

Introduction

1. As I have explained in recent posts, keywords in the *Tipiṭaka* require detailed explanations. Many *suttas* (particularly those with deep insights) need detailed explanations. The practice of translating such *suttas* word-for-word to English has led to dangerous results, as I have explained in recent posts in [“Word-for-Word Translation of the Tipiṭaka.”](#)

- In the [“WebLink: suttacentral: Mahānidāna Sutta \(DN 15\),”](#) the Buddha advised Ven. Ānanda to learn how life evolves moment-to-moment based on the causes and conditions AT a given moment.
- That may not be clear from the English translation in the above link. That again goes back to the problem of translating word-for-word without understanding the basic concepts.

2. Translation of the verse, “*Atthi idappaccayā viññāṇan’ti iti puṭṭhena satā, ānanda, atthiṭissa vacanīyam*” in the above link is: “When asked, ‘Is there a **specific condition** for consciousness?’ you should answer, ‘There is.’”

- “**Specific condition**” is the English phrase used in that translation for “*idappaccayā*.”
- However, “*idappaccayā*” comes from “*ida*” + “*paccayā*” meaning “**based on the conditions at that time.**”
- Thus, the correct translation should be: “When asked, ‘**Is there a viññāṇa arising due to conditions at that time?**’ you should answer, ‘There is.’”

Idappaccayatā – At a Given Moment

3. *Idappaccayatā Paṭicca Samuppāda* (IPS) is another essential teaching that remained hidden for hundreds of years. The word “*Idappaccayatā*” comes from “*ida*” for “here,” and the closest English word for “*paccayā*” is “condition.” **Thus *Idappaccayatā* implies “based on this condition at this moment.”**

- Therefore, *Idappaccayatā Paṭicca Samuppāda* describes how “*paṭi icca*” leads to “*sama uppāda*” moment by moment based on the conditions present at that moment; see, [“Paṭicca Samuppāda – ‘Pati+ichcha’ + ‘Sama+uppāda.’”](#)
- The additional “p” in “*idappaccayatā*” comes from the combination of “*ida*” and “*paccayā*.” This is similar to “*dhammacakka*” and “*pavattana*” combined to yield “*dhammacakkappavattana*” in the *Dhammacakkappavattana Sutta*.
- The following verse in [“WebLink: suttacentral: Avijjā Sutta \(AN 10.61\)”](#) provides more insight.
“The first point of ignorance, *bhikkhus*, cannot be seen. **Ignorance can arise at any time when the conditions are right.**” (Pāli verse: “*Purimā, bhikkhave, koṭi na paññāyati avijjāya: ‘ito pubbe avijjā nāhosi, atha pacchā samabhavīti. Evañcetaṃ, bhikkhave, vuccati, atha ca pana paññāyati: ‘idappaccayā avijjā’ti.’*”)
- In the same way, EACH TERM in *Idappaccayatā Paṭicca Samuppāda* arises at any given moment.

4. The standard *Uppatti* (or *Upapatti*) *Paṭicca Samuppāda* discusses how *avijjā* leads to future existences (*bhava*) and births (*jāti*). That is the only *Paṭicca Samuppāda* that most people are aware of these days. **But that version shows the cumulative effects of numerous *Idappaccayatā Paṭicca Samuppāda* cycles!**

- As the Buddha explained to Ven. Ānanda in the *Mahānidāna Sutta* in #1 above, it is beneficial to understand the operation of *Paṭicca Samuppāda* DURING a lifetime, moment-to-moment.
- Before that, we first need to realize that there are TWO main categories of *viññāṇa*, and only one comes to play in *Paṭicca Samuppāda*.

Numerous Types of Viññāṇa Arise in a Day!

5. We have numerous types of *viññāṇa* arising in a day! They are mainly of TWO main categories: *vipāka viññāṇa* and *kamma viññāṇa*.

1. Each sensory input (seeing, hearing, tasting, smelling, touching, recalling) is a *vipāka viññāṇa*. They are *cakkhu, sota, ghāṇa, jivhā, kāya, and mano viññāṇa*. We don't pay much attention to many of such *vipāka viññāṇa*.
 2. But we "attach" to some of *vipāka viññāṇa* we start generating *kamma viññāṇa*, which can be of two types: *vacī and kāya viññāṇa*. Even though *mano viññāṇa* also falls in this category, only *vacī* and *kāya viññāṇa* lead to a significant generation of *kammic* energies.
- Only *kamma viññāṇa* generating *kammic* energies are involved in the "*saṅkhāra paccayā viññāṇa*" step in any type of *Paṭicca Samuppāda*. See, "[Viññāṇa – Two Critical Meanings](#)."

Viññāṇa in Paṭicca Samuppāda Are Kamma Viññāṇa

6. All initial steps in *Idappaccayatā Paṭicca Samuppāda* working in real-time (moment-to-moment) provide the basis for the working of other types of *Paṭicca Samuppāda*.

- Accumulation of *kamma bhava* (*kammic* energy for future existences) happens over numerous such *Idappaccayatā Paṭicca Samuppāda* cycles taking place over a lifetime and even over many lifetimes. Then birth in such an existence (*uppatti bhava*) can occur in the future.
- A given person has a specific set of *gati* (pronounced "gathi") over a given time, and their thoughts/speech/actions lead to the accumulation of *kammic* energies (*bhava*) related to those *gati*.
- For example, person X with violent *gati* tends to think, speak, and act violently, engaging in harsh speech and violent actions. X will regularly generate *kammic* energies through such thoughts, speech, and actions. Such *kammic* energies lead to appropriate *bhava*, such as that of a vicious animal like a tiger, leading to rebirth (*jāti*) as such an animal in the future. That is the basic principle of *Uppatti Paṭicca Samuppāda*. That *Uppatti Paṭicca Samuppāda* is the standard *Paṭicca Samuppāda* in most textbooks today.
- *Uppatti Paṭicca Samuppāda* is a result of numerous *Idappaccayatā Paṭicca Samuppāda*.

7. Therefore, it is critical is to realize the importance of understanding the working of *Paṭicca Samuppāda* during a lifetime, i.e., *Idappaccayatā Paṭicca Samuppāda*.

- We also need to see that X will NOT always think, speak, act that way. There will be times when X is interacting with his family. During such times he will think loving thoughts and speak and act with caring thoughts. Those involve "good" *mano, vacī, and kāya saṅkhāra*.
- It is easy to see how X will change from a "bad person" (in #6 above) to a "good person" when the conditions change.
- If X sees one of his enemies on the road, he will get into a "bad state of mind." He will start *Idappaccayatā Paṭicca Samuppāda* cycles first with generating evil thoughts (*mano* and *vacī abhisāṅkhāra*) and thus "bad *kammic* energies."
- But when X goes home, he will see his family and start generating opposite types of *mano, vacī, and kāya saṅkhāra*. They may even engage in "good activities" like participating in a volunteer project or

providing meals to the hungry. During such activities, “good” *Idappaccayatā Paṭicca Samuppāda* cycles will operate.

Triggering of *Idappaccayatā Paṭicca Samuppāda*

8. The starting of an *Idappaccayatā Paṭicca Samuppāda* cycle ALWAYS starts with **sensory input** (*ārammaṇa*). The example given in #7 above began with X **seeing** his enemy, say Y.

- Let us take another example, where X gets into a similar *Idappaccayatā Paṭicca Samuppāda* (IPS) cycle triggered by an *ārammaṇa* coming through the ears.
- Suppose X is at home and is having a pleasant conversation with his wife. During the conversation, the wife mentions Y. Just hearing Y’s name could trigger X to recall some bad memories of Y. Thus, X may start telling his wife about his interactions with Y.
- Just **hearing** Y’s name made X’s mind go through numerous IPS cycles within a short time. Let us look into that.

9. Hearing of Y’s name was a *sota viññāṇa*. X heard Y’s name because his wife was talking about something, and she may have mentioned Y’s name, saying that “I saw Y while ...”

- That was enough for X’s mind to have a flashback at prior experiences with Y. Now, if strong feelings about Y emerge, X may start describing to his wife how bad a person Y is.
- While having that conversation with his wife, X will recall his experiences with Y and start getting agitated. If his wife encourages that, he will get “worked up.” The two of them may even begin discussing how to hurt Y. If that happens, both will go through many IPS cycles accumulating more *kammic* energies!
- Even though they are not doing any physical harm to Y, just the generation of *vacī abhisāṅkhāra* will generate *kammic* energy! See, “[Correct Meaning of Vacī Saṅkhāra](#).”

Abhisāṅkhāra Versus *Saṅkhāra*

10. *Saṅkhāra* that arise via “*avijjā paccayā saṅkhāra*” are *abhisāṅkhāra*; see the previous post, “[Niddesa \(Brief Description\) of Paṭicca Samuppāda](#).”

- ***Abhisāṅkhāra* are *saṅkhāra* with *lobha, dosa, moha* (*avijjā*).**
- **For example, an *Arahant* speaks with *vacī saṅkhāra*.** Such *vacī saṅkhāra* DO NOT have *cetanā* with *lobha, dosa, moha*.
- *Cetanā* WITH *lobha, dosa, moha* are *sañcetanā* (“*sañ*” + “*cetanā*”). **Thus, *abhisāṅkhāra* have *sañcetanā* (“*sañ*” + “*cetanā*”) or “defiled intention.”** An *Arahant* would not generate *abhisāṅkhāra* via *sañcetanā*; they only generate *cetanā*.

11. Now let us go back to our discussion in #9. While X and his wife engage in IPS, they automatically go through all the steps in *Paṭicca Samuppāda*. As we see, while they discuss how to hurt Y, *abhisāṅkhāra* arise via *avijjā*! They do not realize that such *abhisāṅkhāra* will lead to future suffering.

- As they make plans, a future expectation of “hurting Y” is established, and that is the “*kamma viññāṇa*” arising via “*saṅkhāra paccayā viññāṇa*” or more precisely “*abhisāṅkhāra paccayā kamma viññāṇa*” in the *niddesa* version.
- Their plan to hurt Y may involve telling some lies about Y to the friends of Y. They may talk about specific friends of Y, and “mental images of friends of Y” come to the minds of the two of them. In IPS, those are the “*nāmarūpa*” in “*viññāṇa paccayā nāmarūpa*.” In an extreme case, they may plan to hurt Y physically, and any weapons used will be discussed with images of such weapons going through their minds. Those are also types of “*nāmarūpa*” in IPS. Note that “*nāmarūpa*” in *Uppatti Paṭicca Samuppāda* (UPS) has a different meaning; see, “[Viññāṇa Paccayā Nāmarūpa](#).”

- Later on, when they implement their plan, they will also use other sensory faculties. For example, if they go and purchase a weapon, that involves all six faculties. That is “*nāmarūpa paccayā salāyatana*.”

Bhava in This Life and for Future Lives

12. Since they will be using the sensory faculties with an angry mindset, all sensory contacts become “*samphassa*” (“*san*” + “*phassa*”) or **defiled contacts with *dosa* (anger/hate.)** Then they lead to “*samphassa-jā-vedanā*” or **angry feelings based on hate.** See, “[Vedanā \(Feelings\) Arise in Two Ways.](#)”

- That, in turn, leads to “getting attached” to that effort even more. That attachment (via anger) is also *taṇhā*. See, “[Taṇhā – How We Attach Via Greed, Hate, and Ignorance.](#)”
- Once attached to an *ārammaṇa*, a mind stays on it, keeping it close. That is the “*taṇhā paccayā upādāna*” step. In the above example, X and his wife will now focus on ways to hurt Y. Their minds will go through numerous cycles of the above steps generating more *kammic* energy. That is the “*upādāna paccayā bhava*” step.

13. That *kammic* energy will produce two effects.

1. Part of it will **fuel an “angry *bhava*” in this life.** Both of them have created “angry *bhava*” and are now “born in an “angry state.” Thus, “*bhava paccayā jātī*” has already taken place. That is *jāti* in IPS.
 2. The rest of the *kammic* energy created will be preserved in *viññāṇa dhātu* as “**fuel for future *bhava*.**” Such *kammic* energies can bring future births in matching existences. That is *jāti* in UPS.
- Both types of “*jātī*” will lead to more suffering. That is the last step in PS in both IPS and UPS cycles.

That is a brief description of ***Idappaccayatā Paṭicca Samuppāda***. It may be a good idea to go back and read the previous post “[Niddesa \(Brief Description\) of Paṭicca Samuppāda.](#)” That will help solidify the understanding.

Better Not to Translate the Pāli Terms

14. ***Paṭicca Samuppāda* is not an exotic process. While it can go to great depths, the basic principles are simple.** However, one needs to truly understand the meanings of the 11 terms: *avijjā*, *saṅkhāra*, *viññāṇa*, *nāmarūpa*, *salāyatana*, *phassa*, *vedanā*, *taṇhā*, *upādāna*, *bhava*, and *jāti*.

- It is a big mistake to try to translate those terms word-for-word. There can be variations in the meaning of a word based on the situation.
- The Sinhala language DOES NOT even have its own words for those 11 terms. The same words (අවිජ්ජා, සංකරා, විඤ්ඤාන, නාමරූප, සලායතන, ආසාදන, වේදනා, තණ්හා, ආරාධනා, භවා, ජාති) are used in the Sinhala language. **That has been a blessing because it leads to less confusion** even among those who may not fully understand the concepts.
- That is why I have tried to use the original Pāli words as much as possible in my posts. In discussing *Paṭicca Samuppāda*, it is almost impossible to use English words to convey the actual concepts. That is why I try to use the Pāli words wherever possible.

6.1.1.2 Change of Mindset Due to an Ārammaṇa

.2

March 21, 2022

Idappaccayatā Paṭicca Samuppāda starts with an *ārammaṇa* or a sensory input.

Numerous Changes of Mindset in a Day

1. Think about how many times our “mood” or “mindset” changes in a day.

- Consider person X eating a meal and experiencing a good mindset; he enjoyed the food. That mindset arose due to an *ārammaṇa*, which was the **taste** of the food.
- Suppose halfway through the meal, X **saw** a long hair on the plate. For some people like X, that new *ārammaṇa* of “seeing the hair on the plate” is enough to ruin the meal and get into an angry mindset. Suppose X was eating at a restaurant, and he called the waiter and angrily complained.
- The waiter apologized and promised to bring X a fresh meal. Soon as X **heard** that, he again became happy. X finished his meal and came out of the restaurant with a happy and content mindset.
- While walking, X saw one of his worst enemies, Y. The **sight** of Y brought in a new “strong *ārammaṇa*” changed X’s mood again. He started thinking about the problems that person had caused and he got angrier by the minute.

2. As you see, our mindset and related thoughts change many times during the day. The examples that we discussed above can be explained via *Idappaccayatā Paṭicca Samuppāda*, which we discussed in the previous post: [“Idappaccayatā Paṭicca Samuppāda – Bhava and Jāti Within a Lifetime.”](#)

- Each of the mindsets discussed above resulted from a new *ārammaṇa* coming through one of the six senses.
- In chronological order, those mindsets were triggered by **tasting** food (*jivhā viññāṇa*), **seeing** the hair (*cakkhu viññāṇa*), waiter **saying** that he will get a fresh serving (*sota viññāṇa*), and **seeing** Y (*cakkhu viññāṇa*).
- **All those triggers were *vipāka viññāṇa* or different types of “consciousness.”** They happened to be that way. The meal could have been not tasty; if you didn’t see the hair, that would have avoided you getting into an angry mindset, etc.

Pāli Word for “Mindset” Is “*Bhavaṅga*”

3. The word “*bhavaṅga*” comes from “*bhava*” + “*aṅga*” where “*bhava*” means “existence” and “*aṅga*” means “part of.” Thus, “*bhavaṅga*” means “part of existence at that time,” which is the “mindset at that time.” [*aṅga* : [nt.] 1. a constituent part; 2. a limb; 3. quality.]

- There is also a “**natural *bhavaṅga***” that we are born with. If the mind is not focused on a “strong *ārammaṇa*” the mind falls back to that “natural *bhavaṅga*.” Thus, we can say that our mind is in the “natural *bhavaṅga*” state while we sleep.
- However, once we wake up and start getting bombarded with all kinds of *ārammaṇa* coming through the six senses, our “mindset” or “**temporary *bhavaṅga***” can change many times a day, as we saw above.
- I will be using “mindset” and “temporary *bhavaṅga*” interchangeably so that you will get used to the meaning.
- **Now you can start seeing the difference between *Upapatti* PS and *Idappaccayatā* PS.** In the former, “*bhava*” refers to “human existence,” while in the latter, “a temporary *bhava*” is the mindset (or existence) lasting a relatively short time.

Only “Strong *Ārammaṇa*” Can Bring in a “Temporary *Bhavaṅga*”

4. During a day, we get bombarded with an uncountable number of *ārammaṇa*, i.e., sensory inputs coming through the six senses. Yet, we don’t pay attention to most of them, i.e., they are “**weak *ārammaṇa***” not strong enough to “grab our attention.” In such cases, there is no change in the “*bhavaṅga*” or “mindset.”

- So, what kind of *ārammaṇa* “grabs our attention” and changes the “*bhavaṅga*” state?

- That would be one we “really like,” “really dislike,” or “something unusual or something we cannot understand.” In the latter case, we could get into a “confused state of mind.” A “**strong ārammaṇa**” is **usually associated with “lobha,” “dosa,” and “moha.”**
- Let us examine the examples in #1 to clarify.

5. Taste of food was a “strong ārammaṇa” that changed the mindset from the “natural bhavaṅga” state to a good “temporary bhavaṅga” state. Here, the ārammaṇa was associated with lobha (attachment via liking.)

- Then another “strong ārammaṇa” of “seeing the hair” flipped the mindset to an angry “temporary bhavaṅga” state. That ārammaṇa was associated with dosa (attachment via dislike.)
- Hearing the waiter promising to bring a new meal was new “strong ārammaṇa” made a good “temporary bhavaṅga” again. That ārammaṇa was associated with lobha (attachment via liking.)
- Seeing Y on the road was enough for X to get into a bad state of mind (with dosa) again.

6. **To summarize:** Our minds usually are in the “natural bhavaṅga” state that comes with human existence. It can change to a different “temporary bhavaṅga” by a “strong ārammaṇa.” Depending on how strong that ārammaṇa is, the “temporary bhavaṅga” can stay for minutes to hours to many days.

- In the examples discussed above, “temporary bhavaṅga” states lasted only for short times, less than an hour. In the Abhidhamma language, such ārammaṇa are categorized as “**mahantārammaṇa**” (“mahanta + ārammaṇa” or “**strong ārammaṇa**.”)
- However, a **very strong ārammaṇa** can keep that “temporary bhavaṅga” state for many days. For example, upon hearing the death of a parent, one may get into a “sad mindset” that can last even weeks. They are “**very strong ārammaṇa**” or “**atimahantārammaṇa**” (“**ati** + mahanta + ārammaṇa.”)

How Does an Ārammaṇa Change the Mindset (Bhavaṅga)?

7. It is CRITICALLY important to understand how the mindset (temporary bhavaṅga) changes due to an ārammaṇa.

- As we discussed, a new ārammaṇa comes via a new sensory input coming through the six senses. Thus, it is one of the following: cakkhu, sota, ghāna, jivhā, kāya, or mano viññāṇa. **They are ALL vipāka viññāṇa.** They provide sensory input. We see, hear, taste, smell, touch, or recall a memory. That, by itself, cannot change our mindset.
- For example, an Arahant will also see attractive things or taste a delicious meal. But no matter how delicious that meal is, it will NOT change the mindset of an Arahant.
- But the person in our example in #1 above got “attached” to the tasty meal. That is normal for an average human, and so are the other “mood swings” that the person went through in #1. But it is essential to understand how each of those swings in the mindset took place.

8. Delicious taste from the meal was a vipāka viññāṇa, specifically a jivhā viññāṇa. The pleasant taste experienced was a natural **vipāka vedanā** associated with that vipāka viññāṇa. If an Arahant had eaten the same meal, he would have experienced its delicious taste. **But what happens immediately after taking the first few bites would be very different for X and the Arahant.**

- X got attached to the taste of the meal. In the Dhamma language, he started generating vacī abhisāṅkhāra that naturally would arise for an average human. **He started thinking about how delicious the meal is AND how he might come back to the restaurant to have the same meal.** Those thoughts were lobha-based (i.e., greedy) **vacī abhisāṅkhāra**. They were a strong version of saṅkhāra, i.e., abhisāṅkhāra. Thus, they arose via “avijjā paccayā abhisāṅkhāra” in Idappaccayatā Paṭicca Samuppāda.

- That immediately led to the second effect of “deciding to come back to the restaurant in the future to have the same meal.” That expectation is a **kamma viññāṇa**. That *kamma viññāṇa* or the “expectation” was the result of *abhisāṅkhāra*, i.e., “(abhi)saṅkhāra paccayā viññāṇa.”

9. **Those *abhisāṅkhāra* and *kamma viññāṇa* arose in powerful *javana citta* that ran through X’s mind** while he was enjoying the meal. His mindset (temporary *bhavaṅga*) also changed to a “happy state.”

- So, here is the time sequence: (i) experience of a delicious taste (*vipāka viññāṇa*), (ii) arising of “happy but greedy thoughts” or *vacī abhisāṅkhāra* in *javana citta*, (iii) arising of a future expectation of having the same meal (creation of a *kamma viññāṇa*), and (iv) registration of that experience as a “temporary *bhavaṅga*” state.
- **Note: *Javana citta* are a special type of *citta* that makes a *kamma viññāṇa* more than just “consciousness.” A *kamma viññāṇa* has an expectation/desire.** *Abhisāṅkhāra* (with strong feelings) arise in *javana citta* and make *javana citta* become *kamma viññāṇa*.
- As we know, ***vipāka viññāṇa* are of six types: *cakkhu*, *sota*, *ghāna*, *jivhā*, *kāya*, and *mano viññāṇa*.**
- On the other hand, ***kamma viññāṇa* are ALWAYS *mano viññāṇa*. We create *kamma viññāṇa* with *javana citta*.** Such *kamma viññāṇa* arises via “(abhi)saṅkhāra paccayā viññāṇa” in any type of *Paṭicca Samuppāda*.

No Change in Mindset (and No *Javana Citta*) in an *Arahant*

10. Now, let us see what would happen to an *Arahant* if he had the same meal.

- The *Arahant* would have tasted the meal to be delicious too. Thus, the *vipāka viññāṇa* (*jivhā viññāṇa*) was the same.
- But since an *Arahant* would not generate any *lobha*, *dosa*, *moha* thoughts, *vacī abhisāṅkhāra* that arose in X will not occur in the *Arahant*. **Thus, such powerful *javana citta* would not have arisen in the *Arahant*.**
- Thus, the *Arahant* will not generate any future expectation to taste it again, i.e., **no *kamma viññāṇa*.**
- Furthermore, the *Arahant* **would not generate a “happy mindset” “temporary *bhavaṅga*” state.** An *Arahant* will always have a neutral mindset.

11. Thus, *abhisāṅkhāra* in *javana citta*, establishing a new expectation (*kamma viññāṇa*), and change in the *bhavaṅga* (mindset) will occur ONLY IF one attaches to a strong *ārammaṇa*.

- Those are the drastic differences between X and an *Arahant* due to eating the same meal.
- In the next post, we will discuss why such *javana citta* with *lobha*, *dosa*, *moha* would not arise in an *Arahant*.
- It is critical to realize that **an *Arahant* does not need to control the arising of such defiled thoughts.** It happens automatically. The root causes for arising of such thoughts had been removed from the mind of an *Arahant*.

6.1.1.2 **Khandhā in Idappaccayatā Paṭicca Samuppāda**

.3

March 28, 2022

We never experience a single unit of cognition, but only *khandhas* or the cumulative effect of millions/billions of such units. That is why instead of *rūpa*, *vedanā*, *saññā*, *saṅkhāra*, *viññāṇa* some *suttas* refer to “heaps of them” called *khandhas*, i.e., *rūpakkhandha*, *vedanākkhandha*, *saññākkhandha*, *saṅkhārakkhandha*, and *viññāṇakkhandha*.

Five Aggregates in Different Contexts

1. As we know the five aggregates (*pañcakkhandhā*) are *rūpakkhanda*, *vedanākkhandha*, *saññākkhandha*, *saṅkhārakkhandha*, and *viññāṇakkhandha*. As is the case with many Pāli words, we need to understand the meaning of a “*khandha*” or a “collection/aggregate” in the context of where it is used.

- As we discussed, *Idappaccayatā Paṭicca Samuppāda* explains how our actions at the PRESENT moment can impact our future.
- The Buddha described our “mental aspects” with four entities: *vedanā*, *saññā*, *saṅkhāra*, and *viññāṇa*. **Those mental entities arise when internal *rūpā* make contact with external *rūpā*.** Thus, *rūpa* is the fifth category in the five aggregates of *rūpa*, *vedanā*, *saññā*, *saṅkhāra*, and *viññāṇa*.
- But why do we talk about the “aggregates” (or “*khandha*”) of those entities?
- The reason is that we NEVER experience a single such entity **even at a given moment**. Thus, we only EXPERIENCE the effect of numerous such entities (*khandha*) even in *Idappaccayatā Paṭicca Samuppāda*.

We Experience Not a *Citta* but *Viññāṇakkhandha*

2. There is no English word for “*citta*.” A “thought” may have billions of *cittā*. Furthermore, **each *citta* evolves into *viññāṇa* and we experience the effect of billions of them called *viññāṇakkhandha*.** Let us discuss that in detail.

- We NEVER experience a “pure *citta*.” Instead, we only experience the cumulative effect of billions of *viññāṇa* that arise within a fraction of a second. That is why many *suttas* refer to “collections of *viññāṇa*” or “*viññāṇakkhandha*.”
- The same is true for *vedanā*, *saññā*, and *saṅkhāra*. We never experience single units of them, but only “aggregates” of them, i.e., *vedanākkhandha*, *saññākkhandha*, and *saṅkhārakkhandha*.
- Even though a sensory event may be initiated by a *rasa rūpa* (taste) we may be smelling it at the same time (*gandha rūpa*). The appearance of food (*vaṇṇa rūpa*) will affect our thinking too. Furthermore, the next bite may taste a bit different, even though it is also a *rasa rūpa*. **Thus, we always experience multiple *rūpa* (*rūpakkhanda*) within a short time.**
- It is critical to understand the concepts in this post. It will become invaluable when we start discussing the concepts of “*sakkāya diṭṭhī*” and “*anatta*.”

3. When a new sensory input (*ārammaṇa*) makes contact (*phassa*) with the mind, that triggers a series of *citta* or a “*citta vīthi*.” Billions of such *citta vīthi* can run through the mind in a split second! Note that *citta* pronounced “chiththa”; see [Ref. 1](#) below on “writing in *Tipiṭaka* English” and pronunciation.

- ***Citta*, *viññāṇa*, and *viññāṇakkhandha* are DIFFERENT STAGES of the same entity.** It may be hard to believe but it is true.
- As we have discussed it is NOT correct to translate *viññāṇa* as “consciousness” in general. As we saw, *viññāṇa* are mainly of two types (*vipāka viññāṇa* and *kamma viññāṇa*) OR six types (*cakkhu*, *sota*, *ghāṇa*, *jivhā*, *kāya*, and *mano viññāṇa*.)
- All six types in the second category fall in the *vipāka viññāṇa* category. *Kamma viññāṇa* are ALWAYS *mano viññāṇa*. Thus, *mano viññāṇa* can be either *vipāka viññāṇa* or *kamma viññāṇa*. Explanation of what happens in a *citta vīthi* will help clarify that.
- However, clarification of how a *citta* evolves is the first step. That will take the mystery out of these related words. So let us do that first.

A *Citta* Evolves into *Viññāṇa* and *Viññāṇakkhandha* Within Fraction of a Second!

4. A *citta* is the elementary unit of cognition in Buddha Dhamma. There are THREE critical things to remember about *citta*:

- (i) A single *citta* NEVER arises by itself. **It arises in a series of *citta* or *citta vīthi*.**
 - (ii) A *citta* arises and perishes in an unimaginable small time. **The Buddha said there can be billions of *citta vīthi* arising within the “blink of an eye.”** See [Ref. 2](#).
 - (iii) During that unimaginably small time interval, a *javana citta* evolves through nine stages of evolution ([Ref. 3](#)): *citta*, *mano*, *mānasāṃ*, *hadayaṃ*, *pandaraṃ*, *mano manāyatanaṃ*, *mana indriyaṃ* (or *manindriyaṃ*), *viññāṇa*, *viññāṇakkhandha*. While you may not be familiar with many of those intermediate stages, you have probably come across those highlighted in orange.
- By the time the *viññāṇakkhandha* is reached, the mind has incorporated ALL relevant information for that *ārammaṇa* from past experiences as well as one’s expectations for the future. We never perceive ANY of the intermediate states, but only the *viññāṇakkhandha* stage. **That is why most suttas only refer to *viññāṇakkhandha*.**
 - **Only a Buddha can “see” such fast processes.** We are aware only of the CUMULATIVE EFFECT of billions of *citta vīthi* that go through within a second, i.e., we are aware ONLY of *viññāṇakkhandha*.

Influence of *Bhavaṅga* (Mental State) Preceding an *Ārammaṇa* on a *Citta Vīthi*

5. In the previous post, we discussed how our mindset can change (to a temporary *bhavaṅga* state) due to an *ārammaṇa*. See, “[Change of Mindset Due to an Ārammaṇa](#).”

- That “change in the mindset” happens with a special type of *citta* called *javana citta*; see #9 of that post.
- Then that *citta vīthi* will alter the mindset (*bhavaṅga*) and that new mindset (new *bhavaṅga*) will affect the next *citta vīthi*.
- Thus, one may end up with a drastically different mindset within a fraction of a second. **That is why we can even see an angry person getting angrier very quickly.** Once this process is understood, we will get a good idea of how to control anger. The same is true for *kāma rāga* too.
- It may appear that I keep jumping from one subject to another. **But all these pieces are very much inter-related.** It may take a few more posts to “see the whole picture.”

A *Citta* Arises with Seven *Cetasika* (Mental Factors) and Add More As It Evolves

6. A *citta* ALWAYS arises with a number of *cetasika* (mental factors) that define the “quality” of the *citta*. In the first *citta* stage, there are only 7 *cetasika* that arise with the *citta*: *phassa*, *vedanā*, *saññā*, *cetanā*, *manasikāra*, *ekaggatā*, and *jīvitindriya*. **It is a “pure *citta*” or a “*pabhassara citta*.”** See [Ref. 4](#).

- As the *citta* evolves through the next stages, the mind KEEPS ADDING more *cetasika* and the *citta* becomes increasingly contaminated. By the *viññāṇa* stage, it is fully contaminated; see [Ref. 3](#). That “contamination” happens within an unbelievably small time. We CANNOT consciously control that. **It happens according to our *gati* (character/habits).**
- That contamination takes place via incorporating more *cetasika* (greed, anger, etc) and those “added *cetasika*” are collectively called “*saṅkhāra*.” For example, *apuñña abhisāṅkhāra* involves *cetasika* like *lobha* and *dosa*, while *puñña abhisāṅkhāra* adds *cetasika* like *alobha* and *adosa*.

- Now, let us see what is meant by *viññāṇakkhandha* in different contexts.

We Experience the Cumulative Effect of Numerous Units of *Viññāṇa*

7. As we saw in #4 above, millions of *citta* (or *citta vīthi*) can arise within a fraction of a second! A *citta vīthi* starts with a *vipāka viññāṇa* and ends up with *kamma viññāṇa* (in *javana citta*).

- Furthermore, the mind can analyze different *ārammaṇa* coming through any of the six senses within a fraction of a second. Thus, during a fraction of a second, the mind experiences a “heap/collection” of different types of *vipāka viññāṇa* (*cakkhu viññāṇa* through *mano viññāṇa*.) It will also experience *kamma viññāṇa* (*mano viññāṇa*) in *javana citta* that arise in *citta vīthi*.
- A “*khandha*” (“කන්ද” in Sinhala) means “a collection/aggregate” or a “heap.”
- Thus, we ALWAYS experience *viññāṇakkhandha* or a “heap” of many types of *viññāṇa*. We never experience a single *cakkhu viññāṇa* or a *mano viññāṇa*, for example.
- The same is true for other aggregates of *rūpakkhandha*, *vedanākkhandha*, *saññākkhandha*, and *saṅkhārakkhandha*.

Other *Khandhas* – *Vedanākkhandha*, *Saññākkhandha*, *Saṅkhārakkhandha*

8. Now we can see that ALL FOUR mental aggregates (*vedanākkhandha*, *saññākkhandha*, *saṅkhārakkhandha*, and *viññāṇakkhandha*) arise when an *ārammaṇa* comes to the mind. As we saw in #2 above, any *ārammaṇa* will also initiate contacts with multiple *rūpa* and we experience the cumulative effect of *rūpakkhandha*.

- In #6 above, we saw that *vedanā*, *saññā*, and *cetanā* arise with the first stage of a *citta*. **As the *citta* evolves through those 9 stages to become a *viññāṇakkhandha*, *vedanā* and *saññā* also evolve to become *vedanākkhandha* and *saññākkhandha*!**
- For example, when we watch a movie, we will recognize many types of sights and sounds, i.e., different *saññā* (due to different types of *rūpa*), within short times; we may also experience different types of *vedanā*.
- Thus, it is important to realize that we NEVER experience a *citta* but are aware of one type of *viññāṇa*.
- An *ārammaṇa* brings in a *vipāka viññāṇa* and based on that we either initiate a new *kamma viññāṇa* or strengthen an existing *kamma viññāṇa*.

9. Also note that *mano saṅkhāra* are defined as “*vedanā* and *saññā*,” and thus, *mano saṅkhāra* are also part of even a pure *citta*.

- As a *citta* evolves into *viññāṇa*, it incorporates other types of *cetasika*. That gives rise to *vacī* and *kāya saṅkhāra*. Thus, different types of *vacī* and *kāya saṅkhāra* are incorporated by the time a *citta* evolves into the *viññāṇa* stage. (Don’t worry if you don’t understand that part yet.)
- We can clearly see the unbelievable rapidity (and complexity) of the evolution of a *citta* to *viññāṇakkhandha* and, at the same time, also giving rise to *vedanākkhandha*, *saññākkhandha*, and *saṅkhārakkhandha*.

Summary

10. We discussed the formation/arising of the five aggregates (*pañcakkhandhā*) in *Idappaccayatā Paṭicca Samuppāda*, i.e., within a relatively short time.

- At a given moment, we only experience things that took place over a fraction of a second. That is a LONG TIME in terms of the lifetime of a *citta*!

- Thus, we experience only the cumulative effect of billions of *citta*. By that time all those *cittas* would have evolved into different types of *viññāṇa*, and thus we experience an aggregate/collection of *viññāṇa* or *viññāṇakkhandha*.
- Not only that, but we also experience the cumulative effect of a variety of *rūpa*, *vedanā*, *saññā*, and *saṅkhāra* (as *rūpakkhanda*, *vedanākkhandha*, *saññākkhandha*, and *saṅkhārakkhandha*.)
- **As the *citta* evolves the *cetanā cetasika* incorporates one's *gati* (character/habits) RELEVANT TO that specific *ārammaṇa*. Thus, the evolution of the five aggregates will depend on the person.** That happens automatically, without us even being aware of it. We will discuss that in the next post.

11. The above analysis may appear complex at first, but it will immensely help in clarifying many “knotty issues” that I see discussed over many years at discussion forums. It is a good idea to periodically review the posts in this new section “[Paṭicca Samuppāda During a Lifetime](#).”

- Please read them repeatedly and even print this post and keep it for future reference. If there are questions/comments, please use the discussion forum.

References

1. It is highly beneficial to learn how to pronounce Pāli words. When the European scholars started writing the Pāli *Tipiṭaka* with the English alphabet, they came up with a unique system that I call the “**Tipiṭaka English**” Convention. It has helped keep the ‘word length’ short.

- For example, even though written as “*gati*,” its pronunciation is “gathi.” Similarly, “*icca*” is for “ichcha.” If written as pronounced, “*dhammacakkappavattana*” would be “*dhammachakkappavaththana*.”
- See “[“Tipiṭaka English” Convention Adopted by Early European Scholars – Part 1](#)” and “[“Tipiṭaka English” Convention Adopted by Early European Scholars – Part 2](#)” for details.
- A pronunciation guide at “[Pāli Glossary – \(A-K\)](#)” and “[Pāli Glossary – \(L-Z\)](#).”
- Don’t be discouraged. Start getting used to the method of learning the meanings/pronunciations gradually. Learn the common keywords first.

2. Buddha said it is hard to find any phenomena in this world that change faster than the mind: “[WebLink: suttacentral: Aṅguttara Nikāya \(1.48\)](#).”

The short *sutta* says: “*Nāhaṃ, bhikkhave, aññaṃ ekadhammampi samanupassāmi yaṃ evaṃ lahuparivattaṃ yathayidaṃ cittaṃ. Yāvañcidaṃ, bhikkhave, upamāpi na sukarā yāva lahuparivattaṃ cittaṃ*”ti.”

Translated: “I consider, *bhikkhus*, that there is no phenomenon that comes and goes so quickly as *citta*. It is not easy to find an analogy (a simile) to show how quickly *citta* changes.”

3. “[Citta, Mano, Viññāṇa – Nine Stages of a Thought](#).”

4. A “pure *citta*” or a “*pabhassara citta*” recognizes an *ārammaṇa* as sight, sound, etc. but does not recognize it. See “[Pabhassara Citta, Radiant Mind, and Bhavaṅga](#).” One is only aware that one is living. That is the experience of an *Arahant* in “*Arahant-phala Samapatti*.”

6.1.1.2 Seeing Is a Series of “Snapshots”

.4

April 4, 2022; revised April 6, 2022 (#9)

Even though we perceive seeing to be continuous, it results from a series of discrete sensory events or “snapshots.” That is the real meaning of the verse, “*diṭṭhe diṭṭhamattaṃ bhavissati*.” The other sensory experiences work the same way.

Mind and *Cittā*

1. A mind is not active all the time. For example, when in deep sleep we are not even aware that we are alive. The mind becomes active when an *ārammaṇa* comes in via one of the six sense faculties. An *ārammaṇa* triggers *cittā* (plural of *citta*) to arise — and the mind to become active. That is why some consider the mind synonymous with *cittā*, but that is not correct.

- It takes numerous *citta vīthi* for us to be aware of that *ārammaṇa* AND identify what that *ārammaṇa* is. For example, when we hear a glass falling and breaking, it only takes a split second for the mind to register that sound and for us to become aware of it. But numerous *citta vīthi* run during that split second.
- A *citta* can take only one *ārammaṇa* at a time. In fact, all *cittā* in a *citta vīthi* take the same *ārammaṇa*. We CANNOT see and hear at the same time. When a new *ārammaṇa* comes in, a new *citta vīthi* focused on that starts. But since the mind is so fast, **it appears to us that we are seeing and hearing at the same time.**
- Thus **the mind can take in many *ārammaṇa* within a second** BECAUSE it is so fast! That means the mind can jump from one *ārammaṇa* to another and back in a split second.

2. Buddha said it is hard to find any phenomena in this world that change faster than the mind: “[WebLink: suttacentral: Aṅguttara Nikāya 5. Panihitaacchavagga \(AN 1.48\)](#)”.

- **The short sutta says:** “*Nāhañ, bhikkhave, aññañ ekadhammampi samanupassāmi yañ evañ lahuparivattañ yathayidañ cittañ. Yāvañcidañ, bhikkhave, upamāpi na sukarā yāva lahuparivattañ cittañ*”ti.”
- **Translated:** “I consider, *bhikkhus*, that **there is no phenomenon that comes and goes so quickly as *citta***. It is not easy to find an analogy (a simile) to show how quickly *citta* changes.”
- Also see the previous post, “[Khandhā in Idappaccayatā Paticca Samuppāda](#).”

Ārammaṇā Come in via the Six Sense Faculties

3. To “experience an *ārammaṇa*,” the mind (more precisely, the seat of the mind or *hadaya vatthu*) must make contact with an external *rūpa*. The *phassa cetasika* in a *citta* makes that “contact.”

- There are five types of external *rūpa* above the *suddhaṭṭhaka* stage (*vaṇṇa*, *sadda*, *gandha*, *rasa*, and *phoṭṭhabba rūpa*.) When one such *rūpa* contacts the corresponding *pasāda rūpa* (*cakkhu*, *sota*, *ghāna*, *jivhā*, or *kāya pasāda*), that leads to contact (*phassa*) with the *hadaya vatthu* simultaneously.
- Then there are *rūpā* below the *suddhaṭṭhaka* level (i.e., *dhammā*), which directly make contact (*phassa*) with *hadaya vatthu*.
- Those six types of *ārammaṇa* lead to *cakkhu*, *sota*, *ghāna*, *jivhā*, *kāya*, and *mano viññāṇa*. **They are all *vipāka viññāṇa*.**

We Can Experience Many *Ārammaṇa* in a Short Time

4. Our experiences are the cumulative effect of billions of “momentary experiences” coming to the mind via *cittā* (more precisely *citta vīthi*) arising each second. It will be much easier to proceed once one understands that.

- In the previous two posts, we discussed that the mind is “at rest” in a *bhavaṅga* state when not focused on an *ārammaṇa*, i.e., when not exposed to sensory input. That is the case when we are sleeping. Even while we are awake, the mind could be in a *bhavaṅga* state if there is no active *ārammaṇa*. That happens, for example, when we feel drowsy.

- Furthermore, since the flow of *citta vīthi* is so fast, the mind could be in a *bhavaṅga* state between *citta vīthi* for a short time.
- **When a robust sensory input comes in, the mind comes off that bhavaṅga state and starts focusing on that ārammaṇa with citta vīthi.** However, the mind can switch back and forth among several *ārammaṇa* within a short time. Let us take an example to illustrate that.

5. Suppose you are having a meal with a friend. Let us see how many *ārammaṇa* run through your mind within a few minutes.

- Your friend is talking, and you are listening. That is an *ārammaṇa* coming through *sotadvāra* or the ears. You see the meal in front of you, and that *ārammaṇa* comes through *cakkhudvāra* (eyes). You take a bite and taste the food (*jivhādvāra* or tongue). You also see your friend (another *cakkhudvāra ārammaṇa*). If someone drops a glass at a nearby table, you will hear it breaking (*sotadvāra*).
- As you can see, the mind can switch very fast among all such *ārammaṇa* coming in rapidly!

The Amazing Mind

6. It is even more impressive that the mind can recognize ALL those *ārammaṇa* without the slightest pause. That may sound trivial at first but think about it carefully.

- Suppose your friend (X) is talking about a mutual friend, Y. As X talks, you can relate to everything about Y. The mind can recall your past experiences with Y and relate to your friend's account.
- While that is happening, you can see and identify all types of foods on your plate. You are chewing food and experiencing its taste.
- You are looking at the friend, too, and can relate to his words and hand motions.
- When you hear the glass breaking at a nearby table, you know what happened without even seeing someone dropping the glass.
- How does the mind do ALL THAT in a split second? It is a real problem for scientists who believe that the mind IS the brain, as we discuss below.

Even Processing a Single Ārammaṇa Is a Complex Process

7. It gets even more complex. Even recognizing a single *ārammaṇa* involves many things taking place rapidly.

- Let us think about recognizing the food on the plate. When the waiter brought in the food, you looked at the plate and immediately identified the food; let's say that it is a pizza.
- You may say that is trivial. But suppose your friend came from a remote village in a distant country and had never seen or tasted a pizza. He would not know what it was.
- You knew that it was a pizza because you had seen and tasted pizza many times. But how did the mind recall such past experiences and recognize the pizza in such a short time? Not only that, but you know how it will taste before you take a bite.

The “Binding Problem” in Neuroscience

8. Think about all the sensory experiences mind was able to process within a couple of minutes in #5 and #6.

- **Modern science is grappling with the issue involving just one such sensory experience right now.** Neuroscientists are trying to figure out how the brain identifies a given object, say, a car coming towards you on the road. When you see a vehicle, you recognize its color, shape, and rough distance from you to the vehicle. If you are crossing the road, you may run to avoid the car hitting you if you think it is coming too fast.

- Neuroscientists are trying to figure out how the brain gets all that done in a split second. That is the “binding problem” in neuroscience. It is a sub-category in the general problem of mind tackling several sensory inputs (like in #5 and #6 above), blending all that into a smooth sensory experience. See the Wikipedia article, “[WebLink: en.wikipedia.org: Multisensory integration](http://en.wikipedia.org: Multisensory integration).”
- They will never figure that out. **It is the *hadaya vatthu* (seat of the mind in Buddha Dhamma) that recalls past events VERY FAST.** However, the brain DOES play a crucial role in processing incoming sensory data. Then it passes that information to *hadaya vatthu*. I have discussed that in a bit technical post: “[Brain – Interface between Mind and Body](#).”

Relation to Perception of “I” or “Me”

9. This fantastic ability of the mind (more correctly *hadaya vatthu*) to process and identify multiple sensory inputs in a split second leads to the perception of a “person” experiencing all those sensory inputs.

- But the Buddha explained that all sensory experiences result from an EXTREMELY FAST automatic progression of **discrete events** that runs through a mind ONE AT A TIME; see below.
- Thus, there is no “person” experiencing ALL SIX sensory inputs at the same time. It is just a process taking place ONE sensory input at a time!

Seeing Is a Series of “Snapshots”

10. To get the basic idea, let us focus on a series of events involving just vision.

- **A video camera captures many static pictures (snapshots) of a scene when making a movie.** Then those snapshots are projected to a screen at a specific rate. If the playback speed is too slow, we can see individual pictures, but above a particular “projection rate,” it looks like actual motion. Here is a video that illustrates this well:

[WebLink: youtube: Animation basics: The optical illusion of motion - TED-Ed](#)

- A movie projector projects static pictures to the screen at a rate of about 30 frames a second, and we see the movie as a continuous progression of events.
- More details in “[Vision Is a Series of “Snapshots” – Movie Analogy](#).”

11. In the same way, our minds do not experience the continuous motion of objects. The mind receives only discrete snapshots of the object (at certain time intervals) from the brain. **Therefore, in reality, we see only a “movie” put together by the mind based on a number of “snapshots” per second. That is why the Buddha called *viññāṇa* a “magician.”**

- That is what the Buddha explained to Bāhiya in the “[WebLink: suttacentral: Bāhiya Sutta \(Ud 1.10\)](#)” with the verse, “*diṭṭhe diṭṭhamattam bhavissati, sute sutamattam bhavissati...*”
- **That verse is incorrectly translated as;** “In the seen will be merely the seen; in the heard will be merely the heard..”
- However, it explains exactly what we discussed above. Seeing is just like taking a series of snapshots. What we PERCEIVE as a person walking is really a series of such snapshots “made into a movie” by the mind. **The same holds for hearing, tasting, etc.**
- We will discuss that in detail in upcoming posts. **Understanding that will help get rid of *sakkāya diṭṭhi*.**

Summary

12. First thing is to understand that it is WRONG to translate *citta* as either a “thought” or “mind.” A “thought-moment” may be better. A mind appears fast because numerous *cittā* run through the mind very fast.

- A *citta* is the smallest unit of cognition. There could be billions of *cittā* arising in a mind in a second. Only a Buddha can “see” or “experience” a *citta*! **We only experience the cumulative effect of millions of *cittā* that run through the mind in a split second.**
- As we have discussed, a *citta* evolves to the *viññāṇa* stage. We experience the effect of “bundles” or “aggregates” of such *viññāṇa*. **That is the reason for using “*viññāṇakkhandha*” instead of *viññāṇa* in many instances in Buddha Dhamma.**

13. The “movie analogy” in #9 above explains the basic idea of how the mind sees the external world “seemingly without any gaps” even though only a series of ‘snapshots’ come into the mind.

- The following post will discuss how the mind tackles several DIFFERENT sensory inputs (sights, sound, taste, etc.) that we discussed in #5 and #6 above.
- All posts in this subsection at, “[Paticca Samuppāda During a Lifetime.](#)”

6.1.1.2 .5 Aggregate of Forms – Collection of “Mental Impressions” of Forms

April 10, 2022

The aggregate of forms (*rūpakkkhandha*) is not a collection of forms or *rūpa*. It includes mental impressions of *rūpa* that one has experienced. Here we discuss how that accumulation of “mental impressions of *rūpa*” takes place.

Rūpa and *Rūpakkkhandha*

1. *Rūpā* (normally translated as “forms”) are those in the external world: visuals of people, tress, etc., sounds, tastes, odors, and other objects that we touch. *Rupā* (plural of *rūpa*) are made of the four great elements: *pathavi*, *āpo*, *tejo*, *vāyo*.

- On the other hand, *rūpakkkhandha* (normally translated as the “aggregate of forms”) consists of a person’s MENTAL IMPRESSIONS of such *rūpa*. In a day, we see, hear, taste, smell and touch many things and ALL those impressions are added to a person’s *rūpakkkhandha* each second.
- These days, only a handful of people have understood that. It is very important to understand what *rūpakkkhandha* is.
- I have set the background with two previous posts referred to below. You may want to read them as needed.

Rūpakkkhandha Grows With Each *Ārammaṇa*

2. The concept of *rūpakkkhandha* (form aggregate) is easily explained with an example. **It starts with an *ārammaṇa* coming to the mind via one of the six senses.**

- As we discussed in recent posts, the mind can stay on ONLY ONE *ārammaṇa* at any given time. However, the mind can jump back and forth among all six senses very fast.
- How quickly the mind can jump among different senses is limited ONLY by how fast the brain can process information coming through the five physical senses (eyes, ears, tongue, nose, and body).
- In the posts, “[Seeing Is a Series of ‘Snapshots’](#)” and “[Vision Is a Series of “Snapshots” – Movie Analogy](#)” we discussed some examples. Let us discuss that further to clarify what happens in terms of a series of “snapshots” the mind receives RANDOMLY from the six senses. The following is the example in #5 of the post “[Seeing Is a Series of ‘Snapshots’](#).” We can further simplify by focusing on just three *ārammaṇa*.

Example of Accumulation of *Rūpakkkhandha*

3. Suppose you are having a meal with a friend. Let us see how many *citta vīthi* run through your mind within a few minutes due to different *ārammaṇa*.

- Your friend is talking, and you are listening. That is an *ārammaṇa* coming through *sotadvāra* or the ears. You see him too, and that *ārammaṇa* comes through *cakkhudvāra* (eyes). You take a bite and taste the food (*jivhādvāra* or tongue).
- You can experience all of those without any pause. **It FEELS as if you are experiencing all three simultaneously. But that is only an illusion** arising from the fact that the mind is THE FASTEST entity in this world. We discussed that in those two posts.
- As you can see, the mind can switch very fast among all discrete data sets from all *ārammaṇa* coming in rapidly!

It takes Four *Citta Vīthi* to Process One “Data Set” from One *Ārammaṇa*

4. As we have discussed, the mind receives ONLY ONE snapshot (let us call it a “data set”) at one moment through *sotadvāra*, *cakkhudvāra*, or *jivhādvāra*, in the above example. The brain may process those sensory signals (“data sets”) in parallel. But when they come to the mind, the mind processes only one “data set” at a time. **But since the mind is unimaginably fast**, it appears that the mind processes them simultaneously.

- In our example of #3 above, let us say the mind (more correctly the seat of the mind or *hadaya vatthu*) processes them in the following sequence: *sotadvāra*, *cakkhudvāra*, *jivhādvāra*. Each one involves a *citta vīthi* (with 17 *cittā*.)
- We also need to keep in mind that each of them is fully absorbed by the mind with three more *manodvāra citta vīthi*. I mentioned that in #1 of the post, [“Vision Is a Series of “Snapshots” – Movie Analogy.”](#)
- Therefore, *citta vīthi* go through the mind in the following order: 1 *sotadvāra/3 manodvāra*, 1 *cakkhudvāra/3 manodvāra*, 1 *jivhādvāra/3 manodvāra*.
- As the brain keeps sending more “data sets,” such *citta vīthi* keep flowing through the mind.

Hundreds of “Data Sets” Processed by the Mind in a Second

5. To keep it simple, let us assume that no other *ārammaṇa* comes to mind for several minutes. Furthermore, let us assume that subsequent *citta vīthi* flow through the mind in the same order. Thus, we have 1 *sotadvāra/3 manodvāra*, 1 *cakkhudvāra/3 manodvāra*, 1 *jivhādvāra/3 manodvāra*, **1 *sotadvāra/3 manodvāra*, 1 *cakkhudvāra/3 manodvāra*, 1 *jivhādvāra/3 manodvāra*, ...**

- The series in bold is the second series of *citta vīthi*. In the second post mentioned above (see #11), we estimated that the brain can process about 100 data packets on vision **per second**. Each of those will trigger 1 *cakkhudvāra/3 manodvāra citta vīthi*.
- Therefore, **in a second roughly 300 of the following set will go through the mind: 1 *sotadvāra/3 manodvāra*, 1 *cakkhudvāra/3 manodvāra*, 1 *jivhādvāra/3 manodvāra*.**

Mind Can Sort Out “Data Sets” from Different Senses

6. In other words, the mind will get a “sound bite” of your friend’s words (possibly one word) followed by a “snapshot” of your friend. That is immediately followed by a bit of taste of the food. It is critical to think through exactly what takes place.

- The point is that the mind can handle ONLY ONE sensory input at a time. The brain keeps sending 100 packets of “data” (per second) on each of the three senses involved in our example: sound, taste, and vision. The mind is much faster than the brain and it processes all of them without any problem.

- But the intriguing thing is that the mind DOES NOT receive “data” continuously from one sense. Rather it gets bits of data on sound, vision, and taste. Then that sequence is repeated. Thus here is the sequence of “bits of data” that comes to the mind: **sound/vision/taste, sound/vision/taste, sound/vision/taste,...**

7. But the mind has the amazing ability to sort out and connect data from each sense faculty separately.

- Thus, in the above example, the mind will have formed THREE separate chains of data: **sound, sound, sound,...** **vision, vision, vision,...** **taste, taste, taste, ...**
- In other words, the mind is capable of putting the “bits of data” on sound coming at different times together as one series and thus understanding the meaning of your friend’s words. For example, it may hear the friend say “my dad”, “came to”, “see me”, and “yesterday.” But they did not come in one after the other. Adjacent sets of words were separated by bits of data on vision and taste. But the mind was able to put it all together as “my dad came to see me yesterday.”

8. In the same way, it may get the taste of a bit of meat in one packet, and a bit of cheese in another, with data on vision and sound coming in between. But the mind combines all that to give YOU the taste of the pizza.

- Same for vision. The mind combined many “snapshots” of your friend in several seconds and see him taking and eating. That part of the vision is exactly the same as projecting static pictures in a movie that we discussed in those two previous posts.
- **All sensory data for the three senses got added to the rūpakkhanda in the above example.**

What Is in the Aggregate of Forms (Rūpakkhanda)?

9. The five types of aggregates (*khandhas*) are explained in the “[WebLink: suttacentral: Khandha Sutta \(SN 22. 48\).](#)” There, the *rūpakkhanda* (form aggregate) is, “*Yam kiñci, bhikkhave, rūpam atītānāgata paccuppannam ajjhataṃ vā bahiddhā vā oḷārikam vā sukhumaṃ vā hīnam vā paṇītaṃ vā yam dūre santike vā, ayam vuccati rūpakkhanda.*”

Translated: “Any kind of *rūpa*—**past**, future, or present; internal or external; coarse or fine; inferior or superior; far or near: all of them belong to the aggregate of form or *rūpakkhanda*.”

- The key point here has not been explained in current English translations. All *rūpā* that belong to *rūpakkhanda* are the “mental impressions” of external *rūpā*. In other words, they are NOT made of *pathavi, āpo, tejo, vāyo*, or *suddhātṭhaka*.
- But, of course, those “mental impressions” arose DUE TO external *rūpa* made of *pathavi, āpo, tejo, vāyo*, or *suddhātṭhaka*.

10. One easy way to see that is to see that the Buddha included all **past rūpa** in *rūpakkhanda*. That means any *rūpa* that one saw, heard, tasted, smelled, touched, or thought about is included. Since our past goes back to infinite time, a VAST MAJORITY of *rūpa* in the *rūpakkhanda* are such **past rūpa**.

- For example, suppose YOU saw a tree yesterday. The “mental impression” of that tree is in YOUR *rūpakkhanda*. You can recall how it looked if you took a good look at it. Even if that tree was cut down just after you looked at it, that mental impression is still there. It is in YOUR *rūpakkhanda*.
- However, since I did not see that tree, MY *rūpakkhanda* does not have an impression of that tree.
- **Each person has their own rūpakkhanda.**

Present (Paccuppanna) Rūpa Are Just a Fraction!

11. As we discussed, the present (*paccuppanna*) moment lasts only a split second. If we say the word “*kaya*” by the time “*ya*” sound comes, the “*ka*” sound has gone to the past.

- Thus each *rūpa* experienced in a fraction of a second immediately goes becomes a “past *rūpa*.” The “present moment” is gone in a flash!
- Future (*anāgata*) *rūpa* are mental impressions of *rūpa* that one hopes to experience in the future.
- **The other types of *rūpa* are sub-categories of the past, present, and future *rūpa*.** Internal (*ajjhata*) *rūpa* are those that are part of oneself: all body parts, including the ones inside the body. External (*bahiddha*) *rūpa* are, of course, anything outside of one's body. Coarse (*olārika*) *rūpa* are what we call “solid matter,” and fine/subtle (*sukkhuma*) *rūpa* are “energy” (heat, sound, *dhammā*, etc.)
- As we can see, *rūpakkkhandha* grows immensely even in a day. **But we attach to only a tiny fraction of it.** That fraction is *rūpupādānakkhandha* (commonly translated as “aggregate of form connected with grasping.”)

What is in the *Rūpupādānakkhandha* (“Aggregate of Forms Grasped”)?

12. *Rūpupādānakkhandha* (*rūpa* + *upādāna* + *khandha*) is the collection of forms that “one is attached to” or “one has grasped”; The Buddha stated that in the same *Khandha Sutta* that defined *rūpakkkhandha* in #9 above; see [Ref. 1](#).

- As we have seen *rūpakkkhandha* includes ALL *rūpa* that we have ever experienced. That is huge! infinite!
- We don't even remember most of our past *rūpa*. **We are attached to only a tiny fraction of *rūpa* in our *rūpakkkhandha*.** Those are mostly from this life. However, attachment to those has been influenced by *rūpa* experienced in past lives.

13. For example, person X may have “fallen in love” with an attractive person that he saw yesterday. It is possible that out of all persons/things X saw yesterday, only that visual *rūpa* got “added” to his *rūpupādānakkhandha*.

- X may have heard many sounds yesterday. Out of those, he may NOT have added any “sound *rūpa*” to his *rūpupādānakkhandha* even though many “sound *rūpa*” would have been added to his *rūpakkkhandha*.
- Just think about such examples to clarify the difference between *rūpakkkhandha* and *rūpupādānakkhandha*.
- **Remember that *rūpa* are six types:** They include *Rūpa rūpa* (or *vaṇṇa rūpa*) that one sees. Similarly, *sadda rūpa*, *gandha rūpa*, *rasa rūpa*, *phoṭṭhabba rūpa*, and *dhamma rūpa* (*dhammā*) are sounds, smells, tastes, touches, and memories.

Reference

1. In the “[WebLink: suttacentral: Khandha Sutta \(SN 22. 48\)](#)” *rūpupādānakkhandha* is, “*Yaṃ kiñci, bhikkhave, rūpaṃ atītānāgatapaccuppannaṃ ...pe... yaṃ dūre santike vā sāsavaṃ upādāniyaṃ, ayaṃ vuccati rūpupādānakkhandho.*”

Translated: “Any kind of form—past, future, or present; internal or external; coarse or fine; inferior or superior; far or near, which leads to *āsava* (craving) and *upādāna* (the mind cannot let go of) is called the *rūpupādānakkhandha* (“aggregate of form connected with grasping.”)

6.1.1.2 *Rūpakkkhandha* in *Idappaccayatā Paṭicca Samuppāda*

April 16, 2022

Only a tiny fraction of *rūpakkkhandha* plays a direct role in what happens at a given moment, i.e., in *Idappaccayatā Paṭicca Samuppāda*.

Summary of *Rūpakkhanda* (Form Aggregate)

1. If you have not read the previous three posts on the form aggregate (*rūpakkhanda*), it is a good idea to read them first at “[Paticca Samuppāda During a Lifetime](#),” starting with “[Khandhā in Idappaccayatā Paticca Samuppāda](#).” It is critically important to understand the basic ideas.

- As discussed in those three posts, the form aggregate is MOSTLY our mental impressions of forms (*rūpa*) that we experienced in the past, including all previous lives.
- Of course, we can recall only a fraction of past *rūpa* that we experienced. However, the cultivation of *jhāna* allows one to remember even previous lives. The Buddha could recall anything from his past lives as far as he wanted.
- **Recent findings confirm that moment-by-moment records of ALL *rūpā* experienced remain intact.** Some people can recall past events in astonishing detail.

Memory Recall – Recent Findings

2. That AMAZING ability first came to light with Jill Price, who contacted a team of scientists in the early 2000s about her ability to recall anything from 1974 onwards. Here is a video of her with Diane Sawyer on an ABC News program in 2008:

[WebLink: youtube: The woman that never forgets - Jill Price First Interview!](#)

- I discussed that video in detail in the post “[Where Are Memories “Stored”? – Connection to Pañcakkhandha](#).”
- Discussions with a few more people with that ability are in “[Autobiographical Memory – Preserved in Nāma Loka](#).”
- Therefore, it is important to realize that — in the strict sense — *rūpakkhanda* includes any *rūpa* that one has ever experienced.
- **This fact is a foundation of Buddha Dhamma.** It is a fact that RECORDS of ALL past experiences are preserved as “*nāmagotta*” in *viññāṇa dhātu*. Thanks to the accounts of Jill Price and others **that fact is now undeniable.**

Memories (*Nāmagotta*) Preserved in *Viññāṇa Dhātu*

3. The “past component of *pañcakkhandha*” is preserved as “*nāmagotta*” in the *viññāṇa dhātu*. Jill Price and a few other people can recall memories in such detail only because those memories (*nāmagotta*) have been in the *viññāṇa dhātu*. See “[Where Are Memories Stored? – Viññāṇa Dhātu](#).”

- In the same way, some children can recall memories from their recent past lives. See “[Evidence for Rebirth](#).” Some *yogis* can remember many past lives. A Buddha can recall any past life as he wishes. For example, Buddha Gotama described the lives of several previous Buddhas (spanning many billions of years) in detail in several *suttas*. See, for example, “[WebLink: suttacentral: Mahāpadāna Sutta \(DN 14\)](#).”
- **Therefore, it is absolutely necessary to include “all past *rūpa*” in the *rūpakkhanda* in a general sense.**
- However, when one is trying to avoid generating “bad *saṅkhāra*” at the present moment, we DO NOT need to focus on the whole *rūpakkhanda*. **We just need to pay attention to the *rūpa* that we are experiencing at that time.** Such *rūpā* belong to “a much smaller “collection of *rūpā*” or *rūpakkhanda*.” Let us discuss that now.

Rūpakkhanda at the Present Moment Is the Most Important

4. **Only those *rūpakkhanda* that arise close to the current moment play a direct role in *Idappaccayatā Paṭicca Samuppāda*, i.e., play a role in “what happens at the present moment.”**

- Even though the “past *rūpakkhanda*” going back to the “beginningless rebirth process” makes up the bulk of the *rūpakkhanda* of a person, **most of us cannot even recall most of the “past *rūpakkhanda*” from yesterday.**
- That is why the Buddha advised Ven. Ānanda to first understand the *Idappaccayatā Paṭicca Samuppāda*. We discussed that at the beginning of this series a few posts ago. See “[Idappaccayatā Paṭicca Samuppāda – Bhava and Jāti Within a Lifetime](#).”
- But that does not imply that those memory records have no value at all. They do influence our present actions through our *saṃsāric* habits.

5. The *Idappaccayatā Paṭicca Samuppāda* explains the accumulation of *kammic* energies at the present moment. **It is based on *rūpakkhanda* that arises at the present moment.** Of course, they arise and go to the past momentarily. So, *rūpā* or *rūpakkhanda* involved in *Idappaccayatā Paṭicca Samuppāda* are MOSTLY those that one is experiencing at the present time and moving to the past as soon as they arise.

- That “present time” could vary from minutes to hours depending on how long one’s mind is focused on an *ārammaṇa*.
- Note that *rūpakkhanda* is only one of five aggregates (*khandhās*) associated with an experience.
- **Before we start discussing the other four aggregates, it is a good idea to understand the usage of the term “*rūpakkhanda*” in this context.**

Why Do We Call *Rūpa* Experienced at a given Moment “*Rūpakkhanda*”?

6. Even over a short time of a few seconds, a mind DOES NOT capture the full impression of a “*rūpa*” in one instant. Rather, such a sight, sound, etc., are captured with MANY “snapshots.” Read #6 through #8 in the post, “[Aggregate of Forms – Collection of ‘Mental Impressions’ of Forms](#).” It could a good idea to review that first. These concepts are new to most people.

- **That is the basis of Buddha saying there is no “person” seeing, hearing, etc. It is just a series of events that happens via *Idappaccayatā Paṭicca Samuppāda*.** But we need to discuss that in more detail.
- First, let us review some facts about “*rūpā*.” **It is unfortunate that sometimes people use “*rūpā*” just for “visual objects.” But those are “*rūpa rūpā*” or “*vaṇṇa rūpā*.”** Here, *vaṇṇa* (“*varṇa*” in Sanskrit) means “color.”
- We see “*vaṇṇa rūpa*” with eyes, “*sadda rūpa*” with ears, “*rasa rūpa*” with tongue, “*gandha rūpa*” with the nose, and “*phoṭṭhabba rūpa*” with touches. We also recall memories with “*dhammā*” or “*dhamma rūpa*” with the mind. Of course, it is the mind that experiences the other five *rūpā* that come through the eyes, ears, tongue, nose, and body.
- Those six types of *rūpā* make contact with the mind very rapidly and in “packets.” For example, we don’t see or hear continuously. **Only one sense faculty makes contact with the mind at one moment, and that contact is of short duration, about one-hundredth of a second!**

7. We discussed in the last post how the mind is able to sort out those different sensory inputs and make a coherent picture of our world. See “[Aggregate of Forms – Collection of ‘Mental Impressions’ of Forms](#).” Let us discuss one more simple example to illustrate this point. It is critical to get this basic idea.

Suppose you are eating an apple and you are alone. Your mind is totally focused on the apple. Still, many inputs come in providing you with information on touch, taste, sight, smell, and even sounds.

- You are holding the apple and that sensation comes through *kāyadvāra* or touch. The taste of apple comes through *jivhādvāra* or tongue, and you hear the chewing sound (*śrotadvāra* or the ears.) Of course, you see the apple too via *cakṣhūdvāra* (eyes). You may also smell the apple coming via *ghānadvāra* (nose.)
- Of course, the mind put together all those sensory inputs as “enjoying the apple.” Therefore, the *manodvāra* is involved too. The other five sensory inputs come to the MIND via those “doors” (*dvāra*)
- You can experience all of those without any pause. **It is an all-inclusive cohesive experience. It FEELS as if you are experiencing all those sensations simultaneously. But that is only an illusion** arising from the fact that the mind is THE FASTEST entity in this world. We discussed that in the previous three posts too.

Where Does the “Experience” Take Place?

8. Think about what happens within those few minutes while you are eating the apple. You see the apple in your hand and feel its texture. You can taste the apple and also smell its aroma. You also hear the chewing sound. Those are the five sensory experiences through the five physical senses.

- While you are doing all that, **the brain is processing all that data to a form that can be “understood” by the mind.** The brain DOES NOT understand anything; it is just like a computer. This is a critical point that needs to be understood.
- There are separate regions in the brain that process data from those five senses. The brain processes such data into a form that can be understood **by the mind. This is a fully kammic process that scientists will never be able to figure out.**
- It is worthwhile to think about what must happen, for example, to ‘see’ that apple.

How do we “see” an apple?

9. Scientists have traced the **electrical/chemical signals** from the back of the eye (retina) to the visual cortex in the brain. **But they have no idea what the visual cortex is doing or how it transforms those electrical/chemical signals into “light” and the “form resembling an apple.”**

- **That is the “hard problem of consciousness”** in simple terms. Google “hard problem of consciousness” and you can read about the struggles of scientists and philosophers trying to make a breakthrough.
- That problem arises only because they are trying to explain consciousness to “arise from matter” specifically in the brain.
- The Buddha explained that it is the other way around. It is the mind that gives rise to matter. That is a deep issue I have discussed briefly in [“The Origin of Matter – Suddhatthaka.”](#) However, it is not prudent to go that deep UNTIL understanding the *Idappaccayatā Paṭicca Samuppāda*.
- By the way, some scientists and philosophers are beginning to realize that it would be impossible to explain consciousness to ARISE in the brain. The brain only has a secondary role; see, [“How Do We See? – Role of the Gandhabba”](#) and [“Will Quantum Mechanics Be Able to Explain Consciousness?”](#)

10. The point is that after light falls on the back of the eye, light DOES NOT play any role in vision. **Then how do we see an image of that apple? How do we see light? It is totally dark inside the skull!**

- The same is true for the other senses. Scientists have found that sounds create vibrations in the air and deep inside our ears there are sensors that detect those vibrations. How can the brain “hear” those sounds? It cannot. The brain itself was formed by *kammic* energy. Its role is to transform those “vibration signals” into a form that can be understood by the mind (more precisely the “seat of the mind” or *“hādaya vatthu.”*)

- It is a good idea to read the post “[How Do We See? – Role of the Gandhabba](#).” There is no need to get into details discussed in that post. Don’t forget to read [Ref. 4](#) per #6 in the post. **It is the *gandhabba* (with the *hadaya vatthu*) that sees, hears, tastes, smells, feels, and thinks!** Yet that *gandhabba* lasts only for the duration of human existence. After that, it could transform into an animal *gandhabba*, *Deva*, or even a “hell-being”. There is no real essence even in that human *gandhabba*. It is a temporary existence!

“Eating an Apple” Experience Involves Many Types of *Rūpakkhanda*

11. It is utterly useless to read the “word-by-word” translations of *suttas*. The Buddha explained things that we experience in real life. Even though the world is complex, we can simplify things by looking at the details of sensory experience. It may appear complex at first, but once the basic idea sinks in, it will become much easier.

- Let us summarize our discussion on the experience of eating an apple.
- We experience different types of *rūpa* within those few minutes. They are *vaṇṇa rūpa*, *sadda rūpa*, *gandha rūpa*, *rasa rūpa*, and *phoṭṭhabba rūpa*. In plain English sight, sound, smell, taste, and touch.
- Even the sight of the apple is not captured in one instant. The sight of the apple comes in “brief snapshots” each one lasting only a billionth of a second. Remember that even though the brain may take one-thousandth of a second to process a “data packet on the vision” the mind (more precisely *hadaya vatthu*) processes that in a billionth of a second.
- Thus, “seeing of the apple” is due to a collection of many such “snapshots.” **That is a “*rūpakkhanda*” on VISION over a short time.**

Rūpakkhanda Includes All Types of *Rūpa*

12. However, we also hear the chewing of the apple, the taste, its smell, and also feel the texture of the apple in the hand. **Thus, five types of *rūpakkhanda* go through the mind in that short time.**

- **In other words, the relevant *rūpakkhanda* is the aggregate of all those *rūpakkhanda* formed by the five senses.**
- The mind is able to put all of those together and provide a seamless experience of a “person eating an apple” by looking at the overall *rūpakkhanda* accumulated over several minutes.
- But in reality, it is just a collection of many DISCRETE events taking place at a very fast rate. **This is why it is important to understand the basic concept explained in the video in the post “[Vision Is a Series of “Snapshots” – Movie Analogy](#).”**
- Here is another analogy. In the old days, people made metal chains by connecting many small metal loops by hand. All one does is connect two loops at a time. You see a “chain” only after you connect many such loops and look at the result of that activity.

Next Post

13. Experiencing a sensory input involves not only the *rūpakkhanda* but also associated “mental aspects”. In the next post, we will discuss that.

- As we will see, the other four *khandhās* (*vēdanākkhandha*, *saññākkhandha*, *saṅkhārakkhandha*, and *viññāṇakkhandha*) work the same as the *rūpakkhanda*. That is why we discussed *rūpakkhanda* in detail.

6.1.1.2 Five Aggregates – Experiences of Each Sentient Being

.7

April 24, 2022; revised April 25, 2022; August 2, 2022

Five aggregates (*pañcakkhandhā*) are the accumulation of one's experiences and expectations for the future. Not only a human but any sentient being has its *pañcakkhandhā*.

Accumulation of *Rūpakkhandha* (Form Aggregate) With Each Sensory Experience

1. We discussed how one's *rūpakkhandha* grows with each sensory experience in several previous posts,
 - A sensory experience occurs when an external *rūpa* comes into contact with an internal *rūpa*, i.e., when an *ārammaṇa* (*vaṇṇa rūpa*, *sadda rūpa*, *gandha rūpa*, *rasa rūpa*, *phoṭṭhabba rūpa*, or a *dhamma rūpa*) comes to the mind either via the “five physical doors” or directly (*dhamma rūpa*).
 - Thus during the waking hours, one's *rūpakkhandha* (form aggregate) grows and is added to the existing *rūpakkhandha* (collection of *rūpa* that one has ever experienced.)
 - We need to discuss how **all five aggregates (*pañcakkhandha*) grow simultaneously.**

Each Sensory Contact Also Gives Rise to the Four Mental Aggregates

2. The easiest way to look at that is as follows. One of the six types of *vipāka viññāṇa* (*cakkhu*, *sota*, *ghāṇa*, *jivhā*, *kāya*, *mano viññāṇa*) arises with each such sensory experience.
 - That *vipāka viññāṇa* includes *vedanā*, *saññā*, and thus *mano saṅkhāra* AUTOMATICALLY. Note that *mano saṅkhāra* is “*vedanā* and *saññā*” (see [Ref. 1](#)). At this initial stage, there will be no *vacī* or *kāya saṅkhāra*.
 - Therefore, all five aggregates grow with EACH sensory experience.
3. We take the next step and see how the aggregates of feelings, perceptions, “mental formations,” and “consciousness” arise. As we have discussed, it is better to use the Pāli terms of *vedanākkhandha*, *saññākkhandha*, *saṅkhārakkhandha*, and *viññāṇakkhandha* instead of those English terms.
 - As I have explained, only one type of *viññāṇa* can be called “consciousness,” and that is *vipāka viññāṇa*.
 - However, *viññāṇakkhandha* includes all kinds of *viññāṇa*. See “[Distortion of Pāli Keywords in Paticca Samuppāda.](#)”

Example – Visual Sensory Contact

4. A *cakkhu viññāṇa* gets added to *viññāṇakkhandha* simultaneously with the addition of a “mental impression of a *rūpa*” to *rūpakkhandha*.
 - Simultaneously, that *cakkhu viññāṇa* not only with an impression of the *rūpa* but is accompanied by *vedanā*, *saññā*, and *saṅkhāra* as well, and additions to *rūpakkhandha*, *vedanākkhandha*, *saññākkhandha*, and *saṅkhārakkhandha* take place simultaneously.
 - Think carefully about that. **With each sensory input (*ārammaṇa*), ALL FIVE AGGREGATES grow.**

All Five *Khandhās* Arise Together

5. We based our discussion in the previous two posts on *rūpakkhandha* on the “[WebLink: suttacentral: Khandha Sutta \(SN 22. 48\).](#)”
 - The same *sutta* describes the other four *khandhās* in the same way as the *rūpakkhandha*, as we can expect.

- Thus, for example, *vedanākkhandha* is: “Any kind of *vedanā*—**past**, future, or present; internal or external; coarse or fine; inferior or superior; far or near: all of them belong to the aggregate of form or *vedanākkhandha*.”
- After that, the Buddha concludes, “*Ime vuccanti, bhikkhave, pañcakkhandhā*” or “*Bhikkhus*, Those are the five aggregates.”

We Recall Not Just Form Aggregate but All Five Aggregates

6. Therefore, as soon as an *ārammaṇa* goes through the mind, a record of the associated *rūpa*, *vedanā*, *saññā*, *saṅkhāra*, and *viññāṇa* is added to the five aggregates (*pañcakkhandha*.)

- Thus, **when we recall a past event**, we remember **the *rūpa* and the mental aspects associated with that event**, i.e., the *pañcakkhandha* related to that event. **The “past component” of the *pañcakkhandha* also goes by “*nāmagotta*.”**
- The “past component of *pañcakkhandha*” is preserved as “*nāmagotta*” in the *viññāṇa dhātu*.
- For example, when you recall a tasty meal last week, you identify the type of food and the taste. You had “good feelings” about the meal, which is *vedanā*.

Memories (*Nāmagotta*) Preserved in *Viññāṇa Dhātu*

7. Even though most of us cannot, few people can recall past events from this life in astonishing DETAIL.

- Jill Price and a few other people can recall memories in such detail only because those memories (*nāmagotta*) have been in the *viññāṇa dhātu*. See “[Where Are Memories Stored? – Viññāṇa Dhātu](#).”
- With advances in science and access to experiences by people worldwide, evidence keeps accumulating for Buddha Dhamma. Another related study is on Near-Death-Experiences (NDE) conducted by heart surgeons. See “[Near-Death Experiences \(NDE\): Brain Is Not the Mind](#).”
- In the same way, some children can recall memories from their recent past lives. See “[Evidence for Rebirth](#).” Some *yogis* can remember many past lives. A Buddha can recall any past life as he wishes. For example, Buddha Gotama described the lives of several previous Buddhas in detail in several suttas. See, for example, “[WebLink: suttacentral: Mahāpadāna Sutta \(DN 14\)](#).”
- **None of those accounts can be explained by the proposal saying “consciousness and memories” arise in the brain.** A brain has NO DIRECT CONNECTION to past lives.

8. In #7 above, I stated, “A brain has NO CONNECTION to the past lives.” The brain can’t contain such memories intrinsically, i.e., **those memories obviously cannot be “stored in the brain.”** However, the brain DOES play a role in memory recall; see “[Brain – Interface between Mind and Body](#).”

- The *mana indriya* in the brain can extract memories from the *viññāṇa dhātu*. If a specific brain region is damaged, the brain will lose the ability to recall such memories. Just as sights come in through the physical eyes, memories come through the “*mana indriya*” in the brain.
- I have discussed that in “[Patient H.M. – Different Roles of Brain in Memory](#)” and a few other related posts. From the account of patient H.M., we can deduce that “*mana indriya*” **could be related to** THE hippocampus in the brain. He lost the ability to recall memories after the removal of the hippocampus.

Each Sentient Being Generates Pañcakkhandha

9. Any sentient being (living in the 31 realms) continually adds to its *pañcakkhandha* via each sensory experience. Even the smallest living creature generates *pañcakkhandha*.

- Of course, most animals do not have brains. They have different mechanisms for memory recall. They can recall mostly just their life experiences in their current life. For example, they know where they found food in the past, which areas to avoid because of dangers, etc.

- Our large brains (in particular the neocortex of the brain) make humans unique. The neocortex “slows down” the arising of *citta vīthi*. It takes time to process sensory data as we discussed in “[Seeing Is a Series of ‘Snapshots’](#).” That gives us time to make decisions and not just “go with the flow.” That makes humans unique to have “free will.”
- Even though some other mammals also have the neocortex, those are smaller. They all take action impulsively. Even some of us who have not cultivated mindfulness tend to act impulsively “without thinking through (about consequences of such actions).”

We Attach to *Pañcakkhandha*, Not Just to *Rūpakkhanda*

10. As discussed above, when we recall past events, we remember the corresponding *rūpa* and the associated mental aspects. **Then we attach to such *rūpa* that provided either joyful or hateful experiences.**

- In other words, our recollections (and attachments) involve all five aggregates (*pañcakkhandha*) associated with that event, not only the form aggregate (*rūpakkhanda*.)
- Attachment to *rūpa* cannot be dissociated from those mental aspects arising from the sensory contacts due to external *rūpa*.
- That is why “*pañca upādāna khandhā*” give rise to *dukkha*, not just the “*rūpa upādāna khandha*.”
- In the previous posts, we noted that *rūpupādānakkhandha* (*rūpa upādāna khandha*) is only a tiny fraction of *rūpakkhanda*. **Thus, it is also clear that *pañcupādānakkhandha* (*pañca upādāna khandha*) is only a small fraction of *pañcakkhandha*!**
- **Attachment to *pañcakkhandha* (i.e., *pañcupādānakkhandha*) is the root cause of future suffering.**
- We have previously discussed that in other posts; see, for example, “[Loka Sutta – Origin and Cessation of the World](#).” However, we will briefly discuss that here.

We Attach at the Present Moment!

11. We create *kammic* energies to power up future rebirths at the present moment, when we attach to an *ārammaṇa*. We attach via greed, anger, and ignorance. Ignorance of the Noble Truths prevents one from thinking about the CONSEQUENCES of one’s actions/speech/thoughts at a given moment.

- That is what the Buddha explained to Ven. Ānanda in the “[WebLink: suttacentral: Mahānidāna Sutta \(DN 15\)](#).”
- That is the *Idappaccayatā Paṭicca Samuppāda* that we have been discussing in the current series of posts: “[Paṭicca Samuppāda During a Lifetime](#).”
- In this post series, we are connecting to the ***pañcakkhandha* (five aggregates)**, which has been mistranslated or at least not adequately explained in most English texts.

Analysis of Deep Suttas Requires This Understanding

12. We incorrectly think that we see a “full figure of a person with one glance” or “a whole statement made by such person,” etc.

- However, those are just “collections” or “*khandhas*” of very brief “snapshots” put together by the mind (*viññāṇa*.) It is only a “magic show,” as the Buddha explained.
- That is what the Buddha explained to Bāhiya in the “[WebLink: suttacentral: Bāhiya Sutta \(Ud 1.10\)](#)” with the verse, “*diṭṭhe diṭṭhamattam bhavissati, sute sutamattam bhavissati...*” Seeing is just like taking a series of snapshots. What we PERCEIVE as a person walking is a series of such snapshots “made into a movie” by the mind. **The same holds for hearing, tasting, etc. That is why it is**

critically important to understand the current series of posts: “[Paticca Samuppāda During a Lifetime](#).” Don’t forget to watch the youtube movie in the post “[Seeing Is a Series of ‘Snapshots’](#)” and understand the basic idea.

- There are a series of *Bhaddekaratta Sutta* (MN 131 through MN 134) based on the same basic but deep concept. See, for example, the first one, “[WebLink: suttacentral: Bhaddekaratta Suttas \(MN 131\)](#).” The English translation there is completely off. **It has nothing to do with “One Fine Night,”** which is the title of the English translation!

Reference

1. In the [WebLink: suttacentral: Cūlavedalla Sutta \(MN 44\)](#) on the types of *saṅkhāra* generated: “*Assāsapassāsā kho, āvuso visākhā, kāyikā ete dhammā kāyappaṭibaddhā, tasmā assāsapassāsā kāyasaṅkhāro. Pubbe kho, āvuso visākhā, vitakketvā vicāretvā pacchā vācaṃ bhindati, tasmā vitakkavicārā vacīsaṅkhāro. Saññā ca vedanā ca cetasikā ete dhammā cittappaṭibaddhā, tasmā saññā ca vedanā ca cittasaṅkhāro*”ti.

– [The three *saṅkhārā* listed in the [Vibhaṅga 6](#) on Paṭicca Samuppāda Vibhaṅga of Abhidhamma Piṭaka are, *kāyasaṅkhāro*, *vacīsaṅkhāro*, and *cittasaṅkhāro*.]

– *Assāsa passāsā* (breathing in and out) is associated with the body (movements). Thus, *assāsa passāsā* is ***kāya saṅkhāra***.

– *Vitakka/vicāra* arise before speech “breaks out.” Therefore, *vitakka/vicāra* are ***vacī saṅkhāra***.

– *Saññā* and *vedanā* are associated with any *citta*. Thus, *saññā* and *vedanā* are ***citta (mano) saṅkhāra***.

6.1.1.2 Pañcupādānakkhandha – Attachment to One’s Experiences

.8

May 1, 2022

Even though *pañcakkhandha* includes many categories — including one’s all past experiences — we only attach to *pañcakkhandha* arising at the present moment, i.e., *pañcupādānakkhandha*.

We Attach to Pañcakkhandha That Arise at the Present Moment

1. Attachment to *pañcakkhandha* DOES NOT mean attachment to ALL OF accumulated *pañcakkhandha*.

- It just means attachment to the five aggregates that arise AT THAT MOMENT. That is a CRITICAL point to understand.
- We discussed that at the start of this series in “[Idappaccayatā Paticca Samuppāda – Bhava and Jāti Within a Lifetime](#).”
“*Idappaccayā*” comes from “*ida*” + “*paccayā*,” meaning “**based on the conditions at that time**.”
- Let us discuss that carefully and systematically since it is a CRITICAL issue. Many people say, “attachment to *khandhas*” with the idea of “attachment to ALL *khandhas* that define me.”
- We attach to “*khandhas*” that arise at the PRESENT MOMENT. There must be a “trigger” to be attached. Suppose you see, hear, taste, smell, touch, or think about something that you like/dislike/unsure. You may attach (*taṇhā*) or “get stuck with it” via greed/anger/uncertainty.
- Take a minute to contemplate that.

Arising of Pañcakkhandha Triggered by an Ārammaṇa

2. **The trigger to “get attached to something” is an ārammaṇa.** Let us think about what “triggers” an alcoholic (or even a casual drinker) to “have a drink.”

- A common trigger is if someone offers a drink. Even a casual drinker may accept the offer.
- For an alcoholic, the idea to “have a drink” may come to mind as a *kamma vipāka*. They would have built up an “expectation” (*kamma viññāṇa*) to “have a drink at a certain time.”
- Regardless of how the idea of “having a drink” comes to the mind, that is accompanied by a “visual of a drink” (added to *rūpakkhandha*), and the relevant mental aspects (*vedanā*, *saññā*, *saṅkhāra*, *viññāṇa*) associated with previous experiences of “having a drink” come to the mind. The latter “mental parts” are added to the *vedanākkhandha*, *saññākkhandha*, *saṅkhārakkhandha*, and *viññāṇakkhandha*. That is how the *pañcakkhandha* is added with an *ārammaṇa*, as we discussed in recent posts in detail.

How Do *Pañcakkhandha* Become *Pañcupādānakkhandha*?

3. Now, an alcoholic will become “joyful” and he will proceed to either accept the offer or make a drink for himself, depending on the two situations above. In other words, now *pañcakkhandha* has AUTOMATICALLY become *pañcupādānakkhandha*!

- But if the person does not like to drink alcohol, such a “joyful mindset” will not take place in him EVEN IF a drink is offered.
- Thus, for such an individual *pañcakkhandha* would arise when someone offered a drink. **But those will be based on his past experiences and his gati.** Because he does not have *gati* to crave “alcoholic drinks” it WILL NOT become *pañcupādānakkhandha*!
- That is the difference between *pañcakkhandha* and *pañcupādānakkhandha*!
- Just reading these words will not be enough to make progress. One must think through these concepts.

Samphassa-jā-Vedanā Arise Due to *Gati*

4. To put it another way, the alcoholic will automatically generate *pañcupādānakkhandha* which will have “*samphassa-jā-vedanā*” in his *vedanākkhandha*.

- On the other hand, the other person (who does not like alcohol) WILL NOT have “*samphassa-jā-vedanā*” in his *vedanākkhandha*.
- It is critical to understand what is meant by “*samphassa-jā-vedanā*.” See, “[WebLink: PureDhammaSearch: Search Results for: samphassa vedanā.](#)”

5. It is mainly the *vedanā* (that arises with *pañcakkhandha*) leading to the attachment. If it is *sukha vedanā*, one attaches with greed, and a *dukkha vedanā* leads to attachment with anger. A neutral *vedanā* could also lead to attachment via ignorance (one does not understand the proper response to an *ārammaṇa*.) [See “[WebLink: suttacentral: Anicca Sutta SN 36.9](#)” which says that *vedanā* is *anicca*, *saṅkhata*, *paṭiccasamuppānā*, *khaya*dharmā, *vaya*dharmā, *virāga*dharmā, *niro*dharmā.]

- Following are examples. Eating tasty food gets one attached to it; they will try to figure out how to taste it again. Seeing an enemy succeeding in life, some people will try to get involved and put obstacles in their way. Seeing shadowy figures at night may cause anxiety.
- Let us analyze the example in the post, “[Aggregate of Forms – Collection of ‘Mental Impressions’ of Forms](#),” to get more clarity.

Example With Many *Ārammaṇa*

6. Sometimes many *ārammaṇa* run through our minds within minutes. In such cases, only one may lead to *pañcupādānakkhandha* even though all of them contribute to *pañcakkhandha*.

- We started in that post (in #3) with the following example. Suppose you are having a meal with a friend. We analyzed how many *citta vīthi* run through your mind within a few minutes due to different *ārammaṇa*. To keep the discussion simple, let us bypass the *citta vīthi* analysis.
- Your friend is talking, and you are listening. That is an *ārammaṇa* coming through *sotadvāra* or the ears. You see him too, and that *ārammaṇa* comes through *cakkhudvāra* (eyes). You taste the food (with *jivhādvāra* or tongue).
- The point relevant to the present discussion is that you not only see your friend's face, but you have certain "mental aspects" associated with that *rūpa* DEPENDING ON both him and what he is talking about. We cannot break those mental aspects into two separate parts, say one for just seeing his face and another for what he is talking about.

7. For example, suppose he started by saying that he had not seen you for several days and how glad he was to see you. The feelings that arise in you would be loving/sympathetic. Then he switched the subject to talk about a common enemy of the two of you, and the mental aspects that arise at that moment are more likely to be those of anger toward that other person.

- Thus within a few minutes, your mental aggregates will change.
- Now you are eating your food at the same time. If the food tastes good, there will be "good feelings" about the food.
- In a situation like that, what type of mental aspects become DOMINANT will depend on the RELATIVE STRENGTHS of the three *ārammaṇa* in that example.

We Attach Only to Certain Parts of *Pañcakkhandha* Arising at the Present Moment

8. If you become agitated about the "common enemy" that the friend is talking about, that will primarily affect your mindset. You may even forget that you are eating. You may even stop eating and start talking about a bad incident with that person.

- Therefore, three types of mental aspects may arise within minutes. All those are part of *pañcakkhandha* that occur within those few minutes.
- However, you focused on that "common enemy" in this particular case. That became "*pañcupādānakkhandha*" at that time. Your mind did not "**attach**" to your friend or your meal. It got "**trapped/stuck**" on only one *ārammaṇa*, that about the common enemy.
- That is a straightforward example of how *pañcakkhandha* arises and how a part of that *pañcakkhandha* can turn into *pañcupādānakkhandha*.

Attaching to Part of *Pañcakkhandha* Based on *Gati*

- 9. When an *ārammaṇa* comes to mind, that leads to accumulating the five aggregates (*pañcakkhandha*.)
- Even though *pañcakkhandha* includes ALL of one's experiences in the past, we attach ONLY to *pañcakkhandha* that arise at that moment.
- However, whether one attaches to *pañcakkhandha* arising is influenced by one's past experiences (a past component of *pañcakkhandha*) via one's *gati*.
- If you did not have *gati* to become upset about the person your friend was talking about, the situation would have been different. You may try to calm down the friend instead of encouraging him to criticize that person.

Gati Form Over Long Times Due to One's Cumulative Experiences

10. **It is necessary to get a good idea about the role of one's *gati*.** The Pāli word “*gati*” (pronounced “gathi”) can loosely one's character, which also defines one's habits.

- You may want to read “[The Law of Attraction, Habits, Character \(Gati\), and Cravings \(Āsava\)](#)” and the posts referred to there.
- “Good *gati*” lead to rebirths in the “good realms,” and “bad *gati*” lead to rebirths in the “bad realms.” When one comprehends the Four Noble Truths/*Paṭicca Samuppāda*/*Tilakkhaṇa*, one realizes that the goal is not JUST to develop “good *gati*” but to eventually “see” the fruitlessness of such efforts. An *Arahant* has removed all *gati*.
- However, one MUST remove the “bad *gati*” first. Then with wisdom, one will see how to remove all *gati* GRADUALLY. See “[9. Key to Ānāpānasati – How to Change Habits and Character \(Gati\)](#).”

One Attaches Automatically According to One's Gati

11. Whether one gets attached to a given *ārammaṇa* (sight, sound, taste, smell, touch, thought) depends on TWO things. One is the *ārammaṇa* itself, and the second is that person's “*gati*” (character/habits.)

- Each person has a unique set of *ārammaṇa* that lead to attachment. No two people will attach to the same types of *ārammaṇa*.
- Furthermore, as one's *gati* change, that set will also change. Also, the *ārammaṇa* itself can change too. For example, X may dislike Y because of a particular characteristic of Y, but if Y gives up that, X may start liking Y.
- **Thus, what matters is one's *gati* at the present moment when one is experiencing a certain *ārammaṇa*.** That is the critical principle in *Idappaccayatā Paṭicca Samuppāda*.

Kamma Viññāṇa Form When We Attach

12. Upon getting attached to an *ārammaṇa*, we make expectations. Those are *kamma viññāṇa*.

- Suppose a friend tells you that he tasted a nice meal at a particular restaurant. You are impressed by his description, and you decide to taste that meal. That expectation of enjoying that meal is a *jīvhā viññāṇa*.
- The conversation you had with the friend is a part of *pañcakkhandha*. You may have talked about other things, and they are all part of *pañcakkhandha*. But only part of that *pañcakkhandha* became a *pañcupādānakkhandha* and generated a *kamma viññāṇa*, a future expectation to do something. It usually is an expectation based on greed, anger, or ignorance.
- That **expectation** generated a *kammic* energy that is in that *jīvhā viññāṇa*. It is in the *kamma bhava* (in *viññāṇa dhātu*) and can “come back to your mind” and remind you that you need to act on it. So, even a few days later, you will suddenly remember that conversation with the friend and may get the urge to taste that meal. You may call the restaurant and make a reservation.

Summary

13. I have tried to connect different concepts that we discussed in this new series on *Idappaccayatā Paṭicca Samuppāda* with other concepts like *kamma viññāṇa* and *gati* that we have discussed many times before.

- Buddha Dhamma is fully self-consistent. The more you learn, the more faith you will have. But it requires an effort to review those concepts and make necessary connections or see the relationships among them.

6.1.1.2 Noble Truth of Suffering- Pañcupādānakkhandhā Dukkḥā

May 7, 2022

The verse “*saṅkhittena pañcupādānakkhandhā dukkhā*” in the *Dhammacakkappavattana Sutta* (SN 56.11) says that attachment to *pañcakkhandha* (i.e., *pañcupādānakkhandhā*) is the root cause of suffering.

Noble Truth of Suffering

1. The Noble Truth of suffering explains the ROOT CAUSE of suffering.

- It is expressed succinctly in the “[WebLink: suttacentral: Dhammacakkappavattana Sutta \(SN 56.11\)](#)” as “*saṅkhittena pañcupādānakkhandhā dukkhā*” OR “In brief, **the cause of suffering is attachment to one's sensory experiences.**”
- In the previous post, we discussed why *pañcupādānakkhandhā* MEANS “attachment to sensory experiences.” See “[Pañcupādānakkhandha – Attachment to One's Experiences.](#)”
- That post culminated in a series of posts in the subsection “[Paticca Samuppāda During a Lifetime.](#)” If you are unable to see why *pañcupādānakkhandhā* means “attachment to sensory experiences,” please review all the posts in that subsection.
- **That is the First Noble Truth. Thus, it is critical to understand it.**

What You Do at the Present Moment Is What Counts

2. If you attach to an *ārammaṇa* at the present moment, TWO THINGS can happen.

- i. You “pull that *ārammaṇa* in.” The Pāli word for that is “*upādāna*.” I have often explained that “*upādāna*” means to “keep something close in mind.” **That is how one “grasps” a new existence at the end of the current existence.** That is the mechanism of grasping a new existence in *Uppatti* (or *Upapatti*) *Paṭicca Samuppāda*.
 - ii. When you grasp that “state of mind,” you start “living in that mindset.” Thus, you start thinking, speaking, and acting based on that *ārammaṇa*. **That leads to *kamma* formation during life,** i.e., via *Idappaccayatā Paṭicca Samuppāda*.
- In other words, attachment to an *ārammaṇa* can play essential roles in *Uppatti Paṭicca Samuppāda* (i above) and *Idappaccayatā Paṭicca Samuppāda* (ii above.)
 - I discussed that in detail in: “[Change of Mindset Due to an Ārammaṇa.](#)” Some people may not have understood that post at that time. It is a good idea to review that post in any case. Let me briefly summarize the two cases. You may want to read that post for details.

Change of Mindset Due to an Ārammaṇa

3. A mind usually is in the “**natural *bhavaṅga* state**” that it received at the beginning of its current existence (*bhava*.)

- However, when a strong *ārammaṇa* comes to mind, the mind switches over to a state compatible with that *ārammaṇa*. Depending on the strength of the *ārammaṇa*, that “**temporary *bhavaṅga* state**” could be there for a short time or many days.
- **Getting into a “temporary *bhavaṅga* state” is the same as getting into a “temporary *bhava*.”**
- For example, if you eat a tasty meal, you may have that “satisfied mindset” for a couple of hours. If you had a nice meal at a restaurant and talked to someone later that day, you may recommend the meal to that person.

- However, some *ārammaṇa* can lead to a “changed mindset” for longer and also lead to bad consequences. If an alcoholic who has been “sober” for several weeks is induced to take a drink, he/she could go back to the “alcoholic mindset” that may linger for a long time. If a husband catches his wife in bed with another man, that may get him to the mindset of a killer. He could be “born” in that mindset and may carry out the killing. By the time he comes back to his senses (i.e., to the “natural *bhavaṅga* state”) the damage is done!

Born in a “Temporary Existence” via an *Ārammaṇa*

4. Let us think about the “sad state of mind” that arises upon hearing about the death of a parent or a loved one. One could be in that “sad existence” for many weeks. **That “sad mindset” will affect one’s thoughts, speech, and actions during that time.** One will not feel like going to a party or to a movie.

- In the terminology of *Idappaccayatā Paṭicca Samuppāda*, we can understand how one got “temporarily born” in a “sad state of mind” upon hearing that sad news. **Those are “temporary *bhava* and temporary *jāti*” in *Idappaccayatā Paṭicca Samuppāda*.**
- I have explained that in detail in an earlier post in this series: “[Idappaccayatā Paṭicca Samuppāda – Bhava and Jāti Within a Lifetime.](#)”
- These concepts are very much interrelated. If you can “latch on” somewhere, you can pursue that and fully understand *Idappaccayatā Paṭicca Samuppāda*.
- If something is not clear, we can discuss it at the “[WebLink: PureDhamma: Forums.](#)” Don’t hesitate to ask questions. **The Buddha advised Ven. Ananda to learn how life evolves moment-to-moment based on the causes and conditions AT any given moment.** See, “[WebLink: suttacentral: Mahānidāna Sutta \(DN 15\).](#)”

Key Points of *Idappaccayatā Paṭicca Samuppāda*

5. An *Idappaccayatā Paṭicca Samuppāda* always starts with an *ārammaṇa* (sight, sound, taste, smell, touch, memory recall) that comes to the mind as a *vipāka viññāṇa*. I have discussed this in different sections of the website and only will give some of the links below. I discussed it extensively in the “[Origin of Life](#)” series, starting with the post, “[Chachakka Sutta – Six Types of Vipāka Viññāṇa.](#)”

- In the example above, it is the hearing of the death of a parent is a *sota viññāṇa* that comes in via the *sotadvāra* (“ear door.”) The *Idappaccayatā Paṭicca Samuppāda* process starts with “*salāyatana paccayā phassa*” where “*salāyatana*” is the “*sota āyatana*.” That can lead to contact or “*phassa*,” which is “*samphassa*” or “contact with one’s defilements.”
- That leads to the next several steps “*samphassa paccayā samphassa-jā-vedanā*,” “*samphassa-jā-vedanā paccayā taṇhā*,” “*taṇhā paccayā upādāna*,” “*upādāna paccayā bhava*,” “*bhava paccayā jāti*.”
- See “[Difference between Phassa and Samphassa.](#)”

6. Thus, upon hearing the sad news, one will “temporarily get into a sad *bhava*” and be “born in that sad existence for a while.” That is a “temporary birth” lasting as long as “temporary *bhavaṅga*” lasts. It could last for many weeks, depending on the person.

- In this case, the *ārammaṇa* of the “sad news” may not lead to *kamma* accumulation.
- But there are cases where one will be temporarily born in a “greedy state” or an “angry state.” That can contribute to (i) generating *kammic* energy that can lead to rebirths in “bad realms” and (ii) “grasping a new *bhava* at the “*cuti-paṭisandhi*” moment in *Uppatti Paṭicca Samuppāda*. Let us discuss an example.

Implications for *Uppatti Paṭicca Samuppāda* (Grasping a New *Bhava*)

7. This is essentially the same as what happens in *Idappaccayatā Paṭicca Samuppāda* described above, i.e., you “grasp that *ārammaṇa*” and “get into that mindset or the temporary *bhavaṅga* state.”

- But if that happens in the last *citta vīthi* for the current existence, then that “temporary *bhava*” BECOMES the next existence (*bhava*.)
- For example, if the *ārammaṇa* brought in at the last *citta vīthi* makes one angry, one will grasp an existence matching that “angry state mind.” Of course, the actual realm in the *apāyās* will be determined by “how angry one becomes.” If the angry mindset can kill a human, that may lead to grasping an existence in the *niraya* (similar to hell in Christianity.) If it is less, the next existence could be that of a vicious animal like a tiger.

8. Let us summarize the two PS cases of the result of grasping an *ārammaṇa*:

- ***Uppatti Paṭicca Samuppāda*:** That *ārammaṇa* is a special *ārammaṇa* brought in by *kammic* energy. It comes in with the last *citta vīthi* arises based on the strongest *kamma* that one has done up to that point. It could be from the current life or a previous life.
- ***Idappaccayatā Paṭicca Samuppāda*:** These *ārammaṇa* arise due to daily sensory experiences. If one gets attached to one, that could lead to the accumulation of new *kamma* (*kammic* energies.)

Cetanā Sutta* (SN 12.38) – Role of an *Ārammaṇa

9. If we attach to an *ārammaṇa*, that is when “all the troubles start.” The sequences of events are as follows:

- An *ārammaṇa* brings in an external *rūpa*. That *rūpa* comes in as a *rūpakkkhandha*, i.e., it is the result of many *citta vīthi*, each one bringing in just a fraction of that sight, sound, etc.
- That gives rise to the four mental *khandhas* (aggregates) of *vedanākkhandha*, *saññākkhandha*, *saṅkhārakkhandha*, and *viññāṇakkhandha*.
- Thus, all five aggregates (*pañcakkhandha*) arise with an *ārammaṇa*. **If the mind attaches** to that particular *pañcakkhandha*, each *khandha* becomes a *upādānakkhandha*. In particular, *viññāṇakkhandha* becomes *viññāṇupādānakkhandha*, **and the *viññāṇa* there is a *kamma viññāṇa* (it has an expectation.)**
- Thus, *pañcakkhandha* becomes *pañcupādānakkhandha*.
- That leads to either further accumulation of *kamma* (via a temporary existence) or grasping a new existence.

10. The “[WebLink: suttacentral: Cetanā Sutta \(SN 12.38\)](#)” summarizes what we discussed above. Of course, that English translation does not explain anything and can be misleading.

“*Bhikkhus, if you pursue an ārammaṇa* by thinking how good it is, and make plans accordingly, then a *kamma viññāṇa* (future expectation) is established. (“*Yaṅca, bhikkhave, ceteti yaṅca pakappeti yaṅca anuseti, ārammaṇametaṃ hoti viññāṇassa*” *ṭhitiyā*.)

When you **keep your mind on that *ārammaṇa***, that *viññāṇa* becomes established. (***Ārammaṇe sati patiṭṭhā viññāṇassa hoti***.)

When *viññāṇa* (expectation) is established and grows, there is rebirth into a new state of existence in the future. (*Tasmim patiṭṭhite viññāṇe virūḷhe āyatim punabbhavābhiniḍḍatti hoti*.)

When there is rebirth into a new state of existence in the future, future rebirth, old age, and death come to be, as do sorrow, lamentation, pain, sadness, and distress. (*Āyatim punabbhavābhiniḍḍattiyā sati āyatim jāti jarāmaraṇaṃ sokaparidevadukkhadomanassupāyāsā sambhavanti*.)

That is how this entire mass of suffering originates. (*Evametassa kevalassa dukkhakkhandhassa samudayo hoti*.)

- That summary includes both the *Idappaccayatā* and *Uppatti Paṭicca Samuppāda*.
- These *suttas* REQUIRE detailed explanations. Word-by-word translations are useless and can be misleading. Incorrect translation of words can magnify problems!
- **In particular, just translating *viññāṇa* there as “consciousness” is a grave error.** But those translators do not understand that *viññāṇa* can have different meanings depending on the context. Here it is a “*kamma viññāṇa*.”

Summary

9. It is critically important to understand the concept of *ārammaṇa* and the TWO main consequences of an *ārammaṇa*.

- ***Ārammaṇa* is simply a sensory input that grabs your attention.** It can come through one of the five physical senses (eyes, ears, nose, tongue, body touch) or the sixth one, the mind (memory recall.)
- If you attach to the *ārammaṇa* that comes in with the last *citta vīthi* in the current existence, and if your mind willingly grasps the corresponding mindset, you will be born in a new existence corresponding to that mindset. Note that it is NOT a conscious decision. You are capturing **a new existence automatically according to your *gati* at that moment.** That happens in *Uppatti Paṭicca Samuppāda*.
- If attachment to an *ārammaṇa* happens during daily life and gets one into a “temporary existence,” one will start accumulating *kamma* accordingly. *Idappaccayatā Paṭicca Samuppāda* describes this process.
- **The Buddha defined “*sakkāya*” to be *pañcupādānakkhandhā*.** “*Sakkāya Diṭṭhi* is the wrong view that *sakkāya* or *pañcupādānakkhandhā* leads to *sukha* (happiness). **When one understands *Paṭicca Samuppāda* and realizes that *pañcupādānakkhandhā* leads to suffering, one would get rid of *Sakkāya Diṭṭhi* and becomes a *Sotāpanna*.**
- We will discuss that in the next post.

6.1.1.2 Sakkāya Diṭṭhi and Pañcupādānakkhandhā

.10

May 15, 2022

Sakkāya diṭṭhi is the wrong view that there is an “unchanging personality” or some “permanent essence.”

Sakkāya = Pañcupādānakkhandhā

1. Several *suttas* explicitly state that the word “*Sakkāya*” means “*pañcupādānakkhandha*.” SN 38.15, SN 38.16, SN 22.105, SN 22.112, MN 14, MN 106, AN 4.33, and AN 6.61.

- In the “[WebLink: suttacentral: Sakkāyapañhā Sutta \(SN 38.15\)](#)” Ven. Sariputta explains: “Reverend, the Buddha said that “*Sakkāya*” means “the five **grasping** aggregates (*pañca upādānakkhandhā*)” — *rūpupādānakkhandha*, *vedanupādānakkhandha*, *saññupādānakkhandha*, *saṅkhārupādānakkhandha*, *viññāṇupādānakkhandha*.”
- The other *suttas* listed give the same explanation.
- Let us briefly summarize the key steps in the initiation of “*pañcupādānakkhandha*.” That will help us understand the connection between *sakkāya* and *sakkāya diṭṭhi*. As we know, one becomes a *Sotāpanna* by getting rid of *Sakkāya diṭṭhi*. Thus, it is critical to understand this process.

***Ārammaṇa* Recognized with a “Collection of *Rūpa*” (*Rūpakkhandha*)**

2. ***Pañcakkhandha* arises when an *ārammaṇa* comes to mind.** Quite simply, *pañcakkhandha* (five aggregates) are the *rūpa* and the four mental components (*vedanā*, *saññā*, *saṅkhāra*, *viññāṇa*) that arise due to that *rūpa*.

But why are they called “aggregates”? It is because the “*rūpa*” itself is seen, heard, tasted, smelled, felt, or comprehended as a result of many “automatic” steps, i.e., they DO NOT come to the mind “as a whole in one step.” Thus, the following are CRITICAL points:

- i. The mind understands the *rūpa* only after receiving many “snapshots” of the *rūpa*. Comprehension sets in with not just one “snapshot” but due to an aggregate of many such “snapshots.” In Pāli, it is a “*rūpa matta*” where “*matta*” means “a trace.” (By the way, that is the “*matta*” in “*diṭṭhe diṭṭha mattam bhavissati*” in the *Bāhiya Sutta*; see, #12 of “[Five Aggregates – Experiences of Each Sentient Being](#).”)
 - ii. For example, only a faint image of the tree comes in first when one looks at a tree. That image gets sharper and clear in several steps. But that happens too fast for us of those steps.
 - iii. It is an automatic process that takes place without us being consciously aware of it. Only the vastly purified mind of a Buddha can see that extremely fast process.
 - iv. **The point is that a “person” is not consciously involved in that fast process.** It takes place automatically.
3. I tried to explain that process in the previous posts in this series: “[Paticca Samuppāda During a Lifetime](#).” In particular, see “[Aggregate of Forms – Collection of “Mental Impressions” of Forms](#).” See #7 there.
- As I discussed there, it is necessary to hear the whole sentence “My Dad came to see me yesterday” to understand its meaning. However, the mind may receive it in several pieces of “my dad,” “came to,” “see me,” and “yesterday.” Those words could be separated by bits of other data coming through other senses, as discussed there. But the mind is able to collect and put together a data stream from each sensory input.
 - We consciously become aware of that “*rūpa*” (whether it is a visual, sound, taste, taste, touch, or a memory recall) only after that fast and automatic process occurs. That takes only a split second.
 - But there is another critical process that also happens automatically and fast.

***Pañcakkhandhā* May Become *Pañcupādānakkhandhā* Instantly**

4. **By that time we become aware of the *rūpa* (or *ārammaṇa*) the mind may have already attached to that *ārammaṇa* based on our *gati*.**

- Thus, if one sees a figure that is compatible with one’s *gati*, the initial “attraction” has already taken place, and one is already taking a “second look” by the time one becomes aware of it.
 - **The whole idea behind “mindfulness” is to catch any “bad attraction/*ārammaṇa*” as early as possible and to stop it. But we DO need to engage in “good *ārammaṇa*” that lead to moral thoughts/speech/actions.**
5. In other words, what we discussed above is the initial sensory event (seeing someone, for example), getting attached to it automatically (*taṇhā*), and then pursuing that *ārammaṇa* with “*taṇhā paccayā upādāna*” step in *Paṭicca Samuppāda*.
- We have experienced a sensory event (*ārammaṇa*) and have already attached to it. That means “*pañcakkhandha*” has automatically turned into a “*pañca upādānakkhandha*.”

Sakkāya* = *Pañca Upādāna Khandha

5. But that will happen ONLY IF we (or our mind) perceive such an *ārammaṇa* to be beneficial to us. For example, one could be easily attracted to the opposite sex if one has “*kāma gati*.” Any man would be able

to an attractive woman, i.e., *pañcakkhandha*, for that sight will arise in any man. However, attraction to that woman will not happen for an *Anāgāmi/Arahant*, i.e., they will not generate *pañcupādānakkhandha*.

- The word “*Sakkāya*” comes from “*sath*” + “*kāya*,” where “*sath*” means “good/beneficial” and “*kāya*” is a “collection.” Since “*khandha*” also means a “collection,” we can see that “*Sakkāya*” means “beneficial collections/aggregates.”
- That is why “*Sakkāya*” means the same as “*pañca upādāna khandha*” (*pañcupādānakkhandha*), as stated in those suttas in #1 above.
- One would have “*upādāna*” only for those things that one deems to be beneficial.

We Can Stop the “*Upādāna Paccayā Bhava*” Step

6. In the above we discussed the fact that the mind can AUTOMATICALLY attach to an *ārammaṇa* without us being aware of it.

- As we know, that *ārammaṇa* comes through an *āyatana* via the “*salāyatana paccayā phassa*” step in *Paṭicca Samuppāda*. Then the next two steps of “*phassa paccayā vedanā*” and “*vedanā paccayā taṇhā*” also happen automatically.
- It is only at the step “*taṇhā paccayā upādāna*” that we become aware of that “attachment.” That is when we start accumulating new *kamma* via “*upādāna paccayā bhava*” step by acting with *avijjā*: “*avijjā paccayā saṅkhāra*.”
- That “*upādāna paccayā bhava*” step creates a “temporary *bhava*” (greedy *bhava*, angry *bhava*, etc) and that is when we start doing new *kamma* (via *abhisāṅkhāra*.) See “[Change of Mindset Due to an Ārammaṇa](#).” In fact, it would be a good idea to review the previous posts in this series: “[Paticca Samuppāda During a Lifetime](#).”
- It is at this step, we can deliberately and willfully stop new *kamma* (*abhisāṅkhāra*) accumulation. That is a critical point discussed in detail in “[Difference Between Tanhā and Upādāna](#).”
- Now, let us get back to the issue of *sakkāya diṭṭhi*.

The View of *Sakkāya* Is “*Sakkāya Diṭṭhi*”

7. As long as one has the wrong view that attachment to “worldly sensory inputs” can be beneficial, one has “*sakkāya diṭṭhi*.” **In other words, *sakkāya diṭṭhi* is the view that *pañcupādānakkhandhā* lead to *sukha*.**

Removal of *Sakkāya diṭṭhi* at the *Sotāpanna* stage leads to the removal of “*diṭṭhi vipallāsa*.”

- However, as I have explained over and over, getting rid of that wrong view WILL NOT remove “*saññā vipallāsa*” and “*citta vipallāsa*.” Thus, a *Sotāpanna* may still engage in pleasurable activities, including sex. However, a *Sotāpanna* WILL NOT be tempted to do *apāyagāmi* deeds in pursuit of sensory pleasure.
- See details in “[Vipallāsa \(Diṭṭhi, Saññā, Citta\) Affect Saṅkhāra](#).”

8. Understanding the concepts of the five *khandhas* (*pañcakkhandha*) — and how they can become *pañcupādānakkhandha* — will help get rid of *Sakkāya diṭṭhi*.

- The concept of *khandhas* shows that at least the initial attachment DOES NOT involve a person. As I have tried to explain in the posts in this section, **experiencing sensory input is an automatic process.**
- Furthermore, even the first stage of “attachment to a sensory event” (and to give rise to *pañcupādānakkhandha*) **happens automatically, based on one’s *gati*.**

***Sakkāya Diṭṭhi* = View that “There is an Unchanging Person” Experiencing the World**

9. That means “there is no unchanging person.” As one’s *gati* change, one will respond differently to sensory inputs. As one makes progress on the Noble Path, one’s *gati* to be attracted to various *ārammaṇa* will decrease, and there will be no “*gati*” left at the *Arahant* stage. Future births are according to dominant *gati*. An *Arahant* with no *gati* left will not be reborn in this suffering-filled world of 31 realms.

- That is a key concept in Buddha Dhamma. There is no “permanent soul” as in Abrahamic religions. There is no “*ātma*” as in Hinduism.
- Note that even after the removal of *Sakkāya diṭṭhi*, the perception of a “me” or “I” will still be there. That goes away only at the *Arahant* stage with the removal of “*māna*” (or “*asmi māna*.”) While *Sakkāya diṭṭhi* is a *saṃyojana* removed at the *Sotāpanna* stage, “*māna*” is a higher *saṃyojana* removed at the *Arahant* stage.
- The concepts of “*atta/anatta*” in Buddha Dhamma are NOT directly related to the concepts of “*ātma/anātma*” in Sanskrit. There is so much confusion these days because many people incorrectly assume that *anatta* is the same as *anātma*.

Another way to Explain

10. *Pañcakkhandha* (five “**aggregates**”) are the aggregates of *rūpa*, *vedanā*, *saññā*, *saṅkhāra*, and *viññāṇa* that one experiences. We don’t EVER experience a *rūpa* “in one instant.”

- For example, we don’t see a tree with one *citta*. For us to be AWARE of that tree, many *cittā* (many *citta vūthi*) must go through the mind. The impression of a “tree” emerges gradually, with many *cittā* contributing a “partial image” of that tree. To recognize the tree, many such “partial images” must accumulate. That is a *khandha* or an aggregate. But since it happens VERY FAST, we feel like we see a tree “in one shot.” See “[Seeing Is a Series of ‘Snapshots’](#)”
- Our mental “aggregates” also accumulate over many *citta vūthi*. That is why they are also “aggregates.” **The point here is that the idea of a “person” seeing a tree (and generating mental aspects based on it) is not what actually happens.**
- **Rather it is the result of an automatic process with many steps taking place in the seat of the mind (*hadaya vatthu*.) But it happens according to one’s *gati*.** We can control that automatic process only indirectly via changing *gati*.

11. Let us briefly review what happens when an *ārammaṇa* that gives rise to attachment via greed/anger/ignorance comes in via one of the six senses:

- i. The *ārammaṇa* comes in. That gives rise to *rūpakkhanda* (a mental imprint of the *rūpa*), and the other four mental aggregates, i.e., an *ārammaṇa*, give rise to *pañcakkhandha*.
- ii. If the mind attaches to that *ārammaṇa* (i.e., to the *pañcakkhandha*), it keeps that *ārammaṇa* “close to ti and starts acting on it.” That means *pañcakkhandha* turned into *pañcupādānakkhandha*.
- iii. “Starts acting on that *ārammaṇa*” means generating *mano*, *vacī*, and *kāya saṅkhāra*. Subsequent speech and actions arise based on *vacī* and *kāya saṅkhāra*. **They are *abhisāṅkhāra* If greed/anger/ignorance come into play!** It is critical to note that in *Paṭicca Samuppāda*, *saṅkhāra* in “*avijjā paccayā saṅkhāra*” are *abhisāṅkhāra*.

Why Would a Mind Attach to an *Ārammaṇa*?

12. Now, why would a mind attach to that *ārammaṇa*? That happens due to one of three possible reasons:

- i. That *ārammaṇa* (sight, sound, taste, smell, touch, or memory) is perceived to be beneficial/pleasurable. That gives rise to attachment with greed/liking (*lobha*).
 - ii. It is perceived to be blocking one's pleasure, which gives rise to anger/hate (*dosa*.)
 - iii. The mind cannot understand whether that *ārammaṇa* can be beneficial or not. It is confused about how to respond due to ignorance (*avijjā*.)
 - We pursue such an *ārammaṇa* because we value the six types of *rūpa* in this world (sights, sounds, tastes, smells, touches, and memories of them.)
 - However, if we act with *lobha*, *dosa*, and *moha* (*avijjā*) in that pursuit, we will generate *abhisankhāra* with *avijjā*. That will inevitably lead to suffering in the future. *Paṭicca Samuppāda* guarantees that.
 - That suffering may not materialize in this life and may result in future life. That is why it is hard for most people to understand the laws of *kamma*, especially if they don't believe in rebirth.
13. In #12 above, I didn't ask, "Why Would a **Person** Attach to an *Ārammaṇa*?"
- That is because the initial attachment is spontaneous. You don't do it consciously. It automatically happens ACCORDING to your *gati*. **Since one's *gati* can change, a "person with a fixed identity" does not exist.**
 - That is a critical point to understand and is the **key to getting rid of *Sakkāya diṭṭhi*.**
 - There will be no instant attachment if someone does not have *gati* to be attracted to an *ārammaṇa*.
 - One will start thinking about an *ārammaṇa* ONLY IF that initial attachment occurs. But that happens only after the AUTOMATIC attachment to that *ārammaṇa*!
14. It is important to understand that there is no "unchanging personality" or a "permanent essence" within each of us. While we are humans in this life, one could be born a *Deva*, *Brahma*, an animal, or even worse. *Sakkāya diṭṭhi* goes away with that realization.
- That is the key step toward the *Sotāpanna* stage.

6.1.1.2 Bhava and Jāti Within a Lifetime – Example .11

May 22, 2022

Bhava and *jāti* within a lifetime discussed with an example of how a thief is born.

Paṭicca Samuppāda During a Lifetime

1. As the Buddha advised Ven. Ānanda, in the "[WebLink: suttacentral: Mahānidāna Sutta \(DN 15\)](#)," it is necessary to understand how one can be "born" in very different "births" **during a lifetime**. The *Idappaccayatā Paṭicca Samuppāda* explains that process.

- The same principle operates in the *Uppatti Paṭicca Samuppāda*, which explains **future births** in various realms.
- We are at the last post in this subsection on the "[Paṭicca Samuppāda During a Lifetime](#)." After reading this post, you can review the previous posts to "fill in" any gaps. Please don't hesitate to ask questions at the discussion forum.
- With the help of the material we discussed, let us discuss a couple of examples of "births within a lifetime."

An Easy Way to Understand *Paṭicca Samuppāda*

2. There are many ways to analyze and understand *Paṭicca Samuppāda*. In the current section, I have discussed it a bit deeper. That analysis will help get rid of *sakkāya diṭṭhi*.

- But we can get the basic ideas behind *Paṭicca Samuppāda* by looking at the easy-to-understand relationships between causes and effects.
- The critical point is that we tend to engage in “mind-pleasing activities” without thinking about their consequences. Let us take an example.

No One Is Born a Thief – Birth Within a Lifetime

3. Let us consider a hypothetical situation. A man (say, person X) is in prison for stealing.

- X was NOT born a thief by birth. At birth, he was like any other human baby.
- If we ask X to explain how he became a thief, the explanation could be something like the following.

“I now understand what happened to me. I was born into a good family, but I started associating with bad friends at school. Their influence led me to participate in immoral activities for fun. We started drinking, and then we got into drugs. When we ran out of money, we started stealing.

Both my parents worked, and it was too late by the time they found out and started advising me. But then it was too late. I enjoyed the time with my friends, and we got deeper into drugs and stealing to pay for the drugs. Eventually, I got fed up with my parents’ ” interference ” and moved out of their house. I quit school and joined a gang. We resorted to selling drugs and stealing to make a living. Eventually, several of us were caught in a robbery and sent to prison.

I would not be a thief if I did not come under the influence of those bad friends. I could have been “saved” if my parents had intervened earlier.”

Connection to *Idappaccayatā Paṭicca Samuppāda*

4. That is indeed a sad story. But it is also apparent that the person has now realized the basic principles of *Idappaccayatā Paṭicca Samuppāda*.

- When X started enjoying the “bad activities” with his friends, he never thought about the dire consequences of such actions. They were “fun activities.” He was probably too young to realize that such “fun activities” would have harmful consequences.
- His parents were too busy to notice him “going down the wrong path;” if they realized what was happening to X early enough, they could have advised him about the bad consequences of drinking, taking drugs, and stealing.
- **He was “born a thief” because his mindset changed to that of a thief**, i.e., he engaged in activities matching the mindset of a thief. That led to cultivating “thief *bhava*” from his early school days.
- We can figure out the Pāli terms in *Paṭicca Samuppāda* that contributed to X becoming a thief.

Understand the Pāli Terms – Not Memorize

5. X went down the wrong path because he started liking the activities of his evil friends and was constantly thinking about such activities. That is the critical “*upādāna*” step, where such activities become priorities. He would instead engage in such activities than spend time at home or playing with other kids.

- He got attached to such activities (*taṇhā*) because he enjoyed such activities. Drinking and using drugs provided “good sensations” (*vedanā*.) X got attached to such *vedanā*: “*vedanā paccayā taṇhā*.” But that *vedanā* was a “mind-made *vedanā*.”
- Those are “mind-made *vedanā*” or “*samphassa-jā-vedanā*.”

Phassa and Samphassa

6. Now, we have traced back to the critical step. How did X start liking alcohol?

- We can understand the difference between “*phassa*” and “*samphassa*.” A natural sensory contact is “*phassa*.” That is the contact between the sensory input and the corresponding sensory faculty. In our example, contact (*phassa*) is alcohol touching the tongue.
- For most people, that *vedanā* (taste of alcohol) is not good. It is a bitter taste, especially for strong alcohol. So, our teenager was probably not attracted to that taste, and he may have even refused to drink at first. But he probably drank under the “peer pressure” and got drunk. With more drinking, one gets used to the taste and likes the feeling of “being drunk.” Furthermore, the drunken mindset in a party atmosphere gets teenagers into the “party mood.”

8. With time, X’s mind generates not the natural “*vedanā*” but the mind-made “*samphassa-jā-vedanā*.”

- Thus, the “*phassa paccayā vedanā*” step in PS is only a brief version. The expanded version is “*samphassa paccayā samhassa-jā-vedanā*.”
- Thus, it was the “*jivhāyatana*” (*jivhā āyatana*) that mainly contributed to the “*salāyatana paccayā samhassa*” step leading to “*samphassa paccayā samhassa-jā-vedanā*.” In other words, the taste of alcohol generated a “mind-made *vedanā*” of happiness, especially in a party atmosphere.

Once on the Wrong Path, It Is Hard to Change

9. Thus, now it became a habit (*gati*) for X to get drunk and have a good time with his friends. Then one day, someone brought drugs to a party, and they all get hooked on drugs.

- Over time, X cultivated a “*kamma viññāṇa*” or an “expectation” to enjoy alcohol, drugs and partying with friends. That *kamma viññāṇa* slowly got established as X started enjoying those activities more. His mind was constantly on the lookout for opportunities to get together with friends and have a good time. That is the critical “*upādāna*” step.
- That means it became easier to get to that mindset with an *ārammaṇa*. All X needed was a prompting by a friend. Even the sight of a familiar drug dealer may prompt him to buy some drugs and enjoy them by himself.
- Any bad habit (*gati*), when cultivated, leads to more bad habits. When X and his friends didn’t have money to buy alcohol/drugs, they resorted to stealing. That is how X was “born a thief.”

Most People Realize the Problem Only After Damage Is Done

10. It was only after getting caught stealing and sent to prison that X realized what happened to him.

- Even though he was not born a thief when his mother gave birth to him, X is now known as a thief. Everyone knows him as a thief.
- Of course, he had no desire to become a thief. His goal was to “enjoy life” with his friends. But that way of enjoying life involved an immoral way of thinking, immoral speech, and immoral deeds.
- He unknowingly got *paṭicca* (“*paṭi*” + “*icca*” or “willingly attached”) to things that would inevitably lead to *samuppāda* (“*sama*” + “*uppāda*” or “corresponding births”), i.e., to be “born a thief.”
- In other words, his mind generated *apuñña abhisankhāra* due to his ignorance (*avijjā*) of their consequences.
- Those *apuñña abhisankhāra* arise as to *mano*, *vacī*, and *kāya abhisankhāra*. They are immoral thinking, speech, and actions.

Need to Look at the Root Causes (*Lobha, Dosa, Moha*)

11. Note that X just focused on the immediate gratification of such activities. He never realized (and thus never thought about) the possible harmful consequences of such actions.

- Stealing was the secondary effect of X stating to drink, use drugs, and generally have a good time with his friends. The initial attraction was for the *vedanā* experienced with drugs and alcohol. Drinking alcohol led to craving that taste and the accompanying “feel good” mindset.
- **X got attached or *paṭicca* (“*paṭi*” + “*icca*” or “willingly attached”) to things that gave immediate sensory pleasure.** We could say that he was “born” in a “joyful state” at that time.
- However, in a deeper sense he got attached to immoral causes with much more drastic and dangerous “births” in the future. Those deeper causes would inevitably lead to *samuppāda* (“*sama*” + “*uppāda*” or “corresponding births”), i.e., to be “born a thief” later in life.
- But it does not end there. Part of that *kammic* energy can even bring future rebirths, depending on the severity of *kamma* done with that mindset. For example, if X killed someone during a robbery, that would definitely lead to a “bad rebirth.” **That comes under *Uppatti Paṭicca Samuppāda*.**

Review of the Steps

12. Let us review the steps that led to X becoming a Thief.

- It all started with X starting his associating with bad friends. Under their influence, he started drinking due to his ignorance about bad future outcomes. That is “*avijjā paccayā saṅkhāra*” or, more precisely, “*avijjā paccayā abhisāṅkhāra*.”
- With frequent cultivation of *abhisāṅkhāra*, he developed a desire/future expectation (*kamma viññāṇa*) to enjoy drinking/partying. That is “(*abhi*) *saṅkhāra paccayā (kamma)viññāṇa*.”
- His mind was constantly visualizing scenes of such get-together, alcohol, his favorite friends, etc. Those are the “*nāmarūpa*” that arise in his mind with that *kamma viññāṇa*: “(*kamma*)*viññāṇa paccayā nāmarūpa*.”
- When such *nāmarūpa* arose in his mind, he will start using his sensory faculties. For example, he may call a friend to meet for a drink or organize a party. He may look for a drug dealer to get more drugs, etc. That is “*nāmarūpa paccayā salāyatana*.”
- When such encounters took place, he would be fully engaged in drinking, taking drugs, etc., and would enjoy such experiences (*samphassa-jā-vedanā*). That involves “*salāyatana paccayā samphassa*” and “*samphassa paccayā samphassa-jā-vedanā*.”
- The more he does those things, the more he will attach to such activities: “*samphassa-jā-vedanā paccayā taṇhā*.” That will make the “*upādāna*” stronger: “*taṇhā paccayā upādāna*.”
- With such a strong attachment to those activities, he would do it again and again with “*avijjā paccayā abhisāṅkhāra*,” and the whole cycle repeated repeatedly.

13. If he didn’t have money for such activities, he would steal. It probably started by stealing from his parents. As X got into drugs, he and his friends had to start stealing more. Thus they cultivated the *gati* of thieves, and got into “thief *bhava*” and “thief *jāti*.”

- That “*samphassa-jā-vedanā*” can arise even without taking a sip of alcohol but seeing an alcohol bottle or even mentioning an upcoming party.
- Even if one has not studied the formal *Paṭicca Samuppāda*, one can understand the above steps.
- However, it is imperative to understand the meanings of those Pāli words, so that we can understand them in other contexts.

6.1.1.3 Often Mistranslated Pāli Keywords

May 28, 2022

[Rāga and Jhāna – Two Commonly Misunderstood Words](#)

6.1.1.3 Rāga and Jhāna – Two Commonly Misunderstood Words

.1

May 28, 2022; revised August 27, 2022

We will discuss two key Pāli words, *rāga* and *jhāna*, that are also interrelated. People cultivate *anāriya jhāna* due to *rūpa rāga* and *arūpa rāga*.

The Elephant in the Room – Wrong Translations

1. Many people are prevented from learning the correct teachings of the Buddha because of two key issues.
 - i. It has become standard to translate the *Tipiṭaka suttas* word-by-word. Many *suttas* (especially on deep concepts) REQUIRE lengthy explanations.
 - ii. Some Pāli keywords DO NOT have equivalent English words. It is WRONG to translate *anicca* and *anatta* as impermanence and “no-self.”
 - I discussed this issue in” [“Elephant in the Room 1 – Direct Translation of the Tipiṭaka”](#) and [“Distortion of Pāli Keywords in Paticca Samuppāda.”](#)
2. *Anicca* and *anatta* are two words that require lengthy explanations. I have explained them in several posts. I will try to organize them in upcoming posts.
 - I will first explain the correct meanings of some simpler keywords.

Rāga – Not “Lust” or “Attachment”

3. The correct “*pada niruttī*” (etymology) of “*rāga*” comes from “*rā*” + “*agga*,” where “*rā*” means to “travel (in the *samsāric* journey)” and “*agga*” is to “give priority.” **Thus, “*rāga*” means “giving priority to engage in *samsāric* journey or rebirth process.”** That happens because of the tendency to value different aspects of this world.

There are three types of *rāga*: ***kāma rāga*, *rūpa rāga*, and *arūpa rāga*.**

- i. ***Kāma rāga* prioritizes sensual pleasures in the higher seven realms of *kāma loka*:** the human realm and the six *Deva* realms. As long as one craves such pleasures, one will be born among the 11 realms of the *kāma loka*; rebirths in the lowest four realms are possible if one engages in immoral deeds while seeking sensual pleasures. See, [“Lobha, Rāga and Kāmacchanda, Kāmarāga.”](#)
- ii. **Those who cultivate the *rūpāvacara jhānā* prioritize *jhānic* pleasures over sensual pleasures; they have *rūpa rāga*.** One has to either SUPPRESS or ELIMINATE *kāma rāga* to get to such *rūpāvacara jhānā*. Such *jhānā* led to rebirths in the 16 *rūpāvacara Brahma* realms. Those *Brahmas* are born without the sense faculties for taste, smell, and touch because those senses are needed only for sensual pleasures.
- iii. **Those who have cultivated the *arūpāvacara jhānās* have *arūpa rāga*.** That means one would be satisfied with just having the mind faculty (even less burden than *rūpāvacara jhānā*.) Those who cultivate *arupāvacara jhānā* will be reborn in the four highest *Brahma* realms.
 - **To attain *Nibbāna* (at *Arahanthood*), one must remove all three types of the *rāga*.**
 - However, any of the three types of *rāga* CAN NOT be removed with willpower. It happens automatically via comprehension of the Four Noble Truths. See [“Is It Necessary for a Buddhist to Eliminate Sensual Desires?”](#)

Removal of *Kāma Rāga*, *Rūpa Rāga*, and *Arūpa Rāga*

4. The critical point here is that even if one gets to the highest *arupāvacara jhānās*, one can return to the *kāma loka* in the future and be reborn in an *apāya*.

- Until one gets to at least the *Sotāpanna Anugāmi* stage, rebirth in any realm is possible in the future because one can be born in the highest realms without overcoming the three *saṃyojana* that can lead to rebirth in the *apāyās*. But a *Sotāpanna Anugāmi*, *Sotāpanna*, or a *Sakadāgāmi* will be reborn in the *kāma loka* because they have *kāma rāga*.
- With the **removal of *kāma rāga* (at the *Anāgāmi* stage)**, rebirths in the 11 realms of *kāma loka* will stop.
- ***Rūpa rāga* and *arūpa rāga* are two *saṃyojana* that will be removed only at the *Arahant* stage.** See “[Dasa Saṃyojana – Bonds in Rebirth Process.](#)”

5. Now, we can easily see why the Buddha said, “*rāgakkhayo Nibbānan*” OR “*Nibbāna* is the ending of all types of *rāga*.” **Full *Nibbāna* requires the removal of all three types of *rāga*.**

- When one would not prioritize any realm in *kāma loka*, *rūpa loka*, and *arūpa loka*, the mind will become free, and one will attain *Arahanthood*. Upon the death of the physical body, there will be no rebirth among the 31 realms in this world.
- Of course, when that happens, *dosa* and *moha* would have been eliminated when that happens. Thus, the verse: “*rāgakkhayo dosakkhayo mohakkhayo—idaṃ vuccati nibbānan*”*ti*. See, for example, “[WebLink: suttacentral: Sāmaṇḍaka Sutta \(SN 39.1\).](#)”

Jhāna – Result of *Puñña Kamma*

6. Cultivating *jhāna* is a particular type of *puñña kamma*, just like giving (*dāna*.) Cultivating *jhāna* is a *puñña abhisāṅkhāra* (*puññābhisaṅkhāra*.)

“[WebLink: suttacentral: Paṭiccasamuppāda Vibhaṅga](#)” explains the step “*avijjā paccayā saṅkhārā*” as, “*Tattha katame avijjā paccayā saṅkhārā? Puññābhisaṅkhāro, apuññābhisaṅkhāro, āneñjābhisaṅkhāro.*”

Translated: “What is meant by ‘*avijjā paccayā saṅkhārā*?’ It means *puññābhisaṅkhāra*, *apuññābhisaṅkhāra*, *āneñjābhisaṅkhāra* arising due to *avijjā*.”

- Now, let us discuss what types of rebirths arise due to those three types of *abhisāṅkhāra*. The same section of the “[WebLink: suttacentral: Paṭiccasamuppāda Vibhaṅga](#)” describe those as well.

Three Types of *Abhisāṅkhāra* Lead to Rebirths Among the 31 Realms

7. “*Tattha katamo apuññābhisaṅkhāro? Akusalā cetanā kāmāvacarā—ayaṃ vuccati “apuññābhisaṅkhāro.”*

Translated: “*Akusala cetanā* leading to rebirths in the *kāma loka* is *apuññābhisaṅkhāra*.” **These are the rebirths in the *apāyās* (lowest four realms.)**

“*Tattha katamo puññābhisaṅkhāro? Kusalā cetanā kāmāvacarā rūpāvacarā dānamayā sīlamayā bhāvanāmayā—ayaṃ vuccati “puññābhisaṅkhāro.”*

Translated: “*Kusala cetanā* leading to rebirths in the *kāma loka* and *rūpa loka* are *puññābhisaṅkhāra*.” **Those rebirths in the *kāma loka* are the human realm and the six *Deva* realms are due to (*dānamayā sīlamayā*) *kusala kamma*. Rebirths in the *rūpa loka* (16 *rūpāvacara Brahma* realms) require (*bhāvanāmayā*) *kusala kamma*, i.e., *rūpāvacara jhāna*.**

“Tattha katamo āneñjābhisaṅkhāro? Kusalā cetanā arūpāvacarā—ayaṃ vuccati “āneñjābhisaṅkhāro”.”

Translated: “Kusala cetanā leading to rebirths in the *arūpa loka* are *āneñjābhisaṅkhāra*.” **Those kusala kamma are the cultivation of arūpa jhānā leading to rebirths in the four arūpāvacara Brahma realms.**

- **Note:** Strictly speaking, there are only four *jhānā* described in the *Tipiṭaka*. The “higher *jhānā*” as they are known today are NOT really *jhānā*. They are all described in eight *suttas* starting with “[WebLink: suttacentral: Pathamajhānapaṇhā Sutta \(SN 40.1\)](#)” through “[WebLink: suttacentral: Nevasaññānāsaññāyatanapaṇhā Sutta \(SN 40.8\)](#).” Note that the higher four are NOT called *jhānā*. However, since they have very long names, it is easier to refer to them as *jhānā*.

8. Let us summarize the above for clarity. We know that *Akusala-mūla Paṭicca Samuppāda* starts with “*avijjā paccayā saṅkhāra*” and lead to *jāti* (rebirths) and eventually “the whole mass of suffering.”

- Note that “*kusalā cetanā kāmāvacarā*” are “*kusala kamma* leading to rebirths in the *kāma loka*.” Similarly, “*kusalā cetanā rūpāvacarā*” are “*kusala kamma* leading to rebirths in the *rūpa loka*,” and “*kusalā cetanā arūpāvacarā*” are “*kusala kamma* leading to rebirths in the *arūpa loka*.” All three of them are also called “*puñña kamma*.”
- **That is why engaging in *puñña kamma* (including cultivating *jhānā*) is NOT ENOUGH to be released from the rebirth process and future suffering.** Even though the above three types of *puñña kamma* lead to rebirth in the “good realms,” those existences have finite lifetimes. Rebirth in an *apāyā* after that is possible UNTIL comprehending the Four Noble Truths/ *Paṭicca Samuppāda*/ *Tilakkhaṇa*.
- That is discussed in detail in “[Rebirths Take Place According to Abhisaṅkhāra](#),” “[Kilesa – Relationship to Akusala, Kusala, and Puñña Kamma](#),” and “[Puñña Kamma – Dāna, Sīla, Bhāvanā](#).” It is good to review those posts to solidify the relevant concepts.

9. The “[WebLink: suttacentral: Parivīmaṇṣana Sutta \(SN 12.51\)](#)” summarizes those conclusions in the following verse: “*Avijjāgato yaṃ, bhikkhave, purisapuggalo puññañce saṅkhāraṃ abhisaṅkharoti, puññūpagam hoti viññāṇaṃ. Apuññañce saṅkhāraṃ abhisaṅkharoti, apuññūpagam hoti viññāṇaṃ. Āneñjañce saṅkhāraṃ abhisaṅkharoti āneñjūpagam hoti viññāṇaṃ.*”

Translated: “If one cultivates *puñña abhisaṅkhāra* without comprehension of Noble Truths, that will lead to rebirths in the **good realms**. Cultivating *apuñña abhisaṅkhāra* will lead to rebirths in the **bad realms**. With *āneñja abhisaṅkhāra* rebirths in the *arupāvacara* realms will take place.”

- Of course, *puñña abhisaṅkhāra* includes the cultivation of *rūpāvacara jhānā*. Thus, *puñña abhisaṅkhāra* lead to rebirths in the human realms, 6 *Deva* realms, and the 16 *rūpāvacara Brahma* realms.
- It is interesting to note that “*āneñja*” means “no more rebirths” and thus “permanent.” Ancient yogis (including Alara Kalama and Uddakarama Putta) thought these realms had infinite lifetimes and equated the births there to the “ultimate release”. Of course, the Buddha discovered that those also have finite lifetimes, even though extremely long, lasting eons (billions of years). Thus, “*āneñjābhi (āneñja abhi san khāra) saṅkhāra*” are also generated with *avijjā*.
- Note that the word-by-word English translation in the above link does not clarify these things.

Puñña Abhisaṅkhāra Must be Cultivated

10. The Buddha taught ONLY to abstain from *lobha*, *dosa*, and *moha* since those will lead to rebirths in the *apāyās*.

- As we know, rebirths in this world are caused by acting with *lobha*, *dosa*, *moha*, AND the **mundane versions of *alobha*, *adosa*, and *amoha* (which lead to good rebirths.)**

- With the comprehension of **lokuttara versions of alobha, adosa, and amoha**, such **puñña abhisāṅkhāra** will become **kusala-mūla saṅkhāra** (leading to *Nibbāna*.)
- For details, see “[Kilesa – Relationship to Akusala, Kusala, and Puñña Kamma](#),”

Possible Drawbacks of Cultivating *Jhāna*

11. The *jhānic* experience is the same whether it is an *anāriya jhānā* (reached by suppressing *kāma rāga*) or an *Ariya jhānā* (reached by eliminating *kāma rāga*.)

- All living beings (including those in the *apāyās*) have attained the highest *anāriya jhānās* in their previous lives. Thus, such *anāriya jhānās* do not provide relief from *samsāric* suffering. Note that at the end of a *mahā kappa* (with the destruction of Earth), all living beings end up in the *Ābhassara Brahma* realm and remain there until the formation of a “new Earth.” See #8-#11 in the post “[Buddhism and Evolution – Aggañña Sutta \(DN 27\)](#).”
- The Buddha instructed HOUSEHOLDERS to cultivate **puñña abhisāṅkhāra** with *dāna* and *sīla*. He instructed *BHIKKHUS* to cultivate **puñña abhisāṅkhāra** with *dāna*, *sīla*, and *Ariya jhānā*. (Of course, EVERYONE needs to comprehend the Four Noble Truths.)
- That is because householders CANNOT cultivate *Ariya jhānā* since that would REQUIRE abstaining from any sexual activity. If a householder is serious about attaining *Ariya jhānā*, they MUST give up cravings for all sense-pleasing activities, including sexual activity.

Only the *Bhikkhus* Instructed on the Cultivation of *Jhāna*

12. **Read any *sutta* on the cultivation of *jhānā*, and you will see that the Buddha delivered those *suttas* to *bhikkhus*.** I have not seen an instance where the Buddha instructed a householder to cultivate *jhānā*.

- The standard verse in the *suttas* on the cultivation of *jhānā* is the following: “*Idha, bhikkhave, bhikkhu vivicceva kāmehi vivicca akusalehi dhammehi savitakkaṃ savicāraṃ vivekajaṃ pītisukhaṃ paṭhamāṃ jhānaṃ upasampajja viharati.*” the translation of which is, “Here, a *bhikkhu*, **abstaining from sensual pleasures**, abstaining from *akusala kamma*, enters and remains in the first *jhānā*.”
- The following link provides a list of *Tiṇṇaka* references on *jhānās*: “[WebLink: suttacentral: 531 results for vivicceva kāmehi](#).” Anyone can go through the *suttas* in that list and see whether my statements above are correct or not. Please let me know if you find a *sutta* delivered to a “householder” in the above list. Keep in mind that a few householders abstained from “householder activities” and had attained *jhānā*. They were *Anāgāmis*, like Citta Gahapati.

Jhānā Not Necessary to Attain *Magga Phala*

13. A householder can choose to deliberately refrain from sexual activities and cultivate *Ariya jhānā*. Such a householder is an “[WebLink: wikipedia.org: Anagārika](#).” Most householders who attained the *Arahant* stage (like King Suddodana and Minister Santati) got there without cultivating *jhānā*. Some *bhikkhus* attained the *Arahant* stage without cultivating *jhānā* (*Paññāvimutti Arahants*.) Those who took the “*jhānic* path” became *Cetovimutti Arahants*.

- **Householders can cultivate *anāriya jhānā* while being a householder by suppressing *kāma rāga*.** There is nothing wrong with that if one can realize that it is not an *Ariya jhānā*. The problem arises when they think they have *Ariya jhānā*. Also, some become enamored with “*jhānic* pleasures” and lose focus on attaining *Nibbāna*.
- Another misconception is that it is impossible to get to the *Sotāpanna* stage without cultivating *jhānā*. That can easily be disproven. We know that a *Sotāpanna* can be reborn in the human or *Deva* realms. However, anyone with even the first *anāriya jhānā* will be reborn in a *Brahma* realm at death. Since

attaining any *jhānā* is an *ānantariya puñña kamma*, such a person will be separated from the human *bhava* at the death of the physical body, even if there is *kammic* energy left in the human *bhava*. Thus, if a *Sotāpanna* has even an *anāriya jhāna*, they cannot be reborn in *kāma loka*. That contradicts the idea that a *Sotāpanna* must have a *jhāna*.

- The fact that only *samādhi* is needed to attain *magga phala* is also clear with the *Abhidhamma* analysis of relevant *citta vīthi*; see at the end of the post “[Citta Vīthi – Processing of Sense Inputs](#).”
- It is critically important to understand these key concepts. Please feel free to comment/ask questions in the discussion forum.

6.1.2 Elephant in the Room 2 – Jhāna and Kasiṇa

June 16, 2022

[Samādhi, Jhāna, and Sammā Samādhi](#)

[Jhāna, Jhāya, and Jhāyi – Different Meanings](#)

6.1.2.1 Samādhi, Jhāna, and Sammā Samādhi

June 16, 2022

Sammā Samādhi is possible only for a Noble Person (*Ariya* at or above the *Sotāpanna Anugāmi* stage) with the comprehension of the Four Noble Truths. In comparison, various types of *samādhi* and *jhāna* are accessible to all humans.

Elephants in the Room – Change of Format

1. On February 28, 2022, I started a new series of posts on “[Elephants in the Room](#).” The goal is to highlight the apparent contradictions in current English (and other) translations of critical concepts in Buddha Dhamma.

- I call these “elephants in the room” because these apparent contradictions have gone unnoticed all these years.
- It is a puzzling phenomenon because it is not necessary to know Pāli to see some of these contradictions. Even a child should be able to see some of these contradictions once pointed out!

2. The main issue is that most translators do not seem to fully understand the underlying fundamental concepts in Buddha Dhamma. That itself has roots in incorrect/incomplete translations of some Pāli keywords. In a simple example, “*viññāṇa*” is universally translated as “consciousness,” but that gives rise to many contradictions; see, “**First Elephant:** “[Elephant in the Room 1 – Direct Translation of the Tipiṭaka](#).”

- I am starting on the **Second Elephant**, “[Elephant in the Room 2 – Jhāna and Kasiṇa](#),” today.
- The **Third Elephant** is “[Elephant in the Room 3 – Ānāpānasati](#).” I wrote two posts on a series of posts on *Ānāpānasati*, but that needs to be on hold. Discussing the background on *jhāna/kasiṇa* meditations first is a good idea.
- Because of many prevalent misconceptions about *jhāna/kasiṇa*, it is good to take a “deep dive” into the *Tipiṭaka* for a comprehensive analysis. Please make necessary comments in the discussion forum at “[WebLink: PureDhamma! Posts on ‘Elephants in the Room’](#)”

Billions of Samādhi – Can be Good or Bad

3. *Samādhi* (“*sama*” + “*adhi*” where “*sama*” means “equilibrium” and “*adhi*” means “dominance”) means keeping the mind focused on a single *ārammaṇa* or a *nimitta*. When attention is tightly focused on

something, the mind gets to “*samādhī*.” However, there can be billions of *samādhī*: some are neutral, some are good, and others are bad.

- For example, if one is fully absorbed in an exciting book, one may not hear external disturbances. That is a neutral *Samādhī*. A suicide bomber assembling a bomb is also entirely concentrated on it because if he makes a mistake, that will blow him up. That is an example of evil or immoral *Samādhī*.
- Someone listening to a discourse or meditating can be in a good *Samādhī*. They may be fully absorbed in it too.
- Therefore, there can be billions of types of *Samādhī* with the mind focused on a specific *ārammaṇa*.

Jhānā* are Special Types of *Samādhī

4. There are only four types of *jhāna*. But they can be either *anāriya jhāna* or *Ariya jhāna*. We will discuss the distinction in upcoming posts.

- *Jhānā* are particular types of “good *samādhī*.” They correspond to the mental states experienced in *rupāvacara Brahma* realms.
- One may realize such *jhānic* states via cultivating a particular type of *puññābhisaṅkhāra* (*puñña abhisaṅkhāra*.) Here one’s mind becomes focused enough to be detached from “*kāma saṅkappa*” or sensual stray thoughts. Then one’s mind transcends the “*kāma loka*” and grasps the mindset of a particular *rupāvacara Brahma* realm. There are only four *jhānic* states. However, in a “normal *jhānic* state,” the mind is not fully focused. **Only in a “*jhāna samāpatti*” is a mind fully absorbed in a *jhānic* state.**
- Today, many English texts incorrectly label the “higher *rupāvacara samāpatti*” as the fifth through the eighth *jhāna*. In the *Tipiṭaka*, they are labeled as *ākāsānañcāyatana*, *viññāṇañcāyatana*, *ākīṇcaññāyatana*, and *nevasaññānāsaññāyatana samāpatti*. When mind transcends the fourth *jhāna samāpatti*, it goes to *ākāsānañcāyatana samāpatti* straight away; **there is no *ākāsānañcāyatana jhāna*.** The same holds for the other three *arupāvacara* states. (I have used that incorrect terminology too, but I will try to make necessary revisions.)
- One can attain *anāriya jhānā* and *samāpatti* by cultivating two types of *abhisaṅkhāra* with *avijjā*. Let us briefly address that.

***Anāriya Jhāna/Samāpatti* Reached via “*Avijjā Paccayā Saṅkhāra*”**

5. There are mainly three types of *abhisaṅkhāra* that come into play in the “*avijjā paccayā saṅkhāra*” step in *Paṭicca Samuppāda*. Those three types of *abhisaṅkhāra* lead to rebirths among the 31 realms as follows:

- The worst type, *apuññābhisaṅkhāra* (*apuñña abhisaṅkhāra*), leads to rebirths in the four lowest realms. Immoral deeds take place with *apuññābhisaṅkhāra*.
- The next higher level of *puññābhisaṅkhāra* (*puñña abhisaṅkhāra*) leads to rebirths in the higher seven realms in *kāma loka* and the 16 realms in the *rūpa loka*. Those lead to rebirths in the human realm, and the six *Deva* realms in *kāma loka* involve moral deeds. **Cultivation of *rūpāvacara jhāna* takes place via a particular type of *puññābhisaṅkhāra*.**
- The third type of *āneñjābhisaṅkhāra* (*āneñja abhisaṅkhāra*) leads to rebirths in the highest four realms of this world belonging to the *arūpa loka*. Today, many textbooks label those as “higher *jhānā*,” but they are *samāpatti*; see #4 above. **Cultivation of *āneñjābhisaṅkhāra* leads to *arūpāvacara samāpatti*.**
- In brief, engaging in *apuññābhisaṅkhāra* lead to rebirths with direct suffering. Engaging in *puññābhisaṅkhāra* or *āneñjābhisaṅkhāra* lead to rebirth in higher realms with less suffering but when such lives end one is back to “square one,” i.e., to rebirths in lower realms. **That is the endless**

“*Saṃsāric journey*.” I recommend reading “[Rebirths Take Place According to Abhisankhāra](#)” for details/insights.

6. **Therefore, *samādhi*, *jhāna* and *samāpatti* can be attained by humans even when Buddha Dhamma is not present in the world.**

- Our *Bodhisatta*, who became Buddha Gotama, learned to cultivate *anāriya jhānā* and *samāpatti* from two *yogis*, Āḷarakālāma and Uddaka Rāmaputta. He quickly realized the unfruitfulness of such *anāriya jhānā* and *samāpatti* and left to strive alone.

Sammā Samādhi* Is Necessary to Attain *Magga Phala

7. *Sammā Samādhi* is a unique *Samādhi*. One can get into *Sammā Samādhi* only after beginning to comprehend the Four Noble Truths/*Paṭicca Samuppāda*/*Tilakkhaṇa* starting at the *Sotāpanna Anugāmi* stage of *Nibbāna*. **That is when one realizes the futility and danger of remaining in the endless “*Saṃsāric journey*.”** When that “broad worldview” sinks in the mind, one becomes a *Sotāpanna Anugāmi*. It is like comprehending one plus one is two. No one will be able to persuade otherwise after that.

- **Therefore, *Sammā Samādhi* REQUIRES an understanding of the Four Noble Truths/*Paṭicca Samuppāda*/*Tilakkhaṇa*.**
- **It is not necessary to have *jhāna* or *samāpatti* to “see that worldview” and to get to *Sammā Samādhi/magga phala*.**
- One can get to *Sammā Samādhi/magga phala* ONLY by first getting to *Sammā Ditṭhi* (correct worldview) and then cultivating the Eightfold Noble Path to systematically disengage from the “suffering-filled world.”
- As we know, the first step in the eightfold path is to get to *Sammā Ditṭhi*. Just with that “correct worldview” the possibility of future rebirths in the *apāyā* will cease.

Arahants* With and Without *Jhāna

8. **A Noble Person on the Noble Path may or may not attain various *jhāna* or *samāpatti*.** That is why there is a wide range of *Arahants*.

- Those who attain *Ariya jhāna* early cultivate them methodically to *nirodha samāpatti* to become *Arahants*; they are *Cetovimutta Arahants*.
- But there are *Paññāvimutta Arahants* who had not cultivated *jhāna* but attained the *Arahanthood* in relatively short times. However, they also get to the fourth *jhāna* briefly at the moment of *Arahant magga phala*, but they need to practice *jhāna* to get into *jhāna* at will.
- Then there were *Arahants* like Ven. Cūḷapanthaka and Minister Santati who were both *Cetovimutta* and *Pannavimutta* (i.e., *Ubhatovimutta*) *Arahants*. **They attained all *jhānās*, *samāpatti*, and many kinds of *iddhi* (supernormal powers) at the moment of attaining *Arahanthood* within a very short time. They had not cultivated any *jhāna*—for example, Ven. Cūḷapanthaka could not even memorize a single *gāthā* after trying hard for months. He had almost completed *pāramitā* in previous lives, but a strong *kamma vipāka* was blocking his progress. With Buddha’s help, he was able to attain the *Arahanthood* in a day and simultaneously attained *iddhi* powers as well: “[WebLink: suttacentral: Cūḷapanthaka \(Thag 10.4\)](#).”**

It Is Foolish to Strive for *Anāriya Jhānā* and *Samāpatti*

9. The point here is that one needs to focus on attaining *magga phala* by first getting to *Sammā Ditṭhi*, which automatically leads to the first stage of *Sammā Samādhi*. That REQUIRES learning the correct version of Buddha Dhamma from a Buddha or a true disciple of the Buddha, i.e., a Noble Person (*Ariya*.)

- If one has attained *jhāna/samāpatti/iddhi* in recent lives, those people may attain *anāriya jhāna* at any point, many of them even before getting to the *Sotāpanna Anugāmi* stage. Others will be able to cultivate *Ariya jhāna/samāpatti* once reaching the *Anāgāmi* stage when it becomes possible to remove *kāma rāga* permanently (not just suppress).
- However, there is no point in **making an effort** to attain *anāriya jhāna/samāpatti/iddhi*. Upon death, all those “attainments” will be gone, and *Samsāric* suffering will still be there if one has not attained any *magga phala*!
- We have attained the highest *samāpatti* many times over in the rebirth process that has no discernible beginning.
- That is why one must entirely focus on attaining the *Sotāpanna Anugāmi* stage. **That attainment happens only once**, yet enough to overcome unimaginable suffering in the four lowest realms (*apāyās*) PERMANENTLY.
- We will discuss the etymology of *Sammā Samādhi*, *jhāna*, and *kasina* in the upcoming posts.

6.1.2.2 Jhāna, Jhāya, and Jhāyi – Different Meanings

June 23, 2022; Revised #9 later in the same day

Jhāna, *jhāya*, and *jhāyi* are interrelated and can have different meanings depending on the context. In particular, it can refer to “contemplation/meditation in general” or “specific meditative states transcending the sensual realm,” i.e., “*jhānic* states.”

Jhāya – To Contemplate or Meditate

1. In the process of explaining the difference between *Ariya* (Buddhist) and *anāriya* (non-Buddhist) meditations, the Buddha gave an analogy in the “[WebLink: suttacentral: Sandha Sutta \(AN 11.9\)](#).” You can read the English translation in the above link. But let me briefly describe the analogy. (Note that in the topic of the Pāli version, “Sandha” is erroneously replaced by “Saddha.”)

- In the days of the Buddha, specially trained horses were a major division of an army. Such horses are “thoroughbreds” (“*assājānīyo*.”) There, “*assā*” are horses, and “*ājānīyo*” means “thoroughbreds/special breed.” They don’t think much about the food and spend time training and thinking about it. At the beginning of the *sutta*, the Buddha tells Sandha, “*Ājānīyajhāyitaṃ kho, sandha, jhāya*” or “Sandha, **meditate** like a thoroughbred.”
- In contrast, an inferior horse (“*assakhaḷunko*”) spends the whole day **thinking** about food: “*Assakhaḷunko hi, saddha, doṇiyā baddho’ yavasam yavasan’ti jhāyati*” or “An inferior horse, tied up by the feeding trough, **thinks all the time about eating**: ‘Fodder, fodder!’” (“*yava*” means fodder or dried hay.)
- This *sutta* reveals one ordinary meaning of the word “***jhāya*” with the meaning of “to contemplate” because a horse can do that too.**

2. So, the Buddha admonishes *bhikkhu* Sandha that he should meditate like a “thoroughbred horse” and not like an inferior horse.

- Thus, the word ***jhāyi* referred to meditation (not merely thinking random thoughts) in the same *sutta*.** That is the most common usage in the *suttas*.
- Then the Buddha points out that an *anāriya yogi* meditates by taking a worldly object (earth, water, fire, air, etc.) AND also with hidden defilements in mind. In contrast, *Ariyas* (Noble Persons) “don’t meditate dependent on the earth, water, fire, and air. They don’t meditate dependent on the dimension of infinite space, infinite consciousness, nothingness, or neither perception nor non-perception. They don’t meditate dependent on this world or the other world. They don’t meditate dependent on what is seen, heard, thought, known, attained, sought, or explored by the mind.” to quote from the English translation in the above link.

- We will discuss that below.
- **Note that *jhāya* means “to meditate,” *jhāyi* means “meditator,” and *jhāna* refers to a specific meditative state.** *Samādhi* is the general result of meditation, but as we will see, there are “immoral” or “*micchā samādhi*,” but those never lead to *jhāna*. Both *Ariya*- and *anāriya* – meditations lead to *jhāna*, but they have different qualities. It is possible to reach *Nibbāna* with or without going through *jhānic* states.

Types of Meditators (*jhāyī*)

3. “[WebLink: suttacentral: Adhitthānahāravibhaṅga \(Ne 17\)](#)” in the *Tipitaka* Commentary “*Nettipararāna*” explains the **types of meditators**: “*Jhāyī*”*ti ekattatā. Tattha katamo jhāyī? Atthi sekkho jhāyī, atthi asekkho jhāyī, nevasekkhanāsekkho jhāyī, ājāṇiyo jhāyī, assakhaluṅko jhāyī, diṭṭhuttaro jhāyī, taṇhuttaro jhāyī, paññuttaro jhāyī. Ayaṃ vemattatā.*”

Translated: “*Jhāyī*” means to “meditate.” **What are the different types?** Those who meditate can be Noble Persons in training (*sekkho*), Noble Persons who completed training (*Arahants* or *asekkho*), and others (average humans or neither *sekkho* nor *asekkho*). Then some meditate like a “thoroughbred horse” (*ājāṇiyo*) and others like an “inferior horse” (*assakhaluṅko*). We can also categorize based on the goal: to cleanse views (*diṭṭhuttaro*), dispel attachments (*taṇhuttaro*), and cultivate *paññā* (*paññuttaro*.) Those are the various types.

- The next paragraph describes various types of *samādhi* attained by those **meditators (*jhāyī*)**: “*Samādhi*”*ti ekattatā. Tattha katamo samādhi? Saraṇo samādhi, araṇo samādhi, savero samādhi, avero samādhi, sabyāpajjo samādhi, abyāpajjo samādhi, sappīṭiko samādhi, nippīṭiko samādhi, sāmiso samādhi, nirāmiso samādhi, sasaṅkhāro samādhi, asaṅkhāro samādhi, ekaṃsabhāvito samādhi, ubhayaṃsabhāvito samādhi, ubhayato bhāvitabhāvano samādhi, savitakkasavicāro samādhi, avitakkavicāramatto samādhi, avitakkaavicāro samādhi, hānabhāgiyo samādhi, ṭhitibhāgiyo samādhi, visesabhāgiyo samādhi, nibbedhabhāgiyo samādhi, lokiyo samādhi, lokuttaro samādhi, micchāsamādhi, sammāsamādhi. Ayaṃ vemattatā.*”
- It will take the whole post to explain those. But I have highlighted the ones that we will be discussing. ***Lokiya samādhi*** is reached via any meditation unrelated to ***lokuttara samādhi*** (on the Noble Path.) ***Micchā samādhi*** is reached via immoral reflections, for example, by a master thief planning a robbery. ***Sammā samādhi*** can be two types, with the ***lokuttara*** category leading to *Nibbāna*. Note that *jhāna* is not explicitly cited here, but it is a particular type of *samādhi* that can be *lokiya* (*anāriya*) or *lokuttara* (*Ariya*.)

Ariya and Anāriya Meditations

4. In two related *suttas* to the *sutta* in #1 above, “[WebLink: suttacentral: Saññā Sutta \(AN 11.7\)](#)” and “[WebLink: suttacentral: Manasikāra Sutta \(AN 11.8\)](#),” the Buddha explained the difference between *Ariya* and *anāriya* meditations more clearly.

- In the first *sutta*, Ven. Ānanda asks the following question. See [Ref. 1](#) for the Pāli quote that I will translate (I have modified the English translation from the link; you can compare the two translations). Let us start with the first part of the quote in [Ref. 1](#).

“Would it be possible, *Bhante*, for a *bhikkhu* to **get to *samādhi* (*samādhipaṭilābho*)** WITHOUT taking in the ***pathavisaññā* of *pathavi*** (*neva pathaviyaṃ pathavisaññā assa*)? (Note that “*assa*” here means “to take in.”)

- Here, Ven. Ānanda is referring to using a *kasiṇa* object made of clay (*pathavi*.) When a *yogi* focuses on a clay ball, his mind stops jumping to stray thoughts of greed, anger, or ignorance. That can lead to a calm mind, and depending on the person, it can even lead to *anāriya jhāna*.

- Then Ven. Ānanda asks the same question about using other types of *kasiṇa* objects: “*na āpasmim āposaññī assa, na tejasmim tejosaññī assa, na vāyasmim vāyosaññī assa.*” Yogis typically use a bowl of water and fire to latch onto *āpo saññā* and *tejo saññā*.
- That last one on “taking in the *vāyo saññā* refers to the breath meditation. So, it should be clear that *Ānāpānasati* is NOT breath mediation. Also, see “[Saññā – What It Really Means.](#)”

5. One could reach the fourth *anāriya jhāna* with those techniques. Once there, an *anāriya yogi* can get to the first *rūpāvacara samāpatti* by focusing on the “infinite space.” After getting there, he can move to the next *samāpatti* by concentrating on the “infinite *viññāṇa*.” In this way, he can proceed to the *nevasaññānāsaññāyatana samāpatti*. **Throughout that process, the yogi will focus on a *lokiya* object (belonging to this world), and thus, all those are *lokiya samādhi*.**

- Finally, Ven. Ānanda asks if a *samādhi* is possible WITHOUT focusing on anything in this world (that we perceive as humans: *idhalokasaññā*) or even in *paraloka* (as a *gandhabba* or beings in other realms.)
- **Therefore, the question raised by Ven. Ānanda is, “Is it possible to get into a *samādhi* WITHOUT going through such a process?”**

The focus of *Ariya* – Meditations

6. The Buddha says ([Ref. 2](#)) that there is such a meditation without taking in a *saññā* of a “*lokiya* entity.” But that is possible only for a Noble Person (*Ariya*) who has “seen *Nibbāna*,” i.e., who has gotten to *Sammā Samādhi*. They can focus on that *Nibbāna* that they have SEEN (at their level or stage.) Of course, only an *Arahant* can contemplate the “ultimate release” that they reached.

- That is: “*‘etaṃ santaṃ etaṃ paṇītaṃ, yadidaṃ sabbasaṅkhārasamatho sabbūpadhipaṭinissaggo taṇhākkhayo virāgo nirodho nibbānan’ti*” OR “This is peaceful; this is excellent—that is, the stopping of all *saṅkhāra*, the letting go of all **bonds to the rebirth process**, the ending of craving, **stopping of rebirth, cessation of the world, *nibbāna*.**” I have highlighted the deviations from the English translation in the link.
- That is the verse an *Ariya* recites/contemplates to reach *samādhi*. Some of those at or above the *Anāgāmi* stage may get to *Ariya jhānā* that way. Those below the *Anāgāmi* stage may get to *anāriya jhānā* that way. **There is nothing wrong with that.** It is good to cultivate even an *anāriya jhānā* AFTER attaining the *Sotāpanna/Anugāmi*.
- It is just that even the first *Ariya jhānā* is possible only after the *Anāgāmi* stage; see, “[Possible Outcomes of Meditation – Samādhi, Jhāna, Magga Phala.](#)”
- The second *sutta* in #4, “[WebLink: suttacentral: Manasikāra Sutta \(AN 11.8\).](#)” has the same explanation. It focuses on *manasikāra* instead of *saññā*.
- *Arahants* also cultivate *samādhi*, as mentioned in #3 above. In particular, *paññāvimutti Arahants* may do that to reach *Ariya jhānā* so that they can have a “**blissful experience in the present life.**” Let us look at another *sutta* to discuss that.

Four Uses of *Ariya Samādhi* – *Samādhībhāvanā Sutta*

7. The “[WebLink: suttacentral: Samādhībhāvanā Sutta \(AN 4.41\)](#)” explains that *samādhi bhāvanā* is of four types:

- (i) for a blissful experience in the present life (*diṭṭhadhammasukhavihārāya* or *diṭṭhadhamma sukha vihārāya*, where “*diṭṭhadhamma*” means “in this life,”)
- (ii) for gaining knowledge and vision (*ñāṇadassanappaṭilābhāya*),
- (iii) for gaining mindfulness and awareness to cultivate *Satipaṭṭhāna/Ānāpānasati* (*satisampajaññāya*), and,

(iv) to attain *Arahanthood* via ending of defilements (*āsavānaṃ khayāya*).

- Note that the usage of *samādhi bhāvanā* is in that order. However, occasionally, some get to the *Arahant* stage within a short time, like Ven. Culapanthaka or Minister Santati. In such a case, (i) comes last since they go through (ii), (iii), and (iv) quickly.
- Also, note that (i) above may or may not involve *jhāna*. It can be *samādhi* without *jhāna*.
- In (ii) through (iv,) one must engage in *Vipassanā Bhāvanā* to cultivate insight once getting to *Samatha*. See #9 below.

Critical to Understanding *Nibbāna*

8. We need to start by looking at the FUNDAMENTAL idea of *Nibbāna*.

- Even though relatively little suffering manifests in realms higher than the human realm, a “living being” spending most of the *Samsāric* journey in the lowest four realms (*apāyās*) filled with suffering. Thus, the Buddha taught that this world of 31 realms is filled with suffering.
- “Full *Nibbāna*” (*Parinibbāna* or the “complete release from suffering”) is attained at the death of an *Arahant*. That *Arahant* will not be reborn in any of the 31 realms.
- I must keep repeating those basics because many people have not grasped those ideas. I want to emphasize the foundation.

Cultivating *Vipassanā*

9. Thus, any meditation where the focus of the mind is a “worldly object” (a clay ball, a bowl of water, breath, etc.) CAN NOT be a Buddhist meditation.

- Instead of contemplating worldly things, one MUST reflect on their **unfruitful nature**. That is ***vipassanā* meditation** (as explained in the [WebLink: suttacentral: *Ānāpānasati Sutta* \(MN 118\)](#) and even more detail in the [“WebLink: suttacentral: *Satipatthāna Sutta* \(MN 10\)”](#)). We will discuss those.
- If someone with *magga phala* likes to **cultivate *jhāna* (with *Samatha* meditation)**, they should contemplate the *Nibbāna* that they have experienced (at that level) as we discussed above: “*etaṃ santaṃ etaṃ paṇītaṃ yadidaṃ sabbasaṅkhārasamatho sabbūpadhipaṭinissaggo taṇhākkhayo virāgo nirodho nibbānan’ti.*”
- While *anāriya yogis* get to *Samatha* (and *anāriya jhāna*) with the traditional *kaṣiṇa* and breath meditation (detailed in *Visuddhimagga*), *Ariyas* (Noble Persons) attain *Ariya jhāna* with the above verse.
- **Those who have not reached the *Sotāpanna* stage can get to *Samatha samādhi* by living a moral life and listening/reading about Dhamma concepts.** That will calm the mind enough to be able to cultivate *vipassanā* (insight meditation) on the Four Noble Truths/*Paṭicca Samuppāda*/*Tilakkhaṇa*. **There is no need to do *kaṣiṇa*/breath meditations.** See, [“*Sīla, Samādhi, Paññā to Paññā, Sīla, Samādhi.*”](#)

“*Jhāyī*” Can Mean “To Burn”

10. Finally, there is another meaning of *jhāyī*. We can see that from the following verse in the [“WebLink: suttacentral: *Samyojana Sutta* \(SN 12.53\): “*Seyyathāpi, bhikkhave, telaṇca paṭicca vaṭṭiṇca paṭicca telappadīpo jhāyeyya.*”](#)

That means: “Just like an oil lamp depended on oil and a wick **to burn**.”

- That oil lamp will burn only if there is enough oil. When the oil runs out, the wick will burn quickly and extinguish.

- In the same way, when *taṇhā* ceases (*taṇhā nirujjhati*) there is no more fuel for the *Saṃsāric* journey: “*Taṇhānirodhā upādānanirodho*” leads to *bhava* and *jāti nirodha* in the *Paṭiloma Paṭicca Samuppāda*. That is the end of rebirth and *Nibbāna*!

References

1. “*Siyā nu kho, bhante, bhikkhuno tathārūpo samādhipaṭilābho yathā neva pathaviyaṃ pathavisaññī assa, na āpasmiṃ āposaññī assa, na tejasmim̐ tejosaññī assa, na vāyasmim̐ vāyosaññī assa, na ākāsaññācāyatane ākāsaññācāyatanasaññī assa, na viññāṇaṇcāyatane viññāṇaṇcāyatanasaññī assa, na ākiñcaññāyatane ākiñcaññāyatanasaññī assa, na nevasaññānāsaññāyatane nevasaññānāsaññāyatanasaññī assa, na idhaloke idhalokasaññī assa, na paraloke paralokasaññī assa, yampidaṃ diṭṭhaṃ sutam̐ mutam̐ viññātam̐ pattam̐ pariyesitam̐ anuvicaritam̐ manasā, tatrāpi na saññī assa; saññī ca pana assā*”ti?”

2. “*Siyā, ānanda, bhikkhuno tathārūpo samādhipaṭilābho yathā neva pathaviyaṃ pathavisaññī assa, na āpasmiṃ āposaññī assa, ..*

After completing that verse, the Buddha explains what a Noble Person focuses the mind on in the next verse: “*Idhānanda, bhikkhu evaṃsaññī hoti: ‘etaṃ santam̐ etaṃ paṇītam̐, yadidaṃ sabbasaṅkhārasamatho sabbūpadhipaṭinissaggo taṇhākkhayo virāgo nirodho nibbānan’ti*. [“It is peaceful, it is serene, the expelling of all *saṅkhāra*, breaking of bonds, removing greed and hate; *Nibbāna*.”]

6.1.3 Elephant in the Room 3 – Ānāpānasati

June 2, 2022

[Ānāpānasati – Overview](#)

[Assāsa Passāsa – What Do They Mean?](#)

[Ānāpānasati Not About Breath – Icchānaṅgala Sutta](#)

6.1.3.1 Ānāpānasati – Overview

June 2, 2022; revised June 5, 2020 (#11 added); August 15, 2022

Evidence from the *Tipiṭaka* shows that *Ānāpānasati Bhāvanā* is not breath meditation. The former can lead to *Nibbāna*, while the latter cannot.

Introduction

1. In the series on “Elephants in the Room,” I discuss many blatant misinterpretations of the *Tipiṭaka* under three categories: “Word-for-Word Translation of the *Tipiṭaka*,” “*Ānāpānasati Bhāvanā*,” and “*Tilakkhaṇa*.”

- I call these “Elephants in the Room” for the following reason. I have tried to point out many apparent contradictions in current English translations of the *Tipiṭaka*. Those who have diligently followed this website are aware of these issues.
- However, I encountered strong opposition when I pointed out these issues at a well-known discussion forum. *Anicca* as impermanence and *Ānāpānasati Bhāvanā* as breath-meditation seem to be ingrained into the minds of many people. It is not easy for them to “remove the dark glasses” and “see the truth.”

2. Some say, “I don’t know enough Pāli to determine who has the correct interpretations, you or those well-established teachers.” **However, knowledge of Pāli is not necessary to see many contradictions.**

- For example, see “[Distortion of Pāli Keywords in Paṭicca Samuppāda](#).” Even a child should be able to see such apparent contradictions!

- I understand that getting rid of firmly-embedded wrong views is not easy, especially when the current “*Theravāda* establishment” is behind such interpretations. I will do what I can to the best of my ability. (Of course, I learned these interpretations from the late Waharaka *Thero*.)
- It is a relief to see that some people have understood, as we can see from the comments in our discussion forum.

First Elephant in the Room – Word-for-Word Translation of the *Tipiṭaka*

3. I have already posted under the “[Word-for-Word Translation of the Tipiṭaka](#)” category and will post more later.

- In this first post on “*Ānāpānasati Bhāvanā*,” I will lay out a map for future posts. I have divided this subsection into several categories, as indicated below.
- The primary *sutta* on *Ānāpānasati Bhāvanā* is “[WebLink: suttacentral: Ānāpānassati Sutta \(MN 118\)](#).” I will be discussing the main verses of this *sutta* in future posts. Before that, I need to provide some background as laid out below. Note that in Pāli, the two words *Ānāpāna* and *sati* combine as “*Ānāpānassati*.” Thus, you may see both *Ānāpānasati* and *Ānāpānassati*.
- I will be using the English translation in the above link for comparison. I chose this particular translation because it has the English and Pāli verses side-by-side [for ebook it is line-by-line], so it is easy for anyone to compare with my translation of a specific verse. Of course, most current English translations are very similar; for example, “[WebLink: accesstoinsight.org: Ānāpānasati Sutta: Mindfulness of Breathing \(MN 118\)](#).”

Second Elephant in the Room – *Ānāpānasati Bhāvanā* is Not Breath Meditation

4. The point that I will be making is the following. “*Ānāpānasati Bhāvanā*” is NOT “Mindful of Breathing.” Breath meditation is NOT a Buddhist meditation. Hindus practice breath meditation too.

- Some people try to cheat by saying *Ānāpānasati Bhāvanā* is the first step as a *Samatha Bhāvanā*, and then one needs to do “insight meditation.” However, I will present evidence to show that ***Ānāpānasati Bhāvanā, by itself, is all one needs to attain Arahant hood.***
- Furthermore, one CAN NOT do the CORRECT insight meditation if one does not even understand that *Ānāpānasati Bhāvanā* is not breath meditation!
- The Buddha has clearly stated that **if one completes the steps in *Ānāpānasati Bhāvanā*, one will be fulfilling the steps in the *Satipaṭṭhāna Bhāvanā*.** *Satipaṭṭhāna Bhāvanā* discusses the same steps in greater detail.
- The following is an overview of topics in future posts in the “[‘Elephant in the Room’ 3 – Ānāpānasati](#)” subsection.

Breath Not Mentioned in *Ānāpāna Vagga* in *Saṃyutta Nikāya*

5. There is a small collection of *suttas* in the *Ānāpāna Vagga* of *Saṃyutta Nikāya*, BEFORE the section on *Ānāpānasati*. That is to give an idea of what is involved in *Ānāpāna*, which comes from “*Āna*” + “*āpāna*,” where two words mean “taking in (*kusala*)” and “discarding (*akusala* or defilements).”

- That section in the *Ānāpāna Vagga* has several *suttas* starting with the “[WebLink: suttacentral: Atthikamahapphala Sutta \(SN 46.57\)](#)” and ending with the “[WebLink: suttacentral: Ānāpāna Sutta \(SN 46.66\)](#).”
- **You can read the English translations in the above links and see that the word “breath” is NOT there!**

- Instead, those *suttas* briefly describe some KEY CONCEPTS that one needs to understand to correctly “take in “and “discard” (*Ānāpāna*) to cultivate *Ānāpāna sati*.

6. For example, the first *sutta* explains that one needs to understand how to cultivate “*aṭṭhika saññā*.” That is the “*anicca* or unfruitful” nature of this world. **It is amusing to see that the English translation in the first link above translates “*aṭṭhika saññā*” as “perception of a skeleton”!**

- Word-by-word translations can lead to such ridiculous statements.
- The word “*aṭṭhi*” can mean “bones.” But the correct meaning in this context is not that, as I will explain later.
- Other *suttas* in that series briefly mention several types of meditations in *Satipaṭṭhāna*, and the series ends with “[WebLink: suttacentral: Ānāpāna Sutta \(SN 46.66\)](#)” which briefly states, “*Bhikkhus* when *Ānāpānasati* is developed and cultivated it’s very fruitful and beneficial.”

Ānāpāna Saṃyutta* Says *Ānāpānasati Bhāvanā* — by Itself — Leads to *Arahanthood

7. There are twenty *suttas* in the *Ānāpāna Saṃyutta* of *Saṃyutta Nikāya* DIRECTLY stating that *Ānāpānasati Bhāvanā* — by itself — can lead to *Arahanthood*.

- The series starts with the “[WebLink: suttacentral: Ekadhamma Sutta \(SN 54.1\)](#).” *Ekadhamma* means “one *dhamma*,” implying that this is all one needs to get to the *Arahanthood*.
- The series ends with a short *sutta* stating that *Ānāpānasati Bhāvanā* will lead to the removal of all *saṃyojana*, *anusaya*, and *āśava*. There is no question that it leads to *Nibbāna*! See, “[WebLink: suttacentral: Āsavakkhaya Sutta \(SN 54.20\)](#).”
- Thus, this series of *suttas* provides enough evidence by itself.
- Incredibly, the translator in the link (and other “well-known” teachers) did not realize this while they did these translations. **As I keep saying, *sutta* translation has become a mechanical process. It is a dangerous practice.** Many *suttas* with deeper meanings require detailed explanations. See, “[Sutta Interpretation – Uddesa, Niddesa, Paṭiniddesa](#).”

***Ānāpānassati Sutta* (MN 118)**

8. The Buddha discussed the *Ānāpānasati Bhāvanā* in the “[WebLink: suttacentral: Ānāpānassati Sutta \(MN 118\)](#).” Let me make two quotes from the *sutta* that should be enough to make the case.

“*Ānāpānassati, bhikkhave, bhāvitā bahulīkatā cattāro satipaṭṭhāne paripūreti.*”

- **Translation:** “*Ānāpānasati (Bhāvanā)*, when developed and cultivated, **fulfills** the four sections of the *satipaṭṭhāna (Bhāvanā)*.”

“*Nāhaṃ, bhikkhave, muṭṭhassatiṣṣa asampajānassa ānāpānassatiṃ vadāmi.*”

- **Translation:** “I do not teach this *Ānāpānasati (Bhāvanā)* to **those who do not have (*sammā*) *sati***.”
- **Anyone who has not understood the Four Noble Truths/*PaṭiccaSamuppāda*/*Tilakkhaṇa* would not have *sammā sati*.**

The English translation in the above link translates that Pāli verse as: “There is no development of mindfulness of breathing for someone who is unmindful and lacks awareness, I say.”

- As I have explained, it is not about “breathing in and out.” Any person should be able to “mindfully breathe in and out”! **The translator does not understand “*sati*” there is “*Sammā Sati*.”**

Assāsa/Passāsa in Ānāpānasati Is not About the Breath but Kusala/Akusala

9. How did those translators miss the above critical points? I am not quite sure. I cannot even imagine how ALL OF THEM missed such crucial verses.

- As you can see, the English translations in the above links do not contradict my statements. But from their manner of writing, it is clear that they did not grasp the meanings.
- They must have been intent on cranking out as many *suttas* as possible without really paying attention to check self-consistency.
- One possibility is the following. No one in recent years had understood the deeper meanings of *assāsa* and *passāsa* (in the context of cultivating the Eightfold Noble Path.) **So, they mechanically used the ordinary meanings of inhaling and exhaling.**
- There is no question that even breath meditation can lead to a calm mind. **Yet, that will NOT lead to *rāgakkhaya, dosakkhaya, mohakkhaya* (i.e., *Nibbāna*.)**

10. One word with two or more meanings (depending on the context) is common in all languages.

- Let us consider a simple example in English. “Turn **right** at the next junction” and “You are **right**” are perfectly correct statements. The word “right” has very different meanings in the two contexts.
- These translators of the *Tipiṭaka suttas* have not understood the meanings of *assāsa* and *passāsa* in the context of cultivating the Eightfold Noble Path.

Ānāpānassatikathā – Detailed Explanation in Paṭisambhidāmagga

11. There is a detailed explanation of *Ānāpānasati Bhāvanā* in the *Tipiṭaka* commentary *Paṭisambhidāmagga*: “[WebLink: suttacentral: Ps 1.3 Ānāpānassatikathā.](#)”

- One can write a book translating this detailed explanation!

Summary

12. I hope I have given enough information to make the case without writing another post.

- But I will provide further details, even if not in the same order as above. **Some sections above do not need further clarification.**
- **In the meantime, please post your comments/questions in the new thread that I opened in the discussion forum:** “[WebLink: PuredDhamma Forums: Posts on ‘Elephants in the Room’.](#)”
- Please use that new thread to make comments/questions on the posts in the previous subsection as well, “[WebLink: PuredDhamma Forums: Word-for-Word Translation of the Tipiṭaka.](#)”

6.1.3.2 Assāsa Passāsa – What Do They Mean?

June 8, 2022; revised August 18, 2022

In an ordinary sense, *assāsa* and *passāsa* mean inhaling and exhaling. However, the deeper meanings in the context of *Ānāpānasati Bhāvanā* are about purifying a mind by taking in morals and discarding immoral.

Ānāpāna and Assāsa Passāsa

1. *Ānāpāna* comes from “*āna*” + “*āpāna*,” where the latter two words mean “take in/import” and “discard/export.” Thus, in connection with the *Ānāpānasati Bhāvanā*, *assāsa* and *passāsa* represent taking in morals and discarding immoral.

- Cultivating (taking in) good morals and discarding immoral is the basis of Buddha Dhamma.
- Breathing in and breathing out are physical activities. How can that **cleanse a mind**?
- Yet, it can **calm down the mind** because when concentrating on the breath, the mind cannot wander around and start generating sensual, angry, or foolish thoughts. That is indeed a lower form of *Samatha Bhāvanā*. **However, *Ānāpānasati Bhāvanā* is NOT a *Samatha Bhāvanā*, as we will see below.**
- A better way to get to *Samatha* is to listen to a Dhamma discourse or read about a Dhamma concept.

Words With Multiple Meanings

2. In any language, there are words with multiple meanings depending on the context.

- For example, in English language. the word, “**interest**” has very different meanings in the following two sentences: “We are paying a high **interest** on the loan” and “She has no **interest** in him.”
- In the same way, the Pāli words *assāsa* and *passāsa* can mean very different things depending on the context.

Mundane Meanings of *Assāsa Passāsa*

3. In some *suttas*, *assāsa passāsa* mean inhaling and exhaling. But most *suttas* convey a deeper meaning in the context of *Ānāpānasati Bhāvanā*. It is easy to figure out which meaning applies.

- For example, *assāsapassāsā* in the context of *kāya saṅkhāra* refers to breathing in and out. The Buddha explains that in the “[WebLink: suttacentral: Dutiyakāmaṃbhū Sutta \(SN 41.6\).](#)” “*Assāsapassāsā kho, gahapati, kāyasaṅkhāro, vitakkavicārā vacīsaṅkhāro, saññā ca vedanā ca cittaṣaṅkhāro*”*ti*. In that verse, the Buddha says, “*Assāsapassāsā* means *kāyasaṅkhāra*.”
- When asked why, the Buddha explained: “*Assāsapassāsā kho, gahapati, kāyikā. Ete dhammā kāyappaṭibaddhā, tasmā assāsapassāsā kāyasaṅkhāro*” i.e., “inhaling and exhaling is associated with **bodily functions** (*kāyappaṭibaddhā*), and that is why it is associated with *kāya saṅkhāra*.”
- The same definition of *kāya saṅkhāra* is in the “[WebLink: suttacentral: Cūlavedalla Sutta \(MN 44\).](#)”

4. The “[WebLink: suttacentral: Anupubbanirodha Sutta \(AN 9.31\)](#)” states: “*catuttham jhānam samāpannassa assāsapassāsā niruddhā honti.*”

- Here, *assāsa* and *passāsa* again refer to the breath. That verse says: “Breathing ceases in the fourth *jhāna*.”
- Two more *suttas* with the ordinary meanings for *assāsa* and *passāsa*: “[WebLink: suttacentral: Sappa Sutta \(SN 4.6\)](#)” and “[WebLink: suttacentral: Mahāsaccaka Sutta \(MN 36\)](#).”
- Now let us look at some *suttas* with the deeper meanings of *assāsa* and *passāsa*.

Deeper Meanings – *Assāsa* and *Parama Assāsa*

5. Two *suttas* clearly illustrate the **deeper meaning** of “*assāsa*.” The following is my translation of “[WebLink: suttacentral: Assāsapatta Sutta \(SN 38.5\)](#)” First, note that “*patta*” means “to get to a certain state.” Here, “*assāsapatta*” means “someone who has got to *assāsa*” or, in the context of this *sutta*, “someone who started taking in *lokuttara* morals.”

“Venerable Sāriputta, who is an *assāsapatta*? When a *Bhikkhu* truly **understands** the origin and ending of the six contact fields (*phassāyatanāna*) and their gratification, drawback, and escape, they have gained solace/relief by **entering the Noble Eightfold Path**.”

The Pali verse: “Yato kho, āvuso, bhikkhu channam phassāyatanānam samudayañca atthaṅgamañca assādañca ādīnavañca nissaraṇaṇca *yathābhūtaṃ pajānāti*, ettāvatā kho, āvuso, *assāsappatto hotī*”ti.

- **Note:** *assāsappatto* is a *Sotāpanna/Sotāpanna Anugāmi* and “*pajānāti*” means “understands.”
- When asked how to get there, Ven. Sripuatta replies that it is the Noble Eightfold Path (“*Ayameva kho, āvuso, ariyo aṭṭhaṅgiko maggo etassa assāsassa sacchikiriyāya, seyyathidaṃ—sammādiṭṭhi ... pe... sammāsamādhī.*”)
- (Also note that when the two words “*assāsa*” and “*patto*” are combined, it is pronounced as “*assāsappatto.*”)

6. The “[WebLink: suttacentral: Paramassāsappatta Sutta \(SN 38.6\)](#)” completes the description by saying that at the *Arahant* stage one has completed the Noble Path and has gained the ultimate (*parama*) solace/relief.

The key verse: “Yato kho, āvuso, bhikkhu channam phassāyatanānam samudayañca atthaṅgamañca assādañca ādīnavañca nissaraṇaṇca *yathābhūtaṃ viditvā anupādāvimutto hoti*, ettāvatā kho, āvuso, *paramassāsappatto hotī*”ti.” **Note:** That means becoming an *Arahant*.

- **Note:** “*viditva*” means “experienced and verified” and that gets to “*anupādāvimutto*” or the “release from the *Saṃsāric* journey, i.e., the *Arahanthood*.” In “*paramassāsappatto*” the word “*parama*” means “ultimate.”
- **Note:** The English translation in the above link does not even translate those last critical verses in the two *suttas*! That is a clear illustration that the translator did not comprehend the importance of those verses.

7. In the “[WebLink: suttacentral: Nakulapitu Sutta \(AN 6.16\)](#)” the Buddha tells Nakulapitu Gahapati that his wife is an “*assāsappatto*” (i.e., a *Sotāpanna*) whose advice he should take; see the end of the *sutta*.

- At the beginning of the “[WebLink: suttacentral: Kalāra Sutta \(SN 12.32\)](#)” *bhikkhu* Kālārakhattiyo asks Ven. Sāriputta: “*Tena hāyasmā sārīputto imasmiṃ dhammavinaye assāsaṃ patto*”ti? That means, “Has Ven. Sāriputta found solace/relief in this teaching and training?”
- Venerable Sāriputta explains how one can get there, i.e., how to attain *Nibbāna*.

One Becomes *Assāsappatto* by Cultivating the Noble Path

8. Both “[WebLink: suttacentral: Assāsappatta Sutta \(SN 38.5\)](#)” and “[WebLink: suttacentral: Paramassāsappatta Sutta \(SN 38.6\)](#)” state that one becomes an “*assāsappatto/paramassāsappatto*” (*Sotāpanna Anugāmi/Arahant*) by following the Noble Eightfold Path.

- In each *sutta* the following question is raised, “*Katamo paṇāvuso, maggo katamā paṭipadā, etassa assāsassa/paramassāsassa sacchikiriyāya*”ti?” OR “Is there a path, is there a way to become a *Sotāpanna Anugāmi/Arahant*.”
- The reply was: “*Ayameva kho, āvuso, ariyo aṭṭhaṅgiko maggo etassa assāsassa sacchikiriyāya, seyyathidaṃ—sammādiṭṭhi ...pe... sammāsamādhī.*” OR “Yes. It is the Noble Eightfold Path – *sammādiṭṭhi ...pe... sammāsamādhī.*”

Ānāpānassati Sutta (MN 118)

9. Now, let us look at the “[WebLink: suttacentral: Ānāpānassati Sutta \(MN 118\)](#)” briefly to see the usage of the words *assāsa* and *passāsa*.

- The first usage of those words is in: “*So satova assasati satova passasati.*”

- Note that the words “*assa*” and “*passa*” combined with “*sati*.” Here, “*sati*” does not just mean to “fix the attention” but “*Sammā Sati*” that comes with the comprehension of the Four Noble Truths.
- **That verse means:** “He contemplates (with *Sammā Sati*) what to take in, and what to discard (regarding an *ārammaṇa*.)”

10. The third verse below that: “*sabbakāyapaṭisaṁvedī assasissāmī’ti sikkhati*,” “*sabbakāyapaṭisaṁvedī passasissāmī’ti sikkhati*.”

- The phrase “*assasissāmī’ti sikkhati*” becomes apparent when written, “*assa sissāmī’ti sikkhati*” That means, “He trains by **taking in** what will be good for that training (purifying the mind).”
- In the same way, “*passasissāmī’ti sikkhati*” means “He trains by **discarding** what will be bad for that training (which is to purify the mind).”
- Those Verses in #9 and #10 are critical and appear many times throughout the *sutta*. We will discuss them in detail in an upcoming post.

***Ariṭṭha Sutta* (SN 54.6) – Both Meanings**

11. The incorrect version of *Ānāpānassati* was there even before the Buddha. In the [WebLink: suttacentral: Ariṭṭha Sutta \(SN 54.06\)](#), *Bhikkhu Ariṭṭha* told the Buddha that he practices *Ānāpānassati* as follows: “*So satova assasissāmi, satova passasissāmi*.”

- In the above verse, *Bhikkhu Ariṭṭha* meant, “I breathe in mindfully, breathe out mindfully.” There is no “*sikkhati*” in this verse. Inhaling and exhaling does not lead to training on the Noble Path, i.e., removal of defilements from the mind.” Furthermore, there is no role for “*Sammā Sati*” via “*So satova assasati satova passasati*” as in *Ānāpānassati Sutta* (MN 118); see #9 above.

The Buddha told him the following. “*..Atthesā, ariṭṭha, ānāpānassati, nesā natthī’ti vadāmi. Api ca, ariṭṭha, yathā ānāpānassati vitthārena paripuṇṇā hoti taṃ suṇāhi, sādhu kaṃ manasi karohi; bhāsissāmī’ti*.”

- **Translated:** “*..There is that ānāpānassati, Ariṭṭha*. I don’t say that there isn’t. But I will describe the real (*yathā*) *ānāpānassati* in detail, listen and pay close attention. I will speak.”

Then the Buddha explains with the same verses from the *Ānāpānassati Sutta* (MN 118): “*So satova assasati, satova passasati. Dīghaṃ vā assasanto ‘dīghaṃ assasāmī’ti pajānāti ...pe... ‘paṭinissaggānupassī assasissāmī’ti sikkhati, ‘paṭinissaggānupassī passasissāmī’ti sikkhati. Evaṃ kho, ariṭṭha, ānāpānassati vitthārena paripuṇṇā hotī’ti*.”

- Of course, this explanation is the *uddesa* version. We will discuss that in the *niddesa* (with more details) in an upcoming post.

Sabbe Saṅkhārā Anassāsikā

12. *Anassāsikā* comes from *na* + *assāsikā*. Thus, “*anassāsikā*” is something that **should not** be taken in or associated with or cultivated because it can only be detrimental.

- The verse, “*evaṃ anassāsikā, bhikkhave, saṅkhārā*” means, “*Bhikkhus, you should not cultivate saṅkhārā*.” There are several *suttas* with that verse. See, for example, “[WebLink: suttacentral: Vepullapabbata Sutta \(SN 15.20\)](#).” Some others are SN 22.96, AN 7.66, MN 76, MN 112, and DN 17.
- It is easy to see why. The *Akusala-mūla Paṭicca Samuppāda* starts with, “*avijjā paccayā saṅkhārā*” and ends with “*bhava paccayā jāti, jāti paccayā jarā, maraṇa, soka-parideva-dukkha-domanassupāyāsā sambhavan’ti. Evametassa kelavassa dukkhakkhandhassa samudayo hoti*.” OR to “whole mass of suffering.”

- Of course, “*saṅkhāra*” are many types that can bring *vipāka* to varying degrees. *Apuñña abhisāṅkhāra* (or *apuññābhisāṅkhāra*) can lead to birth in the *apāyās*. *Puñña abhisāṅkhāra* (or *puññābhisāṅkhāra*) leads to “good births” but still extends the rebirth process where future rebirths in the *apāyās* are still possible. All *saṅkhāra* generation stops at the death of an *Arahant*.

1. **Lokuttara** = *Loka* + *Uttara*. Here *Loka*, means the five aggregates. *Uttara* means above, beyond or that which transcends. It is the supra mundane consciousness that enables one to transcend this world of mind body. [*loka* : ‘world’, denotes the 3 spheres of existence comprising the whole universe, i. e. (1) the sensuous world (*kāma-loka*), or the **world of the 5 senses**; (2) the fine-material world (*rūpa-loka*), corresponding to the 4 fine-material absorptions (*s.jhāna* 1-4); (3) the immaterial world (*arūpa-loka*), corresponding to the 4 immaterial absorptions (*s.jhāna*, 5-8). **uttara** : [adj.] higher; further; northern; over. (nt.), an answer; reply.

6.1.3.3 **Ānāpānasati Not About Breath – Icchānaṅgala Sutta**

October 7, 2022

Icchānaṅgala Sutta — and many others — clearly illustrate that *Ānāpānasati* is not breath meditation.

“[WebLink: suttacentral: Icchānaṅgala Sutta \(SN 54.11\)](#)” is a short *sutta*. One can get a clear answer to whether *Ānāpānasati* is breath meditation. I will translate the complete *sutta* so that there will be no ambiguity.

Buddha Spending a Rainy Season (*Vassāvāsa*) in Seclusion

1. “*Ekaṃ samayaṃ bhagavā icchānaṅgale viharati icchānaṅgalavanasaṇḍe. Tatra kho bhagavā bhikkhū āmantesi: “icchāmaṃ, bhikkhave, temāsaṃ paṭisallīyituṃ. Nāmhī kenaci upasaṅkamitabbo, aññatra ekena piṇḍapātānīhārakenā”ti.*

“*Evaṃ, bhante*”*ti kho te bhikkhū bhagavato paṭissutvā nāssudha koci bhagavantam upasaṅkamati, aññatra ekena piṇḍapātānīhārakena.*”

Translated: “On one occasion, the Blessed One was staying in *Icchānaṅgala* in the *Icchānaṅgala* forest grove. He addressed the *bhikkhus*: “*Bhikkhus*, I wish to go into seclusion for three months. I am not to be approached by anyone except for the one who brings alms food.”

“As you say, *Bhante*,” the *bhikkhus* responded to him. And no one approached the Blessed One except the one who brought alms food.

2. “*Atha kho bhagavā tassa temāsassa accayena paṭisallānā vuṭṭhito bhikkhū āmantesi: “sace kho, bhikkhave, aññatitthiyā paribbājakā evaṃ puccheyyūṃ: ‘katamenāvuso, vihārena samaṇo gotamo vassāvāsaṃ bahulaṃ vihāsī’ti, evaṃ puṭṭhā tumhe, bhikkhave, tesaṃ aññatitthiyānaṃ paribbājakānaṃ evaṃ byākareyyātha: ‘ānāpānassatisamādhinā kho, āvuso, bhagavā vassāvāsaṃ bahulaṃ vihāsī’ti.*

Translated: “Then the Blessed One, having emerged from seclusion after the passing of three months, addressed the *bhikkhus*: “*Bhikkhus*, if adherents of other sects ask you, ‘How did Buddha Gotama spend the rains residence?’ You should answer them in this way: ‘It was with *ānāpānasati samādhi* that the Blessed One dwelled.’

Buddha Spending *Vassāvāsa* in *Ānāpānasati Samādhi*

3. “*Idhāhaṃ, bhikkhave, sato assasāmi, sato passasāmi. Dīghaṃ assasanto ‘dīghaṃ assasāmī’ti pajānāmi, dīghaṃ passasanto ‘dīghaṃ passasāmī’ti pajānāmi; rassaṃ assasanto ‘rassaṃ assasāmī’ti pajānāmi, rassaṃ passasanto ‘rassaṃ passasāmī’ti pajānāmi; ‘sabbakāyappaṭisaṃvedī*

assasissāmī'ti pajānāmi ... pe ... 'paṭinissaggānupassī assasissāmī'ti pajānāmi, 'paṭinissaggānupassī passasissāmī'ti pajānāmi."

The above verse (phrase) is the stock phrase describing *Ānāpānasati* in the “[WebLink: suttacentral: Ānāpānasati Sutta \(MN 118\)](#)” EXCEPT for a critical difference. Let us look at the corresponding description in the *Ānāpānasati Sutta* (MN 118):

“So satova assasati satova passasati. Dīghaṃ vā assasanto ‘dīghaṃ assasāmī’ti pajānāti, dīghaṃ vā passasanto ‘dīghaṃ passasāmī’ti pajānāti; rassaṃ vā assasanto ‘rassaṃ assasāmī’ti pajānāti, rassaṃ vā passasanto ‘rassaṃ passasāmī’ti pajānāti; sabbakāyapaṭisaṃvedī assasissāmī’ti *sikkhati* ... *pe* ... paṭinissaggānupassī assasissāmī’ti *sikkhati*, ‘paṭinissaggānupassī passasissāmī’ti *sikkhati*.”

4. I highlighted the words that are different in the two cases. Those in red denote Buddha's *Ānāpānasati* described in the *Īcchānaṅgala Sutta* (SN 54.11). They are replaced by the ones in blue in the procedure followed by a *bhikkhu* in the *Ānāpānasati Sutta* (MN 118.)

- Also, ... *pe* ... indicates skipping the intervening part to keep the text short. The skipped sections include the sections of *kāyānupassanā*, *vedanānupassanā*, *cittānupassanā*, to the end of *dhammānupassanā*. That skipped section is a couple of pages long. The switch from *pajānāmi* to *sikkhati* applies in all sections.

5. Other than the first-person usage for the Buddha (e.g., *sato assasāmī*) and the third-person for a *bhikkhu* (e.g., *satova passasati*), the main difference is in *pajānāmi* replacing *sikkhati* in *kāyānupassanā* through *dhammānupassanā* in the *Ānāpānasati Sutta* (MN 118.)

- The skipped sections include the four sections of *kāyānupassanā*, *vedanānupassanā*, *cittānupassanā*, to the end of *dhammānupassanā*. In *kāyānupassanā*, the verse “*sabbakāyapaṭisaṃvedī assasissāmī’ti sikkhati*” for a *bhikkhu* is replaced by “*sabbakāyappaṭisaṃvedī assasissāmī’ti pajānāmi*” for the Buddha. Lastly, in *dhammānupassanā*, “*paṭinissaggānupassī assasissāmī’ti sikkhati*” for a *bhikkhu* is replaced by the verse “*paṭinissaggānupassī assasissāmī’ti pajānāmi*” for the Buddha.
- There, *pajānāmi* means “I know,” and “*sikkhati*” means “(a *bhikkhu*) will train thus.” In the *Īcchānaṅgala Sutta* (SN 54.11), the Buddha recalls/reenacts the process for a “pleasant abiding,” as stated in #8 below, whereas a *sekha bhikkhu* would train that way, as indicated in #7.
- Of course, the switching applies to all corresponding verses for *vedanānupassanā* and *cittānupassanā*, as pointed out in #4.
- That distinction will become more apparent in #7 and #8 below.

Ānāpānasati Samādhi = Ariya Vihāra, Brahma Vihāra, Tathāgata Vihāra

6. “*Yañhi taṃ, bhikkhave, sammā vadamāno vadeyya: ‘ariyavihāro’ itipi, ‘brahmavihāro’ itipi, ‘tathāgatavihāro’ itipi. Ānāpānasattisamādhiṃ sammā vadamāno vadeyya: ‘ariyavihāro’ itipi, ‘brahmavihāro’ itipi, ‘tathāgatavihāro’ itipi.*”

Translated: “One can call that pleasant abiding of the Buddha a Noble dwelling, a *Brahmā* dwelling, a *Tathāgata* dwelling. The *Ānāpānasati samādhi* can be rightly called a Noble dwelling,’ *Brahmā* dwelling,’ or ‘a *Tathāgata* dwelling.’

A Trainee (Sekhā) Makes Progress With Ānāpānasati

7. “*Ye te, bhikkhave, bhikkhū sekhā appattamānasā anuttaraṃ yogakkhemaṃ patthayamānā viharanti tesam ānāpānasattisamādhi bhāvito bahulīkato āsavānaṃ khayāya samvattati.*”

Translated: “For those *bhikkhus* who are still trainees (*sekhā*) who have yet to attain the *Arahanthship*, cultivation of *Ānāpānasati samādhi* leads to the **ending of the āsavā** (i.e., attaining *Arahanthood*).”

A Buddha (or Arahant) Lives With *Ānāpānasati* for a Pleasant State of Mind

8. “*Ye ca kho te, bhikkhave, bhikkhū arahanto khīṇāsavā vusitavanto katakaraṇīyā ohitabhārā anuppatasadatthā parikkhīṇabhavasamyojanā sammadaññāvimuttā, tesam ānāpānassatisamādhi bhāvito bahulīkato diṭṭhadhammasukhavihārāya ceva samvattati satisampajaññāya ca.*”

Translated: “For those *bhikkhus* who are *Arahants*, who have eradicated defilements and have completed the Noble Path, *Ānāpānasati samādhi* leads to a pleasant abiding in this life together with mindfulness & alertness.”

Thus the Synonyms: *Ariya Vihāra*, *Brahma Vihāra*, *Tathāgata Vihāra*

9. “*Yañhi taṃ, bhikkhave, sammā vadamāno vadeyya: ‘ariyavihāro’ itipi, ‘brahmavihāro’ itipi, ‘tathāgatavihāro’ itipi. Ānāpānassatisamādhiṃ sammā vadamāno vadeyya: ‘ariyavihāro’ itipi, ‘brahmavihāro’ itipi, ‘tathāgatavihāro’ itipī’ti.*”

Translated: Therefore, “*Ānāpānasati samādhi* can be correctly called: ‘Noble dwelling,’ ‘*Brahmā* dwelling,’ ‘*Tathāgata* dwelling.’

- **Note:** *Brahma* and *Tathāgata* can be (and have been) used for an *Arahant* and a Buddha, even though that is not standard usage. *Brahma* here does not mean one in a *Brahma* realm.
- That is the end of the *Icchānaṅgala Sutta* (SN 54.11).

Kaṅkheyya Sutta Is Similar to *Icchānaṅgala Sutta*

10. “[WebLink: suttacentral: Kaṅkheyya Sutta \(SN 54.12\)](#)” is similar. The use of the term “*sekho vihāro*” there indicates the abiding of a trainee *bhikkhu* (*sekha*) engaging in *Ānāpānasati* in the beginning verse of that *sutta*.

“*Ekam samayaṃ āyasmā lomasakaṃbhiyo sakkesu viharati kapilavatthusmiṃ nigrodhārāme. Atha kho mahānāmo sakko yenāyasmā lomasakaṃbhiyo tenupasaṅkami; upasaṅkamitvā āyasmantaṃ lomasakaṃbhiyaṃ abhivādetvā ekamantaṃ nisīdi. Ekamantaṃ nisinnō kho mahānāmo sakko āyasmantaṃ lomasakaṃbhiyaṃ etadavoca: “so eva nu kho, bhante, sekho vihāro so tathāgata vihāro, udāhu añño va sekho vihāro añño tathāgatavihāro”ti?*”

Translated: “At one time, Venerable Lomasavaṅṅisa was staying in the land of the Sakyans, near Kapilavatthu in the Banyan Tree Monastery. Then Mahānāma the Sakyan went up to Venerable Lomasavaṅṅisa, bowed, sat down to one side, and said to him, “Bhante, is the **meditation/abiding of a trainee (*sekho vihāro*)** just the same as the **meditation/abiding of an Arahant (*tathāgata vihāro*)**? Or is the meditation/abiding of a trainee different from the meditation/abiding of an *Arahant*?”

11. “*Na kho, āvuso mahānāma, sveva sekho vihāro, so tathāgatavihāro. Añño kho, āvuso mahānāma, sekho vihāro, añño tathāgatavihāro. Ye te, āvuso mahānāma, bhikkhū sekhā appattamānasā anuttaraṃ yogakkhemaṃ patthayamānā viharanti, te pañca nīvaraṇe pahāya viharanti. Katame pañca? Kāmacchandanīvaraṇaṃ pahāya viharanti, byāpādanīvaraṇaṃ ... pe ... thinamiddhanīvaraṇaṃ ... uddhaccakukkuccanīvaraṇaṃ ... vicikicchānīvaraṇaṃ pahāya viharanti.*

Yepi te, āvuso mahānāma, bhikkhū sekhā appattamānasā anuttaraṃ yogakkhemaṃ patthayamānā viharanti, te ime pañca nīvaraṇe pahāya viharanti.”

Translated: “Mahānāma, the meditation of a trainee and an *Arahant* are not the same; they are different. Those *bhikkhūs* who are trainees haven’t attained *Nibbāna*; they strive to attain *Nibbāna*. They meditate, seeking to give up the five hindrances. What five? *Kāmacchanda*, *byāpāda*, *thinamiddha*, *uddhaccakukkucca*, *vicikicchā*.”

- Another point is that *sekha vihāra* does not mean a meditation session. Instead, that is how a trainee *bhikkhu* LIVES.

Cultivation of *Ānāpānasati* Fulfills *Satipaṭṭhāna*, *Satta Bojjhaṅga*

12. The rest of the *suttas* in that series, “[WebLink: suttacentral: Pathamaānanda Sutta \(SN 54.13\)](#)” through “[WebLink: suttacentral: Āsavakkhaya Sutta \(SN 54.20\)](#),” describe how the cultivation of *Ānāpānasati* will lead to the **fulfillment of all requirements** to get to *Nibbāna* or *Arahanthood*. More evidence is discussed in the post “[Is Ānāpānasati Breath Meditation?](#)”

- It is incredible to see those who have (mechanically) translated all those *suttas* did not realize the obvious statements in the *suttas*. Please read the English translations in the above links. But it is not just this translator. All English translators have translated without grasping the meanings. Were they not paying attention?
- All of them insist that *Ānāpānasati* means “breath meditation.” Amazing!
- That is why I call this series “Elephants in the Room.” It is like: a giant elephant is in a room, and someone is saying, “What elephant? No. There is no elephant here”! They can pretend to ignore the elephant until getting crushed by elephant. Such is the blinding nature of *micchā diṭṭhi*.

VII Three Levels of Practice

It is a good idea for anybody to read the first section, because the basic ideas and fundamentals are described in that section.

○ First Section: Moral Living and Fundamentals

▪ Subsection: The Basics

- “The Pale Blue Dot.....”
- “The Law of Attraction, Habits (Gati), and Cravings (Āsavas)”
- “Habits, Goals, and Character (Gati)”
- “Wrong Views (Micchā Ditthi) – A Simpler Analysis”
- “First Noble Truth – A Simple Explanation of One Aspect”

▪ Subsection: Calming the Mind

- “Key to Calming the Mind – The Five Hindrances”
- “Solution to a Wandering Mind – Abandon Everything?”
- “Right Speech – How to avoid Accumulating Bad Kamma”
- “Three Kinds of Happiness – What is Nirāmisa Sukha?”
- “Need to Experience Suffering in Order to Understand It?”
- “Does Impermanence Lead to Suffering?”

▪ Subsection: Buddha Dhamma and Buddhism

- “A Buddhist or a Bhoudhaya?”
- “Where to Start on the Path?”
- “What Reincarnates? – Concept of a Lifestream”
- “Recent Evidence for Unbroken Memory Records (HSAM)”
- “Buddhism without Rebirth and Nibbāna?”

▪ Subsection: Dhamma Concepts

- “Kilesa – Relationship To Akusala, Kusala, And Puñña Kamma”
- “Ten Immoral Actions (Dasa Akusala)”
- “Punna Kamma – Dāna, Sīla, Bhāvanā”
- “The Five Precepts – What the Buddha Meant by Them”
- “How to Evaluate Weights of Different Kamma”
- “What is Kamma? – Is Everything Determined by Kamma?”
- “Account of Aṅgulimāla – Many Insights to Buddha Dhamma”
- “The Four Bases of Mental Power (Cattāro Iddhipāda)”
- “Why is it Necessary to Learn Key Pāli Words?”

▪ Subsection: Buddha Dhamma and Morality

- “Origin of Morality (and Immorality) in Buddhism”
- “Is Eating Meat an Akusala Kamma (Immoral Deed)?”

- [“Do Things Just Happen? – The Hidden Causes”](#)

○ **Second Section:** [Working Towards Good Rebirths](#)

- [“Sansāric Habits and āsavas”](#)
- [“Vagaries of Life and the Way to Seek Good Rebirths”](#)
- [“How to Avoid Birth in the Apayas”](#)
- [“Rebirth – Connection to Suffering in the First Noble Truth”](#)
- [How the Buddha Described the Chance of Rebirth in the Human Realm](#)
- [“Kamma, Debt, and Meditation”](#)
- [“Ditthi \(Wrong Views\), Sammā Ditthi \(Good/Correct Views\)”](#)
- [“How do we Decide which View is Wrong View \(Ditthi\)?”](#)
- [“Three Kinds of Ditthi, Eightfold Paths, and Samādhi”](#)
- [“Implications of the Rebirth Process in Daily Life and in Society”](#)
- [“What Does Buddha Dhamma Say about Creator, Satan, Angels, and Demons?”](#)
- [“Patisandhi Citta – How the Next Life is Determined According to Gati”](#)

○ **Third Section:** [Seeking Nibbāna](#)

- [“Attha Purisa Puggalā – Eight Noble Persons”](#)
- [“Āsava, Anusaya, and Gati \(Gathi\)”](#)
- [“The Way to Nibbāna – Removal of āsavas”](#)
- [“Kanha \(Dark\) and Sukka \(Bright\) Kamma and Kammakkhaya”](#)
- [“Dasa Samyojana – Bonds in Rebirth Process”](#)
- [“The Cooling Down Process \(Nibbāna\) – How the Root Causes are Removed”](#)
- [“Why is Correct Interpretation of Anicca, Dukkha, Anatta so Important?”](#)
- [“How to Cultivate the Noble Eightfold Path Starting with Anicca, Dukkha, Anatta”](#)
- [“Difference Between Giving Up Valuables and Losing Interest in Worthless”](#)
-

○ **Fourth Section:** [Sotāpanna Stage of Nibbāna](#)

- [“The Sotāpanna Stage”](#)
- [“Why a Sotāpanna is Better off than any King, Emperor, or a Billionaire”](#)
- [“Myths about the Sotāpanna Stage”](#)
- [“Anuloma Patiloma Paticca Samuppāda – Key to Sotāpanna Stage”](#)
- [“Sotāpanna Anugāmi and a Sotāpanna”](#)
- [“Sotāpanna Anugāmi – No More Births in the Apāyā”](#)
- [“Four Conditions for Attaining Sotāpanna Magga/Phala”](#)
- [“Sotāpatti Anga – The Four Qualities of a Sotāpanna”](#)

- “Sammā Ditṭhi – Realization, Not Memorization”
- “Sakkāya Ditṭhi is Personality (Me) View?”
- “How Does One Know whether the Sotāpanna Stage is Reached?”
- **Subsection:** “Assāda, Ādīnava, Nissarana”
 - “Assāda, Ādīnava, Nissarana – Introduction”
 - “How Perceived Pleasures (Assāda) lead to Dukkha”
 - “Kāma Guna, Kāma, Kāma Rāga, Kāmaccaṇḍha”
 - “Vedanā (Feelings) Arise in Two Ways”
 - “Feelings: Sukha, Dukha, Somanassa, and Domanassa”
 - “What is ‘Kāma’? It is not Just Sex”
 - “Kāma Āsvada Start with Phassa Paccaya Vedanā or Samphassa Ja Vedanā”
- “Akusala Citta – How Does a Sotāpanna Avoids Apayagami Citta”
- “What is the only Akusala Removed by a Sotāpanna?”
- **Subsection:** “Udayavaya Ñāṇa”
 - “Udayavaya Ñāṇa – Introduction”
 - “Nibbatti Lakkhana in Udayavaya Ñāṇa”
 - “Āhāra (Food) in Udayavaya Ñāṇa”
 - “Udayavaya Ñāṇa – Importance of the Cittaja Kaya”

7.1 Moral Living and Fundamentals

Basic core concepts in Buddha Dhamma (Buddhism) are discussed. Many misconceptions that persist in both Mahāyāna and Theravāda are discussed.

○ The Basics

- “The Pale Blue Dot.....”
- “The Law of Attraction, Habits (Gati), and Cravings (Āsavas)”
- “Habits, Goals, and Character (Gati)”
- “Wrong Views (Micchā Ditthi) – A Simpler Analysis”
- “Four Noble Truths: Recipe for Problem Solving”
- “First Noble Truth – A Simple Explanation of One Aspect”
- “Difference between a Wish and a Determination (Paramita)”

○ Calming the Mind

- “Key to Calming the Mind – The Five Hindrances”
- “Solution to a Wandering Mind – Abandon Everything?”
- “Right Speech – How to avoid Accumulating Bad Kamma”
- “Three Kinds of Happiness – What is Nirāmisa Sukha?”
- “Learning Buddha Dhamma Leads to Nirāmisa Sukha”
- “Need to Experience Suffering in Order to Understand It?”
- “Does Impermanence Lead to Suffering?”

○ Buddha Dhamma and Buddhism

- “What is Unique in Buddha Dhamma?”
- “A Buddhist or a Bhoudhaya?”
- “Where to Start on the Path?”
- “What Reincarnates? – Concept of a Lifestream” Moved to **Paṭicca Samuppāda** ==> **Sakkāya** **Ditthi and Paṭicca Samuppāda**
- “Recent Evidence for Unbroken Memory Records (HSAM)”
- “Buddhism without Rebirth and Nibbāna?”
- ““Self” and “no-self”: A Simple Analysis – Do We Always Act with Avijjā?”

○ Dhamma Concepts

- “Kilesa – Relationship To Akusala, Kusala, And Puñña Kamma”
- “Ten Immoral Actions (Dasa Akusala)”
- “Puñña Kamma – Dāna, Sīla, Bhāvanā”
- “Details of Kamma – Intention, Who Is Affected, Kamma Patha”
- “The Five Precepts – What the Buddha Meant by Them”

- [“What is Kamma? – Is Everything Determined by Kamma?”](#)
- [“How to Evaluate Weights of Different Kamma”](#)
- [“Account of Aṅgulimāla – Many Insights to Buddha Dhamma”](#)
- [“The Four Bases of Mental Power \(Cattāro Iddhipāda\)”](#)
- [“Why is it Necessary to Learn Key Pāli Words?”](#)
- [Buddha Dhamma and Morality](#)
 - [“Origin of Morality \(and Immorality\) in Buddhism”](#)
 - [“Is Eating Meat an Akusala Kamma \(Immoral Deed\)?”](#)
 - [“Do Things Just Happen? – The Hidden Causes”](#)
 - [“Craving for Pornography – How to Reduce the Tendency”](#)

7.1.1 The Basics

- [“The Pale Blue Dot.....”](#)
- [“The Law of Attraction, Habits \(Gati\), and Cravings \(Āsavas\)”](#)
- [“Habits, Goals, and Character \(Gati\)”](#)
- [“Wrong Views \(Micchā Ditthi\) – A Simpler Analysis”](#)
- [“Four Noble Truths: Recipe for Problem Solving”](#)
- [“First Noble Truth – A Simple Explanation of One Aspect”](#)
- [“Difference between a Wish and a Determination \(Paramita\)”](#)

7.1.1.1 The Pale Blue Dot.....

Revised March 2, 2020; August 28, 2022

1. Even if some of us are not thinking about a “wider world view” or “what happens after death,” we all want a better world.

I thought of sharing this marvelous video from the late Dr. Carl Sagan:

[WebLink: YOUTUBE: Carl Sagan - Pale Blue Dot](#)

2. When I read the writings of all those past scientists like Sagan, Feynman, Einstein, Bohm, Heisenberg, etc., I wonder how much more they could have accomplished spiritually if they had been exposed to pure Buddha Dhamma.

- Yet, I am still impressed by their pure reasoning and compassion for humanity; they were not just scientists with a narrow focus. They thought deeply about the “purpose of existence.”

3. Even though science has revealed the unimaginable vastness of space, scientists think our universe is only 15 billion years old. However, each of us has an uncountable number of lives in the past. See [“Origin of Life – There is No Traceable Origin.”](#) Not only is our place in the vast cosmos insignificantly small, but our existence of about 100 years (in this life) is also insignificantly small.

- Yet, out of countless beings that live on this Earth, we are the only species capable of forging our destiny.
- We must be mindful not only of the welfare of family and friends but of all other people and beings (seen and unseen).

4. Do you know why some actions are good and others bad? We may quote some ethical maxims or juggle with philosophical abstractions, but there is a simple explanation called nature. “Good is good because it leads to happiness and freedom of the heart. Bad is bad because it leads to suffering, and it feels bad.”

- The Buddha said a moral deed (*puñña kamma*) is one that makes one's heart “pulsating with joy”; an immoral deed leads to a burdened heart.

5. Nature encourages morality and punishes immorality via its built-in reward-punishment system, which is none other than the laws of *kamma*. But the punishment is not immediate, so it is hard for people to make the connection.

- Even if the punishment in question comes a few lives later, this “time lag” is not that long since *samsāra* is “beginning-less” and “endless.”

6. Humans innately know what is right and what is wrong. Most bad actions are committed with a mind that is not calm but is agitated. Therefore, we need to learn how to calm our minds: “[Key to Calming the Mind – The Five Hindrances](#).”

- By the way, Dr. Sagan's books like “Pale Blue Dot: A Vision of the Human Future in Space,” “The Varieties of Scientific Experience,” and “Billions & Billions: Thoughts on Life and Death at the Brink of the Millennium” are very informative. These are likely to be available in local public libraries.

Next, “[The Law of Attraction, Habits, Character \(Gati\), and Cravings \(Āsava\)](#)”,

7.1.1.2 The Law of Attraction, Habits, Character (Gati), and Cravings (Āsava)

Revised October 24, 2018; March 2, 2020; November 1, 2020; August 11, 2022

The Law of Attraction

1. The saying, “Birds of a feather flock together,” is true, and we can see that all around us.

- We can put people into various categories: sportsmen/sportswomen, thieves, politicians, murderers, churchgoers, environmentalists, liberals, conservatives, etc.
- In school, kids tend to get into different groups: those who play sports, like partying, nerds, geeks, etc.
- Of course, there may be some overlaps, but we can clearly see people tend to socialize with those with common interests, likings, etc.

Those With Similar Character/Habits (Gati) Tend To Stay Together

2. This is a universal principle. A basic rule in chemistry is that “like molecules” stay together.

- We all know that oil and water do not mix. Those two molecules have very different properties (analogous to *gati* in people.) On the other hand, water molecules stay together happily since they all have the same properties. Same with oil.
- In people, there are “good *gati*” as well as “bad *gati*.”
- Like water and oil, those with similar *gati* tend to “stick together.” This is why it is essential to stay away from those with “bad *gati*” and to try to associate with those with “good *gati*.”

3. Buddha Dhamma describes the laws of nature. So it is not surprising that Buddha Dhamma's law of attraction comes naturally. There are three keywords in Dhamma that are relevant. (1) Habits/character (*gati* with the “t” pronounced “th,” like in “three” or in Thailand), (2) cravings (*āsavā*), and (3) Hidden cravings (*anusaya*.) See “[Habits and Goals, and Character \(Gati\)](#).”

- **One's *gati* are closely related to one's hidden cravings (*anusaya*.) Such *gati* or *anusaya* “come to the surface” as cravings (*āsava*) when triggered by sensory input (*ārammana*.)** For example,

an alcoholic does not crave drinking all the time. That “drunkard *gati*” remains hidden as *anusaya* until he sees an alcohol bottle or is invited to a drink by a friend.

- Some of these habits we take from life to life, see “[Samsāric Habits, Character \(Gati\) and Cravings \(Āsava\)](#).”
- However, it is possible to change even those deeply-ingrained bad *gati*. The key is to realize the bad consequences of “bad *gati*” and cultivate “good *gati*.”

***Paṭicca Samuppāda* Explains the Law of Attraction**

4. The law of attraction can be explained with *Paṭicca Samuppāda*, the principle of cause and effect in Dhamma; see “[Paticca Samuppāda – Introduction](#).”

- “*Pati + iccha*” means associate or bind with something one likes. “*sama + uppāda*” means what results (*uppāda*) from that is something similar (*sama*) in kind. That association leads to an outcome of the same kind.
- If a child hangs out willingly and enthusiastically with others who like to work hard and enjoy getting good grades, they will continue on that path to success. The more a child willingly hangs out with a criminal gang, his mind becomes more attuned to criminal behavior and becomes a criminal capable of doing atrocious crimes.
- **Thus, Buddha Dhamma says, “*gati* (character) attracts a similar *gati*.”** We will see this develop into profound meaning.

Environment Plays a Key Role in Changing *Gati*

5. However, Dhamma says this law of attraction does not need to be fatalistic, i.e., one with bad habits/cravings does not have to go down a slippery slope. One CAN change those habits/cravings GRADUALLY and thus change one’s character (*gati*).

However, a child is not capable of doing this on his/her own. That is why it is the parents’ responsibility to direct the child:

- Parents can make a HUGE contribution in setting up good habits/cravings in a child starting from conception. The fetus feels the love and cares the parent feel towards each other. That is as important, perhaps more important than the food consumed by the mother. A child born into an environment of abuse or violence may develop life-long problems.
- As the child grows, the child’s behavior and habits are influenced HUGELY by the parents, friends, and the school environment. It is the responsibility of the parents and teachers to guide the child.

6. When one becomes an adult, one has full control of one’s life (in a mundane sense). Even if childhood was not good, and even if one has acquired a set of bad habits (or even *samsāric* habits that have molded one’s character in fundamental ways), it is POSSIBLE to change them.

- One can use the same *Paṭicca Samuppāda* principle to change direction.
- All one needs to do is change the “*pati+ichcha*” part, i.e., change one’s likings or habits. Then “*sama+uppāda*” will happen automatically. That is nature’s law. See, “[Paticca Samuppāda](#).”

One Needs to See the Consequences of Bad *Gati*

7. First, one needs to convince one’s mind that the current path will lead to a bad destiny. That is getting rid of *avijjā* in the “*avijjā paccayā saṅkhāra*” step in *Paṭicca Samuppāda*. One must contemplate the bad consequences of staying on the same wrong path. And one also needs to contemplate the benefits of cultivating good habits.

- For example, a smoker cannot just make a New Year resolution and stop smoking (a few can, but most cannot). Instead, it is better first to look at all the medical evidence.
- There is strong evidence that one could die early and may be burdened in old age with lung problems if one continues smoking. One could talk to someone who has given up smoking and listen to that person's "success story" or think about not seeing the annoyance of those around when one lights a cigarette, etc.

Cultivating Good *Gati*

8. When one acquires "good habits" (initially slowly and with effort), one is attracted to people, settings, workplaces, and environments that further nurture and grow those habits, changing one's character. **Thus, the process becomes self-feeding once started.**

- The law of attraction is embedded in *Paṭicca Samuppāda*: "*pati+ichcha*," leading to "*sama+uppāda*." Thus it is critical to develop a liking (*chanda*) and desire (*citta*) for what one wants to accomplish, to critically analyze the situation (*vīmaṃsā*), and make an effort (*virīya*); see "[The Four Bases of Mental Power \(Cattāro Iddhipāda\)](#)." [*vīmaṃsā* : 'investigation, inquiry, pondering', is one of the 4 roads to power (*iddhi-pāda*)]
- When one repeatedly engages in certain lifestyles and activities (good or bad), those become habits. In Sinhala, it is said that "*ඳුරු කරන දේශ ගති වනවා* (*ganna deya gathi venava*)." When one does this repeatedly and possibly over numerous rebirths, they get deeply embedded as deep-seated cravings (*āsavā*). Those *gati* (characters) also become "*bhava*" as well. Whatever that is liked becomes one's existence (*bhava*) or reality (in Sinhala, "*තීර්ණ බව* (*thibena bhava*)").
- When one has a certain character (*gati*), it becomes easy to get into the corresponding "state" or existence; this is one meaning of *bhava*. For example, one with a "drinking habit" is easy to be "born" in that state, i.e., just the sight of a bar may cause that person to get drunk. **This is the concept extended in Buddha Dhamma.** It is easy to be "born" with those characteristics in the new birth (*uppatti bhava*) or even in the present life (*pavutti bhava*). This is a bit deeper concept discussed in the *Paṭicca Samuppāda* section. See, for example, "[Akusala-Mūla Paṭicca Samuppāda](#)."

Need to Have Patience

9. The problem many people run into is that they would like to change quickly, which does not normally happen. Initial progress could be slow. However, when one gets traction, the process speeds up. It is like trying to reverse the direction of a moving car. One needs to stop going in the wrong direction first. Even when one starts the car facing the right direction, it takes a little while to accelerate and ramp up the speed. See "[Habits, Goals, and Character \(Gati\)](#)" and the links there. Let us consider two examples:

- Suppose one wants to be a successful businessman. In that case, one should try to "build up" business people's habits: knowledge of the particular business, learning relevant skills, hard work, etc. THEN the law of attraction starts working and will automatically pull one to others with similar interests and environments or conditions.
- If a high-school kid wants to go to college, he/she should try to get into that mindset. Spending more time deciding what kinds of subjects to study and then getting "immersed" in them. The parent and teachers can make a big difference by encouraging and guiding on the correct path.
- If someone wants to attain "*nirāmisā sukha*" (see "[Three Kinds of Happiness – What is Nirāmisā Sukha?](#)"), one needs to spend some time and first learn the true Dhamma. **As one learns, one gets motivated to learn more because one will start feeling the character's change (*gati*).**

Managing *Gati* is the First Step to *Nibbāna*

10. Finally, the law of attraction also works in the *sāmsāric* rebirth process.

- Many are reborn to the same families, same geographic locations, etc. (within the same “*bhava*.”) See, [“Bhava and Jāti – States of Existence and Births Therein.”](#)
- At the moment of death, one’s mind automatically grasps a “matching birth” according to a specific *kamma vipāka*; however, habits and tendencies come into play too. One who has lived an immoral life is likely to get a similar outcome in the next life. Someone who “lives like an animal” is likely to be born an animal. One who lives like a “Deva” (a being devoid of hate) or a “*Brahma*” (a being devoid of greed and hate) is likely to reborn a *Deva*, *Brahma*.
- Thus by cultivating good habits and getting rid of bad habits, one CAN change the direction of one’s current life (character) AND future lives too.
- The best way to do this is to be mindful all the time. See the bad consequences of bad actions and bad habits, avoid them; see the good consequences of good actions and good habits, and embrace them. At the fundamental level, this is the basis of *Ānāpānasati* and *Satipaṭṭhāna Bhāvanā* (taking in what is good and getting rid of what is bad.) See [“9. Key to Ānāpānasati – How to Change Habits and Character \(Gati\).”](#)

11. Several books are available on the law of attraction and how one can use certain procedures to attain goals, build relationships, etc. The Buddha described those and more 2500 years ago.

Next, [“Habits, Goals, and Character \(Gati\),”](#) ...

7.1.1.3 Habits, Goals, and Character (Gati or Gathi)

Revised November 26, 2018; revised June 6, 2020

1. As I mentioned before, Buddha Dhamma can be interpreted at three levels; see, [“Foundation of Dhamma.”](#) But the key to making progress at ANY LEVEL is to get rid of bad habits and instill good habits **because they mold one’s character (*gati*) even though the rebirth process.**

- The Pāli (and Sinhala) word for “character” is “*gati*” (ගති.) One’s character can be changed (for good or bad) via changing one’s habits. These habits take deep roots when practiced over many lives, and become deep-seated cravings (“*āsavas*”) that form one’s character.
- Some habits are harmless. For example, some people have the habit of shaking their legs while sitting. It could be annoying to some, but it is not “morally wrong”, i.e., it is not one of the ten defilements; see, [“Ten Immoral Actions \(Dasa Akusala\).”](#)
- But there are other habits, such as drinking, stealing, sexual misconduct, etc that are morally wrong. They belong to the ten defilements of *dasa akusala*. Generating greedy or hateful thoughts can be a bad habit too. Some have a tendency to easily “flare-up.”
- Then there could some, like gambling, that could lead to immoral actions.
- There are good habits too. Giving, helping others, teaching, and being compassionate in general.

2. For someone at the highest level, the *Sabbāsava Sutta* explains how one can work towards *Nibbāna* in a systematic way by developing good habits (“*gati*”) and removing *āsavas*; see “Key Points from the *Sabbāsava Sutta*” under [“The Sotāpanna Stage.”](#)

3. Here we are going to look at it to see how those recommended steps can be used in the day-to-day life, i.e., to live a moral life. Those steps can be used to remove any bad habits. Some example are alcohol or drug use, smoking, and eating too much.

- They can also be used in achieving goals, say lose weight, getting rid of depression, or starting a new business. Achieving goals require building good habits.

4. A habit is something one gets used to by repeating it over and over. Good habits make a life easier to live with, and bad habits lead to bad results. Scientific studies have confirmed that our brains “can rewire its

connections” (plasticity of the brain), thus getting rid of bad habits and instilling good ones. The trick is to “stick to a set procedure.” Many people give up before giving their brains enough time to “rewire”; this is why many “New Year resolutions” go unfulfilled.

- One way to remove bad habits is to look at the bad consequences of such habits; see, “[The Law of Attraction, Habits, Character \(Gati\), and Cravings \(Āsavas\)](#).”
- In-depth analysis at, “[How Habits are Formed and Broken – A Scientific View](#).”

5. The seven steps in the *Sabbāsava Sutta* can be helpful for developing good habits for a moral life. These steps basically convince the mind of the benefits of good habits/downside of bad habits and set up a conducive environment.

The 7 steps in the *Sabbāsava Sutta* (interpreted conventionally or mundane or “*padaparama*” interpretation):

1. **Cultivate an understanding.** Learn all about the direct and indirect benefits, what is involved, the best way to go about achieving the goal, etc.
2. **Be discipline.** Avoid getting distracted by things that provide “temporary pleasures”, like a drug addict thinking it is OK to “take a small puff” while working to be free of drugs.
3. **Association are important.** Associate with knowledgeable people who can help and get to know other helpful resources.
4. **Patience and tolerance.** (Maintain focus and not get “shaken off” by small inconveniences. Perseverance is critical.
5. **Avoidance are important as associations.** Dissociating with people who have negative attitudes and avoiding unsafe places, practices, etc.
6. **Removal of hindrances.** Suppress discouraging thoughts by contemplating on the long-term benefits of the project.
7. **Bhāvanā or “immersing in the project.”** That means constantly thinking about the main objective and the ways to get there.

6. A good idea of the goal is needed first. One should not undertake a journey without learning about the destination and how to get there. It is a good idea to explore how it can be beneficial to oneself and others (family, friends, and even to society) too.

- Once the overview is done and the decision to undertake the project is made, all steps should be used as appropriate. For example, the first and last items on the above list (understanding and meditating) go hand-in-hand.

7. Those steps can be used by anyone to enhance the quality of life in general, a moral life with a “peace-of-mind.” They are the sensible things to do.

- For example, an important decision for anyone should be to live in a good area not prone to crime, floods, etc.
- Going out at inappropriate times, in inappropriate places, is just ‘asking for trouble.’
- It is critical to avoid associating with immoral and also those with negative attitudes.
- If one carefully goes through the list, it will be clear why all those steps make common sense.

If you would like to read about how these habits develop into deep-seated *sansāric* habits or *āsavas*, see, “[Sansāric Habits, Character \(Gati\) and Cravings \(Āsava\)](#).” Also, “[The Four Bases of Mental Power \(Cattāro Iddhipāda\)](#),” can be helpful in achieving goals.

Next, “[Wrong Views \(Micchā Dittī\) – A Simpler Analysis](#)”,

7.1.1.4 Wrong Views (Micchā Diṭṭhi) – A Simpler Analysis

Revised November 27, 2017; revised May 12, 2020 (#6)

Micchā means wrong or incorrect and *diṭṭhi* means views. Pronunciation:

[WebLink: Listen to the pronunciation of diṭṭhi](#)

Here it is about the wrong views about our world or our existence. It is the most basic reason why people cannot grasp the message of the Buddha, and that is unfortunate. We all are looking at the world through “colored glasses”; each one has his/her own set of beliefs or “*diṭṭhis*,” so we cannot see the real nature.

- Some facts about nature are hard to believe, and it took the efforts of many scientists to change two common wrong views (*diṭṭhis*) that had been with the humans up to recently: that the Earth is flat and it is at the center of the universe.

1. These days, most of us believe that the Earth moves around the Sun. But it is quite clear that it goes against our experience, and the accepted views were the opposites even a few hundred years ago. We do not have any direct experience of the motion of the Earth, either its rotation around its own axis or in its orbit around the Sun. And we see ample evidence to the contrary, i.e., for the Sun rotating around the Earth, because we experience a sunrise and a sunset everyday!

- If one looks at the speeds involved it becomes even more harder to believe that the Earth is moving: The Earth moves around its axis at a speed of about 1,040.4 miles/hour (1,674.4 kilometer/hour or 465.1 meter/second) at the equator (and zero at the North and South Poles) and it moves along its orbit around the Sun at an average speed of about 67,062 miles/hour (107,300 kilometer/hour). Thus it is surprising that we have no direct perception of such movements.
- Of course, we do not feel it because everything around us is also doing exactly the same thing. When we travel in a car, we “feel the ride” because we can see the scenery passing by (and because the ride may not be smooth; luckily, the Earth is very smooth in its motions). It is the “relative motion” that we perceive. If two cars are moving in parallel with the same speed, passengers in each car see the other car to be stationary.
- However, after Galileo invented the telescope, people made more precision measurements of the planets and the heliocentric model was needed to explain all those new findings.

2. But there are many people who still believe that the Sun goes around the Earth! To quote a passage from the Wikipedia article, [WebLink: WIKI: Geocentric model](#)

- “..Morris Berman quotes survey results that show currently some 20% of the U.S. population believes that the sun goes around the Earth (geocentrism) rather than the Earth goes around the sun (heliocentrism), while a further 9% claimed not to know. Polls conducted by Gallup in the 1990s found that 16% of Germans, 18% of Americans and 19% of Britons hold that the Sun revolves around the Earth. A study conducted in 2005 by Jon D. Miller of Northwestern University, an expert in the public understanding of science and technology, found that about 20%, or one in five, of American adults believe that the Sun orbits the Earth. According to 2011 VTSIOM poll, 32% of Russians believe that the Sun orbits the Earth.”

- And, there are even some who believe that the Earth is flat: [WebLink: WIKI: Modern flat Earth societies](#)

3. Thus sometimes it is very hard to get rid of certain “wrong views” because of our “experiences” and “gut feelings.” Yet, if one hangs onto such wrong views (in the face of contrary evidence) one cannot get a correct world view. This is why we always need to “look at the big picture”; the “bigger the picture”, the better it is. It is hard to see much details while walking on the ground, but one see a whole lot better looking down from a helicopter.

- Luckily, nowadays, we have the advantage of technology to confirm that the Earth is not flat and that it moves around the Sun.

4. Similarly, it is very hard for many people to believe that humans could be reborn as animals. One argument that was given in a book that refuted rebirth was that “..in that case, the human population should not be changing, but we see an increase of the human population over the past centuries.” Apparently, the author did not even consider that a human could be born an animal. Again, it is matter of a very narrow world view. There are innumerable beings in this world and they can be born in not only in the animal and human realms, but 29 other realms that we cannot see!

- When Darwin presented his theory of evolution, it made a huge psychological impact on the society, which was not ready to accept that humans evolved from animals. It is said that Darwin did not publish his now-famous volume, *On the Origin of Species by Means of Natural Selection*, until 1859, more than 20 years after he had first formulated his theory because he knew that it would create an uproar.

5. The theory of evolution is only partially correct according to Buddha Dhamma; we will discuss this in detail in the future. When conditions for a birth in certain realm are satisfied, the nature has come up with many ways to make that birth take place.

- Accepting the fact that human can be BORN in the animal realm is an even more shocking thing to contemplate for many people. But we should not just go by our instincts, because the world is much more complex than we perceive with our limited senses.
- Even though we consider the life of an animal as “useless”, life is the most important thing in the world even for the lowest worm. All living beings have craving to continue the life they have, regardless of how pathetic it appears to us. Our “smelly bodies” are said to be repulsive to the *devas* who have fine bodies that are free of diseases as well.

6. The Buddha said, “..*bhikkhus*, sentient beings reborn as humans are few as this bit of sand on my fingernail. But those not reborn as humans are many as the sand on this great Earth. Therefore, you should strive diligently and without delay to end this suffering in the rebirth process.” That statement appears to most people as an exaggeration. That quote is from the post, [“How the Buddha Described the Chance of Rebirth in the Human Realm.”](#)

- But as described in that post, modern science is slowly proving that indeed the number of living beings, just in the animal realm, is unimaginably large. Comparatively, the human population of about 7 billion is negligibly small.
- There are more living beings in your backyard soil than the entire human population on Earth!

7. Of course we cannot see the beings in the other three lower realms. But, just because they are not amenable to our senses, we cannot say they do not exist.

- Human vision is restricted to an almost infinitesimal sliver of 400 to 700 nanometers in the wavelength spectrum. Our ears can detect only 20 to 20,000 Hertz audio frequencies. Other animals use their own “bands” above and below that. Human beings have one of the poorest senses of smell of all the organisms on Earth., etc; see the book, [“The Meaning of Human Existence”](#) by Edward O. Wilson, who is a leading biologist.
- Another way to think about this is to contemplate on the fact that there are hundreds of TV or radios broadcasts that can be “tapped into” by having a TV or a radio set to the right channel. Just because we cannot “see” those electromagnetic waves with our eyes, we cannot say they are not all around us. There are other living beings all around us with such fine bodies, we just cannot see them.
- We have only begun “see” other hidden parts of “our world” with the aid of science; see, [“Expanding Consciousness” by Using Technology.](#)”

8. Even though scientific progress has been impressive, it takes generations to move the “knowledge base” forward; see, [“Dhamma and Science – Introduction.”](#)

- On the other hand, by PURIFYING the mind, one can discern EVERYTHING that is of importance **within a lifetime**; see, “[Expanding “Consciousness” by Purifying the Mind](#),” and the power of the mind in the posts starting with, “[Power of the Human Mind – Introduction](#).”
- That is how the Buddha knew about not only the existence of innumerable planetary systems in the universe (many other examples are discussed in other posts), but also about the fact that this life of about 100 years is insignificant in the rebirth process.
- And there is compelling evidence for rebirth; see, “[Evidence for Rebirth](#).”

9. Without the “correct view” of this world, we will be simply “groping in the dark.” When one has only a narrow and blurred vision, one cannot move forward. If one believes that this is the only life we have, then one could be making bad decisions, that could affect one’s future for billions of years to come.

- That is why it is worthwhile at least to examine the evidence of the “wider world view” of the Buddha, where both space and time are infinite. While modern science has confirmed the infinite extent of space, it has not yet “discovered” the fact that life does not end at physical death; it is just the end of one insignificantly small sliver of the time span of a sentient being.

10. Most people think the First Noble Truth is about suffering in the sense of just physical or mental suffering **IN THIS LIFE**; that is wrong. Those are RESULTS of past actions (*kamma*). **But that suffering is NOT what the First Noble Truth is about**; it is about the FUTURE suffering that CAN BE stopped.

- **The First Noble Truth is about the suffering that is hidden.** It is the unavoidable suffering for anyone in this cycle of rebirths, until one grasps the “correct world view.”
- This is why the Buddha said, “my Dhamma has never been heard before.” It is hard to grasp until one is willing to spend some time and examine the “bigger picture.” One should not just go by one’s instincts, but rather by the facts.

11. **This is also why** “*sammā diṭṭhi*” or “correct view” comes first in both versions of the Eightfold Path. Yes. There are two versions of the path: One is mundane (*lokiya*) and is easier to grasp. The other is transcendental (*lokuttara*) and requires the comprehension of *Tilakkhaṇa* or the Three Characteristics of this world, i.e., *anicca*, *dukkha*, *anatta*.

- **Before trying to comprehend the *Tilakkhaṇa*, it is imperative that one follows the mundane eightfold path and removes all ten types of *micchā diṭṭhi*; they are discussed in “[Mahā Chattārīsaka Sutta \(Discourse on the Great Forty\)](#).”**
- When one starts understanding the validity of laws of *kamma* (i.e., deeds have consequences), rebirth must be true, and there are other realms that we cannot see, one begins to embrace the mundane version of *sammā diṭṭhi*.

12. With that *sammā diṭṭhi*, one realizes that it is not fruitful to: think immoral thoughts (*micchā saṅkappa*), utter inappropriate speech (*micchā vācā*), do inappropriate things (*micchā kammanta*), live an immoral life (*micchā ājīva*), to strive to achieve unfruitful things (*micchā vāyāma*), have an immoral mindfulness (*micchā sati*), and thus get into an immoral state (*micchā samādhī*).

- **Even if we can “get away” from paying for misdeeds in this life, we will have to pay with interest in the future lives. Similarly, any good deeds will be rewarded in future lives, if not within this life itself.**
- Thus, with correct views or *Sammā Diṭṭhi*, one will be automatically following the mundane eightfold path: *sammā saṅkappa*, *sammā vācā*, *sammā kammanta*, *sammā ājīva*, *sammā vāyāma*, *sammā sati*, and thus get to *sammā samādhī*. It all starts with *sammā diṭṭhi*, or the “correct views.”

13. It is not a world view that is amenable to our “experience”, because our sense faculties are limited as we discussed above. But as we make progress, our minds will become clear and we WILL be able to see for ourselves the true nature of this world.

- There is a lot of evidence that what the Buddha said about “the wider world” 2500 years ago are indeed true. We are lucky to be born at the time when efforts of many generations of scientists have confirmed many of his world views, and that should give us confidence (*saddhā*) to take those views serious enough to spend some time examining the evidence. My goal is to present evidence from many aspects, because different people comprehend different aspects.

14. Such a critical evaluation itself could be enough to dispel any wrong views. It is like lifting of a fog and being able to see clearly. When the mind becomes pure, one does not need “evidence from science” to confirm the worldview of the Buddha.

- The *lokuttara* version of *Sammā Dīṭṭhi* (which requires the comprehension of *Tilakkhaṇa* to some extent) and the corresponding Noble Eightfold Path is discussed in other posts in the “[Seeking Nibbāna](#)” section. Also, see, “[Buddha Dhamma – In a Chart](#)” and the post referred to in that chart: “[What is Unique in Buddha Dhamma?](#).”

Next, “[Four Noble Truths: Recipe for Problem Solving](#)”, ...

7.1.1.5 Four Noble Truths: Recipe for Problem Solving

Pre-2016; re-written August 6, 2022; revised August 7, 2022

Problem solving can be reduced to four simple steps. That is the same approach the Buddha used in discovering the Four Noble Truths to solve the problem of suffering.

Four Steps to Solving a Problem

1. When solving any problem, there are four steps:

- One needs to know **the problem** or even realize there is a problem.
- The reason or the **cause for that problem** (some may be superficial causes, but there are **root causes**).
- **Knowing what result can be expected by solving the problem** (there may be many possible outcomes depending on the approach).
- **A procedure to systematically solve the problem** based on the superficial or root causes.

Those were the same steps that our *Bodhisatta* used to attain Buddhahood.

Figuring Out the Causes

2. Let us discuss an example. If a car would not start, the cause may not be clear to someone who does not have a technical background in automobiles, but a qualified technician will be able to find the cause quickly.

- He may find that it is a simple problem of some wires becoming loose in the ignition circuit, or it could be as bad as a problem with the engine itself.
- The solution to the problem will lead to being able to start the car.
- And the way to get there depends on the actual problem and going through the standard procedures to solve the problem. One could re-connect the loose wires if the problem is with a loose wire. If it is a failed engine, one could either replace the engine or fix it if it is a minor problem with the engine.

Root Causes and Secondary Causes

3. Sometimes, there can be a temporary or a permanent solution.

- If we get a headache, In most cases, we would just take an aspirin or Tylenol, which would “fix it.” But if the headache keeps returning, we may realize there could be a more serious **root cause**. Now we need to figure out why we are getting headaches frequently. First, we look at easy solutions. For example, if

we can connect the timing of the headaches to eating some specific food, we can stop eating that and see whether it goes away.

- If we cannot figure it out, and if the problem persists, we go to a specialist, in this case, a physician. The physician will ask a series of questions and may do a series of tests. The goal is to figure out the root cause that may not be obvious.
- Depending on the results of the diagnostic tests, the physician may find the root cause to be cancer. Then that cancer needs to be treated, etc. He will prescribe a method of treatment. If that root cause is removed, we would have removed recurring headaches.

4. There is an important difference between **superficial causes and root causes**. Superficial causes do not lead to serious problems. For example, if too many drinks taken by a person not used to alcohol causes a headache, which can be ‘fixed’ by taking an aspirin. But some problems have root causes hard to see, like the one in #3 above.

- It is interesting to note that root causes give the exact meaning of the Pāli term “*mūlika hetu*”; “*mūla*” is the root of a tree. Even if a tree is cut down, the tree may not be killed if the roots remain intact. It may still sprout new limbs and finally grow into a full-fledged tree.
- However, removing the deep roots of a tree will permanently kill the tree. Similarly, removing root causes will eradicate a persisting problem.

Not Prudent to Apply Temporary Solutions

5. Most times, when a problem arises, we tend to do the most expedient thing to get it out of the way and move on. If the headache goes away until one gets through the day, one may decide just to take an aspirin and handle it daily like that.

- Even when the wife (or husband) says, “You have been taking aspirins almost every day for this many days. Why don’t you see a doctor and see whether there is something else going on?” we may just continue with the “temporary fix” especially if we are busy.
- If that person was starting to develop cancer, postponing the “root cause” diagnosis could be a grave mistake. Cancer cells multiply rapidly and could spread to other body parts.
- Even though one could get temporary relief by taking aspirin daily (may be by gradually increasing the dose too), that is NOT the solution. **The result in the short term could be temporary relief, but one is heading into a much more dangerous outcome.**
- The ideal solution to the problem is not to temporarily be free from the headache but to be free from cancer!

Suffering Associated with Existence

6. The Four Noble Truths handle the most critical problem of all: the suffering associated with existence.

- **First, most of us are unaware that it cannot be handled with temporary solutions.**
- For example, even if we don’t suffer significantly in this life, there will be suffering in future lives. Some people do not realize that there is a rebirth process and that most rebirths are filled with unimaginable suffering. They are unaware that the problem is much more than just suffering in this life.

7. In complex situations, the root causes of a given problem will not be obvious if one does not have a sufficiently broad view of the situation. **That means the ideal solution may not be obvious.**

- When that happens, the problem leads to ever-increasing severity and may not be solvable. Therefore, postponing finding the root causes of a problem can be dangerous.

- In the example discussed in #3 above, cancer may grow if one keeps postponing getting a good diagnosis by a qualified physician. It will be too late when cancer has spread through the body. Thus, and after some point, cancer may not be treatable.
- In the same way, our ability to grasp the deep teachings of the Buddha will decrease as we get old and our brains start deteriorating. Don't postpone this most critical task of learning Buddha Dhamma!

The Solution to the Existence of Suffering Requires a Wider Worldview

8. That larger problem of existence can be “seen” only by the highly-purified mind of a Buddha. During the night of Enlightenment, the Buddha achieved three types of higher knowledge:

- (i) Ability to recall one's past lives (*pubbe nivāsānussati ñāṇa*),
 - (ii) The ability to see any living being's *cuti* (end of *bhava*) and *paṭisandhi* (grasping of a new *bhava*). This is the *cutūpapāta ñāṇa*.
 - (iii) The attainment of the *Buddhahood* with *āsavakkhaya ñāṇa*. That involved grasping the Four Noble Truths and the Noble Eightfold Path to *Nibbāna*.
- Therefore, his worldview of a wider world with 31 realms and rebirth is NOT speculation. He could recall past lives, and he visited many other realms. Many *suttas* in the *Tipiṭaka* describe those recollections and visits. See “[Buddhahood Controversies – Introduction](#).”
 - Of course, we have to believe that based on faith. Yet, that should not be blind faith: “[Buddha Dhamma: Non-Perceivability and Self-Consistency](#).”

Focusing on This Life Yield Only Temporary Solutions

9. Of course, one can find temporary solutions by just fixing the superficial causes. Just like fixing a headache by taking an aspirin, one could find temporary happiness in this life by “trouble-shooting” each problem as it arises. That is the “rat race” most of us are engaged in.

- For example, most of our time is spent solving problems that pop up at the office or home. At the office, one is assigned a task to finish within a certain time. When finished, one gets another. That goes on until retirement!
- It is not that different at home. One must take care of the kids, house, cars, etc.
- At the end of this life, another WILL start. Then we do it all over again. There is no permanent solution to this short-sighted approach.
- But it could be much worse when future birth is in an *apāya*. That is when one will be helpless. The only way to avoid that possibility is to get to at least the *Sotāpanna Anugāmi* stage of *Nibbāna*.

Only One Permanent Solution

10. Tackling superficial causes that we can readily see or discern is what we have been doing since the beginning-less time. Life after life, we just strive to “maintain things to our satisfaction,” and at EACH time, we fail.

- Most times, we suffer trying to “get things going in the way we want,” and by the time we achieve at least some success, our bodies start falling apart, so we will not be enjoying what we have gained with so much effort.
- **Think carefully about any famous personality we believe has achieved their life goals.** They all will have to leave behind their achievements at death. Furthermore, those things would not mean anything in their new life; they will have to start all over. The only things carried over to the new life are any good/bad habits or deeds they cultivated, not material gains.

Root Causes of *Samsāric* Suffering

11. If we understand where this never-ending process gets the required fuel from (i.e., the root cause for rebirths), then by ELIMINATING those causes, we can permanently solve the problem of perpetual suffering in the rebirth process.

- As long as we crave “mind-pleasing things” in this world by generating *abhisāṅkhāra*, rebirth (*jāti*) in this world is inevitable. Depending on the type of *abhisāṅkhāra*, rebirth may be in an *apāya*, human, *Deva*, or *Brahma* realm. But they all end up in old age and death.
- It is critical to realize that six root causes maintain this world for anyone: greed, hate, ignorance, and mundane versions of non-greed, non-hate, and non-ignorance. It is fairly easy to see how greed, hate, and ignorance can lead to rebirth in the *apāyās*.
- **It is impossible to understand how mundane versions of non-greed, non-hate, and non-ignorance can be bad** until those “bad roots” of greed, hate, and ignorance are removed. An understanding of *Paṭicca Samuppāda* is necessary to see the “hidden suffering” in apparently harmless sensory pleasures. See “[Six Root Causes – Loka Samudaya \(Arising of Suffering\) and Loka Nirodhaya \(Nibbāna\)](#).”
- **Thus, stated succinctly, the root cause of our suffering is not being able to “see” the hidden suffering in sensory pleasures.**
- Not understanding that is *avijjā* or ignorance.

Removal of the Root Causes

12. The third step is to see that the successful solution to this problem is the attainment of *Nibbāna* or stopping the rebirth process. This is probably the hardest step to latch on to because it requires eliminating the root of cravings (attachments.)

- We can see that “mind-pleasing things” bring us happiness. It is not easy to “see” the suffering hidden in that.
- The Buddha likened this to the case of an ox dragging a fully-loaded cart eagerly while its owner is holding a stack of hay on a pole in front of it. The ox has its mind set on reaching the stack of hay and does not even realize the heavy load it is pulling.
- A fish can see only the tasty worm but not the dangerous hook hidden inside. We are not that different from the fish, as the Buddha explained in the “[WebLink: suttacentral: Balisa Sutta \(SN 17.2\)](#).”
- It is only when one truly comprehends that “it is fruitless to struggle to find happiness in this world of 31 realms” that one attains the *Sotāpanna* stage.
- Thus, cravings for worldly things can ONLY be removed via wisdom (*paññā*) when one can accept the wider worldview discovered by the Buddha (rebirth process) and how *abhisāṅkhāra* (generated with *avijjā*) leads to rebirths in various realms, i.e., understanding *Paṭicca Samuppāda/Tilakkhaṇa*. That **understanding** leads to the *Sotāpanna* stage. It is a change of one’s worldview!

Following the Path to Remove Future Suffering

13. The Buddha said that when one sees one Noble Truth, one sees all four. Thus at the attainment of the *Sotāpanna* stage, **the way to *Nibbāna*** also becomes clear.

- The process of removing the root causes of *avijjā* and *taṇhā* is the Fourth Noble Truth, the *magga sacca*, or the Truth of the Path, where “*magga*” is a path. And this path is eightfold, and it is the **Noble Eightfold Path**.

- The Path has to be followed systematically. The first step is to realize the “correct vision” or *Sammā Ditṭhi* to eliminate “*san*.” A *Sotāpanna* has achieved this to a significant extent by comprehending *anicca*, *dukkha*, and *anatta* to a certain extent.

The Four-Step Process Is Universal

14. Therefore, the four-step process stated in #1 above is a basic principle that can be used to solve any problem. That means solving a mundane problem temporarily and providing a permanent solution to the ultimate problem of existence. That approach is based on the principle of cause and effect, the same one that Nature is based on.

- One could even find a somewhat longer-term solution by working towards a better rebirth. We must do that too, but always the goal MUST BE to remove all root causes.

First Step – Understanding the Existence of the Problem

15. **The key point that the Buddha was trying to make was that we do not realize that there is a “problem of existence.”** The first step in the four-step process is to realize the validity of the rebirth process. Since we cannot readily see the rebirth process, most of us focus on just this life.

- All we have been doing is to “take aspirins” as headaches resurfaced instead of finding a permanent solution to the “problem of never-ending headaches.”
- In every life so far, what we have done has been to “take aspirins” to try to solve problems temporarily as they inevitably come our way. The Buddha taught that one must address the root causes of *Samsāric* suffering to remove any future suffering.
- This is the First Noble Truth of “*dukkha sacca*” (pronounced “dukkha sachcha.”) It means “existence in this world of 31 realms is filled with suffering, and it is a never-ending process. **But that can be overcome permanently**”.
- Therefore, the main goal must be *Nibbāna*. There is no other permanent solution!

Nibbāna – Elimination of All Six Root Causes

16. ***Nibbāna* does not have a cause. Eliminating all six root causes in #11 leads to *Nibbāna*.** All these are removed via *paññā* or wisdom. It is important to realize that wisdom means understanding the Four Noble Truths/*Paṭicca Samuppāda*/*Tilakkhaṇa*.

- But for now, it suffices to say that the four lowest realms of this world are “maintained” via the “bad roots” of greed, hate, and ignorance. **The remaining 31 realms are “supported” by (the mundane versions of) non-greed, non-hate, and non-ignorance, the so-called “good roots.”**
- This is why the Noble Eightfold Path is two-fold: the mundane (*lokiya*) Noble Eightfold Path must be followed first to avoid birth in the lowest four realms and cleanse the mind to a certain extent. But one could “fall back” in future lives unless one gets to the *Sotāpanna Anugāmi* stage.
- Then one follows the transcendental (*lokuttara*) Noble Eightfold Path to attain *Nibbāna* by fully cleansing the mind of all six roots. See “[Mahā Cattārisaka Sutta \(Discourse on the Great Forty\)](#).”

7.1.1.6 First Noble Truth – A Simple Explanation of One Aspect

1. One does not need to be a Buddhist or even heard about the Buddha to know what conventional “suffering” is. Anyone knows that getting sick, getting old, and dying is cause for suffering.
 - But then the Buddha said, “these four Noble Truths are not known to the world until a Buddha describes them.”

- Thus the Buddha was talking about a kind of suffering that ANYONE in this world is destined to have either now or in the future. He was mainly concerned with the LONG TERM suffering, in the future rebirth, and how to STOP that from taking place.

2. However, there are some sufferings in this very life that arise due to our current way of life, or what we do or think right now. In this post, I want to address such “SHORT TERM” sufferings that also can be AVOIDED.

- A significant part of our suffering comes from the mind. Whether one lives in a grand mansion or in a hut, this part of suffering is common to us all.
- And even some famous and rich people that we know could not bear this mental pain to such an extent that they committed suicide. From Elvis Presley and Marilyn Monroe to Whitney Houston and Robin Williams, there are many well-known cases; see, [WebLink: WIKI: List of suicides](#) for a long list that extends to the past.
- Suicide Prevention, see : [WebLink: HELPGUIDE: Suicide Prevention](#)

3. Obviously, one can have mostly everything that any one of us can only wish for (health, wealth, beauty, fame, etc), but still, suffer. One could get a glimpse of what the Buddha meant by suffering if one could contemplate on this issue, and that revelation itself could lead to the avoidance of *that kind of suffering*.

- We can get rid of a big part of suffering in the near future by controlling hate or displeasure towards other people. Even though the other party may have done something wrong to us, most of the suffering is inflicted by ourselves. This needs some contemplation to clarify.

4. Suppose I come to know that someone said a bad (and untrue) thing about me to others. The moment I hear this my mind gets agitated. And I could be spending the next hour or two or even the next day or two saying to myself and friends, “I cannot believe that so and so said this about me. Why would he do that?”, and may be even be thinking about how to retaliate. All this time spent on such activity was a burden to the mind. I caused more suffering to myself by just dwelling on it, and by generating more hateful thoughts.

- I could have handled the situation better as following: If I know from past experience that he would not have said it without a reason, I need to talk to him and clarify the situation. If that failed or if I knew that he was “just that type of a person” I just need to stay away from him. We cannot control the behavior of other people. The best thing is to stay away from such people.
- Staying away from “bad company” is critical especially for children. It is imperative for the parents to make sure that their children stay away from bad friends.

5. Another thing that is related is not to try to spend too much of your time and energy to convince other people to see “things your way.” For valid or invalid reasons, each person has a set of beliefs and convictions. I have realized that it causes unnecessary mental suffering to myself and others if I try hard to convince the other party of my own views. I have no right to say my views are better than the views of the others; I just explain things the way I see them.

- Even the Buddha did not try to even advice certain people, because they could have caused long-term harm for themselves by generating hateful thoughts of the Buddha.
- One has to realize that getting rid of *ditthi* or wrong views is the first step in getting some “cooling down.” It is true that palpable “cooling down” can be attained by getting rid of the worst wrong views; see, [“Wrong Views \(Micchā Ditthi\) – A Simpler Analysis.”](#)

6. Then there is extreme greed, that could also lead to unnecessary suffering. Here one needs to make a distinction between two extremes: It is really necessary to avoid physical discomfort on one extreme. But trying to “acquire fancy things” for the sake of pride is the other extreme.

- We do need food, clothes, shelter, and medicine to avoid living a miserable life. Therefore, we need to make a decent living to provide such necessities for ourselves and our families.

- However, if we try to acquire, for example, a “bigger and fancy house”, that could cause anxiety and even suffering especially one is stretching one’s resources to achieve that “extra bit of happiness.” That “extra bit of happiness” could become a nightmare in some cases, for example, if one loses employment or encounters an unexpected expense.

7. One does not need to feel bad about the wealth one has acquired legitimately and to use that wealth for one’s comfort. One has already paid for that in the past (a good *kamma vipāka*). In the same way, if one is poor, one needs to understand two things per Buddha Dhamma: First, one is in that situation because of a past cause (bad *kamma vipāka*). Second, and more importantly, one can work oneself out of that situation, because *kamma vipāka* are not deterministic; see, [“What is Kamma? – Is Everything Determined by Kamma?”](#).

8. The key is to live within one’s means and strive for a better living condition if one actually does not have enough for a comfortable living. There is so much of “peace of mind” in a simple life, even if one has a lot of wealth. Most people ruin their lives by trying to seek sense pleasures using money. That only gets one on a track that leads to seeking more and more such pleasures and eventually running out options.

- The sad thing is that they do not know there is so much “peace of mind” to be had just by living a simple life with less greed and less hate.

9. It is hard to fathom, but it is true that craving for valuable material things makes one’s mind temporarily happy at times but perpetually burdened. This statement needs a lot of thought for clarification.

- The perceived happiness comes from the perceived “value” of the item by one’s mind, and if that item is lost or damaged that can lead to much more suffering. Here is a hypothetical situation: A mother dies and her two daughters inherit a supposedly highly valued necklace. Each daughter wants it, and they get into arguments and both come to much mental suffering. Eventually, a wise elder suggests to sell the item and share the money. When they try to sell it, they find that it is of low quality and is really worthless. They had each inflicted so much suffering because of a “perceived value” for that necklace.

10. The real happiness is not having anything to worry about. That does not mean one needs to give away everything one has.

- Using things that are available to oneself and having a greedy mindset are two different things.
- One could be living in a mansion with a peace of mind knowing that all his/her wealth is not forever, and another could be living with a burdened mind in a hut with so much attachment to whatever little he/she has or with jealousy/hatred for what others have.
- On the other hand, one could be living in a mansion with a burdened mind and could even commit suicide, while a poor person who has learned Dhamma could be living in a hut with a peace of mind content with what he/she has and knowing that any hardship is just for a short time (in this life).
- The bottom line is that things happen due to causes, and by controlling our minds we have the power to initiate good causes (moral deeds) and to suppress bad causes (immoral deeds). Some will be effective for the short term and all will be effective for the long term.

Also see, [“First Noble Truth is Suffering? Myths about Suffering.”](#)

Next, [“Difference between a Wish and a Determination \(Paramita\)”](#),

7.1.1.7 Difference between a Wish and a Determination (Parāmitā)

1. It is easy to just wish for things, but a real determination has a firm commitment attached to it. A determination is a wish accompanied by a plan to make the wish come true.

- One can drop a stone in water and can wish for it to come back up. That is NOT going to happen.

- Some goals (wishes) can be attained in this life: quitting smoking, passing an exam, getting a good job, etc. But still one has to make an effort, i.e., one has to act with determination to achieve the wish.
2. Other goals can take many lifetimes to attain. These are called “*pāramitā*” (pronounced “pāramithā”). Depending on the goal, a *parāmitā* can take many, many lifetimes. It is said that to become a Buddha, one needs to have a firm commitment carried over billions of lives; that is a *parāmitā*. And it is not like that someone just makes a wish to become a Buddha; that “*gati*” or the “tendency” has to develop first over many lifetimes, initially starting with the habit of helping others and generally living a moral life.
- Buddha Dhamma is all about causes and effects. If one can understand the causes for something to happen, and then work to make such cause to materialize, the effects WILL follow.
3. We can see that there are many people — some even may not have heard about Buddha Dhamma — making great efforts to help others even at the risk of their own lives. Those people have such *sansāric* habits and they do have goals, even if it may not be clear to them at all times. They are just driven by that *sansāric* habit. If they come across pure Dhamma by any chance, they may be able to focus their efforts accordingly.
- To become an *Arahant* one needs to make a commitment and maintain it over many, many lives. We all are likely to have made that commitment in one or more lives; of course, we do not know. And if we had made such a commitment and have worked on it over many lives, it may be possible to fulfill it in this very life. Even otherwise, we can make a real effort to maintain that “*paramita*” and strengthen it.
 - Some make firm determinations to become a *deva*, a *Brahma*, an emperor, or just to be rich; there are millions of things that people wish for, and sometimes make firm determinations on. Some of them can come true in this lifetime itself, especially if that is a firm commitment coming from previous lives. Normally the word “*parāmitā*” is reserved for those commitments that target *Nibbāna*.
4. In physics, there is a simple law that says, “every action has a reaction.” In Buddha Dhamma, there is an even more generalized law: when one keeps doing something, an invisible energy buildup occurs that will result in a *kamma bhava* (potential energy) that will bring about a result (even a birth) of a similar kind.
- During a lifetime, the brain will help achieve goals by rewiring neural connections in the brain when someone keeps trying to develop habits; see, “[How Habits are Formed and Broken – A Scientific View](#).”
 - And such habits may be carried over future lives by embedding in one’s *kamma* seeds (*bīja*); see, “[Sānsāric Habits, Character \(Gati\), and Cravings \(Āsava\)](#).”
5. For example, if one keeps drinking heavily, it WILL become a habit; the brain’s neural connections will get wired-up for it. If done long enough, it will get embedded in one’s psyche (i.e., in *kamma* seeds), and one is likely to be matched up with a mother who has similar drinking habits, and then it is likely that habit to continue in that life too. It takes a determined effort to “unwire” those neural connections, more than just a wish.
- If one keeps doing activities that are suitable for a dog, one will increasingly act like a dog with such habits, and if that is kept up, eventually will be born a dog. It does not matter whether that person wished to be rich or powerful, what matters is what one habitually does. In his/her mind, one made that determination indirectly by acting accordingly.
6. In the same way, when one makes a determination to be “good”, and starts helping out others, and start learning and living by Dhamma, one will be heading to “good births” whether one wishes or not. Then they become deeply-ingrained habits that are taken from birth to birth, and become “*paramitas*.”
- Such dominant *paramitas* may manifest as one’s character (“*gathi*”). As I mentioned previously, we can see such visible “*gathi*” in many people, regardless of their official religion or culture.
7. **Thus habits cultivate character (“*gathi*”), and persistence of such strong character qualities or “*gathi*” through many rebirths develop into “*paramitas*.”**

- Especially in young children such “*gathi*” may manifest and then it will be easier to cultivate them. For example, in the post on “[Evidence for Rebirth](#)” there is a video of a child reciting complex *suttā*; if he was encouraged to follow that path, he could be able to attain a stage of *Nibbāna* in this very life. Similarly, a child with any kind of natural talent can be encouraged to cultivate it easily, because those are *sansāric* habits.

8. Breaking a bad habit takes time too. It is best to cultivate an opposing good habit, or at least a neutral one so that one has the option of doing something when the urge comes. For example, if one wants to quit smoking, one could start chewing gum instead.

- Both in developing a good habit or breaking a bad habit, one is bound to break the trend once in a while. A child learning to walk will fall many times. That is why one needs to have the perseverance to get back up with a renewed determination.

Whether one is making a determination on a mundane goal or to attain a stage of *Nibbāna*, the posts “[The Four Bases of Mental Power \(Cattāro Iddhipāda\)](#),” “[The Law Attraction](#),” and “[Habits, Goals, and Character \(Gati\)](#)” could provide helpful information.

7.1.2.1 Key to Calming the Mind – The Five Hindrances

Revised August 2, 2016; November 25, 2018; September 9, 2019; February 23, 2021; August 25, 2021; re-written July 10, 2022

A wandering mind is an unhappy mind! The conclusion of an article in the prestigious journal “Science” which, using real-time input from 5000 people worldwide, confirmed what the Buddha said 2500 years ago; see, [WebLink: A wandering mind is an unhappy mind-Science-Killingsworth-2010](#).

Mundane Ways to Calm a Mind

1. The easiest way to calm a mind is to focus it on a neutral object. **There is only one thought arising at a time.** So if one can keep the mind focused on something neutral, those unwanted thoughts cannot come back. Several techniques are available. Let us discuss a few below.

- Especially when one gets angry, just stopping and counting to ten at least slows down the *javana* (or the impulse) from running wildly. Do not let unwanted thoughts take over. They multiply very quickly, and then things get out of control; for a more in-depth discussion, see “[Javana of a Citta – Root of Mental Power](#).”
- Taking a few deep breaths helps too. Or, in an angry situation, visualizing a Buddha statue and thinking about its serenity helps also.

2. A popular meditation technique to calm the mind is “breath meditation.” Go to a quiet place (less bright and less noisy place), sit in a chair comfortably, and concentrate on the in-and-out breath. Most people can feel the breath at the tip of the nose or on the lips. If not, one can be aware of the falling of the chest or abdomen. Just fix the mind on any of these and do not let it move to some other thought. Initially, it may be hard, but with practice, it becomes easy. That is a crude form of *Samatha* meditation.

- However, those are just “tricks” to get a temporary solution. Just like a restless child is bound to throw a tantrum again, any relief from “breath meditation” is only fleeting.

Buddhist Way to Calm a Mind

3. Even *Samatha* meditation becomes easier if one lives a moral life. One must at least obey the conventional five precepts of not killing other beings, stealing, lying, engaging in sexual misconduct, or using excessive amounts of alcohol. If one can further abstain from harsh speech, slandering, and vain talk, that makes it even better; see, “[Ten Immoral Actions – Dasa Akusala](#),” and “[Punna Kamma – Dāna, Sīla, Bhāvanā](#).”

- **One must be aware of those precepts 24 hours a day. They are not rituals to be obeyed. One follows them to purify one’s mind. Don’t worry if a precept gets broken once in a while. Such occurrences will become less and less with time.**

4. The reason that the mind becomes agitated easily is because of the “gunk” that we have in our minds (they go by various names like *kilesa*, *anusaya*, “bad *gati*,” or mental impurities). All this “gunk” is there due to greed, hate, and ignorance.

- If a mind is free from greed, hate, and ignorance (that is easily said than done), then the mind will be very calm, and nothing in the outside world can perturb that mind; see “[2. The Basics in Meditation](#)” and “[3. The Second Level - Key to Purify the Mind](#)” for details.

5. In a simile, the Buddha compared a calm mind to a clear, calm lake that made the surroundings serene. That lake could become an undesirable eyesore, if one or more of the following happens. (i) A dark-colored dye is in the water, (ii) The lake has boiling water, (iii) Water is covered with moss, (iv) the Lake is perturbed by wind, and (v) Water is turbid and muddy.

Pañca Nīvaraṇa – Root Causes for an Agitated Mind

6. Similarly, a peaceful mind will become polluted due to five hindrances (*pañca nīvaraṇa*). They are called “*nīvaraṇa*” because they cover the mind from seeing right from wrong. They are *kāmacchanda*, *vyāpāda*, *thīna-middha*, *uddhacca-kukkucca*, and *vicikicchā*.

- One cannot see the bottom of a lake if any of the above five factors are present. Similarly, the mind loses its capacity to “see things clearly” if those hindrances are there.

Kāmacchanda – Main Culprit

7. Craving sensory pleasures (*kāmacchanda*) is like a dark dye. *Kāmacchanda* (“*kāma*” + “*ichcha*” + “*anda*” means blinded by sense desires).

- **Note that there is an adopted convention to write Pāli with the English alphabet.** Thus, “c” represents the “ch” sound and “*icca*” is pronounced, as “*ichcha*.” See, “[“Tipitaka English” Convention Adopted by Early European Scholars – Part 1.](#)”
- Here “*kāma*” means indulging in conscious thoughts about the five sense faculties that belong to the *kāma loka*: eye, ear, nose, tongue, and the body; “*ichcha*” is desire, and “*anda*” is for blind.
- The attraction for something becomes so strong that one’s complete attention is on that object. The mind can lose control over what is sensible and what is not rational (or immoral).

Vyāpāda – Worse Than Kāmacchanda

8. Extreme hate (*vayāpāda* or *vyāpāda*) is like boiling water. We all have seen people who are so enraged that they are out of control.

- One could become “animal-like,” and one who develops such character (“*gati*”) could end up in hell (*apāya*).
- *Vayāpāda* (“*vayā*+”*pāda*”) means traveling downward (in the 31 realms): “*vaya*” is destruction and “*pāda*” means “(walking) towards.”
- But *vyāpāda* arises because of *kāmacchanda*.

Thina Middha – Disinterest in Buddha Dhamma Due to Incomprehension of Basic Concepts

9. *Thina middha* (“frozen mind”) is like moss covering the water. Sleepiness is just a symptom of it. It is a dull mind that has not been exposed to Dhamma.

- When one learns Dhamma, one’s mind gets energized. Those meditators who fall asleep during meditation can get rid of that problem by learning pure Dhamma.
- This is why I started a new series of posts: “[Basic Framework of Buddha Dhamma](#).”

Uddhacca kukkucca – Worse Than Either Uddhacca or Kukkucca

10. *Uddhacca-kukkucca* (customarily translated as restlessness and brooding), arises because of high-mindedness (*uddhacca*) and low-mindedness (*kukkucca*); in most cases, because of the high-mindedness, one tends to DO lowly things.

- “*Uddhacca*” is “high-mindedness” (high regard for oneself) which can be at various levels and completely removed only at the Arahant stage. “*Kukkucca*” is the tendency to do lowly things such as mistreating others. It goes away probably at the *Sotāpanna* stage. Those are two separate *cetasika*: “[Cetasika \(Mental Factors\)](#)”
- Note that both words have “*acca*” (pronounced “achcha”) which means “to overboard/to excess.” One with *uddhacca* goes overboard with “high regard for oneself” and one with *kukkucca* tends to go to extremes in engaging in “lowly deeds” (“*ku*.”)
- When they arise together, “*uddhacca-kukkucca*” is one of the five *nīvaraṇa* that “covers a mind” and prevents “seeing the true nature of the world.” Here, one tends to do “lowly things” based on high-mindedness, power, etc. After the *Sotāpanna* stage, only *uddhacca* remains as a *cetasika*. It fades with higher *magga phala* and goes away only at the Arahant stage.

Vicikicchā – No Faith Because of Incomprehension of Noble Truths/Paṭicca Samuppāda/Tilakkhaṇa

11. With *vicikicchā*, one tends to do stupid things because of ignorance of the true nature of this world. It comes from “*vi*” is twisted, “*ca*” (pronounced “cha”) is thoughts, and “*icchā*” or cravings.

- For example, the tendency to do immoral actions to get one’s wants comes from *vicikicchā*. One does not know or does not care about the adverse consequences of such activities. Thus *vicikicchā* is compared to muddy water. [*kiicca* : [nt.] duty; work; service; that which should be done.]
- One must get rid of both the ten types of *micchā diṭṭhi* and comprehend *Tilakkhaṇa* to some extent. That means having a good idea about the real nature (*anicca*, *dukkha*, and *anatta*) of this world. That helps REMOVE the *vicikicchā nīvaraṇa*.

A Simile (Analogy)

12. In another simile, the Buddha compared the five hindrances (*pañca nīvaraṇa*) to the darkness that keeps one from seeing true nature. For example, a furious person cannot see the damage to the other person and oneself. At least at that moment, hate and anger blind that person.

- A mind “blinded” by the five hindrances can keep on adding “more bad stuff” even without realizing it. If you take a glass of muddy water and add more mud to it, you cannot see much difference. On the other hand, if you take a glass of clean water, you can see the presence of even a bit of dirt.
- Thus when the mind is free of the five hindrances, one can easily see if any evil thoughts come to the mind. Then it is easy to contemplate the possible adverse consequences of such ideas and remove them. That will keep the mind from becoming perturbed. A mind free of the five hindrances is calm and peaceful.
- That is why one should listen to discourses or read Dhamma posts, preferably when the mind is calm. Then one can absorb more.
- More on *pañca nīvaraṇa* in “[Pañca Nīvaraṇa and Sensual Pleasures \(Kāma Rāga\)](#).”

Mundane Meditations – Good Start

13. It is good to practice mundane *Samatha* meditation for short times. That allows one to have a peaceful state of mind during that time. But it does not remove any defilements (i.e., the underlying root causes). *Ariya* meditation leads to the gradual removal of evils; see, “[Bhāvanā \(Meditation\)](#).”

- These hindrances are the results of bad habits (“*gatī*”) we have developed over many lives. They have become deep-seated cravings (“*āsavā*”), which remain with us as mental impurities (*kilesa*). When one starts on *Ariya* meditation, such as bad habits, desires, and mental impurities will decrease. In the simile we talked about initially, the water in that lake will become pure by removing the dye, boiling water, moss, wind, and mud. Similarly, the lake becomes calm and serene again in the absence of those ROOT CAUSES.
- The hindrances of *thina-middha* and *vicikicchā* go away at the *Sotāpanna* stage. Those of *kāmacchanda*, *vyāpāda*, and *uddhacca-kukkucca* reduce to *kāma rāga*, *paṭigha*, and *uddhacca*. At this stage, the remaining three are no longer *nīvaraṇa*. *Kāma rāga* and *paṭigha* lessen at the *Sakadāgāmī* stage and disappear at the *Anāgāmī* stage. *Uddhacca* goes away only at the *Arahant* stage.
- Progressive lessening of the five hindrances can bring the mind to a stable, peaceful state over time. That happens even before the *Sotāpanna* stage. Then one could feel the increase of the *nirāmisa sukha* that it brings; see, “[Three Kinds of Happiness – What is Nirāmisa Sukha?](#).”

Next, “[Solution to a Wandering Mind – Abandon Everything?](#)”,

7.1.1.2.2 Solution to a Wandering Mind – Abandon Everything?

Our minds become agitated when we see, hear, smell, taste, touch, or just think about something that we really like or really dislike. Those are called thought objects (*ārammaṇa* in Pāli or *aramuna* in Sinhala). If the thought object is to our liking, our mind starts the “wheeling process” on how to own it or at least to enjoy it for a while; if the thought object is something we dislike, the same “wheeling process” takes off on trying to figure out how to get rid of it; see, “[Nibbāna – Is It Difficult to Understand?](#).”

Living in a busy society, we are bombarded with multiple thought objects continuously. Of course, it can be reduced by going to a quiet place, where there are fewer EXTERNAL objects that could give rise to multiple

thoughts; many people do that to find a “bit of peace.” Better yet, we can go to a meditation retreat where we focus the mind on the breath for example, and get a wonderful calmness.

But the problem is that peacefulness, the calmness of the mind goes away when we get back to the “normal life” with normal distractions (multiple thought objects). Is it possible to have a “peace of mind” without going to seclusion?

To understand what actually happens in our minds, let us think about the following case:

1. If you go to a stream, disturb the sediment at the bottom until the water gets dirty, you can fill a glass with that dirty water. It looks brown when stirred well.
2. Now if you set the glass on a table and let it sit there undisturbed, in a little while the dirt will drop to the bottom and the water will become clear.
3. If you stir it again with a stick, the water will be brown again; this is analogous to a thought object that is of great interest to us. **BUT if you try to stir it with a thread**, it will not get stirred; the thread is too weak to stir it. Similarly, we are not disturbed by a thought object that is of no interest to us.
4. If you now take a fine strainer, remove the dirt from that water, and put it back in the same glass, it will now be clear. **Now, if you stir it as much as you want even with a stick**, the water will never become brown.
5. We all have “sediments” (or deep-seated cravings or “*āsavā*”) in our minds that have been brewing/accumulating due to *sansāric* habits (“*gati*”); see, “[Habits and Goals](#).” Each one has a set of different “sediments” or different habits, i.e., one tends to like certain things AND also dislikes certain other things.
6. So, what happens is when we see something that we like OR dislike, our “sediments” get disturbed. How much it gets disturbed depends on how strongly we like OR dislike it.
 - A strong disturbance may be the sight of a person you really like OR really dislike. But if it is something that does not interest you, it will be like stirring with a thread.
7. During the day, we have innumerable “inputs” coming in through the six senses; these stir up the sediments (“*āsavas*”) inside us and bring out the five hindrances.
 - Our minds are constantly agitated, but we may not even realize it because this is the “baseline state” that we have been used to. But we can at least suppress these five hindrances and make the mind calm; see, “[Key to Calming the Mind – The Five Hindrances](#).”
8. What you are doing in *Samatha* meditation (focusing the mind on the breath) is to let those sediments settle down. You feel peaceful. This is why you don’t get the same results consistently. Some days your mind may be especially perturbed by something.
9. This is why people feel great at the end of a long meditation retreat. All the sediments are well-settled.
 - But after coming back and getting back to regular routine, all external disturbances are back and the quality of that experience slowly wears out. It may be lost completely if one keeps practicing at home.
10. However, an Arahant has removed all the sediments. Even if an Arahant is exposed to any type of sensual/hateful situation, his/her mind will not be disturbed:
 - A male Arahant will not be seduced by the most beautiful woman in the world; he will not have any hateful feelings towards a person who just cut off his arm.
 - So, an Arahant is like a pure glass of water that does not have any sediments at the bottom.
11. We don’t have to become Arahants to improve the quality of our lives. What we can do is to try to get rid of some of the bad habits that are not good in the long term anyway:

- For example, if we really dislike someone, we can start cultivating *Metta* (loving-kindness) for that person in our mind first. Whenever angry thoughts about the person come to the mind, try to counter that; think about something wonderful or peaceful instead.
- If we have a craving for alcohol, tasty but unhealthy food, etc, think about the possible bad results, and again try to steer the mind to something else, some other activity.

Of course, this needs to be done gradually. People who make New Year's resolutions sometimes abandon them because they try to just "give up" something in one big step. The mind does not like that; **it likes to change only when it actually experiences the benefits of changing the habit.**

12. Finally, **living a simple, moral life (following the five precepts), goes a long way to reduce such bad habits**, and to have a peaceful mind in the midst of all "possible distractions."

- Simple yet powerful guidelines to achieve a peaceful state of mind are discussed in a step-by-step process in "[Living Dhamma](#)."

Thus it is all about cleaning up one's defilements (bad habits) INSIDE, i.e., in one's mind; see, "[1. Introduction to Buddhist Meditation](#)." Once that is done for all defilements, no outside influence can affect one's composure (see #10 above). One CAN even attain that ultimate stage while staying in the real world.

Next, "[Right Speech – How to Avoid Accumulating Kamma](#)."

7.1.2.3 Right Speech – How to Avoid Accumulating Kamma

Revised May 27, 2018; January 2, 2020

1. The fourth precept of the five precepts for a moral life is right speech. Most people literally take it to mean "not lying."

- But since we know that intention (*cetanā*) is at the root of deciding whether an action is right or wrong, we always need to be careful about what we intend to achieve by what we say.
- The correct meaning of "lying" is not to utter speech with "bad intentions" to hurt others or to deceive others.

2. If one does a wrong deed, one may be able to deny it in a statement worded in such way as to conform to legality.

- Yet it is registered as false speech in one's own mind, and thus one is not able to escape the *kammic* consequences.

3. Ven. Ayya Khema, in her book, "Visible Here and Now" (p. 53), has nicely summarized what right speech is NOT:

- If you know something that is not helpful and is untrue, then do not say it
- If you know something that might be helpful, but is untrue, do not say it
- If you know something that is not helpful and is true, do not speak about it
- If you know something that is helpful and is true, then find the right time to say it

4. If you carefully examine the above four statements, they say to prevent from lying, gossiping, and hate or vain speech; these are the four ways one can accumulate immoral *kamma* with speech (see, "[Ten Immoral Actions – Dasa Akusala](#)").

- Let us look at some of the examples from the *Tipitaka* on how the Buddha himself handled some situations.

5. When the Buddha was at the Jetavanārāmaya for many years, there lived a butcher Cunda “pig killer” right next door. When some *bhikkhus* suggested to the Buddha that he should preach the Dhamma to Cunda, and get him to understand the consequences of his actions.

- But the Buddha explained that if he were to go there and try to do that, Cunda would only generate hateful thoughts (*paṭigha*) Cunda’s mind about the Buddha. Thus Cunda will commit an even worse *kamma*.
- So, we need to be tactful about our speech.

6. On the other hand, the Buddha walked a long distance to get to Aṅgulimāla just before he was to kill his own mother.

- Aṅgulimāla had killed almost thousand people, but that was on the prompting of his teacher, who was trying to get Aṅgulimāla into trouble. That morning, the Buddha saw what was about to happen and knew that he would be able to convince Aṅgulimāla of the bad consequences of his actions. Aṅgulimāla became an Arahant in a few weeks. See, “[Account of Aṅgulimāla – Many Insights to Buddha Dhamma](#).”

7. In the case of the wanderer Vacchagotta asking the Buddha about whether there is a “self” or “no-self”, the Buddha just remained silent.

- After Vacchagotta left, Buddha’s personal attendant, Ven. Ānanda asked him why Buddha did not explain the concept that it is not correct to say “there is no soul” or “there is a soul” (because there is only an ever-changing lifestream) to Vacchagotta. The Buddha told Ānanda that he did not think Vacchagotta was mentally capable at that time to understand the concept, and that he did not want to confuse him. See the post, “[What Reincarnates? – Concept of a Lifestream](#)” for the correct explanation.

8. The Buddha was endowed with that capability to see other people’s mental status. We do not have that capability. So, we need to use our own judgment.

9. Lying to another human being (with “bad intentions”) may have even worse consequences (depending on the particular case) than killing a being of a lower realm. In some cases, lying may lead to physical harm or even death for others.

- The *kammic* effects of such offenses depends on the status of the being in question and the consequences of the particular action. For example, killing an *Arahant* or one’s own parents is a much worse crime than killing a normal human, and killing any human is much worse than killing any animal; see, “[How to Evaluate Weights of Different Kammās](#).”

10. During the Nazi terror in Germany, many Germans “lied” to the Nazis that they were not hiding Jews in their houses; of course the intention was to save human lives, and thus it was the right thing to do. They acquired good *kamma* for protecting lives.

- We need to realize that “lying” — as meant in as “*musāvāda*” in the five precepts — really means the “intention” involved: “*Musā*” means “wrong or incompatible with morals” and “*vāda*” means “speech”; see, “[Details of Kamma – Intention, Who Is Affected, Kamma Patha](#).”
- Therefore, even though they were literally lying, their intention was not a “*musāvāda*,” but actually a “good deed.”

Next, “[Learning Buddha Dhamma Leads to Nirāmisa Sukha](#)”,

7.1.2.4 Three Kinds of Happiness – What is Nirāmisa Sukha?

Revised October 29, 2019; August 18, 2022

Introduction

1. There are three kinds of happiness:

- Sense pleasures (*āmisā sukha*)
- Mundane meditative (*jhānic*) pleasures
- *Nibbānic* (*nirāmisā sukha*)

What is *Āmisā*?

2. *Āmisā* means material; “*āmisā dāna*” is the offering of material things. Thus *āmisā sukha* is the pleasure that arises from material things. We are familiar with sensory delights. Indulging in sensory pleasures is all we know to be providing happiness. We want to see beautiful pictures of people, hear soothing music, taste good food, etc.

- The drawback of sensory pleasures is that the experience lasts only during that particular sensory event. For example, as soon as we finish eating, the satisfaction goes away. Also, we could not keep eating even if we wanted to. We will get sick of it soon enough, no matter how good the food is.
- The same is true for any other sensory pleasure. One cannot keep listening to music or watching movies for too long at a stretch.
- However, craving any sensory pleasure comes back after a while. It is never permanently satisfying.

Jhānic Pleasures

3. People who have been doing *Samatha* meditation (for example, breath or *kasiṇa*) know that it gives a pleasure different from any sensory pleasure.

- One could meditate for hours (especially if one gets into a *jhānic* state) and can enjoy it as long as one wants. Furthermore, even after the session, the calming effect is there. It gives a sense of peacefulness that can last for hours.
- If one dies while in a *jhānic* state, one will be born in the corresponding *Brahma* world (either in the *rūpa loka* or in the *arūpa loka* depending on the *jhānic* state). However, a birth in one of the lowest four realms is not ruled out in the future.
- The ability to get into *jhānic* states could be lost even in this lifetime if one commits an evil *kamma* or indulges heavily in sense pleasures.
- *Jhānic* states are attained via TEMPORARY blocking the evils of greed and hate from the mind by focusing the mind on a neutral object such as breath, rising and falling of stomach, or a *kasiṇa* object, for example.

Nirāmisā Sukha

4. The *nirāmisā sukha* is more permanent even compared to *jhānic* pleasures. That is especially true if one has attained at least the first stage of *Nibbāna*, the *Sotāpanna* stage.

- *Nirāmisā* is the opposite of the *āmisā* that we mentioned earlier. Thus *nirāmisā sukha* does not arise due to material things. *Nirāmisā sukha* is purely mental and arises from dissociation from the stressful material world. It is a relief sensation rather than an enjoyment. Imagine the feeling when a pulsating headache goes away. It is a sense of calm and peacefulness.
- In other words, *nirāmisā sukha* is present without worldly stresses.
- The *nirāmisā sukha* of a *Sotāpanna* (or above) is permanent. One can get into an *Ariya jhānā* at any time. The *Sotāpanna* status is never lost, even through future lives.

Permanent Happiness

5. Upon attaining *Nibbāna* (i.e., Arahant hood), there is nothing else to do. An *Arahant* who has developed higher *jhānā* can even experience the full *Nibbānic* pleasure (*saññā vedayita nirodha sammāpatti*) at will (up to seven days at a time.) The death of Arahant results in permanent *Nibbāna*, i.e., complete release from suffering or *Parinibbāna*.

- To emphasize, *Parinibbāna* is not a “place” with happiness. Rather, it is the complete absence of ANY suffering.
- The four *Nibbānic* states result via PERMANENT removal of greed, hate, and ignorance in four stages. That involves insight (*vipassanā*) meditation, most importantly, on the three characteristics of existence: *anicca*, *dukkha*, and *anatta*.
- Even before the *Sotāpanna* stage, one can start feeling the *nirāmisā sukha* by systematically removing greed, hate, and ignorance; see “[How to Taste Nibbāna](#).”

More information on *nirāmisā sukha* at “[Nirāmisā Sukha](#).”

Also see: [Learning Buddha Dhamma Leads to Nirāmisā Sukha](#)

More in-depth analysis at: “[Nibbana](#).”

7.1.2.5 Learning Buddha Dhamma Leads to Nirāmisā Sukha

Revised April 26, 2020

1. It is good to hear from those who have been able to “get to a peaceful state of mind” by reading posts at this site. This is nothing but early stages of *Nibbāna* or “*niveema*” or “cooling down”, and is also called the “*nirāmisā sukha*.” That is a characteristic of “pure Dhamma” and I cannot take any credit for it. This post explains how it happens.

- In other posts, I have discussed why “formal meditation” is not required to attain the *Sotāpanna* stage; see, for example, “[What is the only Akusala Removed by a Sotāpanna?](#).” Here would like to discuss how this “*nirāmisā sukha*” arises when one reads (or listens) to the true Dhamma, and how that can take one all the way to the *Sotāpanna* stage.
- Before that, I need to point out that the “Search” box on the top right can be very useful in navigating the site when one is looking for specific information. Avoid writing sentences or even phrases, but just enter keywords. One could narrow down the number of posts that come up by adding more relevant keywords.
- By the way, the “Search” box on the top right is very good for finding relevant posts on keywords.
- If you have questions or comments, it is best to make a comment at the discussion forum: “[Forums](#).”

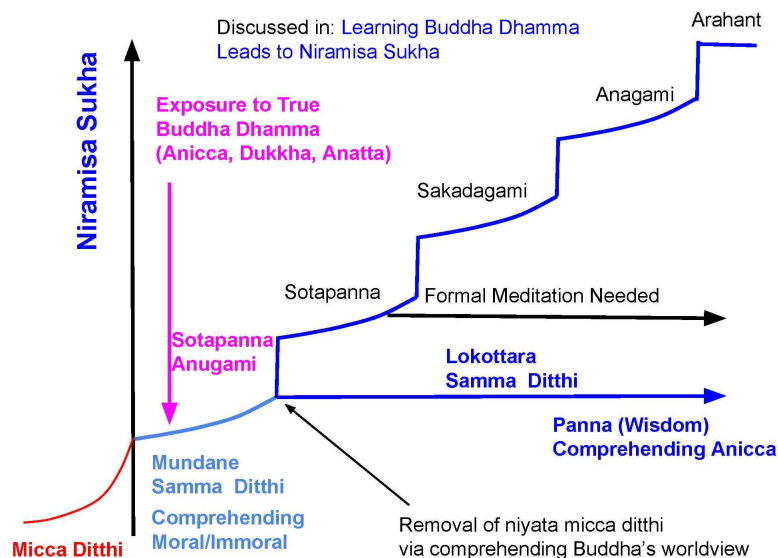

2. Our minds are under stress constantly due to its tendency to know everything that is going on not only at the physical vicinity, but also things that happened in the past or one’s hopes for the future.

- That tendency intensifies when we have excessively greedy or hateful thoughts; these two are called *kāmacchanda* (strong greed) and *vyāpāda* (strong hate), the two key elements of the five hindrances that “cover our minds.” The other three hindrances are basically due to those and also due to our ignorance of how nature operates.
- Think about how “you were on fire” when you got either excessively angry or excessively greedy or lustful.
- When one reads (or listens) attentively to anything of interest, all those hindrances are REDUCED. However, depending on what type of material it is, this suppression may not be very effective. For example, if one is reading a scientific or geography paper, they may be reduced, but if one reading a pornographic novel or listening to rap music, they may actually increase.
- If one is reading Dhamma that is not true Dhamma (or for that matter, any type of religious material), it will still reduce those five hindrances because that material will not induce any greedy or hateful thoughts.

3. However, there is a big difference in reading (or listening to) true Buddha Dhamma. This is, of course, something one can verify for oneself (as many have).

- Listening or reading true Dhamma elevates the “*preethi*” (or “*pīti*”) *cetasika* making one joyful, which in turn makes the body “light”, causes physical calmness, and lead to *samādhi*: “*pīti manassa kayo passadati, passadi kayo sukhantiyati, sukhino samadhiyati.*”
- We will discuss this at a deeper level, in *Abhidhamma*, where we will discuss how various “mind made *rūpa*” like *lahutā* (lightness), *Mudutā* (Elasticity), and *Kammaññatā* (weirdness) can make one’s body “light” or “heavy” depending on the mental status; see, “[Rūpa \(Material Form\) – Table](#).” For example, they are related to the *cetasika* like *kāyapassaddhi* (tranquility of mental body); *cittapassaddhi* (tranquility of consciousness); see, #6 of “[Cetasika \(Mental Factors\)](#).”
- And this *samādhi* is attained via the suppression of ALL FIVE hindrances; **it is commonly called “*Samatha*.”** One does not need to do a special “*Samatha Bhāvanā*” (like the breath meditation) to calm the mind. If one pays enough attention and gets absorbed in the subject matter while listening to a *desanā* or reading Dhamma, one could even attain the *Sotāpanna* stage.

4. This is the *samādhi* (or feeling of well-being) one feels when reading (or listening) to true Dhamma. It is also called the early stages of “*nirāmisa sukha*”; see the chart, “[Nirāmisa Sukha – In a Chart](#).” It can be printed for reference while reading this post.

- “*Nirāmisa sukha*,” by definition, can be experienced only after one hears the true message of the Buddha: *anicca, dukkha, anatta*, even though some sense of calm can also be experienced when focusing on any religious activity in general where the difference between what is moral and what is immoral is taught.
- True *nirāmisa sukha* can be experienced only when one starts seeing a glimpse of the “true nature of this world” and becomes a “*Sotāpanna Anugami*,” i.e., one on the way to become a *Sotāpanna*. This means one is exposed to the true meaning of existence in this world of 31 realms: *anicca, dukkha, anatta*. **Now, one has the POTENTIAL to become a *Sotāpanna*.**
- When one strives and comprehends the key message of the Buddha that seeking lasting happiness cannot be realized by staying in this beginningless rebirth process, one attains the *Sotāpanna* stage. Then one can “see” the path to *Nibbāna* and proceed on one’s own. One has removed an “Earth-equivalent of defilements” through *Sammā Diṭṭhi*; this is called “*dassanena pahathabba*,” i.e., “removing defilements via true vision or wisdom”; see, “[What is the Only Akusala Removed by a Sotāpanna?](#).”

- Higher stages of *Nibbāna* normally need formal meditation techniques. The most comprehensive is given in the *Mahā Satipaṭṭhāna Sutta*. However, the early parts of the *Mahā Satipaṭṭhāna Sutta*, especially the *Kāyānupassanā* section, is geared towards help attaining the *Sotāpanna* stage.

5. The key difference between a person following the mundane Eightfold Path and the Noble Eightfold Path is the following: **One on the mundane path avoids immoral activities because one is afraid of their consequences. However, a *Sotāpanna* avoids *dasa akusala* because he/she has seen the FRUITLESSNESS of such immoral activities.**

- For example, “What is the point of lying to make money, if that cannot provide one with lasting happiness?” That can be applied to any of the 7 immoral activities done by speech and the body. And that is due to the cleansing of the mind and reduction of the 3 *akusala* done by the mind, where the one of them (*niyata micchā diṭṭhi*) has now been permanently REMOVED; see, “[Ten Immoral Actions \(Dasa Akusala\)](#).”
- **Thus the moral behavior (“*sīla*” or “*seela*”) of a *Sotāpanna* comes from within, and it is called the “*Ariyakānta Seela*.”** It is unshakeable and remains in future lives.
- Just like someone who has really learned algebra instinctively knows how to solve a previously-unsolved algebra problem, a *Sotāpanna* instinctively avoids doing *dasa akusala* of “*apāyagāmī* strength”, i.e., those actions that lead to birth in the *apāyā*. (On the other hand, a person who has only memorized how to solve a few algebra problems can only solve those; he/she is likely to make mistakes in dealing with previously un-encountered problems).
- Once one sees a glimpse of *Sammā Diṭṭhi*, one can cultivate it further; also the other seven components of the Noble Eightfold Path (*Sammā Saṅkappa*, *Sammā Vaca*, etc) automatically follow.

6. During the time of the Buddha, many people attained the *Sotāpanna* stage during the first discourse they listened to. Attaining higher stages of *Nibbāna* could take more formal meditation by cultivating the basics that one has just grasped.

- Visaka attained the *Sotāpanna* stage at 7 years of age, and could not attain any higher stages until death. King Bimbisara also died as a *Sotāpanna*. Yet they are guaranteed to attain full *Nibbāna* within 7 *bhava*.
- Upatissa and Kolita attained the *Sotāpanna* stage while listening to a single verse; it took them a few days to attain the *Arahant* stage. They, of course, became the two chief disciples of the Buddha, Ven. Sariputta and Ven. Moggallana.
- Thus, formal meditation is normally needed to attain the higher stages of *Nibbāna* above the *Sotāpanna* stage. Of course, there are exceptions, like Bahiya Daruchiriya, who attained the *Arahantship* straightaway while listening to a verse uttered by the Buddha.

7. Whenever one become restless (the *uddhacca kukkuccha* hindrance becoming strong) and get the urge to “go watch a movie” or “stop by a friend’s house”, one could try reading (listening to) Dhamma. Similarly, if one gets bored and lethargic (*thina middha* hindrance becoming strong), try the same; ditto for when one is struggling to figure out “how to proceed on a key decision” due to the *vicikicchā* hindrance.

- The “*preethi*” or joyfulness that arises with *samādhi* WILL keep all those hindrances down, especially the *thina middha*. This is the real test of one’s ability to get to *samādhi*. If the state of *samādhi* is at a significant level, one should be able to follow the procedure in #7 above and “not fall asleep” even right after a good meal when one usually gets sleepy.

8. Even though learning Dhamma, in general, will lead to the above-discussed effects, comprehending *anicca*, *dukkha*, *anatta* WILL make a big difference. However, that may take more reading and comprehension of the wider world view of the Buddha: how *kamma* operates, 31 realms of existence, the rebirth process, *paṭicca samuppāda*, etc.

- It is not possible even to suggest which order of topics to choose, because each person is different. And it is imperative that one should not rush through them. **Gradual, steady progress is better than getting the hopes high and feeling depressed if things do not proceed fast enough.**
- What I would suggest, in general, is to first focus on the concepts that one starts understanding easily and slowly expand the “knowledge base” by reading on other relevant links.
- Also, it is a good idea to go back and read some key posts that one has not read for a while. One may grasp more content from the same post when reading at a later time because what is learned in the meantime could expose deeper meanings. I know this by experience. This is the uniqueness of Buddha Dhamma; the learning never ends, rather it just intensifies with added evidence.
- It will stop being a “chore” and will become joyful as one learns more and more. The more one learns the more energized one will become.

9. Even though it may not seem to be a “big deal”, understanding *anicca* (or cultivating the *anicca saññā*) will make a huge change in one’s progress, after one gains some understanding of the basic concepts like rebirth and *kamma*.

- I had struggled intensely for 3-4 years and made an enormous advance in listening to one discourse on *anicca*, *dukkha*, *anatta*. But of course, I had learned a lot of background material by that time and had given a lot of thought to various concepts.
- Still, by knowing what things are really important could make things easier for someone just starting out, or has been “on the wrong path.”
- My hope is that many will be able to attain at least the first stage of *Nibbāna* much more quickly than I did.

7.1.2.6 How to Taste Nibbāna

Revised November 24, 2018; April 26, 2020

1. Elsewhere on the site, I have described *Nibbāna* in a deeper sense. But we can look at the early stages of *Nibbāna* in a simple way.

- In Sinhala language (spoken in Sri Lanka), *Nibbāna* is also called “*nivana*” or “*niveema*” (නිවේම). This means “cooling down.” As one moves towards *Nibbāna*, one feels cooling down, a sense of well-being.

2. Do you remember the last time when you got really mad? How did that feel? You get hot. Whole-body becomes hot and agitated. Blood pressure goes up and the face becomes dark because the blood becomes dark. By the way, this is clear evidence that the mind can affect the body.

- This “burning up” is called “*tāpa*” in Pāli (තෘප් in Sinhala), and is due to greed, hate, and ignorance. “*Ātāpi*” means the opposite, “cooling down via getting rid of those defilements.” This is what is meant by “*ātāpi sampajāno*” in the *Satipaṭṭhāna sutta*; see, “[Mahā Satipaṭṭhāna Sutta](#).”
- When someone can get to the “*ātāpi sampajāno*” state, one feels calm and “cooled down”; see, “[Kāyānupassanā – The Section on Habits \(Sampajānapabba\)](#).”

3. Do you remember how you felt when you made someone happy, either via a good deed or word? You cooled down; felt good. Didn’t you feel the opposite of when you got mad?

- When one acts with greed, “heating up” still happens, may be to a lesser extent than when one is angry. As a kid, when I was stealing something, I felt heated and uncomfortable.
- The same is true when one acts with ignorance too. One is not certain whether that is the right thing to do; the mind goes back and forth: is this right or wrong? should I do it or not? This is called “*vicikicchā*” in Pāli. Because one does not really know, one is not certain, one becomes anxious, and the body gets heated up.

4. Thus, when one gives up acting with hate, greed, or ignorance, one becomes less agitated, at ease, with a sense of peacefulness. This is an early sense of what *Nibbāna* is.

- As one can see the benefits of cooling down, one will avoid actions done with hate, greed, and ignorance. And one will be looking forward to doing actions of goodwill, generosity, and mindfulness.
- Avoiding greed, hate, and ignorance is the same as avoiding *dasa akusala*.

5. Also, note the state of thoughts (*citta*) in the two opposing situations. When one acts with the defilements, thoughts run wildly; they come fast and they are energetic. The “*javana*” (impulsive power) of thought is high when acting with a defilement.

- On the other hand, thoughts run more smoothly and the *javana* (impulsive power) of a given thought is calm when acting benevolently, with kindness, with generosity, and with mindfulness; they are powerful too, but only in making one calm. Thus one can experience a taste of *Nibbāna* or “cooling down” even at the very early stages of the Path.

6. Now, one could get to TEMPORARY cooling down by not letting thoughts run wildly. The easiest to do is to keep the mind on a single focus. This can be done by focusing the mind on a religious symbol or just on the breath. Thus this “temporary relief” is felt by people of any religion when they contemplate a religious symbol with faith, or by doing “breath meditation” or mundane “*Ānāpānasati*” meditation.

- However, the only way to achieve permanent sense relief is to REMOVE greed, hate, and ignorance gradually by cleansing one’s mind. This is done by “taking in” (*āna*) of good thoughts, speech, and actions, and “getting rid of” (*apāna*) defiled thoughts, speech, and actions. **This is the Buddha’s *ānāpāna* meditation that can lead to PERMANENT happiness.** See, “[Is Ānāpānasati Breath Meditation?](#)”
- When one does this correct “*ānāpāna*” consistently, one’s bad habits (“*gati*”) will be gradually removed and good habits (“*gati*”) will be cultivated.
- When one has removed the defilements to a significant extent, then this relief becomes permanent and will not reduce from that state even in future births. **This first stage of *Nibbāna* is called the *Sotāpanna* stage.** A *Sotāpanna* is guaranteed not to be reborn in the *apāyā* or the four lowest realms; he/she has removed all “*gati*” suitable for beings in the *apāyā*. See, “[Gati to Bhava to Jāti – Ours to Control!](#)”

7. **However, it is impossible to remove greed and hate just by sheer will power**, i.e., forcefully. For example, one cannot get rid of greed even by giving away one’s wealth; if that is done without understanding, then it could lead to remorse and hate.

- Rather, getting rid of greed and hate comes AUTOMATICALLY as one understands the worldview of the Buddha: that we cannot maintain anything to our satisfaction in the LONG RUN. This worldview is embedded in the Three Characteristics of “this world” or *anicca, dukkha, anatta*.
- Not knowing the Three Characteristics is the ignorance or *avijjā*.
- Even before comprehending the Three Characteristics, one needs to reduce total ignorance (*moha*) to the *avijjā* level by getting rid of the 10 types of *micchā diṭṭhi*; see, “[Micchā Diṭṭhi, Gandhabba, and Sotāpanna Stage.](#)”

8. This is why *Sammā Diṭṭhi* or “correct world view” comes first in the Noble Eightfold Path. When one comprehends the true nature of “this world”, one’s mind will AUTOMATICALLY start rejecting thoughts, words, and actions through greed and hate.

- Then *Sammā Diṭṭhi* (correct vision) will automatically lead to *Sammā Saṅkappa* (fruitful thoughts), *Sammā Vācā* (fruitful speech), *Sammā Kammanta* (fruitful actions), *Sammā Ājīva* (livelihood), *Sammā Vāyāma* (efforts in those), *Sammā Sati* (moral mindset) and then will culminate in *Sammā Samādhi* (peaceful state of mind). This *Sammā Samādhi* is permanent for a *Sotāpanna*.

- Thus it is clear that such a *samādhi* cannot be attained with breath meditation or any other way of “focusing attention” on one thought object.
- Purification of the mind is the key, and that comes first through reading, listening, and comprehending the true and pure Dhamma.

9. As one follows the Noble Eightfold Path of the Buddha, one can EXPERIENCE a sense of well-being called *nirāmisa sukha* which is different from the sense pleasures; see, “[Three Kinds of Happiness – What is Nirāmisa Sukha?](#).”

- If you did experience a sense of well-being just by reading this post, that is a good start. That sense of well being will only grow as the understanding gets deeper. I have gone through this process myself and that is what I am trying to convey to others.

10. **September 22, 2016:** I have started a new section: “[Living Dhamma](#),” where an experience-based process of practicing Buddha Dhamma (Buddhism) is discussed with English discourses (*desanā*). *Nibbāna* can be experienced at various levels, one needs to experience the earlier stages of *nirāmisa sukha* first.

Next, “[Need to Experience Suffering in Order to Understand it?](#)”, ..

A deeper analysis of *Nibbāna* at “[Nibbāna](#).”

7.1.2.7 Need to Experience Suffering in Order to Understand it?

Revised August 18, 2016; Revised February 4, 2017; April 26, 2020

1. It is a common misconception that one needs to experience **harsh suffering** in order to understand what the Buddha meant by the First Noble Truth, that there is “suffering in this world.”

- Thus, especially in the days of the Buddha, some people deliberately lived a miserable life, thinking that it will help understand suffering. They subjected their bodies to various forms of discomfort and even torture.
- This is actually one extreme that the Buddha said NOT to follow: “*atta kilamathānu yoga*,” or subjecting oneself to unnecessary suffering. Closest English translations would be “an ascetic life”, where one forcefully abstains from any comforts.

2. The Buddha never encouraged anyone to deliberately undergo suffering. The **suffering** that the Buddha talked about **is hidden and is about future suffering in this life and in future lives**. There are two kinds of “hidden suffering” that the Buddha revealed to the world:

- One is the very harsh suffering in the rebirth process (when one is born in the lowest four realms or the *apāyā*).
- The other is the “incessant distress” that we all undergo even without realizing it: “[Anicca – The Incessant Distress \(“Pīṇa”\)](#).”
- **Anyone, rich or poor, undergoes this latter type of suffering in this life.** The Buddha pointed out that one could discover this type of hidden suffering and remove it too: “[Starting on the Path Even without Belief in Rebirth](#)” and other posts in the “[Living Dhamma](#)” section.

3. If one needs to suffer more to attain *Nibbāna*, then those who are in the *apāyā* would be the first attain *Nibbāna*! Most of the suffering is experienced when one is born in the *apāyā* or the lower four realms, see, “[The Grand Unified Theory of Dhamma](#).”

- In order to actually realize the true suffering, whether in this life or in the lower four realms, **one needs to contemplate (*bhāvanā*) with a healthy body and a clear mind.**

- If one is hungry, one CANNOT understand the causes of suffering; rather one will be generating hateful thoughts. The same is true for all four necessities of life: food, shelter, clothing, and medicine. We NEED those things to survive.
- What we should NOT do is to over-indulge in any of the above four necessities of life. That is the other extreme that the Buddha said to avoid: “*kāma sukallikānu yoga*,” or to over-indulge in sense pleasures, i.e., to live a hedonistic life.

4. It is commonly said that the Buddha advocated the “middle ground”, i.e., to avoid both an ascetic life (with self-induced suffering) or a hedonistic (over-indulgent) life. That is true, but there is more to it.

There is a deeper meaning to “*majjima paṭipadā*.” The way to a peaceful existence (or to *Nibbāna*) is to get rid of greed, hate, AND ignorance. The two extremes that we talked about above do involve hate or at least *paṭigha* or “friction” (when subjecting oneself to suffering) and greed (indulging in excessive sense pleasures).

- Just because one stays away from those two extremes does not necessarily mean one is on the “correct path.” The Path is not just a “middle ground” between those two extremes.
- **The key is to learn Dhamma and to systematically reduce greed, hate, and ignorance.**
- Of course, living a life away from the two extremes is conducive — even necessary — to learn Dhamma and to gradually remove defilements from the mind.

5. In between those two extremes, one needs to avoid being influenced by an “intoxicated mind.” In between the above two extremes, people also act in improper ways intoxicated by power, beauty, position, (book) knowledge, lineage, etc as well as by alcohol and drugs. This is due to *avijjā* or ignorance.

- Thus, “*majjhima paṭipada*” really means to follow a simple lifestyle without veering to the extremes.
- Thus *majjhima paṭipadā* is to follow a lifestyle that avoids the corruption of the mind by excess attachments to sense pleasures. On the hand, there is no need to subject one’s body to unnecessary hardships either.

6. In summary, the Buddha recommended a “common sense” comfortable, but simple, life that is conducive to meditation. Here meditation (*Bhāvanā*) is not necessarily “formal meditation.” The Buddha said, “*bhāvanāya bahulīkataya*,” or “contemplate as often as possible.” [*bahulīkata* :[pp. of bahulīkaroti] took up seriously; increased. (adj.), practised frequently.]

- One also needs to be avoiding immoral actions, speech, or thoughts as much as possible, and actually cultivate moral actions, speech, and thoughts. That helps suppress the five hindrances (*pañcanīvaraṇa*) and have a peaceful state of mind, i.e., one could start experiencing the *nirāmiṣa sukha* that arises due to a “more pure state of mind.”

7. One can be contemplating the nature of the world as one goes through daily chores. Another aspect of this is the ability to calm the mind; see, “[Key to Calming the Mind](#).”

- A bigger picture implied here is that we need to educate our children so that they can find good employment and thus be able to live without having to worry about those four necessities of life. As they grow up, we need to educate them in Dhamma (how to live a moral life) too, but not at the expense of them getting a good education.

8. **Suffering is NOT the Noble truth on Suffering, i.e., *Dukha* (feeling of suffering) is NOT *dukkha sacca* (the Noble Truth that suffering can be stopped from arising); *sacca* pronounced “sachcha” and means “truth.”**

- **The Noble Truth of *dukkha sacca* is about comprehending how suffering ARISES due to greed, hate, and ignorance (of this fact).** One can understand that —and take steps to avoid future suffering — by learning Dhamma: *anicca, dukkha, anatta, paṭicca samuppāda*, etc.

- The Buddha said, “This Dhamma is unlike anything that the world has ever seen.” The actual suffering is hidden WITHIN the apparent enjoyments. Also see, “[The Incessant Distress \(Peleema\) – Key to Dukkha Sacca.](#)”
- For another description of *majjhima paṭipadā*, see, “[Dhammacakkappavattana Sutta.](#)”

7.1.2.8 Does Impermanence Lead to Suffering?

Revised April 26, 2020; June 7, 2020; August 23, 2022

The following INCORRECT statements are in frequent use in most books in both Mahāyāna and current texts on Theravāda:

1. “We suffer because our bodies are impermanent; they are subject to decay and death.”
2. “We suffer because those things we get attached to are impermanent.”
3. “If something is impermanent, that leads to suffering.”
4. “Since everything in this world is impermanent, everything is suffering”, etc.

Is there a direct correlation between impermanence and suffering? Let us examine those statements.

1. “We suffer because our bodies are impermanent; they are subject to decay (aging), illness, and death.”

- We indeed suffer because OUR bodies are impermanent and are subject to decay (aging), illness, and death. But if it is an enemy, do we suffer when that enemy gets sick or die? We suffer if someone we LIKE gets ill or dies, but it is cause for celebration for most people when someone they dislike gets ill or dies.
- The suffering/happiness is directly proportional to the attachment/dislike we have for that person. Suffering due to the loss of one’s child is more compared to the loss of a distant relative. Happiness due to Bin Laden’s death was higher compared to the death of an unknown terrorist. (For a follower of Bin Laden, his death would have led to suffering).

Suffering arises when things do not proceed as we like. It is human nature to want loved ones to be unharmed and enemies to come to harm. When either does not happen, that leads to suffering. That is what *anicca* means: the inability to maintain things to our liking.

2. “We suffer because those things we get attached to are impermanent.”

- Many things in this world cause us suffering because they will not stay in the same condition or are destroyed. That is true.
- But many other “permanent” things in this world (at least relative to our lifetime of 100 years) are associated with suffering. If one has an illness that becomes “permanent” would that not lead to more suffering?
- A gold necklace is not impermanent, i.e., it will last for thousands of years. But the woman who owns one may be robbed of it, and in the process, could get hurt too. She could not “maintain that necklace as she desired.”

If ANYTHING causes us suffering, that is only because we cannot maintain it to our satisfaction, or our liking.

3. “If something is impermanent, that leads to suffering.”

The following is the conventional (incorrect) translation of Buddha’s words: “*yad **aniccam** tam dukkham*,” i.e., “if something is **not permanent**, that leads to suffering.” But the correct translation is, “if something **cannot be maintained to our liking**, that leads to suffering.” Let us consider some examples:

- If we have a headache, and if it is not permanent (i.e., it goes away), does that cause suffering? No. However, if the headache becomes permanent, that will lead to suffering.
- If we come down with cancer, wouldn't it cause happiness if it becomes impermanent?, i.e., if it goes away?
- If a relative (we do not like) comes to stay with us, would it lead to happiness if the stay becomes permanent or impermanent? Of course, it will cause us happiness if the stay is not permanent and the person leaves.

4. “Since everything in this world is impermanent, everything is suffering.”

The Buddha never said everything in this world leads to suffering. If it is obvious that everything is suffering, then everyone will be looking to attain *Nibbāna* as soon as possible. **The reality is that there are sensory pleasures in this world.** Most people do not understand why one should go to all this trouble to “give up all these pleasures and seek *Nibbāna*.”

- Looking at the “big picture” of the 31 realms in this world, there are many realms where suffering is much less. See “[The Grand Unified Theory of Dhamma.](#)”
- But there is unimaginable suffering in the lowest four realms, and we need to avoid that. Even though there are 31 realms, MOST LIVING BEINGS (99.99%+) are in the lowest four realms.
- Thus what is true is that this *samsāric* journey is filled with UNIMAGINABLE suffering. However, one cannot see that unless one learns true Dhamma.
- Even in this life, there is much suffering, especially as one ages. The suffering is highest close to death if the death is due to an ailment. If one enjoys sex, that ability to enjoy sex will fade away as one gets old. It does not matter how much money one has. Even our taste buds will not give us the same enjoyment from foods as we get old. All our sense faculties will start performing less and less as we get old. That is *anicca*. We cannot maintain things to our satisfaction in the long run.
- Even if we are born in a higher realm with much happiness, that existence cannot be maintained. One day, that life will be over, and one WILL end up in a lower realm at some point, and then it will be very hard to get out of there. That is *anicca*.
- Furthermore, if the cause of suffering is impermanence, then it cannot be eliminated, see, “[Would Nibbāna be Possible if Impermanence is the Cause of Suffering?](#).”

In Pāli (or in Sinhala), the word “*icca*” (pronounced “*ichcha*”) means liking. Thus *anicca* (pronounced “*anichcha*”) means not to like.

Correct Interpretations

5. Therefore, the correct translation of “*yad aniccaṃ taṃ dukkhaṃ*” is “if something **cannot be maintained to our satisfaction**, that leads to **suffering**.” As the Buddha stated, you can take any example you like and verify that it is a universal principle, an unchanging characteristic of this world.

- See “[Anicca – Inability to Keep What We Like](#)” for details.

6. **Without understanding the three characteristics of “this world,” it is impossible to grasp the Buddha's message.** Those three characteristics are *anicca*, *dukkha*, and *anatta*. Here *anatta* is pronounced “*anaththa*.” These are the words in the *Tipiṭaka* written more than 2000 years ago, in 29 BCE.

- The problem started when these words were translated to Sanskrit as *anitya*, *dukha*, and *anātma*; this started probably as far back as the first or second century CE.
- Then those Sanskrit words were translated to English as impermanence, suffering, and “no-self.” **The two worst translations are impermanence and “no-self.”** See, “[Misinterpretation of Anicca and Anatta by Early European Scholars.](#)”

- Those two Sanskrit words, *anitya* and *anātma*, are being used by many in Sri Lanka today as Sinhala words representing the translations of the “Pāli words”, *anicca* and *anatta*. Furthermore, the Pāli word *nicca* (pronounced “nichcha”) was translated to Sanskrit as “*nitya*” (pronounced “nithya”) which means “permanent.” The Pāli word *nicca* means “something can be maintained to one’s satisfaction and, thus, is fruitful [*subha*].”
- However, *nicca*, *anicca*, and *anatta* are “old Sinhala” words with entirely different meanings than *nitya*, *anitya*, and *anātma*. Those words are not commonly used today, but when explained, a Sinhala-speaking person can understand the real meaning. Indeed old ladies in villages in Sri Lanka still say “*ane aniccan*” (අනෙ අනික්ක) to express the futility of something.

7. The Buddha stated that those three characteristics, *anicca*, *dukkha*, and *anatta*, are related:

“*yad aniccaṃ taṃ dukkhaṃ, taṃ dukkhaṃ tad anattā*”, or,

“if something is not *nicca*, *dukkha* arises, and because of that, one becomes helpless [*anatta*].”

- In the long-term, not realizing the *anicca* nature leads to rebirths in the four lower realms (*apāyā*.)

8. As mentioned above, as one gets old or gets disabled, these three characteristics will be easier to see for oneself; but then it would be too late because the mind gets weaker as we get old. One needs to learn Dhamma BEFORE the mind (and the body) become weak. Here is a video that shows this clearly (of course, we all will go through such changes as we grow old):

[WebLink: RANKER: Celebrities Who Have Aged the Worst](#)

Also, see “[Anicca, Dukkha, Anatta - Wrong Interpretations](#),” and “[Why is Correct Interpretation of Anicca, Dukkha, Anatta so Important?](#)” for more details.

“[“Self” and “no-self”: A Simple Analysis – Do We Always Act with Avijjā?](#)”

7.1.3.1 What is Unique in Buddha Dhamma?

Revised November 16, 2019; August 28, 2022

All Religions Are the Same?

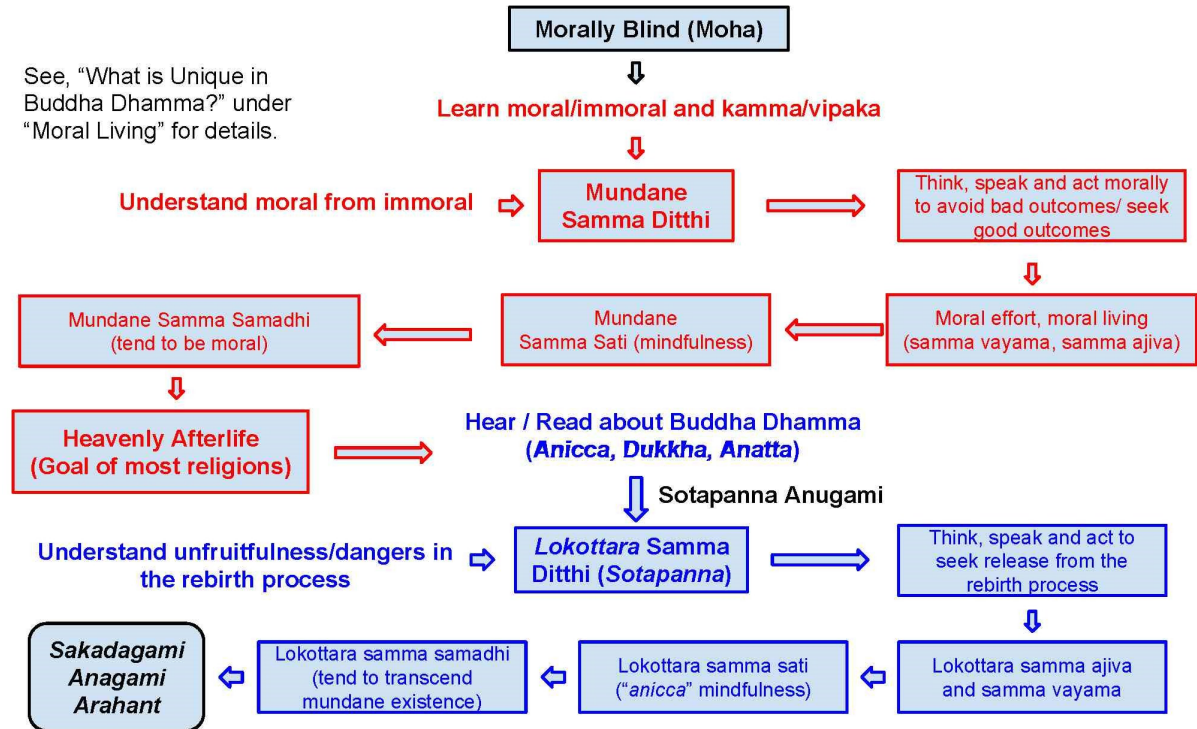

1. When I hear the common statement, “all religions are the same, they teach you how to live a moral life,” I cringe. That is because I think about all those unaware of the Buddha’s actual message. In particular, this is the mindset of those who follow “secular Buddhism.”

- Most religions indeed teach how to live a moral life. And there is also evidence that atheists may be as moral as religious people are; see, “[WebLink: Morality in everyday life-Science-2014-Hofmann](#).”

- However, Buddha Dhamma goes beyond that. The Buddha said, no matter how well we live this life that will not help us in the long term, in the rebirth process.
- Yet, even to understand the message of the Buddha, one must live a moral life first.

Two Paths Described by the Buddha

2. I have made a one-pager, which should be referenced here.

Buddha Dhamma - In a Chart

This chart can be viewed in a separate panel by clicking on "[Buddha Dhamma – In a Chart](#)" and printed for reference. There are a few key things that need explanation first:

- The “mundane Eightfold Path” is depicted by the set of boxes in red, starting with “mundane *sammā ditṭhi*.” The next box depicts mundane versions of *sammā saṅkappa*, *sammā, vācā*, and *sammā kammanta*.” Which means “think, speak, and act morally to avoid bad outcomes/seek good outcomes” and so on until “mundane *sammā samādhi*.”
- Most of these steps (not all) are in other religions and conventional or secular “Buddhism.” They describe how to live a moral life. Most other religions aim to gain a (permanent) heavenly life at death.
- In the current distorted versions of “Buddhism,” the joys of heavenly lives are highlighted. Sometimes one is encouraged to “enjoy such heavenly lives” before attaining *Nibbāna*. They don’t understand the “*anicca* nature” of any realm in this world, i.e., they don’t comprehend the Four Noble Truths. See “[Paticca Samuppāda, Tilakkhana, Four Noble Truths](#).”

What Is a “Good Birth”?

3. This misconception in “Buddhism” arises because the rarity of a “good rebirth” has not been comprehended; see “[How the Buddha Described the Chance of Rebirth in the Human Realm](#).” This is why the Buddha said, “no happiness can be found anywhere in the 31 realms” (the true meaning of *anicca*).

- Even if a heavenly rebirth is attained in the next life, a future rebirth in the four lowest realms (*apāyā*) cannot be avoided without attaining the Sotāpanna stage of *Nibbāna*. A phrase used by some *bhikkhus* in Sri Lanka goes as, “May you attain *Nibbāna* at the time of the Buddha Maithree (next Buddha).” Why not attain *Nibbāna* in this life? *Who is going to give guarantees that one will be born*

human during the time of the Buddha Maithree? Everyone should use this rare opportunity to be human, to strive now!

- Until one comprehends *anicca*, *dukkha*, and *anatta*, one always values future happiness in permanent heaven (most religions) OR temporary happiness in heavenly worlds (traditional “Buddhists”). The difference between a traditional “Buddhist” and a *Bhauddhaya* is discussed in “[A Buddhist or a Bhauddhaya?](#).”
- One starts on the transcendental (*lokuttara*) or the Noble Eightfold Path when one comprehends the dangers of the rebirth process and BECOMES a *Sotāpanna*.
- When one is trying to attain that understanding, one is called a *Sotāpanna magga anugāmi*; see “[Sotāpanna Anugāmi and a Sotāpanna](#).”

Two Eightfold Paths

In the “[Mahā Cattārisaka Sutta \(Discourse on the Great Forty\)](#),” the Buddha discussed that one must first follow the **mundane eightfold path**. That will remove the ten types of wrong views (*micchā diṭṭhi*) listed in #3 of that post. After that, one needs to comprehend the *Tilakkhaṇa* (*anicca*, *dukkha*, *anatta*) to some extent to start on the **Noble Eightfold Path**.

4. Thus one starts on the Noble Eightfold Path starting with *lokuttara* (transcendental) *sammā diṭṭhi* of a *Sotāpanna* (set of blue boxes in the chart). One has seen a “glimpse of *Nibbāna*,” i.e., one KNOWS that permanent happiness is not possible anywhere in the 31 realms and that whatever effort one makes to achieve such happiness is like chasing a mirage.

- Note the difference in the box next to “*sammā diṭṭhi*” in the two cases. In the mundane path, “*sammā saṅkappa*, *sammā vaca*, *sammā kammanta*” are “moral thoughts, speech, and actions” intended to avoid bad outcomes and to seek good outcomes.
- In the Noble path, “*sammā saṅkappa*, *sammā vācā*, *sammā kammanta*” are “thoughts, speech, and actions” intended to stop the rebirth process. **One does not do immoral things because there is “no point” in doing such things.** One knows that such things are unfruitful and dangerous in the long run.
- And one becomes more compassionate towards all living beings (not just humans) because one can see that each living being suffers because of ignorance of the Buddha’s key message. One also realizes that one needs to fulfill obligations to others to “pay back old debts”; one is bound to the rebirth process not only via cravings for worldly things but also via unpaid debts from previous lives.

Noble Eightfold Path

5. The decision to become a *Sotāpanna magga anugāmi* (the path to the *Sotāpanna* stage) can be made anytime after getting to the “red boxes”, i.e., while one is on the mundane Eightfold Path.

- In a way, a *Sotāpanna magga anugāmi* is a *Bhauddhaya* in the real sense. See “[A Buddhist or a Bhauddhaya?](#)” Even though not in the *Tipiṭaka*, sometimes the word “*Cūḷa Sotāpanna*” (pronounced “chūla Sotāpanna”) is also used to describe the same person.
- The key is comprehending the “true nature of this world of 31 realms,” Buddha described. That says it is impossible to achieve/maintain anything that can be kept to one’s satisfaction (*anicca*.) Thus one gets to suffer (*dukkha*), and thus, one is truly helpless in the rebirth process (*anatta*). This realization itself is like lifting a heavy load that one has been carrying, the first true taste of *Nibbāna*.

6. This “change of mindset” for a *Sotāpanna* is PERMANENT, i.e., it will not change even in future rebirths. One has attained an “unbreakable” level of confidence (*saddhā*) in the Buddha, Dhamma, and Saṅgha.

- And a *Sotāpanna* can follow the rest of the 7 steps in the Noble Eightfold Path even without help from others. Thus one will attain the next three stages of *Nibbāna* (*Sakadāgāmi*, *Anāgāmi*, *Arahant*) successively by following those steps.

Mundane Eightfold Path

7. In the *Mahā Cattārīsaka Sutta*, the Buddha outlined how one needs first to follow the mundane (“lokiya”) Eightfold Path; see, “[Mahā Cattārīsaka Sutta \(Discourse on the Great Forty\)](#).” This is the first NECESSARY step to eliminate the worst kinds of “gunk” that have been built up over countless past lives.

- The unique message of the Buddha has been hidden for hundreds of years. What is conventionally practiced today is just this mundane Eightfold Path. This is what we call “Buddhism” today.
- That superficial or “secular” Buddhism is not that different from what is advised by most other religions. Thus, it is easier for people to resonate with the mundane concepts in “Buddhism.” *Sammā Dīṭṭhi*, for example, is considered the “correct vision” of “how to live a moral life.”
- Of course, that is the first necessary step. That will help one to be able to experience the benefits of moral behavior (even in this life as a “*nirāmisā sukha*”; see “[How to Taste Nibbāna](#)”) and then comprehend *anicca*, *dukkha*, and *anatta*, and embark on the Noble Eightfold Path to seek permanent happiness or *Nibbāna*.

Next, “[A Buddhist or a Bhauddhaya?](#)”,

7.1.3.2 A Buddhist or a Bhauddhayā?

Revised August 18, 2016; revised April 25, 2019; April 22, 2022; re-written September 12, 2022

Buddhism Versus Buddha Dhamma

1. The terms “Buddhism” and “Buddhist” were invented by English, French, and German historians in the nineteenth century when they first came across Buddha Dhamma in India, Sri Lanka, and other Asian countries. The Pāli word for a Buddhist is “*Upāsaka*,” and the Sinhala word is *Bhauddhayā*.

- The discovery of the “Asoka pillars” in India was followed by the discovery of the Pāli literature on Buddha Dhamma in Sri Lanka and other countries such as Burma and Thailand (together with translated Chinese *Āgama* scripts); of course, there were no practicing “Buddhists” or any Buddhist literature in India.
- See “[Historical Background](#)” for details.

Buddha Dhamma – Ending of Future Suffering

2. Here are two key points that should be the basis for defining the terms:

- Up to that time, it was “Buddha Dhamma” or the “Dhamma or Teachings of the Buddha.”
- The word Buddha comes from “*bhava*” + “*uddha*”; here, “*bhava*” means “existence (in the 31 realms),” and “*uddha*” means “removal.” Therefore, Buddha is one who figured out how to stop the rebirth process and thus end future suffering. Every birth ends in old age and death; there are no exceptions.
- And a person who diligently followed the Path advised by the Buddha was called a “*Bhauddhayā*” (= *bhava* + *uddha* + *yā* = one who strives to stop the rebirth process, i.e., to stop suffering).
- Thus, if religion is defined as “faith-based salvation,” Buddha Dhamma is not a religion. It is a new worldview that can lead to stopping future suffering. Faith in that new vision will grow as one’s understanding improves.

Bhauddhayā and Upāsaka

3. Note that the word “*Bhauddhayā*” (භූද්ධයා) is used only in the Sinhala language. The Pāli word for a lay Buddhist is “*Upāsaka*.” Both words are being used in the Sinhala language today.

- The word *upāsaka* probably came from “*upa*” + “*āsava*” + “*khaya*,” where those words mean “stay close to,” “defilements,” and “eliminate” or “wear away.”
- Thus, it means someone who stays close to the goal of eliminating defilements (*lobha*, *dosa*, and *moha*) leading to *Nibbāna*. Hence both words have the same meaning.

Most Adherents Today Are “Secular Buddhists”

4. When I hear the common statement, “all religions are the same; they teach you how to live a MORAL LIFE,” I cringe. I think about all those people unaware of the Buddha’s actual message. In particular, those who follow “secular Buddhism” have not realized the true value of Buddha Dhamma.

- Most people today have been exposed just to bits and pieces of Buddha Dhamma. Many do not believe in rebirth and are happy to be called “secular Buddhists.” See “[WebLink: en.wikipedia.org: Secular Buddhism](http://en.wikipedia.org: Secular Buddhism).”
- They are happy to follow the precepts of moral conduct, do breath meditation to relieve the stresses of modern life, and see where that leads them; see the discussion at “[WebLing: PureDhammaForums: Goenka’s Vipassana](http://PureDhammaForums: Goenka’s Vipassana).”
- That is a perfectly good starting point. But Buddha Dhamma is much deeper and can lead to a state without suffering, i.e., *Nibbāna*; see, “[Nibbāna](#).” Also, see “[Buddhism without Rebirth and Nibbāna?](#)”
- In addition, it is the best way to learn about this world. I have spent over ten years of my life to learning Buddha Dhamma, and I am still learning! It is an exhilarating experience.

Misconceptions of Secular Buddhists

5. Each person understands Buddha Dhamma differently, mainly based on the level of exposure to “correct Dhamma.” Most people have the following misconceptions:

- i. Buddha Dhamma provides temporary relief (version of *nirāmisā sukha*) from mental stress (as in breath meditation).
 - ii. Some others believe meditation will help alleviate suffering from physical ailments.
- While (i) is correct, it is only a minor benefit. The main benefit is to stop future suffering in the rebirth process.
 - Those who believe in (ii) turn to Buddhism too late, but better late than never! It is easier to grasp the worldview of the Buddha when the body and the mind are in good condition, i.e., when one is healthy and the mind is alert.

Hidden Suffering in the Rebirth Process

6. The main message of the Buddha goes beyond “living a moral life.” He pointed out two forms of hidden suffering that average humans are not aware of:

- i. That incessant distress or agitation we all feel in #5 above arises due to greed, hate, and ignorance (of moral values first, then the ignorance of the true nature of this world at a deeper level.)
- ii. Immoral deeds we commit due to these greedy, hateful, or ignorant mindsets will lead to much higher forms of suffering in future rebirths (especially when born in animals and other lower realms).

Buddha Dhamma Is the Ultimate Science

7. In world religions, faith in religion is mostly “blind faith.” Buddha Dhamma is more of a science than a religion. **For example, one does not need to believe in rebirth with blind faith.** There are two avenues to explore.

- i. There is mounting evidence for rebirth; see [“Evidence for Rebirth”](#) and [“Near-Death Experiences \(NDE\): Brain Is Not the Mind.”](#)
 - ii. Even more importantly, the worldview of the Buddha is self-consistent with rebirth among 31 realms of existence built-in. See [“Origin of Life.”](#)
- However, those new to Buddhism need to start gradually. It is good to read [“Starting on the Path without Belief in Rebirth”](#) and [“Is It Necessary for a Buddhist to Eliminate Sensual Desires?”](#) first.

8. Closely related to rebirth is the fact that we can be reborn among 31 realms of existence. Thus, in addition to the human and animal realms, there are 29 more realms that we are not aware of.

- Thus, the “wider worldview” of the Buddha can be briefly summarized as follows:
 - (i.) Any living being will be reborn among the 31 realms,
 - (ii.) Most rebirths are in the lowest four realms, and one of those is the animal realm (that is why the rebirth process has more suffering)
 - (iii.) Rebirth process happens naturally according to *kamma* accumulated via good/bad deeds.
- The first step to be released from that future suffering is to learn the wider worldview of the Buddha. This website is dedicated to explaining the Buddha's worldview.

One Becomes a *Bhauddhayā/Upāsaka* by Learning Buddha's Worldview

9. There are no rituals to become either a “secular Buddhist” or a *Bhauddhayā*. As one becomes convinced of the Buddha's worldview and starts seeing the truth of the “wider worldview,” one becomes a better Buddhist or a *Bhauddhayā*.

- As one becomes a Buddhist/*Bhauddhayā*, his/her personality may start changing without forcefully changing it. That is because one starts seeing the world differently and reacting to outside events differently. It is all about changing perceptions about “this world,” i.e., it is all mental.
- Because of this, one cannot become a *Bhauddhayā* or even a good Buddhist by just following rituals. One becomes a good Buddhist/*Bhauddhayā* by attempting to comprehend the message of the Buddha and by experiencing the benefits as one progresses.

Making Gradual Progress

10. “Dhamma will guide and protect one who lives by Dhamma” (*“Dhammo ha ve rakkhati Dhammacāri.”*) If one starts becoming a Buddhist/*Bhauddhayā*, one will be able to see the changes in oneself as time goes by (others will start noticing after a bit longer). One's likings and associations are the first to change.

- A *Bhauddhayā/Upāsaka* starts to realize the futility of staying anywhere in the 31 realms and will eventually attain the first stage of *Nibbāna*, i.e., become a *Sotāpanna*.
- A *Sotāpanna* would be automatically released from future births in the *apāyās* or the four lowest realms, including the animal realm.
- How that happens is described in other sections of the site, especially in the section [“Sotāpanna Stage of Nibbāna.”](#)
- Another key point the Buddha made was no “soul-like” entity moves from birth to birth. Future births occur due to causes and conditions as described in *Paṭicca Samuppāda*. See [“What Reincarnates? – Concept of a Lifestream.”](#)

- The main teachings of the Buddha are embedded in “[Paṭicca Samuppāda, Tilakkhana, Four Noble Truths.](#)”

Summary

11. Many people (especially those new to Buddhism/Buddha Dhamma) waste time by plunging headlong into reading deep *suttas*. That is like trying to learn mathematics without understanding addition/subtraction.

- One MUST first understand the “new vision” presented to the world by the Buddha; it is previously unknown to the world. It follows the same principle of causality followed by modern science. The Buddha’s version is *Paṭicca Samuppāda*. It explains in detail how future rebirths occur due to one’s mindset and actions. *Suttas* on *Paṭicca Samuppāda* start with the “[WebLink: suttacentral: Paticcasamuppāda Sutta \(SN 12.1\).](#)”
- Another key point I did not discuss above is the importance of living a moral life. It is easier to grasp the deep Dhamma with a cleansed mind with less greed, hate/anger, and ignorance (of moral values); see “[Sīla, Samādhi, Paññā to Paññā, Sīla, Samādhi.](#)” Thus, starting as a “secular Buddhist” is perfectly fine.

7.1.3.3 Where to Start on the Path?

This is a very important post. Please read the post through without clicking on any link first, in order to get the main idea that I am trying to convey. You may want to re-read the post several times, clicking on the links to find out more as you digest the key points. **Actually, this is true of all the posts: It is better to read through a given post first to get the main idea, and then to look into the details provided by the links as needed.**

- Anyone reading this website has been exposed to Buddha Dhamma in the past; by “past” I mean beginning-less time. Each of us have been “living” and “dying” innumerable times, in most of the 31 realms of existence; see, “[The Grand Unified Theory of Dhamma.](#)” Even though a Buddha appears in the world after very long times, there have been innumerable Buddhas too. Some of you may not believe this, and that is fine. It may make sense later on.

Each of us has listened to a Buddha delivering a discourse, attained the highest *jhānā*, and also been born in the animal and *niraya* (the lowest realm) too. Our character and habits may have changed from “good” to “bad” many times over. Infinite time is very hard to grasp with the mind; see, “[Samsāric Time Scale,](#)” and “[Infinity – How Big is it?](#)” Also, you may want to read the excellent book, “The Beginning of Infinity” by David Deutsch (2011) IF you are interested in a “scientific opinion”; actually, the descriptions are very similar in both cases in the sense that many things that sound implausible are not scientifically implausible, and in fact are necessary to explain the scientific data.

- As in this life, it is easy to remember relatively recent events in the *samsāric* journey. Those who can remember past lives, remember only the past one or few lives; see, “[Evidence for Rebirth.](#)” The “habits” and “tendencies” that we have are the ones that we have had in the recent rebirths.
- Therefore, for some people, it may be easier to get into a *jhāna* (or to have a good meditative experience) just because they have had that experience in more recent lives; for another person, it may be harder just because that person may not have had that experience for very many births in the recent past.

One should not be discouraged if one’s understanding of Dhamma or “meditation experience” seems to be different from what one hears from others. The important thing is to first determine where one is in the relative scale of things and start at the right place. Most times there is no correlation between this evaluation and one’s “book knowledge” either.

One could use the basic guidelines provided by the Buddha. There are five stages starting with *dana* and ending with *nekkhamma*:

- *Dana* (giving, generosity, caring for others' well being).
- *Sīla* (moral conduct).
- *Sagga* (literally heaven, but meaning calm and peaceful mind).
- *Ādeenava* (seeing the fruitlessness and the danger of the 31 realms or the rebirth process).
- *Nekkhamma* (losing attachment to “things” in the 31 realms, and working diligently towards *Nibbāna*), which in turn leads to *nissarana* (stop this suffering-filled rebirth process) and thus *Nibbāna*.

These are not clear-cut steps, but are guidelines.

1. Most people, irrespective of the religion, are generous and enjoy giving. Just like *sīla* below, *dana* induces happiness in oneself.

2. In Pāli it is *sīla* (pronounced “seela”); in Sinhala it is “*seelaya*” (“*sisil*” means cooling down and “*laya*” means heart, so cooled heart), and thus is a bit more explanatory.

- Any act that makes one's heart to cool down is an act of *sīla*, i.e., it is moral conduct.
- When we act with compassion, say give a meal to someone hungry or help out an elderly person to cross the street, it makes our heart cool down. On the other hand, when we do something immoral or inappropriate, our heart gets agitated and the heart rate goes up, and the whole body heats up; also see, [“How to Taste Nibbāna.”](#)
- It is the same compassion, extended to other living beings as well, that makes up the basis of the five precepts: avoiding any act that is harmful to any living being; see, [“The Five Precepts – What the Buddha Meant by Them.”](#)
- **The humans are at a much higher “consciousness level” compared to animals, so we need to pay special attention not to even hurt the feelings of another human being;** see, [“How to Evaluate Weights of Different Kamma.”](#) It is a good habit also to cultivate *metta* (loving kindness) to all beings; see, [“Kamma, Debt, and Meditation.”](#)

3. When one gets to the *Sagga* stage, it is relatively easy to calm the mind. One starts feeling the *nirāmisā sukha* (see, [“Three Kinds of Happiness – What is Nirāmisā Sukha?”](#)) or the happiness of “cooling down” by voluntarily “giving up” (and sharing with others) things that one used to be quite possessive of. It is very subtle. One cannot just start giving everything that one owns; that will only lead to *paṭigha* or internal friction. In addition, one has responsibilities and debts to pay; see, [“Kamma, Debt, and Meditation.”](#)

- Different people get “agitated” due to different “triggers.” This is because we have very different *sansāric* habits: things we really like and things we really dislike; there are several posts on these habits and “*āsavas*.” It is a good idea to make a self-assessment, figure out the “bad triggers” and make an effort to remove them.
- For example, if one has an “explosive temper” it is a good idea to make an effort to restraint oneself and also to do *metta bhāvanā*. It is important to realize that the anger is within oneself; it is not in an outside person or thing. I could get mad by thinking about person A, but there are many other people who have loving thoughts about the same person A. Same with greed, it is inside of us, not outside. These all originate from our *sansāric* likes and dislikes.

4. While it is hard for some to even start thinking about the “bigger picture” of the 31 realms, and the possible suffering in future rebirths, some others may have thought about this “in the recent past in the *sansāric* rebirths”, and thus may be motivated to explore more.

5. The last stage is for those who have “seen the big picture” and the dangers of staying “in this world of 31 realms”, or at least have some inkling of it. When one starts feeling the *nirāmisā sukha* strongly, and also start seeing the suffering to come in the lower realms, giving up the rebirth process becomes an urgent need, instead of being anxious about “giving up rebirth.” Again, this cannot be forced. One will feel it when one's mind is ready.

- This website has posts that could be helpful in any of the above categories. One needs to look around and find the suitable topics; **even though I have tried to put posts into different categories, there may be posts suitable for anyone in any category.**
- My intention is to add material at all different levels, mainly up to the *Sotāpanna* stage of *Nibbāna*. I hope that will help a wide spectrum of people and also illustrate that Buddha Dhamma describes the ultimate natural laws not only about our human world, but of all existence. Buddha Dhamma is not just a philosophical theory; one can actually experience the improvement in one's quality of life as one follows the Path.

September 13, 2016: I recently started a new section, "[Living Dhamma](#)" detailing a step-by-step process on how to get started on the Path. One could get started even without belief in rebirth or the existence of 31 realms. There we start by looking at the (hidden) suffering experienced in this life and how to eliminate it.

7.1.3.4 Recent Evidence for Unbroken Memory Records (HSAM)

Revised October 6, 2018; May 18, 2020; August 27, 2022

1. A normal human can remember some "significant events" even from the early days of this life. And these memories are not just a "summary," but we recall a significant event in detail. It is like playing back a videotape. We recall the scene with pictures, sounds, the background, everything. Just recall some past events, and one can verify that for oneself.

- Many cases of "memories from past lives" are reported mostly by children. But there are also accounts by some adults under hypnosis; see "[Evidence for Rebirth](#)."
- There is scientific evidence that our memory records are kept in minute detail and can be accessed at a moment's notice. Such "detailed records" are "*nāmagotta*" in Buddha Dhamma. See "[Where Are Memories Stored? – Viññāna Dhātu](#)" and "[Nāma Loka and Rupa Loka – Two Parts of Our World](#)."
- However, an average human can recall only a small fraction of past events.

2. Strong evidence is beginning to emerge that there is a "complete record" of one's past (in this life) just like a videotape. These studies started with Jill Price, who contacted a team of scientists in the early 2000s about her ability to recall anything from 1974 onwards. Here is a video of her with Diane Sawyer on an ABC News program:

[WebLink: YOUTUBE: The woman that never forgets](#)

3. Note that she says she can "see" what happened that day. It is not like she is recalling a "summary" or the gist of what happened. She can recall the whole episode in detail. Even the day and date come out effortlessly.

- A team of scientists has studied her for five years and published a paper providing their findings: [A Case of Unusual Autobiographical Remembering-Parker-2006](#)
- She has written a book about her experience: "The Woman Who Can't Forget", by Jill Price (2009).
- Jill Price's story led more people to come forward with their experiences, and ten more such individuals have been studied in detail recently: [WebLink: Behavioral and neuroanatomical investigation-LePort-2012](#).

4. These individuals have "highly superior autobiographical memory," or HSAM. According to those two papers above, they are not any smarter than average people. The ability to recall their past much more extensively is a "*puññā iddhi*" of a special *kamma vipāka* in Buddha Dhamma. They can focus on any date in the past and "watch" what happened. Then they can say what the weather was like, who they were with, whether any significant world event took place that day, etc.

- This phenomenon is also known as Hyperthymesia; see, [WebLink: WIKI: Hyperthymesia](#). Several other cases of HSAM are mentioned here.

5. Scientists believe that our memories are “stored” in the brain and synapses between neurons. I firmly believe that they will be proven wrong. This research is still in its infancy, but there has been an explosion of activity within the past 15 years.

- While it is true that synaptic wiring is responsible for habit formation (see “[How Habits are Formed and Broken – A Scientific View](#)”), it is a stretch to assume that “video-like recordings” of all past events are somehow embedded in neural connections!
- People without HSAM have false memories (or no memories) of past incidents that were insignificant to them. But their memories about significant/traumatic memories are astoundingly accurate.

6. There are a couple of key significant facts that come out of these studies on HSAM subjects:

- They can instantly access a “time slot” from many years back that is arbitrarily chosen by someone else. They “re-visit” that time slot and describe, in real-time, what took place in detail.
- Since it has been confirmed in 11 subjects, it is not a “random event.”
- It is a stretch to assume that all such details for over 20 years can be stored in biological membranes that regenerate change continuously.
- It is not a matter of being able to remember. Jill Price describes extensively that it is hard for her to remember any “learning material”; she was an average student.
- Rather, it is a matter of having a “correctly wired” brain to access the “video recorder-like” memory stream in *viññāṇa dhātu*. It is not something one can develop by studying hard.

7. In Buddha Dhamma, the life of a sentient being is not restricted to the current life. As described in the previous post (“[What Reincarnates? – Concept of a Lifestream](#)”), any given sentient being has been born an uncountable number of times, with no “traceable beginning.”

- And a record of each of those lives is kept intact in the “mind plane” and can be accessed to different degrees by different people.
- And people who develop *abhiññā* powers via *jhāna* (need to get to at least the fourth *jhāna*) can develop Jill Price’s capabilities and more; they can go back hundreds to thousands to billions of years depending on the level achieved.

8. According to Buddha Dhamma, the brain is just like a computer that helps extract these memory records from the “mind plane.” The mechanism is similar to a television extracting a broadcast signal; I will write a post on this later.

- These memory records are called “*nāmagotta*” (pronounced “*nāma goththā*”) and they go back for eons and eons, and even a Buddha cannot see a beginning; see “[Memory, Brain, Mind, Nāma Loka, Kamma Bhava, Kamma Vipāka](#).”
- We can recall only bits and pieces even during this life because our minds are covered by the five hindrances (*pañca nīvaraṇa*); see “[Key to Calming the Mind – The Five Hindrances](#).”
- Ancient *yogis* who could get to the *eighth jhāna* could see all past lives in the present eon or *kappa*. But the Buddha could see numerous eons within a short time.
- This is why it is mostly children who can remember past lives. As they grow up their minds get “contaminated” more and more, and these memories are lost. And those cases are different from the HSAM subjects.
- It appears that those individuals with HSAM have some of the capabilities of those who have developed *abhiññā* powers. Since those with HSAM have been reported to have somewhat different brain structures, it will be interesting to see whether those with *abhiññā* powers have similar brain structures as people with HSAM. I believe that it is a matter of the brain wiring to be able to “receive” more information from the “mind plane.”

9. Here is a video on the amazing accounts of a few people with memory capabilities.

Superhuman Geniuses (Extraordinary People Documentary):

[WebLink: youtube: Superhuman Geniuses \(Extraordinary People Documentary\)](#)

- More than anything else, they confirm the fact that memories are held intact in the *mano loka* or the “mind plane”; see, [“The Amazing Mind – Critical Role of Nāmagotta \(Memories\).”](#)
- The brain is the interface between the base of the mind (*hadaya vatthu*) and *mano loka*; see, [“Brain – Interface between Mind and Body.”](#) It is just that a few people’s brains can do better in recalling those memories compared to others.

7.1.3.5 Buddhism without Rebirth and Nibbāna?

Revised August 18, 2016; February 14, 2020

I participated in several internet forums on “Buddhism” over 2013 and a part of 2014. One thing that clearly stands out is the fact that there are many people who like Buddhism, but they cannot understand what the big deal is about rebirth, and they cannot comprehend what *Nibbāna* is. Thinking is: Why can’t we have Buddhism without rebirth (because I do not believe in rebirth) and *Nibbāna* (because that seems to be too complicated)?

They are turned off by the concept of rebirth and are mystified by the concept of *Nibbāna*.

- **Rebirth.** I think that the first issue lies in the fact that most major religions are based on three levels of existence: This life, and one of two eternal stages of life thereafter; committed to either heaven or hell for eternity based on what one does in this life. That model is very simple. Buddha’s 31 realms of existence with many “unseen beings” seems to be far fetched. Also, the possibility of being reborn as an animal is an abhorrent thought similar to the one people had about “evolving from the monkeys” before the theory of evolution.
- **Nibbāna.** The second issue has become a problem mainly because of *Mahāyāna* doctrines. *Mahāyāna* sect arose basically out of the philosophical analyses of *Nibbāna* by Nagarjuna, Asanga and other *Mahāyāna* forefathers. They could not understand the concept of *Nibbāna* or what happens to an *Arahant* when the *Arahant* dies. So, they came up with concepts like *suñyata* (*suññatā*) or emptiness; see, [“What is Suñyata or Suññata \(Emptiness\).”](#)

1. There are two co-existing facets of Buddha Dhamma:

- The Buddha said, “This Dhamma is unlike anything that the world has ever seen.” **It really needs a paradigm change to get into the “new perspective about this world view of the Buddha.”** One needs to be able to put aside all preconceived notions to understand the core message.
- However, the Buddha also said, “My Dhamma is good in the beginning, good in the middle, and good at the end.” **There is something to be gained from Buddha Dhamma for people who just came to know about it.** This is why I have separated posts into three categories on the site.
- In Bhikkhu Bodhi’s book, “In the Buddha’s Words”, there is a chapter on “The Happiness Visible in this Present Life”, where Buddha’s discourses to those who did not have aspiration to attain *Nibbāna* but were interested in pursuing moral lives, are described.
- The concepts such as rebirth and *Nibbāna* are paradigm-changing concepts. But as one follows what one understands, these concepts will become clear; I have summarized these two concepts below. But it will take much more effort and reading many more posts if one is really interested in understanding Buddha Dhamma.

2. For those who do not believe in rebirth, there is a simple way to get started without having to believe in the rebirth process. I strongly suggest the following post: "[Starting on the Path Even without Belief in Rebirth.](#)"
3. However, at the end — If one is to benefit fully from Buddha Dhamma — one needs to understand its core message. And that core message is that this life is only but an insignificant time in the cycle of rebirths that we have been on from eternity, and that "our world" is much more complex than we see with 31 realms instead of the two (human and animal realms) that we see. Even more significantly, the suffering in many of the lower realms of existence is much worse than that in the human or even the animal realm.
 - That is a LOT of things to accept as a basis. But we are fortunate compared to those who lived even a hundred years ago. Because now we have EVIDENCE to back up this wider world view of the Buddha; see, "[Dhamma and Science – Introduction.](#)"
 - And both major *Mahāyāna* sects as well as Theravāda Buddhism believe in rebirth and the concept of *Nibbāna*. All Buddhists (except the type of Stephen Batchelor, who has written some popular books on Buddhism) believe in rebirth and *Nibbāna*. I have seen the label "secular Buddhism" being used to describe those who like other aspects of Buddhism (basically moral living and meditation), but not necessarily rebirth and/or *Nibbāna*.
 - **Thus a Buddhist not believing in rebirth/Nibbāna is an oxymoron.** The Pāli or Sinhala word for Buddhist is "*Bhauddhayā*" meaning "a person trying to stop the rebirth process" ("*Bhava+uddha*"). One meaning of Buddha Dhamma is "path or method of removing *bhava* and thus stopping the rebirth process." Buddha means, "one who has removed *bhava* (and attained *Nibbāna*)."
 - However, There is no need to forcefully accept rebirth, which gives rise to *sansāric* suffering. **One can start at a point where one can actually experience the other type of hidden suffering in this life that most people can locate and remove:** "[Starting on the Path Even without Belief in Rebirth.](#)"
4. **Therefore, one can be a "secular Buddhist"; that could be an intermediate state before becoming a Buddhist. We just need to get the concepts clear.** Since there is no formal established way to declare oneself a "Buddhist" (or a need to do that), it is really in one's own mind whether one is a Buddhist or not. The Buddha clearly stated that each person is at his/her own level of understanding. And there is no need to pretend; what one believes is what it is. **The critical thing is to make sure one is fully informed.**
 - One does not become a Buddhist by reciting the precepts. **One becomes a Buddhist gradually as the mind embraces the world view of the Buddha and realizes that the real happiness is attained by comprehending the true nature of this world: *anicca, dukkha, anatta*, and eventually by stopping the rebirth process.**
5. **In the mean time, it is important to realize that certain wrong views are bound to have adverse consequences according to Buddha Dhamma.** Established (firm) view that there is no rebirth process is one included in *micchā diṭṭhi*, which is one of the (strong) *dasa akusala*, that makes a birth in the *apāyā* (four lowest realms of existence) possible. It is not necessary to firmly believe in rebirth, one should at least leave that as a possibility. What is critical is not to have *niyata* (established) *micchā diṭṭhi*.
 - Faith in Buddha Dhamma is different from that in other religions; belief in rebirth or *Nibbāna* are not tenets. One either believes in them or one does not; see, "[Is Buddha Dhamma \(Buddhism\) a Religion?.](#)" One MAY change one's view after looking at the facts, and especially if one can experience the release from one kind of suffering; see, "[Starting on the Path Even without Belief in Rebirth](#)"
6. Finally, it will take a real effort to sort through all different versions of "Buddhism" that are out there. Over two thousand five hundred years, just like now, people have tried to "mold" Buddha Dhamma to a form to their liking, and that is why we have so many versions. **But when that is done, the uniqueness, the real message, gets lost.** We need to keep intact this unique message, with the understanding that not everyone comprehends it right away.

- The key is to discard any version or aspect that does not provide a consistent picture. Buddha Dhamma describe the laws of nature, and there cannot be any inconsistencies. That is what I try to do with this website. If you see something inconsistent on the website, please let me know.
- I use the *Tipiṭaka* (Pāli Canon) as the basis. It was written down over two thousand years ago **(by Arahants who had experienced Nibbāna)**, and is the oldest document encompassing the three main teachings: *Suttā*, *Vinaya*, and *Abhidhamma*.
- I have documented the flaws in both *Mahāyāna* and (to a lesser extent) in current Theravāda books by pointing out the inconsistencies with the *Tipiṭaka*. Also, I show that everything is self-consistent, which is the scientific basis to illustrate the validity of a theory. Newton's theory on gravity had to be modified because they were not consistent with finer measurements.
- It does not matter what we believe personally. We need to find the true laws of nature that the Buddha discovered. **Laws of nature, like gravity or laws of motion, do not care about what we believe;** see, "[Why it is Critical to Find the Pure Buddha Dhamma.](#)"
- Buddha Dhamma (in its pure form) has withstood all tests to date; see, "[Dhamma and Science – Introduction.](#)" Both current *Mahāyāna* and Theravāda teachings need to be revised back to the original. It can be proven that there are self-contradictions within both sects in addition to contradictions with the teachings of the Buddha. I have a series of posts that point out these "problem areas" starting with, "[Key Problems with Mahāyāna Teachings.](#)"

Having established that rebirth and *Nibbāna* are the "lifeblood" of Buddha Dhamma, now we can turn to the next question: What evidence is there to "prove" rebirth? What is the big deal about *Nibbāna*, which sounds so esoteric?

A. REBIRTH

I have summarized some of the existing evidence for rebirth; see, "[Evidence for Rebirth.](#)" I am not sure what will qualify for "proof", but one thing is very clear: A strong case can be made for it. There is evidence from many different areas, and that are consistent with the Buddha's other teachings, for example, the existence of a *manomaya kāya*; see, "[Manomaya Kāya and Physical Body.](#)"

- If a person can believe even a SINGLE piece of evidence presented there, it is not possible to explain that without accepting that there is a link between such two lives. Since there is no physical connection between the two lives (that existed many miles apart), the connection must be outside the physical realm, i.e., the mental energy. There is new evidence from "quantum entanglement" that is consistent with the presumption that everything in this world is inter-connected; see, "[Quantum Entanglement – We Are All Connected.](#)"
- However, one can actually verify the rebirth process by developing *abhiññā* powers via developing the fourth *jhāna*. One can then "see" one's previous lives; see, "[Power of the Human Mind – Introduction](#)" and the follow up posts. And there are some who have developed such *abhiññā* powers, and this number can be expected to grow. When a significant number of people can verify the rebirth process, it will be accepted. Today, not everyone has traveled outside one's own country. But everyone accepts that all those countries exist, because they believe the accounts of those who have made visits.
- And recent evidence confirm that there is indeed an unbroken memory record, at least in this life; see, "[Recent Evidence for Unbroken Memory Records \(HSAM\).](#)"

B. NIBBĀNA

1. "*Bāna*" in Pāli and Sinhala means "bondage"; thus *Nibbāna* means becoming free of bondage (to this world). We are bound to the unending cycle of rebirths via ten fetters called "*sanyojana* = "san+yojana"; see, "[What is "San"? Meaning of Sansāra \(or Saṃsāra\)](#)"; *yojana* means bond. *Saṃyojana* rhymes like called *saṃyojana* and that is normally written.

- The ten *saṃyojana* are removed via the four stages of *Nibbāna*: three at the *Sotāpanna* stage, two reduced at the *Sakadāgāmi* stage and removed at the *Anāgāmi* stage, and the remaining five removed at the *Arahant* stage.
- Removal of the ten *saṃyojana* also removes greed, hate, and ignorance from our minds; the *nirāmisasukha* increases step-wise at each of the four stages, and the “cooling down” or “*nivana*” becomes complete; see, “[How to Taste Nibbāna](#).” There are many synonyms for *Nibbāna*, and *nivana* (or *niveema*) is one of them. The Sanskrit name “*nirvana*” does not convey any of these meanings.

2. When the mind becomes pure, a being is simply not reborn anywhere in the 31 realms. The mind has attained full release, and unconditioned happiness called *nirāmisasukha*. **Thus *Nibbāna* is stopping the rebirth process; the suffering stops. it is as simple as that. That mind cannot grasp even a fine form of a material body (which is subject to decay and death) anywhere in “the 31 realms.” The mind becomes free of a body that is subject to decay and death (suffering). That is *Nibbāna*.**

- The *Nibbānic* experience cannot be described by the terminology of “this world”; it is transcendental or “*lokuttara*,” beyond “this world”; see, “[Nibbāna “Exists”, but Not in This World](#).”
- Also, all we can say about what happens to an *Arahant* at his/her death is that he/she will not be reborn in “this world” of 31 realms. There is no more suffering. The mind is free of bondage to a physical body that leads to so much suffering.
- Many people say, “What suffering? I do not feel that much suffering.” But the real suffering is in the lowest four realms; that is why the complete picture of 31 realms of existence is important. Furthermore, there is much suffering that is masked, especially when one is young. As one gets old, it is inevitable that one will start experience suffering at a higher degree, and then face death. Here is a video that illustrates this point:

[WebLink: YOUTUBE: Aging Stars of the Golden Age](#)

3. However, the point is NOT to get depressed about this inevitability. Some people get depressed thinking about old age, and try to “give up” everything to follow the Path of the Buddha.

- It is not even possible for someone who is not familiar with Buddha Dhamma to start working on attaining *Arahanthood* straight away, and it is not advised either. It needs to be done with understanding. As one follows the Path, and learns Dhamma, one could start feeling early stages of *Nibbānic* pleasure (*nirāmisasukha*) and thus will start having fact-based faith on concepts like rebirth and *Nibbāna*; see, “[Three Kinds of Happiness – What is Nirāmisasukha?](#).”
- Have you seen any depressed Buddhist monks? They have given up the worldly pleasures voluntarily, NOT with the mindset of a depressed person. Depression leads to hate; true “giving up” is done with wisdom.

This is only a summary. All these are described in detail with supporting evidence at this website. The key point is that EVERYTHING we observe, all we experience CAN be explained with the complete “world view” of the Buddha of which rebirth and *Nibbāna* are essential foundations.

One does not need to know all that if all one needs is a peace of mind. One could follow the basic guidelines for a moral life that the Buddha provided. However, his key message was that this 100-year life can be only be compared to a “drop of water in a huge ocean” that is the cycle of rebirths filled with suffering. Thus one should at least critically examine the evidence to see whether that message needs to be taken seriously.

Next, “[Starting on the Path Even without Belief in Rebirth](#)”,

7.1.3.6 “Self” and “no-self”: A Simple Analysis – Do We Always Act with Avijjā?

October 23, 2015; revised August 14, 2019; July 30, 2022

I like to address two comments that I recently received. Questions such as these bring out significant issues that help clarify fundamental concepts.

First comment (by Mr. Alexander Ausweger):

Premises:

- (1) The number of rebirths of a single sentient being before now is infinite.
- (2) The probability of becoming an *Arahant* in one life-phase (from birth to death) is minuscule but not zero. (The possible probability-values range from 0 to 1 as usual in probability theory).

Conclusion: In an infinite number of rebirths, the probability of reaching *Arahantship* would be one, which means that everyone would already have left *saṃsāra*.

Conclusion: Since we are still here, one of the premises must be wrong.

Second comment (by Mr. Chamila Wickramasinghe):

“...in *akusala-mūla Paṭicca Samuppāda*, since “*avijjā anusaya*” is remaining for a person below the *Arahant* stage, is there not a single “*citta-kshana*” (or *citta*) that arises without *avijjā*? ..”

There is a perception of well-defined “self” embedded in both the above comments. That there is “a well-defined sentient being” that goes through a cycle of rebirths. Since we use names to label a person, that automatically gives the impression of a non-changing “self.” Thus it is a bit hard to remove this “sense of a self” from our minds.

- The other side of this issue is the common misconception that “*anatta*” means “no-self.” That is correct in a strict sense. However, there is a sense of a “self” until one attains *Arahanthood*. The other meaning of “*anatta*” is “being helpless” and “subject to suffering” as long as one has the perception of a “self.”
- That is why the Buddha said it is wrong to believe that there is a “self.” It is also incorrect to think that “there is no self.” That is a bit difficult to comprehend at first; **that is why the Buddha said, “My Dhamma has never been known to the world...”**. So we will discuss some examples to clarify why both these views are incorrect.

Let us first discuss the **First comment**. The answer to the second comment will become apparent during that discussion.

1. The critical issue brought out by the first comment is the first premise: By assuming that “there is a single sentient being...” we are distorting the actual reality. That says there is a “soul” or “self.” To assign an **absolute identity**, there must be something unchanging in it.

- Now, let us discuss HOW the Buddha explained that the above premise is incorrect.
- At the time of the Buddha, many believed in a “*ātma*” or a “soul” or a “self.” When asked what is a “person” is unique to give that absolute identity, some said it was one’s body (*rūpa*). Others said either one’s feelings (*vedanā*), one’s perceptions (*saññā*), one’s actions (*saṅkhāra*), one’s thoughts (*viññāṇa*), or some combinations of the above five. **However, we are not talking about**

pañcakkhandha here, i.e., not *rūpakkhanda* etc. I will write a series of posts later to clarify the difference.

- There is nothing else that can be called “one’s own.”

2. The Buddha explained in detail why none of the above remains the same in a “given person.” Let us take a simple example to understand the basic idea. Let us consider person A when entering and leaving high school.

- Did any of the five categories (*rūpa*, *vedanā*, *saññā*, *saṅkhāra*, *viññāṇa*) remain the same at those two instances of time, several years apart? Person A would have grown and will not have the same body. At the time of his leaving high school, most of his primary thoughts (*vedanā*, *saññā*, *saṅkhāra*, *viññāṇa*) are on getting a job or entering a university. Those would be very different from the time he entered high school.

3. Now we can reduce the time interval to the end of his first year at high school. All of the above arguments still hold. “He” would have changed in all five of the above characteristics that define “him.”

- We can keep reducing the time interval for that person. When we think about this carefully, we can see that even his physical body would have changed a little by the time he got to the school from home. Of course, all his “mental properties” keep changing moment-to-moment.
- To see a “significant change” over a long period, we need to look at time intervals several months apart. But when we keep narrowing down the time interval, we can see that all five characteristics of that person keep changing even moment-to-moment.
- When a person enters a room, walks to the other side, and leaves the room through the back door, is it the “same person” who left? Which of the above five characteristics would have remained the same?
- Once we start contemplating it, it is easy to see that all four of our mental characteristics keep changing moment-to-moment. It is a bit harder to “see” that our bodies change moment-to-moment, but the above argument logically extends to smaller and smaller time intervals. **That is why it is called “seeing with wisdom.”**
- Furthermore, modern science indeed shows how fast our bodies change. Every few months, most cells in our bodies get completely REPLACED. We have a “new body” every year!
- Still, this is NOT the same as saying EVERY SINGLE *suddhatthaka* (smallest material unit) in a body is re-made moment-to-moment. See, [“Does any Object \(Rūpa\) Last only 17 Thought Moments?”](#). However, at least SOME OF THE CELLS in a body of trillions of cells will change even moment-to-moment. Please re-read and understand the enormous difference. Also, see [“Human Life – A Mental Base \(Gandhabba\) and a Material Base \(Cell\).”](#)
- **This way of “seeing” with wisdom (instead of “seeing” with the eyes) is what the Buddha called “*cakkhuṃ udapādi.*” or “seeing with dhamma eye...”** Unless we do this, when we look at a person, we automatically get the perception (*saññā*) of a “non-changing self,” say John Smith.

4. We assign a name to a person and talk about, say, a “John Smith.” But we can see there was nothing common about John Smith at various points in his life. A newborn baby looks different when grown to be a young person; with more time, the older adult will appear very different.

- However, we also should not go to the other extreme and say that “there is no such person called John Smith.” How can we say that, either? We can talk to John Smith and see him actively engaging in various activities, etc. That is the other extreme of “no-soul” or “no-self.”
- That is why the Buddha rejected both “self” and “no-self” as reality.
- We need to use the terminology of a person named John Smith to be able to communicate. Even the Buddha talked about “his previous lives.” But we must remember that there is nothing to be called an “unchanging person.”

- A “person” can acquire a “new identity” within moments. We have talked about several people who attained *Arahanthood* within a few minutes. Even these days, we have heard about people who have drastically changed their character within a few months. Of course, we can gain or lose significant weight in a month and change our appearance.

5. The absolute truth (*paramattha*) is that all our mental phenomena CAN change moment-to-moment. Some of this mental activity arise due to *avijjā* and can lead to significant changes even in real-time; see, “[Idappaccayatā Paticca Samuppāda](#).”

- While using conventional terminology (*vohāra*), we need to keep in mind that the absolute reality (*paramattha*) is that the “state of existence” changes moment-to-moment.
- Our physical bodies (and any material form or a *saṅkhata*) change with time. Some change fast (a fruit fly lives a few days; thus, it goes from birth to ripe age to being dead in a few days), but others change slower (a tortoise lives about 200 years).

6. Thus “a person,” in absolute reality, CAN change for better or worse even moment-to-moment, according to *Paṭicca Samuppāda*.

- A *kusala Paṭicca Samuppāda* cycle starts with “*kusala-mūla paccayā saṅkhāra*”; see, “[Kusala-Mūla Paticca Samuppāda](#).”
- An *akusala-mūla Paṭicca Samuppāda* cycle starts with “*avijjā paccayā saṅkhāra*”; see, “[Akusala-Mūla Paticca Samuppāda](#)” and “[Idappaccayatā Paticca Samuppāda](#).”
- But most of the time, we do things that are neither *kusala* nor *akusala*.
- Thus *avijjā* is not there ALL THE TIME, even for a normal human being. *Avijjā* is triggered when a desirable/undesirable sense input tempts one.

7. Now we can address the **second comment**. Yes. The *avijjā anusaya* is there with anyone who has not attained the *Arahant* stage of *Nibbāna*. But not all thoughts (*citta*) arise due to *avijjā*, and there are many levels of *avijjā* when it appears.

- *Anusaya* means our cravings and habits (that we have acquired through *avijjā*) that lie underneath the surface, waiting for a trigger to surface.
- Thus *avijjā* itself is not something that is there all the time. An average human being acts without *avijjā* most of the time. Only when one does something with greed, dislike, or without a full understanding of the situation does one takes action with *avijjā*.
- *Avijjā* is **triggered by a sensory input** that is either pleasing or displeasing to our mind. Whether a given “trigger” will set off *avijjā* will depend on one’s *gati* (*gathi*) and *anusaya*; see, “[Āsava, Anusaya, and Gati \(Gathi\)](#),” “[Sansāric Habits, Character \(Gati\), and Cravings \(Āsava\)](#),” and “[Gati to Bhava to Jāti – Ours to Control](#).”
- Thus it is not correct to say that an average human is an entity with *avijjā*. There is no such “fixed living being,” i.e., one with “self.” **The only things associated with “a person” are his/her *gati* and *anusaya*; these keep changing too.**

8. Even when *avijjā* arises, it can occur at many levels ranging from *moha* (totally covered mind) to not knowing the Four Noble Truths. In that latter case, one may do moral acts (*puññābhi saṅkhāra*) but expect meritorious results. Here also, the *akusala-mūla* PS cycle operates but will lead to good births within the 31 realms.

- The *kusala-mūla* PS cycle operates only when one acts meritoriously without any future expectations in return, i.e., without *avijjā*. That happens when one becomes an *Ariya* or a Noble Person. An *Ariya* knows that it is unfruitful to strive for anything in this world. An *Ariya* below the *Arahant* stage may act with *avijjā* at lower levels (i.e., would not have *moha*).

- But in most cases, we disregard what we see, hear, etc. Unless one becomes interested in something, *avijjā* does not arise.
- Thus *avijjā* is something that is not there all the time for any person. The *avijjā anusaya* gets triggered by sensory input.

9. Getting back to the **first comment**, instead of saying either “a person exists” or “a person does not exist,” the Buddha said the a living being exists moment-to-moment. We cannot deny that a people exists; but there is nothing absolute about “a person.” Instead, “a person” continually changes; we conventionally call a person “John Smith,” etc.

- Another way to say the same thing is to say that “a living being” exists in a given state until the cause (and conditions) that give rise to that existence exist. Once root causes are changed, that existence will change to a new one. For example, if a human starts doing things that animals usually do, then that person will likely get an animal birth after death.

10. We can get more insight into **both comments** by considering what happens when one attains *Arahanthood*.

- **One attains the *Arahanthood* when one loses *avijjā anusaya***; see the links in #7. When that happens, *avijjā* will not get triggered by ANY sense input. There is no “*upādāna*” for any likes/dislikes. Thus at death, there is no “*sama uppada*” (birth of similar characteristics) corresponding to “*paṭicca*” (whatever one willingly attaches to).
- But the *kammic* energy that fueled the present life is still there. So, just a rock thrown by someone will stay up until the energy given to it is exhausted, and the *Arahant* will live until the *kammic* energy for his/her life is exhausted. Still, he/she will not be tempted by any sensory input, since there is no *āsava/anusaya* left.
- An *Arahant* will experience all sense inputs just like any other human being but will not generate any likes/dislikes. And since he/she is likely to have many *kamma vipāka* left, he/she could also experience pains and aches or even worse. The Buddha himself suffered from some ailments, and Ven. Mahā Moggallāna was beaten to death.
- It is the FUTURE SUFFERING that is removed at the *Arahant* stage. Since there is no rebirth, there is no future suffering. The mind is forever released from the material body that CAN AND WILL impart suffering to those who remain in the *samsāra*, the cycle of rebirths.

7.1.4.1 Kilesa – Relationship to Akusala, Kusala, and Puñña Kamma

August 27, 2022 (revised #7 later)

Note: The current post replaces an old post “Kusala and Akusala Kamma, Puñña and Pāpa Kamma.”

Kilesa means defilements hidden in the mind. They can be expressed in terms of *anusaya*, *saṃyojana*, *āsava*, or *asobhana cetasika*.

Pāli Word Analysis (*Pada Nirutti*)

1. We can get an idea of various terms by looking at the Pāli roots of those words. Knowing how Pāli terms originated (“*pada nirutti*”) provides insight.

- **Kusala** comes from “*ku*” + “*sala*,” where “*ku*” refers to “*kunu*” or *kilesa* or evils, and “*sala*” means “to get rid of.”
- **Akusala** is the opposite of *kusala*. It will accumulate *kilesa* or evils. See “[Ten Immoral Actions \(Dasa Akusala\)](#).”
- **Kamma** is an action with *kammic* consequences.
- **Kiriya** is an action without *kammic* consequences. For example, brushing teeth is a *kiriya*.

What Are *Kilesa* (Defilements)?

2. This is a crucial term hardly discussed. These defilements are not “stored” anywhere. They are not in the brain. They are associated with the *hadaya vatthu* (seat of the mind.) Those defilements (*kilesa*) can be represented differently; for example, by ten types of *saṃyojana* or seven types of *anusaya*.

- “[WebLink: suttacentral: Yoganaddha Sutta \(AN 4.170\)](#)” states that removing all types of *anusaya* and *saṃyojana* leads to *Nibbāna*.
- A *Sotāpanna* would have removed two types of *anusaya* and three *saṃyojana*. As a *Sotāpanna* progresses on the Noble Path, defilements diminish at each higher stage. Thus, an *Arahant* is free of all *kilesa*.
- Also, see “[Conditions for the Four Stages of Nibbāna](#).”

Kilesa – Strengthened by *Akusala Kamma* and Eliminated by *Kusala Kamma*

3. We can see that **akusala kamma** strengthens one’s defilements. An **akusala kamma** will create *kammic* energy that feeds hidden defilements (*anusaya/saṃyojana*) and sustains the rebirth process.

- A *kusala kamma* will help reduce AND remove *anusaya/saṃyojana*. Thus, *kusala kamma* will cleanse a mind and will lead to *Nibbāna*.

Pāpa Kamma and *Kusala Kamma*

4. A **pāpa kamma** is a worse form of **akusala kamma** that will lead to rebirth in the *apāyās*. **Pāpa** in Pāli and Sinhala means “evil” or “sinful” actions that are obvious: Killing of a human or routine killing of animals, raping, and *niyata micchā diṭṭhi* are some examples of *pāpa kammā*.

- A *puñña kamma* is the opposite of *pāpa kamma* and will lead to rebirth in the “good realms” at or above the human realm. The word “**puñña**” is related to joy. The Sinhala word “*pina*” (පීන) is associated with “*pinaveema*” (පිනවීම) or “making one’s heart joyful.” Therefore, a **puñña kamma** is an action that makes one’s heart filled with joy.

- The critical point is that while a *kusala kamma* will help reduce AND remove *anusaya/saṃyojana*, a *puñña kamma* can only reduce them but NOT remove those defilements. That is the difference between *kusala kamma* and *puñña kamma* we discuss now.

Difference Between *Puñña Kammā* and *Kusala Kamma*

5. There is a critical difference between *puñña kamma* and *kusala kamma*.

- A *puñña kamma* is a meritorious/good action that CAN lead to rebirth in the higher realms. But it DOES NOT lead to *Nibbāna*. Therefore, *puññābhisaṅkhāra* associated with a *puñña kamma* contribute to the “*avijjā paccayā saṅkhāra*” step in *Akusala-mūla Paṭicca Samuppāda*. As we know, *Akusala-mūla* PS leads to rebirths in good and bad realms.
- The goal of a Buddhist is to attain *Nibbāna* and stop the rebirth process. That requires the *Kusala-mūla* PS process, which starts with “*kusala-mūla paccayā saṅkhāra*.” Thus, *avijjā* in the *Akusala-mūla* PS is replaced by “*kusala-mūla*” in *Kusala-mūla* PS. One can do *kusala kamma* only by engaging in *Kusala-mūla* PS.
- Therefore, to switch from *avijjā* to “*kusala-mūla*” requires dispelling *avijjā* by comprehending the dangers of the rebirth process, as explained in the First Noble Truth/*Paṭicca Samuppāda/Tilakkhaṇa*.
- Average humans fear *Nibbāna* because they do not see the dangers of remaining in the rebirth process. See “[Basic Framework of Buddha Dhamma](#).”

Puñña kamma Can Become *Kusala kamma*

6. When one starts comprehending the dangers of rebirth, some *puñña kamma* will automatically become *kusala kamma*. The difference is one's understanding of the true nature of this world. Let us take an example to illustrate this point.

- Offering food to *bhikkhus* is a *puñña kamma* for an average human. Even though one may not specifically wish for a “good *kamma vipāka*” in terms of future wealth or a good rebirth, such an expectation is there even without knowing it. That is part of the *anusaya/saṃyojana*.
- When one starts seeing the dangers of remaining in the rebirth process at the *Sotāpanna* stage, that leads to the removal of *diṭṭhi anusaya* (together with three *saṃyojana* of *sakkāya diṭṭhi*, *vicikicchā*, and *sīlabbata parāmāsa*.) Thus, the above *puñña kamma* may become a *kusala kamma* for that person; it will help remove the remaining defilements (*anusaya/saṃyojana*.)
- Since most people may not be certain about whether they have attained the *Sotāpanna Anugāmi* stage (or higher), it is best to cultivate “good *kamma*.” They will “branch out” to *puñña kamma* or *kusala kamma* based on their comprehension of the Four Noble Truths/*Paṭicca Samuppāda/Tilakkhaṇa*.
- When one gets to the *Arahant* stage, there are no more *anusaya/saṃyojana* to remove, i.e., an *Arahant* does not do either *puñña kamma* or *kusala kamma*. All “good deeds” by an *Arahant* are *kiriya* without *kammic* consequences.

Average Humans Engage Only in *Puñña Kamma*, *Akusala Kamma*, *Pāpa Kamma*

7. Until a Buddha is born, no one would have a clear idea about (i) the rebirth process, (ii) that most rebirths are in the *apāyās*, and (iii) how to stop that rebirth process. Other *yogis* or religions teach about the rebirth process, but no one but a Buddha can teach how to stop the rebirth process by cleansing the mind.

- Most religions teach how to live a moral life. They teach how to engage in *puñña kamma*. But even those who try their best are tempted by sensory pleasures and spontaneously engage in *pāpa kamma*.

- Only by understanding the Four Noble Truths and following the Noble Eightfold Path can one automatically stop such temptations. and engage in *kusala kamma*.
- Both *pāpa kamma* and *puñña kamma* fall into the category of *akusala kamma* that maintain the rebirth process with the *Akusala-mūla Paṭicca Samuppāda* starting with “*avijjā paccayā (abhi) saṅkhāra.*” Those *abhisāṅkhāra* include *puññābhisaṅkhāra* involved in *puñña kamma*. See “[Saṅkhāra – Many Meanings.](#)” It is critical to understand various types of *abhisāṅkhāra*.

8. Therefore, living a moral life (and engaging in *puñña kamma*) is not enough to stop future suffering in the rebirth process.

- That is stated clearly in the “[WebLink: suttacentral: Sabhiya Sutta \(KN Snp 3.6\):](#)”

<i>Kosāni viceyya kevalāni,</i>	“Having investigated all possibilities of rebirth,
<i>Dibban mānusa kañca</i>	Heavenly, human, even the Brahma-realms,
<i>brahmakosaṃ;</i>	One is truly freed only when free of all of them,
<i>Sabbakosamūlabandhanā</i>	That requires cultivating “ <i>kusala.</i> ”
<i>pamutto,</i>	
<i>Kusalo tādī pavuccate</i>	
<i>tathattā.”</i>	

Engaging in *Kusala Kamma* Starts at the *Sotāpanna Anugāmi* Stage

9. No one is even aware of *kusala kamma* until comprehending the Four Noble Truths/*Paṭicca Samuppāda*/*Tilakkhaṇa*.

- Many try to evade suffering by engaging in moral deeds, cultivating *jhāna*, etc. Those can lead to temporary relief when born in the good realms. But until the rebirth process is stopped (at *Parinibbāna*), suffering does not stop.
- The “[WebLink: suttacentral: Anusaya Sutta \(SN 18.21\)](#)” states the key to attaining *Nibbāna* is to realize that nothing in the five aggregates (*rūpa, vedanā, saññā, saṅkhāra, viññāṇa*) can be considered to be “mine.” That is the same as getting rid of *sakkāya diṭṭhi*. See “[Sakkāya Diṭṭhi – Wrong View of “Me” and “Mine.”](#)”
- The Buddha defined *Nibbāna* as “*rāgakkhayo dosakkhayo mohakkhayo—idaṃ vuccati nibbānaṃ*” *tī*” OR “the ending of greed, hate, and delusion/ignorance “—is called *Nibbāna.*” See, for example, “[WebLink: suttacentral: Nibbānapaṇhā Sutta \(SN 38.1\).](#)”
- Thus, the result of the step-by-step removal of the ten *samyojana*/seven types of *anusaya*, etc., is equivalent to the elimination of *rāga, dosa*, and *moha*.

Summary

10. *Akusala kammā* cultivate defilements; *pāpa kammā* are the strongest kind of *akusala* that lead to rebirth in the *apāyās*.

- *Puñña kammā* are the opposites of *pāpa kammā* and lead to rebirths in the “good realms” at or above the human realm.
- *Kusala kamma* leading *Nibbāna* can be done only by those on the **Noble Eightfold Path**.
- Starting on the **Noble Eightfold Path** requires comprehension of “[Paṭicca Samuppāda, Tilakkhaṇa, Four Noble Truths.](#)”
- An *Arahant* does only *kiriya* (actions without *kammic* consequences.)

11. Defilements (*kilesa*) in mind can be described in different ways: *anusaya* and *samyojana* are two good “indicators.”

- Those who have not yet reached the *Sotāpanna Anugāmi* stage have *kilesa* in various strengths. Their strengths keep changing but are never eliminated until starting on the Noble Eightfold Path at the *Sotāpanna Anugāmi* stage. All defilements are absent only in *Arahant*'s mind.
- Living beings spend most of their *saṃsāric* journey in the *apāyās*. Even when a “good birth” takes place, it has a finite lifetime, and after that, rebirth in an *apāya* is inevitable unless one gets to the *Sotāpanna Anugāmi* stage.
- Thus, the only way to stop future suffering is to comprehend the Four Noble Truths/*Paṭicca Samuppāda/Tilakkhaṇa* and start on the Noble Eightfold Path. See “[Paṭicca Samuppāda, Tilakkhaṇa, Four Noble Truths.](#)”

12. More information on *kilesa* (in terms of *cetasika*) at “[What Are Kilesa \(Mental Impurities\)? – Connection to Cetasika](#)” and “[Cetasika – Connection to Gati.](#)”

- Further details on different types of *kamma* in “[Six Root Causes – Loka Samudaya \(Arising of Suffering\) and Loka Nirodhaya \(Nibbāna\).](#)”

7.1.4.2 Ten Immoral Actions (Dasa Akusala)

Revised October 6, 2016; November 24, 2017; March 9, 2020; December 12, 2020; July 20, 2022

Dasa Akusala Connected to *Saṅkhāra*

1. One can do immoral acts with the body, speech, and mind (leading to *kāya*, *vacī*, and *mano saṅkhāra*); see, “[Saṅkhāra, Kamma, Kamma Bīja, Kamma Vipāka.](#)” *Mano saṅkhāra* arise first automatically, according to one's *gati* and the specific *ārammaṇa*. Then some of them lead to *vacī* and *kāya saṅkhāra*, and that is when they become *abhisāṅkhāra* (strong *kamma*.) Thus the way to reduce all bad *saṅkhāra* is to get control over bad *vacī* and *kāya saṅkhāra*. See “[Correct Meaning of Vacī Saṅkhāra.](#)”

As we know “[Paṭicca Samuppāda](#)” processes leading to suffering start with “*avijjā paccayā saṅkhāra.*” This means we do *dasa akusala* because we generate *saṅkhāra* due to *avijjā* (not fully comprehending the Four Noble Truths.)

These are ten immoral acts (*dasa akusala*). They divide into three categories, as follows:

Three *mano saṅkhāra* (immoral acts done with the mind):

1. *Abhijjā* [*Abhijjhā*] (covetousness; greed for other's belongings)
2. *Vyāpāda* (ill-will, hatred)
3. *Micchā Diṭṭhi* (wrong views)

Four *vacī saṅkhāra* (immoral acts done with speech):

4. *Musāvāda* (Lying)
5. *Pisunāvācā* (slandering)
6. *Parusāvācā* [*Pharusāvācā*] (harsh speech)
7. *Sampappalāpa* (frivolous talk)

Three *kāya saṅkhāra* (immoral acts done with the body):

8. *Pāṇātipātā* (killing)
9. *Adinnādāna* (taking what is not given)

10. *Kāmesu micchācāra* (not just sexual misconduct, but also excessive of sensory pleasures)

Dasa Akusala Expand to Forty

2. In Buddha Dhamma (i.e., in nature,) it is always one's intention that matters. Based on that, each *dasa akusala* expands to 40. For example, it is not only stealing by oneself that matters. Also, getting someone else to steal, helping another's act, and praising such action by another are included.

- In another example, regarding *micchā diṭṭhi*, the following also count. Propagating *micchā diṭṭhi* to others, encouraging another to cultivate *micchā diṭṭhi* (say, for instance, that the rebirth process is not valid,) or praising such practices.
- That is how ten *dasa akusala* expand to forty.
- There are ten *suttā* in the *Kammapathavagga* of the *Aṅguttara Nikāya* that lists those “four divisions” for each of the *dasa akusala*, AN 4.264 through AN 4.273. English translations of those start with: “[WebLink: suttacentral: 264. Killing Living Creatures](#).” You can click the “next” arrow at the bottom of the webpage to get to all ten *suttā*.
- As one starts avoiding more and more of these forty actions, one will start feeling the early stages of *Nibbāna* or “*nivana*,” i.e., cooling down of the mind. The constant stress and excited-ness of the mind will gradually ease. Also, see “[Root of All Suffering – Ten Immoral Actions](#).”

A Sotāpanna Is Free of Only Micchā Diṭṭhi

3. First of all, it is essential to realize that only *Arahant* is free from doing any of these. Even a *Sotāpanna* may commit some of these at least once in a while. There are six things that a *Sotāpanna* is incapable of: killing a mother or father, killing an *Arahant*, injuring a Buddha, knowingly causing a schism in *Saṅgha*, and having *micchā diṭṭhi* or **wrong views**.

- Thus, anyone below the *Sotāpanna* stage could break *dasa akusala*. Even a *Sotāpanna* has **completely removed only *micchā diṭṭhi***. A *Sotāpanna* would not WILLINGLY commit any of the *dasa akusala*, but some COULD happen, except for those six mentioned above; see, “[Key to Sotāpanna Stage – Diṭṭhi and Vicikicchā](#).”
- It is essential to realize that one needs to AVOID them if possible. It becomes easier as one learns Dhamma to see the benefits of avoiding them.
- However, a *Sotāpanna* has reduced *lobha* (extreme greed, especially for other's belongings) and *dosa* (hate) to reduced levels of *rāga* (craving for sense pleasures) and *paṭigha* (friction or tendency to get upset or angry); see “[Lobha, Dosa, Moha versus Rāga, Patigha, Avijjā](#).”

Two Categories of Micchā Diṭṭhi

4. The first category is the ten types of *micchā diṭṭhi* (wrong views) discussed in #5 below.

- The deeper level of *micchā diṭṭhi* is not comprehending the essential characteristics of “this world” of 31 realms; see “[The Grand Unified Theory of Dhamma](#)” and “[Wrong Views \(Micchā Diṭṭhi\) – A Simpler Analysis](#).”
- Because of the ignorance of the complete world view, one is likely to have the following three main wrong world views. (i) Everything has sprung without a cause (*ahetuka diṭṭhi*). (ii) Good and bad produce no effect (*akiriya diṭṭhi*). (iii) There is no afterlife (*natthika diṭṭhi*).
- A common form of *micchā diṭṭhi* is to assume that if one obeys the five precepts, then one will be exempt from birth in the *apāyā*. That belief itself can lead to the birth in the *apāyā*; see “[The Five Precepts – What the Buddha Meant by Them](#).”

5. If one has such wrong worldviews, one is likely to commit immoral acts. They will have *kamma vipāka* leading to rebirth in the *apāyā* (the lowest four realms,) i.e., in future rebirths. **There are ten such specific wrong views or *micchā diṭṭhi* (sometimes just called *diṭṭhi*):**

- (1) No *kammic* benefits in giving, (2) no need to pay back debts (for what others have done for you), (3) no benefits of respecting Noble Ones and also *yogis* with *abhiññā* powers, (4) *kamma* do not have *vipāka*, no *kammic* benefits of taking care of (5) mother and (6) father, (7) this world does not exist (“*natthi ayam loko*”), (8) *Paralowa* does not exist (“*natthi paro loko*”), (9) there are no *opapātika* birth (instant full-formed birth), (10) there are no Noble Ones and *yogis* exist who can see past lives. [WebLink: [suttacentral: AN 3.117. Vipattisampadāsutta - Distress and Attainment Sutta](#) ‘(1) *natthi dinnam*, (2) *natthi yiṭṭham*, (3) *natthi hutam*, (4) *natthi sukata dukkaṭānam*, *kammānam phalam vipāko*, (7) *natthi ayam loko*, (8) *natthi paro loko*, (5) *natthi mātā*, (6) *natthi pitā*, (9) *natthi sattā opapātikā*, (10) *natthi loke samaṇabrāhmaṇā sammaggatā sammāpaṭipannā ye imaṇca lokam paraṇca lokam sayam abhiññā sacchikatvā pavedentī*]
- For explanations on (7)-(10), see “[Micchā Diṭṭhi, Gandhabba, and Sotāpanna Stage](#).”
- In particular, *para loka* is where a *gandhabba* lives in-between consecutive births with a physical human bodies; see “[Hidden World of the Gandhabba: Netherworld \(Para loka\)](#).”

Niyata Micchā Diṭṭhi

6. What is *akusala* is to hold “*niyata micchā diṭṭhi*” or “established wrong views,” i.e., one is not even prepared to consider, say, that there is a rebirth process. Thus, if one has **unwavering** doubts about any of the ten categories in the above paragraph, one has **established** wrong views (*niyata micchā diṭṭhi*). Such wrong views can lead to actions with *kamma vipāka* responsible for births in the *apāyā*.

- The critical point is that when one has established wrong views, one looks at the world differently without realizing that there are consequences for one's actions. One would not be aware of that without a Buddha explaining the world's true nature. That includes the validity of the rebirth process, life in other realms, an uncountable number of planetary systems like the Earth, etc.
- As scientists are finding out, there are many things in nature that we do not experience/understand. For example, scientists can only account for 4% of the mass of the universe; they cannot account for the rest (Google “dark matter” or “dark energy”). Thus one needs to keep an open mind and learn more Dhamma to see whether all these make sense.

7. The only *akusala* completely removed by a *Sotāpanna* is the *micchā diṭṭhi*; see, “[What is the only Akusala Removed by a Sotāpanna?](#).”

- As explained there, an unimaginably huge amount of defilements is removed at the *Sotāpanna* stage, just via getting rid of *micchā diṭṭhi*, mainly through the comprehension of *anicca*, *dukkha*, and *anatta*.

Only a Buddha Knows All About This World

8. A lot of you may be thinking “How do I know all this is true? Is there any evidence for the existence of *rūpa/arūpa lokā*, *apāyā* (hell), or spontaneous birth?”

- There are many things we do not know about “this world.” We cannot rely on just science to verify/confirm these. Only within the last 100 years or so has science has accepted that our world is bigger than a few galaxies (now science has confirmed that there are billions of galaxies). Whereas the Buddha stated that *cakkavāla* (star systems or planetary systems) come into existence all the time, science has confirmed that only within the past 100 years; see, “[Dhamma and Science – Introduction](#).”
- Furthermore, the newest findings (yet unconfirmed) in string theory indicate that we live in an 11-dimension world, not the 4-dimension world that we experience. For a look at different dimensions, see, “[Consciousness Dependence on Number of Dimensions](#).” Thus, more of Buddha's teachings will be confirmed with time.

9. It is easy to see that all immoral deeds start with *mano saṅkhāra* (bad thoughts) in mind. Any of the *vacī saṅkhāra* (speech) or *kāya saṅkhāra* (bodily actions) are done with greed, hate, or not knowing the true nature of the world (ignorance). In particular, the basis for moral behavior comes from the correct worldview. Let us examine this below:

- The fact that there is no discernible beginning to conscious life (see “[Samsāric Time Scale, Buddhist Cosmology, and the Big Bang Theory](#)”) means all of us have been going through this rebirth process for an unimaginably long time. Thus we have been born in most of the 31 realms of existence. Not only that, we have been born innumerable times in EACH of those realms (except those reserved for the *Anāgāmīs*).
- The above fact means each sentient being had been related to any other sentient being at some point in this long *samsāra* (or *saṃsāra*, rebirth process). **The Buddha said, “it is difficult to find ANY sentient being that was not your father, mother, or a sibling at some point in this long *samsāra*.”** Infinity is a hard concept to grasp; see “[Infinity – How Big Is It?](#).”
- An interesting book that talks about such hard to grasp ideas (in science) involving infinity is, “The Beginning of Infinity: Explanations That Transform the World” by David Deutsch.
- Therefore, humans and ALL sentient beings are connected/related. This is why it is wrong to kill any living being, steal from anyone, verbally abuse anyone, etc. **Those are the foundations of morality.** This is WHY it is not good to do any of the ten immoral acts.

The Intention is An Important Factor

10. The Buddha said, “*Cetanāham, bhikkhave, kammaṃ vadāmi,*” i.e., “*Bhikkhus, I say that kamma is the intention involved.*” We always need to look at the intention to pinpoint whether or what kind of *kamma* was committed.

- For example, if someone shoots a dog attacking a child, one’s intention here is to save the child. On the other hand, if someone is shooting a dog for “target practice,” there is no excuse. The life of a human is million-fold more precious than an animal’s; see “[How to Evaluate Weights of Different Kamma.](#)”
- Sometimes it is impossible to judge the *kammic* consequences just by looking at the particular act. Only the person committing the act will know whether it is a good or bad intention. Thus normally it is not wise to judge other people’s actions.
- If it is a *mano saṅkhāra* (bad thoughts), the only person who even knows about that is the one who is committing it.

11. In many cases, it is possible for others to “see” when one is committing *vacī* or *kāya saṅkhāra*. But not always. Disciplinary actions against a child by a parent may appear to be *kāya saṅkhāra* (spanking) or *vacī saṅkhāra* (verbal threats), but the parent is likely to have good intentions for the child in most cases.

Also, in many cases, no person can advise another on what to do when conflicting issues are involved. Is it OK to steal some food to feed one’s kids when they are crying in hunger? Is it OK to spank a child when the child is misbehaving? Only the parent can make that decision based on the circumstances.

Also see, “[Details of Kamma – Intention, Who Is Affected, Kamma Patha.](#)” This post was updated on February 21, 2018, and provides a simple two-step process to evaluate a given situation.

Relative Weights of *Kamma*

12. One critical problem many people have is trying hard to avoid actions with relatively small *kammic* consequences while unknowingly doing things with stronger *kammic* consequences. Let us take an example: Suppose we have a large tank of water that is losing water due to many holes at the bottom. Some holes are pinholes, some are a little larger, and a few holes are big and lose

water fast. One would want to plug those large holes first. Then one would fix the medium-size holes. The smallest or the pin holes are the last to be fixed.

- The relative weights of ten immoral acts are not easy to quantify. However, we can see that *kāya saṅkhāra* have higher “*kammic* potential” compared to *vacī saṅkhāra* if they are directed to the same living being; hurting someone physically is worse than verbal abuse.
- Another example: Say someone has hateful thoughts about a particular person all day. That could be worse than just saying something to that person and “getting the load off the mind.” However, even that is not necessary. The best solution is to develop *mettā* (loving-kindness) towards that person and eliminate those hateful thoughts. We always must realize that we all are trapped in this constant struggle to find happiness in a world that is not set up to provide lasting happiness; see, “[Anicca, Dukkha, Anatta - Wrong Interpretations](#).”

13. *Kammic* consequences also depend strongly on the “consciousness level” of the living being against whom the immoral act was committed.

- Killing a human will have far stronger consequences compared to killing an animal. This is discussed in the essay, “[How to Evaluate Weights of Different Kamma](#).”

14. *Dasa akusala* and relative weights of different *kamma* are discussed in the following *desanā*:

[WebLink: Download “Ten Immoral Actions \(Dasa Akusala\)”](#)

- This *desana* is in the post, “[Root of All Suffering – Ten Immoral Actions](#),” where you can find the relevant posts mentioned.

7.1.4.3 Puñña Kamma – Dāna, Sīla, Bhāvanā

Revised March 24, 2016; September 14, 2017; major revision with title change April 27, 2018; edited February 14, 2021; December 21, 2021; May 27, 2022; August 27, 2022

1. Here we discuss the ten types of *puñña kamma* (doing meritorious deeds). These are in three groups: *dāna*, *sīla*, and *bhāvanā*.

- Those are essential for progress in one’s mundane eightfold path.
- One must cultivate the mundane path and remove the ten types of *micchā diṭṭhi* before being able to comprehend the *Tilakkhaṇa* and start on the Noble Eightfold Path; see “[Buddha Dhamma – In a Chart](#).”

2. A previous post discussed the differences between *kusala/akusala kamma* and *puñña/pāpa kamma* : “[Kilesa – Relationship To Akusala, Kusala, And Puñña Kamma](#).”

- For details on the ten types of *akusala kamma*, see “[Ten Immoral Actions \(Dasa Akusala\)](#).”
- **The ten types of *kusala kamma* are just the avoidance of *akusala kamma*.**

3. As discussed in the above two posts, *kusala kammā* (getting rid of *rāga*, *dosa*, and *moha*) eventually leads to *Nibbāna*. However, *puñña kamma* (meritorious actions) help set the background to attain *Nibbāna* and are thus critically important.

- One needs to do both. However, the ability to do *kusala kammā* is vastly improved when one starts comprehending *Tilakkhaṇa*; see, “[Anicca, Dukkha, Anatta](#).”
- *Puñña kammā* lead to rebirths in “good realms.” Furthermore, one will be born with long life, good health, comfort, and wealth (*āyu*, *vaṇṇa*, *sukha*, *bala*) to be able to comprehend *Tilakkhaṇa* and pursue *Nibbāna* with ease. The following Dhammapada verse emphasizes that:

“*Abhivādanasīlissa,
niccaṃ vuddhāpacāyino;
Cattāro dhammā vaḍḍhanti,
āyu vaṇṇo sukhaṃ balaṃ.*”

- *Āyu*, *vaṇṇa*, *sukha*, and *bala* mean the **length of life**, **health**, **happiness**, and **strength**. [*vaṇṇa* : [m.] colour; appearance; colour of the skin; sort; caste; a letter; quality.]

These ten meritorious actions (*puñña kamma*) are divided into three groups: *dāna* (generosity), *sīla* (moral behavior), and *bhāvanā* (meditation).

Puñña Kamma – Dāna, Sīla, Bhāvanā

4. The ten types of *puñña kammā* are:

1. ***Dāna* (giving)**
2. **Transfer of merits to others (*pattidāna*)**
3. **Rejoicing (accepting or participating) in other’s merits (*pattānumodanā*)**
4. ***Sīla* (morality), i.e., observing 5, 8, or 10 precepts**
5. **Reverence to elders and holy persons (*apacayana*)**
6. **Pay homage to religious places, take care of such places, etc (*veyyāvacca*)**
7. **Meditation (*bhāvanā*)**
8. **Listening to Dhamma discourses (*Dhamma savana*)**
9. **Teaching Dhamma (*Dhamma desana*)**
10. **Correcting one’s wrong views, especially on *kamma* (*diṭṭhijukamma*)**

- The first three belong to the ***Dāna* (Generosity) group**, the next three belong to the ***Sīla* (morality) group** and the last four to the ***Bhāvanā* (Meditation) group**.
- On the last one, see, “[What is Kamma? – Is Everything Determined by Kamma?](#).”

5. Therefore, *dāna*, *sīla*, and *bhāvanā* constitute the “base” of a life of a moral person.

- “*Dāna* group” helps one overcome one’s greed (*lobha*).
- “*Sīla* group” helps to remove hate (*dosa*) from one’s mind.
- “*Bhāvanā* group” helps to remove ignorance (*moha*) from the mind by learning Dhamma and getting rid of the wrong views (*micchā diṭṭhi*).

6. Since *Nibbāna* is removing greed, hate, and ignorance from one’s mind, it is clear how these ten actions pave the way for *Nibbāna*. As one engages in these activities more and more, one can experience the “cooling down” or “*niveema*”; see “[How to Taste Nibbāna](#).”

- In the *sīla* group of activities, one starts by observing the five precepts, i.e., abstaining from killing living beings intentionally, stealing, sexual misconduct, lying, and getting intoxicated. This last one usually involves intoxication with alcohol or drugs, but it also includes money, beauty, power, position, etc.

7. It is always a good idea to keep in mind why these are moral actions: Because they help purify one’s mind:

- To avoid breaking the five precepts, most people abstain from drinking but do not hesitate to show off their wealth, beauty, power, etc.; they are “drunk” too.
- Others pay a lot of attention not to lying, but do not hesitate to gossip, slander, or verbally abuse others.

- Also, one should realize that human life has much more weight than animal life; see “[How to Evaluate Weights of Different Kamma](#).”
- Most of all, the tenth is the most potent one that most people neglect to consider. Having established wrong views (*niyata micchā diṭṭhi*) can lead to frequent immoral actions. Thus, one needs to understand this clearly; see “[Ten Immoral Actions \(Dasa Akusala\)](#).”

8. This is why learning Dhamma is prominent in the *bhāvanā* section. As one keeps learning deeper concepts of Dhamma, wrong views will gradually fade. It is not enough to say, “I will not have these views anymore,” even though making such a determination is good. The mind needs to see evidence to get rid of the wrong views. When one starts on the Path, the feeling of the *nirāmisa sukha* will make it easier to remove wrong views; see, “[Three Kinds of Happiness – What is Nirāmisa Sukha?](#).”

The High Value of *Puñña Kamma* Done with Understanding

9. If one performs a wholesome deed with the knowledge of *kamma* and its effects and *anicca*, *dukkha*, and *anatta*, then the wholesome roots will be associated with understanding. Then one's actions will be based on all three wholesome roots: non-greed, non-hate, and non-delusion. So three-root (*tīhetuka* or “*tī*” + “*hetu*”) wholesome *kamma* is acquired.

- On the other hand, performing a wholesome deed without knowing the laws of *kammā* will dilute its effects on future outcomes (*vipāka*.) Then one's intention will not have wisdom or *paññā* (true non-delusion) but only the two roots of non-greed and non-hate. So two-root (*dvīhetuka* = “*dvī*” + “*hetu*”) *kamma* is acquired. These are less meritorious compared to the three-root (*tīhetuka*) *kamma*.

10. A detailed discussion can be found in “[A Simple Way to Enhance Merits \(Kusala\) and Avoid Demerits \(Akusala\)](#).” We will discuss these effects in detail in the Abhidhamma section too.

- But it is essential to realize that the strength of the *kamma vipāka* for a given meritorious act will vary depending on the level of understanding. For example, just writing a check to charity will have some results. But more substantial results will materialize if it was done with a good understanding of the laws of *kamma*.

11. To engage in this superior *kamma*, one should consider the moral action in advance. After the deed, one should reflect on it and contemplate it. Furthermore, one can gain more merits by doing a *puñña anumodana* or *pattidāna* (transfer of merits to others, #2 *kusala kamma* above) because this amounts to paying off *sansāric* debts; see, “[Kamma, Debt, and Meditation](#).”

- On the other hand, if one feels lazy, reluctant, jealous, or stingy before a moral action such as giving charity and regrets doing the moral action afterward, then the moral volition of giving to charity will be surrounded by other unwholesome intentions (*cetanā*). Consequently, its results will be weaker. The wholesome *kamma* acquired, in this case, is inferior.

Thus the importance of learning Dhamma in grasping such details and realizing the full benefits of one's meritorious actions. It is interesting to see how all these details “fit into the big picture”; see “[The Importance of Purifying the Mind](#).”

Next, “[The Five Precepts – What the Buddha Meant by Them](#)”, ...

7.1.4.4 Details of Kamma – Intention, Who Is Affected, Kamma Patha

July 24, 2022

We discuss several factors that determine the strength of a *kamma*, including intention, who is affected, and how a *kamma* becomes a *kamma patha*.

Cetanā in *Kamma* Is Different from *Cetanā Cetasika*

1. In the “[WebLink: suttacentral: Nibbedhika Sutta \(AN 6.63\)](#)” (toward the end), the Buddha said, “*cetanāhaṃ, bhikkhave, kammaṃ vadāmi.*” Thus, what determines the type of *kammā* is the *cetanā* or the “intention.”

- Did the Buddha refer to the *cetanā cetasika* in the above verse? No, because the *cetanā cetasika* is in EVERY *citta*. I introduced *cetasika* in “[Cetasika \(Mental Factors\)](#)” and have discussed some aspects of them in the “Citta and Cetasika” section.
- It is not necessary to review those posts. The point here is that the *cetanā cetasika* is in ANY *citta*, including *vipāka citta*. Therefore, not all *citta* arise with an “intention of getting something done.”
- For example, *vipāka citta* only brings in an *ārammaṇa*. In such cases, we see, hear, taste, smell, touch something, or recall a past event. **There is no “intention” of doing something with such *vipāka cittās*.**

Intention Leads to *Kamma* Generation

2. We can see the following from that key verse in #1 above. *Cetanā*, in that verse, is connected to the *kamma* generation!

- The meaning becomes more apparent with the following verse in the *sutta*: “*Cetayitvā kammaṃ karoti —kāyena vācāya manasā,*” meaning “**After making an intention, one takes action (*kamma*)—by way of body, speech, and mind.**”
- Thus, one acts with intention ONLY AFTER an *ārammaṇa* comes to the mind first. One decides how to respond to a sensory input that just came in as a *kamma vipāka*. The intention depends on the type of action one chooses to take.
- For example, upon seeing an enemy, one may decide to say something harsh to that person.

3. Note that we are not talking about neutral actions like walking to the kitchen to get a glass of water. In Buddha Dhamma, the discussions are about how we do *puñña/kusala kamma* or *apuñña/akusala kamma* that can lead to good or bad *vipāka* in the future.

- Thus, the “intention” involves *puñña/kusala kamma* or *apuñña/akusala kamma*. Based on that, we can see that the critical point is whether “good *cetasika*,” like compassion, or “bad *cetasika*,” like greed or anger, arises in the mind.
- *Cetanā cetasika* combines the cumulative effect of many *cetasika* that come into play. **“The “intention” comes from the types of *cetasika* “incorporated by the *cetanā cetasika*” based on one’s *gati*.”**

Connection to *Gati*/Anusaya

4. The “intention” in committing an *akusala kammā* is one of the *dasa akusala*. That intention arises BECAUSE OF one’s *gati*. A particular set of *cetasika* will arise automatically according to one’s *gati* (pronounced “gathi.”) Of course, *gati* is closely related to one’s *anusaya*.

- When committing an *akusala kammā*, a set of four universal *cetasika* always comes into play. Those are *moha* (ignorance), *Ahiraika* (shamelessness), *Anottapa* (fearlessness in the wrong), and *uddhacca* (restlessness or agitation.)
- Other “*akusala cetasika*,” like *lobha*, *diṭṭhi*, *vicikicchā*, etc., may also be present depending on the situation and the person committing the act; see “[Cetasika – Connection to Gati](#).” **For example, one may lie about something because of greed (*lobha*); another person may tell the same lie because of hate (*dosa*.)** The consequences are worse for the latter.

- When committing an *akusala/apuñña kamma*, the intention is to do one (or more) of the *dasa akusala*. Thus *cetanā cetasika* is not the “intention.” The “intention” depends on how the *cetanā cetasika* incorporates one’s *gati/anusaya* when it “prepares” a *citta* in response to *ārammaṇa*.
- *Kusala/puñña kammā* work the same way. Here the “intention” is to commit one or more *kusala/puñña kammā*, and here a set of moral (or *sobhana*) *cetasika* come into play.

5. From #4, it may appear that we don’t have control over the response to an *ārammaṇa*. But #4 only describes the initial “automatic response” to an *ārammaṇa* with *mano saṅkhāra*.

- However, we can change that automatic response when we start generating *vacī* and *kāya saṅkhāra*. If we are mindful, we can catch ourselves starting to engage in a bad *kamma* and stop it. See “[Correct Meaning of Vacī Saṅkhāra](#).”
- Suppose we instead keep generating bad *vacī* and *kāya saṅkhāra* (by going along with bad *gati/anusaya*). In that case, we will strengthen that bad *kamma* by strengthening our expectation, i.e., “*kamma viññāṇa*” that arose based on that *ārammaṇa*.

Connection to *Kamma Viññāṇa* and Rebirth

6. In the “[WebLink: suttacentral: Cetanā Sutta \(SN 12.38\)](#),” we get further clarification on how this “intention” relates to our “future expectations” that manifest as “*kamma viññāṇa*.”

“*Yañca, bhikkhave, ceteti yañca pakappeti yañca anuseti, ārammaṇametam hoti viññāṇassa ṭhitiyā. Ārammaṇe sati patitṭhā viññāṇassa hoti.*”

Tasmim patitṭhite viññāṇe virūlḥe āyatim punabbhavābhiniḥbatti hoti.”

Translated:

“*Bhikkhus*, what you intend or plan, and **what you have underlying tendencies (*anusaya*) for**, become a support for the *kamma viññāṇa*.

When one focuses on an *ārammaṇa* (with an expectation/intention), *kamma viññāṇa* becomes established.

When that *viññāṇa* is established and grows, that can bring **rebirth into a new state of existence in the future.**”

- That is what I mentioned in #1 above. For an intention/expectation to arise, an *ārammaṇa* must first bring in sensory input. For greedy anticipation for a particular food to occur, one must either taste that food or the memory of consuming that food must come to mind first.
- Then we start thinking, speaking, and acting about how to get more of it to eat. The more we do, the more that “*kamma viññāṇa*” will grow (“*saṅkhāra paccaya viññāṇa*” in *Paṭicca Samuppāda*.)
- Growing the “*kamma viññāṇa*” is the same as “growing the strength of the *kamma*.” Such *saṅkhāra* are *abhisāṅkhāra*!
- **That is how we accumulate *kamma* with intention (*cetanā*.)**

Strength of *Kamma*

7. There are two key factors to be remembered in evaluating how to assess the relative strength of a *kamma*:

- (i) **Which of the *dasa akusala* is the intention?** For example, it could be taking a life, stealing, or harsh speech. As we see, the relative strengths decrease in that order. Who is affected is not involved in this step. The “*cetanā*” in “*cetanāhaṃ, bhikkhave, kammaṃ vadāmi*”, is just which *dasa akusala* is in one’s mind.

- (ii) Then the **strength of the *kammā vipāka* will also depend on the “level of consciousness” or “status” of the living beings affected** by that *kammā*. For example, killing a human will bring stronger *kamma vipāka* than killing an animal.

Some Examples

8. In the case of a person killing a bunch of people with a bomb, his intention (*cetanā*) is to kill. Thus the *dasa akusala* involved is “*pāṇātipātā*,” that of taking a life.

- Now to the second step. He may not even know who got killed. By some coincidence, if the bomb killed a parent of the killer, then he would have done an *ānantariya pāpa kammā*. If an *Arahant* died, the same. If a *Sotāpanna* died, it would not be a *ānantariya kammā* but still be equivalent to killing thousands of ordinary humans.
- So, it is essential to understand that “*cetanā*” is which of *dasa akusala* are in one’s mind while committing a *kammā*. It could be more than one. In the case of the bomber, there is *micchā diṭṭhi* and likely greed also, in addition to “*pāṇātipātā*.”
- One can analyze various situations with the two steps in #7 above.

9. Let us consider some prominent examples from the *Tipiṭaka*.

- Ascetic Siddhartha had to endure such hardships for six years to attain the Buddhahood because he had said some insulting things regarding the Buddha Kassapa in his previous life. At that time, Siddhartha was a wealthy person named Jotipala and had a friend called Gatikara who listened to *desanas* from Buddha Kassapa and became an *Anāgāmi*. Gatikara tried to persuade Jotipala to go and listen to Buddha Kassapa, but Jotipala kept refusing, saying, “I do not want to go and listen to the bald monk.”
- That *kamma* forced ascetic Siddhartha to undergo such hardships before attaining the Buddhahood. That is a clear example that one DOES NOT NEED TO KNOW that one is insulting a Buddha to accumulate the corresponding *kamma vipāka*.
- Eleven more such *kamma vipāka* brought adverse effects to the Buddha Gotama even after attaining the Buddhahood. Three of those were for bad *kammā* committed against *Pacceka Buddhas*. It is especially not possible to recognize a *Pacceka Buddha* as such because they appear during times when a *Sammā Sambuddha* (like Buddha Gotama) is not present, and they cannot teach Dhamma to others.
- Therefore, NOT KNOWING the status of the person (to whom the wrongful act was directed) is not an excuse. These are not rules made up by the Buddha, and the Buddha himself was not immune from those laws. *Kammic* laws are Nature’s laws, just like laws of gravity; a Buddha just discovers them.
- *Kamma/kamma vipāka* is a complex subject. Let us consider one more aspect of a “completed *kamma*” or “*kamma patha*.”

Kamma and Kamma Patha

10. A given *akusala kamma* takes **four stages** to be “completed.”

- For example, in the case of taking a life, the following are the four steps:
 - (i) one must think that it is alive,
 - (ii) one must have the intention to kill that being,
 - (iii) making a plan
 - (iv) executing the plan to kill
 - (v) the living being ends up dead.
- Upon completing all five steps, that *kamma* becomes a “*kamma* with maximum strength” or a ***kamma patha***.

- As the number of completed steps keeps increasing, the severity of the *vipāka* will increase. **When all are complete, a *kamma* becomes a *kammā patha*, and the *kammā vipāka* will be the strongest possible.**
- When we walk on grass, we may unintentionally kill many small insects. But since the “intention” is not there, none of the five factors will come to play. If someone hits a toy snake intending to kill, only the last factor will not be fulfilled.

11. Let us consider another example of the four steps that constitute a *kamma patha* involving lying/deceiving (*musāvāda*.)

- (i) there must be a person(s) to be deceived,
- (ii) one must have the intention to deceive that person(s),
- (iii) makes plans
- (iv) carries out the deception,
- (v) that person (and possibly others not even intended) suffer due to that deception.
- I have been trying to find a *Tipiṭaka* reference for these “five factors.” Please comment in the discussion forum if you know.
- If all factors are completed, the “*kammic* energy” will be optimized, and it becomes a “*janaka kamma*,” possibly leading to rebirth in a bad realm. If only some factors are completed, such a *kamma* can bring *vipāka* during a lifetime.

Dasa Akusala Expand to Forty

12. In Buddha Dhamma, it is always one's intention that matters. **Based on that, each *dasa akusala* expands to 40.** For example, the following four are inclusive in *pāṇātipātā*:

- (i) Taking life by oneself
- (ii) Getting someone else to kill
- (iii) Helping another to kill
- (iv) Praising a killing by another
- There are ten *suttā* in the *Kammaṣaṭṭhapaṭṭhaṃ* of the *Aṅguttara Nikāya* that lists those “four divisions” for each of the *dasa akusala*, AN 4.264 through AN 4.273. The first *sutta* is “[WebLink: suttacentral: Killing Living Creatures \(AN 4.264\)](#).” You can click the “next” arrow at the bottom of the webpage to get to all ten *suttā*.
- In another example, regarding *micchā diṭṭhi*, the following also count. Propagating *micchā diṭṭhi* to others, encouraging another to cultivate *micchā diṭṭhi* (say, for instance, that the rebirth process is not valid), or praising such practices.
- That is how ten *dasa akusala* expand to forty.
- As one starts avoiding more and more of these forty actions, one will start feeling the early stages of *Nibbāna* or “*nivana*,” i.e., cooling down the mind.

Complexity of Life

13. Buddha has taught us how to understand why different living beings are born that way and why people are born with wide-ranging health, wealth, beauty, etc.

- One time a *Brahmin* asked about how that happens. The Buddha's description is in the “[WebLink: suttacentral: Cūlakammavibhaṅga Sutta \(MN 135.\)](#).”
- Also, see “[Complexity of Life and the Way to Seek ‘Good Rebirths’](#).”

7.1.4.5 The Five Precepts – What the Buddha Meant by Them

Revised December 23, 2020

1. The five or eight precepts, of course with different meanings, were there before the Buddha. It is said that on the day the future Buddha, Prince Siddhartha (Siddhārtha in Sanskrit), was born, his mother had observed the eight precepts.

- Ancient kings banned the so-called five immoral acts in order to maintain a peaceful society. These were: killing (of probably other people), stealing, sexual misbehavior, lying, and getting intoxicated.
- The *vedic Brahmins* expanded these to include the killing of animals. They also expanded to eight precepts which enabled them to attain mundane *jhānā*.
- By the way, except those referring to the God, the Ten Commandments in Christianity also identify many of these “immoral acts.”

2. Just like he did with many existing terminologies at that time (*kamma*, the four great elements of *paṭhavī, āpo, tejo, vāyo*, etc.), **the Buddha adopted these precepts, but re-defined what he meant by them.** (In fact, those concepts originated with Buddha Kassapa, who lived a long time before Buddha Gotama. The true meanings of many concepts were lost by the time of Buddha Gotama.)

- In Buddha Dhamma, all possible immoral acts are included in the *dasa akusala*; see [“Ten Immoral Actions \(Dasa Akusala\).”](#)
- Therefore, all those are in the five precepts too. When one truly understands Buddha Dhamma, i.e., the nature of this world as embodied in *anicca, dukkha*, and *anatta*, one sees that these precepts come out naturally from the nature’s laws. At that stage, one’s mind automatically rejects all *dasa akusala*, and thus the five precepts are automatically obeyed; one does not even have to think about them.

3. **For one embarking on the Path prescribed by the Buddha, the conventional five precepts (killing other beings intentionally, stealing, sexual misconduct, lying, and intoxication) are a good start.**

- Furthermore, one needs to recite the five precepts, understanding that it is not a promise, but one’s intends to do the utmost (otherwise, the act will itself be a *musāvāda* or a lie). **This is because anyone other than an *Arahant* is bound to break some of them per their true meanings.**
- But as one proceeds on the Path and experiences the benefits (peace of mind or the early stages of *nirāmisa sukha*), one should try to expand the scope of those five precepts from the conventional meanings. This can be done systematically: when one truly understands the meanings of *anicca, dukkha, anatta*, AND that our existence does not end with this life, one begins to have a deeper insight.
- **When that happens, the precepts are not followed as a ritual or a set of rules. Rather, one realizes that there is no other moral way to live.**

4. For example, when one realizes that one has been an animal or worse in previous lives, one stops thinking of animals as “mere things” that exist for our pleasure. Furthermore, understanding the laws of *kamma*, i.e., taking any life has consequences will make one re-think of just wantonly taking another life.

- But some people go to extremes. They start treating animal life on the same level as human life and then freak out when they have to clear a spider web in cleaning their house. Inevitably, we will unintentionally kill many small creatures while walking on the ground or even boiling some water. So, one need to get a sense of the relative weights of *kamma*; see, [“How to Evaluate Weights of Different Kamma?”](#)
- What needs to be avoided first is those “pleasure killings” like fishing, hunting, etc.

5. Stealing is not merely acted like shop lifting, but also includes gains by immoral means. To live a functional society, we have to do transactions with each other. We need to make sure we do not take advantage of another person and becoming “morally indebted” to that person.

- *Vinaya* rules (“*vi*” + “*naya*” where “*naya*” is debt and *Vinaya* is becoming free debts) in Buddha Dhamma setup for the monks show how to live their lives by properly paying back for the sustenance they get from the laypeople.
- When the Buddha said to test any act or concept with “*Dhamma* and *Vinaya*,” he meant that the concept needs to be consistent with Paṭicca Samuppāda (cause and effect) and also consistent with “*rāga vinaya*, *dosa vinaya*, and *moha vinaya*,” i.e., not getting into debt via greed, hate, and ignorance.
- If we gain from someone by unjust means, we will have to pay that debt if not in this life, but in future lives; see, “[Kamma, Debt, and Meditation](#).”

6. The third precept, “*kāmesu micchācārā veramaṇī sikkhāpadaṃ samādiyāmi*,” is commonly translated as “avoiding sexual misconduct.” But “*kāma*” is not just sexual activity. “*Kāma*” includes all sense pleasures that are available in the *kāma loka*. And “*micchācārā*” (pronounced “*michchāchārā*”) means “misbehavior” in the sense of “going to extremes.” Thus the real meaning is not to over-indulge in sense pleasures.

- In fact, excessive drinking, gambling, etc., are included in this precept.
- We have to use all our five physical senses to live in this world. But we need to have restraints to not abuse them to the extent that we will hurt ourselves or others. Even a simple example of over-eating leads to health problems, which will hurt not only oneself but the whole family.
- **The first three precepts include all three *akusala kamma* done with the body.**

7. The fourth precept on *musāvāda* (lying) in Buddha Dhamma includes all abuses done in my speech, including harsh speech, slandering, and gossip which WILL harm oneself and others.

- **Thus the fourth precept encompasses all four *akusala kamma* done with speech.**

8. The fifth is a big one that is almost always misinterpreted. If it included just drinking, it would have been, “*surāmeraya veramaṇī*.....” That was probably the original verse.

But in Buddha Dhamma it is, “*surāmeraya majjapamā daṭṭhānā veramaṇī sikkhāpadaṃ*.....”

In the word, “*surā*”, “*rā*” means “*rāga*” or excess greed. Thus “*surā*” means with excess greed; “*meraya*” is delicious. “*Majja*” means intoxication and “*majjapamā*” is getting delayed via intoxication, and “*daṭṭhānā*” means that mindset. Of course, “*veramaṇī sikkhāpadaṃ samādiyāmi*” means “I decide to avoid doing such things willingly.”

Thus it should be interpreted as, “avoid the mindset of getting intoxicated by alcohol, drugs, money, power, etc.,” anything that can make you “fall behind”:

- All this happens in one’s mind. **One gets intoxicated with greedy thoughts, and when one does not get one’s way with them, one generates hate.** And all this happens because one does not understand the true nature of this world, i.e., one has *micchā diṭṭhi* or wrong views.
- To put it another way, one should be careful not to get intoxicated by the five sense inputs or “*kāma assāda*”; see, “[What is “Kāma”? It is not Just Sex](#).”
- One believes that either, (i) one’s actions will not have future consequences, and (ii) therefore, one needs to think about how to get what one wants (because there are so many tempting things out there to be had!); one does not realize all that is temporary.
- **Thus in order to really obey the fifth precept, one needs to start working on one’s mind. All three *akusala kamma* done with the mind are included in this fifth precept; see, “[Ten Immoral Actions \(Dasa Akusala\)](#).”**

9. The following scenario is given as an example to illustrate the futility of blindly following precepts. Many people live their entire lives without intentionally killing, stealing, engaging in sexual misconduct, lying, or

getting intoxicated. But their minds are burdened with greed, hate, or ignorance. Depending on the state of their minds, they may not even get a human birth next time around.

- There is this story about an older woman who followed those conventional five precepts to the letter. Even though she was poor, she was greedy and kept all her money under her pillow. She was reborn as a louse (plural lice) on that pillow, because of her attachment to that money in the pillow.
- And if keeping those precepts will take one to *Nibbāna*, then a cow or a horse living in isolation will be certain to attain *Nibbāna*. They do not kill, steal, lie, or get intoxicated, and if their owners do not have any other animal of that kind, then there is no chance of sexually misbehaving either.
- It is all about purifying one's mind. A pure mind gains wisdom, and will not allow any harmful action by speech or by deed. Such a mind is not burdened, but has “cooled down”; that is the happiness of *Nibbāna*.

10. **The path to *Nibbāna* starts with the mundane Eightfold Path with *sīla, samādhi, paññā* in that order.** Then, one will comprehend the Noble Truths/*Tilakkhana/ Paṭicca Samuppāda* and become a *Sotāpanna Anugāmi*. That is when one starts on the *lokuttara* or Noble Eightfold Path with *lokuttara Sammā Dīṭṭhi*. **Now the sequence shifts to *paññā, sīla, samādhi* with wisdom (*paññā*) in front.** See, “[Sīla, Samādhi, Pannā to Pannā, Sīla, Samādhi](#).”

- A key step in completing the mundane Eightfold Path is to get rid of the wrong views (*micchā dīṭṭhi*), as explained in that post. Another is to understand that *kamma* is not deterministic.
- A brahmin by the name of Nigaṇṭhanātaputta in the days of the Buddha was preaching that everything happens due to *kamma*. He advised his followers to refrain from breaking the five precepts because, INEVITABLY such deeds lead to the birth in the *apāyā*. He also preached that if someone did not break even a single precept, that person would NOT be born in the *apāyā* in the next birth.
- The Buddha said that both were wrong. We have done both good and bad *kamma* in our previous lives, and the next birth will be determined by the relative strengths of those and what we do in this life. For example, Āṅgulimāla, who killed nearly 1000 people, attained the *Arahantship* in a week. And Buddha gave examples of those who lived a perfectly moral life, but were born in the *apāyā*, because they had bad *kamma vipāka* from previous lives. For details, see, “[WebLink: suttacentral: Mahā Kammavibhaṅga Sutta \(MN 136\)](#).”
- Furthermore, the Buddha said that if someone dies with such misconceptions, that is *micchā dīṭṭhi*, and one WILL BE born in the *apāyā* just BECAUSE OF that *micchā dīṭṭhi*. It is critically important to figure out this point. I meet many people (even Buddhists) who say, “I have not done anything bad to anyone; therefore, I do not think anything bad will happen to me.” That is a *micchā dīṭṭhi*. The only way to guarantee that one will be exempt from birth in the *apāyā* is to attain the *Sotāpanna* stage of *Nibbāna*.

Next, “[What is Kamma? – Is Everything Determined by Kamma?](#)”,

7.1.4.6 What is Kamma? – Is Everything Determined by Kamma?

Revised January 28, 2020; June 7, 2022 (#2)

Things Happen Due to Causes and Conditions

1. A key concept in Buddha Dhamma is cause and effect. Nothing happens without a cause or a reason.
 - But even if root causes are there, we can stop them from bringing their results by blocking the **CONDITIONS** for them to come to fruition (a seed has the potential to bring about a tree, but for that to happen the seed must be given a fertile soil, water, and sunlight).
 - That is explained with simple terms in, “[Working of Kammā – Critical Role of Conditions](#).”

- That is why in *Paṭicca Samuppāda*, “*paccayā*” does NOT mean “it will happen”; see, “[What Does “Paccayā” Mean in Paṭicca Samuppāda?](#).”

Nature's Laws – *Dhamma Niyāma*

2. Nature enforces this cause and effect via *niyāma dhamma* (*dharmmaniyāmatā* or *dhammatā*.) It comes from *niyama* (meaning “fixed.”)

- Some Commentaries describe “five types of *niyāma dhamma*”: *kamma niyama*, *citta niyama*, *utu niyama*, *bīja* (or *bija*), and *dhamma niyama*. **However, I have not found any such description in the *Tipiṭaka*.**

- **Everything happens according to *Paṭicca Samuppāda*.** The “[WebLink: suttacentral: Paccaya Sutta \(SN \(12.20\)\)](#)” explains the word *dharmmaniyāmatā*:

“*Katamo ca, bhikkhave, paṭiccasamuppādo? Jātipaccayā, bhikkhave, jarāmaraṇaṃ. Uppādā vā tathāgatānaṃ anuppādā vā tathāgatānaṃ, tithāva sā dhātu dhammatṭhitatā dharmmaniyāmatā idappaccayatā.*”

- There is a discourse by Waharaka Thero which addresses this issue about the “five *dhammatā*“. For the benefit of those who can understand the Sinhala language here is the link: “[WebLink: waharaka.com: කරුණ, නිශ්චය බලවේ](#)”

3. First of all, there are actions by individuals that lead to harmful consequences right away. If one jumps from a tall building, one is bound to get hurt or worse. That is a result of ***dhamma niyāma*** (law of gravitation is a *dhamma niyāma*,) which is cause and effect. *Paṭicca Samuppāda* is the ultimate *dhamma niyāma*. It explains **how and under what conditions** *kamma vipāka* produces results.

- When something appears in this world, it does not stay the same. It changes in unexpected ways (*vipariṇāma*) and is eventually destroyed. Thus anything in the world (a *saṅkhata* [*sankata* in Sinhala]) is subjected to the ***utu niyāma***. Whatever results that *kamma vipāka* may bring in, they will also eventually go away.
- ***Bīja* (or *bija*) *niyāma*** is not relevant to the workings of the plant seeds, as some books explain. It dictates how *kamma bīja* (seeds) lead to their fruits (*vipāka*). A “*puṇṇa kamma seed*” or a “good seed” will always produce excellent results, and a “*pāpa kamma seed*” or a “bad seed” will generate a bad result. A *Sotāpanna* would have made all those *kamma* seeds, that make it possible to have rebirths in the *apāyā*, to be ineffective. Thus a *Sotāpanna* will NEVER be born in the *apāyā*.
- ***Citta niyama*** involves laws associated with the working of the complex mind, and that can affect *kamma vipāka* in a significant way. For example, by purifying the mind, one can attain the *Sotāpanna* stage and thus make INEFFECTIVE all those *kamma* seeds that could lead to birth in the *apāyā*.
- ***Kamma vipāka*** are the root causes for all that happens in this world, **but their effects can be altered and even stopped** by exploiting the other laws of nature. That is what a Buddha discovers when he attains Enlightenment. All *kamma vipāka* are made ineffective at reaching full *Nibbāna* or the *Arahanthood*.

The main point here is that most bad consequences can be avoided by understanding Dhamma, living a moral life, and being mindful (*yoniso manasikāra*).

We Have Done Many Good and Bad *Kamma* in Our Past Lives

4. In this beginning-less long journey of rebirths called *saṃsāra* (or *saṃsāra*,) each of us has done an uncountable number of both good and bad things. When we do a good or an immoral act, the *kammic* energy associated with that act gives rise to a seed, called a *kamma* seed. It is energy (not a material thing) that stays with our minds until it gets a chance to come to fruition. An apple seed will not germinate and grow into an apple tree until the right conditions (soil, water, sunlight, etc.) appear. In the same

way, all our *kamma* seeds lie in waiting for the right conditions to appear. If we allow such “conditions,” we will have to experience the result of that *kamma* or *kamma vipāka* at that time.

- Our *kamma* seeds (*kamma bīja*) are subjected to the *bīja niyāma* mentioned above. In either case, a seed gives rise to a plant or a *vipāka* **according to the type of seed**. Someone, who did something terrible that only an animal would do, will pay for that may be with a birth in the animal realm; someone who did an act of generosity may get rewarded accordingly.

Conditions Must be Right to Bring *Vipāka* of Past *Kamma*

5. We can keep an apple seed (for example) in a dry, cool place for a long time. Some seeds have been kept intact for thousands of years. It will not germinate until we plant it in fertile soil and provide water and sunlight. In the same way, a *kamma* seed (good or bad) can lay dormant for a long time until conditions become right for it to germinate. We all have accumulated numerous *kamma* seeds over these repeated rebirths. **What we need to do is to provide conditions for good *kamma* seeds to germinate and NOT allow conditions for bad ones to germinate.**

- Thus *kamma* is the act, AND *kamma vipāka* is the result of that act. **But since the right conditions need to appear for a *kamma* seed to “germinate,” the *vipāka* may not come until later in the same life, next life, or even many lives later.**
- That is why it is not easy for people to see that their actions will have consequences. *Kamma niyāma* is not the only law that is in effect; there are four more as mentioned above, and they all work together. It is a very intricate network. In particular, because there is a *citta niyāma* (principle of thoughts), we also have some control over *kamma vipāka*. **We cannot change any of the five *niyāma*, but we can OVERCOME a cause (a power) due to a *niyāma* by building an opposing force.**

Being Aware of the Conditions Is Key

6. We can take many steps to suppress the bad *kamma vipāka* coming to fruition and ALSO to get good *kamma vipāka* to come to fruition. **As emphasized above, we all have an unlimited number of both good and bad *kamma vipāka* waiting to bear fruit. Rather than giving in to bad *vipāka* and saying “what to do, this is my *kamma*,” we can find ways to suppress those. And rather than saying, “I must not have done any good *kamma*, and this is my fate,” we can probe and locate those hidden good *kamma* seeds and cultivate them.** Let us consider some examples:

- If one does not take care of one’s physical body, it may become fertile ground for many bad *kamma vipāka* to come to fruition. If we eat healthily and exercise, the body will not be vulnerable to ailments or injuries.
- The brain needs good food and exercise too. A healthy body and mind exercises such as solving problems, even word puzzles, keep the brain in good condition. But the best is meditation, and *vipassanā* or insight meditation is better than Samatha meditation. For example, even if one’s family has a history of Alzheimer’s disease, one can avoid getting by keeping the brain active and healthy.

Outcome Can be Changed – Environment And Associations Are Critical

7. One may be born into poverty because of a past *kamma vipāka* that came to fruition at the death of the previous life. But this is NOT a reason to give up. Any person has an unlimited number of good *kamma vipāka* waiting to come to fruition. Indeed, birth to a poor family did not set up optimum conditions. But one has control over the *citta niyāma* mentioned at the beginning (see, “[The Law of Attraction, Habits, Character \(Gati\), and Cravings \(Āsavas\)](#)”). One could use one’s mind to overcome this condition and cultivate the background to achieve success.

- That is why the environment is critical to anyone. One needs to surround oneself with optimistic, moral people, who will help cultivate the good qualities that lie dormant. At the same time, one needs to avoid

“bad company” that could pull one in the wrong direction. It is not that any person is intrinsically good or bad. Rather, at any given phase of life or even through most of this life, some people may be displaying their “bad habits” that have come to the forefront. One will be affected negatively by associating with such people.

- The environment is CRITICAL for young children starting from the time of conception. Even the fetus in the womb is affected by the environment. For example, a loving mother and father showing affection to each other positively affect the baby. When the mother is being abused by the father it will be a negative effect.
- It is critical to have a nurturing environment within the family, and also in the school. A significant part of an individual's character is molded by the first 10-15 years of life. That is the time they can acquire habits and once established, it will take a lot of effort to change them. The parents must instill good habits: moral behavior, eating well, exercising, associating with good friends, avoiding bad friends, studying well, etc.

“Wearing Out” Some *Kamma* Seeds

8. It is also possible to remove many of one's bad *kamma* seeds.

- When we acquire a “bad *kamma* seed,” we get indebted to another being. In the same way that one can be debt-free by paying off existing loans, one can “payback” old debts accumulated in the cycle of rebirths. That can be done by “transferring merits” when one does good deeds, and also by doing the *Ariya Mettā Bhāvanā*. See, [“Transfer of Merits \(Pattidana\)- How Does That Happen?”](#) and [“5. Ariya Mettā Bhāvanā \(Loving Kindness Meditation\).”](#)

Laws of *Kamma* Are Complex

9. The world is VERY complicated. Because all those five *niyama* are acting simultaneously to enforce the “cause and effect,” it is not possible to sort through each event in isolation and say, “this is THE reason for this particular event.” There could be a dominant cause in some cases, but most times, it is a combination of several, and most of those are from the past.

- The main thing we have to remember is that each action by us will have consequences (law of *kamma*). There is nowhere to hide. Even if we can fool law enforcement sometimes, nature cannot be fooled.
- We need to make a concerted effort to get rid of bad habits and acquire and cultivate good habits. A habit can snowball into a *saṃsāric* habit, good or bad (related to the law of *citta* and law of *bīja*). The environment is an essential factor in getting rid of bad habits and acquiring/cultivating good habits.
- We need to be constantly aware that there are zillions of *kamma bīja* (good and bad) waiting to germinate. We should not provide conditions for “bad seeds” to grow. Thus we should avoid bad company, bad environment, etc. We must also provide conditions for “good seeds” to germinate (i.e., study well, provide the necessary requirements to get a promotion or a job, and learn and practice Dhamma). I am sure you can apply these principles to your own life; each one is different.
- Then some things happen due to random events: floods, hurricanes, earthquakes, etc. These come under *utu niyama* or circumstances that occur due to physical causes in the environment. When those happen, thousands of apparently “unconnected” people may be affected the same way. Again, this is partly due to the incredible number of *kamma* we have accumulated in this beginning-less rebirth process. There is ALWAYS something from the deep past that is going to MATCH any circumstance.

Nibbāna Attained via Removing *Upādāna* (and *Taṇhā*)

10. Finally, there is a misconception out there that one needs to get rid of all *kamma* (more accurately *kamma vipāka*) to attain *Nibbāna*. That is entirely false. One reaches *Nibbāna* via removing deep-seated cravings, called *āsavā*; see, [“The Way to Nibbāna – Removal of Āsavas.”](#) More details at [“Difference Between Taṇhā and Upādāna.”](#)

- Another way to say the same thing is to say one needs to remove *lobha*, *dosa*, and *moha* or the defilements in mind.
- However, one could remove most of one's bad *kamma vipāka* via cultivating *Ariya Mettā Bhāvanā*; see, #8 above.

Some of the main concepts are discussed further in the “[Saṅkhāra, Kamma, Kamma Bīja, Kamma Vipāka](#),” “[Habits and Goals](#),” “[Samsāric Habits and Āsavas](#),” “[The Way to Nibbāna – Removal of Āsavas](#),” and other related posts.

Next, “[Ten Immoral Actions \(Dasa Akusala\)](#)”,

7.1.4.7 How to Evaluate Weights of Different Kamma

Revised February 21, 2018

In the previous essay, “[Ten Immoral Acts \(Dasa Akusala\)](#),” we looked at the ten different types of acts that will have bad *kammic* consequences.

1. First of all, the most potent of all is *micchā diṭṭhi*. **The only *akusala* completely removed by a *Sotāpanna* is the *micchā diṭṭhi* and in doing that he/she removes an unimaginably huge amount of defilements;** see, “[What is the only Akusala Removed by a Sotāpanna?](#).”

- One critical problem many people have is that they try hard to avoid actions with relatively small *kammic* consequences, while unknowingly doing things that have stronger *kammic* consequences. Let us take an example: Suppose we have a large tank of water which is losing water due to many holes at the bottom. Some holes are pin holes, some are a little larger, and there are a few holes that are big and losing water fast. Obviously, one would want to plug those large holes first. Then one would fix the medium-size holes and those pin holes are the last to be fixed.

2. We can see that many *akusala* are with “acts” that are directed towards other beings, whether it is done bodily, verbally, or just by thought. In principle, a being could be in any one of the 31 realms (see, “[The Grand Unified Theory of Dhamma](#)”).

3. **The severity of the consequence of any misdeed (ie., *kamma vipāka*) involving another living being depends strongly on the “level of existence” of the living being from lowest level of realm 1 (*niraya*) to the highest at the 31st realm (fourth arūpa loka); Any “*Ariya*” or a Noble Person (who has attained one of the four stages of *Nibbāna*), are at the highest levels regardless of the realm. A hurtful word against an *Ariya* carries thousand-fold bad *kamma vipāka* compared to killing thousand ants.**

- See, “[Details of Kamma – Intention, Who Is Affected, Kamma Patha](#).” This post has been updated on February 21, 2018, and provides a simple two-step process to evaluate a given situation.

4. It is difficult to identify whether a given human is just an immoral human or an *Arahant* by just looking at that person. Human realm is unique in many ways.

Thus, we can try to sort out the *kammic* consequences of a given immoral act on the “level of consciousness” of the being that act was directed to:

- **Regardless of the realm**, the highest four levels are *Arahant*, *Anāgāmī*, *Sakadāgāmī*, and *Sotāpanna*. Humans can attain all four levels.
- Out of the 31 realms we can directly experience only the human and animal realms. Thus, normally we need only to evaluate how our actions affect other humans AND animals.
- Since any animal is inferior to any human, we need to pay special attention to how we interact with other human beings.

- In particular, it is not possible to judge whether a given human has attained a *Nibbānic* state. Even by directing hurtful words to an *Ariya* (one who has attained at least the *Sotāpanna* stage), one could be acquiring thousand-fold more bad kammic potential compared to doing the same to a normal human.
- In some cases, even the person in question may not know that he/she is a *Sotāpanna*. There may be “*jāti Sotāpannas*,” i.e., those who had attained the *Sotāpanna* stage in a previous life and thus born as a *Sotāpanna*, and may not realize it.
- Thus we need to be very careful with dealing with fellow humans in particular.

5. When we say killing is immoral it is implicit that killing is taking the life of any living being. But killing a human has a *kammic* consequence that is much higher compared to killing an animal. Killing a *Sotāpanna* has a even more drastic consequences, *Sakadāgāmī* even higher, *Anāgāmī* even higher, and killing an *Arahant* will have the highest, and is of the strongest kind at par with killing a parent (an *ānantariya kamma* that will cause the very next birth in an *apāya*).

6. Similarly other immoral acts will have consequences depending on the “consciousness level” of the living being. It is not a matter of one particular living being is “better” than another.

- Rather it is a matter of how valuable that “level” is, and how difficult it is to attain that “level.” One has been born a human because of the merits one has acquired in previous lives; it is extremely difficult to get a human birth as we will discuss in a separate post; see, “[How the Buddha Described the Chance of Rebirth in the Human Realm.](#)”
- One becomes a *Sotāpanna* by cultivating moral behavior and by purifying one’s mind; thus a life of a *Sotāpanna* is much more valuable compared to a normal human being.

7. Even among humans who have not attained any *Nibbānic* state, there are “different levels of consciousness”: One who has more wisdom (*paññā*) is at a higher level than one with less wisdom.

- Here wisdom does not mean book knowledge, but knowledge of Dhamma; understanding of the true nature of “this world”, or *anicca*, *dukkha*, *anatta*. Thus the possibility of that person attaining a *Nibbānic* stage is more likely, compared to one who has less wisdom.

8. Another important thing is not to worry about things that one does not have any control over. Everyday, we kill so many small animals unintentionally: stepping on them while walking, cleaning the yard, cleaning the house, and even while boiling water.

- We need to remember that “*kamma* is intention.” We are not boiling water to kill any unseen life forms, rather we boil water to make sure we do not get sick by drinking contaminated water.

9. It is not even possible to live “in this world” without harming other beings unintentionally, even though we may be aware that our acts may lead to the destruction of many life forms.

- Once a *bhikkhu* who had developed *abhiññā* powers was getting ready to drink a glass of water, and with his ability to “see” finer things saw that there were numerous microscopic beings in the water glass. He tried to filter them out, but they were too small. The Buddha then explained to him that it is not possible to live without doing things that are necessary to sustain one’s life.
- In another example, suppose one has a wound; if left alone it could lead to one’s death. Thus one needs to apply medication to the wound. However, that wound is infested with numerous microscopic living beings, and they will be killed by the medication.
- Walking on the ground (especially grass) kills many insects; but we cannot live our lives without going places. What matters is our INTENTION. When one is walking, there is no intention of killing living beings.

10. What we need to do is to be careful not to do any harm to even the smallest of the creatures with a hateful or greedy mind. It is the intention, or the state of the mind, that counts.

- There is this story about an old woman who was very careful about not breaking the five precepts. But she was extremely greedy; she was quite stingy, did not give much to charity, and kept all her money under her pillow. Because of that greed, she was born a *peta* (a hungry ghost).
- It is relatively easy to keep the five precepts. What is harder is to purify one's mind of greedy, hateful, and ignorant thoughts. This is what needs to be accomplished in true "*ānāpānasati bhāvanā*"; see, "[7. What is Ānāpāna?](#)."
- Even though we may not be greedy or hateful in this life, we may have acquired such bad *kamma* in previous lives. This is why the Buddha said even if one lives morally in this life that does not guarantee a good rebirth unless one has attained the *Sotāpanna* stage of *Nibbāna*; see, "[Why a Sotāpanna is Better off than any King, Emperor, or a Billionaire.](#)"
- Buddha Dhamma is all about the mind. **Purifying the mind is the key, not just to follow set rules. Just following precepts will not be enough.**

11. Finally, it is important to remember that hate is worse than greed. Excessive hateful actions lead to rebirth in the lowest realm, the *niraya*. Excess greed lead to rebirth mainly as *petas* (hungry ghosts).

- Mixture of hate and greed lead to rebirth in all four lowest realms, the *apāyā*. Even if one does not carry over the hateful or greedy thoughts to speech or bodily actions, they still count especially if one thinks about them most of the time.
- This is why it is important to develop good meditation habits; see, "[Bhāvanā \(Meditation\)](#)." A mind free of hate and greed becomes less agitated and peaceful; then it leads to wisdom (*paññā*).

More details on weights of different *kamma* at: [12. Key Factors to be Considered when "Meditating" for the Sotāpanna Stage](#). Also see, "[What is Kamma? – Is Everything Determined by Kamma?](#)."

7.1.4.8 Account of Aṅgulimāla – Many Insights to Buddha Dhamma

February 17, 2019; revised March 7, 2020

Introduction

1. Aṅgulimāla had killed 999 people but was able to attain the *Arahanthood* within a few weeks after meeting the Buddha. His life story can help us understand how and why even *vipāka* for such highly immoral deeds can be overcome.

- Even though the laws of *kamma* play an important role in Buddha Dhamma, one can overcome the consequences of such highly immoral actions. That is by comprehending the more fundamental principle of causality: **one can bypass all such *kamma vipāka* (all future suffering) by getting rid of *avijjā* and *taṇhā* (the root causes).**
- The following two posts also discuss *kamma* and *kamma vipāka*: "[What is Kamma? – Is Everything Determined by Kamma?](#)" and "[How to Evaluate Weights of Different Kamma.](#)"

2. I highly-recommend a good account of the life story of Aṅgulimāla here: "[WebLink: accesstoinsight.org: Aṅgulimāla – A Murderer's Road to Sainthood.](#)"

- Reading that account first will help with the discussion below.

Brief Summary of Aṅgulimāla's Life

3. To summarize the critical points in the story of Aṅgulimāla:

- He was called Ahimsaka (“Harmless”) as a boy and was an excellent student. He was the best in class at the premier learning institute of that day in Takkasila (Taxila). His peers were jealous and tried to convince the teacher that Ahimsaka was plotting to take his job.
- The teacher finally believed those false accusations and came up with a way to get Ahimsaka killed. When Ahimsaka finished his studies and asked how he can pay for his education, the teacher said: “You must bring me a thousand human little fingers of the right hand.”
- That is how Ahimsaka became a killer and came to be known as “Aṅgulimāla”, because he started wearing some of those cut fingers in a garland around his neck.

4. Aṅgulimāla had killed 999 people and was about to kill his mother to get the last finge when the Buddha intervened.

- The quick-witted Aṅgulimāla was able to comprehend a few verses that the Buddha uttered and asked the Buddha to ordain him right there.
- Ven. Aṅgulimāla became an Arahant soon afterwards.
- Later on, the Buddha reminded Ven. Aṅgulimāla that he had now been “born” a *Āriya* (Noble Person), even though he had killed so many people when he was a murderer. This concept of changing “*bhava*” even during a given existence discussed below.

First Observation – Importance of *Gati* and Environment

5. The first thing we can see is that obedient and well-behaved Ahimsaka became a murderer because of his teacher’s influence. **External influences (family, friends, etc.) can be a crucial factor in changing one’s *gati* (pronounced “gathi”) loosely translated as “character.”** (Note that Pāli words are written not in “standard English,” but with an adopted “*Tipiṭaka* English” convention. See, “[“Tipiṭaka English” Convention Adopted by Early European Scholars – Part 1](#)” and “[“Tipiṭaka English” Convention Adopted by Early European Scholars – Part 2](#)”)

- This is why parents must always be on the lookout on what kind of friends a child has. Friends can be a considerable influence on a child.
- This is also true for adults. One must get away from those who pull in wrong directions, and make new associations along “good directions.”
- *Gati* are discussed in many posts at this site. One can find a list of relevant posts by entering “*gati*” in the “Search” box on top right.

Second Observation – There is no “unchanging self”

6. **The second thing we can see is that there is no “unchanging self.”**

- Harmless Ahimsaka became a violent murderer in Aṅgulimāla and killed almost 1000 people.
- Then that violent Aṅgulimāla the murderer, became a Noble Person within a short time after meeting the Buddha and within weeks Ven. Aṅgulimāla became an *Arahant* too!

7. In the “bigger picture” of the “three *lokā*” and “31 realms,” we saw that the “lifestream of any living being” can change from “good to bad”, “bad to good”, “good to bad again,” etc. an uncountable times in the beginning-less rebirth process.

- We all have been in the highest *brahma* realm and the lowest *apāya* too. But we all have spent most of that time in the suffering-filled *apāyā*.
- The only way get out of this “ceaseless wandering in the rebirth process (*saṃsāra* or *samsāra*)” is to become an *Arahant*, as Ven. Aṅgulimāla did.
- The first step is to attain the *Sotāpanna* stage be free of at least the four lowest realms (*apāyā*).

Third Observation – There is a Causal Link (“Sort of a Self”)

8. However, as we discussed in the previous post, it is not possible to say that “**there is no-self**” either.

- Nothing happens without a reason or a cause (at least one, but usually many causes).
- A human is reborn an animal or a *brahma* due to a reason. There is a CONNECTION between two adjacent “*bhava*” or existences.
- Ahimsika did not become Aṅgulimāla without causes. One cause was the influence of his peers on the teacher. Then Ahimsaka blindly followed the instructions of the teacher.
- But then all that was reversed due to the influence of the Buddha.

9. That is why it is also incorrect to say, “there is no-self.” There is always a “self” — living at least momentarily — that is responsible for how that “self” evolves in the future.

- But that “changing self” can and will change between “good” and “bad” based on many factors. Key factors are self’s deeds and external influences on that “self” at any given time.

Fourth Observation – Two Types of “*Bhava*” or Existence

10. Another critical point is that one could be born in a “temporary *bhava*” or “temporary existence” DURING this life. As we saw, Aṅgulimāla switched “temporary *bhava*” from an innocent boy to a murderer, and back to an *Arahant*!

- For example, a person who drinks habitually is not drunk all the time. He is in a “drunken *bhava*” or “drunken existence” while he is intoxicated. The next day he is sober and would not be in a “drunken *bhava*” until he drinks again.
- In the same way, one is in an “angry *bhava*” when she gets angry. But after the anger subsides, she is not in that “existence” or “*bhava*” anymore.
- Temporary *bhava* (or transient existences) explained via “*Idappaccayatā Paṭicca Samuppāda*” processes (those operate during a given life) . Even though only one type of *Paṭicca Samuppāda* is presented in the textbooks today, there are different types.

11. When one habitually gets into such a “temporary *bhava*” repeatedly, then that becomes a cultivated *gati* or habit/character.

- In that case, it could lead to a new “*upapatti bhava*” (or “*bhava* associated with rebirth”) too. For example, when one gets angry all the time and then one day kills another human, that could lead to rebirth in an *apāya*. That is a “more permanent *bhava*” that can last a long time.
- That is the more common *Paṭicca Samuppāda* cycle, i.e., the “*upapatti Paṭicca Samuppāda*.”
- The section on “[Paṭicca Samuppāda](#)” is a must-read.

Fifth Observation – Going Back and Forth in the Rebirth Process

12. So, there could be some period in the rebirth process where one mostly does “good deeds”, cultivates “good *gati*,” and thus gets “good *bhava*” and therefore “good births” (*jāti*). We discussed the difference between *bhava* and *jāti* in the post: “[Bhava and Jāti – States of Existence and Births Therein](#).”

- Then, one’s *gati* may change to “bad *gati*,” especially when one comes under “bad influences and associates.” In that case, one may start on a “downward path” and eventually one’s *gati* will become harmful to the extent that one will get a “bad *bhava*.”
- We can see such examples around us. We all have seen good children becoming drug addicts and then becoming even murderers due to bad associations. The opposite happens too, when a violent person may change those bad *gati* and become a “good citizen” under right influences.

- That is what we all have been doing (going back and forth between good and bad existences,) in this beginning-less rebirth process.

Sixth Observation – Angulimāla's Realization

13. When Angulimāla was chasing the Buddha and could not get even close to the Buddha. To quote from the account referenced above, Angulimāla stopped and called “Stop, monk! Stop, monk!”

“I have stopped, Angulimāla. You stop, too.”

- That got Angulimāla to thinking, and he started asking why the Buddha — while still walking — said that he had stopped. **The Buddha explained that he had stopped his *samsāric* wandering (rebirth process) and had overcome all suffering.**
- That is when Angulimāla gained insight and became Ven. Angulimāla.

14. Therefore, the critical point to understand is that it is NOT ENOUGH just to do “good deeds,” even though that is a must.

- One MUST take another step and realize that we have been trapped in this rebirth process filled with (mostly) suffering due to two reasons.
- Let us briefly discuss those two CRITICAL points.

Seventh Observation – The Critical Discovery of the Buddha

15. **First, until a Buddha comes to the world (meaning a human attains the *Buddhahood* by purifying the mind to the greatest extent), humans are unaware of the “wider world view” with “three types of *lokā*” and 31 realms.**

- Even though one could be occasionally born in “good realms” at or above the human realm, beings are reborn mostly in the lowest four realms (*apāyā*) **due to misdeeds done in seeking sense pleasures.**
- Of course, there is suffering in any realm, but it is less in higher realms.
- **Therefore, most of the rebirths lead to much suffering. That is the essence of the First Noble Truth.**

16. Secondly, until a Buddha comes to the world, it is not known how to escape from this endless rebirth process filled with suffering.

- There have been, and there will always be teachers who realize that misdeeds lead to unfortunate rebirths and good deeds lead to good rebirths, and teach that to others.
- **But it is only a Buddha that can figure out that doing good deeds is not enough.** One needs to see the *anicca* nature of this world of 31 realms. **That means even if one gets a rebirth in the highest realm with long lifetimes of billions of years, one will end up in despair and eventual death.**
- Then one gets back to the same cycle of rebirths, where one will inevitably do evil deeds (due to cravings or sense temptations) and will be born in the *apāyā*.

Eighth Observation – The Root Cause for Suffering

17. **Therefore, the key is to realize that one needs to REMOVE the tendency to be tempted by sense desires.**

- One needs to “see” that *anicca* nature, i.e., it is a waste of time to seek happiness in this world. That will sooner or later lead to rebirth in the *apāyā* (*dukkha*). Therefore, in the end, one will become helpless (*anatta*), when born in an *apāyā*.
- **It is not possible to forcefully suppress cravings under “strong sense temptations.” When one sees the “*anicca* nature,” cravings are automatically removed (in four stages of *Nibbāna*).**

- That is the **Second Noble Truth**, the cause of future suffering.

Ninth Observation – The Way to *Nibbāna*

18. Once the “big picture” of the 31 realms — together with how one WILL BE born among them due to one’s actions (*kamma*) — is understood, one would have removed the ten types of *micchā diṭṭhi*.

- That is because that “complete picture” requires the rebirth process, laws of *kamma*, etc.

19. Then one can begin to understand the “unfulfilling and dangerous nature of the wider world of 31 realms” or the “*anicca* nature.”

- That “*anicca* nature” explains how “*dukkha*” or suffering arises, and one will become helpless (*anatta*) in the rebirth process. **Those are three main characteristics (*anicca, dukkha, anatta*) that are called *Tilakkhaṇa* (and they are inter-related).**
- That is when one attains the *Sotāpanna* stage of *Nibbāna*.

20. **That is why *anicca* has nothing to do with “impermanence,” and “*anatta*” has nothing to do with a “self” or a “non-self.”**

- That knowledge about *Tilakkhaṇa* or the “true nature of this world” is available only in Buddha Dhamma.
- Until a Buddha comes to this world and DISCOVERS that “bigger picture,” no one will be able to see that “bigger picture.” Thus humans are unaware of the dangers in remaining in this cycle of rebirths filled with suffering.

Tenth Observation – *Kamma Vipāka* Will be Effective Until Death of an *Arahant*

21. Even though Ven. Āṅgulimāla had attained the *Arahanthood*, he was getting injured by “stone-throwers” regularly. Most of the time, those stones were not directed at him, but he was getting hit accidentally.

- As described in the above essay, “with blood running from his injured head, with his bowl broken, and with his patchwork robe torn, the venerable Āṅgulimāla went to the Blessed One. The Blessed One saw him coming, and he told him: “Bear it, *brāhmaṇā*, bear it, *brāhmaṇā*! **You have experienced here and now the ripening of *kamma* whose ripening you might have experienced in hell over many a year, many a century, many a millennium.**”
- If Āṅgulimāla died without being saved by the Buddha, he would have suffered in the *apāyā* for an unimaginable time!

22. As we had discussed before, even a Buddha cannot avoid some of *kamma vipāka*. The physical body in this life arose due past *kamma*, and many aspects associated with that body cannot be changed.

- At the death of the physical body, there are no more rebirths anywhere in the 31 realms. Then, there is no way for any *kamma vipāka* to materialize (come to fruition). That is why the physical death of an *Arahant* is called “*Parinibbāna*” or “complete *Nibbāna*.”
- There will be absolutely no suffering after the *Parinibbāna*.

23. Therefore, we can see that there are many insights in the accounts of notable personalities in the *Tipiṭaka*. They are all consistent with the core teachings.

7.1.4.9 The Four Bases of Mental Power (Cattāro Iddhipāda)

I used to have this post titled, “The Four Factors of Accomplishment.” I changed it because those words do not do justice to these four mental qualities. They are called *satara Iddhipāda* in Pāli or Sinhala, meaning factors that are critical to accomplishing any goal, whether mundane or transcendental.

- *Iddhi* is conventionally taken to mean “magical” powers. Those *yogis* who could see things that are far away, hear sounds that are far away, read minds of others, etc., were supposed to have *iddhi* powers. They acquired those powers by harnessing the power of these four factors to KEEP THEIR DEFILEMENTS SUPPRESSED.
- When one works towards attaining *Nibbāna*, one can use the same factors to REMOVE defilements from the mind.
- One could use the same factors to attain mundane goals, such as achieving financial independence, excelling in academics or a sport, improving health, etc.

They are *chanda* (liking, but close to an obsession), *citta* (thoughts), *virīya* (effort), and *vīmaṃsā* (analysis). *Chanda* is NOT greed, it is the determination to attain a goal.

- Any innovator, business person, scientist, architect, in fact anyone who is an expert at his/her occupation, knows these factors are critical, even though they may not have thought about them.

1. One needs to have an liking (more like an obsessed liking) for the project; this is called ***chanda*** which we can translate as liking. It is not greed, but pure in quality and grows to become a life goal.

2. When one has this “obsession”, one keeps thinking about it all the time. When one gets up at night to go to the bathroom, one thinks about it; it is the first thing that comes to mind when one wakes up. This is called ***citta***; we will call it thought or contemplation.

3. Thus one makes one's best efforts (***virīya***) to achieve the goal. This is what makes swimmers get up early morning to do laps, a scientist/innovator forgets about his/her meal, an innovator stays awake thinking about how to make improvements to his products, etc.

4. One is always on the lookout for any faults or possible improvements in current efforts. If the concepts involved do not make sense, one is always looking for a better explanation, a better way to make something, etc. This is reasoning/investigating (***vīmaṃsā***).

- These factors are mutually supportive of each other. Because of this, once getting started (slowly), **they can lead to explosive growth**; these factors feed on each other, and the project becomes self-sustaining. This is called exponential growth. Thus it is hard to calculate the time taken to finish the project by linear extrapolation.
- The same is true for someone starting on the Path. Initially, it takes time to absorb the concepts. But IF THE CONCEPTS ARE CORRECT (i.e., no contradictions), then progress is made very quickly. The principle of *paṭicca samuppāda* starts working and one will be attracting resources that will help in ways one would not have even thought about; see, “[The Law of Attraction, Habits \(Gati\), and Cravings \(Āsavas\)](#).”

I know this by experience both as a scientist and now as a follower of the Path. After working for over four years, up until 2013, I had made only slow, steady progress on the Path. But I progressed enough that I kept looking for better explanations, discarding many things on the way. Since the middle of 2013, the growth exploded. That is when, just by the law of attraction (see, “[The Law of Attraction, Habits \(Gati\), and Cravings \(Āsavas\)](#)”) I came across the pure Dhamma.

- By the way, this is process the Buddha called *bhāvanā* (meditation). One keeps contemplating, clarifying, investigating, etc. it all the time, i.e., “*Asevitaya, bhavithaya, bahuleekathaya,*”

- One can be meditating in all four postures: sitting, standing, walking, and lying down (on a bed). Of course one can concentrate better sitting down in one of the more formal sitting postures.

Deeper Meanings when Cultivating the Noble Eightfold Path

See, “[Javana of a Citta – The Root of Mental Power](#)” for an analysis based on Abhidhamma.

1. *Chanda* (cha + anda, where “cha” is mind and “anda” is “anduma” or clothes) means wrapping one’s mind with appropriate “attire”, which here means *sammā vaca*, *sammā kammanta*, and *sammā ajiva*. This is what fuels the “liking” for *Nibbāna* with increased *nirāmisa sukha*.

- By the way, a different meaning of “anda” (blind) is implied when *chanda* is used in “*kāmachanda*” (= “kāma” + “cha” + “anda”), i.e., mind blinded by *kāma* or sense pleasures.

2. *Citta* here means the mindset to attain *Nibbāna*.

3. However, even if one has liking and mindset on attaining *Nibbāna*, one needs to make an effort or *virīya*.

4. Even if one is exerting effort, it needs to be directed in the right direction. Thus one needs *vīmaṃsā* (investigation/reasoning) to comprehend *anicca*, *dukkha*, *anatta*, and to get to *sammā diṭṭhi*.

5. “*Iddhi*” means “grow”, and “*pada*” means “headed direction.” Thus with *iddhipada* one is accelerating in the direction that one sets one’s mind. Thus all four factors of *chanda*, *citta*, *virīya*, *vīmaṃsā* need to be there.

Next, “[Why is it Necessary to Learn Key Pāli Words?](#)”, ...

7.1.4.1 Why is it Necessary to Learn Key Pāli Words?

Original written before October 23, 2015; Revised March 4, 2017; October 8, 2018

I had not given this issue much thought until someone at an online forum pointed out in 2014 that I was using too many Pāli words and it was difficult to understand the meaning of those terms. This is an important point that has two aspects:

- In the *Arana Vibhanga sutta* (MN 130), the Buddha advised *bhikkhus* to explain the Dhamma by providing the MEANINGS and not to emphasize a given language. As long as one comprehends the concept, it does not matter what language is used.
- On the other hand, we need to have a way to transmit the key foundational words for future generations without distorting the meaning of such words. And it is difficult to find suitable words in other languages for keywords like *anicca*, *anatta*, and *paṭicca samuppāda*.
- I have explained the meaning of any Pāli term I use. But for a first-time reader, this could be a legitimate issue. Please use the “Search” button on the top right to locate relevant posts for any keyword. There is a “[Pāli Glossary \(A-K\)](#)” and “[Pāli Glossary \(L-Z\)](#)” too.

1. Buddha Dhamma is the most complex theory in the world; it encompasses all of nature’s laws. Even though its basic premises are not hard to grasp, if one needs to dig deeper, one needs to spend some time “learning the basics”, or the “fundamental ideas involved.”

- Think about it this way: Can one learn algebra without knowing arithmetic?
- The key is to learn the basic ideas well, words like *anicca*, *anatta*, *bhava*, etc. It is said that one could understand the Buddha’s message about existence just by comprehending *anicca* (which will lead to an understanding of *dukkha* and *anatta*), and that is true.
- But that is not possible if *anicca* is translated into English as just one word: impermanence. The Pāli word *anicca* means much more than just impermanence. So, it is better for the word *anicca* and to learn what is meant by that word.

- *Viññāṇa* is another word like that. It should not be translated just as “consciousness”; it is much more complex; see, “[Viññāṇa – What It Really Means.](#)”

2. There is another aspect too. If one learns the basic concepts in addition/subtraction or even quantum mechanics, it does not matter what language one uses to learn it. The key is to get the IDEA, not just learn the words. One can learn addition/subtraction or quantum mechanics in ANY language, not by memorizing words but by understanding the key concepts.

- When a child learns how to add/subtract, he/she has to learn the basic multiplication table and the procedures on how to use that knowledge in handling big numbers. After that he/she can solve any arbitrary problem involving big numbers.
- In the same way, one needs to get the IDEAS embodied in some key Pāli words because many of those Pāli words CANNOT be directly translated into other languages: They are highly condensed, each word packed with deep meanings.
- In quantum mechanics, the word “quantum” embodies the subject; regardless of the language one uses, one knows what a quantum is. In the same way, one needs to know what “*anicca*” is. There is no other word for it in English.
- **Once one UNDERSTANDS the meaning of a certain key Pāli word, then one may even be able to find a suitable word in any language to keep it in mind. There is no need to memorize Pāli words for the sake of memorizing. It is similar to learning any concept.**
- We just should not change the original Pāli words in the *Tipiṭaka*. That is the “blueprint” that needs to be transmitted intact so that Buddha’s original message will be kept intact.

3. Let us first examine the reasons why Pāli is a special language.

- The Buddha delivered his discourses in *Māgadhī* language; a version of that language suitable for memorization (Pāli) was used to SUMMARIZE those *suttā*. For example, *Dhamma Cakka Pavattana Sutta* was delivered to the five ascetics overnight. How many pages would it take to write all that down? Yet, it was condensed into a few pages.
- In the old days, *suttā* were orally transmitted generation-to-generation, and that was the other reason to condense it into a special form like a poem that is easy to remember and recite. The origin of the word “Pali” comes from that particular way of organization of the words.

4. Therefore, it may take several words in a different language to express the meaning of some Pāli words like *anicca*, *anatta*, *bhava*, etc. *Paṭicca samuppāda* is another whole phrase that is best kept intact and just learn what is meant by that phrase; see, “[Paṭicca Samuppāda – “Pati+iccha” + “Sama+uppāda”.](#)”

- Thus most Pāli words are impossible to be translated word-by-word to other languages. **There is a system to glean the true meanings of the *suttā* as well as the deep subject of *paṭicca samuppāda*;** see, “[Sutta Interpretation – Uddesa, Niddesa, Patiniddesa.](#)”
- This is the reason that many commentaries were written in the old days to explain the meaning of keywords and phrases; see, “[Preservation of Dhamma](#)” for details.
- Unfortunately, most of those original commentaries (*Sinhala Attakathā*) cannot be found today, except for three; see the above post.

5. Most of the problems we have today are due to such “word by word” translation of *suttā* into other languages.

- **The most visible and disastrous translations are the translation of the words *anicca* and *anatta* into Sanskrit as *anitya* and *anātma*;** these words were then ADOPTED in the Sinhala language to express the meaning of *anicca* and *anatta*. Then within the last two hundred or so years, those Sanskrit words were directly translated to English and now have become established to mean “impermanence” and “no-self”; see, “[Misinterpretation of Anicca and Anatta by Early European Scholars.](#)”

- Incorrect translation of just those words have kept the message of the Buddha hidden for over fifteen hundred years. It is not an accident that there have not been that many *Arahants* during that time.
- For the correct meanings of these words, see, “[Anicca, Dukkha, Anatta – Wrong Interpretations](#)” and the follow-up post.

6. In fact, it is said that one can reach the *Sotāpanna* stage by just comprehending the true meanings of *anicca*, *dukkha*, *anatta*, the three characteristics of the world. These three words have embodied in them a very broad message. Whole *suttā* were delivered to describe what was meant by those words! **It is WRONG and DISASTROUS to just translate them as impermanence, suffering, and “no-self.”**

- **But if one wishes**, and knows the correct interpretations, one can dig much deeper to unimaginable depths. For example, there is a process involving 9 steps where a given *citta* starts off as a pure (*pabhasvara*) *citta* and gets “contaminated” before getting to the *viññāṇakkhandha* stage within within a billionth of a second!
- Those are discussed in detail, for example, “[Amazingly Fast Time Evolution of a Thought \(Citta\)](#)” and “[Pabhassara Citta, Radiant Mind, and Bhavaṅga](#).”
- However, there is no need to go to that depth for most people (and many will not have enough time to do that anyway, but there could be a few who would really enjoy it).
- I just want everyone to appreciate Buddha Dhamma for what it is, and to help remove many misconceptions that are out there today.

7. To summarize, I cannot emphasize enough the importance of UNDERSTANDING the meanings of key Pāli words. It may take some time to truly grasp those meanings. I keep revising those key posts, whenever a better way to express an idea comes to mind or when someone else points out a better way to express it.

- **Experience is a key factor in understanding.** The word “elephant” may not mean anything to someone who does not understand English. But if it is shown to him what an elephant looks like, then he can associate the word “elephant” with the big animal.
- In the same way, it is important to UNDERSTAND what *anicca* means, by using one’s experience: for example, we cannot maintain even our body the way we would like for the LONG TERM, etc. Then you look at others, especially those who are even older than us, or those who died of old age, and realize that it is true. Then you think about anything in this world, and realize that it is true, i.e., we cannot maintain ANYTHING in this world to our satisfaction, and that is *anicca*.
- Also see, “[Saṅgā – What It Really Means](#).”

8. The following is a table with some key Pāli words and links to a few posts that describe what those words mean. More posts probably can be found by using the “Search” button on the top right.

7.1.5 Buddha Dhamma and Morality

[“Origin of Morality \(and Immorality\) in Buddhism”](#)

[“Is Eating Meat an Akusala Kamma \(Immoral Deed\)?”](#)

[“Do Things Just Happen? – The Hidden Causes”](#)

[“Craving for Pornography – How to Reduce the Tendency”](#)

7.1.5.1 Origin of Morality (and Immorality) in Buddhism

1. Morality and immorality are both built-in to nature. A human can choose to become moral or immoral. This is because a human has a mind that can grasp right from wrong; on the other hand, an animal does not have a developed mind that can sort out good deeds from the bad most of the time.

2. In Buddha Dhamma, which describes nature's laws, the foundation of the moral code is the set of ten moral actions (*dasa kusala*), which are to avoid the ten immoral actions (*dasa akusala*); see, [“Ten Immoral Actions \(Dasa Akusala\)”](#) and the follow-up post.

3. **If one does not follow this fundamental moral code, one becomes indebted to other humans and also to the nature (which means all living beings, from which we “see” only a small fraction) in general.** In this life as well as in previous lives, we have become indebted to other beings.

- Thus getting out of that debt, as well not to get into new debts, is also a part of the moral code in Buddha Dhamma; see, [“Kamma, Debt, and Meditation”](#) for more details.
- This is in the “*vinaya piṭaka*” of the *Tipiṭaka*; it is also described in the *suttā* in the *sutta piṭaka*. The third section of the *Tipiṭaka*, *Abhidhamma*, describes the ten moral/immoral actions in depth.

4. Now let us see how most of our conventional moral code(s), comes from these two foundational aspects of Buddha Dhamma.

- Of the ten immoral actions three are done with body: killing, stealing, and sexual misconduct. The basic difference with “conventional code” is that killing of animals is not considered immoral in many societies.
- There are four immoral actions done with speech: lying, slandering, harsh speech, and frivolous talk, of which the latter is not taken seriously as immoral in most cases; but one can experience the benefits of avoiding it for oneself.
- Those seven immoral actions and speech ARISE due to **the three kinds of immoral thoughts: greed for other's belongings, ill will or hatred, and established wrong views (*lobha, dosa, moha*).** In a

way the last one is the root cause for all other nine, because one would not violate any of them if one knew the true nature of the “wider world” (of 31 realms of existence and the rebirth process therein): that it is unfruitful to engage in any of those nine immoral actions (called “*avijjā*” or ignorance).

5. Then there is the other aspects of morality that comes from abstaining from getting into new debt and paying off old debts (from the *vinaya*).

- As one can easily see, giving (*dana*) in general is an excellent way of “paying off debt.” Since we do not know who we have becomes indebted to in this long cycle of rebirths, giving can be to anyone, including animals. For animals, the best giving is of course abstain from killing; not to take their lives. Even though they cannot think like us, they do have feelings.
- This point of “being debt free” incorporate many of our “conventional moral actions”: helping out others, being considerate to others, etc.
- A big part of this is also making sure to fulfil one’s responsibilities. All our associations have, at the root, “long term debts” in play even though we do not realize it. The biggest debts are those to our families and especially to children (and parents in return).
- We constantly benefit from the actions of innumerable others living in this complex society; we depend on each other for survival. Our food, energy needs, infrastructure needs, are hard to sort out. The best way to pay off such debts is to do “one’s own part”, honestly doing one’s own job and being a “good citizen.”

6. But the most important thing is to understand the true nature of this “wider world.” When one has that understanding it will become automatic to follow the moral code. One does not have to make an effort, because one’s mind clearly sees what is right and what is wrong. There are then such meritorious actions (*puñña kriya*), which cultivate the “moral code behavior” and also purifies the mind; see, “[Punna Kamma – Dāna, Sīla, Bhāvanā](#).”

- The goal of this website is to clarify how people engage in immoral actions because their inability to REALLY understand the true nature of this “wider world” (*anicca, dukkha, anatta*) and thus to help get rid of such wrong views.
- If one understood the “long term consequences” (and unfruitfulness) of acting with extreme greed and hate, then one becomes automatically moral.

7. Finally, morality is not a one street. Unfortunately, the nature has both morality and immorality built-in. Even though we think, “how one can do a highly immoral act like killing another human and have a peace of mind?”, there are some who do ENJOY such acts. People like Hitler and Pol pot, as well as serial killers, are good examples. They PLAN and carry out such vicious deeds with pleasure.

- Thus the nature, at least on the surface (*because the consequences are hidden and time-delayed*), is neutral on the matter of morality and immorality. One can go the moral route or the immoral route. Humans have the ability to sort out which route is the correct one. However, it is not easy for children to figure that out. This is why the guidance of the parents and teachers is CRITICAL to point a child in the right direction.

7.1.5.2 Is Eating Meat an Akusala Kamma (Immoral Deed)?

Published before October 23, 2015; revised October 19, 2016; February 16, 2018

Note added **June 2, 2016**: I decided to revise this post because I received comments from a few people who thought it could encourage people to eat meat. My intention was not that, but merely to point out that

there are much worse things people ordinarily do even without thinking twice. It is best to avoid eating meat out of compassion for animals.

1. The Buddha spent a lot of his time dispelling “*bamunu matha*” or “superficial concepts about morality” adhered to by the *vedic brahmins* of that day.

- It is unfortunate to see that many current “Buddhists” are practicing the same “*bamunu matha*.” We have gone a full circle and are back to status that the Buddha tried very hard to change.
- The reason is that we humans have the tendency to judge everything by how we perceive them with our five physical senses, on outward appearances. There is more to nature than what we see (*ditta*), hear (*suta*), taste (*rasa*) and smell (*muta*), and perceive (*vinnata*). The whole point of the appearance of a Buddha in this world is to show us that the truth is much deeper, and we need to “see” with *paññā* (wisdom). This will become clear as one learns Dhamma.
- Thus the Buddha advised us to go beyond that and to “see the reality” by always paying attention to his “*pubbe ananussutesu dhammesu....*”, or “dhamma that has never been heard before....” Therefore, let us analyze this matter using his “cause and effect” doctrine, and not the absolute, fatalistic doctrine of *kamma*; see, “[What is Kamma? Is Everything Determined by Kamma?](#).”
- Thus, sometimes, the outward appearance of morality could be nothing but *micchā diṭṭhi*. Some people try to attain *Nibbāna* by following rituals, and this is actually one *micchā diṭṭhi* one needs to get rid of (*silabbata paramasa*) before attaining the *Sotāpanna* stage.
- Misconception of categorizing “eating meat” as an *akusala kamma* is a *micchā diṭṭhi* too. Since there is ample evidence in the *Tiṭṭaka* that the Buddha himself accepted meat prepared under certain conditions (see #9 below), are these people saying that the Buddha himself committed an *akusala kamma*?

2. In the “[WebLink: suttacentral: Āmagandha Sutta \(Sutta Nipata 2.2\)](#)”, the Buddha explained to a *brahmin* why engaging in *dasa akusala*, and NOT eating “properly prepared” meat is a *duccarita* (immoral deed). If one kills an animal to get the meat, then it is not “properly prepared.”

Pāli verse:

“*Pāṇātipāto vadhachedabandhanam,
Theyyam musāvādo nikativāñcanāni ca;
Ajjenakuttaṃ paradārasevanā,
Esāmagandho na hi maṃsabhojanam.*”

Here is one verse from the [WebLink: suttacentral: English translation](#):

“Taking life, torture, mutilation too,
binding, stealing, telling lies, and fraud;
deceit, adultery, and studying crooked views:
this is carrion-stench, not the eating of meat.”

3. Devadatta, who tried to kill the Buddha and thereby to “become a Buddha”, first tried to split the *Buddha Sāsana* by proposing “five strict conditions for the *bhikkhus* to obey.” His intent was to show that he was “more moral” than the Buddha.

- Devadatta demanded that the Buddha accede to the following five rules for the monks: they should dwell all their lives in the forest, live entirely on alms obtained by begging, wear only robes made of discarded rags, dwell at the foot of a tree, and **abstain from eating meat**.
- The Buddha replied that Buddha Dhamma does not advocate a “path of rituals” (*vatha*). Instead one attains *Nibbāna* by cleansing one’s mind and moral behavior follows automatically. This is what is meant by, “*sanvarattena silan*,” or “when one sees the futility of ‘*san*’ via comprehension of *anicca*, *dukkha*, *anatta*, moral behavior or ‘*sīla*’ is realized automatically”; see, “[What is “San”? Meaning of Sansāra \(or Samsāra\).](#)”

- On the other hand, there are people who are genuinely repulsed by the thoughts of animals living under harsh conditions and being killed in animal farms and have voluntarily given up meat eating, and that is good. In fact, as one gains *paññā* (wisdom), one's craving for many sensually pleasurable things, not just meat, automatically diminishes.
- The craving for excess sense pleasures diminish automatically when one starts feeling the *nirāmisā sukha* and realizes that that is much more calming and long lasting to the mind than any sense pleasure that is brief; see, "[Three Kinds of Happiness – What is Nirāmisā Sukha?](#)."
- But the point is that *paññā* (wisdom) comes through understanding the true nature, and not being persuaded via untruths.

4. In the *Jivaka sutta*, the Buddha states that *bhikkhus* can accept meat, "when it is not seen or heard or suspected that an animal has been **purposely slaughtered for that offering**." I also found out recently that the custom those days was to use "*pavatta māṇsa*" for *bhikkhus* which means the meat was from animals killed by other animals in the forest (lions and tigers normally eat only parts of an animal and leave the rest which people then recover for food).

- However, the Buddha prohibited *bhikkhus* from eating the flesh of human, elephant, horse, dog, cat, lion, tiger, leopard, bear, hyenas. This was done for various reasons and the chief among them is that they are not suitable for human consumption.
- Just like some vegetations are toxic, some meats can have harmful effects. Other than that, meat of a dead animal is no different from corn or wheat; they are all made out of *satara mahā bhūta: pathavi, āpo, tejo, vāyo*.
- Once the mind leaves the physical body, the body becomes inert like a log. **What is immoral is to end the life of a living being willfully or to aid in such acts**; once that deed is done, what is left is no different than a log of wood.
- However, this is not to say that the Buddha advocated eating meat. It is actually better for the body to eat less meat and more vegetables and fruits. In general, we eat much more food than necessary, and that leads to many health problems starting with obesity.

5. The key point is that EATING MEAT or ANYTHING ELSE **if done with greed**, then that is an *akusala kamma* done with the mind: *abhijjā* [*abhijjhā*] or strong greed.

6. Then there are people who say, "if we all eat meat, that encourages other people to operate animal farms and kill animals; therefore, we should not eat meat." For those who are bothered by such thoughts, it is better not to eat meat for the peace of mind. I actually have cut down a lot just out of compassion. But we also need to examine the REASONS for some acts to be categorized as *akusala kamma*.

- Don't farmers use pesticides to kill uncountable number of living beings when they cultivate rice, wheat, vegetables, for our consumption? With the above logic, aren't we encouraging farmers to kill all those insects by eating basically any food that we buy at the supermarket?
- These are the true "*musavāda*" ("*musa*" means "incorrect" and "*vāda*" means "debate"), i.e., trying to win an argument by using false premises. They appear to make sense on the surface, but when you examine carefully, they have no substance.
- We have to be really careful about having such "*micchā diṭṭhi*," because *niyata micchā diṭṭhi* can lead to rebirth in the *apāyā*. There are many such false beliefs that appear "harmless" but count as *micchā diṭṭhi* (not knowing the true nature of things), and that is another reason why it has been hard for people to attain the *Sotāpanna* stage.
- The bottom line is that it is better not to eat meat especially if that bothers one's conscience. But for those who don't have that problem, there are probably other bad acts one needs to worry about first; see, "[How to Evaluate Weights of Different Kamma](#)."

7. There will always be people who engage in immoral acts and make a livelihood from that. We cannot force others to be moral; we can only point out what is moral and what is immoral. It is up to each person to decide, and understand that, “what one sows, one will reap.”

- As I mentioned before, there was a “pig butcher” Chunda Sukara, who ran his butcher shop right next to *Veluwānaramaya*, where the Buddha resided for many years. Even at the time of the Buddha some questioned why the Buddha did not try to “save him.” If he did that, Chunda Sukara would have generated hateful thoughts about the Buddha and would have ended up in an even worse *apāya*, as explained by the Buddha. Thus one needs to think deeper than just go by “outward appearances.”
- On the other hand, **we should point out the bad consequences of raising animals under unfathomably harsh conditions in animal farms, and killing animals with unimaginably cruel ways (see #10 below).** Even though animals have much lower levels of “consciousness”, **they feel pain same as us.** Still, we need to get rid of the “wrong *saññā*” that eating meat (which is like any other food made of the *satara mahā bhūta*), is equivalent to eating “an animal.” Once the animal is dead, the dead body is inert; the *gandhabba* has left that “inert shell”; see, “[Ghost in the Machine – Synonym for the Manomaya Kāya?](#).”
- In Sri Lanka, and probably in many Buddhist countries, there are many movements to “rescue cows and other animals from the butcher.” They consider this act as an “*abhaya dana*,” which they interpret as “giving back the life or saving the life of that animal.”

8. First, let us examine WHY a cow is born a cow in the first place. A cow is called a “*harakā*” in Sinhala, which comes from “*hara*” meaning “the essence or what is good”, and “*kā*” meaning “eat or destroy.” Thus one is born a cow due to a “cow *sankhara*,” i.e., one had done acts that led to hardships for people. We know many people who do immoral acts that destroy other human lives or at least lead to hardships for other people; those people are bound to be born cows, pigs, and other animals and “pay back those debts.”

- Even though we may save the life of a cow by paying off the butcher, that cow will go through many such “cow lives” until the *kammic* energy of that “cow *bhava*” is spent and during that time will be subjected to numerous killings. This may sound harsh, but that is the reality.
- Instead of “trying to save existing cows”, which is a futile task as we saw above, what we SHOULD do is to try to prevent even a single HUMAN from **becoming a cow** in future lives. Once one gets a “cow *bhava*” one will be born in that *bhava* multiple times; see, “[Bhava and Jāti – States of Existence and Births Therein](#).” What we can do is to try get as many people as possible to be EXPOSED to true Dhamma.
- Thus even though we should not try to prevent people from rescuing such animals (saving a life is always good), we need to educate people about the misconceptions on relative merits of different deeds.

9. In that context, let us see what is really meant by “*abhaya dana*.” “*Bhaya*” means “fear” and “*abhaya*” means preventing one from a dreadful outcome; of course “*dāna*” means “giving.” Thus “*abhaya dana*” means giving the gift of removing one’s fright.

- One should be dreadful about the suffering one could undergo in the four *apāyā* (four lowest realms of existence), animal realm being one. If one can motivate a single human to contemplate on that, that itself will be much more meritorious than “saving” millions cows; of course, as we saw above a “saved cow” is not truly saved; it will pay its debts somehow or other.
- Yet, imagine the number of cow, pig, ... lives that one could save if one can point another human being toward becoming a *Sotāpanna*: that person will NEVER be born in any of the four *apāyā*. That could be an uncountable number of lives saved by “saving a SINGLE human.” That is the true “*abhaya dana*,” and that may not even cost any money.

10. The key point here is that a cow (or any other animal) cannot be “saved” by making it comprehend Dhamma. And, there is no way to “shorten the time of existence” or in this case the duration of the “cow

bhava.” the It just has to wait until the *kammic* energy for that existence to run out through however many “cow lives.”

- But a human can comprehend Dhamma and could change the type of existence, and say for example become a *brahma*. Furthermore, one could attain the *Sotāpanna* stage and be freed from the *apāyā*, and may even attain the *Arahanthood* stage.
- So, there is a HUGE difference in saving an animal life versus a human life.
- Still I am not discouraging anyone from saving an animal. I am just saying that there are better ways to utilize resources and try to help out humans. We never kill a bug or a fly that occasionally gets in our house. We have a “bug catcher cup” that we use to catch it and throw outside; trap the thing in the cup, slide a cardboard piece underneath slowly and carry to the door.

11. I need to also point out that the Buddha himself ate meat when offered under the conditions given in #3 above. In fact, the last meal of the Buddha was a “pork dish” which was especially made to alleviate the pain that the Buddha had with ulcer-like ailment.

- In this context, let us discuss another misconception about that “last meal.” After the meal, the Buddha asked the remainder of the meal not be consumed by any human, and to be buried. Some say this was because of a “contamination problem with that meal” which led to a discomfort of the Buddha. If there was a problem with the dish, the Buddha would have seen it beforehand.
- The reason that the Buddha asked the remainder of the meal to thrown away was simply because that meal was a special meal just like the first meal of milk rice offered to him at the time of the attainment of the Buddhahood. Such meals can be digested only by a Buddha. *Devas* and *brahmā* infuse highly potent nutrients into such meals; the Buddha was sustained for 7 weeks with that single meal of milk rice.

12. **Finally, the suffering of the animals is real, and this is one form of *sansāric* suffering that the Buddha referred to.** If you have nerves made out of steel, you can watch the gruesome acts that occur in some animal farms, see the full movie “Earthlings” at the following site (**Warning:** These scenes are highly disturbing to the mind, especially after about 10-15 minutes): “Nationearth.com”

- We should not hesitate to point out the bad consequences of raising animals under unfathomably harsh conditions in animal farms, and killing animals in unimaginably cruel ways.
- As I pointed out above, animals are bound to “reap what they already sowed in their past lives.” Nature always finds a way to impart *kamma vipāka*. But the problem is that humans volunteer to carry out those punishments, and in turn, generate much future suffering for themselves.
- Thus the only tragic that CAN BE AVOIDED is the creation of similar outcomes (in future births) for current humans who engage in such activities.
- In any case, we cannot force morality on others. We can only point out the dangers and help enact and enforce laws to forbid such unconscionable activities; such efforts have led to making cockfighting illegal in the United States.

Next, “[Do Things Just Happen? – The Hidden Causes](#)”, ..

7.1.5.3 Do Things Just Happen? – The Hidden Causes

October 30, 2015

Just like in science, Buddha Dhamma is based on cause and effect. Nothing happens without a cause (or more accurately multiple causes). But some of the causes are hidden and can be revealed only a Buddha with the perfect mind. By learning his Dhamma, we can figure out many such important and relevant causes that affect us.

1. There are many instances when we face a traumatic situation, and the first thing comes to our mind is “Why is this happening to me? What have I done to deserve this?.”
 - And when we encounter good fortune (say landing a good job or winning a lottery), we are overjoyed: “my luck has finally turned around.”
 - Both those conclusions are wrong. Nothing happens in this world without a cause (usually there are multiple causes). Things DO NOT just happen. Nature does not work that way. In science, we always look at the underlying causes to explain material phenomena.
 - A scientific theory is not even taken seriously unless it can provide evidence to support the theory, i.e., to illustrate “cause and effect.” Buddha Dhamma is based on “cause and effect.”
2. The “cause and effect” of inert objects is easy to see and verify. Scientists can accurately land a spaceship on the Moon because they can take into account all the causes and effects that would be relevant to the flight of the spaceship. All scientific progress is made due to the “apparent” causes and effects.
 - We can even predict/control the behavior of plants. By making suitable conditions for their growth, farmers can reap good harvests. Even when things do not work out with farming, we know the reasons (drought, too much rain, etc).
 - Thus we can verify the applicability of “cause and effect” when dealing with inert matter and vegetation. The causes are not hidden.
 - This principle is also known as “action and reaction” in physics. Every action has an equal and opposite reaction. Laws of *kamma* are more complex, but it is the same basic principle. You cannot expect to do something and assume that it has no consequences.
3. Unlike material phenomena that involve dead and inert matter, each sentient living being has a “history that goes back into the deep past” (a tree is living, but not sentient, i.e., it cannot think).
 - Therefore, for each sentient being, there could be causes that lie in the deep past. We just cannot see them (if we develop *abhiññā* powers, we could see some).
 - This is why it is hard for many people to grasp the concept of *kamma*. When we look around us, we may not see the “law of *kamma*” working. While a pious peasant may be living in a hut, a drug lord seems to be enjoying life. Yet, in the long run, the laws of *kamma* work: that pious peasant may be reborn to enjoy a good life, while the drug lord may suffer for a long time to come in future births.
 - **The present birth started due to past causes. It will proceed until that *kammic* power is exhausted. What we should be mainly worried about is the next life.**
 - All deeds have their consequences. As Nietzsche (1882) said, “..Lightening and thunder require time, the light of the stars require time, deeds require time even after they are done, before they can be seen and heard...”
4. Then people ask: “But where is the evidence for that?.” The (indirect) evidence is all around us. We just do not take time to analyze what we see. Our tendency is to take things at the face value, without bothering to analyze a bit deeper; see, [“Wrong Views \(Micchā Ditthi\) – A Simpler Analysis.”](#)
 - When we look around we see that some people are rich, some are poor; some die within a few months, but there are others live to old age; some are healthy and vibrant, others are sick most of the time, etc. All these happen now due to causes from past lives.
 - What are the causes for all those and much more varieties of life that we see all around us? Many more are discussed in, [“Vagaries of Life and the Way to Seek Good Rebirths.”](#)
5. Laws of *kamma* are nothing but “causes and effects.” Moral behavior leads to good results either in this life OR in future lives. Immoral behavior leads to bad results, including bad rebirths.

- However, *kamma* is nondeterministic, i.e., a cause does not inevitably lead to a result; see, “[What is Kamma? – Is Everything Determined by Kamma?](#).” By acting with mindfulness, one can avoid many possible bad *kamma vipāka*, and also make conditions for good *kamma vipāka* to come to fruition.
- Actually, without a Buddha in the world, a normal human cannot figure out these things on his/her own. But luckily, some evidence is coming from modern science due to the efforts of thousands of scientists over the past few hundred years.
- Many “wrong views” that people used to have in the old days have been corrected by science. Actually, those helped confirm what the Buddha taught 2500 years ago; see, “[Dhamma and Science](#).”

6. Our ancestors could not explain many natural phenomena like earthquakes, volcano eruptions, floods, etc and attributed those to “the fury of the Gods.” Even to date, whenever we don’t understand something, our tendency is to attribute that to a supernatural being and “fill that gap”; this tendency is called, “God of the gaps.”

- But advances in science are slowly but surely closing those gaps, that exist with regard to the workings of the MATERIAL WORLD. Those are due to natural causes.

7. However, there ARE gaps in our knowledge base that CANNOT be closed by the current approach of science. These are to explain the workings of the human mind or consciousness.

- Most theologians of today are correct in saying that mind cannot arise from matter; it does not make sense to say that a human with feelings and perceptions can just “arise” out of inert matter.
- However, there is no need to “fill that gap” with God either. The Buddha described in detail the workings of the human mind, which is separate from the working of the material world; see, “[Is Buddha Dhamma \(Buddhism\) a Religion?](#).”
- The “cause and effect” for the mind to arise is described by *paṭicca samuppāda*, but before that can start making sense, one needs to understand the basics of Buddha Dhamma discussed in the “[Key Dhamma Concepts](#)” section on the top menu.

8. Another effect that cannot be explained by current science is the “sense of fulfilment” one gets by giving to the poor. If one takes a totally materialistic view, it is not possible to see ANY benefits in giving.

- There was a wealthy brahmin at the time of the Buddha, who was very much against giving. He explained to others why giving can only lead to a loss by actually doing a demonstration: He took a sack of rice and started giving portions to those who gathered. At the end the sack was empty and he said, “look, this is what happens when you give. You lose what you have.”
- The Buddha explained that the brahmin was unable to see the benefits in giving even in this life (sense of joy), because of his wrong views, and thus there was no way he could see the benefits in future lives. The brahmin died and was born a dog at the same house. It is a long story and I may get to it in a future post.
- The key point here is that there are many things that cannot be explained by just what we see with our eyes. Cause and effect is not readily apparent when it involves the mind. Furthermore, benefits of giving are not proportional to the value of the things given, but the state of the mind of the giver.

9. But more than anything else, the truth of what the Buddha taught can be experienced. When one follows the path recommended by the Buddha one can feel and experience the results in this life itself.

- Just by reading and understanding Dhamma concepts one’s mind can become calm and peaceful; see, “[Key to Calming the Mind – The Five Hindrances](#).” I encourage everyone to peruse through different sections at the site and read first whatever seem to make sense or relevant to what one is looking for.
- For example, one of the key issues that led people to believe in a supernatural being was how morality can be there without such a being. But the Buddha taught that morality and immorality are both built into nature; see, “[Origin of Morality \(and Immorality\) in Buddhism](#).”

- It could be surprising to many. But Buddha Dhamma can explain ANY phenomenon, whether material or mind-based. Everything happens due to causes, even though some may be hidden from a normal human's sense faculties. By purifying one's mind, one can have a better understanding of how the nature operates; see, "[The Importance of Purifying the Mind.](#)"
- October 18, 2016: A new post explains this in more detail: "Micca Dīṭṭhi – Connection to Hethu Phala (Cause and Effect)."

7.1.5.4 Craving for Pornography – How to Reduce the Tendency

March 4, 2016; revised January 22, 2020; June 20, 2022; June 25, 2022

Craving pornography is fundamentally the same as any other sensual pleasure, but it could lead to serious crimes if not controlled. One must first abstain from activities harmful to oneself or others.

Introduction

1. Of course, engaging in sexual activities with one's spouse is not a problem for even a *Sotāpanna*. It is when one gets to the *Anāgāmī* stage that one AUTOMATICALLY loses the sexual urge; see, "[The Cooling Down Process \(Nibbāna\) – How Root Causes are Removed](#)" and "[Is It Necessary for a Buddhist to Eliminate Sensual Desires?](#)".

- Cravings for ordinary **sensory pleasures** (sexual or otherwise) CANNOT be removed by sheer will power, just like darkness cannot be removed by being willing for light. Darkness can be gotten rid of only by bringing in light.
- Sense desires can be cleansed only by "cleansing the mind," i.e., by contemplating the real (*anicca*) nature of the world. In simple words, that means seeing the bad consequences of strong cravings for sensory pleasures. As we discuss below, that understanding comes through learning Dhamma and getting rid of the extreme activities first.
- Even a *Sotāpanna* has only "seen" the futility of sense pleasures; he/she has not "experienced" the benefits of NOT DESIRING sense pleasures; see the posts in the "[Sotāpanna Stage of Nibbāna.](#)"

The Bigger Picture

2. We have had an uncountable number of rebirths so far simply because we cannot comprehend the consequences of attaching to sense pleasures and also because we become angry when we don't get what we desire.

- Those objects that we desire so much will lose their appeal over time. Sense pleasures, sexual or otherwise, are short-lived. Even if one can have access to sense pleasures, the ABILITY to enjoy them WILL decrease with time. That is something that people typically do not realize.
- The attitude of most people is, "I need to enjoy them to the fullest while I can." But one needs to stay away from extreme behaviors at least. Learning Dhamma will help to avoid **future suffering; one must start as soon as possible.** *When we get old, we lose not only the ability to enjoy such pleasures but also the ability to comprehend Dhamma (because our brains degrade with time).*

[WebLink: YOUTUBE: Changes: Young to Old](#)

Many of Our Habits Are *Saṃsāric* Habits (*Gatī*)

3. Fundamentally, craving sex-related activities are not any different from craving other sense pleasures. Each person has *saṃsāric* habits (*gatī*) for some specific set of sense pleasure(s).

- Some have an excess craving to eat tasty foods, some like gossiping about others, some want to go hunting, etc., and some may have the desire for sexual pleasure, and it is usually a combination of several. Each person has a unique set, and that changes with time too.
- The danger with such habits is that under extreme conditions, they could lead to worse actions. Sexual tendencies could especially become problematic. We all have heard about cases where “good citizens” committed rape when prevailing conditions led them to “lose control.”
- More on the subject at, “[The Law of Attraction, Habits, Character \(Gati\), and Cravings \(Āsava\)](#)” and posts therein.

Contemplate on Adverse Consequences

4. **The critical and first thing to do is to get rid of those habits that can bring harm to others. A *Sotāpanna* is inherently incapable** of doing such extreme actions because his/her mind has clearly grasped the consequences of such actions. Focusing on sexual urges, one MUST NOT DO certain things: rape and having relationships with children, or others’ spouses are prominent examples.

- Learning Dhamma helps through all stages of “rehabilitation.” Learning the adverse consequences of extreme habits such as those mentioned above is one way to convince the mind (i.e., subconscious *viññāṇa*) to voluntarily give up those habits.
- The Buddha said, “don’t do things to others that one would not like to be done to oneself.” Always try to pause a moment and contemplate the consequences of any harsh action. That is the basis of *Kāyānupassanā* in *Satipaṭṭhāna* meditation; see, “[Mahā Satipaṭṭhāna Sutta](#).”

Learning and Following Buddha Dhamma Will Help

5. It is also important to realize that one cannot remove the basic tendencies for ordinary sense pleasures by sheer willpower alone. Trying to do that could bring more harm (stress) than benefits.

- The key is to train the mind to grasp the harmful future consequences of **extreme** habits and desires (*gati*), whether it is due to excess craving for sex or the tendency to get mad at the slightest provocation. These are all habits that most likely originated in many lives back.
- We either develop new habits via repeated use or more likely re-energize and further cultivate old habits from previous lives.
- The following links discuss how to change one’s *gati*: “[9. Key to Ānāpānasati – How to Change Habits and Character \(Gati\)](#)” and “[How Habits are Formed and Broken – A Scientific View](#),” among others. One could type *gati* or habits in the Search button on the top right and get a list of relevant posts.

The validity of the Rebirth Process – Actions Have Consequences

6. The other important thing to realize is that one does not NEED TO get rid of less-severe cravings for sense pleasures (sexual or otherwise) at once. The key is to do it gradually. It is better to say, “realization will sink in gradually as one learns Dhamma or the true nature of this world.”

- The Buddha gave the following simile: When one is cultivating a field, all one needs to do is to follow the procedures that will optimize bringing a good harvest. One needs to prepare the soil, plant healthy seeds, and then keep weeds out. One must also provide water and nutrients regularly. There is no point in watching the plants throughout the day to see whether they are growing or to worry about them. They will grow and yield a good harvest if one does one’s part.
- In the same way, one needs first to understand the basic broader world view, i.e., that we are spending a relatively short time in this life and move from life to life-based on causes that we create (based on how we live). The post on *dasa akusala* (ten defilements) is a guide: “[Ten Immoral Actions \(Dasa Akusala\)](#).”

7. Here is a list of critical things that is comparable to getting the soil ready to plant the seeds:

- One needs to first understand, at least to some extent, the long-term nature of our lives far beyond our deaths. **Many people believe that it all ends with this life. What if that is not correct? One needs to make sure, because the answer to that question may have consequences for billions and trillions of years to come.**
- Also, do things happen, or do they arise due to CAUSES? The principle of causality (cause and effect) is the basis of science. Things ALWAYS occur due to (multiple) causes. People don't just get born out of nothing. Previous causes led to the birth of a human being (or any other living being). The Buddha said these causes are the *kamma*, what we have done in the past.
- There are certain principles or laws that Nature follows. Scientists can explain most of the things that happen to inert objects: If one throws up a stone, we can even calculate its path on the way back to the ground. The reason that it falls to the ground is that the Earth is pulling it down; that is the cause for it to fall. Like that, EACH AND EVERY EVENT has a reason. Events based on mental causes typically are complex and not easy to sort out).

Consequences in the Rebirth Process

8. After making some progress, one needs to contemplate the implications of over-indulgences: (1) They are short-lived. When one's ability to enjoy them goes away, one gets depressed, (2) Such over-indulgences build corresponding character or "*gati*," and one's future births are according to one's *gati*.

- Another *samsāric gati* is the tendency to get angry at the slightest provocation. Here also, one needs to think about the adverse consequences of that behavior.
- In both cases, the harmful consequences are two-fold: The short-term result is that one gets stressed out shortly after responding to the "urge" and getting temporary relief.
- The more adverse long-term consequences are worse. Each time one does it, the habit strengthens. Furthermore, **depending on the action**, one may cultivate animal *gati* (when blinded by extreme sense pleasures) or *niraya gati* (when blinded by rage).

9. There is a reason that one is born human and another is born an animal. A human-born had done a wholesome *kamma* that deserved being born human. Furthermore, that *kamma* was possible because that person tended to do that type of deed. This tendency to do certain things depends on one's "*gati*."

- If a human displays "animal *gati*" or does things that animals do (do whatever one feels like doing without any consideration for others, have sex indiscriminately, etc.), then it is likely that he/she will be born an animal in the future.
- On the other hand, if a human displays kindness, can even tolerate others' bad behavior, etc., then he/she has *deva* or *Brahma* "*gati*," then he/she is likely to be born a *deva*, *Brahma*, or a human, in future lives.
- In the language of *Paṭicca Samuppāda*, "*jāti*" is according to "*bhava*," "*bhava*" according to "*upādāna*," "*upādāna*" according to "*taṇhā*," i.e., "what one likes to do or has a craving for." Thus if one likes to do what dogs usually do, then a future "*jāti*" or birth as a dog is hard to avoid. That is true for any other kind of birth.

Buddha's Middle Way

10. Thus whether it is a sexual craving or any other craving for sensory pleasure, we need to be careful first to avoid any extreme behavior. One cannot jump from the bottom of the ladder to the top; one has to climb step-by-step. Get rid of the worst habits first and move up on the ladder.

- The one who was born an animal was likely to have engaged in activities suitable for an animal; some of the sexual activities shown in pornographic movies are suitable only for animals. One does such extreme deeds due to a reason, i.e., one has tendencies or *gati* to do such acts. They do not change much unless

one willfully tries to change them. Getting rid of such extreme behavior is the first step. The sooner done is better.

- Then one can tackle less severe problems. Always thinking about tasty foods and overeating is as bad as the tendency to watch adult movies habitually. They are both bad habits that need to be broken gradually, with an understanding of the consequences. Of course, pornography has different categories; one tends to watch “extreme” pornography when one has extreme habits.
- **A living being can significantly change its “*gati*” only as a human.** An animal is not capable of any significant change of character, even though some of its habits can be changed if trained by a human. Even for *devas* and *Brahmā*, it is hard to improve their *gati* unless they had attained the *Sotāpanna* stage of *Nibbāna* as a human.

Summary

11. In summary, one MUST stop the most harmful acts (which could lead to rebirth in the lowest four realms or the *apāyā*) by any means possible using sheer will power. However, less harmful acts will reduce over time. One needs to follow a systematic procedure as outlined in the links given in # 4 and #5 above.

- Learning Dhamma can reduce the tendency to engage in any immoral or unwise activities in the long run. In this regard it is essential to understand the different levels of greed and hate; see, “[Sorting out Some Key Pāli Terms \(Tanhā, Lobha, Dosa, Moha, etc.\)](#)” and, in particular the post, “[Lobha, Dosa, Moha versus Raga, Patigha, Avijjā](#).”
- The section on “[Assāda, Ādīnava, Nissarana](#)” provides more advanced analyses, especially for those who are at least on the way to becoming a *Sotāpanna*, i.e., a *Sotāpanna magga anugāmi*.

7.2.1 Sansāric Habits, Character (Gati), and Cravings (Āsava)

Revised December 7, 2016

Our character (*gati*), behavior, and cravings (*āsava*) sometimes have causes from past lives. It is easier to break bad habits when one understands causes and consequences.

- In the “Moral Living” section, we discussed how to get rid of bad habits, incorporate good habits, and thus achieve goals; see, [“Habits, Goals, and Character \(Gati\)”](#). We saw that one’s behavioral patterns or habits can form one’s character (*gati*). Here we will see that some of these habits are not formed in this life, but may have origins in previous lives. In a way, these are only “discernible things” we carry from life-to-life; see, [“What Reincarnates? – Concept of a Lifestream.”](#)

1. **Habits (“*gati*” in Pāli and Sinhala)** are acquired by the repeated use. Habits can be neutral (one can make a habit of start brushing teeth on the top left), good (exercising at a scheduled time), bad (smoking).

- The more one can stick to a set habit, that habit becomes more ingrained in the mind. Riding a bike or learning to drive is a habit to learn. Initially it is hard, but once the habit is formed it is done almost automatically; it becomes an ingrained “*gati*.”

2. Bad habits can be stopped by making a conscious effort to disrupt the habit. Initially this takes a lot of effort, and that is why assessing the consequences and convincing the mind of the dangers of a bad habit is important at the very beginning.

- Replacing a bad habit with a good (at least less harmful) habit is also important. Instead of smoking, one could chew on a chewing gum when one gets the urge.

3. Habits also help mold the character (*gati*) of a person. We see very different qualities of character among people: kind and malicious, calm and agitated, thoughtful and easily-excitable, etc. It is easy to see that people with “bad character qualities” are those with one or more prominent bad habits.

- But the good news is that no one is “inherently bad.” There are causes (reasons) for a person to have bad habits/character, and once those causes are removed one becomes a person with good habits/character.

- The best example is Aṅgulimāla, who lived during the time of the Buddha and killed close to thousand people. The Buddha was able to show him the consequences of his behavior and he was able to attain the *Arahantship* within a few weeks!

5. It is not only humans that display such personal characteristics; animals have them too. Some dogs are vicious while others are adorable; some are more loyal than others, etc.

- These are habits/character (*gati*) that have been molded over multiple lives; but most character (*gati*) CHANGES happen only during a human life, because human mind is the most capable of CHANGING habits. Animals, for example, are more like robots (not completely).

6. Bad habits are formed via bad judgements arising from a defiled mind that is covered by the five hindrances. And bad habits lead to actions that further strengthen those same habits.

- Once a certain bad “*gati*” becomes established it can even lead to a birth with that “*gati*,” i.e., will be destined for “*dugati*” (du + *gati*) which is another name for the *apāyā* (the four lowest realms). for example, someone who behaves and acts like an animal could well be reborn an animal.
- The cycle needs to be broken to stop this self-feeding process. But as long as the hindrances are there, it is likely that sooner or later new bad habits will be formed.

7. Those beings that are in the *apāyā* can be put in to four major categories according to the proportions of greed and hate that are in their sansāric “*gati*” (of course ignorance is in all of them) :

- *Pretas* [Sanskrit], *petas* [Pāli], i.e., hungry ghosts, have “greedy” *gati*.
- Those in the lowest realm, *niraya* (hell), have *gati* dominated by hate.
- Animals have “*gati*” with both greed and hate. Therefore, the Pāli (or Sinhala) word for animals is “*thirisan*” (=“thiri”+“san” or three defilements). Remember that ignorance is there always.
- Those in the *asura* (“a”+“sūra”, where “a” means “not” and “sūra” means proficient or capable; thus *asura* means those who depend on others, and are lazy) realm have the habit of doing as least as possible and exploit others’ hard work.

8. Similarly, one who cultivates good habits is destined for a “good” rebirth (*sugati* = su + *gati*), i.e., human realm or above. For example, one who does not indulge in sense pleasures and cultivates compassion and loving kindness could be reborn in the Brahma realms where there is relatively less suffering, and mostly *jhānic* pleasures.

- *Devas* (realms 6-11) are full of compassion and do not have hateful thoughts. But they like to enjoy sense pleasures.
- *Brahmā* (realms 12-31) do not have either greed or hate.
- Humans (realms 5) COULD have all three. However, the unique aspect of the human realm is the ability to purify one’s own mind and REMOVE all three, and become an *Arahant* (attain *Nibbāna*). This is done by following the Noble Eightfold Path and removing all “bad habits” one has.

Of course, *Devas* and *Brahmā* both have ignorance, and thus could be reborn in any realm when they die (unless they had attained the *Sotāpanna* stage).

9. Once ingrained in the mind, habits can be carried over repeated rebirths, from life to life. One who is easily tempted by alcohol is likely to have had that habit in the previous lives.

- One who forms that habit in this life (even if he did not have it before), is likely to carry it over to the next life. Similarly, one who cultivates generosity in this life is likely to have that habit in the next life as well.

10. If those bad habits keep building up life after life, they get fermented and solidified and thus will become deeply embedded in one’s psyche. We all carry deeply ingrained *sansāric* habits associated with one or

more of defilements. **These are called mental fermentations or deeply embedded cravings (“*āsava*” in Pāli or Sinhala).**

- Some *gati* and *āsava* lay hidden (sleeping), and are called “*anusaya*.” With a strong enough “trigger” an ingrained *anusaya* can be brought to the surface. *Anusaya* are the hardest to get rid of.
- **When one continually acts in ways to strengthen one’s *gati* (character), that makes the corresponding *āsava* and *anusaya* even stronger.**

11. Thus it is clear why breaking bad habits is critically important, not only for the benefit of this life, but also for future lives.

Next, “[Complexity of Life and the Way to Seek “Good Rebirths”](#)”,

If you would like to read about how these *āsavas* can be removed, see, “[The Way to Nibbāna – Removal of Āsavas.](#)”

7.2.2 Complexity of Life and the Way to Seek “Good Rebirths”

Revised May 18, 2017; March 14, 2020; July 3, 2022; July 24, 2022

Introduction

1. Everything we see around us can be roughly put into three categories: lifeless matter, plant life, and sentient beings (i.e., life with consciousness). Scientists have been most successful in explaining the behavior of inert matter, at least on the macroscopic scale.

- For example, a rocket can be launched with high precision to land on a given spot on the Moon.
- However, complexity increases when going to biological matter without consciousness (plants).
- Complexity is highest for sentient beings.

Complexity of Life

2. The behavior of a sentient being is almost impossible to predict with any kind of precision. This is because the working of a mind with 89 types of *citta* (thoughts) and 52 types of *cetasika* (mental properties) is very complex; see “[The Grand Unified Theory of Dhamma](#)” and the posts in the “Abhidhamma” section.

- However, the Buddha has taught us how to understand why different living beings are born that way and why people are born with wide-ranging health, wealth, beauty, etc.
- Laws of *kamma* can explain such phenomena that involve conscious minds.

3. When we look around, we see that animals generally encounter more suffering than humans. Even among people, the range of suffering is enormous. Then some people seem to be enjoying life without showing signs of suffering.

- Also, some are born rich, healthy, beautiful, etc. others are born in poverty, handicapped, ugly, etc.
- As discussed above, people’s character also lies in a very broad spectrum.
- Furthermore, the “fortunes” of a given person could change drastically in a relatively short time. One could go from being penniless to riches or the other way around quickly.
- When we look at animals, some pets get treated even better than some humans, while others live under horrible conditions. They also have a wide range of personal characteristics.

The Complexity of Life – Buddhist Explanation

4. Such apparent vagaries of life have perfectly good explanations in Buddha Dhamma. However, there are no simple one-to-one correspondences compared to the comparatively simpler rules that are available for tracking the behavior of macroscopic inert objects.

- One time a Brahmin asked about how that happens. The Buddha's description is in the "[WebLink: suttacentral: Cūlakammavibhaṅga Sutta \(MN 135.\)](#)."

5. The behavior of (macroscopic) inert matter can be explained in terms of simpler cause and effect. If one knows the current conditions, one can predict the future using scientifically-found natural laws (the law of gravitation or laws of relativity).

- However, even this is beginning to change with the advent of quantum mechanics; we are now beginning to probe the realm where matter merges with the mind. See, for example, "[Origin of Life](#)" and "[Dhamma and Science](#)."

6. Similarly, the behavior of life can be explained in terms of *kamma vipāka* (results of one's actions) together with habits ("*gati*") and *āsava*; see "[Sansāric Habits and Āsavas](#)." However, unlike cause and effect regarding inter matter, the behavior of life is much more complex because the MIND IS COMPLEX, see "[The Grand Unified Theory of Dhamma](#)."

- There are many causes (innumerable *kamma vipāka* and numerous types of habits and *āsava*) leading to many effects, versus just one or few causes leading to one or more effects.
- This is discussed in many *suttā*, but a good start is the "[WebLink: suttacentral: Cūla Kamma Vibhaṅga Sutta \(MN 135\)](#)." That site gives translations in several languages, but as with most websites, translations of some key Pāli words may not be accurate.

Good and Bad *Kamma* Bring Corresponding *Vipāka*

7. In general, good habits and good *kamma vipāka* lead to rebirth in realms at or above the human realm. We need to ensure not to commit any *akusala* (unwholesome) *kamma* that could lead to rebirth in the four lower realms (*apāyā*) and to engage in meritorious actions.

- Another is to realize that *āsava* (mental fermentations or deeply embedded cravings) could lead to spontaneous actions (in a rage or a sudden mental weakness). Maintaining good habits, removing bad habits, and acting with generosity, kindness, and wisdom help clean up the deeply embedded *āsava*. That will help prevent such actions impulsively.

Meditation Is Contemplation

8. Any meditation (*Samatha*, *Mettā*, and *Vipassanā*) will also be helpful. Just contemplating good thoughts and suppressing bad thoughts as they arise throughout the day is also meditation (this was the original definition of *Bhāvanā*).

Next, "[How to Avoid Birth in the Apāyā](#)."

7.2.3 How to Avoid Birth in the Apāyā

Revised July 3, 2022

1. There are five heinous *kamma* (acts) that GUARANTEE a rebirth in the lowest four realms (*apāyā*) in the *very next birth*. These are called the *pañca ānantariya kamma* or five acts that will bring a bad birth without "a gap" (unlike many *kamma vipāka* can come to fruition in later lives, i.e., their results are seen only later in *samsāra*). These five are:

- Killing one's mother
- Killing one's father

- Killing an Arahant
- Causing an injury to a Buddha
- Causing schism in the Saṅgha (the monastic order)

2. The next level is “*niyata micchā diṭṭhi*” or “an established wrong world view” (which means one is not even willing to consider the possibility that one could be wrong in holding onto such views) that will cause one to be born in the *apāyā* at some point in *samsāra*. This means that one with these false views could be reborn in the *apāyā* in the next life or any future life. There are eight such views: [*niyata* : [adj.] sure; certain; constant.]

- No such thing as, (1) mother, (2) father, (3) Buddha, (4) rebirth, (5) *kamma vipāka*, (6) *opapātika* birth (instant full-formed birth), and the existence of (7) *apāyā*, and (8) *rūpa loka/arūpa loka*. For explanations on (6)-(8), see, “[The Grand Unified Theory of Dhamma](#).”

3. Thus the possibility of a birth in the *apāyā* in any future birth is there until all **established (unshakable) wrong views (*niyata micchā diṭṭhi*) are rejected by one's mind. We all have committed both good and bad kamma in the past lives that we are not aware of; thus any of those could cause a birth anywhere in the 31 realms.**

4. It is important to remember that those false views cannot be just memorized and pretended to be discarded. The mind needs to be convinced that those are indeed false views. This is why it is important to examine the world view of the Buddha. These are the key concepts discussed in the top menus, especially, “[What is Buddha Dhamma?](#)” and “[Key Dhamma Concepts](#).”

5. The only guaranteed way to stay out of the *apāyā* (the four lowest realms) in ANY future life is to become a *Sotāpanna Anugāmi/Sotāpanna*.

What Happens at the Sotāpanna Stage?

1. As I keep repeating, the Buddha is just the messenger. He discovered the true nature of this world. First of all, this world is much more complex than we perceive. In order to understand how to remove suffering, one has to understand the causes, and that requires a complete picture of “this world” (see, “[What is Buddha Dhamma?](#)” and in particular, “[The Grand Unified Theory of Dhamma](#)”) and also why it is not possible to remove suffering without understanding the Three Characteristics of “this world” (see, “[Key Dhamma Concepts](#)” and in particular, “[Anicca, Dukkha, Anatta - Wrong Interpretations](#)”).

2. When one “sees” the true nature of “this world”, the mind will automatically give up those false views mentioned in the above section (#2). **This is why it is first important to learn Dhamma first.** No one, regardless of one's high intellect, can discover the complete set of nature's laws other than a Buddha.

3. From the discussion so far, it is clear what needs to be done to reach the Sotāpanna stage. All that is needed is to carefully examine the world view of the Buddha as mentioned in #1 in this section. One needs to understand the “vision”, and to become “*dassanena sampanno*” or “one with a clear vision.” This is why “*dassanena pahātabba*” or “removal by vision” is listed as #1 item in the seven items required to attain *Nibbāna* in the *Sabbasava Sutta*; see, “Key Points in the *Sabbasava Sutta*” in “[The Sotāpanna Stage](#).”

4. Thus essentially all that happens at reaching the Sotāpanna stage is to get a clear world view. Now one has understood the true nature of this world, and thus “knows” that it is not possible to achieve lasting happiness anywhere in the 31 realms. One may not have removed any *āsava* other than the *diṭṭhāsava* (*diṭṭhi āsava*). Thus one still may have *kāmāsava*, *bhavāsava*, and *avijjāsava*, i.e., one still may have greed, hatred, and ignorance even though parts of all three have been permanently been removed by the clear vision. How the *āsava* are formed starting with habits is discussed in the “[Habits and Goals](#),” “[Sansāric Habits and Āsavas](#),” and “[The Way to Nibbāna – Removal of Āsava](#)” sections in that order.

5. Therefore, even though one may have greed, hate, and ignorance left, one knows what they are. And one knows how to remove them.

- After attaining the *Sotāpanna* stage one does not need a teacher. One knows what needs to be done. As one gets rid of the remaining *āsavā*, the vision becomes clearer, and *avijjā* is removed completely (with all four *āsavā* [*kāmāsava*, *bhavāsava*, *diṭṭhāsava*, and *avijjāsava*]) only at the Arahant hood.

Next, “[How the Buddha Described the Chance of Rebirth in the Human Realm](#)”,

7.2.4 Rebirth – Connection to Suffering in the First Noble Truth

June 8, 2021; revised August 7, 2022

[This topic replaces the old topic “**How the Buddha Described the Chance of Rebirth in the Human Realm.**”]

Rebirth in the lowest four realms is responsible for the “long-term suffering” that the Buddha pointed out in the First Noble Truth. Even though there is less suffering in the higher realms, most rebirths are in the lower realms. That is why there is NET suffering the rebirth process by a huge margin.

Living a Moral Life Is Not Enough

1. Many believe that if we live a “good, moral life,” a human rebirth or rebirth in higher *deva* worlds is guaranteed. That is a misconception. Even if we do not accumulate a new bad *kamma* in this life, we may have accumulated uncountable bad *kamma* in our past lives. **That is why it isn’t easy to get a human existence (*bhava*).**

- Evidence for rebirth is in “[Evidence for Rebirth](#).” Rebirth can occur not only as a human but in any of the 31 realms. Most suffering in the cycle of rebirth occurs in the lowest four realms: *niraya* (hell), *asura*, animal, and *peta*. Of those four, only the animal realm is visible to us. They are collectively called the *apāyās*.
- Getting a “human existence (*bhava*)” is rare. But once one grasps a human *bhava*, one could be born (*jāti*) many times as a human until the *kammic* energy for that human *bhava* is exhausted. That is why children can recall past lives. In between consecutive human births, that lifestream exists in the nether world or “*para loka*” as a *gandhabba* with a subtle body; see, “[Hidden World of the Gandhabba: Netherworld \(Para Loka\)](#).”
- The 31 realms of existence are described in “[The Grand Unified Theory of Dhamma](#).”

Most Rebirths Are in the Four Lowest Realms

2. Starting with the “[WebLink: suttacentral: Nakhasikhā Sutta \(56.51\)](#)” there are about 80 *suttās* in the *Saṃyutta Nikāya* 56 that describe the chance of rebirths in good realms (human and above) compared to those in the lowest four realms.

- Here is the English translation at Sutta Central: “[WebLink: suttacentral: A Fingernail \(SN 56.51\)](#).” You can go through the whole series there.
- Those *suttās* specifically state the rarity of rebirth in a “good realm” and the common occurrence of rebirths in bad realms. Many *suttās* specifically state that for a sentient being in any realm, rebirths will be mostly in the *niraya* (hell), animal (*tiracchāna*), hungry-ghost (*peta*) realms; see SN 56.102 through SN 56.131.
- Another version of the *Nakhasikhā Sutta* is in *Saṃyutta Nikāya* 20, summarized below.
- Before that, it is good to emphasize the difference between a human *bhava* and births with a human body (*jāti*) within that human *bhava*.

Human *Bhava* Is Rare – But It Can Last a Long Time

3. Some people ask the following question: If human birth is so rare, why do rebirth accounts indicate human rebirth only after a few years of death? The answer lies in the fact that a human *bhava* is rare.

- When a sentient being is born a human, that “human *bhava*” has a specific *kammic* energy, say several thousand years worth. In that case, the person may be born (*jāti*) with a human body many times. In between, that human lives with only a *manomaya kāya* (i.e., as a *gandhabba*).
- For example, if a *Deva* dies and gets a human *bhava*, then at the *cuti-patisandhi* moment, a human *gandhabba* is born into human *bhava*. After some time, that *gandhabba* gets into a womb, and a human baby is born. When that human grows old and dies, there is still much more time left in the human *bhava*. Thus, the *gandhabba* comes out of that dead body and waits for another womb. See “[Bhava and Jāti – States of Existence and Births Therein](#)” and “[Cuti-Patisandhi – An Abhidhamma Description](#).”
- In most other realms (i.e., *Deva*, *Brahma*), there is only one *jāti* within that *bhava*. Multiple *jāti* within a *bhava* is common in the human and animal realms.
- It isn't easy to get a human *bhava*, but once in a human *bhava*, one can be born tens or even hundreds of times as a human. A given animal may be reborn thousands or even millions of times in that animal realm to exhaust that *kammic* energy.
- Of course, we cannot see realms other than the human and animal realms. We can easily discern the rarity of human *bhava* by comparing the number of humans to the number of animals. While there are only about 8 billion humans, there are multiple trillions of ants alone! But modern science has shown that billions of microscopic sentient beings live in a single human body. Let us discuss that next.

The abundance of Animal Life Compared to Human Life

4. Even though the similes given in the *suttās* below may seem out of proportion with the realities, there are not. Modern science has given a boost to Buddha Dhamma by making many things clear. Ordinary humans were unaware of the existence of innumerable microscopic living beings until the invention of the microscope in the 1500s. In 1676, Van Leeuwenhoek reported the discovery of micro-organisms. He observed numerous tiny living beings in a glass of water; see, <https://en.wikipedia.org/wiki/Microscope>

Here is a short video showing countless such microscopic creatures:

[WebLink: youtube: There are as many creatures on your body as there are people on Earth](#)

- If you go out and dig some dirt, there could be millions of living organisms. There may be a few humans in a household, but possibly billions or even trillions of microscopic living beings. The oceans cover two-thirds of the Earth's surface, and living creatures are much more densely packed. And there are beings in other 29 realms that we cannot see. Seven billion or so humans in this world are indeed a thumb-full compared to countless living creatures associated with the Earth (as the Buddha stated in the *Nakhasikha Sutta*; see below).
- Uncountable sentient beings are living in the water. One can actually “see” such microscopic beings in a glass of water if one develops *abhiññā* powers; see “[Power of the Human Mind – introduction](#).” One time, a *bhikkhu* who had developed *abhiññā* skills but had not become an *Arahant* saw the presence of a large number of microscopic beings in a glass of water. He tried to filter them out but was unsuccessful and became distraught. The Buddha told him that “it is not possible to live in this world without harming other beings. It is necessary to live this life to attain *Nibbāna*” and to drink the water. The INTENTION is to quench the thirst; see “[How to Evaluate Weights of Different Kamma](#).”
- Modern science has confirmed that millions of living beings are on a single human body (and any other large animal). Scientists have used sophisticated instruments to see such microscopic creatures. See, “[There are as Many Creatures on your Body as there are People on Earth!](#).”
- Now, let us briefly discuss a few of the *suttās* mentioned in #2 above.

The Rarity of Human Existence

5. As mentioned in #2 above, the [WebLink: suttacentral: Nakhasikha Sutta \(SN 20.2\)](#) provides a good analogy of rare human existence. **We have that opportunity, and we should not waste it.**

Translation:

At Sāvattthī. Then the Buddha, picking up a little bit of sand on his fingernail, addressed the *bhikkhus*: “What do you think, *bhikkhus*? Which is more: the little bit of sand on my fingernail or this great Earth?”

“*Bhante*, the great earth is far more. The little bit of sand on your fingernail is tiny. Compared to the great Earth, those cannot be compared or even imagined; it is not even a significant fraction.”

“In the same way, *bhikkhus*, sentient beings reborn as humans are few as this bit of sand on my fingernail. But those not reborn as humans, are many as the sand on this great Earth. Therefore, you should strive diligently and without delay to end this suffering in the rebirth process.”

6. Another favorite sutta of mine is the [WebLink: suttacentral: Dutiyachiggalayuga Sutta \(SN 56.48\)](#).

Translation:

“*Bhikkhus*, suppose that this great Earth had become one mass of water, and a man would throw a yoke with a single hole upon it. An easterly stream would move it eastward. A westerly stream would move it westward; a northerly flow would move it northward. A southerly stream would move it southward.

There was a blind turtle that would come to the surface once every hundred years. What do you think, *bhikkhus*, would that blind turtle, coming to the surface once every hundred years, insert its neck into that yoke with a single hole?”

“It would be a rare occurrence, *Bhante*, that the blind turtle, coming to the surface once every hundred years, would insert its neck into that yoke with a single hole.”

“So too, *bhikkhus*, how extremely rare that one is born a human.

You have this rare chance now, *bhikkhus*, to be not only born a human but be born while a *Tathāgata* has arisen in the world. While the Dhamma and Discipline proclaimed by the *Tathāgata* shine in the world.

Therefore, *bhikkhus*, you should strive without delay to understand the following. ‘This is suffering (*dukkha*). This is the cause of suffering (*dukkha samudaya*). This is how that cause can be removed (*dukkha nirodhaya*). And this is the way leading to the cessation of suffering (*dukkha nirodha gāmini patipadā*).’”

- The other related issue is that this rebirth process will not stop until one truly comprehends the FACT that existence in this world of 31 realms is not only unfruitful, but also DANGEROUS. That is the “*anicca* nature” in *Tilakkhana*.
- This rebirth process has no “discernible beginning,” as stated by the Buddha. We have suffered mightily, and this is the opportunity for a rare human life to end that suffering.

Unimaginable Length of the Rebirth Process

7. There are 20 *suttās* in *Saṃyutta Nikāya* 15 (SN 15.1 through SN 15. 20) that provide various analogies to describe the length of the rebirth process. Let us look at the [WebLink: suttacentral: Assu Sutta \(SN 15.3\)](#).

Translation:

First, the Buddha made the famous statement: “*Anamataggoyam bhikkhave, samsaro pubbā koti na pannāyati avijjā nivārananam sattānam taṇhā-samyojananam sandhāvatam samsāratam.*”

- **Translated:** “*Bhikkhus*, this rebirth process has no discernible (*na pannāyati*) beginning. Beings whose minds are covered by ignorance and **are bound to this rebirth process with bonds of craving.**”

The rest of the *sutta* is as follows:

“What do you think, *bhikkhus*: Which is greater, the tears you have shed while trapped in this rebirth process or the water in the four great oceans? (crying because of being born into a bad birth **or** separated from loved ones in good births).”

“As we understand the Dhamma taught to us by the *Bhante*, the tears we have shed while trapped in this beginning-less rebirth process is greater than the waters in the four great oceans.”

“Excellent, *bhikkhus*. It is good that you thus understand the Dhamma taught by me. That is the larger: the tears you have shed while trapped in this beginning-less rebirth process — not the water in the four vast oceans.

Long have you (repeatedly) experienced the death of a mother? The tears you have shed over the death of a mother while trapped in this beginning-less rebirth process are greater than the water in the four vast oceans.

Long have you (repeatedly) experienced the death of a father, death of a brother, death of a sister, death of a son, death of a daughter, loss of relatives, or loss of wealth. The tears you have shed over diseases while trapped in this beginning-less rebirth process would fill the four vast oceans.

Why is that? The beginning of this rebirth process is not discernible.”

- In another analogy in SN 15.13, the blood from uncountable times when one is killed while born a specific animal (deer or cow, for example) is more than the water in the four oceans.

Summary

1. As pointed out in those 20 *suttās* (SN 15.1 through SN 15. 20), Buddha used many analogies to describe the unimaginable length of the rebirth process (*Samsāra*): **it is infinite**. There is no discernible beginning to “sentient life.” **The principle of Causality dictates that there can be no “beginning.”**

- Infinity is hard to comprehend. Scientists have only recently realized this; see “[Infinity – How Big Is It?](#)” and “[Origin of Life – There is No Traceable Origin.](#)”
- Many scientists are discussing these “hard to fathom” ideas about infinity. Of course, they are unaware of Buddha’s teachings. See, for example, “The Beginning of Infinity” by David Deutsch (2011).

2. The other *suttās* discussed in #2 above emphasize that it is rare to be born a human, *Deva*, or *Brahma* in this rebirth process.

3. Therefore, each of us has spent MOST of that time in the suffering-filled lowest four realms (*apāyās*.) Even though the realms at and above the human realms have much less suffering than the *apāyās*, the time spent in those higher realms would have been insignificant.

- This is why it is unwise to seek rebirths in higher realms. Even though the lifetime in a *Deva/Brahma* realm can be many millions of years, that is INSIGNIFICANT compared to the time spent in the *apāyās* over the long run.
- We CANNOT avoid births in the lower realms as long as we do not comprehend these facts (Noble Truths) about this world. The deeper one’s understanding is, the clearer it becomes. **Then one’s *taṇhā* and *upādāna* for “worldly pleasures” will AUTOMATICALLY diminish and disappear. That CAN NOT be forced.**

4. **That is the suffering addressed in the First Noble Truth (the truth about suffering or “*dukkha sacca*.”)** The Second Noble Truth is about the causes of that suffering (the truth about “*dukkha samudaya*.”) The Third Noble Truth says we can stop future suffering by eliminating those causes (the truth about “*dukkha nirodhaya*.”). The Fourth Noble Truth is the way to achieve that goal (the truth about “*dukkha nirodha gāmini patipadā*.”)

- Most human beings head to the *apāyās* because they are unaware of the ten immoral actions; see “[Ten Immoral Actions – Dasa Akusala](#)” and “[How to Evaluate Weights of Different Kamma](#).” It is also essential to know the baseline procedure to avoid such immoral actions and cultivate moral behavior; see, “[Punna Kamma – Dāna, Sīla, Bhāvanā](#).”

7.2.4.1 **How the Buddha Described the Chance of Rebirth in the Human Realm**

Revised May 5, 2017, August 24, 2017; October 30, 2018; February 29, 2020; June 3, 2021

Many people believe that if we live a “good, moral life,” a human rebirth or rebirth in higher *deva* worlds is guaranteed. That is a misconception. Even if we do not accumulate a single new bad *kamma* in this life, we may have accumulated many bad *kamma* in past lives. **That is why it isn’t easy to get a human existence (*bhava*).**

- Evidence for rebirth is at “[Evidence for Rebirth](#).” Rebirth can occur not only as a human but in any of the 31 realms. Most suffering in the cycle of rebirth occurs in the lowest four realms: *niraya* (hell), *asura*, animal, and *peta* realms. Of those four, only the animal realm is visible to us. They are collectively called the *apāyā*.
- Getting a “human existence (*bhava*)” is rare. But once one grasps a human *bhava*, one could be born (*jāti*) many times as a human until the *kammic* energy for that human *bhava* is exhausted. That is why children can recall past lives. In between consecutive human births, that lifestream exists in the nether world or “*para loka*” as a *gandhabba* with a subtle body; see, “[Hidden World of the Gandhabba: Netherworld \(Paraloka\)](#)”
- The 31 realms of existence described in “[The Grand Unified Theory of Dhamma](#).”

1. From the *Nakhasikha Sutta* (SN 20.2):

Pāli version: [WebLink: suttacentral: Nakhasikha Sutta \(SN 20.2\)](#):

Translation:

At Sāvattthī. Then the Buddha, picking up a little bit of sand on his fingernail, addressed the *bhikkhus*: “What do you think, *bhikkhus*? Which is more: the little bit of sand on my fingernail, or this great Earth?”

“*Bhante*, the great earth is far more. The little bit of sand on your fingernail is tiny. Compared to the great Earth, those cannot be compared or even imagined; it is not even a significant fraction.”

“In the same way, *bhikkhus*, sentient beings reborn as humans are few as this bit of sand on my fingernail. But those not reborn as humans are many as the sand on this great Earth. Therefore, you should strive diligently and without delay to end this suffering in the rebirth process.”

Let us make two points clear regarding the above simile of the Buddha:

1. When a being gets a human life, that “human *bhava*” has a specific *kammic* energy associated with it, say 1000 years worth. In that case, the person may be born a few times with a human body (this is the difference between “*bhava*” and “*jāti*”). The *cuti-paṭisandhi* transition to a new “*bhava*” happens at the end of 1000 years; see, “[Bhava and Jāti – States of Existence and Births Therein](#),” and “[Cuti-Patisandhi – An Abhidhamma Description](#).”

- Therefore, the human *bhava* may not end at the death of the physical body. Switching to a new *bhava* (as a *Deva*, animal, etc.) happens at the *cuti-paṭisandhi* moment when the kammic energy for the human *bhava* runs out. Until then, a human exists either with a physical body or just the mental body (*gandhabba*.) See the above-mentioned posts.
- It isn't easy to get a human *bhava*, but once in a human *bhava*, one can be born tens or even hundreds of times as a human. A given animal may be reborn thousands or even millions of times in that animal realm to exhaust that *kammic* energy.

2. Even though the above simile may seem to be out-of-proportion with the realities, it is not. That is why modern science has given a boost to Buddha Dhamma by making many things clear. Ordinary humans were not aware of the existence of innumerable microscopic living beings until the invention of the microscope in the 1500s. In 1676, Van Leeuwenhoek reported the discovery of micro-organisms. He observed numerous tiny living beings in a glass of water; see, [WebLink: WIKI: Microscope](#)

Here is a short video showing countless such microscopic creatures:

[WebLink: Live in a water drop @TSRlab](#)

- If you go out and dig a bit of dirt, there could be millions of living organisms there. There may be a few humans in a household, but possibly billions or even trillions of microscopic living beings. The oceans cover two-thirds of the Earth's surface, and the living creatures there are much more densely packed. And there are beings in other 29 realms that we cannot see. Seven billion or so humans in this world are indeed a thumb-full compared to countless living creatures associated with the Earth. Thus, as in many cases, modern science has helped verify Buddha's words.
- Some of these realms could be in other dimensions; see, "[Consciousness Dependence on Number of Dimensions](#)." In string theory, scientists say there could be ten dimensions instead of the three that we experience.
- However, one can actually "see" beings in other dimensions and microscopic beings in a glass of water if one develops *abhiññā* powers; see "[Power of the Human Mind – Introduction](#)" and the follow-up posts. One time, a *bhikkhu* who had developed *abhiññā* skills but had not become an *Arahant* saw the presence of a large number of microscopic beings in a glass of water. He tried to filter them out but was unsuccessful and became distraught. The Buddha told him that "it is not possible to live in this world without harming other beings. It is necessary to live this life to attain *Nibbāna*" and to drink the water. The INTENTION there is to quench the thirst; see "[How to Evaluate Weights of Different Kamma](#)."
- Modern science has found out that there are millions of living beings on a single human body (and any other large animal). They have used sophisticated instruments to see microscopic creatures. See, "[There are as Many Creatures on your Body as there are People on Earth!](#)"

Thus modern science has shown that the human population is negligible compared to just the animal populations (including microscopic beings). And we can experience only two realms (animal and human) compared to the 31 realms that the Buddha described.

2. Dutiyachiggaḷayuga Sutta (SN 56.48)

Pāli version: [WebLink: suttacentral: Dutiyachiggaḷayuga Sutta \(SN 56.48\)](#)

Translation:

"*Bhikkhus*, suppose that this great Earth had become one mass of water, and a man would throw a yoke with a single hole upon it. An easterly stream would move it eastward. A westerly stream would move it westward; a northerly flow would move it northward. A southerly stream would move it southward.

There was a blind turtle that would come to the surface once every hundred years. What do you think, *bhikkhus*, would that blind turtle, coming to the surface once every hundred years, insert its neck into that yoke with a single hole?"

“It would be a rare occurrence, *Bhante*, that the blind turtle, coming to the surface once every hundred years, would insert its neck into that yoke with a single hole.”

“So too, *bhikkhus*, how extremely rare that one is born a human.

You have this rare chance now, *bhikkhus*, to be not only born a human but be born while a *Tathāgata* has arisen in the world. While the Dhamma and Discipline proclaimed by the *Tathāgata* shines in the world.

Therefore, *bhikkhus*, you should strive without delay to understand the following. ‘This is suffering (*dukkha*). This is the cause of suffering (*dukkha samudaya*). This is how that cause can be removed (*dukkha nirodhaya*). And this is the way leading to the cessation of suffering (*dukkha nirodha gāmini paṭipadā*).’”

- Many scientists are now discussing these “hard to fathom” ideas about infinity. Of course, they are unaware of Buddha’s teachings. See, for example, “The Beginning of Infinity” by David Deutsch (2011).
- Most human beings head to the *apāyā* because they are not aware of the ten immoral actions; see, “[Ten Immoral Actions – Dasa Akusala](#)” and “[How to Evaluate Weights of Different Kamma](#).” It is also essential to know the baseline procedure to avoid such immoral actions and to cultivate moral behavior; see, “[Puñña Kamma – Dāna, Sīla, Bhāvanā](#).”

However, when a living being acquires a human *bhava* or human existence, that can last a long time (many hundreds to many thousands of years). Within that human *bhava*, there will be multiple human births; see, “[Bhava and Jāti – States of Existence and Births Therein](#).”

3. *Assu Sutta* (SN 15.3)

Pāli version and translation at [WebLink: suttacentral: Assu Sutta \(SN 15.3\)](#)

Translation:

First, the Buddha made the famous statement: “*Anamataggoyam bhikkhave, saṃsāro. Pubbā koṭi na paññāyati avijjā nīvāraṇānaṃ sattānaṃ taṇhā-saṃyojanānaṃ sandhāvataṃ saṃsarataṃ.*”

- **Translated:** “*Bhikkhus*, this rebirth process has no discernible (*na paññāyati*) beginning. Beings whose minds are covered by ignorance and **are bound to this rebirth process with bonds of craving.**”

The rest of the *sutta* is as follows:

“What do you think, *bhikkhus*: Which is greater, the tears you have shed while trapped in this rebirth process or the water in the four great oceans? (Crying because of being born into a bad birth **or** being separated from loved ones in good births)”

“As we understand the Dhamma taught to us by the *Bhante*, the tears we have shed while trapped in this beginning-less rebirth process is greater than the waters in the four great oceans.”

“Excellent, *bhikkhus*. It is good that you thus understand the Dhamma taught by me. That is the larger: the tears you have shed while trapped in this beginning-less rebirth process — not the water in the four vast oceans.

Long have you (repeatedly) experienced the death of a mother. The tears you have shed over the death of a mother while trapped in this beginning-less rebirth process are greater than the water in the four vast oceans.

Long have you (repeatedly) experienced the death of a father, death of a brother, death of a sister, death of a son, death of a daughter, loss of relatives, or loss of wealth. The tears you have shed over diseases while trapped in this beginning-less rebirth process would fill the four vast oceans.

Why is that? The beginning of this rebirth process is not discernible.”

The Buddha many other analogies to describe how long the rebirth process is: **it is infinite**. In another analogy, the blood from uncountable times where one is killed while born a specific animal (deer or cow, for example) is more than the water in the four oceans.

- Infinity is a hard to comprehend. Scientists have only recently realized this; see, “[Infinity – How Big Is It?](#)”
- In fact, there are many *suttā* in the “[WebLink: suttacentral: Anamatagga Samyutta \(SN 15\)](#),” “[WebLink: suttacentral: Opamma Samyutta \(SN20\)](#),” and the “[WebLink: suttacentral: Sacca Samyutta \(SN 56\)](#)” SN 56.31 through SN 56.70 of the *Samyutta Nikāya* provides many more similes/descriptions to illustrate the beginning-less rebirth process, during which an infinite amount of time has passed.
- In the above, I presented only three out of about 70 such *suttā* in SN 15, SN 20, and SN 56. They all provide analogies to show how rare human birth is.

Next, “[Kamma, Debt, and Meditation](#)”

7.2.4.2 Nakhasikha Sutta (SN 22.97 SN 56.51 SN 13.1 SN 20.2)

"At one time the Buddha, showing them some dust which he had taken upon the tip of his finger-nail, addressed the disciples thus: 'If, O Bhikkhus, these few grains of dust upon my finger-nail and all the dust in the universe were compared in quantity, which would you say was less, and which more?' The disciples replied: 'Lord, the dust on your finger-nail is less, and that of the universe is more. Surely, Lord, the dust on your finger-nail is not worthy of mention in comparison with the dust of the universe.' Then the Buddha continued; 'Even so, Bhikkhus, those who are reborn in the abodes of men and Devas whence they have expired, are very few even as the few grains of dust on my finger-nail; and those who are reborn in the four realms of misery are exceedingly many, even as the dust of the great universe. Again, those who have expired from the four miserable worlds and are reborn in the abodes of men and Devas are few even as the grains of dust on my finger-nail; and those who are repeatedly reborn in the four miserable worlds are innumerable, even as the grains of dust of the great universe.'"

What has just been said is the substance of the Nakhasikha Sutta. But, to say nothing of the beings of all the four realms of misery, the creatures that inhabit the four great oceans alone will suffice to make evident how great is the evil of Vinipātana-gati, that is, the dispersion, the variety of possible kinds of existence after death.

Samyutta Nikāya 22

10. Pupphavagga

97. Nakhasikhāsutta

Sāvattthinidānaṃ. Ekamantaṃ nisinna kho so bhikkhu bhagavantaṃ etadavoca: “atthi nu kho, bhante, kiñci rūpaṃ yaṃ rūpaṃ niccaṃ dhuvaṃ sassataṃ avipariṇāmadhammaṃ sassatisamaṃ tatheva ṭhassati? Atthamaṃ.

Samyutta Nikāya 56

Connected Discourses on the Truths

47. Yoke with a Hole (1)

“Bhikkhus, suppose a man would throw a yoke with a single hole into the great ocean, and there was a blind turtle which would come to the surface once every hundred years. What do you think, bhikkhus, would that blind turtle, coming to the surface once every hundred years, insert its neck into that yoke with a single hole?”

“If it would ever do so, venerable sir, it would be only after a very long time.”

“Sooner, I say, would that blind turtle, coming to the surface once every hundred years, insert its neck into that yoke with a single hole than the fool who has gone once to the nether world would regain the human state. For what reason? Because here, bhikkhus, there is no conduct guided by the Dhamma, no righteous conduct, no wholesome activity, no meritorious activity. Here there prevails mutual devouring, the devouring of the weak. For what reason? Because, bhikkhus, they have not seen the Four Noble Truths. What four? The noble truth of suffering ... the noble truth of the way leading to the cessation of suffering.

“Therefore, bhikkhus, an exertion should be made to understand: ‘This is suffering.’ ... An exertion should be made to understand: ‘This is the way leading to the cessation of suffering.’”

Samyutta Nikāya 56

Connected Discourses on the Truths

48. Yoke with a Hole (2)

“Bhikkhus, suppose that this great earth had become one mass of water, and a man would throw a yoke with a single hole upon it. An easterly wind would drive it westward; a westerly wind would drive it eastward; a northerly wind would drive it southward; a southerly wind would drive it northward. There was a blind turtle which would come to the surface once every hundred years. What do you think, bhikkhus, would that blind turtle, coming to the surface once every hundred years, insert its neck into that yoke with a single hole?”

“It would be by chance, venerable sir, that that blind turtle, coming to the surface once every hundred years, would insert its neck into that yoke with a single hole.”

“So too, bhikkhus, it is by chance that one obtains the human state; by chance that a Tathāgata, an Arahant, a Perfectly Enlightened One arises in the world; by chance that the Dhamma and Discipline proclaimed by the Tathāgata shines in the world.

“You have obtained that human state, bhikkhus; a Tathāgata, an Arahant, a Perfectly Enlightened One has arisen in the world; the Dhamma and Discipline proclaimed by the Tathāgata shines in the world.

“Therefore, bhikkhus, an exertion should be made to understand: ‘This is suffering.’ ... An exertion should be made to understand: ‘This is the way leading to the cessation of suffering.’”

Chapter One

3. Tears

[1.1](#) At Sāvattḥī.

[1.2](#) “Mendicants, transmigration has no known beginning.

[1.3](#) No first point is found of sentient beings roaming and transmigrating, hindered by ignorance and fettered by craving.

[1.4](#) What do you think? Which is more: the flow of tears you’ve shed while roaming and transmigrating for such a very long time—weeping and wailing from being united with the unloved and separated from the loved—or the water in the four oceans?”

[1.5](#) “As we understand the Buddha’s teaching, the flow of tears we’ve shed while roaming and transmigrating is more than the water in the four oceans.”

[2.1](#) “Good, good, mendicants! It’s good that you understand my teaching like this.

[2.2](#) The flow of tears you’ve shed while roaming and transmigrating is indeed more than the water in the four oceans.

[2.3](#) For a long time you’ve undergone the death of a mother ...

[2.4](#) [2.5](#) father ...

[2.6](#) brother ...

[2.7](#) sister ...

[2.8](#) son ...

[2.9](#) daughter ...

[2.10](#) loss of relatives ...

[2.11](#) loss of wealth ...

[2.12](#) or loss through illness. From being united with the unloved and separated from the loved, the flow of tears you’ve shed while roaming and transmigrating is indeed more than the water in the four oceans.

[2.13](#) Why is that?

[2.14](#) Transmigration has no known beginning. ...

[2.15](#) This is quite enough for you to become disillusioned, dispassionate, and freed regarding all conditions.”

[2.16](#)

7.2.5 Kamma, Debt, and Meditation

Revised April 7, 2016; September 4, 2019

1. “This world” of 31 realms is very complex; see, “[The Grand Unified Theory of Dhamma](#).” Nothing happens due to a single cause, and nothing happens just by itself. Multiple causes lead to multiple effects.

2. In a perfect world, everyone will share everything equally, and everyone will be happy. But people are born with different levels of not only wealth but also different levels of health, physical appearance, capabilities, etc. These are the results of *kamma* (good and bad) accrued over very long periods in the past.

3. No one has everything “just right.” So, we try to get what we don’t have or like to have. **Every time we crave for something and try to acquire those things by immoral means, knowingly or unknowingly we get into debt.**

- When those *akusala kamma* (immoral deeds) involves another living being, we get into some kind “*sansāric* relationship” with that being; this is how we have friends, family, AND enemies. These things do not happen by chance.

4. NOTHING in this world happens by chance. Everything happens due to a cause, a reason. **But since results (*vipāka*) can materialize later, even in future lives, we cannot see this “cause and effect” in most cases. When we do something harmful to another being we become indebted to that being; that debt will have to be paid with interest that is many many times over.** Think about the following:

- When we get a loan, we have to pay back the loan with interest. If we promise to pay back and do not fulfill that commitment, we will have to pay it with interest sometime in the future. Imagine how much interest we would have to pay on a \$1000 loan at 6% interest over, say just 200 years, which is insignificant in the *sansāric* time scale. You can use the “72 rule.” That means if you do not make any monthly payments, the amount you have to pay will double every (72/interest rate) years. In this case, it will double every 12 years. It will double again in another 12 years, i.e., after 24 years you will have to pay \$4000. After only 40 years, the amount will be \$10,000. Only after 200 years it will a billion dollars!
- Can you imagine how much money we may have to pay to settle even small that we took a long, long time ago?
- We have to pay back not only monetary transactions. Imagine how much would it cost to bring up a child, as a mother does? It is unimaginable over long times.
- When we have such debts, nature has set up many ways to pay off such debts. Many times the same group of people is born to the same families, paying back “old debts.” Or one may become a servant for another.
- Many relationships that we have in this life arise from “long-term debt” from many lives in the past. For example, people are born in the same family, same community, or same geographical locations, for many, many lives. That is for just paying back debts and for claiming old debts. In Sinhala, relationships are called “*sanbandha*” (=“*san*” + “*bandha*” where “*san*” is defilement (*saṅkhāra*), and “*bandha*” is a connection; thus connection due to *saṅkhāra*). Sometimes old creditors come back even in the form of annoying mosquitoes, ants, bugs, etc.
- Now if one takes another’s life, one may have to sacrifice one’s own life many times over. That is scary stuff, but we need to know that our actions will have consequences.

5. Instead of paying off such “old debts” that way, there is another way to pay back old debts. When one does a good deed, one could transfer the merits of that good deed to old creditors called “*pattidāna*” (this is commonly called “*puñña anumodana*”; see, “[Transfer of Merits \(Pattidāna\)- How Does It Happen?](#)”).

6. In this beginning-less *samsāra*, we have been indebted to unbelievably many beings. Thus we transfer the merits to all beings. We think in our mind, “**May the merits of this good deed be shared by all beings.**”

- If one does this genuinely, it will be quite beneficial in the long term. The Buddha said that this is the most efficient way to pay back old debts. However, one needs to do this with sincerity, truly understanding the suffering caused by one's actions to others.living

7. One could accrue good merits not only by good deeds but also with insight meditation. **The Buddha stated that if one cultivates *vipassanā* meditation on *anicca, dukkha, anatta*, that leads many more merits compared to even donations or giving.** After the meditation session, one transfers the merits to all beings.

- The nice thing is that one does not “lose any merits” either. Giving merits itself is meritorious. Also, one should forgive old debts from other beings. The mind is very powerful. If done with right intention, also these thoughts will have beneficial consequences for oneself and other living beings.

8. Therefore, we must try to alleviate the *kamma vipāka* from past *kamma* by using the mentioned methods above. **But the main purpose of such methods is actually to purify one's mind.**

- We can pay off past debts gradually this way. However, bigger chunks are paid off by attaining *Sotāpanna*, *Sakadāgāmī*, *Anāgāmī*, and *Arahant* stages of *Nibbāna*. (Actually, the Buddha has said that if one does the *Ariya mettā* meditation frequently, one could pay off the debts associated with the *kāma loka* (first 11 realms). See, “[5. Ariya Mettā Bhāvanā \(Loving Kindness Meditation\)](#).”
- When one attains the *Sotāpanna* stage, all those *kamma vipāka* that could have given rebirth in the lowest four realms (*apāyā*) become nullified. When one reaches the *Arahanthood*, only those *kamma vipāka* that get a chance to come to fruition during the remaining time in that life will be paid off. Since there is no more rebirth, all remaining *kamma vipāka* do not get a chance to come to fruition.

9. The first step in purifying one's mind is to avoid *dasa akusala*; see, “[Ten Immoral Action \(Dasa Akusala\)](#).” One does not need to try to do all at once (especially for those who are new to Buddha Dhamma).

- It is a life journey, and one can start slowly. First, trying to avoid bad actions, and then do things that can be done without much stress. See the posts in the “[Bhāvanā \(Meditation\)](#)” section and in particular, “[2. The Basics in Meditation](#).”
- There is no one watching, and only you know what your intentions are: whether they are moral or immoral.
- You will feel the benefits in terms of a less-stressed mind over time. It takes time, especially in the beginning. Then it will accelerate when one starts seeing the benefits. When one starts understanding that *micchā dīṭṭhi* (wrong views) play a big role in one's tendency to do some immoral acts will automatically reduce. see, “[Wrong Views \(Micchā Dīṭṭhi\) – A Simpler Analysis](#).”

10. **The Buddha said one could become indebted in four ways:**

- **Engaging in *dasa akusala* (10 unwholesome actions).**
- **Getting someone else to do such acts.**
- **Helping another in carrying out such acts.**
- **Praising someone who is doing such acts.**

Thus one can become indebted in 40 ways. By avoiding all that will make one joyful (*adhimokko* or sense of well being). That will give impetus to accelerate one's efforts. Also, see, “[Habits and Goals](#),” and “[The Four Bases of Mental Power \(Cattāro Iddhipāda\)](#).”

Another more in-depth analysis at, [“Difference Between Giving up Valuables and Losing Interest in Worthless”](#),

7.2.6 How do we Decide which View is Wrong View (Ditṭhi)?

Revised July 3, 2022

More than 99% of one's immoral acts have their causes in *micchā ditṭhi* (wrong views); see, [“What is the only Akusala Removed by a Sotāpanna?”](#) Thus, it is critical to understand what wrong views are.

- A simpler, yet fundamental, analysis of wrong views can be found in, [“Wrong Views \(Micchā Ditṭhi\) – A Simpler Analysis.”](#)

1. We all have our views about different things: politics, religions, sports, lifestyles, etc. And most times it is fun to talk about and debate whose views are the correct ones. But each one of us has views based on limited knowledge about only a fraction of “this world.”

- A good way to figure out whether one view is better than another is to see whether that view provides more insight AND has more explanatory power about the world.
- In fact, that is the only way. Because anybody can just say, “my view is better than yours.”

2. When I refer to “*ditṭhi*” or wrong views, these are the wrong views per Buddha. **It must be noted that “*ditṭhi*” means views, but in Pāli literature it has been common to call “*micchā ditṭhi*” (pronounced “*michchā*”) or wrong views as just “*ditṭhi*.”** **It is critical to have the “right views” because otherwise we may be taking wrong decisions, and that could have very bad outcomes for billions of years to come.** In order to make the right decisions we need to “see the whole picture” or the world view of the Buddha.

- Of course, one is entitled to have his own views. It is just that according to Buddha Dhamma certain views are not only wrong, **but could lead to disastrous outcomes**, and those are *micchā ditṭhi*. One either accepts this fact or rejects it. It is a good idea to look at the “big picture” of the Buddha and THEN decide whether it makes sense or not. First, let us see why one should even go through this exercise of looking at the big picture.

3. When one does not have a clear overall picture, one makes bad decisions. For example, a fish does not see the string or the hook, only sees the worm, and gets into trouble. If it saw the whole picture, with the string and the hook, it may realize that there is something wrong and would not try to grab the worm. If it saw the man standing on land holding the pole, that would have been another clue; but the fish can only see its “domain.” Just like that we can only see “our domain” within the wider 31 realms, and we do not see the level of suffering in other lower realms.

- We are inherently incapable of seeing the “whole picture” because our sense faculties are formed by our *kamma* to be aware of only a part of whole existence; you may get an idea of what I am referring to in the post, [“Consciousness Dependence on Number of Dimensions.”](#) Therefore, no matter how smart each of us is, we cannot even imagine this whole picture by ourselves. It takes a very special, very pure mind to see the whole picture, the mind of a Buddha; see, [“Power of the Human Mind – Introduction,”](#) and follow-up posts.

4. The Buddha described this in the parable of the “elephant and the six blind men.” Each blind man is feeling or exploring a different part of the elephant and comes up with his view of what an elephant is: The one examining the tail says the elephant is like a rope, one examining a leg says the elephant is like a pillar, etc.

- **The person holding the tail is certain that the elephant is like a rope “because I know what I experience; you cannot tell me it is not like a rope.” He just does not realize that he is experiencing only part of the whole elephant.**

5. Until a Buddha comes to this world, any human can only see a very small part of the whole picture. Like the little girl in the video being able to see the whole elephant, only a Buddha can see the whole picture of our true existence.

- Mathematician Kurt Gödel proved this mathematically in his Incompleteness Theorem, which says that it is not possible to discover the complete truth of a closed system within that system; see, "[Gödel's Incompleteness Theorem](#)." Thus science will NEVER be able to discover a COMPLETE set of laws about nature. It can only uncover parts and the parts that have been discovered are totally consistent with Buddha Dhamma.

6. According to the Buddha, *diṭṭhis* are like that: some people say there is a rebirth process, and some say not. Some say when we die we will either go to hell or heaven. Some say, things really exist in a permanent way, and others say it is all a mirage. **All these are *diṭṭhis* because none of these fit the WHOLE PICTURE.** None of these can explain the vagaries of life; see, "[Complexity of Life and the Way to Seek "Good Rebirths"](#)."

- For example, we can only see two of the 31 realms of existence: animal and human realms. We are not aware that most beings are trapped in the lowest four realms where there is much more suffering than we can see in the human and animal realms. We do not realize that our immoral actions from this life, AND from our past lives (that we are not aware of) could give us rebirth in those lower four realms; **this is the "laws of kamma" another part of the "big picture."** There is evidence for rebirth; see, "[Evidence for Rebirth](#)."

7. Buddha Dhamma cannot be fully understood without having learned of that "big picture" from a Buddha or from a person who has learned the correct version of it. Now, since the Buddha is not here and there are many versions of Buddha Dhamma, the question is how do we figure out which version to believe. The Buddha gave a solution to this problem: Find the version that satisfies the following conditions:

- All aspects should be consistent with the *Suttā* and *Vinaya* (and thus *Abhidhamma*); these were transmitted orally for about 500 years and then written down in the Pāli *Tipiṭaka* about 2000 years ago (Pāli *Tipiṭaka*).
- And all three descriptions in the *Tipiṭaka* (*Sutta*, *Vinaya*, *Abhidhamma*) must be consistent with each other.

8. This second requirement is there to catch any mistakes made in the (especially oral) transmission from the time of the Buddha. It must be kept in mind that all three sets were formulated for easy oral transmission. I know several *suttā* by heart which I learned when I was little; they have been formulated to be easily remembered. And there were different groups of *Bhikkhus* assigned the responsibility for different sections during the time of oral transmission. Also see, "[Preservation of the Dhamma](#)."

9. In a series of posts I have provided evidence that many versions of "Buddhism" being practiced today do not pass the above tests. All Mahāyāna versions are in blatant contradiction to the teachings in the *Tipiṭaka*, and some key concepts taught in Theravāda are also inconsistent with *Tipiṭaka*; see, "[Why is it Critical to Find the Pure Buddha Dhamma?](#)" and the follow-up posts.

- Once one finds the key Dhamma concepts that are self-consistent, then one can easily figure out what is *diṭṭhi* and what is not. If anyone can point out anything on this website that is not internally consistent, I would appreciate it. Because my goal is genuine: to find and document the original teachings of the Buddha.

10. Thus it is important to realize that *diṭṭhi* is an **established view (a view one is not even willing to rethink)** about the world, that is inconsistent with Buddha Dhamma. Let us take a few examples:

- Two good examples are the two views of "there is a self" and "there is no self"; see, "[Ditthi \(Wrong Views\), Sammā Ditthi \(Good/Correct Views\)](#)." Both are wrong views according to the Buddha: there is only an ever-changing lifestream that progresses according to cause and effect (*Paṭicca Samuppāda*); see, "[What Reincarnates? – Concept of a Lifestream](#)."

- Another *diṭṭhi* many people have is that there is no rebirth process, or that there is a rebirth process but we will never be born as an animal because we have not done anything bad in this life. It is just a belief, there are no supporting evidence to back that up. On the other hand, the rebirth process involving all 31 realms and the natural law of *kamma*, together with *Paṭicca Samuppāda*, and other key concepts like *Tilakkhaṇa* can explain EVERYTHING that we experience. **What needs to be understood is that ALL THOSE PIECES MUST BE THERE to complete the whole picture.**

11. Just like a blind man holding onto a leg of the elephant and saying “This is what I experience and the elephant is like a pillar. I know what I experience, and I am right”, we hold onto *diṭṭhis* that are inconsistent with the nature’s laws. Once one hears the message of a Buddha, one should at least examine the credibility of that message by looking at the evidence he presented. Ultimately, one has to make the decision to accept Buddha’s message or not. **This is why no one can lead anyone else to salvation. It is all in one’s own mind.**

- Let me give an example of how limited our worldview had been even two hundred years ago. People believed that Earth was the only planet with the Sun going around the Earth. So, when the Buddha said there are innumerable world systems with other Suns and Moons, people thought that was a loony idea. There are many such *diṭṭhis* that have been proven to be wrong by science over the past hundred years or so; see, “[Dhamma and Science – Introduction](#).”

12. Some of the views we have are deeply ingrained, and not easy to get rid of. The main thing is NOT to take a firm stand on things that the Buddha called *diṭṭhi* and say, “I know this to be true, and only this to be true” and to cling to them. **Even a *Sotāpanna* may not be fully convinced that, for example, there is a *arūpa loka*, but he/she has not ruled that out, i.e., does not have a *diṭṭhi*.** Only an *Arahant* has “complete” *Sammā Diṭṭhi*.

- As one learns pure Dhamma, one will have more and more confidence in the world view of the Buddha and will get rid of the wrong views. Since the mind cannot be forced to accept anything, this “change of vision” comes only through learning the pure Dhamma and through the enhanced life experience, which means purifying the mind; see, “[The Importance of Purifying the Mind](#).”
- **We cannot pick and choose parts of Buddha Dhamma that we like if we want to reap the full benefits.** Of course one could decide to “live with” parts of Dhamma that one is comfortable with. The Buddha said to accept his teachings only if they make sense. To make sense though, one needs to look at the whole picture too. Otherwise, it will be like a blind man examining only the leg of an elephant and saying it really feels like a pillar.

13. *Diṭṭhi* is one of 14 *akusala cetasika* and one of the ten *kilesa*; see, “[Ten Immoral Actions \(Dasa Akusala\)](#),” and “[Diṭṭhi \(Wrong Views\), Sammā Diṭṭhi \(Good/Correct Views\)](#).” *Diṭṭhi* have been described in many ways by the Buddha. At the *Sotāpanna* stage, those *diṭṭhis* that could lead to rebirth in the *apāyā* (*sakkāya diṭṭhi*, *vicikicchā*, *sīlabbata parāmāsa*) are permanently removed; see, “[Akusala Citta – How a Sotāpanna Avoids Apāyagāmi Cittas](#).”

- **Thus it is important to realize that the *Sotāpanna* stage CANNOT be reached until *niyata micchā diṭṭhi* or ESTABLISHED wrong views are removed.** For example, one should not hold on to a firm belief that there is no rebirth process; one should at least keep an open mind.
- **Stated most succinctly, *micchā diṭṭhi* is the wrong perception of *nicca, sukha, atta*, i.e., things can be maintained to one’s satisfaction, thus lasting happiness is possible, and thus it is fruitful to stay in this world of 31 realms. One attains the first stage of *Sammā diṭṭhi* when one comprehends *anicca, dukkha*, and *anatta* to a certain extent at the *Sotāpanna* stage.**

14. The Buddha said his Dhamma is hard to understand, and it is not like anything that anyone taught before, except for another Buddha: It is “*Pubbe ananussutesu Dhammesu*,” “A Dhamma that has not been heard before.” This is why the Buddha worried just after the Enlightenment whether he will be able to teach this difficult Dhamma to normal human beings. It takes a real effort to glean the message of the Buddha. [*Pubbe*

ananussutesu Dhammesu: see [WebLink: suttacentral: Dhammacakkappavattana Sutta \(SN56.11\)](#)
ananussuta: a. [*an-anussuta*] 未聞的，未曾聞的，不隨聞的。]

- Most of us have different types of *diṭṭhi*; see, “[Why Do People Enjoy Immoral Deeds? – Diṭṭhi Is Key.](#)”
- For a description of the ten *micchā diṭṭhi*, see, “[Three Kinds of Diṭṭhi, Eightfold Paths, and Samādhī.](#)”

7.2.7 Three Kinds of Diṭṭhi, Eightfold Paths, and Samādhī

Buddha Dhamma explains how three kinds of worldviews lead to three types of *samādhī* (basically mindset) via three different paths. All these are discussed in detail in other posts, but here we summarize them. You can use the Search box on top right to find relevant posts.

1. Have you ever wondered how some people have any “peace of mind” while engaging in abominable actions day in and day out? It is easier to excuse someone who commits a bad act in a “moment of fury”, i.e., when such action was not pre-planned (and the common law accommodates for that).

- But some people (think Hitler, Pol Pot in Cambodia) plan evil acts for years, and they seem to thrive doing it; they do not feel any remorse; rather they enjoy what they do. This is because just like facilitating a journey towards *Nibbāna* for someone who embarks on the Noble Eightfold Path, the nature also lets someone go in the opposite direction too. “*Dhammo ha ve rakkhati dhammacarī*” applies to both kinds of “Dhamma.”
- Dhamma is what one “bears.” If one “carries good Dhamma”, one will be guided in the “good direction” by nature. In the same way, one who “carries bad Dhamma” will be guided in the opposite direction. Both can get into “*samādhī*” doing it.

2. *Samādhī* (“*sama*”+“*adhī*” where “*sama*” means “same” and “*adhī*” means “dominance”) means the object becomes the priority and the mind gets focused on it; as we discussed in many posts, when the mind becomes focused on one object (*ārammaṇa*), no matter what the object is, the *ekaggata cetasika* takes over and make the mind latched “on to it.”

- When the mind gets to *samādhī*, the mind feels calm because it is stopped from jumping back and forth among many thought objects (*ārammaṇa*).
- This is how one gets to not only *samādhī* but also *anāriya jhāna* (a *jhāna* is a deeper state of absorption or *samādhī*) using breath meditation, just by focusing the mind on the breath.
- Thus, a master thief gets to *micchā samādhī* when intently focusing on the plan of a grand robbery in minute details. Not only does he get a joy out of it, his mind helps him work out the fine details; but someone with *micchā samādhī* can never get into a *jhāna*.
- It does not matter what the focus is, nature helps get it done if one really sets his/her mind to it. This is why “*Dhammo ha ve rakkati dhammacari*” can work in any situation. The human mind is very powerful, but it can be used in all three directions.

3. However, that does not change the fact that outcomes of “bad actions” will ALWAYS be bad in the long run. This is a universal law called “*bīja niyama*” which is one of five natures’ primary laws called “*niyama*” (“*niyama*” in Pāli or Sinhala means “fixed”, “unchangeable”); even though most times it is pronounced “*niyāma*”, the correct pronunciation is “*niyama*.”

- Bad kamma result in “bad *kamma bīja*” which will ONLY bear “bad fruits”; also, the consequences will be proportional to the “size” of the *kamma bīja* (*kamma* seed). And the same holds true for good *kamma* seeds.

4. Now, when someone gets on the “wrong track” mostly through bad associates or bad environment, one has the “ten types of *micchā diṭṭhi*”, and one could get into the “*micchā* eightfold path.” **The ten types of *micchā diṭṭhi* are:**

1. giving (*dana*) has no merits,
2. being grateful and responding in kind (for what others have done for oneself) has no merits,
3. respecting and making offerings to those with higher virtues has no merits,
4. what we enjoy/suffer in this life is not due to *kamma vipāka* but they “just happen”,
5. this world does not exist, there are no other worlds than the one we can experience,
6. when one dies it is not possible to be born in *para loka* (netherworld),
7. mother is not a special person,
8. father is not a special person,
9. there are no instantaneous (*opapathika*) births,
10. there are no *samanabrahmana* (basically *Ariyā* or *yogis*) who have cultivated their minds to be free of defilements and thus can see other realms and previous births.

▪ See, “[Hidden World of the Gandhabba: Netherworld \(Paraloka\)](#)” for a discussion on *para loka*.

5. When one has **unshakeable** or *niyata micchā diṭṭhi* one gets on the ***micchā* eightfold path**; now one’s mind is

- Since these factors feed on each other, once one gets into *micchā* eightfold path, it is difficult to break out of it. The key is *micchā diṭṭhi*: “Wrong vision” is hard to break, when it is continually being reinforced by wrong speech, actions, etc. Thus it is inevitable that one keeps strengthening one’s “bad *gathī*” or behavior. Then it is increasingly easier to get to “*micchā samādhi*.”

6. The Buddha said that ***Sammā Diṭṭhi* is two-fold**: there is a **mundane (*lokiya*) *Sammā Diṭṭhi*** and an ***Ariya Sammā Diṭṭhi***. When one has mundane *Sammā Diṭṭhi*, one rejects the ten types of *micchā diṭṭhi* mentioned above, and one strives to be born in human or higher realms. One knows that bad actions will lead to birth in the *apāyā* (lowest four realms).

- Thus one with mundane *sammā diṭṭhi* will develop **mundane versions of *sammā sankappa*** (good thoughts), *sammā vaca* (abstain from lying, gossiping, etc), *sammā kammanta* (engages only in moral acts), and so on and then it is easier for one to get to mundane *sammā samādhi*. This is the **mundane *sammā* eightfold path**.
- However, while someone following the ***micchā* eightfold path cannot attain any *jhāna***, one on the mundane *sammā* eightfold path can attain *anāriya jhāna*; see, “[Power of the Human Mind – Anariya Jhāna](#).”

7. The critical difference between mundane *sammā diṭṭhi* and *Ariya Sammā Diṭṭhi* is that while one with mundane *sammā diṭṭhi* rejects immoral behavior based on one’s fear of rebirth in the *apāyā* and one’s hope for rebirth in comfort-filled *deva* or *brahma* worlds (or even because it makes one feels good about the act), one **ATTAINS *Ariya Sammā Diṭṭhi*** when one comprehends *anicca*, *dukkha*, *anatta* at least to a significant extent, i.e., one becomes a *Sotāpanna*.

- Thus one starts on the Path by following the mundane *sammā* eightfold path, and at some point enters the *Ariya Sammā* Eightfold Path when attaining the *Sotāpanna* stage.
- At that stage, one’s mind **automatically rejects** immoral acts because **one’s mind sees the futility** as well as the danger of such acts. What is the point of having some sense pleasure if it lasts only a short time AND could lead to much misery in the future for long times?

8. The critical point is that when one becomes a *Sotāpanna*, **one’s mind (and the brain) will be changed** so that one will not act even impulsively, let alone capable of pre-planning an act that could yield rebirth in the *apāyā*.

- Scientists do confirm that there are significant changes in the brain just due to breath meditation alone; see, “[Truine Brain: How the Mind Rewires the Brain via Meditation/Habits](#).”

- Such future brain studies on people engaged in the correct *ānāpāna* meditation can be expected to yield profound changes in a brain when a person attains the Sotāpanna stage.

9. Thus one becomes a *Sotāpanna* (enter the stream) from the mundane *sammā diṭṭhi* stage by comprehending the true nature of the world (i.e., it is fruitless to be born ANYWHERE in the 31 realms) by learning the meanings of *anicca*, *dukkha*, *anatta* from a Buddha (who discovers them), or from a true disciple of the Buddha.

- Once one becomes a *Sotāpanna*, the Path to *Nibbāna* becomes clear, and one does not need any more help. One will cultivate the next six steps and get to *Ariya Sammā Samādhi* and to the *Arahant* stage of *Nibbāna*.

10. I need to re-emphasize the difference between “living a moral life” which is promoted by most of world’s major religions, and the emphasize on “purifying the mind” and “comprehending the true nature of the wider world of 31 realms” in Buddha Dhamma.

- One needs to approach this extra step first by being “moral”, i.e., by following the mundane *sammā* eightfold path and getting rid of some of the five hindrances. Then one’s mind is purified to an extent to be able to “see through the fog of ignorance” and comprehend *anicca*, *dukkha*, *anatta*.
- Buddha’s message about the “suffering hidden in the midst of apparent sense pleasures” is indeed a “Dhamma that has never been known.” It could be contrary to one’s instincts, because all we have known from the beginningless time is about enjoying the sense pleasures.

Note: The three kinds of eightfold paths, *micchā diṭṭhi*, and *micchā samādhi* are described in the *Mahā Chattareesaka Sutta*; see, “[Mahā Cattārisaka Sutta \(Discourse on the Great Forty\)](#).”

7.2.8

Implications of the Rebirth Process in Daily Life and in Society

Revised August 23, 2022

1. Unless one develops *abhiññā* powers via meditation, the rebirth process cannot be “proven” with certainty. Yet, mounting evidence for it cannot be ignored either; see “[Evidence for Rebirth](#).”

- Putting that question aside, let us look at some mundane implications IF the rebirth process, as described by the Buddha, is correct.
2. The first thing to realize is how short this life of 100 years or so is. It is unimaginably small. Scientists say that our universe has been there for about 14 BILLION years. But the Buddha taught that life has no beginning. Either way, 100 years is a blip in the cosmic time scale.
- Looking at world history, most calamities of war could have been prevented if people understood how short this life is. Where are those emperors and kings today who sacrificed so many human lives to capture another country or to maintain their powers?
 - Because of their atrocities, they are most likely to be in the lowest of the *apāyā*.
 - For the briefest time of enjoyment and power, they accumulated so much bad kamma to spend billions of years in total misery.
 - What significance would race, color, ethnicity, religion, beauty, money, etc., have in one’s actions if one understood that all those are not only temporary, but one could be on the other side in the next life? This is a topic that is worth contemplating a lot.

3. Let us take the struggle between the Palestinians and the Israelis because it is making headlines these days; one could take any other conflict. According to Buddha Dhamma, two effects come to play here.

- One in either camp will develop a mindset to hate the other side, take revenge for some action, etc. If they have any kammic energy for the human “*bhava*,” they will come back to the same place with matching “*gati*,” looking for revenge; see, “[Paticca Samuppāda – “Pati + ichcha” + “Sama + uppada](#).”

- The other aspect is for any bad action one does in such a conflict is going to have consequences RELATED to that act. When person A kills or harms another person B, A becomes indebted to B. One way to “pay back this debt” is for B to be born as a child to A; see, “[Kamma, Debt, and Meditation](#).” Isn’t that the biggest irony of all? A Palestinian (Israeli) becoming the child of an Israeli (Palestinian)?
- Either way, the conflict will continue for a long time unless both sides realize the folly of it all.
- This is true for many other conflicts that have been going on for generations. Most of the characters involved have likely been the same. They are too much “involved” in the conflict and cannot free their minds from it.

4. Let us take another example of a slave owner in the old days. That person made a lot of wealth by exploiting those slaves, but for how long? At most 100 years. Where are those slave owners now? They would either be in one of the lowest four realms OR could be a slave himself somewhere, possibly to a former slave.

- It is easy to extend this analysis to many other cases; it is a good idea to contemplate such things. It makes one understand the true meanings of *anicca*, *dukkha*, and *anatta*. That is unfruitful to do immoral things to achieve a brief moment of sensory pleasure, where the consequences can play out for much longer in a future birth.

5. Yet we strive for a quarter of our lives to go through the basic educational process (which is the only part that makes any sense in the long term) and the rest of our life to “accumulate things and prestige.”

- We do not stop and think about how the last years of our life will be, let alone about future lives. By the time we get to such accomplishments, our senses start degrading. No matter how much money we have, we will never be able to maintain our physical appearance or the level of sensory pleasures to our liking.

[WebLink: YOUTUBE: Done Got Old](#)

- The problem is that we are too busy to contemplate such issues because we are in a frantic struggle to “make money for survival.” Whatever vacation time we get, we would not want to spend that time for contemplation. Instead, we go on a trip or do some such activity to “enjoy ourselves.” But when one returns from a vacation, it feels like one needs another to recover from those hectic activities.

6. There is another reason that people do not want to even think about such things; it could be depressing. But I can say with conviction that once one understands the “true nature of this world,” it WILL lead to a peaceful state of mind. It will also be easier to get into *samādhi* and *jhānā*.

- The reason is that as one understands *anicca*, *dukkha*, and *anatta* (the futility of doing immoral things to gain sensory satisfaction in a world that is INHERENTLY not setup for that), one GRADUALLY loses attachment to worldly things, and this makes the mind peaceful; this is the root cause of *nirāmisā sukha*; see, “[Three Kinds of Happiness – What is Nirāmisā Sukha?](#).”
- *Nibbāna* or “Nivana” or “cooling down” is not like any sensory pleasure. Rather, it is a relief. A good analogy is the following: suppose someone has a migraine headache; then the day that headache disappears, that person will get a HUGE sense of relief. It is not a sensory pleasure but a feeling of well-being that is hard to express.

7. I can give one example to make this point. Many people who start understanding *anicca*, *dukkha*, and *anatta*, realize that they do not watch TV or go to entertainment events as much as they used to. This is not something they do deliberately, it just happens. They would rather enjoy a meditation session at home or read/listen to Dhamma. It may be already happening to some of you.

- The mind cannot be forced. It just takes the better path, **but the mind has to be exposed to the better, correct path**. This is why giving true Dhamma is the best giving.

7.2.9 What Does Buddha Dhamma Say about Creator, Satan, Angels, and Demons?

Revised February 20, 2019; August 21, 2019; April 24, 2022; August 28, 2022

Unseen Beings

1. While the concept of a Creator God is absent in Buddha Dhamma (Buddhism), some living beings fit into some conventional ideas on satan, angels, and demons, such as “Seth” and “Ramtha.” Since some readers may not be familiar with “Seth” and “Ramtha,” let me first provide some background.

- Jane Roberts wrote a series of popular books based on “Seth,” a being who could “possess” her body with her permission and spoke to her husband about various things about the world; see, for example, “Seth Speaks” by Jane Roberts (1994). Seth commented on diverse issues and made many predictions too. I am not sure how those “predictions” worked out, but I am sure the success rate must be no better than any human making such predictions.
- Then there is “Ramtha,” who speaks through J. Z. knight; see, for example, “Ramtha -The White Book” by J. Z. Knight (2005). He is very benevolent, providing honest advice on living a better life. As I understand, there is a significant following for Ramtha.

Creator God and Other Unseen Beings

2. Therefore, there are two issues (or concepts) to be discussed:

- First, there is the predominant belief in a “Creator God” in many religions. That concept is, of course, in direct contradiction with not only Buddha Dhamma but also with modern science. The principle of Causality is the basis of both Buddha Dhamma and modern science. There must be a cause(s) for every effect.
- On the other hand, modern science does not believe in “unseen beings.” Science does not attempt to tackle phenomena not measurable with physical instruments. However, the Buddha taught that there are numerous “unseen living beings.”
- We will discuss both the concept of a creator and also possible influence of unseen living beings.

Can there be a Creator God?

3. In my early stages of learning about other religions, I read various books such as “Mere Christianity” by C. S. Lewis and “The Language of God” by Francis Collins (2007).

- They attempt to provide a “case for the Creator God.” See my review, “[The Language of God” by Francis Collins.](#)”

4. As I understand, one reason for those two authors to believe in a Creator is the existence of Moral law. How can we know and feel the truth of the Moral laws unless God instilled those in us?

- On the other side, both authors struggled with the issue of Satan (or Devil) and why there is suffering.
- Why would God allow the existence of Satan and the associated immoral behavior by people? The main conclusion was that God chose to give man free will, and man abused it. But why didn't God create a perfect man?
- Lewis, in particular, worried about the existence of suffering. Why would God allow that?

One Is One's Own Creator!

5. Now, let us see what Buddha Dhamma says about those two issues:

- Of course, in Buddha Dhamma, there is no Creator. Everything happens due to (multiple) causes. By definition, there is no first cause (i.e., a Creator). The “world” has existed as far as one (with supernormal powers or *abhiññā*) can see; for details, see [“The Grand Unified Theory of Dhamma.”](#)
- In a way, one is one’s Creator! The basic idea of *Paṭicca Samuppāda* is that one creates one’s future lives via one’s actions; see the reference in #6 on *Paṭicca Samuppāda*.
- Even people without *abhiññā* powers can remember one or a few past lives; see, [“Evidence for Rebirth.”](#) In some exceptional cases, some can recall multiple past lives under hypnosis; see the book “Many Lives, Many Masters” by Brian Weiss, a psychotherapist.

Good and Bad Co-exist

6. In Buddha Dhamma, “the good” and “the bad” in this world are all built into nature’s laws. Any sentient being experiences “the world” with its sense faculties, and that experience comes in the form of thoughts (*citta*).

- Based on those sense inputs AND one’s *gati* AT THAT TIME, one generates various “good” and “bad” responses. These responses manifest as thoughts, but we may act on them through speech and bodily actions.
- There are 52 mental factors (*cetasika*) that include both “good” characteristics (such as kindness, generosity, fear, and shame of wrong, etc.) and “bad” traits (such as greed, hate, shamelessness and fearlessness of wrongdoing, etc.). See [“Abhidhamma”](#) and [“Tables and Summaries”](#) sections.
- Until one becomes one of the “*attha purisa puggala*” (eight Noble Persons), one WILL have both good and bad *gati*. Those can lead to rebirths in the “good realms” and the *apāyā*, respectively.
- One overcomes the engagement with the rebirth process by comprehending the Four Noble Truths/*Paṭicca Samuppāda*/*Tilakkhaṇa*. See [“Paticca Samuppāda, Tilakkhana, Four Noble Truths.”](#)

7. Thus, there is no “Creator God” or a “Satan.” Each person acts of their own free will and commits moral or immoral acts. What a person today is the “cumulative result” of all one’s actions in the deep past. These manifest as our character (or “*gati*” or “*gathi*”) or *samsāric* habits (or “*āsavas*”). Many posts on this issue on the site, starting with [“Habits, Goals, and Character \(Gati\).”](#)

- And these *gati* and *āsavas* are in constant flux; thus, one could be a murderer one day, but then through sheer willpower, can decide to be a “better person.”
- There is no “soul” or a fixed “self.” One cannot say there is “no-self” either, because one’s “*gati*” or “*āsava*” are unique characteristics and are “one’s own”; see, [“What Reincarnates? – The Concept of a Lifestream.”](#)

8. And no one else can make that change but oneself. Even the Buddha can only show how to change, i.e., how to change these “*gati*” and the “*āsavas*” for the better. When one follows that path, one can feel the “cooling down” or *niveema*” or the *nirāmisā sukha*. That is the real goal of Buddhist meditation; see [“1. Introduction to Buddhist Meditation.”](#)

- The “moral code” comes naturally out of this big picture. One can lead a peaceful life by practicing “*dasa kusala*” (ten moral acts) and avoiding “*dasa akusala*” (ten immoral acts); see [“Ten Immoral Actions \(Dasa Akusala\)”](#) and the follow up post.

Demons and Angels

9. Let us also briefly discuss “demons” and “angels” (or other gods). Most Creator-based religions have such entities. And they are supposed to be able to influence humans. Are there beings like that according to Buddha Dhamma?

- Yes. In Buddha Dhamma, the world is much more complicated than with just demons and angels. We can see and experience only two realms (human and animal) out of 31 possible realms in this world; see [“The Grand Unified Theory of Dhamma.”](#)
 - If someone develops *abhiññā* powers (see [“Power of the Human Mind – Introduction”](#) and follow-up posts), depending on the level attained, one could “see” some or many of these other beings. Some people can do this at present.
10. However, even the majority of people with *abhiññā* power can only “see” some inhabitants in the lowest 11 realms or “*kāma loka*.” That includes the six *deva loka* with “less dense” bodies than ours.
- The beings in the *rūpa loka* and the *arūpa loka* have “bodies” even less dense than those in the *deva* realms, and it is even more difficult to “see” them.
 - According to the Buddha Dhamma, the six realms in the *deva loka* are closest to a “heaven.” Those beings have bodies free from physical illnesses, and there is much more happiness there than in the human world. And they have long lifetimes. However, any being in any higher realm can end up in the lowest four planes (*apāyā*) in the future unless they reach at least the *Sotāpanna* stage of *Nibbāna*.
11. Some of these beings can communicate with humans with or without *abhiññā* powers. Some of these beings are benevolent, and others are evil. As pointed out in the posts on “*gati*,” a being communicates typically with a human with a similar “*gati*” or character.
- Thus an evil/malevolent being (we could say “a demon”) typically tries to communicate with a human with similar lousy character. They may try to impress the human and get their agenda fulfilled.
 - A benevolent being (we could say “an angel” or “a god”) is usually a *deva* from the six *deva* realms. They like to help out people with good character but do not try to communicate directly. Typically, the person may not even know about it.
12. Therefore, many such beings like to “show off” and genuinely try to help people live better lives. But those beings themselves are “travelers of *samsāra*” who happen to have a good birth for a more extended period.
- Then some beings are evil or with bad intentions. I am unaware of prominent cases like those mentioned in #1 above. However, there are many reports on “hearing voices” and even committing crimes based on the instructions through such voices.

Law of Attraction

13. Those beings with bad intentions cannot influence us if our mindsets are NOT COMPATIBLE with theirs. That is a crucial point to understand! See [“The Law of Attraction, Habits, Character \(Gati\), and Cravings \(Āsavas\).”](#)

- **One is ALWAYS responsible for one's actions. If an “unseen evil being” influences one, that is also due to one's lack of morality (one has cultivated bad “*gati*”).**
 - **As in common law, ignorance of Nature's laws is not an excuse.**
 - The reason for being trapped in this suffering-filled rebirth process is simple. We had not been able to understand Nature's laws. Only a Buddha can understand those, and we should be thankful that we live in a time when that message is still available.
 - We must learn Dhamma, eliminate bad *gati*, and cultivate good *gati*. That will pave the way to becoming a Noble Person and thus be free of all future suffering!
14. **There is an exception, though.** Sometimes a *kamma vipāka* can allow one to be influenced by a “malevolent being” even if one is living a moral life.
- That is normally due to an “unfulfilled debt” from a previous life. See [“Kamma, Debt, and Meditation.”](#)

- In such a case, it is a good idea to make offerings to the bhikkhus and those who are in need and ask any such beings to accept the merits. The cultivation of *Metta Bhāvanā* is another. See “[Transfer of Merits \(Pattidāna\) – How Does it Happen?](#).”

It Is a Complex World

15. This world is very complex, and we perceive only a tiny part. But the point is that there is no place anywhere in the 31 realms that can provide permanent happiness.

- **There is no point in pursuing such demons or angels.** They are in the same predicament, or worse, compared to us. Those benevolent beings will help us, even without seeking help, if they see us as good.
- As humans, we have the unique advantage of learning the truth about the dangers of this rebirth process (*samsāra*) and working towards getting out of it by seeking *Nibbāna* or “cooling down.” That was THE message of the Buddha.

7.2.10 Paṭisandhi Citta – How the Next Life is Determined According to Gati

Revised September 7, 2016; revised #2 on March 15, 2018; September 7, 2019

1. The transition of a lifestream from one existence (*bhava*) to another takes place during the last *citta vīthi* of the present *bhava*. For example, when a human is reborn an animal or a *deva*. For a fundamental description of this process, see, “[Cutī-Patisandhi – An Abhidhamma Description](#).”

- But here let us look at how different types of kamma, as well as one’s “*gati*” (pronounced “gathi”), lead to corresponding rebirths in different realms.

2. As discussed in “[Akusala Citta and Akusala Vipāka Citta](#),” all ten types of *akusala kamma* are done with 12 types of *akusala citta*.

- Only those five *akusala citta* with wrong views (*micchā diṭṭhi*) or *vicikicchā* can lead to rebirth in the *apāyā* (four lower realms). Those *akusala citta* lead to just one *paṭisandhi vipāka citta*, and it is called the “*akusala vipāka upekkhā santīraṇa citta*.” That is the type of *citta* that comes to the mind of the dying person destined for the *apāyā*.
- The two dislike-rooted (*paṭigha*) *citta* do not arise at the *Anāgāmi* stage. The remaining five *akusala citta* do not occur only in Arahants; see, “[Akusala Citta and Akusala Vipāka Citta](#).”

3. That one *paṭisandhi citta* can lead to rebirth in an uncountable number of “*bhava*” in the four lowest realms. In the animal realm itself, there is an uncountable number of varieties.

- Thus what determines the actual “place of birth” in the four lowest realms is one’s “*gati*.” Once the fate is determined to be born in one of the four lowest realms due to an *akusala kamma*, the next step for nature is to match “*gati* to *gati*.” A greedy person is likely to be matched with a birth in the *peta* realm (hungry ghosts). A vicious person is expected to be destined to the hell (*niraya*); see, “[How Character \(Gati\) Leads to Bhava and Jāti](#).”

4. Now let us look at how rebirth takes place according to one’s *kusala kamma*. The merits of a *kusala kamma* are ENHANCED when done without *moha*, i.e., without *micchā diṭṭhi* (or with at least mundane *sammā diṭṭhi*). That is discussed in the post, “[A Simple way to Enhance Merits \(Kusala\) and Avoid Demerits \(Akusala\)](#).”

- Thus out of the eight *mahā kusala kamma* (great meritorious actions), four are done with knowledge. They, of course also have *alobha* and *adosa*, i.e., generosity and loving-kindness. Since they have all three *kusala* roots, they are “*tīhetuka*” births (“*thi*” means three and “*hetu*” means roots). **They lead to the best kind of rebirths.** Those are “*tīhetuka paṭisandhi*” or “rebirth with three roots.”
- The other four *mahā kusala kammā* have generosity and loving-kindness, but without mundane or *lokuttara sammā diṭṭhi*. Thus the resulting *kamma vipāka* lead to “*dvihetuka paṭisandhi*” or “rebirth

with two roots.” They also point to birth in the realms 5 through 11 (i.e., in the human and *deva* realms), but they will have less *kammic* power for that birth.

5. It is only those with *tihetuka paṭisandhi* who can attain *magga phala* and attain *Ariya jhānā* in this life. Those with “*dvihetuka paṭisandhi*” lack in necessary wisdom (but this is NOT book-knowledge); they can make progress and acquire the essential merits to have a future *tihetuka paṭisandhi*. But it is impossible to say who has a *tihetuka* or *dvihetuka paṭisandhi*; only a Buddha is capable of that.

- There is one more *paṭisandhi citta* that is possible from a lower grade *mahā kusala kamma*. That is a *kamma* done without knowledge and with less enthusiasm. It involves a *kusala vipāka upekkhā santīraṇa citta*, and is a “rebirth with no good roots.” That is an “*ahetuka paṭisandhi*.” Note that here even though there are two roots present technically, they are very weak due to the absence of enthusiasm. For example, some people participate in exemplary work just because others do it, or because they did not have a choice.
- Such an “*ahetuka paṭisandhi*” can lead to births only in the human or the lowest *deva* realm. Such a birth is comparatively easy to recognize (but not always). People with *ahetuka paṭisandhi* have low IQ, could be blind or deaf at birth,. Or they are severely handicapped in other ways.
- However, such deficiencies COULD occur due to problems encountered in the womb (if the mother is a drug addict or had an ailment during the pregnancy). That is why, in some cases, we see people with the above characteristics, but are smart. They are not born with an *ahetuka paṭisandhi* and could learn Dhamma and attain *jhānā*.

6. Thus we see that there is only **one *paṭisandhi citta* due to the ten *akusala kamma* (from 12 *akusala citta*). There are nine possible *paṭisandhi citta* due to the eight *mahā kusala kamma*.**

- The remaining *paṭisandhi citta* lead to rebirth in the *Brahma loka* (16 *rūpa loka* and four *arūpa loka*). These rise due to *jhānic* states: rebirth in the *rūpa loka* are due to the five *rūpa jhānā* and rebirth in the four *arūpa loka* are due to the four *arūpa jhānā*.

7. Therefore, **only 19 *paṭisandhi citta* that lead to rebirth anywhere in the 31 realms.** As we have discussed, there is an uncountable number of species (we ourselves can see numerous animal species). **What differentiates different species is the “*gati*.”** You can see that each species has its own “character”: Even within a given species, there are differences in “*gati*.” If you look at dogs, there are some who are vicious, and then there are cuddly ones (poodles).

- In the days of the Buddha, when someone dies, relatives of the deceased usually ask the Buddha “what the *jāti* is, and what the *gati* is” for the new birth. These days we don’t have the Buddha to clarify that for us. But we can sort of guess what “*gati*” we have and make sure to change them for the better.
- When one attains the *Sotāpanna* stage, any “*gati*” matching those in the *apāyā* is permanently removed. That means hate, greed, ignorance at the highest levels.
- At the *Sakadāgāmī* stage, one’s liking to a “dense body” to enjoy sense pleasures is no longer there. Such a “dense body” is one that can get diseases. Thus a *Sakadāgāmī* is never born in human or lower realms where sickness and body aches are a fact of life.
- Then at the *Anāgāmī* stage, one loses cravings for enjoying pleasures with the nose, tongue, and the body. Then one can find matching “*gati*” only in the *rūpa* and *arūpa loka*.
- At the *Arahant* stage, one loses the craving for any sensory pleasure associated with even a trace of solid matter. At that stage, the mind attains the true freedom; no more “*gati*” left.

7.3 Seeking Nibbāna

1. This section is for those who are interested not merely in pursuing a good life or seeking better lives in future births. Other religions can also provide guidance for those goals to a certain extent. The uniqueness in the Buddha's message is that there is perpetual suffering in the unending cycle of rebirths in "this world", the root causes for that suffering, that there is possible release from that suffering (Nibbāna), and there is a way to attain *Nibbāna*.

2. The first stage of attaining Nibbāna is the *Sotāpanna* (Stream Entry) stage. In order to reach this stage, one needs to have a complete understanding of Buddha Dhamma (or the laws of nature). Since only a Buddha can discover these laws, it is not possible for anyone (no matter how intelligent) to discover these laws by oneself.

3. Once the *Sotāpanna* stage is attained, one knows what to do next. Thus there is no need to get further information from anywhere else. My goal with this site is to provide necessary information to attain the *Sotāpanna* stage.

[Sotāpanna Stage of Nibbāna](#) subsection has a number of posts describing the *Sotāpanna* stage.

7.3.1 Aṭṭha Purisa Puggalā – Eight Noble Persons

March 4, 2019; revised #9 on March 6, 2019; October 5, 2019 (#11)major revision August 29, 2022

Introduction

1. Many *suttā* describe various characteristics of *Aṭṭha Purisa Puggalā* or *Ariyā* (eight Noble Persons: *Sotāpanna Anugāmi* through *Arahant*). See "[Sotāpanna Anugāmi – No More Births in the Apāyā](#)." We will discuss some key features in this post, especially regarding the maximum time taken to attain *Arahanthood*.

- There are likely several ways Noble Persons are defined in the *Tipiṭaka*. Here we will start by considering a categorization based on the state of development of *pañca indriya* in a set of *suttā* in *Saṃyutta Nikāya* 48.
- The "[WebLink: suttacentral: Suddhika Sutta \(SN 48.1\)](#)" states what the *pañca indriya* are: *Saddhā indriya*, *vīriyā indriya*, *sati indriya*, *samādhi indriya*, *paññā indriya*.

2. The “[WebLink: suttacentral: Pathama Vibhaṅga Sutta \(SN 48.9\)](#)” explains what those five *indriya* are. I will just provide a short translation to get the idea.

- **Saddhā indriya** is optimized when one truly realizes the truth of the virtues of the Buddha (*itipi so bhagava...*): “That Blessed One is an *Arahant*, perfectly enlightened, accomplished in true knowledge and conduct, perfectly purified, knower of the wider world (of 31 realms), unsurpassed in virtue, teacher of *devas*, *Brahmā*, and humans, the Enlightened One, the Blessed One.” This is about the Buddha as a person AND even more importantly, the comprehension of the concept of Buddha as “*bhava uddha*”; see, “[Supreme Qualities of Buddha, Dhamma, Saṅgha](#).” [Buddha = *bhava* + *uddha*: one who figured out how to stop existences (*bhava*) from arising, *uddha* is rooting out]
- **Viriya indriya** represents one’s effort in cultivating *kusala* and discarding *akusala*.
- **Sati indriya** represents one’s ability to be mindful of one’s thoughts, speech, and actions.
- **Samādhi indriya** indicates one’s ability to focus on *Nibbāna* and to get to *samādhi*.
- **Paññā indriya** represents one’s comprehension of the Four Noble Truths about *saṃsāric* suffering.

Categorization Based on *Pañca Indriya*

3. [WebLink: suttacentral: Dutiyasaṅkhitta Sutta \(SN 48.13\)](#) states, “*Imesaṃ kho, bhikkhave, pañcannaṃ indriyānaṃ samattā paripūrattā araham hoti, tato mudutarehi anāgāmī hoti, tato mudutarehi sakadāgāmī hoti, tato mudutarehi sotāpanno hoti, tato mudutarehi dhammānusārī hoti, tato mudutarehi saddhānusārī hoti. Iti kho, bhikkhave, indriyavemattatā phalavemattatā hoti, phalavemattatā puggalavemattatā*”ti.

- **Translated:** “*Bhikkhus, one who has fulfilled pañca indriya is an Arahant*; one who has developed them to lesser levels are *Anāgāmī*, *Sakadāgāmī*, *Sotāpanna*, *Dhammānusārī*, and *Saddhānusārī*. *Bhikkhus*, that is how different levels of *indriya* development determine the level of progress.”
- As we know, *Dhammānusārī* and *Saddhānusārī* are *Sotāpanna Anugāmi*.

Two Kinds of *Sotāpanna Anugāmi*

4. There are 10 *suttā* in the “[WebLink: suttacentral: Okkantika Saṃyutta \(SN 25\)](#)” that focus only on the two kinds of *Sotāpanna Anugāmi*: *Dhammānusārī* and *Saddhānusārī*. These are important because they emphasize the need to comprehend the *anicca* nature of the five aggregates (*pañcakkhandha*).

“[WebLink: suttacentral: Cakkhu Sutta \(SN 25.1\)](#)” states: “*Cakkhuṃ, bhikkhave, aniccaṃ vipariṇāmi aññathābhāvi; sotaṃ aniccaṃ vipariṇāmi aññathābhāvi; sota..ghānaṃ.. jivhā .. kāyo .. mano anicco vipariṇāmi aññathābhāvi. Yo, bhikkhave, ime dhamme evaṃ saddahati adhimuccati—ayaṃ vuccati saddhānusārī, okkanto sammattaniyāmaṃ, sappurisabhūmiṃ okkanto, vūtivatto puthujjanabhūmiṃ; abhabbo taṃ kammaṃ kātuṃ, yaṃ kammaṃ katvā nirayaṃ vā tiracchānayaṇiṃ vā pettivisaṃyaṃ vā upapajjeyya; abhabbo ca tāva kālaṃ kātuṃ yāva na sotāpattiphalam sacchikaroti.*”

- **Translated:** “*Bhikkhus, the eye is of anicca nature, bound to be destroyed, and is subject to unexpected change during its existence.*” The ear... nose... tongue... body... mind... *Bhikkhus*, one who has conviction and belief that these phenomena are this way is called a *faith-follower (Saddhānusārī)*: one who has entered the Noble Path (*sammattaniyāma*), has entered the plane of integrity (*sappurisabhūmi*), has transcended the plane of the run-of-the-mill (*puthujjanabhūmi*). He cannot do any deed by which he might be reborn in hell, in the animal womb, or in the realm of hungry shades. He is incapable of passing away (**from this Ariya birth**) until he has realized *Sotāpatti phala*.
- Then the same verse is repeated for the *Dhammānusārī* with the following replacement for the part marked in red above for the *Saddhānusārī*: “one who, after pondering with insight, has accepted that these phenomena are this way is called a *Dhamma-follower (Dhammānusārī)*.”

Maximum of Seven More *Bhava* For a *Sotāpanna* and Seven More *Ariya bhava* For a *Sotāpanna Anugāmi*

5. It is important to realize from #4 above that a *Sotāpanna Anugāmi* will never “die” from the *Ariya* birth, and that no time limit is given. Only upon getting to the *Sotāpanna* stage will one have a limited number of births; see below.

- However, a *Sotāpanna Anugāmi* will have only 7 more *Ariya bhava* left (*Sotāpanna*, *Sakadāgāmi Anugāmi*, *Sakadāgāmi*, *Anāgāmi Anugāmi*, *Anāgāmi*, *Arahant Anugāmi*, and *Arahant*).
- Thus, it appears that is what is stated in the *Ratana Sutta* as, “*Na te bhavaṃ aṭṭhamamādiyaṃ*” (7 types of *Ariya Bhava* left) for eight types of Noble Persons (*Ariyā*).

6. The other nine *suttā* in the “[WebLink: suttacentral: Okkantika Saṃyutta \(SN 25\)](#)” go through the same descriptions for *Dhammānusāri* and *Saddhānusāri* in terms of the six types each of *rūpa*, *viññāṇa*, *samphassa*, *samphassajā vedanā*, *rūpasāññā*, *rūpasāñcetanā*, *rūpatanḥā*, *dhātu*, and the five types of *khandha* (i.e., *pañcakkhandha*).

Time Limits for other Noble Persons to Attain *Arahanthood*

7. The time limits for the other Noble Persons are given in the “[WebLink: suttacentral: Saupādisesa Sutta \(AN 9.12\)](#).”

- There are five kinds of *Anāgāmis* (see #10 below), and they all have overcome the first five *saṃyojana* of *sakkāya diṭṭhi*, *vicikicchā*, and *sīlabbata parāmāsa*, *kāma rāga*, *paṭigha*.
- Some of them will be born in a *Brahma* realm reserved for the *Anāgāmis*, will remove the remaining *saṃyojana* of *rūpa rāga*, *arūpa rāga*, *māna*, *uddhacca*, *avijjā*, and attain *Parinibbāna* there.
- Others would have already removed two more *saṃyojana* of *rūpa rāga* and *arūpa rāga*, and thus will not be born in any realm, and thus will remain in the *gandhabba* state until the *kammic* energy runs out. This is called *antarāparinibbāna* (“*Parinibbāna* in between realms”). This was discussed at the forum: “[WebLink: Pure Dhamma Forum: Antara Parinibbāna](#).”

8. Then there is the Noble Person with the *Sakadāgāmi phala* (including those *Anāgāmi Anugāmis*). “[WebLink: suttacentral: Saupādisesa Sutta \(AN 9.12\)](#)” states that, “*So tiṇṇaṃ saṃyojanānaṃ parikkhayā rāgadosamohānaṃ tanuttā sakadāgāmi hoti, sakideva imaṃ lokaṃ āgantvā dukkhassantaṃ karoti*.”

- **Translated:** “With the ending of three fetters (*saṃyojanā*), and the weakening of greed, hate, and delusion, a *Sakadāgāmi* will come back to this world only once to *deva* realms.”

Three Types of *Sotāpanna*

9. Then there are three types of *Sotāpanna*:

“*So tiṇṇaṃ saṃyojanānaṃ parikkhayā ekabījī hoti, ekaṃyeva mānusakāṃ bhavaṃ nibbattetvā dukkhassantaṃ karoti*.”

“*So tiṇṇaṃ saṃyojanānaṃ parikkhayā kolaṇkolo hoti, dve vā tīṇi vā kulāni sandhāvitvā saṃsaritvā dukkhassantaṃ karoti*.”

AND “*So tiṇṇaṃ saṃyojanānaṃ parikkhayā sattakkhattuparamo hoti, sattakkhattuparamaṃ deve ca manusse ca sandhāvitvā saṃsaritvā dukkhassantaṃ karoti*.”

Translated:

“With the ending of three *saṃyojanā*, an *ekabījī* will be reborn just one time in human existence (*bhava*), then make an end of suffering.”

“With the ending of three *saṃyojanā*, a *kolaṅkolo* will be **two or three bhava** then make an end of suffering.”

“With the ending of three *saṃyojanā*, a *sattakkhattuparamo* has most seven *bhava* among *devas* and humans and then make an end of suffering.”

- The fact that they are all *Sotāpannas* becomes clear in #10 below.
- It is also important to note that there is no mention in this *sutta* of the *Sotāpanna Anugāmis*. **This sutta is about those who have “seen” Nibbāna.** A *Sotāpanna Anugāmi* — in the language of *Abhidhamma* — has only transcended the “*anāriya*” level and made it to the “*gotrabu*” stage. In the future, they will attain the *Sotāpanna* stage when they get to the *magga* and *phala citta*. See the end of the post, “[Citta Vīthi – Processing of Sense Inputs](#),” where *magga phala citta vīthi* is discussed.

Summary in *Puggalapaññatti*

10. The above descriptions are confirmed by “[WebLink: suttacentral: Ekakapuggalapaññatti](#)” in *Abhidhamma*, where 54 types of persons are listed. We will mention just those categories that are of interest here.

- *Katamo ca puggalo sammāsambuddho? Idhekacco puggalo pubbe ananussutesu dhammesu sāmaṃ saccāni abhisambujjhati; tattha ca sabbaññutaṃ pāpuṇāti, balesu ca vasībhāvaṃ—ayaṃ vuccati puggalo “sammāsambuddho.”*
- *Katamo ca puggalo paccekasambuddho? Idhekacco puggalo pubbe ananussutesu dhammesu sāmaṃ saccāni abhisambujjhati; na ca tattha sabbaññutaṃ pāpuṇāti, na ca balesu vasībhāvaṃ—ayaṃ vuccati puggalo “paccekasambuddho.”*

The rest belong to two categories: “*Aṭṭha ariyapuggalā ariyā. Avasesā puggalā anariyā.*”

Here are the 8 Noble Persons or *ariyā* (*aṭṭha ariyapuggalā*):

Tiṇṇaṃ saṃyojanānaṃ pahānāya paṭipanno puggalo sotāpattiphalasacchikiriyaṃ paṭipanno (Sotāpanna Anugāmi). Yassa puggalassa tīṇi saṃyojanāni pahīnāni—ayaṃ vuccati puggalo “sotāpanno.”

Kāmarāgabyāpādānaṃ tanubhāvāya paṭipanno puggalo sakadāgāmiphalasacchikiriyaṃ paṭipanno. Yassa puggalassa kāmarāgabyāpādā tanubhūtā—ayaṃ vuccati puggalo “sakadāgāmī.”

Kāmarāgabyāpādānaṃ anavasesappahānāya paṭipanno puggalo anāgāmiphalasacchikiriyaṃ paṭipanno. Yassa puggalassa kāmarāgabyāpādā anavasesā pahīnā—ayaṃ vuccati puggalo “anāgāmī.”

Rūparāgaarūparāgamānauddhaccaavijjāya anavasesappahānāya paṭipanno puggalo arahattaphalasacchikiriyaṃ paṭipanno. Yassa puggalassa rūparāgo arūparāgo māno uddhaccaṃ avijjā anavasesā pahīnā—ayaṃ vuccati puggalo “arahā.”

Sotāpanna Anugāmis fall into 2 categories:

Yassa puggalassa sotāpattiphalasacchikiriyaṃ paṭipannassa paññindriyaṃ adhimattaṃ hoti, paññāvāhiṃ paññāpubbaṅgamaṃ ariyamaggaṃ bhāveti—ayaṃ vuccati puggalo “dhammānusārī.”

Yassa puggalassa sotāpattiphalasacchikiriyaṃ paṭipannassa saddhindriyaṃ adhimattaṃ hoti, saddhāvāhiṃ saddhāpubbaṅgamaṃ ariyamaggaṃ bhāveti—ayaṃ vuccati puggalo “saddhānusārī.”

- Note that there is no time limit given for a *dhammānusārī* and a *saddhānusārī*.

Sotāpannas fall into 3 categories:

Idhekacco puggalo tiṇṇaṃ saṃyojanānaṃ parikkhayā sotāpanno hoti avinipātadhammo niyato sambodhiparāyano. So sattakkhattuṃ deve ca mānuse ca sandhāvitvā saṃsaritvā dukkhassantaṃ karoti—ayaṃ vuccati puggalo “sattakkhattuparamo.”

Idhekacco puggalo tiṇṇaṃ saṃyojanānaṃ parikkhayā sotāpanno hoti avinipātadhammo niyato sambodhiparāyano. So dve vā tīṇi vā kulāni sandhāvitvā saṃsaritvā dukkhassantaṃ karoti—ayaṃ vuccati puggalo “kolaṃkolo.”

Idhekacco puggalo tiṇṇaṃ saṃyojanānaṃ parikkhayā sotāpanno hoti avinipātadhammo niyato sambodhiparāyano. So ekaṃyeva mānusakaṃ bhavaṃ nibbattetvā dukkhassantaṃ karoti—ayaṃ vuccati puggalo “ekabījī.”

- Here, a *sattakkhattuparamo* seems to have seven “births” (*jāti*) or “bhava” among the humans and devas. It is not clear whether it is seven *jāti* or *bhava*.
- A *kolaṃkolo* seems to have two or three births (*kula* means born into a certain caste or clan); but it is possible that it could mean two or three *bhava*.
- An *ekabījī* has one *bhava* as a human.

Anāgāmis fall into five categories and they have essentially one existence after death as a human, either born in a *Brahma* realm or the *gandhabba* state; see #7 above (I will just state the categories):

antarāparinibbāyī, upahaccaparinibbāyī, asaṅkhārāparinibbāyī, sasaṅkhārāparinibbāyī, uddhamsoto akaniṭṭhagāmī.

Arahants fall into two categories they, of course, are not reborn (I will just state the categories):

ubhatobhāgavimutto, paññāvimutto.

Sotāpanna Anugāmi – At Least a Trace of Understanding of Tilakkhaṇa

11. “[WebLink: suttacentral: Alagaddūpama Sutta \(MN 22\)](#)” also provides similar information and provides another description of *Sotāpanna Anugāmi*. At the end of the *sutta*, it describes the types of Noble Persons as above, and at the very end states, “*Evam svākkhāte, bhikkhave, mayā dhamme uttāne vivaṇṇe pakāsite chinnapilotike yesaṃ mayi saddhāmatthaṃ pemamattaṃ sabbe te saggaparāyanā*”ti.”

- **Translated:** “those who have even a trace of faith and liking for me (*saddhāmatthaṃ pemamattaṃ*; *mattaṃ* means a “trace”), are all headed for *deva* realms (*saggaparāyanā*).”
- When one has removed the ten types of *micchā diṭṭhi*, and starts comprehending *Tilakkhaṇa*, one becomes a *Sotāpanna Anugāmi*. They are also released from the *apāyā*. See, “[Sotāpanna Anugāmi – No More Births in the Apāyā](#).”

Arahanthood – Not Annihilation But End of Suffering

12. There is also this important verse towards the end of the “[WebLink: suttacentral: Alagaddūpama Sutta \(MN 22\)](#)”: “*Yathā cāhaṃ na, bhikkhave, yathā cāhaṃ na vadāmi, tathā maṃ te bhonto samaṇabrāhmaṇā asatā tucchā musā abhūtena abbhācikkhanti: ‘venayiko samaṇo gotamo, sato sattassa ucchedaṃ vināsaṃ vibhavaṃ paññāpeti’ti. Pubbe cāhaṃ, bhikkhave, etarahi ca dukkhañceva paññāpemi, dukkhassa ca nirodhaṃ.*”

- **Translated:** “..*Bhikkhus*, I have been baselessly, vainly, falsely, and wrongly misrepresented by some recluses and *brahmins* thus: ‘The recluse Gotama leads people astray; he teaches the annihilation, the destruction, the extermination of an existing being.’ ..*Bhikkhus*, both formerly and now what I teach is suffering and the cessation of suffering.”
- Many people today have this wrong perception. It could arise until one gets at least to the *Sotāpanna Anugāmi* stage and starts removing *Sakkāya Diṭṭhi*. It is the belief that there is an “existing person” that

can enjoy things the world has to offer. They do not realize that there is much more suffering in this world. Even though there are short-lived pleasures, there is unimaginable suffering especially in the rebirth process.

- It is only at the *Arahant* stage that the perception of a “me” (*asmi māna*) goes away; see, “[Sakkāya Ditthi is Personality \(Me\) View?](#).”

13. Different types of persons are listed in the “[WebLink:suttacentral: Ekakapuggalapāṇṇatti](#)” of the “[WebLink:suttacentral: Puggalapāṇṇatti](#)” in Abhidhamma.

7.3.2 *Āsava, Anusaya, and Gati (Gathi)*

Revised March 31, 2017; August 26, 2017; October 7, 2019; re-written on October 28, 2020; revised August 6, 2022

Āsava Removal Is Nibbāna

1. *Nibbāna* is reached by “*āsavakkhaya*” or removing *āsava* (cravings). As we will see below, that involves removing *anusaya* (hidden defilements) by removing bad *gati* (character/habits.)

- We will tie up a series of posts that I have posted on *gati* and *āsava* with this post. See, “[Habits and Goals, and Character \(Gati\)](#),” “[The Law of Attraction, Habits, Character \(Gati\), and Cravings \(Āsava\)](#),” “[Samsāric Habits, Character \(Gati\), Cravings \(Āsava\)](#).”
- Finding English translations for some of the Pāli words that the Buddha used is difficult. But the key is to grasp what is meant by those terms. Once the idea sinks in, that is all that matters. One could even just use the Pāli term and KNOW what it means. It is like learning the meaning of the word “dollar” or “car.” Different languages use the same words, but everybody understands what those words mean.

Āsava Come Up Due to Anusaya

2. *Anusaya* is usually translated as “latent tendencies” or “mental fermentations.” *Āsava* is the cravings. The word “*gati*” is hardly mentioned in current texts but is a critical concept in Buddha Dhamma.

- *Anusaya* is indeed “mental fermentations” that lie deep down in us. That is comparable to mud sitting at the bottom of a glass of water.
- If that glass of water is disturbed with a straw, some of that mud comes to the surface. That is like *āsava* bubbling up when we are disturbed by a strong sensory event. We display our real character/habits or *gati* (*gathi*) when that happens.
- In other words, some *gati* and *āsava* lay hidden (sleeping) and are called “*anusaya*.” With a strong enough “trigger,” an ingrained *anusaya* can be brought to the surface. *Anusaya* are the hardest to get rid of.

Pada Nirutti for Anusaya and Āsava

3. In both Pāli and Sinhala, “*saya*” means a storage place: “*jalāsaya*” means a water reservoir; “*āmāsaya*” means the stomach where the food we eat goes; “*gabbāsaya*” is the womb where the unborn baby is kept and nurtured until it is ready to come out, etc. [*pada* : [nt.] foot; foot-step; a word; position; place; reason; cause; a line of stanza; the final rest. *nirutti* : [f.] language; philology; explanation of words, grammatical analysis, etymological interpretation; pronunciation, dialect, way of speaking, expression.]

- “*Saya*” also means “sleeping” (as in “*sayanaya*” or සැසැස in Sinhala). “*Anu*” indicates “food” or “defilements” in most cases. Therefore, “*anusaya*” means “sleeping” or “in storage” with some dominant characteristics.

- When they are disturbed by an *ārammaṇa* (a sensory input), they come to the surface as “*āsava*” or “cravings/likings.” The word *ārammaṇa* is explained in detail in “[Chachakka Sutta – Six Types of Vipāka Viññāna](#).”
- As mentioned above, *āsava* are four main types. Within each class, there can be an infinite variety. For example, “*kāmāsava*” will include *āsava* for sense inputs coming through five physical senses with an endless variety.

Anusaya Awakened By Triggers (*Ārammaṇa*)

4. When such a trigger awakens an “*anusaya*,” it is out as an “*āsava*,” and one will display it through actions. Then, we also say one has that type of cravings or “*gati*.” These triggers are *ārammaṇa*; See “[Vipāka Vedanā and “Samphassa jā Vedanā” in a Sensory Event](#).”

- For example, seeing a beautiful woman matching “his *gati*” could trigger *kāmāsava* in a calm person. He may get agitated upon seeing that woman. But he may not be “triggered” by seeing another woman, even if beautiful. That is a bit complex, but I am sure we all know this to be true.
- And if he keeps thinking about that woman, that *anusaya* will ferment and grow (condense). Thus the name “mental fermentations.”
- How much one gets “agitated” depends on one’s *āsava* and sensory input strength. Rapes, for example, occur when both are strong.

An Analogy for *Anusaya*

5. *Anusaya* is like active gun powder in a matchstick. The matchstick is harmless by itself and will cause no fire. But the POTENTIAL to create a fire is there.

- When the matchstick strikes a rough surface, the heat generated causes the gun powder to ignite and create fire.
- Similarly, a robust sensory input can “awaken” and “fire up” the sleeping *anusaya*.
- One’s *gati* becomes strong with repeated use, and one’s *āsava* depends on both *anusaya* and *gati*.
- An *Arahant* has removed all types of *anusaya*, *gati*, and hence *āsava*. No matter how strong a sensory input comes in, he/she will not be “triggered” by it. A matchstick with no active gun powder cannot catch fire, no matter how hard a match strikes.
- An *Arahant* may still have *gati* devoid of defilements. They are just habits without *kammic* consequences. For example, there is an account in the *Tipiṭaka* of a young *Arahant* who tended to jump over mud puddles.

Seven Types of *Anusaya*

6. There are 7 types of *anusaya*: *diṭṭhānusaya* (wrong views), *vicikicchānusaya* (tendency to do the unwise), *kāmarāgaanusaya* (temptation for sense pleasures), *paṭigha anusaya* (temptation for hatred), *bhavarāgaanusaya* (craving for existence), *mānanusaya* (sense of “me”), and *avijjānusaya* (ignorance); see, for example, “[WebLink: suttacentral: Dutiya Anusaya Sutta \(AN 7.12\)](#).”

- There are four broad categories of *āsava*: *Diṭṭhāsava*, *Kamāsava*, *Bhavāsava*, and *Avijjāsava*; see, “[WebLink: suttacentral: Āsava Sutta \(AN 6.58\)](#).”

Four Types of *Āsava*

7. *Āsava* are four main types: *diṭṭhāsava* (*diṭṭhi āsava*), *kāmāsava* (*kāma āsava*), *bhavāsava* (*bhava āsava*), and *avijjāsava* (*avijjā āsava*).

- *Diṭṭhāsava* is the craving or attachment to wrong views. That is why sometimes it is hard to accept or even consider other viewpoints. Again, there are views on numerous topics: religion, philosophy, politics, and combinations thereof. Comprehension of *anicca*, *dukkha*, and *anatta* automatically leads to getting rid of *diṭṭhāsava*.
- *Kāmāsava* induces a craving for indulging in sensory pleasures via the five physical senses. Within this broad category. Each person will have their cravings—some like music more than food, food more than reading, etc. The combinations are endless.
- *Bhavāsava* is craving for existence. No matter where in the 31 realms one is born, one always wants to live. Again there are many possibilities. Most prefer *kāma loka* with all five senses. Some who enjoy *jhānic* pleasures may prefer birth in an *arūpa loka* with just the mind, etc.
- *Avijjāsava* is the root cause for all *āsavas*: not knowing the real nature of this world, i.e., not comprehending *anicca*, *dukkha*, *anatta*, and thus not understanding the Four Noble Truths.

Relationship Between *Āsava* and *Anusaya*

8. The seven types of *anusaya* can give rise to four types of *āsava*.

- *Diṭṭhānusaya* and *vicikicchānusaya* give rise to *diṭṭhāsava*.
- *Kāmarāganusaya* and *paṭighanusaya* lead to *kāmāsava*.
- *Bhavarāganusaya* gives rise to *bhavāsava*.
- *Avijjānusaya* and *mānanusaya* lead to *avijjāsava*.
- One cannot REMOVE the other three *āsava* until one removes *diṭṭhāsava* at the *Sotāpanna* stage.

Kāmāsava Is Absent In *Rūpa* and *Arūpa Loka*

9. What type of *āsava* “can be triggered to come up” depends on the *bhava* one is in.

- In *kāma loka*, all *āsava* are “in play,” i.e., can be triggered by a sense event.
- In *rūpa* or *arūpa Brahma loka*, *kāmāsava* remain dormant since there are no enticing *ārammaṇa* in Brahma realms. But unless one is an *Anāgāmi*, one still has *kāmāsava*, and that will “come into play” when one is reborn in *kāma loka*.
- Thus, one will not have *kāma anusaya* bubbling up when in *rūpa* or *arūpa* realms. Therefore, one will also not display any “*kāma gati*” that one has while in *rūpa/arūpa* realms.

Human *Bhava* – Ability to Remove All *Anusaya*

10. As a given sentient being traverses the “*samsāra*” or the “rebirth process,” one makes transitions from “*bhava* to *bhava*,” but within a given human (or animal) *bhava*, one may be born numerous times as a human (or the same animal); see, “[Bhava and Jāti – States of Existence and Births Therein](#).”

- Through all these, the physical appearance will change drastically, especially when *bhava* is changed. Thus, it transitions from being a *deva* to a human or a human to a dog. There is no resemblance to a continued “soul.”
- However, our *anusaya* remains with us through the *samsāric* journey. Of course, *anusaya* can change during a given *bhava*. Most changes in *anusaya* occur during human *bhava*. A human can even remove all *anusaya* and attain *Nibbāna*.

11. That is another reason why the Buddha rejected both “self” and “no-self.” What character or quality is displayed in a given *bhava* could be very different from another *bhava*. On the other hand, an ever-changing set of *anusaya* remains with a given lifestream.

- I call a lifestream a “dynamic self”: [“What Reincarnates? – Concept of a Lifestream.”](#)
- Now let us examine the roots of the words *anusaya* and *āsava* (*āsaya*); “*āsava*” is a synonym for “*āsaya*.”

Removal of *Āsava* and *Anusaya*

12. These seven types of *anusaya* and four *āsavas* go away step-by-step as one goes through the four stages of *Nibbāna*.

- A *Sotāpanna* has removed *Diṭṭhāsava*. *Kamāsava* is lessened at the *Sakadāgāmi* stage and removed at the *Anāgāmi* stage. The other two reduce at each stage also and go away only at the *Arahant* stage.
- When *anusaya* and *gati* go away, then, of course, *āsava* disappears without a trace. One will not crave anything. One is then unperturbed by anything. That is the ultimate state of “cooling” or *Nibbāna*.

Gati (Character/Habits) Related to *Āsava* and *Anusaya*

13. *Gati* denotes a mixture of one’s character and habits. Of course, one’s character depends on one’s *gati* and *vice versa*.

- It should be evident that our character (*gati*) is related to *anusaya* and *āsava*.
- All three, *āsava*, *anusaya*, and *gati*, reinforce each other. One has a particular type of character because of the set of *āsava* and *anusaya* he/she has. On the other hand, none of the three will change unless one’s character and habits change. That change is WILLFUL.
- And there is the fourth parameter of habits (called “*gathi purudu*” in Sinhala), which lies at the very bottom of the hierarchy. Some people talk rough, even when they are not mad. It is just a habit.
- Getting rid of bad habits and cultivating good habits is the first step in controlling one’s *āsava* (temptations) and eventually getting rid of *anusaya*.
- “Immoral *gati*” due to *anusaya* makes the *akusala-mūla Paṭicca Samuppāda* take place and creates “*bhava*” for the *sansāric* process. These “immoral *gati*” are the “*san gati*” in “*tiṇṇaṃ saṅgati phasso*”; see, [“Tanhā – How We Attach Via Greed, Hate, and Ignorance.”](#)

Removal of Bad *Gati* and Cultivating Good *Gati*

14. There are two critical aspects in dealing with changing one’s habits:

- One needs to be mindful of bad habits’ negative and positive consequences of good practices. That is *Satipaṭṭhāna*.
- And, one needs to avoid bad habits WILLFULLY and WILLFULLY engage in ethical and moral practices. That is *Ānāpāna*.
- One would engage in all those activities in *Satipaṭṭhāna/Ānāpāna*.
- One can use the “search” box on the top right to find relevant posts on *Satipaṭṭhāna* and *Ānāpāna*. A practical, systematic way to do both is discussed in the [“Living Dhamma”](#) section.

15. That is the path advocated by the Buddha. One could proceed a little on the Path and achieve a “sense of peace.” One could go further to make the future lives better, or one could go all the way and remove all four *āsava*, thus attaining the *Arahantship*.

- That is why “*āsavakkhaya ñāṇa*” or the “way to remove *āsava*” is the critical knowledge that the Buddha developed on attaining Buddhahood. And that knowledge is in the Four Noble Truths, and the way to achieve “*āsavakkhaya*” is the Noble Eightfold Path.

Bigger Picture

16. We are fortunate to live in a time when science provides further evidence and ways to understand this process. There is a series of posts in the ‘Dhamma and Science’ section starting with, “[Truine Brain – How the Mind Rewires the Brain via Meditation/Habits](#)” and in the “Meditation” section starting with “[Key to anāpānasati – How to Change Habits and Character \(Gati\)](#).”

- Finally, where are these *anusaya* in “storage”? They are in the *kamma bhava*, the *nāma loka* or the “immaterial world.”
- We have two “worlds”: one is the *rūpa loka* that we access with our five physical senses. The other is the above-mentioned *nāma loka*.
- The *nāma loka* has our memories or *nāma gatta* and *anusaya* related to *kamma bija*. This “immaterial world” is accessed with the *mana indriya*. Details at “[Our Two Worlds – Rūpa Loka and Nāma Loka](#)” and “[What are Dhamma? – A Deeper Analysis](#).”

7.3.3 The Way to Nibbāna – Removal of Āsavā

Revised November 19, 2018; February 11, 2020; August 7, 2022

Introduction

1. The night the Buddha attained the Buddhahood, three unique pieces of knowledge (*tivijjā*) arose in him, namely:

- The unique vision with which he was able to recollect innumerable former human existences (*pubbenivāsānussati ñāṇa*.)
- The ability to see beings passing away and reborn according to their *kamma* (*cutupapāda ñāṇa*.)
- The unique vision to see how to eliminate all kilesa (*āsava*) or defilements (*āsavakkhaya ñāṇa*.)

Āsavakkhaya Ñāṇa

2. With the attainment of the *āsavakkhaya ñāṇa*, ascetic Siddhartha became Buddha Gotama. That was the final step in purifying the mind. That was the fruit of all his efforts, the Path to attaining *Nibbāna* for any being. *Āsavakkhaya* (*āsava+khaya* = cutting off all the *āsavā* or mental fermentations). Thus *Āsavakkhaya ñāṇa* means the knowledge of cutting off *āsavā* and thus freeing the mind from the ability to generate any defilement.

- The term *āsava* comes from “*āsravayata āva*” (අසරවයා අවා) in Sinhala, which means “came to association with.” Thus those habits (“*gati*”) that one keeps associating with come even closer. As one continues and feeds those habits through successive rebirths, they become *āsavā*. See, “[Āsava, Anusaya, and Gati \(Gathi\)](#).”
- *Āsava* (in Pāli, Sinhala, and Sanskrit) also means a distillation to get an extract or essence. Some medicinal concoctions are fermented by keeping a mixture of ingredients underground for many months.
- We have cultivated (or fermented) some habits (“*gati*”) over innumerable lives, and that is why they are hard to remove. Only through learning pure Dhamma and persistence in one’s efforts can one break such bad habits and thus eventually remove *āsava*. There are four types of *āsava*, each is associated with corresponding bad habit.

Connection to Paṭicca Samuppāda

3. The doctrine of *Paṭicca Samuppāda*, which has twelve factors, namely, *avijjā*, *saṅkhāra*, *viññāṇa*, *nāmarūpa*, *saḷāyatana*, *phassa*, *vedanā*, *taṇhā*, *upādāna*, *bhava*, *jāti*, *jarā-maraṇa* became clear to him.

- Going over this Doctrine of *Paṭicca Samuppāda* in forward and reverse order repeatedly, he attained the Eightfold Noble Path, *Ariya Magga*, which is also known as *Yathābhūta Ñāṇadassana*.

4. *Paṭicca Samuppāda* clarifies how ignorant beings accumulate defilements (and *āsavā*), and get trapped in the round of rebirths (*saṃsāra*.) Those *āsavā* are generated and fermented via repeated use of bad habits (“*gati*”).

- The Noble Eightfold Path is the way to remove those “*gati*” (and thus *āsavā*) from a mind.

Four Stages of *Nibbāna* Related to the Four *Āsavā*

5. We all have four significant types of *āsavā*, even though there are uncountable minor varieties:

- *Diṭṭhāsava* (*diṭṭhi āsava*) is the category that is due to all kinds of false beliefs (*micchā diṭṭhi*): for example, if someone does not believe in rebirth, there may be cravings such as “I need to enjoy life to the fullest before I die.”
- *Kāmāsava* (*kāma āsava*) is associated with craving sensory pleasures.
- *Bhavāsava* (*bhava āsava*) is the craving for a particular kind of existence, say as a human, *deva*, or *Brahma*. Any living being, in any realm, craves for life, to live.
- *Avijjāsava* (*avijjā āsava*) is all cravings that arise due to ignorance. That is the ignorance of the Noble Truth of Suffering (which is NOT merely suffering itself) and the other Noble Truths.

6. The four types of *āsavā* go away step-by-step as one proceeds on the Path. One can reduce them even before the *Sotāpanna* stage, but those reductions may not hold in future lives.

- When one attains the *Sotāpanna* stage, all four types of *āsavā* that could trigger “*apāyagāmi*” actions go away from one’s mind, i.e., one will never be reborn in the four lowest realms. *Diṭṭhāsava* (those due to wrong views) disappear entirely.
- At the *Sakadāgāmi* stage, *kāmāsava* and *bhavāsava* reduce, and a *Sakadāgāmi* will be born only as a *deva* or above in future lives; *avijjāsava* also reduces.
- *Kāmāsava* completely goes away at the *Anāgāmi* stage. Thus one will never be reborn in the *kāma loka* (including the *deva* realm) again. *Bhavāsava* and *avijjāsava* also reduce.
- *Bhavāsava* and *avijjāsava* disappear without a trace at the *Arahant* stage. Thus *āsavakkhaya* becomes complete.

Removal of *āsavā* starts with the removal of bad habits and cultivating good habits; see “[Habits and Goals](#),” “[The Law of Attraction, Habits, Character \(Gati\), and Cravings \(Āsavas\)](#),” and “[Samsāric Habits and Āsavas](#).”

Is there a Connection Between *Nibbāna* and *Kamma*?

7. Many incorrectly believe that “one needs to deplete all *kamma vipāka*” to attain *Nibbāna*. First, *kamma vipāka* are results of previous actions (either in this life or in previous lives.) Those are *kammic* energies created and wear away (slowly) only with time. Thus, even an *Arahant* would still have all such *kamma vipāka* waiting to bear fruit.

- None of such *kamma vipāka* can bring rebirth to an *Arahant*, as explained in #10 below.
- However, they can bring *vipāka* to any physical body until its death. Even the Buddha experienced back pains and was injured by Devadatta. There were eleven such *kamma vipāka* that he experienced. Those were unavoidably strong *kamma* for insulting a Buddha in a previous life.

Reducing Bad *Kamma Vipāka*

8. *Mettā Bhāvanā* can remove some of the *kammic* power associated with the previous *kamma*. However, some *kamma Bīja* or *kamma* seeds (both good and bad) due to the past *kamma* may still be there at the time of the attainment of *Nibbāna*. See, “[5. Ariya Metta Bhāvana \(Loving Kindness Meditation\)](#).”

- To get rid of a *kamma* seed associated with a given *kamma*, the other party related to that *kamma* seed needs to be able to receive the merits of *Mettā Bhāvanā*. That person must have a state of mind with *alobha*, *adosa*, and *amoha*. But some of those beings may be trapped in the *niraya* for long times and may not even have a moment of “relief” to receive such merits. That concept is discussed in “[Transfer of Merits \(Pattidana\) – How Does it Happen?](#).”

“Everything Happens Due to *Kamma*” is a Misconception

9. “Everything happens due to *kamma*” is a misconception. That is a *Vedic* concept, and is not in Buddha Dhamma; see, “[Saṅkhāra, Kamma, Kamma Bīja, Kamma Vipāka](#).”

- We can reduce many previous *kamma* from bringing their fruits (*vipāka*) by acting with mindfulness/foresight. *Kammic* energies cannot bring their *vipāka* if suitable conditions are not there. For details: “[Anantara and Samanantara Paccayā](#).”
- For example, an apple seed has the potential to give rise to an apple tree. However, it will not germinate until we plant it in fertile soil and provide water and sunlight. In the same way, a *kamma* seed (good or bad) can lay dormant for a long time until conditions become right for it to germinate.
- Thus, if we act with mindfulness (not to set up conditions for possible bad *kamma vipāka* to bear fruit,) we can avoid many *kamma vipāka*. For example, going to a bad neighborhood at night could have bad consequences because a bad neighborhood is a fertile ground for bad *vipāka* to bear fruit.

How an *Arahant* Avoids Rebirth?

10. What happens is the following. Since an *Arahant* has removed all *āsavā*, the “*vedanā paccayā taṇhā*” step in *Paṭicca samuppāda* will not take place. Instead, only the *kusala-mūla* *Paṭicca samuppāda* operates for an *Arahant*, where there is no “*upādāna paccayā bhavo*” step.

- When an *Arahant* dies, there is no “*bhava*” grasped by the mind. Therefore there is no “*jāti*” or birth.
- Thus an *Arahant* could have many unspent *kamma bīja* (both good and bad) left, but his/her mind has lost the craving (*āsava*) to grasp any of them.

Next, “[Why is Correct Interpretation of Anicca, Dukkha, Anatta so Important?](#)”,

7.3.4 Kaṇha (Dark) and Sukka (Bright) Kamma and Kammakkhaya

June 11, 2018; revised January 21, 2019; July 26, 2020; August 27, 2022

Kaṇha/Sukka Kamma Same as Pāpa/Puñña Kamma

1. *Kaṇha* (dark), *sukka* (bright), and *kammakkhayāya kamma* are important terms discussed briefly in the *Kukkuravatika sutta* (in the *niddesa* version). In this post, we will clarify these terms before discussing that *sutta* in the second post published today, “[Kukkuravatika Sutta \(Majjhima Nikāya 57\) – Kammakkhaya](#).” June 19, 2018: Siebe has sent me more *suttā* from *Aṅguttara Nikāya* that discusses these terms: AN 4.232- AN 4.238. Thanks, Siebe!

- *Kaṇha* and *sukka kamma* are nothing but *pāpa* and *puñña kamma* discussed in the post, “[Kilesa – Relationship To Akusala, Kusala, And Puñña Kamma](#).”

- *Kaṇha* means “dark” and refers to *pāpa* (or bad) *kamma*; *sukka* means “bright” or “white” and refers to *puñña* (or good) *kamma*. The King of Gods is named “Sakka” because he is engaged in *sukka* (*puñña*) *kamma*.
- Both are different from *kusala kamma*. Intention plays a significant role here; see, “[Kamma, Saṅkhāra, and Abhisāṅkhāra – What Is “Intention”?](#)”
- This post is critical for understanding the concept of *Nibbāna*, so I am posting it in the “[Seeking Nibbāna](#)” subsection.

Kammakkhayāya Kamma Same as Kusala Kamma

2. The term *kammakkhayāya kamma* means the same as *kusala kamma*.

- ***Kammakkhayāya kamma* means “*kamma* that will lead to nullify or overcome the effects of existing *kamma vipāka*.”** It is important to note that we cannot take the literal meaning of “*kammakkhaya*” as “removing *kamma/kamma vipāka*.”
- Note the difference between the words *kammakkhayāya* and *kammakkhaya*.
- **The *Kammakkhaya* stage is reached by purifying one’s mind by doing “*Kammakkhayāya kamma*,” or *kamma* that leads to *kammakkhaya*. These are the same as *kusala kamma*.**

Kammakkhaya Means Cultivating Paññā

3. With a *kamma* done, its energy will be there for a long time until naturally worn out. But one can REMOVE the CONDITIONS under which that *kamma* can bring its *vipāka*. That is what is meant by “*kammakkhaya*.”

- For example, Aṅgulimāla killed 999 people. Those actions created *kamma bīja* (energies that could bring appropriate *vipāka*), and some of those energies may still be out there.
- However, within a couple of weeks of meeting the Buddha, Aṅgulimāla attained Arahant hood. At that point, Ven. Angulimala’s mind became pure and would not EVER make suitable conditions for such *kamma bīja* to be “germinated.”
- Just like seeds kept in a cool, dry place for millions of years will eventually become “duds” (will no longer germinate), Angulimala’s *kamma bīja* will one day become real duds.
- Even though Ven. Angulimala’s *kamma bīja* were potent (active) when he died, they could not be “germinated in his mind” at his death (i.e., at the *cuti-paṭisandhi* moment). **Therefore, they had become “effectively duds.”** That is what is meant by “*kammakkhaya*.”

Without Upādāna Kamma Bīja Cannot Bring a New Bhava

4. One’s mind is where various *kamma bīja* germinate. It is fair to say that ANY average human will have many *kamma bīja* suitable to bring rebirth in the *apāyā* from previous lives, if not from this life. **But just having such *kamma vipāka* does not necessarily mean they will bring *vipāka*.**

- The key here is that a purified **mind** (like Ven. Angulimala’s) will not grasp (*upādāna*) bad *kamma vipāka*. Of course, his **physical body** endured *kamma vipāka* until death.

Let me take a different analogy to see why a purified mind will not grasp *kamma bīja*. Visualize the mind being a ball with a hook attached to it. The size of the hook is proportional to how corrupt or defiled the mind is.

And we can think about *kamma bīja* as rings of various sizes: rings of a wide variety of sizes ranging from very tiny to large (representing small to large *kamma bīja* that can bring *kamma vipāka*).

- We will keep returning to this analogy in the future, so please ensure it is understood. That will make it easier to comprehend many other concepts like *āsava*, *anusaya*, and *gati*.

Upādāna is Like a Hook

5. Imagine a highly defiled mind (i.e., with a large hook attached to it.) Also, imagine an area with many *kamma bīja* of various magnitudes (many rings of different sizes).

- The hook is likely to pick up a ring of similar size: it cannot pick up small rings, and it cannot pick up too large rings.
- In the same way, a highly-defiled mind will pick up a large *kamma bīja*, and a less-defiled mind will pick up only a smaller *kamma bīja*.
- That is the same as saying that one's mind will grasp a *bhava* (*kamma bīja*) that matches one's *gati*. One who has killed other humans will grasp a *bhava* in the hell (*niraya*) corresponding to a "large ring." It will not grasp a *bhava* in the human or *deva* realms, which would be too small to be entangled in the large hook (highly defiled mind).
- That is also what is meant by "changing CONDITIONS in one's mind, in #3 above. A fully-purified mind will have no "mental hooks"; that mind's conditions have changed.

6. What happens when one follows the Noble Path of the Buddha is that one's "mental hook" will get smaller in size, in this analogy. That means growing *paññā*.

- One does this by doing *kusala kamma*. *Kusala* means removing defilements from one's mind ("ku" + "sala," where "ku" is defilements and "sala" means "removal").
- A *kusala kamma* does not directly affect the existing bad or good *kamma bīja*. A *kusala kamma* only purifies the mind, and in the present analogy, "wear out (or shrink) the mental hook" can grasp various good and bad *kamma bīja* rings.
- Therefore, *kammakkhaya* means shrinking of the mental hook in this analogy.
- By the way, the biggest *akusala kamma* is *micchā diṭṭhi*.

Reduction of Upādāna

7. Even before reaching the *Sotāpanna Anugāmi* stage, one's mental hook may keep decreasing size, but not that significantly. Of course, the *kamma bīja* or rings will remain almost the same.

- When one attains the *Sotāpanna* stage, the mental hook will become drastically smaller in one thought-moment (at the *Sotāpanna phala* moment), just by comprehending the unfruitful and dangerous nature of this world, in particular the dangers in the *apāyā*.
- One's *avijjā* will drop by orders of magnitude. That is a difficult point to understand for many. But that can be experienced. One may not realize it at that time, but one can see the change within days or weeks by comparing one's change in behavior.
- The mind of a *Sotāpanna* will no longer be able to catch large rings corresponding to potent *kamma bīja* that can give rebirth in the *apāyā*.

- One becomes a *Sotāpanna* by removing the second layer of *micchā diṭṭhi* via comprehension of *Tilakkhaṇa*.

8. As one goes through the *Sakadāgāmī*, and *Anāgāmī* stages, the mental hook will shrink in size. At the *Arahant phala* stage, the hook will disappear with *avijjā* wholly removed, and *paññā* (wisdom) peaked.

- So, you can see that “*kammakkhaya*” does not mean getting rid of *kamma bīja*. One is just reducing one’s *āsava* (or *gati*); thus one’s mind will not grasp “bad *bhava*” corresponding to large *kamma bīja*.
- In the case of Ven. Āṅgulimāla, all his rings (including those large ones for killing people), were there at the time of his death. It is just that his mind got purified, and the “mental hook” disappeared. His mind could not grasp any *bhava* in the 31 realms at his death.
- Therefore, wearing the “mental hook” is the same as reducing *āsava* and *anusaya* and getting rid of *gati*. As one keeps doing that, at one point, the “mental hook” will disappear (and lead to *āsavakkhaya* or *Arahanthood*).

Kusala Kammā Do Not Remove Existing Kamma Bīja

9. ***Khammakkhayāya kamma* (or *kamma* that lead to *kammakkhaya*) or *kusala kamma* do not directly remove existing *kamma bīja*. They lead to a state of mind where existing *kamma bīja* are UNABLE to bring *vipāka*. That is a VERY IMPORTANT point to understand.** Please come back and read this post as many times as needed to comprehend this point (and ask questions at the discussion forum).

- This is based on “[Anantara and Samanantara Paccaya](#).”
- **As one keeps doing *kusala kamma***, one’s wisdom (*paññā*) will grow and become increasingly capable of comprehending the true nature of this world (the unsatisfactory nature) or *Tilakkhaṇa*. **That will lead to *kammakkhaya* in four stages of *Nibbāna*.**
- ***Kammakkhaya* via *kusala kamma* will lead to the shrinking of the “mental hook” (*āsava/anusaya/gati*) and therefore more and more *kamma bīja* (rings in our analogy) will become “effectively duds”; see #4 and #5 above.**
- In terms of our analogy, the following happens. Even though all the “rings” are still there, more and more of them will not get “entangled” in the shrinking “hook.”

10. Therefore, *kammakkhaya* happens at various levels.

- Those that can bring rebirths in the *apāyā* become “effectively duds” at the *Sotāpanna* stage. At this stage, one’s mind has clearly understood the dangers of *akusala kamma* that can lead to rebirth in the *apāyā*. It is a “drastic change in one’s mindset,” a different “world view.”
- Those that can bring rebirths in the human realm become “effectively duds” at the *Sakadāgāmī* stage. One would not doubt that “owning stuff that gives sense pleasures” is unnecessary and dangerous.
- Those that can bring rebirths anywhere in *kāma loka* become “effectively duds” at the *Anāgāmī* stage. Now, one knows “deep inside” that sense pleasures ARE dangerous.
- Those that can bring rebirths anywhere in 31 realms become “effectively duds” at the *Arahant* stage.

Puñña and Pāpa Kamma

11. Now, let us look at the meanings of *puñña* and *pāpa kamma*. To clarify what *puñña* (*sukka*) *kamma* and *pāpa* (*kaṇha*) *kamma* are, we need to understand how births in various realms arise.

- There are six roots causes that give rise to *bhava* (and therefore *jāti*) in the 31 realms: *lobha* (greed), *dosa* (hate), *moha* (ignorance), and *alobha* (non-greed), *adosa* (non-hate), *amoha* (without ignorance).

It is important to note that *amoha* does not mean *paññā* (wisdom); it just means one is acting without being foolish or morally blind.

- **When one acts with any combination of the three “bad roots” (*lobha, dosa, moha*), one is doing *pāpa kamma*. They are also called *kaṇha* (“dark”) *kamma*.** Only *asobhana cetasika* (bad or dark mental factors) can arise in these thoughts. They are also *akusala kamma*. These lead to births in the *apāyā* (*dugati*).
- **When one acts with any combination of the three “good roots” (*alobha, adosa, amoha*), one is doing *puñña kamma*. They are also called *sukka* (“bright”) *kamma*.** Only *sobhana cetasika* (good or bright mental factors) can arise in these thoughts. These lead to births in the “good realms (*sugati*) until one attains *Arahanthood*.
- A purified mind of an *Arahant* would have maximized *sobhana cetasika*, including *paññā* (wisdom). Then one would not grasp any *bhava* at the *cuti-paṭisandhi* moment, since one has fully comprehended the futility of any existence in the 31 realms.

12. Now, *puñña (sukka) kamma* generate “good *kamma bīja*” that can give rise to rebirths in the good realms (at and above the human realm). They also can bring “good *vipāka*” during a lifetime.

- *Pāpa (kaṇha) kamma* generate “bad *kamma bīja*” that can give rise to rebirths in the bad realms (those below the human realm, i.e., *apāyā*). They also can bring “bad *vipāka*” during a lifetime.
- As we discussed in the post, “[Kilesa – Relationship To Akusala, Kusala, And Puñña Kamma](#),” there are also *kamma* (or actions) that lead to both *pāpa (kaṇha)* and *puñña (sukka) kamma bīja*. The Buddha called them “*kanhasukka*” *kamma* and their *vipāka* “*kanhasukka vipāka*” in the *Kukkuravatika sutta*. Such “*kanhasukka vipāka*” give rise to both good and bad *vipāka* in some realms (human, *deva*, and *vinipata* realms), see, “[Kukkuravatika Sutta \(Majjhima Nikāya 57\) – Kammakkhaya](#).”
- An example is when one prevents a snake from catching a frog. One is doing a *puñña kamma* by saving a frog's life, but one is also doing a *pāpa kamma* by preventing the snake from its meal.

Kusala/Puñña Kamma Not Possible in Apāyā

13. Another critical point to understand is that one will not be able to do any *kusala kamma* and wear out the “mental hook” when is born in the *apāyā* (beings in the four realms of the *apāyā* are incapable of doing *kusala kamma* and are hardly capable of doing *puñña kamma* too).

- **This is why it is important to do *puñña kamma* and stay away from *pāpa kamma*. This is critically important to be born in a good realm and to work towards *Nibbāna*.**
- It is important to contemplate and understand this. Even though *puñña (sukka) kamma* leads to rebirth, that will be in a “good realm” where one can work towards *Nibbāna*, i.e., do *kusala kamma* and wear out the “mental hook.”
- Furthermore, *puñña kamma* sets the necessary background (*āyu, vaṇṇa, sukha, bala, paññā*; see, “[Two Versions of 37 Factors of Enlightenment](#)”). Not all in the human realm have those: if one is born extremely poor, unhealthy, etc., one will not have the right mindset to comprehend Dhamma.

14. The above explanation is a condensed (*niddesa*) version of the *Kukkuravatika Sutta* (MN 57). A *paṭiniddesa* or a detailed analysis is realized by this post AND the accompanying post, “[Kukkuravatika Sutta \(Majjhima Nikāya 57\) – Kammakkhaya](#).”

- For an explanation of *niddesa* and *paṭiniddesa*, see “[Sutta Interpretation – Uddesa, Niddesa, Patiniddesa](#).”

7.3.5 Dasa Saṃyojana – Bonds in Rebirth Process

August 6, 2017; revised February 14, 2018; February 10, 2020; May 24, 2022; August 7, 2022

***Saṃyojana* Are Bonds in The Rebirth Process**

1. *Saṃyojana* (or *saṃyojana*) is translated into English as “fetters,” which is not bad. Even though “fetter” is not commonly used, it means “a chain used to restrain or bind someone.”

- *Dasa saṃyojana* are the ten “chains” or “bonds” that bind one to the rebirth process (with saṃsāric bonds.)
- For example, as long as the first three *saṃyojana* are there, the possibility of rebirths in the four lowest realms (*apāyās*) will be there.

2. *Saṃyojana* comes from the three roots (“*san*,” “*yo*,” and “*ja*” respectively, meaning “defilements,” “bind,” and “birth”). It can be pronounced either as “*saṃyojanā*” or, as is the common practice with many words involving “*san*,” as “*saṃyojana*.”

- Therefore, *saṃyojana* means “bonds that bind one to “*san*” and thus keep one in the rebirth process; see, [“What is “San”? Meaning of Sansāra \(or Saṃsāra\).”](#)
- When one systematically breaks these bonds — in four stages — one makes irreversible progress to *Nibbāna* (release from all suffering).
- For an explanation of many words with the root “*san*,” see [“List of “San” Words and Other Pāli Roots.”](#)

Root Cause Is Craving

3. The [“WebLink: suttacentral: *Saṃyojana Sutta* \(SN 41.1\)”](#) clearly states that there is “*san*” or “craving (*chanda rāga*)” MUST be involved in *saṃyojana*: “*Evameva kho, bhante, na cakkhu rūpānaṃ saṃyojanaṃ, na rūpā cakkhussa saṃyojanaṃ; yañca tattha tadubhayāṃ paṭicca uppajjati chandarāgo taṃ tattha saṃyojanaṃ...*”

Translated: “*saṃyojana* arise not due to eyes just seeing objects (*rūpa*) , but due to **craving that arises due to that seeing...**”

Cravings Are Uncontrollable Due to Wrong Views

4. Many people do not realize that there is an essential step BEFORE one can start tackling *dasa saṃyojana*. This step is necessary to enter the Noble Path and break those bonds to the rebirth process. **That is to get rid of the ten types of *micchā diṭṭhi* (wrong views) about the world that we live in.** See, [“*Micchā Diṭṭhi*, *gandhabba*, and *Sotāpanna* Stage.”](#)

- This essential pre-requisite or the pre-condition to “enter the Noble Path” was explicitly discussed by the Buddha in the [“*Mahā Cattārīsaka Sutta* \(Discourse on the Great Forty\).”](#)
- The reason is that unless one believes in the laws of *kamma* and the rebirth process, there is no way one can start working towards *Nibbāna* (to be released from the suffering-filled rebirth process).
- Striving to attain *Nibbāna* without belief in the rebirth process is useless. **By definition, *Nibbāna* is the release from the rebirth process.** Most people confuse *Nibbāna* with temporary relief from “day-to-day stresses of life.”
- There are different ways to understand *Nibbāna*; see [“*Nibbāna*.”](#)

Need to Have a “Wider World View”

5. Buddha Dhamma is different from any other religion or philosophy. One first needs to understand the message of the Buddha before one can start on the Path prescribed by him. **Many people waste time blindly pursuing things that have nothing to do with the Noble Path to *Nibbāna*.**

- To understand the key message of the Buddha, one needs to realize that our world is much more complicated than seen by our eyes. One needs to ‘see’ with wisdom. This wisdom or “*paññā*” can be cultivated only in steps, with an increasingly pure mind. Which means less greed, hate, and ignorance of the true nature of this world.
- In the early stage, when one is trying to get rid of the ten types of *micchā diṭṭhi*, one may need to stay away from *dasa akusala* with determination. That may involve even going to the extent of sticking to a set of rituals (saying I WILL NOT break the five precepts).
- However, by abstaining from immoral actions and speech (*pāpa kamma*), one should be able to get rid of the ten types of *micchā diṭṭhi*. Those are the “big eight” in “[3. The Second Level – Key to Purify the Mind](#)” in the Meditation section.
- At that stage, one’s mind is clear enough (i.e., *paññā* has grown enough) to start grasping the *Tilakkhaṇa* (*anicca, dukkha, anatta*). Of course, it is necessary to understand the correct interpretations: “[Anicca, Dukkha, Anatta](#).”

Sammā Diṭṭhi Comes First

6. The first step in the Noble Eightfold Path is “*Sammā Diṭṭhi*,” which is not “something to be done.” It is a **vision** or a “new way of **looking** at how our world works.”

- This new way of looking at the world is through the world view that emerges from what is embedded in *anicca, dukkha, anatta*. That is how one breaks the **first three saṃyojana of sakkāya diṭṭhi, vicikicchā, and sīlabata parāmāsa**.

7. **One has to break those bonds in one’s mind.** One gains *sammā diṭṭhi* — the correct view to becoming free of ‘*san*’ — by comprehending the true nature of this world of 31 realms.

Anicca – nothing in this world can bring permanent happiness in the long run.

Dukkha – despite our struggles, we will be subjected to much more suffering than pleasures if we remain in rebirth.

Anatta – therefore, one is truly helpless in this struggle to attain “something of the essence in this world.” That is just an illusion.

Our Tendency to Value Worthless Worldly Things

8. When one values a particular object, one can spend an extraordinary effort to get it. An average human has many things in this world (a beautiful/handsome partner, lovely house, nice car, etc.) that are very valuable.

- Many people are willing to commit murder, robbery, lying, cheating, etc. Then they get into trouble in two ways: If society catches them, they will pay consequences like going to jail. Even if they manage to avoid “getting caught,” there is no way to prevent *kamma vipāka*, i.e., those actions will bring much harsher punishments in this life or future lives.
- By comprehending the ten types of *micchā diṭṭhi*, one will be able to see that one will have to pay for immoral actions without exception and that depending on the severity of the activities, one may suffer for millions of years in the four lower realms (*apāyā*). This first step of getting rid of the ten types of *micchā diṭṭhi* will be quite beneficial in preventing one from getting into trouble.

9. However, grasping the *Tilakkhaṇa* will eliminate an even more potent type of wrong vision or *micchā diṭṭhi* about this world, i.e., that there is NOTHING in this world that will bring a level of permanent happiness.

- When one first starts comprehending *anicca* and realizes a glimpse of this truth, one may still not be reasonably certain of the truth of that. But one will be compelled to believe that “it is not WORTH to commit strong bad *kamma* that COULD lead to rebirth in the *apāyā* (intense greed and strong hate).”
- At this beginning stage on the Noble Path, one could see the dangers of being born in the *apāyā*, and one’s mind will AUTOMATICALLY start rejecting such actions. That does not happen by sheer willpower. The mind needs to see that with wisdom. In the *Abhidhamma* language, the “*voṭṭhapana citta*” in a *citta vūthi* will make that decision within a billionth of a second.

Sotāpanna stage Realized With That “Correct Vision”

10. So, it is essential to understand that getting rid of the first three *sāmyojana* involves nothing else but comprehending the *anicca* nature.

- In other words, at this stage, one will lose a significant fraction of HOW MUCH VALUE one will place on ANY MATERIAL THING in this world. For example, there is NOTHING in this world that is worth killing another human being via pre-planning with hate in mind.
- At this stage, one is a *Sotāpanna Anugāmi*, and one will get to the *Sotāpanna* stage without a doubt. One has become one of the eight types of Nobles (*Ariyā*); see “[Sotāpanna Magga Anugāmi and a Sotāpanna.](#)”

11. Therefore, getting a release from rebirth in the *apāyā* depends on grasping the dangers of specific highly-immoral actions that are not worth doing because NOTHING in this world can be that valuable. Put another way, nothing in this world is worth taking the risk of paying back with a rebirth in the *apāyā*.

- The Buddha characterized *dukkha* as “*dukkham bhayaṭṭhena*,” i.e., “*dukkha* is another name for danger.” We should be afraid of committing new *kammā* leading to future suffering. Any suffering that one feels now is due to past *kammā*.
- We have control over the CAUSES that lead to future suffering. Those are the immoral *kammā* we do seeking sensory pleasures.
- We can stop future suffering by comprehending how different types of *kammā* (i.e., *abhisankhāra*) lead to births in various realms. That means comprehending *Paṭicca Samuppāda*.

Removal of Kāma Rāga Comes At Higher Stages of Nibbāna

12. The next step towards *Nibbāna* involves getting rid of **two more bonds or *sāmyojana*, i.e., *kāma rāga* and *paṭigha***. That is done in the *Sakadāgāmi* stage and the *Anāgāmi* stage.

- In a way, these two bonds are harder to break because all through this beginning-less rebirth process, we have spent probably 99% of the time in the *kāma loka*. We are so attached to sense pleasures (*kāma rāga*) that it is almost impossible for an average human to grasp the ***anicca nature in kāma loka***.
- As we discussed above, it is easier to see the adverse consequences of highly-immoral actions that could lead to rebirth in the *apāyā*. And it is also easier to see the dangers of birth in the *apāyā* (the Buddha has described such unimaginable suffering in many *suttā*; see, for example, “[WebLink: suttacentral: Devaduta Sutta \(Majjhima Nikāya 130\).](#)”

Apāyagāmi Deeds Are Done With Wrong Views

13. It is harder for an average human to see that things we value highly are not only worthless but dangerous. That is because they can lead to future suffering via *kamma vipāka*.

- Most “moral people” believe that if one lives a moral life without harming others, then one will not be subjected to suffering in the future. **Even if one had comprehended *Tilakkhaṇa* to a level of a *Sotāpanna*, that could still be the impression.**

- That is why Buddha's foremost female lay disciple Visākā attained the *Sotāpanna* stage at age seven and went on to marry and have 22 children. If Visākā had understood the consequences of *kāma rāga*, she would not have done that.

My Experience

14. Therefore, getting rid of the *saṃyojana* of *kāma rāga* (attachment to sensual pleasures) is much more challenging. That is why it took me over three years to START comprehending the worthlessness of sense pleasures AND the dangers of being attracted to sense desires.

- Even though I knew the criteria for one to become an *Anāgāmī*, I did not realize that I would have to “see the dangers” in staying in the *kāma loka*, to strive for it.
- I had written about the importance of removing *kāma rāga* in the following section: “[Assāda, Ādīnava, Nissarana – Introduction](#).” Those posts were written before October 2015 and have been since revised.

15. I had known the “theory” part of it. But I had not cultivated my *paññā* or wisdom enough to see the possible dangers of sense pleasures!

- It needed a trigger for my mind to finally realize the “worthlessness” and “dangers” of REMAINING in the *kāma loka*. I will write more about how it got triggered, but I am still working on trying to see the dangers of sense pleasures and thereby making a convincing case that all we perceive as “pleasures” in the human and *deva* realms are, in fact, CAUSES for future suffering.
- The point here is that one needs to keep striving as long as it takes for the mind to come to a stage to be “triggered” by some event (mine was not a significant event). As long as one keeps striving, it is bound to happen. It came as a shock to me. But I will discuss those details in another post (I am not there yet anyway).

Difference Between *Magga Phala* and *Jhāna*

16. By the way, it is becoming clearer to me about the difference between *magga phala* and *jhāna*. While *jhāna* can help, *jhāna* are not NEEDED to attain *magga phala*. It is *sīla*, *samādhi*, *paññā*, and NOT *sīla*, *jhāna*, *paññā*. I will write about this in detail, but many people seem discouraged that they cannot get to *jhāna*.

- There may be people with *magga phala* and without any *jhāna*; with *anāriya jhāna* and without *magga phala*; and also with *anāriya jhāna* and with *magga phala*. Those with *Ariya jhāna* MUST be at least an *Anāgāmī*, i.e., one who has REMOVED *kāma rāga* completely.
- The problem is that it is virtually impossible to distinguish between *Ariya* and *anāriya jhāna*. One thing is quite clear: One cannot attain *Ariya* first *jhāna* without REMOVING (*ucceda pahāna*, not just *vikkhambana pahāna*) of *kāma rāga*, i.e., *kāma anusaya* must be removed, not only suppressed.
- But the “*jhānic* effect” is the same in both cases. The body and the mind have very similar sensations.
- If a *Sotāpanna* can get into the first *Ariya jhāna*, then he/she will never be born in the human world again. But we know that a *Sotāpanna* can be reborn in the human realm. Thus a *Sotāpanna* would not have the first *Ariya jhāna*. **Whatever *jhāna* that I had were not *Ariya jhāna*.**
- I slowly reached this conclusion over time; see “[Difference Between Jhāna and Stages of Nibbāna](#).” Information in that relatively recent post is correct. I had forgotten to update the old posts. Another point is that it is *Sammā Samādhi* (not necessarily *jhāna*) that takes one to *Sammā Ñāṇa* and *Sammā Vimutti* to become an *Arahant* in the Noble Path.

Stopping Rebirths in *Kāma Loka*

17. Let us get back to the main discussion. Once one overcomes those two *saṃyojana* of *kāma rāga* and *paṭigha*, one will be free of rebirths anywhere in the *kāma loka* (lowest 11 realms, including the human and *deva* realms).

- Only then can one be said to become healthy (not subject to illnesses) and free of the three sets of senses of smell, taste, and body touches. It is only the human body that is subject to diseases. A *Sakadāgāmi* would not be reborn in the human realm and thus free of diseases.
- When one attains the *Sakadāgāmi* stage by REDUCING *kāma rāga* and *paṭigha*, one could be born only in the *deva* realms of the *kāma loka*. At this stage, one would have lost the desire to OWN objects that bring sense pleasures (*vatthu kāma*), but has not yet lost the URGE TO ENJOY sense pleasures.
- As one progresses, the two bonds of *kāma rāga* and *paṭigha* will be completely broken. One will attain the *Anāgāmi* stage, never to be born in any realm of *kāma loka*.

Breaking Bonds to *Rūpa loka* and *Arūpa Loka*

18. An *Anāgāmi* would still be bound to the rebirth process via **five more bonds or *saṃyojana*: *rūpa rāga*, *arūpa rāga*, *māna*, *uddhacca*, *avijjā*.**

- The first five types of *saṃyojana* are called *orambhāgiya-saṃyojana* or “lower bonds.” The higher five are called *uddhambhāgiya-saṃyojana* or “higher bonds.”
- If a person has removed the first seven *saṃyojana* but still has the last three of *māna*, *uddhacca*, and *avijjā*, one’s mental body (*gandhabba*) would come out of the dead body at death. One will be in that state until the *kammic energy* for the human *bhava* is exhausted. *Parinibbāna* will happen at the *cuti-paṭisandhi* moment since one has lost *upādāna* for all 31 realms and thus cannot be born anywhere. So, the *gandhabba* would be in the ***antarā Parinibbāna state***. That is presumed to have happened to *Waharaka Thero*; see “[Parinibbāna of Waharaka Thero](#).”
- As one progresses to higher stages, it becomes harder to remove the higher bonds (from the perspective of lower levels). **As we saw, it is easier for an average human to understand the dangers of the *apāyā* but harder to see the dangers of *kāma loka*.** One cannot even imagine the dangers of *rūpa* and *arūpa loka*. One has to proceed step-by-step.
- When an *Anāgāmi* removes *rūpa rāga*, they will be never again born in any realm in the *rūpa loka*. Similarly, removing the *saṃyojana* of *arūpa rāga* would make one free of birth in the *arūpa loka*.

There Is No Safe Realm Anywhere In The Thirty-One Realms

19. Once, the Buddha saw that a *Bhikkhu* had started “taking it easy” after attaining the *Anāgāmi* stage and asked him why he was not striving hard as he used to. The *Bhikkhu* replied that he had reached the *Anāgāmi* stage and thus thought that he was out of danger.

- The Buddha asked him to consider the following. If one had touched feces and had just wiped it off, one might not see it anymore. But wouldn’t that remaining traces still smell bad? The *Bhikkhu* realized that one would not be free of ALL suffering until one is released fully from all 31 realms. It is harder to see the dangers at finer levels until something makes one aware of such “hard-to-see” dangers.
- **Whichever stage we are “stuck at,” we should continue the effort without getting complacent.** Results will follow (possibly triggered by some unexpected event).
- Sometimes such triggers lead to moments of “insights” (“*ahā*” moments) directly leading to *magga phala*. There are many such examples in the *Tiṭṭaka*.

Summary

20. Finally, the ten *saṃyojana* are removed via different methods:

- *Sakkāya diṭṭhi*, *vicikicchā*, and *sīlabbata parāmāsa* are removed via “correct vision” or “correct understanding.” And that happens when one is listening to a *desanā* by an *Ariya* or a Noble Person.
- *Kāma rāga* and *paṭigha* are removed via meditation.
- The five higher *saṃyojana* are removed with wisdom (*paññā*).

7.3.6 The Cooling Down Process (Nibbāna) – How the Root Causes are Removed

Revised June 25, 2020 (#1 and #2 revised); May 28, 2022; August 31, 2022

Introduction

1. The rebirth process (and suffering) continues because of the six root causes: *lobha*, *dosa*, *moha*, *alobha*, *adosa*, and *amoha*. Even though we may have bouts of happiness, we suffer much more than imaginable in the rebirth process because of these six causes.

- If there are six root causes, why did the Buddha say, “*rāgakkhaya Nibbanan, dosakkhaya Nibbanan, Mohakkhaya Nibbanan*”? Why are there only three causes to be removed to attain *Nibbāna*? (By the way, *lobha* is a stronger form of *rāga*, and thus *rāgakkhaya* means removing *lobha*).
- While *lobha*, *dosa*, and *moha* lead to rebirths in the *apāyās* (or “bad realms, including the animal realm,) mundane versions of *alobha*, *adosa*, and *amoha* lead to rebirths in the “good realms.”
- However, one must overcome rebirth in ALL realms to be guaranteed no rebirths in the *apāyā*. See “[Six Root Causes – Loka Samudaya \(Arising of Suffering\) and Loka Nirodhaya \(Nibbāna\)](#).”
- Furthermore, one needs to cultivate *alobha*, *adosa*, and *amoha* to get started on the process of removing *lobha*, *dosa*, and *moha*.
- As wisdom (*paññā*) grows, *lobha*, *dosa*, and *moha* (as well as mundane versions of *alobha*, *adosa*, and *amoha*) will fade away gradually, and one will get to *Nibbāna* (where suffering is absent.)

Noble Truths, *Paṭicca Samuppāda*, *Tilakkhaṇa* – Interrelated

2. Buddha Dhamma is about eliminating suffering associated with the rebirth process. Before following the Noble Eightfold Path, one must understand the **First Noble Truth**. See “[Buddha Dhamma – Noble Truths, Paṭicca Samuppāda, Tilakkhaṇa](#).”

- Once one comprehends *Tilakkhaṇa*, one would have a deeper level of *alobha*, *adosa*, and *amoha*.
- A *Sotāpanna* starts on the Noble Eightfold Path with that more profound level of *alobha*, *adosa*, and *amoha*. Wisdom (*paññā*) peaks at the *Arahant* stage. At that point, one would not be seeking rebirth anywhere in the 31 realms with *lobha*, *dosa*, and *moha* OR *alobha*, *adosa*, or *amoha*.
- See, “[Sīla, Samādhi, Paññā to Paññā, Sīla, Samādhi](#)” and “[Buddha Dhamma – In a Chart](#)” and references therein.
- Here is another way to see it. When one is on the mundane path, their level of *amoha* is not complete. That *amoha* still has *avijjā* or the “ignorance of the Noble Truths.” That is the same as having *sakkāya diṭṭhi* goes away. At the *Sotāpanna* stage, *sakkāya diṭṭhi* goes away by comprehending the Four Noble Truths/*Paṭicca Samuppāda*/*Tilakkhaṇa*.

Lobha is Extreme Greed

3. *Lobha* is the extreme of greed. (“*lo*” + “*bha*” where “*lo*” is for the *lokaya* or world and “*bha*” is for “*bihiveema*” (arise or establish) is the main reason how the material world is created and sustained with greed.

- Because of *lobha*, *kāmacchanda* (one of the five hindrances) arises. One “loses one’s mind” when acting with *kāmacchanda* which comes from “*kāma*” + “*icca*” + “*anda*” where “*ichcha*” means liking and “*anda*” is becoming blind. Thus, *kāmacchanda* means blinded by attachment to sensual pleasures.
- When blinded by *kāmacchanda* and when obstacles arise in the way, one develops *dosa* or *dvesa* (“*dvi*”+“*vesa*” or second manifestation of greed; see “[Pāli Glossary \(A-K\)](#)” and “[Pāli Glossary \(L-Z\)](#)” for the pronunciation key), i.e., hate for whatever gets in one’s way.
- And one has *lobha* because one cannot see the truth about this world, i.e., because one has *moha*: *Moha* comes from “*muva*” + “*hā*” or literally “closed mouth.” The analogy is that if there is a vessel whose mouth or opening is closed, one cannot see what is inside. Thus when one has *moha*, one is ignorant about the true nature of this world, and thus acts blindly and foolishly, based on outward appearances.

Total Ignorance (*Moha*) is the Root Cause

4. One who has not heard about the Buddha’s worldview is likely to act with *moha* and, thus, has both *lobha* and *dosa*.

- However, many people do not have strong versions of *lōbha*, *dōsa*, and *mōha*. Most “moral people” have *avijjā*, a milder version of *moha*, as discussed in #2 above.
- They will likely carry over such habits (*gati*) compatible with *alobha*, *adosa*, and *amoha*. ANYONE is likely to have been exposed to Buddha Dhamma sometime in the deep past. But the more time lag there is, one will likely lose those qualities.
- It is clear that if and when one has *kāmacchanda* (strong cravings for sensual pleasures), one may be tempted to do immoral deeds. We all have had *kāmacchanda* taking over; anyone can remember cases where “the ability to reason out” got lost, at least for a brief time.

Lobha (Greed) Leads to *Dosa* (Anger/Hate)

5. Long-lasting hateful situations (*dosa*) arise because of *kāmacchanda*. If something gets in the way of one’s sensual pleasures, one can become angry/hateful.

- That is why *dosa* (or *dvesa*) is the second manifestation of greed. At this extreme, *dosa* brings out the second of the five hindrances, *vyāpāda*. This word comes from “*vāya*”+“*pāda*”, where “*vāya*” means decline and “*pāda*” means to “walk towards.” Thus *vyāpāda* means one is on a (morally) declining path.
- When one gets extremely angry, one again loses control, which could be even worse than *kāmacchanda*; one can kill another human being in a moment of rage. When one habitually gets angry, one could be in a state of *vyāpāda* for longer times, becoming a “normal” state of affairs i.e., becoming a “*gati*.” We can see people get into the “*vyāpāda* mode” during (political) debates on television or during arguments.
- All five hindrances arise from not seeing the futility of craving or hate. **This “getting attached to things in this world” via greed and hatred is called *taṇhā***; see “[Taṇhā – How We Attach Via Greed, Hate, and Ignorance](#)”

Avijjā and *Taṇhā* Go Together

6. *Avijjā* (ignorance) and *taṇhā* feed off each other, but it is *avijjā* that one needs to tackle first. That is because unless one’s mind sees the dangers hidden behind *taṇhā*, it is not possible to reduce *taṇhā*.

- When one starts learning Dhamma, one begins to understand the nature of the broader world of 31 realms: Living beings move from birth to birth; they suffer mightily in the lowest four realms.

- All actions have consequences. In the long run, it does not make sense to act immorally to satisfy one's immediate urges (that is the concept of *anicca*; see, "[Anicca, Dukkha, Anatta – Wrong Interpretations](#)," and follow-up posts.)

Lobha and Dosa Permanently Reduced with Sammā Ditṭhi

7. Most people make the mistake of trying to get rid of greed and hate, either wilfully or with "breath meditation." That is NOT POSSIBLE. One needs to engage in the correct version of "*ānāpāna*" meditation; see, "[6. Ānāpānasati Bhāvanā \(Introduction\)](#)."

- As long as one has a wrong worldview and does not see the danger in having thoughts of excess greed and hate, it is not possible to FORCIBLY get rid of greed and hatred; see, "[Difference Between Giving Up Valuables and Losing Interest in Worthless](#)."
- That is why *Sammā Ditṭhi*, or the correct worldview, comes first in the Noble Eightfold Path.
- After comprehending the Four Noble Truths/*Paṭicca Samuppāda*/*Tilakkhaṇa*, there is no need to suppress *lobha* and *dosa*. That will happen automatically due to wisdom (*paññā*.)

Progress After Comprehending the Four Noble Truths/*Paṭicca Samuppāda*/*Tilakkhaṇa*

8. When one attains the *Sotāpanna* stage, one's *lobha* is reduced to the *kāma rāga* level, and *dosa* reduced to the *paṭigha* level PERMANENTLY; That also leads to the removal of the other hindrances. *Paṭigha* is a lower strength of *vyāpāda*: "*paṭi*" + "*gha*" means bonding via friction or dislike; thus, *taṇhā* can arise due to *paṭigha*. [*paṭi* means bonding; *gha* means friction of dislike.]

- One can see now why a *Sotāpanna* is incapable of doing extremely immoral acts that can result in a birth in the four lowest realms (*apāyā*); one has removed *vicikicchā* hindrance permanently, and one always acts with mindfulness. This higher level of *Sammā Ditṭhi* or the correct worldview is deeply ingrained in their minds, even in a future birth, that will not change. But one can still act with greed and hate to a certain extent.

9. When one attains the next level of *Nibbāna*, the *Sakadāgāmī* level, one permanently REDUCES *kāma rāga* and *paṭigha*. Because of this advancement, one will never be reborn in a realm where the physical body can be subjected to ailments, diseases, and old age. Thus, one will be reborn above the human realm, which is the fifth realm.

10. At the *Anāgāmī* stage, *kāma rāga* and *paṭigha* will not arise in mind. Thus by the *Anāgāmī* stage, one has completely removed any form of *dosa*, the second root cause. One does not get angry or hateful under any circumstance, and the *dosa cetasika* will be absent. Since *kāma rāga* also goes away, now one has no desire to be born in any realm in the *kāma loka*, including the *deva* worlds.

- Thus an *Anāgāmī* has only *rūpa rāga* and *arūpa rāga*. That is mainly due to the desire of an *Anāgāmī* to listen (and read) and contemplate Dhamma concepts; there is no desire left for sense pleasures. Thus the *lobha cetasika* is reduced to a very low level.
- As for the *moha cetasika*, only a low strength remains as *avijjā*.

Progress in Terms of the Ten *Samyojana*

11. There are ten *saṃyojana* (or *Saṃsāric* bonds) keep us bound to the rebirth process. Out of the ten *saṃyojana* or *sanyoga* ("*san*" + "*yoga*" or bound via "*san*"), *sakkāya diṭṭhi*, *vicikicchā*, *sīlabbata parāmāsa* (all due to strong *avijjā*) are removed at the *Sotāpanna* stage.

- That is an important point: One just needs to comprehend the true nature of this world via understanding *anicca*, *dukkha*, and *anatta* (*Tilakkhaṇa*) to become a *Sotāpanna*.

- Just with this understanding, one removes *kāmacchanda*, *vyāpāda*, and *vicikicchā*. That is why a *Sotāpanna* is said to be “one with the vision” or “*dassanena sampanno*.”
- Once, the Buddha took a bit of soil to his fingernail and asked the *bhikkhus*, “if all the soil on this Earth can be compared to the defilements one needs to get rid of, a *Sotāpanna* has left in him/her only an amount compared to this bit of soil on my fingernail.”
- That may sound astounding to some. But it is critical to understand that most heinous immoral acts are done because of one not having *Sammā Ditṭhi* at least to a significant level.
- Of the remaining *sanyojana* (*sanyoga*), *kāma rāga* and *paṭigha* are reduced at the *Sakadāgāmī* stage, and removed at the *Anāgāmī* stage. The rest of the *sanyoga* (*rūpa rāga*, *arūpa rāga*, *māna*, *uddhacca*, and *avijjā*) go away at the *Arahant* stage.

Progress in Terms of Abandoning “Denser Realms”

12. As the attachment to sensual pleasures from “dense matter” decreases, rebirth in the “denser worlds” is progressively eliminated.

- At the *Sotāpanna* stage, the coarse forms of suffering in the lowest four realms stop. After the *Sakadāgāmī* stage, rebirths do not occur even in the human realm, where physical pain and diseases prevail. An *Anāgāmī* is born only in the *suddhāvāsa rūpa loka*, where there are only subtle bodies allowing vision, hearing, and mind only. An *Arahant* will never be reborn anywhere in the 31 realms which have “some connection to matter”; see, “[What Are Rūpa? \(Relation to Nibbāna\)](#).” [*Suddhāvāsā* : The “Pure Abodes”; a name given to a group of *Brahma*-worlds – the five highest *Rūpa* worlds – consisting of *Avihā*, *Atappā*, *Sudassā*, *Sudassī* and *Akanitthā*.]
- Thus at the passing away of an *Arahant*, the mind is released from any attachment to the material world consisting of the 31 realms; no more suffering from physical pains, mental pains, or death. One has attained *Nibbāna* or the “deathless state.”
- That is a summary. See “[Body Types in 31 Realms – Importance of Manomaya Kaya](#).”

Citta Analysis

13. Another way to analyze the steps to *Nibbāna* is to look at how the 12 *akusala citta* ceases to arise stage by stage. See, “[Akusala Citta – How a Sotāpanna Avoids Apāyagāmi Citta](#).”

- Therefore, the four stages of *Nibbāna* can be characterized in different ways. With the number of *samyojanā* left, “density of matter,” types of *akusala citta*, and many other ways. They are all interrelated and self-consistent.

7.3.7 Why is Correct Interpretation of Anicca, Dukkha, Anattā so Important?

Revised March 14, 2021

One cannot strive for the *Sotāpanna* stage without understanding the true meanings of the three characteristics of nature: *anicca*, *dukkha*, *anatta*. The correct meaning of *anicca*, *dukkha*, *anatta* are explained under the top menu, “[Key Dhamma Concepts](#).”

1. *Anicca*, *dukkha*, *anatta* describe the true nature of “this world” of 31 realms; see, “[The Grand Unified Theory of Dhamma](#).” Nowhere in the 31 realms can one maintain anything to one’s satisfaction over the long term (*anicca*); thus one gets depressed, unfulfilled, and distraught (suffering or *dukkha* is the net result). Thus one becomes helpless (*anatta*).

2. A good analogy is someone attempting to fill a leaky vessel at home by carrying water to it from a nearby river. He makes a trip back from the river, fills the vessel, and is glad to see that it got filled halfway. But

soon enough, he sees that water is running out and thus needs to make another trip to the river to bring more water.

- If he spent a bit of time examining the vessel, he would have discovered the leak and could have fixed it. We are too much involved in the struggle to maintain illusory happiness. We do not take enough time to contemplate whether it makes sense to struggle against a system that is INHERENTLY unsuitable for providing lasting happiness.

3. Before retirement, I was basically working seven days a week. I had deadlines to meet and responsibilities to fulfill, and there was no time even to think whether I should take some time off and contemplate the sensibility of such a hectic life.

- Whatever vacation time that I had, I wanted to plan a “relaxing vacation.” But I did not realize that I was spending more time planning the vacation and then spent whatever energy that I had on sightseeing. When I got back from the vacation, I was exhausted from the trip itself. The early retirement decision was the best decision that I ever made in my life.

4. If this existence is inherently flawed in the sense that it is not capable of sustaining stability, then all the struggles that we make are in vain. The Buddha discovered that everything in “this world” changes (see “[The Grand Unified Theory of Dhamma](#)”). It is INHERENTLY impossible to achieve lasting happiness.

- Now the question is, how do we know whether this axiom in Dhamma is correct? This is where it takes a bit of time to look at the evidence. I have done a lot of work within the past several years, and hopefully, this website will help you cut down on that research.

Actually, scientists also now acknowledge that the universe is “running down.” We need to constantly spend energy to keep chaos and instability out of the way to maintain some stability (in Buddha Dhamma, this is called “*saṅkhāra dukkha*”); see, “[Second Law of Thermodynamics is Part of Anicca!](#).”

5. After looking at the evidence, if one decides to spend a bit more time carefully examining the three characteristics (*anicca, dukkha, anatta*), one may see that there is some truth that will set one off on the Dhamma Path.

- If there is nothing substantial or long-lasting to be had by harming other living beings, stealing from them, lying to them, indulging in excess sense pleasures, or not being intoxicated with power, money, or position, one's life will automatically change for the better.
- The five precepts or eight precepts are NOT to be just mechanically followed. The mind needs to SEE the benefit of following them.

6. This is why one MUST spend some time examining the evidence for the Buddha Dhamma's validity. The first stage of *Nibbāna*, the *Sotāpanna* stage, is attained just with the clear understanding of the true nature of “this world,” i.e., *anicca, dukkha, anatta*.

- When one realizes the futility of the struggle for long-lasting happiness in a world that is inherently not capable of providing it, one will automatically start moving away from clinging to “things in this world.” For example, one will say to oneself, “what is the point of stealing this from another person? Can long-lasting happiness can be gained? Rather my mind will be in an agitated state if I do that.”
- There is no need to force oneself to obey the precepts. Moral behavior (*sīla*) will automatically follow the true understanding of *anicca, dukkha, anatta*. Then, when one starts feeling a bit of *nirāmisā sukha*, there is no turning back, because one can see for oneself the benefits of moral life.

7. Thus *Sammā Diṭṭhi* (*san + ma + diṭṭhi* = vision to get rid of defilements) is none other than the true comprehension of the three characteristics: *anicca, dukkha, anatta*.

- When one gains a bit of *Sammā Diṭṭhi* (vision), it will try to prevent one from having defiled thoughts (*micchā saṅkappa*), uttering false speech (*micchā vācā*), doing wrong things (*micchā kammanta*), pursuing wrong lifestyles (*micchā ājīva*). One will also make efforts (*Sammā vāyāma*) to be on the

Path, which will lead to be constantly be mindful (*Sammā Satī*), thus leading to *Sammā Samādhi* (peaceful and focused state of mind).

- But it is important to see the distinction between just “good speech” and *Sammā Vācā*. That is to be understood in the context of *anicca, dukkha, anatta*. **One abstains from “wrong speech” not merely because one does not want to face bad consequences. One abstains from it because one can ALSO see the futility in it. The same holds for all eight. This is worth a lot of contemplation.**
- This is why the Buddha said, “*Dhammo ha ve rakkhati dhamma cāri*,” or, “once one sees the Dhamma, Dhamma will guide, protect, and direct.”
- Thus, gaining *Sammā Diṭṭhi* via contemplating *anicca, dukkha, anatta* will automatically direct one on the Noble Eightfold Path. This is why removing *micchā diṭṭhi* via a true understanding of *anicca, dukkha, anatta* is so important.

7. When one proceeds in this manner, one will attain the *Sotāpanna* stage of *Nibbāna*, as these three basic concepts take hold in mind. At that point, the mind will automatically reject doing things that will result in rebirth in the lower four realms.

- Those are the four greed-based *cittā* that arise due to *micchā diṭṭhi* (wrong vision), and the delusion-based *citta* that arises due to defiled *viññāṇa* (*vicikicchā*). This is why a *Sotāpanna* is prevented from rebirth in the lower four realms forever; see, “[Akusala Citta- How a Sotāpanna Avoids Apayagami Citta.](#)”

8. When one attains the *Sotāpanna* stage, one may still have greed, hate, and delusion left in him/her. But a *Sotāpanna* KNOWS about them and KNOWS how to get rid of them. Then it is just a matter of time before getting rid of those defilements and attaining the other three stages, culminating in ultimate peace and permanent happiness, *Nibbāna*.

Next, “[The Sotāpanna Stage](#)”,

7.3.8 How to Cultivate the Noble Eightfold Path starting with Anicca, Dukkha, Anatta

Anicca, dukkha, anatta describe the true nature of this world with 31 realms. Thus one needs to comprehend these “three characteristics of nature” in order to “see” the path to *Nibbāna* before starting to follow it.

1. Before one starts on a journey one needs to decide why one should take the journey, exactly where one is going to, and the correct path towards that destination. Thus it is worthwhile to examine why the Buddha said our goal should be to move away from this world towards *Nibbāna*, why he said that, why one should believe that to be true, and what the correct path towards that goal is. The Buddha himself recommended that approach:

- One starts on the Noble Eightfold Path with *Sammā Diṭṭhi*, which means the needed “vision” on why, what to expect at the end, and an idea about the path to achieve it.
- Out of the twelve *akusala cittā*, five are permanently removed when one attains the *Sotāpanna* stage: the four greedy *cittā* that arise with wrong view (“*diṭṭhi sahagatha*”), and the delusion *citta* based on *vicikicchā*. All five of these *cittā* arise because one does not know the true nature of the world; all *kamma* that lead one to rebirth in the *apāyā* are done with these five *cittā*. Thus when they are removed by partially completing *Sammā Diṭṭhi* at the *Sotāpanna* stage, one is permanently prevented from accumulating *kamma* that destines one to a rebirth in the lowest four realms (*apāyā*).
- Furthermore, any such *apāyagāmī kamma* seeds previously accumulated are prevented from proving a potent enough *nimitta* at the moment of death; thus birth in the *apāyā* is automatically prevented.

- Looking at it from another angle, out of the 10 *samyojanas* (those that binds one to *samsāra*), three are removed at the *Sotāpanna* stage: *sathkaya diṭṭhi* (the idea that all actions one does with the six sense bases to achieve *amisa sukha* are beneficial), *vicikicchā* (distorted mindset), and *silabbata paramasa* (the idea that *Nibbāna* can be attained just by following precepts, without purifying one's mind). All three are due to not having *Sammā Diṭṭhi*, or not knowing the true nature of the world: *anicca*, *dukkha*, *anatta*.
- In the *Sabbasava Sutta*, there are seven recommended methods for removing defilements for anyone starting on the Path. The first item on the list describes how one can get rid of a bulk of defilements just with correct vision of “this world”, i.e., “*dassanena pahathabba*”; this is what was discussed above.
- Once one understands the true nature of “this world” and understands how to remove the rest of the defilements, then the other six steps are taken, of which “*bhavanaya pahathabba*” (i.e., removal by meditation) comes last. Today, most people start meditating without clearly understanding what to meditate about.

2. Thus, first one needs to understand why we need to escape from “this world.”

- The three characteristics of “this world” (see, “[Anicca, Dukkha, Anatta](#)”) tell us that we can NEVER achieve AND maintain whatever we desire (characteristic of *anicca*), thus we mostly end up with suffering (*dukkha*), and thus one is not in control and becomes helpless (*anatta*). The Buddha merely DISCOVERED this true nature of the world. Many people take Buddha Dhamma to be pessimistic, but Buddha was just a messenger.
- Moreover, the Buddha gave us an optimistic message too. For those who are willing to examine the true nature of the world, there is a better version of happiness that comes from moving away from “this world”, i.e., by voluntarily giving up craving for things in this world. This is the *nirāmisa sukha* of *Nibbāna* (see, “[Three Kinds of Happiness – What is Nirāmisa Sukha?](#)”), which increases as one starts on the Path and becomes complete and PERMANENT at the Arahant stage. Even if one does not get to the first stage of *Nibbāna*, the *Sotāpanna* stage, one could experience this *nirāmisa sukha*, and may help shorten the path to *Nibbāna* in the upcoming lives.

3. Therefore it is CRITICAL to understand *anicca*, *dukkha*, *anatta*, before we proceed further here. If you have not done so, please spend some time critically examining and contemplating on these concepts described under many posts on this website, in particular, “[Anicca, Dukkha, Anatta](#),” “[The Grand Unified Theory of Dhamma](#)” and the links following that on “[Samsāric Time Scale](#),” and “[Evidence for Rebirth](#),” and “[Why is Correct Interpretation of Anicca, Dukkha, Anatta so Important?](#).” It may be even helpful for many to scan through many other posts before reading those posts.

- That is a lot of reading. But “this world” of 31 realms is very complex. Please keep re-reading all posts until you understand the message. Most of these concepts have been hidden for thousand years, and have been badly distorted, especially *anicca* and *anatta*. **Think about the fact that all biological matter is constituted from just four bases of DNA, and all computer codes are based on two units, 0 and 1.** Thus, one could see how complex the “whole existence” with 31 realms is when there are 28 types of *rūpa*, 89 types of *cittā* and 52 types of *cetasikas* are involved!

4. The main conclusion from *anicca*, *dukkha*, *anatta* is “*asarattena anatta*,” i.e., “*anatta* in the sense of it is fruitless to crave for anything in this world.” Thus the Buddha said, “*anissitoca viharathi, na ca kinci loke upadiyathi*,” i.e., “There is nothing in this world that is fruitful, there is nothing to be craved.”

- People “behave badly” in order to “get what they perceive to be valuable.” All immoral acts are done to “get what we want.” We crave for something and greed arise, and then when we don’t get what we wish for, we get angry and hate arises. We first think bad thoughts (*mano saṅkhāra*), then follow through with bad words (*vacī saṅkhāra*), and bodily action (*kaya saṅkhāra*). We do all this because we do not have an understanding of the true nature of the world, i.e., *anicca*, *dukkha*, *anatta*, and related facts: knowledge of the rebirth in a wider world of 31 realms with suffering. Thus we do all other bad acts with established wrong views (*niyata micchā diṭṭhi*); see, “[Ten Immoral Actions \(Dasa Akusala\)](#).”

5. Now let us see what happens when one starts learning the true nature of the world including *anicca*, *dukkha*, *anatta*, and ALSO the consequences of immoral actions: Then one thinks, “Is it worthwhile to steal from someone to get what I want, which in the end will do me more harm than good (because those will not provide any permanent happiness, AND one has to pay the price of an immoral action if not in this life but in upcoming lives?).”

- Same for any other immoral act: to hurt someone by, uttering false, slandering, harsh, or frivolous speech; stealing, killing, or engaging in sexual misconduct (hurting other parties involved). AND all those start with covetousness, ill-will, and all those are done because of established false views that fruitful things can be had in this world by hurting others without any bad consequences for oneself.

6. Thus when one is about to think of doing such a bad deed or having bad thoughts, this “clear vision” or *sammā diṭṭhi* will help get rid of such thoughts and instead think, “this person is in the same boat, struggling to survive in a world setup for failure.” Thus instead of bad thoughts one will have thoughts of fellowship and compassion for other beings.

- Also one will be working to learn more Dhamma and will be constantly thinking about Dhamma concepts like *anicca*, *dukkha*, *anatta*; the joy from deeper understanding will provide incentive to dig deeper on concepts that are not clear. Thus *Sammā Diṭṭhi* leads to the next step in the Noble Eightfold Path: *Sammā Saṅkappa*.

7. With such a mindset one will avoid the four forms of bad speech (lying, slandering, vicious talk, vain talk), because one realizes that such acts will only lead to loss of peace of mind as well as hurting others. Thus one will start living with *Sammā Vaca*; also see, “[Right Speech – How to Avoid Accumulating Kamma](#).”

8. Similarly, one will clearly see that there is no point in engaging in immoral bodily acts (killing, stealing, and sexual misconduct) in order to get some temporary satisfaction, which in the end will come back to haunt oneself with magnified bad consequences. This will AUTOMATICALLY guide one to act in a moral fashion, i.e., one will have *Sammā Kammanta*.

9. In standard texts, it says one will not undertake the five lifestyles that are to be avoided:

- (a) Dealing and killing animals for meat trade.
- (b) Dealing in poisons.
- (c) Dealing in weapons and arms.
- (d) Dealing in slave trade and prostitution.
- (e) Dealing in intoxicants or liquors and drugs.

- *Sammā ajiva* is more than that. Thus one’s lifestyle will automatically change to not only moral living, but also to avoid any kind of act which will be harmful to oneself and/or others. One will take care of one’s responsibilities towards one’s family and the society, because otherwise one will get in deeper debt, and will not have the mindset to contemplate; see, “[Kamma, Debt, and Meditation](#).”
- **Following the Path is much more than just abandoning everything and becoming a bhikkhu or just following some guidelines or precepts. It needs to be done with wisdom gained through learning Dhamma.** This is *Sammā Ajiva*.

10. As one feels the benefits of such a lifestyle, one will start feeling the *nirāmisā sukha* (see, “[Three Kinds of Happiness – What is Nirāmisā Sukha?](#)”). Then one will be motivated to stay on that Path, and also to learn more about the Buddha Dhamma and to contemplate more on the Three Characteristics (one is said to have a complete understanding of *anicca*, *dukkha*, *anatta* only when one reaches the *Arahanthood* or full *Nibbana*). This renewed effort is *Sammā Vayama*.

11. The above six factors will make one’s mind purified and one will start “seeing” better. One will start working with “*yoniso manasikara*” (clear vision). It is more than clear thinking; even a master thief plans his work with clear thinking (on the wrong side).

- Here what it means is one always looks at any issue with *anicca*, *dukkha*, *anatta* in the mind: that it is not possible to maintain things to our satisfaction in the long run; that the more we attach either via greed or hate, the more we will suffer; that it is unwise to do immoral things for temporary happiness to become helpless at the end. This is *Sammā Sati*.

12. When one starts meditating (and this does not have to be last; one can start slowly from the beginning), **one will be easily able to get to *Sammā Samādhi***, focused attention (*ekaggata*). The more one proceeds on the Path (i.e., the more the mind becomes purified), easier *samādhi* starts to grow in oneself; one starts feeling a “lightness” even when not doing formal meditation.

- If one works on developing *jhānā*, one will be able to get to *Ariya jhānā*. Whether one will be using meditation on the Three Characteristics, *Satipaṭṭhāna*, or any other other type of meditation, that will eventually lead to the four levels of *Nibbāna*.

13. It is important to realize that “*Sammā*” in all these eight steps means “*san*” (adding things to perpetuate the suffering/rebirth process) + “*ma*” (remove or get rid of). Thus *Sammā Diṭṭhi* is the vision (*anicca*, *dukkha*, *anatta*) that helps removing “*san*”; *Sammā Saṅkappa* are the thoughts that help remove “*san*”; *Sammā Vācā* is the kind of speech that helps remove “*san*,” etc.

- Thus, one adheres to the eight steps through the UNDERSTANDING of *anicca*, *dukkha*, *anatta*, and not merely for the sake of following some guidelines or precepts. One understands the futility of continuing this rebirth process.

Next, “[Akusala Citta – How a Sotāpanna Avoids Apayagami Citta](#)”,

7.3.9 Difference Between Giving Up Valuables and Losing Interest in Worthless

1. As long as one considers something to be valuable, it is not easy to give it up, It does not matter what ANYONE ELSE says. One will go to much effort and expense to make sure it stays with oneself.

- But if one’s own mind sees that something is useless and worthless, then what is the point of keeping it? One will gladly get rid of it.
- One’s perception of the “world out there” and “what is valuable and what is not” depends on one’s mind. Even though we look at a pile of feces with disgust, a dog or a pig may eat it with relish. And a dog does not have any cravings for gold or money.
- While some people gain pleasure by torturing animals, most are disgusted by such acts. It depends on the level of understanding. A purified mind will see things in a better perspective.

2. The common thinking about Buddhism goes like this: “The Buddha said that this rebirth process is full of suffering, and to stop the rebirth process we need to give up everything in this world to detach from it. But that is not easy to do. I like the stuff that I have and I enjoy life. May be I can attain *Nibbāna* in a future life.”

- That is not a correct interpretation of what the Buddha said. The Buddha did say that “this rebirth process is full of suffering.” He never asked anyone to give up anything that they had. His only advice was “learn the true nature of this wider world of 31 realms that is characterized by *anicca*, *dukkha*, *anatta* and realize the dangers in staying in it.”
- If one truly understood the true nature of the world one’s own mind will see the futility of hanging onto worldly things. *Nekkhamma* or “giving up” is not done forcibly, IT JUST HAPPENS when one comprehends the true nature of “this world.”

3. If one understands the above few paragraphs, then one knows more about Buddha Dhamma compared to 90% of the “Buddhists.” Even many *Theravāda bhikkhus* say, “May you attain *Nibbāna* after enjoying future lives in *Deva* realms”, or “May you have much worldly pleasures and attain *Nibbāna* when the next

Buddha [*Maitreya* (Sanskrit), *Metteyya* (Pāli), *Maithree* (Sinhala)] appears in the world.” They apparently do not comprehend the dangers in staying in the rebirth process.

- This is in sharp contrast with Buddha Gotama’s last words, “*appamadena sampadeta*” or “strive diligently and comprehend “*san*” (and attain *Nibbāna*)”, because this rebirth process is wrought with unimaginable dangers. Even if we live perfectly moral lives, we do not know what kind of *kamma* that we have done in past lives, and thus there is no way to guarantee a good rebirth unless one attains the *Sotāpanna* stage and makes those worst *kamma bīja* ineffective.
- This life of about 100 years is just a “blink of an eye” compared to trillions of years in future lives (unless one attains *Nibbāna*); but it is also **unimaginably precious** because we very rarely get a chance to be born human and most living beings are in the lowest four realms; see, “[Rebirth – Connection to Suffering in the First Noble Truth.](#)”

4. Buddha Dhamma is all about PURIFYING one’s mind so that the mind can grasp the true nature of this world. The only actions one needs to take are to live a moral life, gradually adhere to a lifestyle that avoids the ten defilements (*dasa akusala*), AND learn Dhamma, in particular truly understand *anicca*, *dukkha*, *anatta*. Everything else will fall into place.

- When one purifies one’s mind, it becomes clear that the things that one believes to be valuable are not valuable at all, AND such cravings can bring so much suffering in the future. But one cannot take that advice coming from even a Buddha and act on it forcibly; ONE’S MIND HAS TO SEE IT.
- One may take many precautions to safeguard a “gem” that one thinks has much value. But if the gem is assessed by an expert and is found to be worthless, then one will no longer have the same “attachment” for the “gem” and may throw it away. But until the perception is there in the mind that the “gem” is valuable, one will not part with it.

5. There is another aspect of this forcibly giving up. In addition to the fact that one will be under stress if one tries to do that, one may be accumulating bad *kamma vipāka* if one acts irresponsibly. For example, if one decides that he needs to become a *bhikkhu* and abandons his kids and wife, that is an unwise thing to do.

- We have to act mindfully and with wisdom, making sure that we do not hurt ourselves, our families, or anyone else. Buddha Dhamma is all about the mind, and not about mechanically doing meaningless rituals. As we discussed in several posts, it is the intention and the enthusiasm for doing good, that really matters.
- One can progress all the way up to the *Anāgāmī* stage of *Nibbāna* as a “householder”, i.e., while fulfilling one’s responsibilities as a husband/wife, parent, etc. While one should certainly give to charity, one needs to make sure that there is enough left to support one’s family. And it is not possible to contemplate or meditate if one has to worry about the next meal or a place to stay.

6. As one makes progress, giving up will happen automatically **at the level of one’s understanding**, and as needed. One does not have to make plans in advance about what to give up or anything like that: “*Dhammo ha ve rakkati dhamma cari*”, or “Dhamma will guide and protect those who follow the Path.” As the mind becomes clear of the hindrances, one will make better decisions, and will not hurt anyone in the process.

7. About 20 years after the Buddha attained Enlightenment, he had to start adding “*vinaya* rules” for the *bhikkhus*. When Buddha Dhamma started flourishing, many unscrupulous people started to enroll as *bhikkhus* to enjoy “a good life.” The Buddha admonished that such *bhikkhus* accumulate much bad *kamma* by getting indebted to those people who make offerings out of *saddhā*.

- *Vinaya* (“*vi*”+“*naya*” where “*naya*” means debt) means stay free of debts. The *bhikkhus* can do that by diligently pursuing *Nibbāna* and also by explaining Dhamma to those people, while making sure not to abuse their privileged life where they are honored for these very acts.

8. Getting to debt is bad for lay people too. All our current responsibilities have their origins in the past where we became indebted to others. It may take a while to comprehend this, but we are really paying off debts to

even our kids. And if we do not do a good job of it, we WILL have to do it in future lives. Any other relationship is the same way; see, "[Kamma, Debt, and Meditation](#)."

- One time a *bhikkhu* started sharing his food from the alms round with his parents, and other *bhikkhus* complained to the Buddha. The Buddha asked why he did that he said his parents had become beggars and that is why he did that. The Buddha praised that *Bhikkhu* and officially endorsed it as a vinaya rule, that *bhikkhus* can take care of their parents if the need arose. Even as a *Bhikkhu*, one is obliged to take care of one's parents.

9. When someone gets help from another, it is the obligation of the receiver to show his/her gratitude for that kindly act, by doing a *pattidana* or "giving merits" to that person; see, "[Transfer of Merits \(Pattidana\) – How does it Happen?](#)." If the receiver becomes able to pay back in kind, that should be done too.

- When we deal with people in everyday life, we are engaged in paying back debts even unknowingly. Thus it is a good idea to fulfil one's responsibilities to the best of one's ability. This applies to most everyday things we do. Our employment responsibilities needs to be done to the best of our ability. When we do not fulfil our responsibilities anywhere, we stay indebted and accumulate more debt with interest.
- When doing transactions, we need to make sure that everyone is compensated adequately; otherwise, such debts will have to be paid in the future. Again, intention and the "state of mind" are key factors: We may be able to fool other people, but we cannot fool our own minds.
- We have enemies because we have had conflicts with them before. And someone has to break that vicious cycle. This is why the *Dhammapada* verse, "*na hi verena verani....*" says: "Hatred never ceases through hatred, but through love alone they cease." This is an eternal law.

10. Beings in the lower four realms DO NOT HAVE an advanced mental state to affect their future even short term, i.e., in this life; they are simply paying off debts and paying for their immoral acts in the past. They just "go with the flow" spending *kammic* energy that has been accumulated; unless they are fortunate to receive the benefits of a "good kamma beeja" from the past (when they were in higher worlds) at the time of death, they are stuck in the lower realms.

- On the other hand, HUMANS CAN totally change their future, within this lifetime (mundane progress), but also affect the future lives: If one wants to avoid the *niraya* (hell) one needs to remove the causes that could cause rebirth in *niraya*, i.e., deep hate. If one wants to avoid rebirth as a hungry ghost (*peta loka*), then one need to remove causes for that, i.e., excessive greed. If one does not want to be reborn an animal one needs to remove both greed and hate. To avoid birth as an *asura*, one needs to take care of oneself, and not depend on others.

11. Buddha Dhamma is a complete theory on existence. EVERYTHING can be explained in a systematic way. If everyone can grasp the basic message of the Buddha, our world will be much safer place.

- When a tree is growing all we need to do is to water it, provide nutrients, and generally take care of it; the fruits from the tree will come out naturally. No amount of praying or wishing is going to get the tree to give more fruits. In the same way, when we follow the Path correctly, everything else will "fall into place." There is no need to pray or to make wishes or do anything else.
- This world, for all its drawbacks, plays by the rules. Things just do not happen; they happen due to causes. When one understands the causes for bad outcomes, one can work to stop such causes and make sure bad outcomes NOT TO ARISE in the future; this is the meaning of the "*nirodha*" (= "*nir*" + "*udā*," where "*nir*" is stop and "*udā*" is arising; thus "stop from arising").

12. The real message of the Buddha is that spending one's whole life in making mundane progress is really insignificant in the *sansāric* time scale; **why spend all that time to achieve a high status, earn a billion dollars, or anything else mundane if one has to leave all that behind within 100 years?** We have done this over and over countless times. This rebirth process can run into many more trillions of years into the future and this larger world of 31 realms is wrought with unimaginable dangers.

- The ultimate solution is to stop the rebirth process (eliminate causes for future rebirths), and to release the mind from the material body that leads to much suffering.
- Thus the key message of the Buddha was to “attain the suffering-free *Nibbāna* by eliminating the causes for rebirth: greed, hate, and ignorance.”
- But that message itself can only be grasped via purifying one’s mind to a certain extent by learning about the true nature of the wider world of existence: *anicca*, *dukkha*, *anatta*.

7.4.1 The Sotāpanna Stage

Revised February 24, 2020; August 15, 2020; major revision October 21, 2021

It is imperative to learn the correct Dhamma from an *Ariya* to attain the *Sotāpanna* stage (one of the four requirements). See, “[Four Conditions for Attaining Sotāpanna Magga/Phala](#).” We will discuss an analogy for the *Sotāpanna* stage in that regard. We will briefly discuss *Sabbāsava Sutta* to show the importance of removing wrong views to get to the *Sotāpanna* stage.

Upaddha Sutta (SN 45.2) – Need to Know the Correct Buddha Dhamma From a Noble Friend

1. According to the “[WebLink: suttacentral: Upaddha Sutta \(SN 45.2\)](#)” once, Ven. Ananda told the Buddha that he thinks half (“*upaddhamidam..*”) of the factors contributing someone getting to *Nibbāna* (by completing the *brahmacariya*) can be attributed to association with a Noble Friend (*kalyāṇamittā*.) Here, “*kalyāṇa*” means to “help remove defilements,” and “*mittā*” is a friend.

- But the Buddha explains that not just half, but the FULL contribution (“*sakalamevidam..*”) comes from a *kalyāṇamittatā*. **Of course, the Buddha is the best *kalyāṇamittā*.**
- The reason is clear. **Buddha Dhamma is never known to the world until discovered by a Buddha. An average human can learn about it ONLY from a Buddha or a true disciple of a Buddha who has also understood that Dhamma.**
- However, the guidance is REQUIRED only to understand this “new worldview” that has never been known to the world. That means once getting to the *Sotāpanna* stage, a human would understand the Eightfold Noble Path and how to follow it to bet to the *Arahanthood*.
- That is why getting to the *Sotāpanna* stage is the same as getting to *lokuttara Sammā Diṭṭhi*, not just mundane *Sammā Diṭṭhi*. Mundane *Sammā Diṭṭhi* would enable one to live a “moral life.” In contrast, *lokuttara Sammā Diṭṭhi* enables one to attain *Nibbāna*. See, “
- **Just by understanding the “new worldview,” a large number of defilements (*āśava/anusaya*) are removed from the mind and that is referred to as “*dassanā pahātabbā*” (removal with vision) in the *Sabbāsava Sutta* (see below.)**
- We can use the following mundane analogy to help explain the above idea.

An Analogy for *Sammā Diṭṭhi* (attaining the *Sotāpanna* Stage)

2. Suppose a man (X) lives in an area usually full of sense pleasures. But there are occasional flooding, droughts, and also Earthquakes. When such calamities occur, he gets distraught, and thus, his mind is not at ease most of the time.

- Yet, he has accumulated some wealth, and he believes that “everything will be OK” in the long run in the back of his mind.

3. Then, one day, an old friend (who has been on travel for many years) comes back and tells him that the reason he left was to find a better place to live. The friend says that he did some research and found out that this land is inherently unstable, and within several years, an Earthquake will destroy this area.

- Furthermore, he says that he found a very prosperous place and that there are no worries about flooding, drought, or Earthquakes. But it is a long journey to that place.

4. X tells the friend that he had heard about such beautiful places from other people before. He had followed them at times, but every time came back after trekking for some time because he could not see any benefit. Plus, he says, “how do I know what you say is right? I know that everything is not perfect here, but can you show evidence for your theory that there will be a big Earthquake? Also, how can I believe you that this place you found is so wonderful?”

5. The friend shows him all the evidence that he had gathered why this area is unsuitable for living in the long run. He also shows evidence about the prosperity of the new place and also describes the travel path.

- The evidence is compelling, and X decides to follow the friend's advice and see what happens. That is analogous to becoming a *Sotāpanna Magga Anugāmi*.

6. X spends a lot of time reading about and contemplating all the evidence. Then he begins to realize that what the friend is saying is true. He decides to take an exploratory trip and makes suitable preparations, as suggested by the friend.

- Once in a while, he wonders whether all these preparations will be a waste of time. But as he keeps on assessing the evidence, he becomes more and more convinced that he needs to take that trip.

7. Then X starts on the trip and is encouraged by seeing some “landmarks” that the friend told him. Even though once in a while he thinks about all the “pleasures” he could have had if he stayed home, these “landmarks” encourage him to go further and then reaches one of the four “major stopovers” that the friend mentioned.

- At a certain point on the way, he becomes fully convinced about his friend's conclusions. Now there is no going back for him. That is like getting to the *Sotāpanna* stage.

The Way to the *Sotāpanna* Stage

8. The key here is that without knowing about the Buddha's world view (31 realms of existence and the suffering in the four lower realms, see “[The Grand Unified Theory of Dhamma](#)”), one does not comprehend the “*samsāric* suffering.” **Most suffering incurs when one is born in any of the four lowest realms.** That is important because it is possible that (especially young and wealthy people) may not experience that much physical and mental suffering. And to have faith in the Buddha's worldview, one needs to spend some time examining the evidence for it.

9. When one sees why it is not fruitful to stay in “this world” of 31 realms, they have understood the true nature, the three characteristics *anicca, dukkha, anatta*, of “this world.”

- *Sammā Diṭṭhi* is the realization that there is nothing “substantial” to be had by staying in “this world.” This clear vision concludes that there is no point in doing immoral things (those that cause rebirth in the four lower realms).

10. We strive to gain or own “things” in this world because we perceive that we can achieve happiness eventually; this is *sakkāya diṭṭhi* or *sathkāya diṭṭhi* (both “*Sakka*” and “*sath*” mean “good” or fruitful, and “*kāya*” means “*kriya*” or actions. *Diṭṭhi* means views. Thus, *sakkāya diṭṭhi* is our wrong idea that our efforts to acquire “things” or “seek happiness” are beneficial and fruitful.

- When one truly understands *anicca, dukkha, anatta*, this wrong view goes away. One realizes that nothing we do can lead to permanent happiness “in this world.”

11. Furthermore, for one who has seen *anicca, dukkha, anatta*, the mind does not allow serious wrongdoings (*vici+ ki+icca* = liking for wrong actions or things) that could lead to birth in the lower four realms.

- There is no doubt regarding the “world vision” that they realized. Thus *vicikicchā*, or the liking for unfruitful and harmful actions, is removed at the *Sotāpanna* stage.

12. Therefore, one needs to contemplate the true nature of the world. It is done by purifying the mind and cannot be done just by following certain rituals, such as just obeying precepts on certain days.

- Thus the idea of “*sīlabbata parāmāsa*” or “*Nibbāna* can be attained by following rituals” goes away at the *Sotāpanna* stage. One realizes what the Buddha said by “*saṁvaraṭṭhena sīlam*.”
- Unbreakable “*sīla*” (or moral behavior) comes with the correct vision/view. That must be monitored at ALL TIMES, not by “observing precepts” for a day or several days.

13. For one who has become “*dassanā sampanno*” (one with clear vision), the mindset changes not by following formal procedures. The change of perspective comes by understanding the futility of breaking any precepts or wrongdoings. Even if one does a wrong act, he would immediately realize it and avoid it in the future.

14. This is not to discourage people from observing precepts as a formality. Even mechanically observing those precepts is good to do. It is also a good habit to instill in children. It is customary in Buddhist countries for whole families to go to the temple and observe “*pañca sīla*” (five precepts) or “*aṭṭhaṅgika sīla*” (eight precepts) on *Poya* (Full Moon) days.

Key Points from the *Sabbāsava Sutta* (MN 2)

15. The key to attaining *Nibbāna* is to remove the *āsavā* (residue from the fermentation of immoral thoughts/habits over many *saṁsāric* births). In the *Sabbāsava Sutta*, the Buddha listed seven steps to remove the *āsavā* and to purify the mind, thus paving the way to *Nibbāna*. The seven steps are:

1. Removal by **clear vision** (“*dassanā pahātabbā*,” where *dassana* is vision and *pahātabbā* is removal). That is a clear understanding of *anicca*, *dukkha*, *anatta*.
2. Removal by the restrained use of the sense faculties (“*saṁvarā pahātabbā*,” where *saṁvara* is the disciplined use of the sense faculties: not to over-indulge in the senses).
3. Removal by good associations (“*paṭisevanā pahātabbā*,” where *sevana* is an association: for example, with good friends and good deeds).
4. Removal by tolerance and patience (“*adhivāsanā pahātabbā*”). For example, even if tempted to steal because one is hungry, one should contemplate the consequences of stealing. There are ways to earn a living.
5. Removal by staying clear of “bad influences and environments” (“*parivajjanā pahātabbā*”). One needs to avoid bad friends, unwise locations for a living (due to floods, bad neighbors, etc.), avoid inappropriate times to go out, etc.
6. Removal by getting rid of certain things (“*vinodanā pahātabbā*”). One needs to get rid of immoral thoughts that come to mind, such as excessive sensory pleasure, hate, etc.
7. **Removal by meditation (“*bhāvanā pahātabbā*”). When one has a clear vision in #1, it becomes apparent what to contemplate.**

The clear vision is the first on the list. One should not undertake a journey without knowing the reason for the journey. Furthermore, one needs to understand how to get to the destination.

- In the same way, having a clear vision of the Buddha’s worldview is a prerequisite for starting on the Noble Path. What is *Nibbāna* and how to get there? See, “[Paticca Samuppāda, Tilakkhana, Four Noble Truths](#).”
- There are four types of *āsavā*: *kāmāsava* (craving for sense pleasures), *diṭṭhāsava* (cravings due to wrong views), *bhavāsava* (craving for existence), and *avijjāsava* (cravings due to ignorance).

16. A *Sotāpanna* removes the *diṭṭhāsava* through clear vision. Once one understood the true nature of “this world” by contemplating *anicca*, *dukkha*, *anatta*, one would not commit any immoral acts to gain anything

in “this world.” See, “[Anicca, Dukkha, Anatta](#).” That alone saves one from future rebirths in the lower four realms.

- A *Sotāpanna* still has the other three *āsavā* left. Those are removed mainly by the meditation on the *Satta Bojjhaṅga* (seven *Bojjhaṅga*.)
- After attaining the *Sotāpanna* stage, one sees the Path to *Nibbāna* (and how to MEDITATE to get to *Nibbāna*.) That is “*bhāvanā pahātabbā*” in #7 above. Then he diligently follows the Path and reaches the following three stages, culminating in *Nibbāna*.
- As one can see, the other five steps (#2 through #6) listed in the *Sabbāsava Sutta* are common sense things to do AT ANY TIME. They make sense at any stage. Anyone can use those steps to enhance the quality of life and remove any bad habits—for example, alcohol/ drug use or even overeating can be bad for health.

A *Sotāpanna* Knows “What to Meditate On”

17. Many people start “meditating” even before understanding “what to meditate on.” **Of course, if one is doing “breath meditation,” there is nothing to learn.** It is an insult to the Buddha. Buddha’s meditations help one to stop future suffering from arising. For that, one must first realize the unfruitfulness/danger in remaining in this world (via the rebirth process.) See, “[Paṭicca Samuppāda, Tilakkhaṇa, Four Noble Truths](#).”

- The *Mahā Satipaṭṭhāna Sutta* covers all seven steps in #15 above in a somewhat different fashion. The correct *Ānāpānasati bhāvanā* (not the breath meditation version) covers those in a general way.
- As stated in the “[WebLink: suttacentral: Ānāpānassati Sutta \(MN 118\)](#)”: “*Evam bhāvitā kho, bhikkhave, ānāpānassati evam bahulīkatā cattāro satipaṭṭhāne paripūreti*” or “*Bhikkhus, that is how ānāpānassati, developed and cultivated, fulfils cattāro satipaṭṭhāna.*”
- **Can “breath meditation” fulfill the *Satipaṭṭhāna Bhāvanā*?** One needs to be a *Sotāpanna* to properly cultivate *Ānāpānassati* or *Satipaṭṭhāna Bhāvanā* (i.e., to have optimum results.)

7.4.2 Why a *Sotāpanna* is Better off than any King, Emperor, or a Billionaire

Revised August 5, 2022

Attaining the first stage of *Nibbāna* (*Sotāpanna* stage) will remove suffering in the *apāyā* forever, which could be more than billions or even trillions of years. This is not an exaggeration since we have been in this rebirth process from an untraceable beginning; see “[Evidence for Rebirth](#).” Thus any achievement in this life of 100 years is no match.

- Most people think that Buddha Dhamma is a pessimistic “religion.” It is neither a religion nor a pessimistic one. Let us discuss these two issues a bit first.
- In the “[WebLink: suttacentral: Cakkavattirāja Sutta \(SN 55.1\)](#)” the Buddha stated that a Noble Person (above the *Sotāpanna Anugāmi* stage) is better than an emperor ruling the whole Earth (*rājā cakkavattī*.) Let us discuss what that would be so.

1. Buddha Dhamma describes the true nature of “this world,” which is far more complex than most people think.

- A religion promises that if one abides by its tenets/doctrine and lives this life accordingly, one will be rewarded accordingly. In most religions, one is promised birth in heaven for eternity if this is kept.
- But a basic tenet in Buddha Dhamma is that this life of about 100 years is just a blip compared to the countless lives one has had in the past. **Even if we live a perfect life during these 100 years, that does not guarantee anything about our future lives** because we may have done *kamma* in PREVIOUS LIVES that could give rebirth in even the lowest four realms, the *apāyā*, including the *niraya* (hell).

- The only way to GUARANTEE that one will NOT be reborn in the *apāyā* is to negate the causes (*lobha, dosa, moha*) that could give opportunities for all such bad *kamma vipāka* to come to fruition. And that is possible only via attaining the *Sotāpanna* stage. Even though attaining the *Arahant* stage of *Nibbāna* via complete removal of *lobha, dosa, and moha* (and thus the ten *sanyojana* or fetters) will do that too, attaining the *Sotāpanna* stage does not require all that. It just requires one to comprehend *anicca, dukkha, and anatta* to the extent that only three *sanyojana* (fetters) are removed.
- Removal of three (or ten) *sanyojana* cannot be achieved via following set rules/precepts. **One needs to purify one's mind so that the true nature (*anicca, dukkha, anatta*) of this complex world of 31 realms is understood.** That is why Buddha Dhamma is not a religion per standard definition.
- On the other hand, if one just wants to take what is helpful to lead to moral life and use Buddha Dhamma as a religion, there is nothing wrong with that. That would be much better than living an immoral life. Dhamma will become clearer as one proceeds, providing the incentive to “dig deeper.”

2. Now to the second issue: Because the Buddha emphasized the “suffering in this world,” many think Buddha Dhamma is pessimistic. The Buddha did not say that this current life is necessarily filled with suffering (even though it has more suffering than people realize); rather, most suffering is encountered in the lowest four realms of the 31 realms. **Thus, this reality of suffering is to be understood in the context of this wider world view.** The Buddha just discovered the true nature of the (more complex) world.

- Furthermore, he showed how to be free from this inevitable suffering in future births and to attain permanent happiness, *Nibbāna*.

3. Please re-read the above material on those two key points. It is important to look at this “wider world view” when assessing what we should strive for in this life. This analysis leads to a whole new perspective if there is evidence to believe the “wider world view” of the Buddha with repeated rebirths in 31 realms, including the four *apāyā* with unimaginable suffering.

- Does it make sense to spend 60 years of an 80-100 year life to accumulate wealth and fame if one is to lose most of one's sensory enjoyments over the last few decades (and possibly have a major disease or memory loss)?
- Does it make sense to accrue unimaginable suffering in the *apāyā* in future births by committing any of the *dasa akusala* (ten defilements) to make money, get a promotion, live in a big house, get a prestigious position, etc. (for less than 100 years)?
- The realities of old age, disease, and death hold for a king, emperor, billionaire, or famous film star just the same as for an average person. In old age, all these achievements become a mental burden because one constantly thinks about the “good old days” and become depressed about not being able to enjoy the sensory pleasures just because the whole sensory system is breaking down.
- Here is a video that summarizes what I tried to explain the above paragraph :

[WebLink: YOUTUBE: Aging Stars of the Golden Age](#)

4. And this predicament is true for ANY being in ANY realm unless at least the *Sotāpanna* stage is attained. A *deva* or a *Brahma* could enjoy millions of years of pleasurable lives but WILL end up in the *apāyā* at some point in the future unless at least the *Sotāpanna* stage of *Nibbāna* is attained. There are several incidents mentioned in the *Tiṭṭaka* where the Buddha emphasized how important is the *Sotāpanna* stage compared to any existence in the 31 realms:

- One time the Buddha was crossing a paddy field with 500 *bhikkhus* where many cattle were grazing and smiled. A Buddha (or an *Arahant*) does not smile frequently, so Ven. Ānanda asked the Buddha why he smiled. The Buddha said, “each one of these has been the king of the *devas* at some in the past.” Ven. Ānanda asked why that was a reason to smile. Then the Buddha said, “All these 500 *bhikkhus*, who are *Sotāpannas* or above, will never be born an animal. That is why I smiled.”

- Another time the Buddha and Ven. Ānanda was walking and saw a piglet by the roadside, and the Buddha again smiled. Asked why, he said, “This piglet had been a princess in a life way back; she cultivated *anāriya jhānā*, attained the highest (eighth) *jhāna*, and had *abhiññā* powers. She was born in the highest *Brahma* world, but now she is just an animal. On the other hand, those who have attained the *Sotāpanna* stage in my *sāsana* will never be born in the *apāyā*.” See “[WebLink: tipitaka.net Dhammapada Verses 338 to 343](http://tipitaka.net/Dhammapada/Verses/338%20to%20343).” (Note that the background story uses “sow” for “piglet.”)

5. Many people do not believe in rebirth. But having a belief will not help if it is a wrong view. Considering the possible dire consequences IF one gets this world view wrong, it makes a lot of sense to spend some time and critically examine the evidence for rebirth in particular (see “[Evidence for Rebirth](#)”) and the wider worldview of the 31 realms in general (see, “[The Grand Unified Theory of Dhamma](#)”).

6. The *niyata micchā diṭṭhi* (established wrong views) is one of the stronger ones of the *dasa akusala* that could lead to birth in the *apāyā*; the key word there is “*niyata*,” or “established,” i.e., one firmly believes, for example, that there is no rebirth process. One could avoid this by at least having an open mind and NOT ruling out those possibilities. Even a *Sotāpanna* may not be truly convinced of some aspects of the wider world view (but not rebirth): for example, he/she may not have any strong conviction on the existence of *deva* worlds or may not even think about such matters.

- Another point to consider is how the standard world views have changed since the Buddha revealed his Dhamma about a complex world with no discernible beginning. Philosophers since that time (Socrates was a contemporary of the Buddha) put forth many world views that have been discarded one by one: [WebLink: WIKI: Astronomy and cosmology](#)
- Within the past 100 years, the Buddha's world view has gained much support from science and that pace is accelerating with the new string theories and quantum mechanics. With all these impressive advances science has made, it cannot account for 96% of the universe's mass; see [WebLink: NASA: Dark Energy, Dark Matter](#) and [WebLink: WIKI: Dark matter](#). This is because there is so much that we cannot “see” with our eyes or even with the current scientific instruments; see, “[Consciousness Dependence on Number of Dimensions](#).”
- There are good reasons to believe that science will reveal more of these currently hidden aspects of the universe in the future. Just imagine that even a hundred years ago, scientists believed that the universe had only a few galaxies and was stable. Now we know that there are billions of galaxies in our universe, that there could be numerous universes, and all those are not stable, i.e., they are born and will perish in the future.
- Until recently, humans also had the wrong impression that the Earth is a special place in the universe. But now we know it is an insignificant “speck of dust” in a vast universe; see the video in “[The Grand Unified Theory of Dhamma](#).”

7. Please spend some quiet time contemplating these issues. These posts are not for reading pleasure; these are issues that have far more serious consequences than making a billion dollars. Some of my friends tell me I should “tone down” the content because the “realities of the world turn many people off.”

But my goal is not to have a huge readership. Rather, if I could convey the Buddha's true message to even a few people, I would have accomplished my goal. There is ONLY ONE set of natural laws, and we cannot alter them, just like we cannot alter the laws of motion: If a car is headed to a brick wall, the car needs to be stopped, or the consequences will not be good. Let me give a few examples of how the Buddha assessed this situation:

- Some *brahmins* complained to the Buddha that he was not spending enough time debating them but would spend a lot of time with even a few of his disciples. The Buddha asked this question: “Suppose a farmer has three paddy fields: one is extremely productive, another is OK but requires considerably more time to yield a good harvest, and the third field is of such a poor condition it is impossible to get any harvest. Which field would the farmer put his efforts on? He will take care of the most productive field, disregard the third field, and spend whatever extra time he has on the second field. It is the same way

with me. I want to help those interested and capable of learning my Dhamma. Debating with those who have closed minds is a waste of time.” See, “[WebLink: suttacentral: Khettūpama Sutta \(SN 42.7\)](#).”

- One day the Buddha and Ven. Ānanda walked for many miles to a village to deliver a discourse. Everybody gathered, and the Buddha sat there for a couple of hours without starting the discourse. Finally, a farmer who had lost a cow and was out in the forest looking for it found the cow, went home, took a bath, ate, and came hurrying to the event. The Buddha started the discourse right after he came in. When they were walking back after the discourse, Ven. Ānanda asked the Buddha why he kept everyone waiting until that one farmer came in. The Buddha said, “Ānanda, I walked all this way to give the discourse because of that farmer. I saw that he was capable of grasping the Dhamma, and he did attain the *Sotāpanna* stage.”

8. The Buddha said, “This Dhamma is different from anything the world has ever seen.” And that is true. It takes time to grasp the complexity of this world, much of which is hidden from us (and only a Buddha is capable of finding them; see “[Dhamma and Science – Introduction](#)”). There is no need to rush and embrace everything; one needs to spend time contemplating the validity of Buddha Dhamma.

- There are many introductory but critical posts in the “[Moral Living and Fundamentals](#)” section. **That section is more about the basic concepts of Buddha Dhamma.** I would encourage even those familiar with “Buddhism” to peruse that section because, without the correct basics, one cannot grasp more advanced concepts. **And I am certain that 90% of “Buddhists” are not even aware of some of these basic concepts.** Please comment on anything at this site and don’t hesitate to point out incorrect concepts.

9. We can, in a way, compare this situation with the situation a parent faces with a teenager. The teenager wants to go out and have a good time with friends. But the parent says, “do not just think about the immediate pleasures. If you do not study well and get good grades at school, you will not have a good job when you grow up.”

- It is the same here. We are trapped in a “rat race” to keep up with day-to-day pleasures and activities. The Buddha’s message is that there is a much longer time to think about.
- This life is just a drop of water compared to the huge ocean that is the *sansāric* journey of rebirths. It is imperative to take some time and contemplate the “bigger picture.” We may not get another chance of a human birth for millions or billions of years; this is NOT an exaggeration.

10. But the best part of the Buddha’s message, which has been lost for over a thousand years, is that the *nirāmisā sukha* is better than any sensory pleasures. We are under the illusion that sense pleasures are to be pursued. If one can taste the happiness from staying away from sense pleasures, one will NEVER value the sense pleasures. Those who have experienced even *anāriya jhānic* experiences will have some idea of such *nirāmisā sukha*.

- It is a feeling of huge release more than a pleasure in consuming tasty food, for example. And it is not temporary, especially if one can get to the *Sotāpanna* stage. Then that “base level” of relief is never lost, even in future births.
- When one starts on the Path by comprehending *anicca*, *dukkha*, and *anatta*, the sense of peacefulness, the release from stresses, is felt; that gives an incentive to stay on the Path even before attaining the *Sotāpanna* stage.
- The best part is the realization that one will never be born in the *apāyā*. Any king, emperor, or billionaire, is not assured of that; on the contrary, the efforts to attain such temporary status may CAUSE one to be born in the *apāyā* if one engaged in *dasa akusala* to attain them.
- As Carl Sagan pointed out in the video in “[The Pale Blue Dot.....](#),” it is worthwhile to contemplate, “where are all those kings and emperors who gained fame through the suffering of so many people?.” They will likely be in an *apāyā* suffering for millions of years.

Next, “[Myths about the Sotāpanna Stage](#)”,

7.4.3 Myths about the Sotāpanna Stage

Revised September 7, 2016; #6 revised on December 2, 2016; September 28, 2018

There are many myths and misconceptions on who a *Sotāpanna* is, and what needs to be done to become a *Sotāpanna*. Here we discuss some of these misconceptions.

1. When I was growing up in Sri Lanka, I was under the impression that a *Sotāpanna* could fly through the air, and an *Arahant* could vanish and reappear as he/she wished. These were the “mythical” status assigned to *Sotāpannas* and *Arahants*. I guess that is due to the fact that such attainments are perceived these days to be impossible to be attained on the one hand and also a clear idea of what those attainments mean has been lost.

- One is unlikely to identify a *Sotāpanna* or even an *Arahant* if one has even been associating with that person.
- It is true that the attainment of even the *Sotāpanna* stage is not a trivial matter. And one cannot expect it to be trivial; see, “[Why a Sotāpanna is Better off than any King, Emperor, or a Billionaire.](#)”
- A *Sotāpanna* is incapable of doing only six things: Killing mother, killing mother, killing an *Arahant*, injure a Buddha, *Saṅgha bheda* (teaching *adhamma* as Buddha Dhamma), having *niyata micchā diṭṭhi*; see, “[WebLink: suttacentral: Bahudhātuka sutta \(MN 115\).](#)”

2. The attainment of supernormal powers such as flying through the air or to vanish and reappear is possible even by developing *anāriya jhānā*. Most of such attainments are lost at death (even though the ability to get them back will be easier if one is reborn human again).

- Attainment of various stages of *Nibbāna* are accomplished by cleansing one's mind and it has nothing to do with developing supernormal powers. Even though it will be much easier for an *Arahant* or a *Sotāpanna* to develop such powers, by the time one attains such levels of purity of the mind they are not enamored anymore with such supernormal powers. Most of the *Arahants* who had supernormal powers at the time of the Buddha had developed those before encountering Buddha Dhamma. For example, Ven. Sāriputta and Ven. Moggallāna were *vedic brahmins* who had developed all *anāriya jhānā* and already possessed such powers before they met the Buddha.

3. Various stages of *Nibbāna* are attained by systematically removing the 12 types of *akusala citta* (immoral thoughts) or, put it in a different way, by removing the ten *saṃyojana*. There are other ways to describe those conditions too; see, “[Conditions for the Four Stages of Nibbāna.](#)”

- The *Sotāpanna* stage is reached via removing the four *lobha citta* that are based on *micchā diṭṭhi* (wrong vision), and the *moha citta* of *vicikicchā*. It is important to note that the remaining 7 *akusala citta* including the two *dosa-mūla citta* are still with a *Sotāpanna*.
- **The four *lobha citta* that a *Sotāpanna* removes are the ones that are responsible for *vyāpāda*, which is the strong version of anger that makes one eligible for rebirth in the *apāyā*; see, “[Akusala Citta – How a Sotāpanna Avoids Apayagami Citta.](#)”** The two *dosa-mūla citta*, which gives rise to milder versions of anger, are removed only that the *Anāgāmī* stage.
- Furthermore, *kāma rāga* (craving for sensual pleasures) is included in the other four *lobha-mūla citta* that are “*diṭṭhi vippayutta*” or “not associated with wrong views.” Thus craving for sensual pleasures is also removed only at the *Anāgāmī* stage.
- **Therefore, attaining the *Sotāpanna* stage — while not trivial — is not as hard as many people think if one has a *tīhetuke upapatti*.** However, it is not possible to determine who has *tīhetuka* or *dvīhetuka paṭisandhi*; most people belong to those two categories. One with *dvīhetuka paṭisandhi* cannot attain *magga phala* or *Ariya jhāna* in this life, but still can make progress towards *Nibbāna*; see, “[Paṭisandhi Citta – How the Next Life is Determined According to Gati.](#)”

- On the other hand, many people are focused on trying to get rid of the perception of “self.” That is not something that can be forced; it just HAPPENS at the *Arahant* stage. It is not possible to make that perception go away before that.

4. Turning to another myth, NO ONE ELSE can discern what *magga phala* one has attained: *Sotāpanna* or a higher stage of *Nibbāna*. Only a Buddha has that capability. Let me give an example to illustrate this point:

- One time, Ven. Sāriputta was giving instructions to a *bhikkhu*. The Buddha came along and told Ven. Sāriputta that the *bhikkhu* had already attained the *Arahantship* and thus there is no need to give instructions to him. It turned out that the *bhikkhu* in question did not say anything to Ven. Sāriputta out of respect for him.
- Now, Ven. Sāriputta is only second to the Buddha in this *Buddha Sāsana*. He and Ven. Moggallāna were the two chief disciples: Ven. Sāriputta was second in knowledge to the Buddha and Ven. Moggallāna was second in psychic powers to the Buddha.
- Thus, if Ven. Sāriputta was not able to discern whether that *bhikkhu* was an *Arahant*, it is NOT possible for anyone living today to determine the stage of *Nibbāna* (*Sotāpanna*, *Sakadāgāmī*, *Anāgāmī*, *Arahant*) of any other person.
- One could be of any race or even religion and still be a *jāti Sotāpanna* (and, even that person may not be aware of it). If one had attained the *Sotāpanna* stage in previous life, he could in principle, be born anywhere in human or *deva* realms. Buddha Dhamma describes nature’s laws; it applies to everyone the same way.
- Those people who attained various stages of *Nibbāna* during the early years had different religious beliefs. They sat down to listen to the Buddha and by the time the discourse was over, they had attained various stages of *Nibbāna*. Some people came to debate the Buddha and left as *Sotāpannas*. One does not need to formally become a “Buddhist” to realize the true nature of “this world.”

5. This is why one has to be very careful when dealing with other humans, and not to offend anyone intentionally. It is very important to have at least some knowledge of the different weights of *kamma*; see, [“How to Evaluate Different Weights of Kamma.”](#)

- Some people worry about inadvertently killing insects while cleaning the house, but do not think twice about saying a lie or a hurtful thing to a human. That is getting things backwards.
- The severity of the *kamma* depends on the “level of the being” that it is directed at. It is EXTREMELY difficult to get a human life; thus a human life could be millions times worth compared to any animal life. A *Sotāpanna* is at a more than thousand-fold higher level compared to a normal human, and the subsequent levels are even higher.
- There is no being in the 31 realms that is at a higher level compared to an *Arahant*. That is why killing an *Arahant* is a *Anantariya pāpa kamma*, i.e., it will bring extremely bad *vipāka* in the very next life. And it is not possible to say whether a given person is an *Arahant* by looking at that person, or even associating with him/her for a short time.

6. How does one discern whether one has attained, say, the *Sotāpanna* stage?

- A *Sotāpanna* does not attain *Ariya jhānā* coincident with the *phala* moment. There one’s “lineage” (*gotra*) is changed from a normal human to a *Sotāpanna* at the *gotrabu citta*. A similar *citta vūthi* runs in attaining a *jhāna*, but in a *jhāna* one’s lineage is changed only to a *jhānic* state at the *gotrabu* moment; see, [“Citta Vūthi – Processing of Sense Inputs.”](#)
- However, if one who just became a *Sotāpanna* had developed any *anāriya jhāna* previously, then that *jhāna* could be easily converted to an *Ariya jhāna* with some practice. Unlike an *anāriya jhāna*, an *Ariya jhāna* cannot be broken even if one forcefully tries to generate a sensual/hateful thought. Thus, for someone who has had *jhānic* experiences this may be a clue.

- Also, if one can get into the fourth *Ariya jhāna*, that means one is at least a *Sotāpanna*; probably an *Anāgāmi*.
- Another way is to contemplate whether one is capable of doing any acts that could lead to rebirth in the *apāyā* (the four lowest realms). If one has ingrained characteristics or habits (*gathī*) of an animal, then it is likely that person will be born animal of that character. If one has extreme hate, and is capable of plotting to bring harm to other people, then that person may be destined to the *niraya*. If one does not have any of such extreme greed, hate, and ignorance, then one may be free of the *apāyā*, i.e., one is likely to be a *Sotāpanna*.
- However, unless one is subjected to extreme pressures, it may not be possible to discern whether one has removed such “*apāyagāmi gathī*.” It is easier to live a moral life when one has enough resources and when nothing unexpected happens. But there are instances when perfectly “moral people” commit murders in a moment of rage.
- The *Sotāpanna* stage is attained purely via attaining *Sammā Diṭṭhi*, and removing 5 of the 12 possible *akusala citta*: 4 *lobha citta* associated with *micchā diṭṭhi* and the *vicikicchā citta* that arises out of ignorance of the true nature of “this world.” All these 5 *citta* are removed via just comprehending *anicca*, *dukkha*, *anatta* to a certain extent; see, “[Akusala Citta – How a Sotāpanna Avoids Apayagami Cittas](#).”
- Thus if one has any ESTABLISHED (*niyata*) wrong views (see, “[Ten Immoral Actions \(Dasa Akusala\)](#)”), then it is unlikely that one is a *Sotāpanna*. Attaining the *Sotāpanna* stage is not possible until one sees the “unfruitful nature” of existence anywhere in the 31 realms; and that is not possible if one has **ruled out** rebirth or the existence of other realms; see, “[Ten Immoral Actions \(Dasa Akusala\)](#).”
- Also see, “[How Does One Know whether the Sotāpanna Stage is Reached?](#)” for more details.

7. Many people believe it is necessary to meditate a lot to attain the *Sotāpanna* stage. While it is beneficial to meditate, one can in principle be a *Sotāpanna* without doing any FORMAL meditation. I have given some examples from the time of the Buddha in #4 above; however, such cases are rare these days.

- There are basically two steps to get rid of *lobha*, *dosa*, *moha* or to attain *Nibbāna*: “*Dassanena pahathabba*” (removal by vision or the “ability to see”) comes first; that is what is necessary to attain the *Sotāpanna* stage.
- However, in order to accomplish “*Dassanena pahathabba*” or “to see clearly”, one needs to realize what the Buddha meant by “suffering”, which comes in two types. This is described in detail — starting with the first type of suffering that can be eliminated in THIS LIFE — in the “[Living Dhamma](#)” section.
- Various stages of *Nibbāna* are attained as *lobha*, *dosa*, *moha* are removed in stages. One attains the *Sotāpanna* stage via “*dassanena pahathabba*” i.e., one removes those 5 *akusala citta* associated with “wrong views” via discerning the true nature of “this world of 31 realms”, i.e., *anicca*, *dukkha*, *anatta*.
- Then, a *Sotāpanna* can remove the remaining 7 *akusala citta* in three stages via meditation, i.e., “*bhavanaya pahathabba*” and attain the higher stages *Nibbāna*.
- Of course, it is good to meditate before the *Sotāpanna* stage; it will be beneficial to calm the mind and to contemplate on *anicca*, *dukkha*, *anatta*. But the “*bhāvanā*” or meditation that is needed for the *Sotāpanna* stage cannot be restricted to formal meditation because moral conduct or “*sīla*” sets the necessary environment for the mind to “clearly see” by reducing *pancanivarana*; see, “[Living Dhamma](#).”

Next, “[Why a Sotāpanna is better off than any King, Emperor, or a Billionaire](#)”,

7.4.4 Sotāpanna Anugāmi and a Sotāpanna

Revised July 27, 2017; January 15, 2018; September 22, 2018; September 26, 2018; February 3, 2019; February 13, 2019; January 28, 2020; April 13, 2020; August 11, 2021; July 18, 2022 (#5 added)

Here we discuss the difference between a *Sotāpanna* and one striving for the *Sotāpanna* stage. The latter is on the right path (a *Sotāpanna Anugāmi*).

Who Belongs to the Saṅgha

1. The word *saṅgha* nowadays refers to the *bhikkhus*. Yet *Saṅgha* is “*saṅ*” + “*gha*,” or those who have either gotten rid of or are on the way to getting rid of “*saṅ*.” By that definition, one does not have to be a *bhikkhu* to belong to the *saṅgha*; see, “[What is “Saṅ”? Meaning of Sansāra or Samsāra.](#)”

In the salutation to the *saṅgha*, they are referred to as “*aṭṭha purisa puggalā*.” See, “[Supreme Qualities of Buddha, Dhamma, Saṅgha.](#)” Here, “*aṭṭha*” is eight, “*purisa*” does not mean male, but one with higher virtues and “*puggalā*” is a person. Thus there are eight types of people belonging to the *saṅgha*. Who are the eight?

- There are four who have started on the Noble Path/fulfilled the conditions for the four stages of *Nibbāna*: *Sotāpanna Anugāmi*, *Sotāpanna*, *Sakadāgāmi Anugāmi*, *Sakadāgāmi*, *Anāgāmi Anugāmi*, *Anāgāmi*, *Arahant Anugāmi*, and *Arahant*. Four of those are in the *Anugāmi* stages (working toward a given stage,) and the other four have reached their respective stage.
- A special *kamma* and *kamma vipāka* happens for Noble *kammā* (efforts toward a given stage.) Once “what needs to be done” is fulfilled, the *vipāka* follows in the next *citta* within a second. Thus when one gets into the *Sotāpanna magga citta*, for example, one receives the *Sotāpanna phala* in the next *citta*. Thus one becomes a *Sotāpanna* in two consecutive thought moments.
- However, when one starts grasping the *Tilakkhaṇa* (*anicca*, *dukkha*, *anatta*), one becomes a *Sotāpanna Anugāmi* (one on the way to attaining the *Sotāpanna* stage). Thus one becomes free of the *apāyā*. In later commentaries, they are also called “*Cūḷa Sotāpanna*” or a “junior *Sotāpanna*.”

Abhidhamma Explanation

2. The *citta vīthi* for a *magga phala* is discussed at the end of the post, “[Citta Vīthi – Processing of Sense Inputs](#)”:

B B B “BC BU MD P U A G Pa Fr Fr” B B B

[(B) *Upaccheda* (Arrest *Bhavaṅga*), (MD) *Manodvāra Āvajjana* (Mind Averting), (P) *Parikamma* (Preparation), (U) *Upacāra* (Close Proximity), (A) *Anuloma* (Conformity), (G) *Gotrabu* (Change of Lineage), (Pa) Path (*magga*), and (Fr) Fruit (*phala*).

āvajjana : ‘advertence’ of the mind towards the object, forms the first stage in the process of consciousness (*s.viññāṇa-kicca*). If an object of the 5 physical senses is concerned, it is called ‘five-door advertence’ (*pañca dvārāvajjana*); in the case of a mental object, ‘mind-door advertence’ (*mano-dvārāvajjana*).

parikamma : [nt.] arrangement; preparation; preliminary action; plastering.

upacāra : [m.] neighbourhood; preparative or preliminary action.]

- A *Sotāpanna Anugāmi* is getting closer to the “change of lineage” or G. The earlier stages of P, U, A, may be reached gradually. Once that level of comprehension is complete, one makes that transition (G), completes the *lokuttara kamma*, and immediately receives the *phala*.
- In a strict sense, it may be better to call one a *Sotāpanna Magga Anugāmi* (one trying to get to the *magga citta*) rather than *Sotāpanna Anugāmi*.
- The eight Noble Persons (*Ariyā*) are listed in the “[WebLink: suttacentral: Pathama Puggala Sutta \(AN 8.59\)](#)” and in “[WebLink: suttacentral: Puggala Sutta \(AN 9.9\)](#).” In both *suttā*, *Sotāpanna Anugāmi* is listed as “*sotāpatti phala sacchikiriyāya paṭipanno*.” One on the way to become an *Anāgāmi* is “*anāgāmi phala sacchikiriyāya paṭipanno*,” etc. In the second *sutta*, a average human is a “*puthujjano*.”

The Eight Noble Persons

3. Thus it is clear that “*aṭṭha purisa puggalā*” consists of the eight *Ariyā* (Noble Persons) listed in #1. They are *Sotāpanna Anugāmi*, *Sotāpanna*, *Sakadāgāmi Anugāmi*, *Sakadāgāmi*, *Anāgāmi Anugāmi*, *Anāgāmi*, *Arahant Anugāmi*, and *Arahant*.

- A critical point to note is the change from being an “average human” (*puṭhujjana*) to the Noble Person (*Ariya*) status. **That transition happens at the “gotrabu” (“gotra” is the clan or lineage) before the *Sotāpanna magga/phala* transition.** See the “*Citta Vīthi* for Attainment of *Magga Phala*” section at the end of the post, “[Citta Vīthi – Processing of Sense Inputs.](#)” Also, see “[Sotāpanna Anugāmi – No More Births in the Apāyā.](#)”
- The types of *āsava* eliminated at each stage are discussed at “[The Way to Nibbāna – Removal of Āsava.](#)”
- How *lobha*, *dosa*, *moha*, and also the ten fetters (*saṃyojana*) removed at each stage are discussed in “[Relinquishing Defilements via Three Rounds and Four Stages.](#)”
- Both a *Sotāpanna Anugāmi* and a *Sotāpanna* would have “[Sotāpatti Aṅga – The Four Qualities of a Sotāpanna.](#)”

The Stages of *Magga Phala*

4. A *Sotāpanna Anugāmi*/*Sotāpanna* is someone who has seen *Nibbāna*, not the full *Nibbāna*, but a glimpse of it. One becomes a *Sotāpanna Anugāmi* when one removes *avijjā* (ignorance) about the actual status of affairs in “this world of 31 realms”; see #5 below. With that understanding, their mind is purified to the extent that it will not allow them to do an immoral act that could lead to a birth in the four lower worlds (*apāyā*). Not only that, but one will also not “latch onto” a *kamma vipāka* resulting from such a robust immoral act in the past. Thus, an *Ariya* above *Sotāpanna Anugāmi* will never be born in an *apāyā* again.

The other three stages have similar “demarcation thresholds.”

- A *Sakadāgāmi* will never again be born in the human or lower four realms. They can still be born in the *deva* worlds (i.e., in *kāma loka*.) But those *devas* do not have “flesh and blood” bodies that lead to physical discomforts and diseases. In the *deva loka*, beings have subtle bodies that are not subject to old age and diseases.
- An *Anāgāmi* has overcome any desire to be born anywhere in the *kāma loka*, i.e., the 11 lowest realms. They have no *kāma rāga* (desire for sense pleasures) or *paṭigha* (hate).
- An *Arahant* has no desire to be born anywhere in the 31 realms and thus will never be reborn “in this world.” They have attained full *Nibbāna*, full release.

5. Subsection 1.1.55. *Āsavakkhayañānaniddeśa* (toward the end of the “[WebLink: suttacentral: 1.1. Nānakathā \(Ps 1.1\)](#)” section) of the *Tipiṭaka* Commentary “*Paṭisambhidāmagga*” describes three types of *ñāṇa* attained on the way to the *Arahanthood*: “*Anaññātāññassāmītindriyaṃ kati ṭhānāni gacchati, aññindriyaṃ kati ṭhānāni gacchati, aññātāvindriyaṃ kati ṭhānāni gacchati? Anaññātāññassāmītindriyaṃ ekaṃ ṭhānaṃ gacchati—sotāpattimaggam. Aññindriyaṃ cha ṭhānāni gacchati—sotāpattiphalaṃ, sakadāgāmmaggam, sakadāgāmiphalaṃ, anāgāmmaggam, anāgāmiphalaṃ, arahattamaggam. Aññātāvindriyaṃ ekaṃ ṭhānaṃ gacchati—arahattaphalaṃ.*”

- It says the following. The first *ñāṇa* is *Anaññātāññassāmītindriya* attained at the *Sotāpanna Anugāmi* stage. The second one, *Aññindriya*, is attained and optimized at the intermediate six stages (*sotāpattiphala* through *arahattamagga*.) The third one, *Aññātāvindriya*, is attained at the *Arahant phala* moment.
- Thus, something definitive occurs when one gets to the *Sotāpanna Anugāmi* stage.

It Is a Step-by-Step Process

6. One must first hear the Buddha's real message before one can fulfill the conditions to attain the *Sotāpanna* stage. Thus, they need to go beyond the mundane eightfold path; see "[Buddha Dhamma – In a Chart](#)."

- In particular, a *Sotāpanna Anugāmi* (or *Sotāpanna Magga Anugāmika* or *Sotāpanna Magga Anugāmi*) has heard about *anicca, dukkha, anatta* (*Tilakkhaṇa*), or the "true nature of this world with 31 realms." Of course, those concepts must come from a Noble Person who has grasped the basic idea.
- That is why the association with a "*kalyāṇa mitta*" or "*kalyāṇa mitra*" (basically a "Noble friend," i.e., an *Ariya*) is a pre-condition for attaining the *Sotāpanna* stage; see, "[Four Conditions for Attaining Sotāpanna Magga/Phala](#)."
- Once attaining the *Sotāpanna anugāmi*, one becomes a Noble Person (one of the *aṭṭha purisa puggala*), and thus is free from the *apāyā*, see "[Sotāpanna Anugāmi – No More Births in the Apāyā](#)."

Difference Between *Sotāpanna Magga Anugāmi* and a *Sotāpanna*

7. Let us take a simile to see this "demarcation" between *Sotāpanna Magga Anugāmi* and a *Sotāpanna*.

- Suppose that a precious treasure is known to be at the peak of a mountain. But it is not generally known where that mountain is. That is pretty much the status of Buddha Dhamma today. Most people know that it is valuable but they do not know what the correct version among the many different versions put forth today.
- As the Buddha said in his first sermon, "my Dhamma has not been known to the world before." Thus one needs a Buddha or a true disciple of Buddha to show them what *Nibbāna* is and how to get to the *Sotāpanna* stage. That is an essential and critical point.
- Suppose someone gets directions to the correct mountain with the treasure. Then they know which country to go to and which geographic location in that country the mountain is. **This person is like one on the path to becoming a *Sotāpanna*, i.e., a *Sotāpanna Magga Anugāmi*.** They know exactly where to go and have a detailed map. And they have to get it from a Buddha or a true disciple of a Buddha. A true disciple has at least seen the mountain (a *Sotāpanna*), if not been to the top (an *Arahant*).
- Now they make the journey to the country and region where the mountain is. On the way there, they can verify the landmarks given by the "friend" (an *Ariya*). Similarly, a *Sotāpanna Magga Anugāmi* spends time contemplating the newly learned concepts of *anicca, dukkha, anatta, Paṭicca Samuppāda*, etc.
- Thus, with confidence, the person gets closer and closer to the mountain and starts seeing the mountain at some point. **At that point, the person has "crossed the boundary" to become a *Sotāpanna*.** They have seen a glimpse of *Nibbāna* for the first time. Now they can complete the journey without any help, even if the physical map is lost (i.e., even in a future life).

An Analogy

8. Going back to the simile of the mountain with treasure, different versions of "Buddhism" identify the mountain as being in different geographic locations. So people travel long distances and much effort to reach various mountains. All these are in remote places, and the journey is hard.

- Many people are wasting their time and effort targeting the "wrong mountain." So, how does one know which "mountain" or version to pick? That is why it takes effort to weed out the wrong/incompatible versions of Buddha Dhamma; see, "[Why is it Critical to Find the Pure Buddha Dhamma?](#)."

Grasping the *Anicca* (Unfruitful) Nature of This World

9. In technical terms, one gets to the *Sotāpanna magga/phala* when one understands *anicca*, *dukkha*, and *anatta* (the three characteristics of this world or *Tilakkhaṇa*) to a minimum level, where one begins to realize that there is nothing in “this world” that can provide meaningful and unconditioned happiness.

- When one comprehends *anicca*, *dukkha*, and *anatta* to the extent that one can “see” this concept, **one is said to have the “*anuloma ñāṇa*.”** Here, “*anu*” means “through the understanding of *Tilakkhaṇa*,” “*lo*” means “craving for worldly things,” and “*ma*” means “removal,” and thus “*anuloma*” means “removal of craving for worldly things to some extent via the comprehension of *Tilakkhaṇa*.”
- We came across “*anu*” also in “*anupassanā*”; see, “[4. What do all these Different Meditation Techniques Mean?](#).” In a previous post, I also discussed how “*lobha*” comes from “*lo*” + “*bha*” or “immersed in craving for worldly things.”
- Thus it makes a huge difference if one incorrectly interprets *anicca* as “impermanence” and *anatta* as “no-self”; see, “[Anicca, Dukkha, Anatta – Wrong Interpretations.](#)”

10. Suffering is prevalent in the lower four realms (*apāyā*). We can see at least one of those, the animal realm. Let us discuss one way to contemplate *anicca*, *dukkha*, and *anatta* using an example from this life.

- When young, it seems like one can get anything one wants by working hard. But we all have seen how our parents, grandparents, or even famous people spent their old age suffering from various ailments, and finally dying helplessly.
- They may have “accomplished” many things. But they spend their whole lives working hard to achieve those, and then they have to leave it all behind.
- One may have a beautiful body when young, but for how long? We can see how that old movie star ages now. Some of them commit suicide because it is depressing to remember the “good old days” when one had all the attention in the world, but now it all seems to be slipping away.
- That is *anicca* and *anatta*. No matter how much we try, whatever we gain in this world lasts only a short time (in the *sansāric* time scale), and one becomes helpless in the long run. At some point, one realizes this and becomes distraught.

One Creates One's Own Future Suffering

11. When one comprehends the true nature of this world, such sad thoughts do not arise. People who follow the Path and even those who have wisdom from previous lives (*gati*) can realize that “all things in this world” are subjected to this arising/destruction process. Beings come to existence and die. But those existence are “created” by oneself. See, “[Origin of Life – One Creates One's Own Future Lives.](#)”

- That understanding itself leads to ease of mind. A stronger version of this “ease of mind” is the “*anuloma khantī*” that one experiences when attaining the “*anuloma ñāṇa*” (pronounced “*anuloma gnana*”). [*anulomikāya khantiyā samannāgata* (being of gentle and forbearing disposition)]
- The key to attaining the “*anuloma ñāṇa*” is to realize the fleeting nature of anything in this world. The next post discusses this.

Anuloma Ñāṇa and Sammatta Niyāma

12. With the “*anuloma ñāṇa*,” one realizes that permanently getting rid of suffering is impossible anywhere in the 31 realms. It can be achieved only by attaining *Nibbāna*. By this time, one has felt the *nirāmisā sukha*, and thus one needs to cultivate, “*etaṃ santaṃ etaṃ paṇītaṃ...*” the release one has felt, and the value of *Nibbāna*. Then one truly embarks on the Noble Eightfold Path and is said to get to “*sammatta niyāma*” and to *Sotāpanna phala*. [“*etaṃ santaṃ etaṃ paṇītaṃ yadidaṃ sabbasaṅkhārasamatho sabbūpadhipaṭinissaggo taṇhākkhayo virāgo nirodho Nibbānan'ti.*” [WebLink: suttacentral: AN 9.36 : Jhānasutta](#), [WebLink: suttacentral: AN 10.6 : Samādhisutta](#), [WebLink: suttacentral: AN 3.32 : Ānandasutta](#), [WebLink: suttacentral: AN 11.8 : Manasikārasutta](#), [WebLink: suttacentral: AN 11.7 : Saññāsutta](#), [WebLink:](#)

[suttacentral: AN 10.60 : Girimānandasutta](#)] [It is peaceful, it is serene, the expelling of all *saṅkhāra*, breaking of bonds, removing greed and hate; *Nibbāna*] [*sammatta*: [abstr. fr. *sammā*] the ‘state of rightness’, are the 8 links of the 8-fold Path.]

- Therefore, it is critical to realize BOTH the unfruitful nature of this world with “*anuloma ñāṇa*,” AND to realize the value and cooling down due to *Nibbāna*, i.e., “*sammatta niyāma*.”
- Further details in the post, “[Anuloma Khanti and Sammattaniyāma – Pre-requisites for a Sotāpanna](#).”

13. Thus it is critical to understand that *Nibbāna* is “*nicca, sukha, atta*,” after realizing that this world is “*anicca, dukkha, anatta*.” A *Sotāpanna* has understood both.

- Anything in this world (except *nāmagotta*) is a *saṅkhata*, i.e., it comes into being due to causes, stays in existence for a time, and then inevitably is destroyed. The arising of a *saṅkhata* is called “*udaya*” in Pāli, and the destruction is called “*vaya*.” Thus, “*udayavaya ñāṇa*” is the knowledge about that process.
- *Nibbāna* is the only *asaṅkhata*. Removal of all causes leads to *Nibbāna*.
- Many people have even attained the *Arahanthood* without actually having heard about these terms like “*udayavaya*” or “*anuloma*.” Thus it is imperative to realize that just reading about these concepts does not get one anywhere. One needs to “see” the *Tilakkhaṇa* or the unfruitfulness of craving for *saṅkhata* (through *saṅkhāra*) by true meditation or contemplation.
- Thus a *Sotāpanna* has the *udayavaya* (sometimes called *udayabbaya*) *ñāṇa*; see, “[Udayavaya Ñāṇa](#).”

Next, “[Four Conditions for Attaining Sotāpanna Magga/Phala](#)”,

7.4.5 Sotāpanna Anugāmi – No More Births in the Apāyā

February 11, 2019; revised February 12, 2019; September 4, 2019; April 12, 2020; major revision August 29, 2022

A human who attains a *magga phala* will never be reborn in an *apāya* (one of the four lowest realms). An *Arahant* will not be reborn in any realm. An *Anāgāmī* will be reborn only in a *Brahma* realm. A *Sakadāgāmī* is born only in a *deva* realm. A *Sotāpanna* only in *deva* or human realm. A *Sotāpanna Anugāmi* is also free of the *apāyā*. Here, we discuss the evidence from the *Tipiṭaka* that is indeed the case.

Eight Types of Noble Persons

1. The “[WebLink: suttacentral: Patipanna Sutta \(SN 48.18\)](#)” describes the eight types of Noble Persons:

“*Pañcimāni, bhikkhave, indriyāni. Katamāni pañca? Saddhindriyaṃ ... pe ... paññindriyaṃ—imāni kho, bhikkhave, pañcindriyāni. Imesaṃ kho, bhikkhave, pañcannaṃ indriyānaṃ samattā paripūrattā araham hoti, tato mudutarehi arahattaphalasacchikiriyāya paṭipanno hoti, tato mudutarehi anāgāmī hoti, tato mudutarehi anāgāmiphalasacchikiriyāya paṭipanno hoti, tato mudutarehi sakadāgāmī hoti, tato mudutarehi sakadāgāmiphalasacchikiriyāya paṭipanno hoti, tato mudutarehi sotāpanno hoti, tato mudutarehi sotāpattiphalasacchikiriyāya paṭipanno hoti. Yassa kho, bhikkhave, imāni pañcindriyāni sabbena sabbam sabbathā sabbam natthi, tamaham ‘bāhiro puthujjanapakkhe tito’ti vadāmī’ ti.*”

Translated:

“*Bhikkhus*, there are five *indriya* (faculties): *Saddhindriya*, *vīriyindriya*, *satindriya*, *samādhindriya*, *paññindriya*. Someone who has fully cultivated them is *Arahant*. One who developed them less is an *Arahant Anugāmi*. One who has even less is an *Anāgāmī*,.. *Anāgāmī Anugāmi*, ..*Sakadāgāmī*, ... *Sakadāgāmī Anugāmi*, ...*Sotāpanna*, ...***Sotāpanna Anugāmi***. Those who have not yet begun to cultivate the five faculties are ignorant humans (*puthujjanabhūmi*) who are unaware of the true nature (*Tilakkhaṇa*).

- One on the way to becoming an *Anāgāmī* is “*anāgāmī phala sacchikīriyāya paṭipanno*,” etc. One on the way to become a *Sotāpanna* (or *Sotāpanna Anugāmi*) is “*sotāpattiphalasacchikīriyāya paṭipanno*.”
- The eight Noble Persons (*Ariyā*) are also listed in other *suttā* too including “[WebLink: suttacentral: Paṭhama Puggala Sutta \(AN 8.59\)](#)” and in “[WebLink: suttacentral: Puggala Sutta \(AN 9.9\)](#).”

Sotāpanna Anugāmi* is *Dhammānusārī* or *Saddhānusārī

2. An important way of classification of the Noble Persons (*Ariyā*) relevant to our topic is given in the “[WebLink: suttacentral: Tatiyasankhita Sutta \(SN 48.14\)](#)”:

“*Pañcimāni, bhikkhave, indriyāni. Katamāni pañca? Saddhindriyaṃ ... pe ... paññindriyaṃ—imāni kho, bhikkhave, pañcindriyāni. Imesaṃ kho, bhikkhave, pañcannaṃ indriyānaṃ samattā paripūrattā araham hoti, tato mudutarehi anāgāmī hoti, tato mudutarehi sakadāgāmī hoti, tato mudutarehi sotāpanno hoti, tato mudutarehi dhammānusārī hoti, tato mudutarehi saddhānusārī hoti. Iti kho, bhikkhave, paripūraṃ paripūrakārī ārādheti, padesaṃ padesakārī ārādheti. ‘Avañjhāni tvevāhaṃ, bhikkhave, pañcindriyāni’ ti vadāmi*” ti.

Translated:

“*Bhikkhus, there are five indriya: Saddhindriya, vīriyindriya, satindriya, samādhindriya, paññindriya. One who has fully cultivated them is an Arahant. One who developed them less is an Anāgāmī, Sakadāgāmī, ...Sotāpanna, ...dhammānusārī, ...saddhānusārī, .*”

3. From #1 and #2 above, we can see that a *Sotāpanna Anugāmi* is either a *dhammānusārī* or a *saddhānusārī*.

- This is confirmed in the following *sutta*, which also confirms that one MUST start comprehending the *anicca* nature to become a *Sotāpanna Anugāmi*.

More on *Dhammānusārī* or *Saddhānusārī*

4. From the “[WebLink: suttacentral: Cakkhu Sutta \(SN 25.1\)](#)”:

“*Cakkhuṃ, bhikkhave, aniccaṃ vipariṇāmi aññathābhāvi; sotaṃ aniccaṃ vipariṇāmi aññathābhāvi; ghāṇaṃ aniccaṃ vipariṇāmi aññathābhāvi; jivhā aniccaṃ vipariṇāmi aññathābhāvi; kāyo aniccaṃ vipariṇāmi aññathābhāvi; mano aniccaṃ vipariṇāmi aññathābhāvi. Yo, bhikkhave, ime dhamme evaṃ saddahati adhimuccati—ayaṃ vuccati saddhānusārī, okkanto sammattaniyāmaṃ, sappurisabhūmiṃ okkanto, vītivatto puthujjanabhūmiṃ; abhabbo taṃ kammaṃ kātuṃ, yaṃ kammaṃ katvā nirayaṃ vā tiracchānayoniṃ vā pettivisayaṃ vā upapajjeyya; abhabbo catāva kālaṃ kātuṃ yāva na sotāpattiphalāṃ sacchikaroti.*

Yassa kho, bhikkhave, ime dhammā evaṃ paññāya mattaso nijjhānaṃ khamanti, ayaṃ vuccati: ‘dhammānusārī, okkanto sammattaniyāmaṃ, sappurisabhūmiṃ okkanto, vītivatto puthujjanabhūmiṃ; abhabbo taṃ kammaṃ kātuṃ, yaṃ kammaṃ katvā nirayaṃ vā tiracchānayoniṃ vā pettivisayaṃ vā upapajjeyya; abhabbo ca tāva kālaṃ kātuṃ yāva na sotāpattiphalāṃ sacchikaroti’.

Yo, bhikkhave, ime dhamme evaṃ pajānāti evaṃ passati, ayaṃ vuccati: ‘sotāpanno avinipātadhammo niyato sambodhiparāyano’” ti.

Translated:

“*Bhikkhus, cakkhu is of anicca nature, will cease to exist and is subject to unexpected change during its existence* (same for sota, ghāṇa, jivhā, kāyo, mano).

– One who believes these phenomena are this way is called a faith-follower (*saddhānusārī*). He/She has entered the Noble plane (*sammattaniyāmaṃ*), has entered the realm of Noble Persons (*sappurisabhūmiṃ*), and transcended the realm of the humans who are unaware of the true nature (*puthujjanabhūmiṃ*). He is incapable of doing any deed by which he might be reborn in hell, in the animal womb, or in the realm of hungry ghosts. **A *saddhānusārī* is incapable of dying (separating) from that Noble birth until he realizes the *Sotāpanna* stage (and thus eventually gets to the *Arahant* stage).**

After pondering with wisdom, one who has accepted that these phenomena are this way is called a Dhamma-follower (*dhammānusārī*)...” (The rest is the same as for a *saddhānusārī*).

One who knows and sees that these phenomena are this way is called a *Sotāpanna*. He is never again to be born in the *apāyā*, headed for the *Arahanthood*.”

- Notes that 11 *suttā* (AN 25.1 through AN 25. 10) state the same in various ways.

***Sotāpanna Anugāmi* Would Not “Die” From *Ariya* Birth**

5. Therefore, from the above *suttā*, we can make the following deductions:

- A *Sotāpanna* is never again to be born in the *apāyā* and is headed for *Arahanthood*.
- A *Sotāpanna Anugāmi* is either a *dhammānusārī* or a *saddhānusārī*.
- In #4 above: “**A *saddhānusārī* (or a *dhammānusārī*) is incapable of “dying” (separating) from that Noble birth until he realizes the *Sotāpanna* stage.**” That does not mean a *Sotāpanna Anugāmi* will attain the *Sotāpanna* stage within that lifetime. Once “born as a Noble Person” one will not die from that **Noble birth**, i.e., one WILL get to the *Arahant* stage without ever getting a rebirth in the *apāyā*.
- So, a *Sotāpanna Anugāmi* may be born many times a human until getting to the *Sotāpanna* stage (may even have many human *bhava*, each with many human *jāti*).
- Once getting to the *Sotāpanna* stage, there would be only seven maximum number of “*bhava*” left, within which one WILL attain the *Arahant* stage.

Who Have *Avecca Pasāda*?

6. Another *sutta* that provides more information is “[WebLink: suttacentral: Pathamasaranānisakka Sutta \(SN 55.24\).](#)” It is a long *sutta*, and a reasonably good translation at, “[WebLink: accesstoinsight.org: Sarakāṇi Sutta: Sarakāṇi \(Who Took to Drink\).](#)”

Here are the relevant verses, which again describe the types of Noble Persons:

- (1). “Mahānāma, take the case of a person **endowed with unwavering devotion (*avecca pasāda*)** to the Buddha (*heva kho buddhe aveccappasādena samannāgato hoti*), the Dhamma, the Saṅgha, and has attained the *Arahanthood*. By the destruction of defilements he has gained release through wisdom, in this very life. The man is entirely released from the hell-state, from rebirth as an animal. He is free from the *apāyā*.
- (2). “Take the case of another man. He has **unwavering devotion (*avecca pasāda*)** to the Buddha, the Dhamma, and the Saṅgha. He has wisdom but has not yet gained full release, but has destroyed the five lower *saṃyojanā* (**an *Anāgāmi***). Upon death, he will be reborn spontaneously in a *Brahma* realm where he will attain *Nibbāna* without returning from that world. That man is also entirely released from the *apāyā*.
- (3). “Take the case of another man. He has **unwavering devotion (*avecca pasāda*)** to the Buddha, the Dhamma, and the Saṅgha. He has wisdom, but has not yet gained release. By destroying the first three *saṃyojanā* and weakening *kāma rāga*, *paṭigha*, and *avijjā*, he is a Once-returner

(*Sakadāgāmi*), who will return once more to this *kāma loka*. That man is entirely freed from the *apāyā*.

- (4). “Take the case of another man. He is **endowed with unwavering devotion (*avecca pasāda*)** to the Buddha, the Dhamma, and the Saṅgha. He has the wisdom but has not gained release. By destroying three fetters, he is a Stream-Winner (*Sotāpanna*), not subject to rebirth in *apāyā*, assured of *Nibbāna*. That man is entirely freed from the *apāyā*.

Sotāpanna Anugāmi Does Not Have Avecca Pasāda

- (5). “Take the case of another man. He **does not have unwavering devotion (*avecca pasāda*)** to the Buddha (*na heva kho buddhe aveccappasādena samannāgato hoti*), the Dhamma, the Saṅgha. He has not yet gained wisdom and has not gained release. **But he has the following things to some extent:** the faculty of faith, energy, mindfulness, concentration, wisdom (*saddhā indriya, viriya indriya, sati indriya, samādhi indriya, paññā indriya*). He understands with insight, **at least moderately**, the dhamma of the *Tathāgata*. **That man does not go to *apāyā*.**
- (6). “Take the case of another man. He does not have **unwavering devotion (*avecca pasāda*)** to the Buddha, the Dhamma, or the Saṅgha. He is not joyous and swift in wisdom and has not gained release. **But he has the following things to some extent:** the faculty of faith, energy, mindfulness, concentration, and wisdom (*saddhā indriya, viriya indriya, sati indriya, samādhi indriya, paññā indriya*). He understands with insight, **at least slightly**, the dhamma of the *Tathāgata*. **He too will not go to the *apāyā*.**

Sotāpanna Anugāmi is Also Free of Apāyā

7. Note that in #6 above, for **each of the four *magga phala***:

“*Ayampi kho, mahānāma, puggalo parimutto nirayā parimutto tiracchānayaniyā parimutto pettivisayā parimutto apāyaduggativinipātā.*”

“..That man is **entirely free**... from the *apāyā*.”

- **For the last two types (*Sotāpanna Anugāmi*):**

“*Ayampi kho, mahānāma, puggalo agantā nirayaṃ agantā tiracchānayaṇiṃ agantā pettivisayaṃ agantā apāyaṃ duggatiṃ vinipātāṃ.*”

“..That man **does not go to the *apāyā*.**”

- Taken together with the statements in the *suttā* discussed above, that means the following. **A *Sotāpanna Anugāmi* is also effectively released permanently from the *apāyā*.**

What is *Avecca Pasāda*?

8. A key phrase in many of the *suttā* is *avecca pasāda*. It is frequently translated as “unwavering devotion,” as in the above translation. But it has a deeper meaning.

- *Pasāda* means a combination of “trust, faith, reverence.”
- That comes when one understands the deeper meanings in Buddha Dhamma. In particular, when one starts comprehending *Tilakkhaṇa*, one can begin to see the unfruitfulness AND danger in trying to seek happiness in this world of 31 realms.
- **Then one starts losing cravings (“*ava*” + “*icca*”) for worldly things.** We remember that *anicca* is “*na icca*”; see, “[Anicca – True Meaning](#).” [*avecca* :[adv.] certainly; definitely; absolutely; perfectly; having known.]

- Therefore, *avecca pasāda* or “unwavering faith” is connected to realizing the *anicca* nature or the “unsatisfactory nature” of worldly things. That craving for worldly things leads to suffering (*dukkha*). And that in the end, leads to one becoming helpless (*anatta*), especially when born in the *apāyā*.
- One establishes *avecca pasāda* or “unwavering faith” in the Buddha, Dhamma, and Saṅgha, when one starts to comprehend *Tilakkhaṇa*.

Four qualities of a *Sotāpanna*

9. Four qualities of a *Sotāpanna* are in all *suttā* in the [WebLink: suttacentral: Sotāpatti Saṃyutta \(SN 55.1 ~ 55.74\)](#) of the *Saṃyutta Nikāya* (SN). The “[WebLink: suttacentral: Brahmacariyogadha Sutta \(SN 55.2\)](#)” has a concise statement about the qualities or qualifications of a *Sotāpanna*.

“*Catūhi, bhikkhave, dhammehi samannāgato ariyasāvako sotāpanno* *hoti avinipātadhammo niyato sambodhiparāyaṇo.*”

Katamehi catūhi? Idha, bhikkhave, ariyasāvako buddhe aveccappasādena samannāgato hoti: ‘Itipi so bhagavā araham sammāsambuddho vijjācaraṇasampanno sugato lokavidū anuttaro purisadammasārathi satthā devamanussānaṃ buddho bhagavā’ti. Dhamme ... pe ... saṅghe ... pe ... ariyakantehi sīlehi samannāgato hoti akhaṇḍehi ... pe ... samādhisaṃvattanikehi. Imehi kho, bhikkhave, catūhi dhammehi samannāgato ariyasāvako sotāpanno hoti avinipātadhammo niyato sambodhiparāyaṇo’ti.”

Translated:

A *Sotāpanna*, never again to be born in the *apāyā*, has acquired four qualities:

- (1). He has ***avecca pasāda in the Buddha***, i.e., he understands the following verse. “*Itipi so bhagavā araham sammāsambuddho vijjācaraṇasampanno sugato lokavidū anuttaro purisadammasārathi satthā devamanussānaṃ buddho bhagavā’ti.*”
- (2). He has ***avecca pasāda in the Dhamma***, i.e., he understands the following verse. “*Svākkhātā bhagavatā dhammo sandiṭṭhiko akāliko ehipassiko opaneyyiko paccattaṃ veditabbo viññūhi’ti.*”
- (3). He has ***avecca pasāda in the Saṅgha***, i.e., he understands the following verse. “*Suppaṭipanno bhagavato sāvakaṣaṅgho, ujuppaṭipanno bhagavato sāvakaṣaṅgho, ñāyappaṭipanno bhagavato sāvakaṣaṅgho, sāmīcippaṭipanno bhagavato sāvakaṣaṅgho, yadidaṃ—cattāri purisayugāni aṭṭha purisapuggalā, esa bhagavato sāvakaṣaṅgho āhuneyyo pāhuneyyo dakkhiṇeyyo añjalikaraṇīyo anuttaraṃ puññakkhettaṃ lokassā’ti.*”
- (4). He has the ***Ariyakantha sīla*** of the noble ones. It comes with penetrating wisdom and is unbreakable. It leads to *samādhi*.

“*Ariyakantehi sīlehi samannāgato hoti akhaṇḍehi acchiddehi asabalehi akammāsehi bhujissehi viññuppasatthehi aparāmaṭṭhehi samādhisaṃvattanikehi.*”

“*Ariyakantehi* [with agreeable to the *Ariyā*] *sīlehi* [with ethical conduct] *samannāgato* [endowed with] [endowed with noble’s ethical conduct] *hoti akhaṇḍehi* [unbroken] *acchiddehi* [impeccable or faultless] *asabalehi* [spotless] *akammāsehi* [unmarred] *bhujissehi* [liberating] *viññuppasatthehi* [praised by sensible people] *aparāmaṭṭhehi* [not mistaken] *samādhisaṃvattanikehi.*”

Recital Is Not Enough

10. We note that those first three verses are the same as those in the supreme qualities of the Buddha, Dhamma, and Saṅgha; see, “[Supreme Qualities of Buddha, Dhamma, Saṅgha.](#)”

- Therefore, those verses are not just for recitation. They **must be recited with UNDERSTANDING** before any serious meditation session.

- From #4 and #5 above, we see that one gets a “Noble birth” when attaining the *Sotāpanna Anugāmi* stage. A *Sotāpanna Anugāmi* is one of the “*attha purisa puggalā*.”

The four qualities of a *Sotāpanna* are discussed in “[Sotāpatti Aṅga – The Four Qualities of a Sotāpanna](#).” [*aṅga* : [nt.] 1. a constituent part; 2. a limb; 3. quality.]

7.4.6 Four Conditions for Attaining Sotāpanna Magga/Phala

Revised March 22, 2016; Revised on September 22, 2017, June 28, 2019; November 4, 2021; November 25, 2021 (#3); September 17, 2022

1. In many *suttā*, including [WebLink: suttacentral: Sotāpattiphala Sutta \(SN 55.55\)](#) and [WebLink: suttacentral: Duttiya Sariputta Sutta \(SN 55.5\)](#), the four requirements for someone to attain the *Sotāpanna* stage of *Nibbāna* are stated: “*Cattārome, bhikkhave, dhammā bhāvitā bahulikātā sotāpattiphalasacchikiriyāya saṁvattanti. Katame cattāro? Sappurisasamsevo, saddhammassavanam, yonisomanasikāro, dhammānudhammappaṭipatti.*”

- Association with “*sappurisa* (*sath + purisa* or “Noble friend,” i.e., an *Ariya*),” sometimes called a “[Weblink: en.wikipedia.org: kalyāṇa mittā](#)” (“*Kalyāṇa Mitra*” in Sanskrit.)
- Listening to Dhamma discourses (while reading is enough to get to the *Sotāpanna Anugāmi* stage, listening is necessary to attain the *Sotāpanna* stage, see #3 below).
- Act with *Yoniso manasikāra* (basic idea of *anicca*, *dukkha*, *anatta*, and *Paṭicca Samuppāda*).
- *Dhammanudhamma patipadā* (following the Noble Path, which is beyond the mundane path; see, “[What is Unique in Buddha Dhamma?](#).”)

When someone starts fulfilling the above conditions one becomes a *Sotāpanna magga anugāmi* (or *Sotāpanna magga anugāmika*); see, “[Sotāpanna Anugāmi and a Sotāpanna](#).”

- During this process, one removes three of the ten *saṁyojana* (or *sanyojana* or “mental bonds”). The ten bonds are those that bind one to the cycle of rebirth; see, “[Relinquishing Defilements via Three Rounds and Four Stages](#).”

2. It is imperative to understand what the Buddha meant by “my Dhamma has not been known to the world.” Most people follow what they deem to be “Buddhism.” I strongly advise reading the following posts and spending some time thinking about this issue:

“[What is Buddha Dhamma?](#)”

“[Buddha Dhamma – In a Chart](#)” and the discussion at “[What is Unique in Buddha Dhamma?](#).”

- As discussed in those posts, one becomes a *Sotāpanna magga anugāmi* after progressing on the mundane (*lokiya*) eightfold path. That is when one embarks on the Noble Eightfold Path.
- As I pointed out in many posts, one on the mundane path abstains from immoral deeds out of fear of bad outcomes. **But when one starts comprehending *Tilakkhaṇa* (*anicca*, *dukkha*, *anatta*), one starts avoiding such deeds because one sees the futility of such acts. What is the point in hurting others to acquire sensory pleasures that, in the end, do not provide any lasting happiness?**

3. **November 25, 2021:** Previously, I had stated that one could learn about *Tilakkhaṇa* by reading these days. That is still true, and one could become a *Sotāpanna anugāmi* by listening or reading.

- I just listened to a recorded *desanā* by the Waharaka *Thēro*. This *desanā* is quite comprehensive and provides a detailed description of a *sotadvāra citta vūthi* that is REQUIRED for attaining the *Sotāpanna phala*. It explains that a *Sotāpanna anugāmi* attains the *Sotāpanna* stage only while listening to a *desanā* by an *Ariya* (a Noble person, i.e., one with at least the *Sotāpanna* stage).

- A *Sotadvāra citta vīthi* of an *Ariya* (during a *desanā*) has the necessary *javana* power to act as a trigger. I am trying to find a *Tipiṭaka* reference, and I would appreciate receiving it from anyone who has that information. I will edit this post to include that reference when I see it.
- The *javana* power in such a *sotadvāra citta vīthi* is necessary to fulfill the requirement of *saddhammassavanam* (*saddhamma* + *savanam* or “listening to Dhamma”) as one condition, as in #1 above. It is a deep analysis; I will try to write it when enough background material is covered.
- Here is the *desanā* in Sinhala language:

[WebLink: PureDhamma mp3: සද්දාමස කවච්ඡංග-සමථිත්තථලය-ලබ්ඪි-මනඤ්චර-චිත්තචිතිය-පිලිබ්දව-පාහුදිලිකිරීම-1](#)

- There is still an open question of whether a recorded *desanā* would fulfill the condition. In a separate *desanā* Waharaka *Thēro* has mentioned that listening to a recorded *desanā* should count, per his opinion.
- However, even if a *Sotāpanna Anugāmi* does not get to the *Sotāpanna* stage in this life, he/she WILL attain the *Sotāpanna phala* in a future life. A *Sotāpanna Anugāmi* is a Noble Person and is free of the *apāyā*; see, “[Sotāpanna Anugāmi – No More Births in the Apāyā.](#)”

4. When one contemplates the above, one first needs to find out WHY the Buddha said: “this wider world of 31 realms” has much suffering. Sensory pleasures keep us bound to the *kāma loka* and often to the four *apāyā*. That is the First Noble Truth.

- The Buddha also said that **if one comprehends the First Noble Truth, one will automatically understand the other three.** That essential vision or the first inkling of “*Sammā Ditṭhi*” is critical.
- One gets on the Noble Eightfold Path with a rough idea about this vision, i.e., *anicca*, *dukkha*, and *anatta*. Now one is a *Sotāpanna Magga Anugāmi*. As one comprehends these fundamental characteristics of our world **while listening to a *desanā* by an *Ariya***, one will get to the *Sotāpanna* stage by attaining the *Sotāpanna magga* and *Sotāpanna phala* virtually simultaneously (in the same *citta vīthi*); see, “[Sotāpanna Anugāmi and a Sotāpanna.](#)”
- When one gets to the *Sotāpanna* stage, one comprehends the First Noble Truth, and thus all four Noble Truths to some extent; one has “seen” *Nibbāna*. Now, one does not need any help to get to *Nibbāna* (to “fully experience it”) because one sees the whole Path and knows how to get there.

5. With that in mind, it is easier to grasp why the Buddha emphasized the importance of those four conditions. **First, since Buddha’s message is unique, it has to come from a Buddha or “someone whose knowledge traces back to the Buddha.”** The following is an analogy given in the *suttā*.

6. The Buddha can be compared to a great tree, standing tall and firm. All other humans are like “climbers” that need a tree to “climb up.” Such climbers do not have strong enough stems, so they cannot stand erect on their own. They need the support of another plant or a stick to stand. Those plants are called climbers. Climbers have tendrils to hold the supporting plant or a post. Following are some examples.

- Let us think of a forest with numerous climbers but only one tree and no other supports such as sticks. The only way for a climber to “climb up” would be to get hold of that tree.
- Only climbers close to the tree can get hold of it and climb. But now others can get hold of them and climb too. Thus, as more and more climbers start climbing, the “access area” grows.
- Therefore, if we can find a climber climbing up, we can ALWAYS trace it back to the original tree. **In the same way, an Ariya or a Noble person (a Sotāpanna, Sakadāgāmī, Anāgāmī, or Arahant) can ALWAYS be traced back in lineage to the Buddha.**
- Because the message is unique, it has to come from the Buddha himself or someone whose lineage is traceable to the Buddha. One cannot attain even the *Sotāpanna* stage without hearing the correct message. Someone aspiring to become an *Ariya* MUST hear that Dhamma from another *Ariya*; see [“Buddha Dhamma – In a Chart.”](#)

7. Now, we can see the logic of the first two conditions. One has to learn Dhamma (the correct version), AND thus it has to come from an *Ariya* (Noble) person.

- The phrase “*kalyāṇa mitrā*” is Sanskrit; in Pāli it is “*kalyāṇa mittā*” (pronounced “miththā”), for “a friend who helps to remove defilements” (“*kāla*” is for “dirty” or “blackish” as in “dirty water” and “*na*” is for “removing”).
- Many people take “*kalyāṇa mitrā*” to be a “good friend” in the conventional sense. But it is more than just “good”; *one needs to know the message of the Buddha to convey it to others.*
- And, of course, one has listened to this correct message or read about it and then GRASP it.

8. One time, Ven. Ānanda, who was the personal assistant to the Buddha for many years, in the end, approached the Buddha and said, “*Bhante* (Venerable Sir), I have been thinking that the future of the Buddha *Sāsana* (doctrine) must be dependent at least 50% on the *kalyāṇa mittā*.” [*kalyāṇamittā*]

- **The Buddha replied, “Ānanda, do not say that. The Buddha *Sāsana* will depend 100% on the *kalyāṇa mittā*.”** Now we can see why. [[WebLink: suttacentral: Saṃyutta Nikāya 3.18 Good Friends - Kalyāṇamittasutta](#)]
- If that lineage breaks, then that is the end of the Buddha *Sāsana*. The words may still be there, but there will be no one to explain the true meanings of the keywords, including *anicca*, *dukkha*, and *anatta*.
- However, the Buddha has stated that his Buddha *Sāsana* will be there for 5000 years, so we are only halfway through. There would be periods of “famine” within which *Ariyā* would be few. But there will also be times when Buddha *Sāsana* will shine with numerous *Ariyā* in the world.

- The key here is once-in-a-while, a “*jāti Sotāpanna*” is born who has fulfilled his *pāramitā* to bring back the message of the Buddha-like Venerable Mahinda about 600 years after the Buddha. They are not only *jāti Sotāpannā*, but have the “*paṭisambhidā ñāṇa*” to figure out the true meanings of key Pāli words, such as *anicca*, *dukkha*, *anatta*, and *Paṭicca Samuppāda*.
- I believe this is such a time. It is still too early to discuss the details, but there many *Ariyā* in Sri Lanka and even in other countries, thanks in large part to Waharaka Thero: “[Parinibbāna of Waharaka Thero](#).”
- Many “climbers” worldwide have already started “climbing up.” I am encouraged by emails from many reading this website on their joy in comprehending the “pure Dhamma.”

9. **The third condition is to “act with *yoniso manasikāra*.”** Here “*yonī*” means “origin,” “*so*” means “oneself,” and “*manasikāra*” here means “with this in mind.”

- The *Vibhangapakarana* (Book 2, p. 234) explains *ayoniso manasikāra* as “perceiving *anicca* as *nicca*, *dukkha* as *sukha*, and *anatta* as *atta*.” Thus acting with *yoniso manasikāra* requires comprehending *anicca*, *dukkha*, *anatta*.
- To state that briefly, if one believes that things in this world can provide happiness in the long run, then one acts with *ayoniso manasikāra*. To act with *yoniso manasikāra* is to see the unfruitfulness of these struggles to attain something that is not attainable, and thus to work diligently towards at least the *Sotāpanna* stage because this life is so short.
- **But a more direct can be seen when one can see the “origins of various births or *jāti*” (i.e., rebirths).** “*Yonī*” in Pāli and Sinhala means the birth canal; thus, *yoniso manasikāra* means the “understanding of origins”: One with *yoniso manasikāra* knows the causes that lead to births in various realms, i.e., “*bhava*” and “*jāti*” are according to one’s *gati*; see, “[Gati to Bhava to Jāti – Ours to Control](#).”
- With that understanding, one will be motivated to cultivate “*gati*” to make good decisions, either automatically or by contemplating them. In other words, one can make better judgements about morality and act with *paññā* (wisdom).
- Even more importantly, one will automatically avoid those deeds that can lead to rebirth in the *apāyā*.
- Thus “*yoniso manasikāra*” has a deeper meaning than just “appropriate attention.” In particular, a *Sotāpanna* comprehends “*pati + icca*” leads to “*sama+uppāda*”; see, “[Paṭicca Samuppāda – “Pati+ichcha”+“Sama+uppāda](#).”

10. **When meeting the first three conditions, one is set to fulfill the fourth, “*dhammanudhamma patipadā*.”** Here “*dhammanudhamma*” is “*dhamma + anu + Dhamma*” where “*anu*” means “according to.” The second “*Dhamma*” is the Buddha Dhamma; the first is the “*dhamma*” that one follows. “*Patipadā*” is “procedure.” Thus it means following the procedures in the correct and pure Buddha Dhamma.

- When one learns the true Dhamma from an *Ariya* (Noble) person, one begins to comprehend:
 - (i). what is meant by suffering (*dukkha*),
 - (ii). that suffering arises due to the *anicca* nature, and thus
 - (iii). one does not have any refuge anywhere in the 31 realms (*anatta*).
- Then one realizes that to seek the only refuge (*attā*) of *Nibbāna*, one needs to act with *yoniso manasikāra* and follow the “*dhammanudhamma patipadā*.”
- There is a series of four *suttas*, starting with the [WebLink: suttacentral: Anudhamma Sutta \(SN 22.39\)](#).
- Those *sutta* describe *dhammanudhamma patipadā* as living with a clear vision of the *anicca*, *dukkha*, and *anatta* nature of the *pañcakkhandha* (*rūpa*, *vedanā*, *saññā*, *saṅkhāra*, *viññāṇa*).

11. As pointed out in “[What is Unique in Buddha Dhamma?](#),” *dhammanudhamma patipadā* or the “Dhamma Path” starts with mundane *sammā ditṭhi*, or how to sort out immoral from moral. Then one gets

rid of the *moha* (deep delusion) that covers the mind, and the mind will be ready to grasp *anicca*, *dukkha*, and *anatta*.

- The second stage or the *Sotāpanna phala* moment, will result at some point.

12. Let us take an example to illustrate this concept.

One does not intentionally cut oneself, because one can see its harm. In the same way, moral people stay away from immoral acts because they can see the consequences of such wrong actions.

- We can thus see why it is comparatively easy to get on the mundane eightfold path.

13. **The *lokuttara* eightfold Path is harder to see.** One has to learn it from a Buddha or a true disciple of the Buddha.

- If someone enjoys tasty food laced with poison, digesting and bringing out its harmful effects will take time. So everyone is enjoying the food and having a good time.
- And then someone says, “this food has poison; the more delicious the food is, the more poisonous it is.”
- Most people ignore that message. They cannot comprehend why this person is “trying to ruin the party.” But a few people ask for more information and try to find out whether what this person is saying is true or not.
- Like that it is hard for most people to take the “long-term perspective” and investigate whether it is true that “it is not only fruitless but also dangerous” to be attached to the sensory pleasures of this world.

14. It is hard in the beginning to grasp this message. Even when one starts seeing the message (as one gets to the *Sotāpanna magga anugāmi* stage), initially it is hard to instill discipline. A good analogy here is that it is harder to resist scratching an itch, even though one may realize that it is not a good idea because one will make that a wound. The tendency is to “enjoy the scratching.” In the same way, even when one starts seeing the dangers of the rebirth process, initially it is still hard to resist the sensory pleasure.

- The solution is to “put some ointment in the itch to calm it down”; in the same way, one can calm down the strong urges by reading/listening and contemplating Dhamma (thinking about consequences).
- And one should initially focus on the “big itches,” and not try to take care of all “minor itches.” As one gets relief from the “major itches” one can see the benefits and is motivated to follow the same procedure for other “itches” as well. Similarly, following the Path (especially the *Sotāpanna magga anugāmi* stage) is a gradual process. One needs to tackle the “bigger offenses” or get rid of the “worst habits (*gati*)” first.

Of course, one needs to have removed *micchā diṭṭhi* even to become a *Sotāpanna Anugāmi*: “[Micchā Diṭṭhi, Gandhabba, and Sotāpanna Stage](#).”

Next, “[How Does One Know whether the Sotāpanna Stage is Reached?](#)”,

7.4.7 Sotāpatti Aṅga – The Four Qualities of a Sotāpanna

July 8, 2018; revised May 04, 2022; September 17, 2022; re-written September 18, 2022

Sotāpatti aṅga, or the four qualities of a *Sotāpanna*, are discussed in many suttas in the “*Sotāpatti Saṃyutta*” of the *Saṃyutta Nikāya*.

Introduction

1. There are over 70 suttā in the “*Sotāpatti Saṃyutta*” that repeatedly state the four “characteristics/qualities” (*Sotāpatti aṅga*) that one can use to determine whether one has attained the Sotāpanna stage of Nibbāna. The series of suttā start with “[WebLink: suttacentral: Cakkavattirāja Sutta \(SN 55.1\)](#).” [*aṅga* : [nt.] 1. a constituent part; 2. a limb; 3. quality.]

- I was surprised to see that these four qualities of a *Sotāpanna* have not been discussed much in the current literature.
- Knowing them can help determine whether one has attained the *Sotāpanna* stage.

Sotāpatti Aṅga* Associated With a *Sotāpanna

2. The four qualities (or characteristics) of a *Sotāpanna* — who has attained the *Sotāpanna phala* — must not be confused with the **four conditions that must be fulfilled to get to the *Sotāpanna* stage.**

- Those four conditions can be found in “[Four Conditions for Attaining Sotāpanna Magga/Phala](#).”
- Those four conditions to attain the *Sotāpanna* stage are also called *Sotāpatti aṅga* sometimes; see, for example, “[WebLink: suttacentral: Dutiyasāriputta Sutta \(SN 55.5\)](#).” On the other hand, the four qualities of a *Sotāpanna* are also listed as *Sotāpatti aṅga* in the “[WebLink: suttacentral: Nandiyasakka Sutta \(SN 55.40\)](#).”
- Therefore, one must pay attention to which context the term *Sotāpatti aṅga* is used: whether to refer to the four conditions or the four qualities.

3. The four qualities of a *Sotāpanna* are stated succinctly in the “[WebLink: suttacentral: Brahmacariyogadha Sutta \(SN 55.2\)](#).” The Buddha asks: “*Catūhi, bhikkhave, dhammehi samannāgato ariyasāvako sotāpanno hoti avinipātadhammo niyato sambodhiparāyaṇo. Katamehi catūhi?*”

Translated: “*Bhikkhus, the ariyasāvaka Sotāpanna, free of the apāyā, has four qualities. Which four?*”

Then the Buddha gives the answer: “*Idha, bhikkhave, ariyasāvako **buddhe aveccappasādena samannāgato hoti**: ‘itipi so bhagavā arahāṃ sammāsambuddho vijjācaraṇasampanno sugato lokavidū amuttaro purisadammasārathi satthā devamanussānaṃ buddho bhagavā’ti. **dhamme aveccappasādena samannāgato hoti**... pe ... **saṅghe aveccappasādena samannāgato hoti**... pe ... **ariyakantehi sīlehi samannāgato hoti** akhaṇḍehi ... pe ... samādhisaṃvattanikehi. Imehi kho, bhikkhave, catūhi dhammehi samannāgato ariyasāvako sotāpanno hoti avinipātadhammo niyato sambodhiparāyaṇo’*”ti. [Four Qualities in **Bold Orange Colour**.]

Translated: “A *Sotāpanna* has reverence/faith (*pasāda*) in the Buddha, Dhamma, Saṅgha, that comes via losing deep-rooted cravings for things in this world (*avecca*). He is thus established in the *ariyakānta sīla* (**moral conduct of the Noble Persons**) that cannot be broken to make him/her do *apāyagāmi* actions (*kamma*). These are the four defining characteristics of a *Sotāpanna* free of the *apāyā*.” [*avecca* = *ava* (to overcome) + *icca* (liking or craving)]

- First, we note that the “[Supreme Qualities of Buddha, Dhamma, Saṅgha](#)” are listed in this *sutta*. Only the nine qualities of the Buddha are listed above in red. In the full *sutta*, the qualities of the *Dhamma* and *Saṅgha* are also fully listed.

Aveccappasāda* and *Ariyakānta Sīla

4. To fully understand this description of a *Sotāpanna*, we need to understand the meanings of two keywords: *aveccappasāda* and *ariyakānta sīla*.

- I have not seen *aveccappasāda* discussed in English texts; where it is mentioned, it is described as “unwavering confidence.”
- But the reason for that unwavering confidence is itself hidden in that word. That is called “*pada nirutti*,” (in the Sinhala language, “*pada nirukti*”), i.e., the word’s meaning is in the word itself. Let us discuss that hidden meaning now.

***Ariyakānta Sīla* = Unwavering Moral Conduct**

5. Average humans — who are not yet *Ariyā* — highly value sensory pleasures. Most are even willing to do immoral actions to get more sensory pleasures. Even those “moral people” are addicted to enjoying sensory pleasures attainable by moral means without hurting others.

- However, that “moral conduct” is not guaranteed to hold. Even the most moral person WILL BE tempted to do an *apāyagāmi* action under sufficiently “enticing” or “tempting” conditions.
- When such a strong sensory input (temptation) comes, one who has not comprehended *Tilakkhaṇa* (in particular the *anicca* nature) WILL commit an *apāyagāmi* action at some point (in a future life, if not in this life).
- The “Unwavering/Unshakeable moral conduct” starts to grow as a *Sotāpanna Anugāmi* and is firmly established in a *Sotāpanna*.

6. It is impossible to have “Unwavering/Unshakeable moral conduct” until one comprehends how future suffering arises, i.e., Four Noble Truths/*Paṭicca Samuppāda/Tilakkhaṇa*. See “[Paṭicca Samuppāda, Tilakkhaṇa, Four Noble Truths](#).”

- This is hard for many even to believe. They think their morality cannot be “broken.” However, we hear such “moral people” committing heinous acts that we never thought they were capable of now and then. The “unbreakable morality” can be attained only by seeing the unfruitfulness/dangers in sensory pleasures.
- **This is the uniqueness of Buddha Dhamma:** It is possible to make one’s mind NEVER to commit an *apāyagāmi* action (at the *Sotāpanna* stage) and NEVER commit a single *dasa akusala* at the *Arahant* stage.

7. Thus, a *Sotāpanna*’s moral conduct is unbreakable FOREVER, even through future births. No matter how tempting the external sensory input is, a *Sotāpanna* will NEVER do an *apāyagāmi* action (*kamma*). No willpower is needed to enforce it. That mind has fully grasped the futility/danger in such actions.

- **This unbreakable moral conduct of a *Sotāpanna* is called “*ariyakānta sīla*.”** *Kānta* (“ka” + “anta”) is the “cooled mindset” achieved via removing the two extremes (“*anta*”) the Buddha rejected: excess sensory pleasures and excess hardship or extreme austerity.
- *Ariyakānta sīla* is established only in *Ariyā*, who have comprehended this unique message of the Buddha about how suffering arises in this wider world of 31 realms and how that future suffering can be stopped and a permanent state without suffering (*Nibbāna*) can be attained.
- Furthermore, the Pāli (and Sinhala) word for a vehicle is “*riya*”, and the stopping of “*riya*” (*saṃsāric* vehicle/journey) is called “*Ariya*.” One who has taken the wheels off the vehicle for the *saṃsāric* journey is called an “*Ariya*.” See #13 of “[Nibbāna – Is it Difficult to Understand?](#)” Buddha (“*bhava uddha*”) has the same meaning: “[A Buddhist or a Bhaudhayā?](#)”

Buddha’s “Wider Worldview with Rebirth Process” Must be Understood

8. Without a Buddha explaining to us, it will be impossible to comprehend the widespread suffering in the wider world of 31 realms by ourselves.

- How many of us have watched (and enjoyed) television programs where a deer is eaten alive by a tiger? How painful is that experience for the deer? How much pain will a fish feel, dangling by a hook that pierced its mouth and unable to breathe?
- Our minds are programmed to think that animals are not living beings who can feel pain. But ALL living beings experience pain, perception (recognition), and many other mental qualities.
- In the *Abhidhamma* language, feelings (*vedanā*) and perception (*saññā*) are UNIVERSAL mental factors (*cetasika*) that arise with ALL thoughts of ANY living being.
- **Suffering is everywhere.** If we pay attention, we can see so much suffering, even among humans. We are unaware of much of the suffering in the wider world of the 31 realms. There is unimaginable suffering in the other three lowest realms and the animal realm.

Step-by-Step Process – Prerequisites

9. However, the reasons (or causes) for such suffering cannot be understood without investigating (and then being convinced of) the laws of *kamma* that **REQUIRES** the rebirth process.

- This is why one cannot comprehend the deeper aspects of Buddha Dhamma without first getting rid of the ten types of *micchā diṭṭhi* or the wrong views about this world of 31 realms.
- One who has not removed the ten types of *micchā diṭṭhi* will have *avijjā* at the highest level, which is called *moha*. Therefore, even a prestigious scientist can have *moha*; it has nothing to do with “book knowledge.” When one gets rid of those, one gets down to the *avijjā* level; see, “[Lobha, Dosa, Moha versus Raga, Patigha, Avijjā](#).”

10. Once getting rid of the ten types of *micchā diṭṭhi*, one can start to “see” (not with eyes, but with wisdom) that **the real cause for suffering is *taṇhā* (getting attached) that arises due to *iccā* (our liking for sensory pleasures)**. Furthermore, *taṇhā* has origins in “*iccā*” or cravings.

- Again, this is the uniqueness of Buddha Dhamma. Whereas a normal human cannot imagine a “happy existence” without sense pleasures, an *Ariyā* sees the opposite: unfruitfulness and dangers in sense pleasures.
- **The key to comprehending the *dukkha sacca* (First Noble Truth) and *Tilakkhaṇa* is to see the suffering that is hidden sense pleasures. The worst kind of suffering arises when one does immoral things to access sense pleasures; that is what a *Sotāpanna* first realizes.**
- **Note:** In both “*icca*” and “*avecca*” (or anywhere), the letter “c” is pronounced with the “ch” sound: “[“Tipitaka English” Convention Adopted by Early European Scholars – Part 1](#).”

Nirāmisā Sukha and Aveccappasāda

11. When one starts to realize the truth at the *Sotāpanna Anugāmi* stage, one starts experiencing a different kind of “happiness,” which is the *nirāmisā sukha*.

- **The real cause of this *nirāmisā sukha* is the abstinence from sensory pleasures.** Again, this is hard to explain and needs to be experienced.
- With that comes the realization of the value of a Buddha, unbreakable faith in him and a reverence for him. This is called *aveccappasāda* in the Buddha.

Aveccappasāda = Ava Icca Pasāda

12. Now, we can see the true meaning of *aveccappasāda*: “*ava*” means to overcome, and *iccā* is liking or craving. These two words, when combined, rhyme as “*avecca*.” Now, “*pasāda*” is reverence/faith. When the two words “*avecca*” and “*pasāda*” are combined, it rhymes as “*aveccappasāda*.”

- It must be a truly exceptional person to discover such an unimaginable cause for the suffering in this world, and to find the way out of that suffering (by removing *taṇhā* or “*iccā*” for worldly pleasures).
- **This unbreakable faith/reverence for the Buddha comes from comprehending the dangers of “*iccā*” for worldly pleasures: “*Buddhe aveccappasāda*.”**

13. Of course, one will simultaneously have “*Dhamme aveccappasāda*,” unshakeable faith in the Dhamma, the teachings of the Buddha, that allowed one to be free of the *apāyā*.

- Furthermore, one will not be able to learn this unique Dhamma of the Buddha without the *Saṅgha*, those *Ariyā* who have transmitted the true and pure Dhamma up to now. One could spend a lifetime learning “fake Dhamma” and will not be able to grasp the message of the Buddha. We are fortunate to learn the correct Buddha Dhamma, only because of the *Saṅgha*, who have faithfully and correctly transmitted the *Tipiṭaka* over all these years.

- That realization leads to “*Saṅghe aveccappasāda*,” reverence/faith in the *Saṅgha*.

Saṅgha and Bhikkhu

14. It is important to note that *bhikkhus* are not necessarily included in the *Saṅgha*. Only those eight Noble Persons (*attha purisa puggala*) are included in *Saṅgha*; see “[Supreme Qualities of Buddha, Dhamma, Saṅgha](#).”

- However, *bhikkhus* should always be treated with respect. They represent the *Buddha Sāsana*.
- As I understand, even a lay *Anāgāmi* should bow to any *bhikkhu*.

“Seeing *Anicca* Nature” Is to Understand *Paṭicca Samuppāda*

15. The Buddha described two sets of *Paṭicca Samuppāda* (PS) for a reason. One set (different versions of *Akusala-mūla* PS) describes the origin of the world or the origin of suffering. The other one describes *Kusala-mūla* PS for the stopping of suffering.

- Comprehending the “*Udayavaya Nāṇa*” means understanding those two processes. “*Udaya*” is the “arising (of world/suffering)” or the *anuloma* (forward) PS. “[WebLink: suttacentral: Pathamabodhi Sutta \(Ud 1.1\)](#)” “*Vaya*” is the “stopping of that process” or the *paṭiloma* (reverse) PS process. “[WebLink: suttacentral: Dutiyabodhi Sutta \(Ud 1.2\)](#)”
- ANYTHING in this world can be stopped from arising. That means NOTHING in this world has any essence. They can only bring more suffering. Thus, one only becomes helpless (in the long run) if one pursues “worldly pleasures” with *abhisankhāra*.
- **The above two lists summarizes the *anicca, dukkha, and anatta* nature!** That “seeing” or *Sammā Dīṭṭhi* comes just by comprehending the “wider worldview” of the Buddha. Details at “[Worldview of the Buddha](#).”

Ariyakānta Sīla and Aveccappasāda Realized via Sammā Dīṭṭhi

16. A *Sotāpanna* has the “unique vision” or *Sammā Dīṭṭhi* in the Noble Eightfold Path. A *Sotāpanna* has seen the ultimate truth about this world. That is the “previously unheard” Dhamma of the Buddha.

- Thus, when a *Sotāpanna* comprehends this “hidden truth” about the real nature of this world, he/she will **begin to see the danger of getting attached to sensory pleasures**.
- That “drastic change in vision” will automatically generate faith and reverence in the Buddha, *Dhamma*, and the *Saṅgha*, thereby generating *aveccappasāda* for them.
- This is why the Buddha, *Dhamma*, and the *Saṅgha* are called the Triple Gems and are worthy of homage; see “[Supreme Qualities of Buddha, Dhamma, Saṅgha](#).”
- However, a *Sotāpanna* cannot avoid normal sensory pleasures. Most live married lives. Only at the *Anāgāmi* stage will one give up the desire for sensory pleasures. See, “[Vipallāsa \(Dīṭṭhi, Saññā, Citta\) Affect Saṅkhāra](#).”

7.4.8 *Sammā Dīṭṭhi* – Realization, Not Memorization

May 13, 2018; revised June 20, 2020; September 4, 2022

1. *Sammā Dīṭṭhi* (or comprehension of *Tilakkhaṇa*) is the necessary first step to start on the Noble Eightfold Path. If one has gained *Sammā Dīṭṭhi* (i.e., if one is a *Sotāpanna/Sotāpanna Anugāmi*), one would have understood the Four Noble Truths and can “see” (not with eyes, but with *paññā*) the path to *Nibbāna*:

- One has “seen” that there would be much suffering in future lives (especially in the *apāyā*), if one gets too attached to worldly things by assuming that they can provide lasting happiness (this is the comprehension of the *anicca* nature).
- The reason for such future suffering is immoral actions, speech, and conscious thinking (*kāya* and *vacī saṅkhāra* done with ignorance or *avijjā*). This is why the first step in *Paṭicca Samuppāda* is “*avijjā paccayā saṅkhāra*.”
- One can stop future suffering from arising by controlling one’s *kāya* and *vacī saṅkhāra* or staying away from *dasa akusala*.
- And the way or path to accomplish that is the Noble Eightfold Path.

Those are the Four Noble Truths.

2. We can analyze it differently by first discussing *Nibbāna* and *Sotāpanna*.

- The “[WebLink: suttacentral: Nibbānapaṇhā Sutta \(SN 38.1\)](#)” clearly describes *Nibbāna* as, “*..ragakkhaya, dosakkhaya, mohakkhaya — idam vuccati nibbānanti*.” [[SN 38.1 Nibbānapaṇhāsutta](#)] That means *Nibbāna* is attained via removing greed, hate/anger, and ignorance from one’s mind.
- However, the step-by-step procedure to attain *Nibbāna* involves four steps, which remove seven types of *anusaya* or **mental fermentations** that contaminate a mind. That will lead to the stopping of the four types of *āsava*; see, “[The Way to Nibbāna – Removal of Āsavā](#)”: *Diṭṭhāsava, kāmāsava, bhavāsava, and avijjāsava*.

3. It is important to understand what *anusaya* or **mental fermentations** are, how they accumulate, and how they lead to grasping a new *bhava* at the moment of death.

- Let us take an example. When one keeps doing immoral things based on greed (hurting others, stealing, sexually misbehaving, etc. in order to satisfy that greed), then one’s mind accumulates “*anusaya* of greedy type.” “Mental fermentations” is a good translation for *anusaya*; **it implies that the longer one keeps them, the more they get rotten.**
- Another way to say that is to say one is cultivating “greedy *gati*.”
- This can be compared to adding rotten things to a pool of water. Contamination gets worse with time. Still, the dirt may settle down at the bottom of the pool, and the water may look relatively clean.
- However, when the water is disturbed, say by stirring with a long stick, some contaminants will come to the surface; that is *anusaya*. How much comes to the surface (as *āsava* or cravings/temptations) depends on how hard the water is stirred, i.e., how strong the sense input is. Furthermore, even a slight stirring can bring dirt up to the surface if there is a lot of dirt.

4. **Anusaya or mental fermentations are like mud at the bottom of the pool.** When a mind has built up a lot of *anusaya* accumulating deep inside, it is easier for them to come to the surface (i.e., for cravings to come to the mind) when one receives a corresponding sensory input (seeing an attractive person, for example). This is *āsava* or cravings. So, how one automatically responds in a given situation depends on those three parameters (*gati, anusaya, āsava*), which are interconnected: “[Āsava, Anusaya, and Gati \(Gathi\)](#).”

- Removal of the seven types of *anusaya* [*diṭṭhi, vicikicchā, kāma rāga, paṭigha, bhava rāga, māna, avijjā*] (the same as removing corresponding *gati*) leads to the stopping of the four types of *āsava*; see “[Conditions for the Four Stages of Nibbāna](#).”

5. **The most important of the four *āsava* [*kāmāsava, bhavāsava, diṭṭhāsava, avijjāsava*] is the *diṭṭhi anusaya*.** All other *āsava* are influenced by the wrong views one has. With the removal of *diṭṭhi anusaya* at the *Sotāpanna* stage, 99+% of all “mental junk” or “mental fermentations” disappear from the mind.

- This is why the Buddha said that a *Sotāpanna* had removed defilements comparable to the soil on the whole Earth. The remaining defilement due to all other types of *anusaya* is comparable to the amount of soil picked up by one's thumb.
- Therefore, one needs to get a clear idea of what is meant by *Nibbāna* and to see why that necessarily means getting out of the rebirth process. The rebirth process is filled with so much suffering in the *apāyā*. The Buddha said that any given living being spends most of the rebirth process in the *apāyā*.

6. Therefore, the first, and most important step towards attaining *Nibbāna* is to remove *diṭṭhi anusaya* that builds up over time due to wrong views, at which time three types of *saṃyojana* are also removed; see, "[Conditions for the Four Stages of Nibbāna](#)":

- The removal of *diṭṭhi anusaya* leads to the removal of *diṭṭhāsava* and "*vicikicchā anusaya*."
- Simultaneously, the three *saṃyojana* (*sakkāya diṭṭhi*, *vicikicchā*, *sīlabbata parāmāsa*) disappear.
- We will discuss these in the next post.
- They are all removed by the "right vision." It is called "*dassanena pahātabbā*" or "removal via right vision."

7. The hardest part to understand is what is meant by the "right vision." We have discussed at length on this website that it involves the comprehension of *Tilakkhaṇa* (*anicca*, *dukkha*, *anatta*): That one cannot achieve long-lasting happiness by pursuing enticing things in this world, that one will be subjected to suffering in the long run if one does that, and therefore, such an approach will lead to one becoming helpless (especially when one is reborn in the *apāyā*).

- That is the basic "right vision" that must REGISTER in one's mind. The truth of that needs to be accepted by the mind.
- Just reading about this, and memorizing it is not enough.

8. Let us take an example to illustrate this point. Some people do not believe in rebirth. That is a "wrong *diṭṭhi*" or "wrong vision" according to the Buddha. But if one's mind does not see that rebirth must be valid, just reading about it will not change that impression in that mind.

- One should look at the evidence for rebirth with an open mind; see, "[Evidence for Rebirth](#)." One should contemplate that nothing happens without causes, i.e., *kammā* will have *vipāka*. That in turn leads to the conclusion that rebirth must be valid.
- This is why getting rid of the ten types of *micchā diṭṭhi* MUST happen before one can comprehend *Tilakkhaṇa* and become *Sotāpanna*. The Buddha discussed this in the "[Mahā Chattārisaka Sutta \(Discourse on the Great Forty\)](#)."

9. One issue that I do not quite understand is that some people do not believe in rebirth but want to attain the *Sotāpanna* stage and even the *Arahant* stage! Don't they realize the contradiction?

- By definition, one wants to attain the *Sotāpanna* stage to avoid births in the *apāyā*. So, if one does not believe in rebirth, why does one believe that it is possible to be born in the *apāyā*?
- We must also remember that even those who believe in rebirth have been in this rebirth for a time that has no traceable beginning. Therefore, we must have also held such wrong views in the past. It is not easy to get rid of these ten types of *micchā diṭṭhi*.

10. In any case, we still need more clarification on what happens when one truly comprehends *Tilakkhaṇa*.

- I think one good analogy is if one is wearing — say, blue-tinted glasses — all the time, then no matter how hard one tries, one WILL see the world see white objects as blue and other objects also distorted to appear with different colors.
- Removing a *diṭṭhi* (or wrong vision) is like taking off those tinted glasses. It happens when one's mind comes to a certain stage of understanding. This is cultivating *paññā* (wisdom).

- The only way to remove those “tinted glasses” is to contemplate Buddha’s teachings and engage in *puñña/kusala kammā*, providing the conditions for the mind to comprehend those teachings.

11. A key factor that most people disregard is how much of a difference it can make in one’s mindset when one stays away from *dasa akusala* and engages actively in *kusala/puñña kammā*. One’s mind becomes clear and sharp, one will be able to comprehend deeper concepts easily; see, “[Kilesa – Relationship To Akusala, Kusala, And Puñña Kamma](#).”

- Then one will be able to get rid of the ten types of *micchā diṭṭhi* and then make the transition to the Noble Path by starting to comprehend *Tilakkhaṇa*; see, “[Sīla, Samādhi, Paññā to Paññā, sīla, Samādhi](#).”
- Comprehending *Tilakkhaṇa* is different than learning mundane subjects like geometry or even mathematics. It can be difficult or relatively easier depending on how much “preparations” (*dāna, sīla, bhāvanā*) one has made in this life and also in previous lives; see, “[Puñña Kamma – Dāna, Sīla, Bhāvanā](#)” and “[Kilesa – Relationship To Akusala, Kusala, And Puñña Kamma](#).”

12. As we discussed above, the key step in getting to the “right view” is for one’s mind to see the truth in the world view of the Buddha: **That our world is much more complex than what we experience with our senses.** That there are more realms of existence, that suffering is worst in those *apāyā*, and that unless we get rid of “*apāyagāmi gati*” one can end up in the *apāyā*.

- Those “*apāyagāmi gati*” are closely related to *diṭṭhāsava*, which arise and accumulate due to ignorance of the Buddha’s worldview or the real nature of the world (*Tilakkhaṇa*).
- Furthermore, at the dying moment, the mind can grasp such an *apāyagāmi* sense input (*ārammaṇa*).
- As we have discussed before, those things happen AUTOMATICALLY, based on one’s *gati* (*āsava*). That is an important point to understand. Unless one is a *Sotāpanna*, those possibilities cannot be ruled out.

13. Another related key issue is the following. It does not matter not how many bad *kammā bīja* have been accumulated. Rather what is important is whether one’s mind will grasp a *bhava* (*upādāna*) in a given realm. That depends only on the level of *paññā* (wisdom) one has cultivated and THEREFORE what kind of *gati* one has.

- **It DOES NOT matter how many *kammā bīja* suitable to give rebirth in the *apāyā* are there. If one has removed “*apāyagāmi gati*” by cultivating *paññā* to the *Sotāpanna* stage, then one’s mind would not grasp such *bhava*.**
- If one’s mind has removed all *gati* that can lead to rebirth in any realm, then one’s mind would not be able to grasp any *bhava*, and thus one would attain *Parinibbāna* at the dying moment.
- For example, Aṅgulimāla killed 999 people but was able to attain *Arahanthood* within a week or so. Bad *kammā bīja* that he generated were still there, but his mind would not grasp (*upādāna*) them. See “[Account of Aṅgulimāla – Many Insights to Buddha Dhamma](#).”

14. When one gets to *Sammā Diṭṭhi* (i.e., when one becomes at least a *Sotāpanna Anugāmi*), one’s *gati* have changed permanently. Since the next birth is according to one’s *gati*, one will not be born into a family with *micchā diṭṭhi*. This is how it is guaranteed that one will have only seven more *bhava* left.

- One may grasp *Tilakkhaṇa* by focusing on one of them. But that will lead to comprehension of all three, and even more characteristics like the *asubha* (unfruitful) nature. They are all interrelated.
- Of course, there are different levels of *Sammā Diṭṭhi* and it will be completed only at the *Arahant* stage.

15. Finally, there is no need to worry about whether one has attained a certain stage of *Nibbāna*. One should concentrate on following the Path. The Buddha said that if one follows *Satipaṭṭhāna*, one will attain at the least *Anāgāmi* stage within seven years (some earlier.) Of course, one must have a *tihetuka birth*.

- If one does not have a *tihetuka paṭisandhi*, the effort will not go waste but will help attain *Nibbāna* in future life. See “[Paṭisandhi Citta – How the Next Life is Determined According to Gati](#).”

- He said that if a farmer plants seeds and takes good care of those plants, they will provide a good harvest. It is pointless to check every day to see whether the harvest is ready. It will happen in due time.

7.4.9 How Does One Know whether the Sotāpanna Stage is Reached?

Revised March 23, 2017; May 15, 2018; September 22, 2018; August 12, 2019; February 11, 2020; July 3, 2022; August 5, 2022

One can determine for oneself whether one has attained the *Sotāpanna* stage. It becomes clear that one has removed the characteristics (*gati*) suitable to be born in the four lowest realms (*apāyā*).

Sotāpanna Is the First Goal

1. The most precious thing sought by a *Bhaddhaya* (or a practicing Buddhist) is the *Sotāpanna* stage of *Nibbāna*; see, “[Why a Sotāpanna is better off than any King, Emperor, or a Billionaire.](#)”

- It is the *Arahanthood* that is the ultimate goal. A *Sotāpanna* will become an *Arahanthood* within seven *bhava*.
- Seven *bhava* is many more than seven births because, within a given *bhava*, there can be many births. See “[Bhava and Jāti – States of Existence and Births Therein.](#)”
- Thus it is essential to know how to figure out whether one has attained that stage. Other than that person himself/herself, only a Buddha can say whether a given person has achieved *maggā phala*; see, “[Myths about the Sotāpanna Stage.](#)”
- As we discussed in that post, even Ven. Sāriputta (who was only second to the Buddha in Dhamma knowledge) could not do that. Some people today claim they know whether another person has attained the *Sotāpanna* stage (and make money doing that).

2. A *Sotāpanna* has seen the way to *Nibbāna*. He/she still has more work to do, but can see a glimpse of *Nibbāna* from afar. The way to *Nibbāna* has become apparent.

- In another post, I described a simile. A traveler, looking for a particular mountain to get to the top of it, can finally see an outline of it at a distance. He/she still has to travel to the mountain's base and climb up. Most of the hard work was to find the location of that mountain and get close to it. See, “[Sotāpanna Anugāmi and a Sotāpanna](#)” and “[The Sotāpanna Stage.](#)”

Nibbāna Is the Stopping of the Rebirth Process

3. In Buddha Dhamma, the ultimate goal is to stop the rebirth process anywhere in the 31 realms of this world. **That corresponds to realizing that there is only suffering to be had by staying in this rebirth process.** In particular, one has to comprehend the danger of rebirths in the lowest four realms (*apāyā*.)

- The ONLY WAY to come to this realization is to comprehend the true nature of this world of 31 realms: *anicca*, *dukkha*, and *anatta*. And that is NOT impermanence, suffering, and “no-self”; see, “[Anicca, Dukkha, Anatta – Wrong Interpretations.](#)”
- Instead, it is to realize the unfruitfulness of striving to reach the mirage of happiness in this world of 31 realms and thus convince oneself that one is truly helpless in this cycle of rebirths.
- Therefore, one must work diligently to stop future suffering by “giving up cravings for things in this world” and strive to reach the only oasis in this desert of the cycle of rebirths or *Nibbāna*. That is to release the mind from the burdens of the material world.

Comprehension of *Tilakkhaṇa* will change one's outlook on life

4. Once that idea sinks in, one's attitude, behavior, and outlook on life will change forever.

- Let us take an example. Once a child learns the way to add two numbers, there is no way that the child will ever forget that. There will be no second guessing. If an adult, even a teacher, tells that child that “two plus three is six,” there is no way that that child will ever agree.
- Attaining the *Sotāpanna* stage is like that. Deep down, one will KNOW the dangers of the rebirth process. Any happiness, whether due to health, wealth, or fame, is of NO VALUE in the long term. He/she has truly understood the value of the Buddha Dhamma and that **faith (based on understanding)** will prevail through future rebirths.
- That is not a “magical effect.” A living being is a continuous flow of *kammic energy*; see, “[What Reincarnates? – Concept of a Lifestream](#).” Thus what happens at the *Sotāpanna phala* moment is to change the “*gati*” of that lifestream irrevocably. **One would have permanently shed any “*gati*” suitable for a hell-being (with *gati* of strong hate), a *peta* (intense greed), an *asura* (freeloading mentality), or an animal (a mixture of all those; “*tirisan*” or all three “*san*”).**
- One way to assess is to see how much of one’s such “*gati*” have changed for the better. (Over the period of working towards the *Sotāpanna* stage). One should be able to see **significant** changes. For discussions on “*gati*” (or “*gathi*”), please use the “Search” box on the top right.

“Seeing” the True Nature of This World

5. Let us take another example. When we look in a mirror and see our image, we KNOW that it is not another person or oneself but merely an image. We don’t need to think twice to realize that.

- But have you seen a dog barking at its reflection in a mirror or the water? A dog thinks it is another dog and barks at it. A dog would not know the reality of a reflection.
- In the same way, an average human thinks very highly of his/her material wealth. One is willing to “do whatever it takes” to possess such material things, titles, recognition, etc.
- But a *Sotāpanna* would instinctively know the unfruitfulness of such struggles. He/she may still enjoy sense pleasures (and thus may still like to eat tasty food or engage in sexual activity, for example). However, he/she will not willingly go to extremes, such as engaging in sexual misconduct, having affairs outside the marriage, or being excessively greedy.
- A *Sotāpanna* has reduced *lobha* to *kāma rāga* and *dosa* (or *dvesha*) to *paṭigha*. In other words, greed or hate that was due to total covering of mind by the five hindrances would reduce to “attachments” and “dislikes”; see, “[Lobha, Dosa, Moha versus Raga, Patigha, Avijjā](#).”
- The most important thing is that he/she will NEVER do an immoral deed strong enough to lead to rebirth in the lowest four realms [*Niraya*, *Tiracchāna-yoni*, *Peta-yoni*, and *Asura-yoni*], i.e., an *apāyagāmi* deed. We all KNOW that our reflection in a mirror is not real and thus will not try to talk to that reflection. Similarly, a *Sotāpanna* INSTINCTIVELY avoids doing anything that is profoundly immoral. He/she does not need to think about the consequences of such acts, etc. The mind will automatically block such actions.

Jhāna Can Be a Distraction

6. One could be a *Sotāpanna* (or even an *Arahant*) without being able to get to any *jhāna* beforehand. Many people in the time of the Buddha attained *Arahanthood* upon listening to a *desanā*. *Upacara* and *anuloma samādhi* are sufficient for one to get to the *Sotāpanna* stage. Also, *jhāna* and *maggā phala* are two different things; see, “[Samādhi, Jhāna \(Dhyāna\), Maggā Phala](#).”

- That becomes clear when we look at the possible rebirths of a *Sotāpanna*. A *Sotāpanna* could be reborn at or above the human realm.
- But if one has attained the first *anāriya jhāna*, one WILL be born in the *Brahma* realm. Thus a *Sotāpanna* with even an *anāriya jhāna* WILL NOT be reborn as a human.

- By the way, if one is not a *Sotāpanna* but has attained *anāriya jhānā*, he/she will also be born in a *Brahma* realm. But the difference is that he/she is not free from rebirths in even the lowest four realms.
- What I described above is consistent with the extension of 89 *cittā* to 121. The “additional 40 *cittā*” come about when attaining the four stages of *Nibbāna* for people at various (*anāriya*) *jhāna* levels; see, “[The 89 \(121\) Types of Citta](#).” However, these are technical details that may not concern most people. I just wanted to show consistency.

Ariya and Anāriya Jhāna Experiences Are the Same

7. We also need to keep in mind that the *jhānic* experience is the same for *anāriya jhānā* as for *Ariya jhānā*. They are mental states of the *rūpāvacara* and *arūpāvacara* realms; they still belong to this world of 31 planes.

- There were *yogis* even before the Buddha who could attain *anāriya jhānā* to the eighth and also cultivated *abhiññā* powers. *Ceto vimutti* (or *ceto vimukthi*) with *anāriya jhānā* is not the same as *magga phala* with *paññā vimutti*. In the former, defilements are suppressed. In the latter, they have been removed.
- Of course, having even *anāriya jhānā* makes it easier to do *vipassanā* (comprehend *anicca*, *dukkha*, and *anatta*) and attain *magga phala*.

Ariya and Anāriya Jhāna Are Very Different in Essence

8. Just SUPPRESSION of *akusala* thoughts and craving for sensual pleasures (*kāma rāga*) can lead to *anariya jhāna*.

- On the other hand, attaining *Ariya jhāna* requires removing craving (*anusaya*) for sensual pleasures (*kāma rāga*). Thus one needs to be an *Anāgāmi* to attain even the first *Ariya jhāna*. See “[Possible Outcomes of Meditation – Samādhi, Jhāna, Magga Phala](#).”
- Here is a *desanā* from the Waharaka Thero describing the difference between *jhāna* and *magga phala* (it is in Sinhala, but I have extracted the essence in this post for others):

[WebLink: Waharaka Thero - Difference between Magga Phala and Jhāna in Sinhala](#)

Changes One Can See For Oneself

9. Even before reaching the *Sotāpanna* stage, one will notice changes in one's behavior and attitude towards other humans and all living beings. All of those will gradually change as one starts following the Path.

- But there will be significant changes after attaining the *Sotāpanna* stage. That change may not be noticeable in a day. It could take weeks or a few months to see some critical differences in one's lifestyle when one looks back.
- The tendency to get together with a lot of people will reduce. One will spend more time learning Dhamma and contemplating concepts that are still not entirely clear. Finding more about the real nature of this world is immensely enjoyable.
- One will also start noticing things that one had not noticed before. One will see clear instances of people's “self-induced” suffering as they try to enjoy life by “partying harder” but only get exhausted.
- The only concrete way to be convinced of the *Sotāpanna* stage is to make sure that the three *saiṃyojana* of *sakkāya diṭṭhi*, *vicikicchā*, and *sīlabbata parāmāsa* are absent. See, “[Sakkāya Ditthi is Personality \(Me\) View?](#).”

Should One Declare One's Attainments?

10. Then there is this question. Is it appropriate or even allowed by the Buddha for someone to declare the *magga phala* one has attained?

- What is stated in the *Tipiṭaka* is the following. If one declares that one has a certain *magga phala* falsely intending to gain respect, money, publicity, etc., that is a bad *kamma*. A conventional *bhikkhu* becomes “*pārājika*,” loses the priesthood automatically, and thus could be born in the *niraya* for doing that.
- Declaration of a *magga phala* is not banned. “A person attaining the *Sotāpanna* stage may declare it if he/she wishes to do so,” in particular for the benefit of others. In the [WebLink: suttacentral: Mahā Parinibbāna Sutta \(DN 16\)](#), “*Katamo ca so, ānanda, dhammādāso dhammapariyāyo, yena samannāgato ariyasāvako ākaṅkhamāno attanāva attānam byākareyya: ‘khīṇanirayomhi khīṇatiracchānayani khīṇapettivisayo khīṇāpāyaduggativinipāto, sotāpannohamasmi avinipātadhammo niyato sambodhiparāyaṇo’ ti.*”
- The same verse (“A noble disciple who has this may declare of themselves: ‘I have finished with rebirth in hell, the animal realm, and the ghost realm. I am a stream-enterer! I’m not liable to be reborn in the lower realms and am bound for the final release-*Nibbāna*’”) appears in a series of four suttas (SN 55. 7 through SN 55.10); see, for example, [WebLink: suttacentral: Pathamagiṇṇakāvasatha Sutta \(SN 55.8\).](#)”
- Most people who attain *magga phala* do not declare it; it is not a bragging point. It is the same with *jhānā*. Many people start off developing *jhānā* to attain supermundane (*abhiññā*) powers, but once they get there, they have already seen the fruitlessness of even those powers.
- In particular, when one develops *abhiññā* powers to be able to see previous lives, one becomes so disgusted with what one (and others) have gone through in past lives. One does not seek to look back much further.

Tipiṭaka Examples/Accounts

11. Now let us discuss some episodes from the *Tipiṭaka* to clarify some of the points made above.

- Visākhā (one of the chief female lay disciples of the Buddha) had attained the *Sotāpanna* stage at a young age. But she remained at that stage even without developing any *jhānā* or higher *magga phala* until death at age 120. The Buddha stated that she would be reborn as a *Deva* many times (as I remember 11 times).
- Similarly, the wealthy businessman Anāthapiṇḍika, who built the beautiful and expensive monastery *Jetavanaramaya*, attained the *Sotāpanna* stage upon hearing his first *desanā* from the Buddha. He died and was reborn in the Tusita realm (one of the six *deva* worlds). Since those *deva* worlds also belong to the *kāma loka*, it is clear that he never attained an *Ariya jhāna*.
- Mahānāma was a wealthy person who was related to Prince Siddhartha’s family. The Buddha told him that he had attained the *Sotāpanna* stage. However, when engaging in his business activities, he often got frustrated and angry with his servants and yelled at them. After such an episode of outburst, he would think, “if I am still able to become angry like this, I must not have attained the *Sotāpanna* stage yet.” So, he would see the Buddha, explain what happened, and ask whether the Buddha was sure about the declaration. He still had doubts about his attainment of the *Sotāpanna* stage until the Buddha confirmed it for the third time; see [WebLink: suttacentral: Pathama Mahānāma Sutta \(SN 55.21\).](#)”
- The key is that there is a difference between hate (*dosa*) and getting angry (*paṭigha*); *paṭigha* is removed only at the *Anāgāmī* stage.

More Accounts From Tipiṭaka

12. Then there was the Sarakāni *brahmin*, who also belonged to a “high caste.” He used to consume alcohol and get drunk regularly. His relatives, who were *vedic brahmins*, disowned him from their lot, saying he was unworthy to be one of them. He also attained the *Sotāpanna* stage, but could not give up the habit of drinking even after achieving that. When he died, Mahānāma (mentioned above) asked the Buddha where

Sarakāni was reborn. The Buddha said Sarakāni had attained the *Sotāpanna* stage and had been reborn as a *deva*. Sarakāni's relatives laughed out loud contemptuously upon hearing this and declared, "if Sarakāni was a *Sotāpanna*, then we all should be *Arahants*." When Mahānāma reported this back to the Buddha, the Buddha said those ignorant *brahmins* would go by outward appearances. That description is in the "[WebLink: suttacentral: Pathamasaranānisakka Sutta \(SN 55. 24\).](#)"

- Of course, that episode does not imply that one could keep doing immoral activities and still attain the *Sotāpanna* stage. What we need to understand is that drinking alcohol by itself is not one of the *dasa akusala* (ten immoral actions), but heavy consumption could lead to it. Sarakāni probably continued with his long-time habit to some extent, but was unlikely to have "got drunk." A *Sotāpanna* removes only strong greed (*lobha*). *Kāma rāga* or attachment to sense pleasures is removed only at the *Anāgāmi* stage.
- In the *Mahanama sutta* (delivered to Mahanama mentioned above), the Buddha described the *sīla* (moral conduct) of a *Sotāpanna*: "*panatipata pativirato hoti, adinnādāna pativirato hoti, kamesu miccacara pativirato hoti, musāvāda pativirato hoti, surameraya majjapama dattana pativirato hoti.*" It is essential to realize the deep meanings of the "five precepts"; see "[The Five Precepts – What the Buddha Meant by Them.](#)"
- In the above, "*pativirato hoti*" does not mean "will not" but rather "will not do with liking." After all, a *Sotāpanna* (unless had attained *Ariya jhānā*) is not yet released from the higher realms of the *kāma loka*, only from the lowest four realms.

Asmi Māna Removed Only at the Arahant Stage

13. Some people try to remove the sense of "me" or the sense of "self" to get to the *Sotāpanna* stage, but that is removed only at the *Arahant* stage.

- As long as one is bound to the 31 realms, a sense of "self" will be there. These "*gati*" are removed in stages, starting with "*gati*" suitable for rebirth in the *apāyā*, as discussed in #4 above. Even an *Anāgāmi* has a sense of "self" left, though most of his/her attachments for sense pleasures would not be there. One cannot pass a college exam without having graduated from high school.
- One has to advance systematically through stages; see "[The Way to Nibbāna – Removal of Āsavā](#)" and "[Conditions for the Four Stages of Nibbāna.](#)"
- As long as one is bound to the 31 realms or "this material world," it is not correct to say there is a "self" or there is "no-self"; they are both wrong and extreme views; see, "[Anicca, Dukkha, Anatta.](#)"
- Any meditation with the wrong concepts of *anicca*, *dukkha*, or *anatta* "will not grow." One should be able to "feel" one's understanding "grow" if one is doing the correct types of meditation; see, "[13. Kammattana \(Recitations\) for the Sotāpanna Stage.](#)"

Only a Buddha Can Know Another Person's Attainments

14. Finally, only a Buddha could discern whether another person has attained *magga phala*. However, many instances of people declaring their attainments by themselves when that declaration helped a noble purpose.

- All those who participated in the first four Buddhist Councils (*Dhamma Saṅgāyanā*) were *Arahants*, according to the *Tiṭṭaka*. Thus all those many thousands of *Arahants* who attended those four *Saṅgāyanā* must have declared the *Arahantship* by themselves.
- Ven. Ānanda attained the *Arahantship* just the night before the first Buddhist Councils (*Saṅgāyanā*.) He came to the Council by air (with *abhiññā* powers) and entered the hall through the keyhole. He did that to dispel doubts from the other *Arahant*'s mind about his attainment.

- There are only a few instances of *Arahants* or even the Buddha performing such supernormal acts. It was essential to remove any doubts of others about the *Arahantship* of Ven. Ānanda because of the critical role he played at the First *Saṅgāyanā*.

7.4.10. Assāda, Ādīnava, Nissaraṇa – Introduction

1

November 1, 2017; revised May 25, 2022

1. This subsection replaces the old subsection, “Āsvāda (Mind-Made Pleasures), Ādeenava [ādīnava] (Bad Outcomes), Nissaraṇa (Relinquish).” I had used Sinhala terms in that series without realizing it. Also, I have basically re-written some of the posts — including the Introduction — to have a logical flow.

- Furthermore, this subsection was under “*Paṭicca Samuppāda*.” I have now moved it to the “*Sotāpanna* Stage,” where it is more appropriate.
- Here is the pronunciation of the three words: “[WebLink: Assāda, Ādīnava, Nissaraṇa](#).”

2. There are two main categories of “pleasures” that one experiences: (i) Those arising **due to kamma vipāka**, and (ii) mind-made “pleasures” where we keep generating more *vacī saṅkhāra* (thinking/talking to ourselves in our minds) recalling such an experience of the first kind.

- For example, eating a piece of cake generates a “good feeling” via the taste itself. That belongs to the first category. This is a *kamma vipāka* and there are “no new *kamma* generated”; see, “[Avyākata Paṭicca Samuppāda for Vipāka Viññāna](#).”
- But if we get “attached to that taste” and start thinking about how good it is and crave for more, now we are generating *vacī saṅkhāra* (thinking/talking to ourselves about how good it is), then we are generating “new *kamma*.” This second type is called **assāda** (*āsvāda* in Sinhala). [*assāda* : [m.] taste; enjoyment; satisfaction.]

3. Therefore, **assāda** are basically “mind-made pleasures,” i.e., **only those in the second category**.

- Those of the first type arise AUTOMATICALLY due to sensory inputs. They arise due to our *kamma vipāka/gati* via *mano saṅkhāra*. *Mano saṅkhāra* **are defined** as *vedanā*, *saññā* which arise in each and every *citta*.
- Based on those initial feelings, we are also likely to start generating *vacī saṅkhāra* (talking to ourselves, which is defined as *vitakka/vicāra*, then actual speech) and then even generate *kāya saṅkhāra* (bodily

actions). We HAVE CONTROL over *vacī* and *kāya saṅkhāra*, and that is the key to changing our defiled *gati*.

- It is important to realize that *vacī saṅkhāra* are associated with speech and also “talking to ourselves”: [“Correct Meaning of Vacī Sankhara.”](#)

4. There is nothing we can do to stop the first kind. For example, even an *Arahant* WILL feel the “tastiness” of sugar or a nice meal (or saltiness of salt or unpleasantness of some medications/foods, etc). But he/she WILL NOT become attached to that taste and crave for more.

- It is this **craving** and the subsequent conscious thinking about it (*vacī saṅkhāra*) that is called *assāda*, and that is what is bad because **that will extend the *saṃsāric* journey filled with suffering** as we will discuss in detail in this subsection.
- So, it is important to distinguish between the AUTOMATIC generation of *mano saṅkhāra* (due to *vipāka*) and the CONSCIOUS generation of *vacī* and *kāya saṅkhāra*: [“How Are Gati and Kilesa Incorporated into Thoughts?”](#)

5. It is those CONSCIOUS generation of *vacī* and *kāya saṅkhāra* that contribute to future suffering (and also lead to *tāpa* or “heat” in mind right now): [“Suffering in This Life – Role of Mental Impurities.”](#)

- We “get addicted” to things like drugs, alcohol, and even over-eating by constantly thinking about them. We tend to recall past experiences and create in our minds such future experiences. This is generating *vacī saṅkhāra* (talking to ourselves). Then we start talking and doing things accordingly.
- This is how we strengthen “old bad habits” and even develop “new bad habits” or *gati*. These habits or *gati* could be *saṃsāric gati* or new ones.
- There are many posts on the site on “*gati*” (or habits/character). A simple explanation is in [“The Law of Attraction, Habits, Character \(Gati\), and Cravings \(Āsavas\),”](#) and there is a scientific explanation too: [“How Habits are Formed and Broken – A Scientific View.”](#)
- This important concept of *gati* is not discussed in current Theravāda literature, but it can explain many other concepts.

6. The more we enjoy such “mind-made pleasures” or *assāda*, the more established those associated *gati* become. For example, a drug user/alcoholic is constantly thinking about either past experiences or the next, and is “building up” that *gati*. Then it will become increasingly difficult to be drug/alcohol free.

- There is an even worse consequence too: that *gati* becomes what one craves/thinks about and will become operational in *paṭicca samuppāda* via “*upādāna paccayā bhava*.” One can start a PS cycle just in mind by thinking about getting drunk via initiating *vacī saṅkhāra* and generating “*bhava* or existence of a drunkard.” Then of course one will follow-up with actual drinking, which is done via *kāya saṅkhāra*. Soon enough one will end up an alcoholic.
- Therefore, ***ādinava*** means “bad consequences or dangers.” In this case, what we perceive as “mental pleasures” (*assāda*) WILL have bad consequences both in this life **and in future lives**: In the above example, one is likely to be matched with an “alcoholic mother” in the next birth, and be born an alcoholic. [***ādinava***: [m.] disadvantage. 過患 (danger), 患難 (trials and tribulations), 過失 (negligence), 危難 (distress).]

7. This is another way to express the First Noble Truth. What a normal person thinks as “*somanassa*” (“*suva*” + “*manasa*” or “good feelings in the mind”) CAN actually be the cause for FUTURE suffering, **but ONLY IF one gets attached, as discussed above.**

- Note the difference between consuming tasty food and getting attached to it; seeing a nice picture and getting attached to it; hearing nice music and getting attached to it, etc.

- **Getting to that point of being able to experience “taste things” without getting attached to them is not easy;** that is not attained fully until the *Anāgāmi* stage. It requires more learning and contemplation (*Satipaṭṭhāna bhāvanā*).
- However, to first get to the *Sotāpanna* stage, one needs at least to “see with wisdom” that *assāda* does lead to *ādinava*; when that understanding sinks in, that will prevent one from committing *apāyagāmi kamma*, i.e., one’s mind will get rid of the coarse level of *assāda*. This subsection can help gain that “vision.”

8. When one fully understands the bad consequences (*ādinava*) of these mind-made pleasures (*assāda*), that means one has understood the First Noble Truth as well as the causes for it, how to eliminate those causes, and the way to do it, i.e., all four Noble Truths.

- That leads to the cessation of the *samsāric* journey, and that is called *nissaraṇa* (end of “*carana*” or journey (“*nis*” + “*charana*,” which rhymes as “*nissaraṇa*”). [*nissaraṇa* : (nt.) 1. going out; departure; 2. escape.]
- But it is a step-by-step process that starts with the *Sotāpanna Anugāmi* stage and culminates at the *Arahant* stage.

9. It will take several posts to explain the above in detail. However, understanding them will help with *paṭicca samuppāda* cycles and also with *Satipaṭṭhāna/Ānāpāna bhāvanā*.

- The first few subsections of the “*Living Dhamma*” section has all the fundamentals that are needed to help understand this subsection. The posts mentioned in #3 and #4 are especially important ones.
- *Assāda* is related to *āśava* and *anusaya* too, as well as *gati* (pronounced *gathi*) as we mentioned above. There are many posts on those key concepts on the site, and a couple was listed in #4 above. One could use the “Search” button on the top right to locate relevant posts.
- In the following, we will discuss a couple of more examples of *assāda*, *ādinava* and *nissaraṇa* in simple terms.

10. We know many things that provide instant gratification but are harmful in the long term. A good example is smoking. A smoker gets an enjoyment with smoking. Furthermore, he/she wants it to be repeated again and again, and that is *assāda*. But it has been proven without a doubt that long-term smoking causes many health problems including cancer.

- Even though smoking has decreased over the years, many people still who smoke. I had a older friend who smoked heavily; I asked him why he would keep doing it since he knew about the bad consequences. He said the habit had been ingrained, and it was hard to break it. Many years ago, he died because of his bad habit. The last several years of his life were spent in hospitals, with parts of his lungs removed piece-by-piece, and eventually, he was on oxygen most of the time.
- Of course he finally gave up smoking when he was about to be hospitalized. It was too late by the time he clearly saw the “*ādinava*” (when he actually experienced the bad consequences). The damage had been done.

11. However, his children clearly saw what he went through and understood that smoking might provide temporary enjoyment (*assāda*), but is bound to bring about bad consequences (*ādinava*). Thus they stayed away from smoking (*nissaraṇa*).

- This is the key point that we will prove to be valid for ANY sense of pleasure in the end. But do not worry; we do not have to (and cannot effectively) give up anything without understanding. In fact, such forced “giving up” will only lead to more stress. Our minds will automatically avoid more and more “bad things” as we keep learning Dhamma.
- There are a few more “relatively easy to see” examples of “*assāda*, *ādinava*, *nissaraṇa*,” even before we get to the deeper analysis in the next post.

- Craving for tasty foods is another very clear example. Most of us cannot “see” the bad consequences of overindulging in eating, and as a consequence we have a obesity problem in most countries. This has resulted in many health problems for those people and has led to increased healthcare costs for all. Still, many people are beginning to see the truth of “*assāda, ādīnava, nissaraṇa*” of overeating.
- Heavy drinking, use of drugs, and association with bad friends are relatively “easy to see” examples.

12. However, we can systematically understand the “root causes” for ALL such problems by using the guidelines provided by the Buddha. Once we understand the actual root causes, at least some of us can think through and avoid not only such “mundane problems”, but start seeing even more long-term benefits: It is the same line of reasoning that eventually leads to the four stages of *Nibbāna*.

- Thus even though Buddha Dhamma is focused on “eliminating the long-term suffering”, it can also help reduce some of the “short-term suffering” too.
- As a clear example of this, one can always examine the health of Buddhist monks. On average, they are much healthier than the “householders” in any of the Buddhist countries. They do not smoke and do not overeat.
- And one can clearly see their “joy in heart” and the calmness of their minds even though they have very few possessions and do not seek gratification in many sense pleasures that others value so highly.

13. This last point is worth thinking about some more. If one thinks deeply enough, one can see that even some common “sense pleasures” are not that different from the pleasure one gets by inhaling a drug. They give a highly enjoyable “burst of pleasure”, but inevitably lead to bad outcomes, even short term. One can get a hangover with a bad headache due to excess drinking, and in the case of overeating, one can feel the “discomfort” right away.

- We seek such sense pleasures because we don’t realize the value of just having a calm, peaceful state of mind. One does not understand the value of a “neutral mind” (which is called *upekkhā*), unless one can experience it. It is like getting rid of a headache that one has had for a long time. We do not realize the “incessant stress” that is with us, until we reduce it.
- Our minds are constantly under stress seeking sense pleasures. That is what we all had been doing in countless previous births too. That is why it is hard to recognize any negative consequences.

14. In the *Sambhodhi Vagga* of the *Aṅguttara Nikāya*, there are several *suttā* on *assāda, ādīnava, nissaraṇa*. The “[WebLink: suttacentral: Pubbeva Sambodha Sutta \(AN 3.103\)](#)” provides a succinct statement on what they are:

“..ko nu kho loke *assādo*, ko *ādīnavo*, kiṃ *nissaraṇan*’ti? Tassa mayham, bhikkhave, etadahosi: ‘yam kho lokam paṭicca uppajjati sukham somanassam, ayam loke assādo. Yam loko anicca dukkha vipariṇāmadhammo, ayam loke ādīnavo. Yo loke chandarāgavinayo chandarāgappahānam, idam loke nissaraṇan’ti...”

Translated: “..What are *assāda, ādīnava*, and *nissaraṇa* in this world? If one gets attached (*paṭicca*) to *sukha/somanassa*, that is *assāda*. That gives rise to the *dharmā* (the seeds for future suffering, because these are really “*kamma* seeds”) with *anicca, dukkha*, and *vipariṇāma* nature, which is called *ādīnava*. Arising of such *dharmā* can be stopped by constraining the tendency to indulge in sense pleasures (*chandarāgavinayo*), and thus getting rid of the craving for sense pleasures (*chandarāgappahānam*)...”

- It is to be noted that *sukha* is “bodily pleasure” and *somanassa* is “mind pleasure.” We will discuss this highly condensed verse in the upcoming posts.
- In that *sutta*, the Buddha says that he was unable to attain the *Buddhahood* until he realized the need to see the dangers in sense attachments, and to work diligently to get rid of such cravings for sense pleasures.
- It is important to note that *dharmā* are really *kamma* seeds that lead to future *vipāka*; see, “[What are rūpa? – Dhamma are rūpa too!](#)” and “[What are Dhamma? – A Deeper Analysis.](#)”

12. Many other *suttā* that discuss these three key concepts. In particular, “[WebLink: suttacentral: Assāda Sutta \(AN 6.112\)](#)” is notable since it ties *assāda diṭṭhi* to *anicca saññā*:

“*Tayome, bhikkhave, dhammā. Katame tayo? Assādadiṭṭhi, attānudiṭṭhi, micchādiṭṭhi. Ime kho, bhikkhave, tayo dhammā. Imesaṃ kho, bhikkhave, tiṇṇaṃ dhammānaṃ pahānāya tayo dhammā bhāvetabbā. Katame tayo? Assādadiṭṭhiyā pahānāya aniccasaññā bhāvetabbā, attānudiṭṭhiyā pahānāya anattasaññā bhāvetabbā, micchādiṭṭhiyā pahānāya sammādiṭṭhi bhāvetabbā. Imesaṃ kho, bhikkhave, tiṇṇaṃ dhammānaṃ pahānāya ime tayo dhammā bhāvetabbā*”ti.”

- Or, contemplation of *anicca saññā* leads to the removal of *assāda diṭṭhi*.
- This is because the mind-made pleasures (*assāda*) are based on the wrong perception of *nicca saññā*, i.e., that those sense experiences are real and fruitful.

7.4.10. How Perceived Pleasures (Assāda) lead to Dukkha

2

March 11, 2016; revised October 31, 2017; February 10, 2020

1. The essence of the Buddha Dhamma is that what we PERCEIVE to be enjoyment (*assāda*) is actually the CAUSE of FUTURE SUFFERING; that is called *ādinava* (or dangers) of *assāda*. **But that understanding comes in stages.** This is a subtle point to understand, and requires some cleansing of the mind to “see.” Grasping the essence of Buddha Dhamma requires a concentrated mind.

- At a minimum, one should read these posts when the mind is calm. That will make a huge difference in comprehending Dhamma. Most people (especially those who come to this site) are not “immoral”, but the state of mind can change. Even an excited mind cannot grasp deep Dhamma. I discussed this in a few of my very first posts two years ago; see, for example, “[The Importance of Purifying the Mind](#).”
- This is why I highly recommend everyone to read the first several posts in the meditation section starting with “[1. Introduction to Buddhist Meditation](#).”
- Most people new to Buddha Dhamma (Buddhism), start at the wrong place: “Do I really need to give up all these sense pleasures?.” The answer is no. One will **voluntarily** give up things **that one will be convinced to be dangerous or at least unfruitful**. *Nirāmisā sukha* comes from this understanding.

2. The key here is to understand that “*bhava*” and “*jāti*” are according to one’s *gati*. That is because “*bhava*” arises via “*upādāna*” and *upādāna* means what one likes or enjoys; see, “[Paticca Samuppāda – “Pati+ichcha”+“Sama+uppāda”](#).”

- *Bhava* means “potential to bring about existence” and that existence is according what **one craves for (*upādāna*)**, **not what one wishes for**. *Upādāna* means things that one is **AUTOMATICALLY attracted to**. At least the initial reaction is automatic, and that is what counts at the *cuti-paṭisandhi* moment; see below.
- If one craves for sensual pleasures in the *kāma loka*, then it is hard to avoid a *bhava* and *jāti* in the *kāma loka*.
- More importantly, if one is seeking sense pleasures and is willing to do things that can be done only with “animal *gati*,” “pretha *gati*,” “asura *gati*,” or “niraya *gati*,” then no matter how much one wishes, one cannot avoid birth in those realms.
- **One cannot fool one’s mind.** One has to see the dangers in the lowest four realms to cultivate the desire and drive to be free of them.

3. The four lowest realms are collectively called the “*apāyā*.” Those who are destined to go to *apāya* have “*dugati*.” The word “*dugati*” comes from “*du*” + “*gati*” or immoral habits (character).

- On the other hand, those who have moral character have “*sugati*,” which means good (“*su*”) *gati*.
- Sometimes the *apāyā* themselves are also called *dugati*, and the higher realms are called *sugati*.

- A given person could have both *sugati* as well as *dugati*. One becomes the *Sotāpanna* when the possibility for *dugati* to surface (i.e., *anusaya*) is permanently removed.

4. It is hard to see the true *anicca* nature of the higher realms, i.e., in *sugati* (for example in the *deva* realm), until one is free of the lowest four realms. Most of us perceive *deva* realms to be full of happiness. Until one's mind is purified to at least the level of a *Sotāpanna* it is hard to comprehend the futility of a birth in the *deva* realms.

- But the animal and human realms have enough visible suffering for us to be motivated.
- One cannot even imagine to comprehend the *anicca* nature of *rūpa loka* or *arūpa loka* until one is free of *kāma loka*, including the *deva loka*.
- This is why COMPREHENDING Dhamma **at each level** is the essential. It is a step-by-step process.

5. In the *Dhamma Cakka Pavattana Sutta*, the Buddha described three rounds of bondage (*tiprivattaya*); see, "[Dhammacakkappavattana Sutta](#)." Getting through those three walls is done via four stages of *Nibbāna* (*Sotāpanna*, *Sakadāgāmī*, *Anāgāmī*, *Arahant*).

- At each stage, one gains wisdom (*ñāṇa*) to "see further", i.e., the *anicca* nature of higher realms. Thus one has to make progress systematically. This process is analogous to the following example. Let us visualize a person wearing glasses that have been covered with four layers of a dark, but see-through, film. One could see through a single layer of the film, but when all four layers are on, one is virtually blind.
- A normal human without exposure to pure Dhamma is like a person wearing those glasses covered with all four layers. He/she could just barely see the immediate surroundings, but not much else. Such a person would only be concerned with the immediate surrounding, and will not be able to see any dangers existing not too far away.

6. When exposed to Buddha Dhamma for the first time, it is like bringing in more light. Even with the dark glasses, one can see a bit more clearly, and that is enough for most people to get interested and learn more.

- When one learns about the various aspects of Dhamma, one can see evidence that there is a much bigger hidden world out there, and at some point one could comprehend the dangers of rebirth in the *apāyā*. That stage can be compared to one layer of those dark films coming off. It is the attainment of the *Sotāpanna* stage. **This is a big step since *pañcanīvaraṇa* (those five factors that cover the mind) are permanently removed.**
- Now, one can see much better, and thus has the ability to start comprehending the dangers of the higher realms in the *kāma loka*, i.e., the human realm and the *deva* realms. First one comprehends the dangers of sense pleasures associated with the human realm and when that happens one attains the *Sakadāgāmī* stage (one will never again be born in the human realm), and the second film comes off.
- In two more stages (*Anāgāmī* and *Arahant*), the remaining two films come off and one will be able to clearly see the true nature of this world only at the *Arahant* stage.
- Thus, it is useless to try to grasp everything at once or to try to give up "normal" sense pleasures forcefully. However, it is imperative to give up those extreme (immoral) behaviors (*gati*) to be free from *dugati* (*apāyā*).

7. The main problem is that some people go to extremes in seeking sense pleasures. They are willing to steal, lie, and even commit murder to acquire wealth, status, or titles. All those are perceived to lead to higher sense pleasures.

- But in doing so, one will be cultivating *gati* suitable for rebirth in the *apāyā*, i.e., *dugati*.
- One may enjoy such sense pleasures for maximum of 100 years or so. But when one is born in the *apāyā* it is very difficult to get out. One could be trapped there for billions of years to come. This is the danger that many do not see.

- This is the difference a Buddha makes. In the absence of a Buddha in the world, humans are unaware of the existence of these other 29 realms, and in particular, the four lowest realms.

8. Those *akusala kamma* that makes one to be eligible to be born in the *apāyā* have a special name: *pāpa kamma*. I guess the closest English translation would be “*akusala kamma* of the worst kinds.”

- As I have discussed in a previous post, there is a huge difference between *lobha* and *rāga*, *dosa* and *paṭigha*, and *moha* and *avijjā*: “[Lobha, Dosa, Moha versus Raga, Patigha, Avijjā](#).”
- *Pāpa kamma* are done with *lobha*, *dosa*, and *moha*, the stronger versions of greed, hate, and ignorance.
- When one attains the *Sotāpanna* stage one is left with the milder versions of *rāga*, *paṭigha*, and *avijjā*. It basically means a *Sotāpanna* still likes to enjoy sense pleasures, but not at the expense of others.
- A *Sotāpanna* is inherently incapable of doing anything that normally would qualify one to be born in the *apāyā*. Even under extreme pressure, a *Sotāpanna* would not be compelled to such *pāpa kamma*.

9. I have done analyses to show that such *pāpa kamma* are done because one has *micchā diṭṭhi*. When one has *micchā diṭṭhi*, one has the hidden ability (*anusaya*) to generate “*diṭṭhi sampayutta citta*” and those are strongest of the 8 *lobha citta*; see, for example, “[Akusala Citta – How a Sotāpanna Avoids Apayagami Citta](#).”

- Thus it is very important to understand what *micchā diṭṭhi* is. One can use the Search box to find many relevant posts, but here is a simple explanation: “[Wrong Views \(Micchā Diṭṭhi\) – A Simpler Analysis](#).”

10. Another issue to think about is which factor dominates the determination of the next *bhava* and thus *jathi* (birth): *kamma vipāka* (seeds) from the past OR one’s *gati* right now.

- We all have done both highly meritorious deeds and highly immoral deeds in the past. Those cannot be eliminated easily. But the critical point is that unless one “willingly grasp” any one of those *kamma* seeds at the *cuti-paṭisandhi* moment at the end of the current *bhava*, those *kamma* seeds cannot bring about a new *bhava*.
- When one attains the *Sotāpanna* stage, one permanently loses “*gati* suitable for the *apāyā*,” i.e., one loses “*upādāna*” for *bhava* in the lowest four realms. Thus even though we may have potent *kamma* seeds for such *bhava*, they CANNOT be grasped at the *cuti-paṭisandhi* moment.
- At the *Arahant* stage, one loses “*upādāna*” for *bhava* in all 31 realms, even though he/she may have even an uncountable number of *kamma* seeds from the past.
- This is why *Āṅgulimāla*, who killed 999 people, was able to attain the *Arahanthood* within 7 days. He lost craving for rebirth anywhere in the 31 realms. See, “[Account of Āṅgulimāla – Many Insights to Buddha Dhamma](#).”
- We just need to get rid of *gathi* suitable to be reborn in the lowest four realms to become a *Sotāpanna*. That is the critical and first step.

11. To repeat: Avoiding immoral behavior and actively engaging in moral behavior is not only for the prevention of creating bad *kamma* seeds or for creating good *kamma* seeds, but for changing our bad *gati*.

- The more critical end result we are looking for is to change our mindset, our *gati*. That starts with first getting rid of *dugati*. For most people, it is easy to see the dangers of the *apāyā*.
- When we lose *dugati* suitable for rebirth in the *apāyā*, we will not grasp such a *bhava* at the *cuti-paṭisandhi* moment.
- Until we lose both kinds of *gati* at the *Arahant* stage, we NEED TO cultivate *sugati* so that we will grasp only such a “good *bhava*” at the *cuti-paṭisandhi* moment.

12. Once one gets rid of *dugati*, one advances to the next stage automatically. It is hard to see the bad consequences of “*kāma gati*” (sense pleasures that keep one bound to *kāma loka*), until one is free of the “*apāya gati*” or *dugati*.

- In the same way, it is hard to see the *anicca* nature of “*rūpa* and *arūpa loka gati*” (*jhānic* pleasures that keep one bound to *rūpa* and *arūpa loka*), until one is free of the “*kāma gati*.”
- This is why it is totally useless to meditate on things like “there is no self” or “there is no ‘me’.” The feeling of a self (or more correctly the *samyojana* of “*māna*”) is removed only at the *Arahant* stage, which is infinitely far away compared to losing *dugati*.
- The perception of a “self” is going to be there as long as one craves for at least a trace of anything in the 31 realms. This is another point that needs a lot of contemplation. The critical point to understand is that it is unfruitful/dangerous to commit immoral actions to enjoy *assāda* or “mind-made pleasures.”

7.4.10. **Kāma Guna, Kāma, Kāma Rāga, Kāmaccfanda**

3

November 9, 2017; revised September 3, 2019; October 5, 2019

Introduction

1. It is essential to understand the meaning of each term. The “defilement level” increases in the given order from *kāma* to *kāmacchanda*.

- Pronunciation of the terms: [WebLink: Pronunciation of kāma guna to kāmacchanda](#)

2. In *kāma loka*, we experience **five types of physical sense inputs**: pictures (*rūpa rūpa*), sounds, smells, tastes, and body touches. There are inherent “qualities” for each of these called “***kāma guṇa***.” Those are common to all of us in *kāma loka*. They also depend on “*bhava*” and thus differ from humans to each type of animal; see below.

[***kāma*** : may denote : 1. subjective sensuality, ‘sense-desire’; 2. objective sensuality, the five sense-objects.

kāma-guṇa : ‘characteristics {cords (or strands)} of sensuality’.]

- For example, all of us experience the sourness of lemon or sweetness of sugar (there may be defects in some people due to *kamma vipāka*).
- We all experience the unpleasantness of thunder or the pleasantness of music.
- While there could be minor differences, all humans experience the same basic “qualities” or ‘*kāma guṇa*’ through the five physical senses. **Even when one becomes an *Arahant*, that will not change.**

Realms in *Kāma Loka* and Two *Brahma Lokā*

3. The 31 realms naturally exist to provide different levels of *kamma vipāka* according to the (*abhi*) *saṅkhāra* done in previous lives (mainly in the human realm).

- The lowest four realms in *kāma loka* (*apāyā*) have conditions that induce excessive suffering. Higher two realms in *kāma loka* have *rūpa rūpa*, *sadda*, *gandha*, *rasa*, and *pottabba* that provide increasingly higher levels of “pleasures.”
- The *rūpavācāra brahma* realms have *rūpavācāra jhānic* pleasures; those *brahmā* had given up *kāma rāga* and had cultivated *rūpavācāra jhāna* in previous human lives.
- Those in *arūpavācāra brahma* realms had given up both *kāma rāga* and *rūpa rāga*, and had cultivated *arūpavācāra jhāna* in previous human lives.
- That is why *kāma guṇa* is absent in both *rūpavācāra* and *arūpavācāra brahma* realms. Those who are born in those realms had given up sense pleasures for *jhānic* pleasures.

What Are *Kāma Guṇa*?

4. Therefore, there are pleasing things in our *kāma loka* (human realm) that naturally arise to provide sense pleasures. That is because “human *bhava*” is a “good *bhava*.” Even more sensory pleasures are naturally available in deva realms.

- Thus, as humans, we are naturally exposed to those “*kāma guṇa*.” We are naturally “exposed to” sense objects that are “pleasing” to the five physical senses. Of course, *deva* are exposed to even stronger *kāma guṇa*.
- Thus, if one has not comprehended the *Tilakkhaṇa* then it is natural to attach to such “pleasurable things.” One perceives that things in this world — especially those things with *kāma guṇa* — can provide long-term happiness. But in reality, such cravings lead to suffering because those “pleasures” are not sustainable. Furthermore, those things with *kāma guṇa* motivate people to immoral deeds to get access to them.

Kāma Rāga – Attachment to *Kāma Guṇa* via *Saṅkappa Rāga*

5. Now, if a person gets attached to those sensory inputs with *kāma guṇa*, and starts generating sensual thoughts (i.e. *vacī saṅkhāra*) that leads to “*kāma*” or *kāma rāga*. Generating sensual thoughts is also called *saṅkappa rāga* (creating *saṅkappa* that lead to *saṁsāric* journey). A *sutta* reference is in #15 below.

- Engaging in *saṅkappa rāga* (i.e., thinking greedy thoughts about such sense pleasures) means generating *vacī saṅkhāra*. That is then likely to lead to *kāya saṅkhāra*, too (start engaging in related physical activities.)
- That can happen to any average human. It can happen to a lesser extent to a *Sotāpanna*. That next step of intentionally generating sensual thoughts happens with *kāma rāga*. That will again reduce at the *Sakadāgāmi* stage and stopped only at the *Anāgāmi* stage. [*kāma-rāga* : ‘sensuous lust’, one of the ten fetters (*saṁyojana*, q.v.)]
- The removal of *kāma rāga* cannot be forced. *Kāma rāga* will naturally reduce when cultivating *Ānāpāna* and *Satipaṭṭhāna*.

6. An *Anāgāmi* has removed *kāma rāga*, but still has *kāma*, i.e., likes them somewhat.

- However, *kāma* of an *Anāgāmi* is not strong enough to lead to rebirth in the *kāma loka*. In other words, an *Anāgāmi* will not generate *abhisāṅkhāra* (strong *saṅkhāra*) for things with *kāma guṇa* (for example would have no desire to engage in sex).
- In the *Abhidhammic* language, an *Anāgāmi* has removed four greed-based *cittā* associated with wrong views. There are still “four greed-based *cittā* dissociated with wrong views” left. But they have lost much of the potency to move from *kāma* to *kāma rāga* level; see #3 of, “[Akusala Citta and Akusala Vipāka Citta](#).”
- It is only at the *Arahant* stage that *kāma* is absent completely.

Kāmacchanda – Being Blinded by *Kāma Rāga*

7. If not willfully controlled, *kāma rāga* can intensify to a point where one is capable of committing immoral deeds (hurting others or oneself.) One starts losing control when *kāma rāga* elevates to the *kāmacchanda* level, the highest. [*kāmacchanda* : ‘sensuous desire’, one of the 5 hindrances (*nīvaraṇa*, q.v.); attachment to sensual pleasure.]

- That can happen to anyone below the *Sotāpanna* stage, i.e., one can be “blinded” by *kāma*, resulting in *kāmacchanda* (“*kāma*” + “*icca*” + “*andha*,” where *icca* is liking, and *andha* is blind, and thus “blinded by the craving for *kāma*”).

- Whether an average human will generate *kāma*, *kāma rāga*, or *kāmacchanda* depends on the strength of the sensory input and also on prevalent conditions. For example, if one's mindset becomes degraded due to alcohol consumption, and one sees an attractive woman in an isolated setting, things could get out-of-control with *kāmacchanda*.

Kāmacchanda* Leads to Rebirth in the *Apāyā

8. Immoral actions done with *kāmacchanda* could lead to rebirth in the *apāyā*.

- Only *kāma rāga* — not *kāmacchanda* — can be arise in a *Sotāpanna*. Thus he/she is released from the *apāyā*, but not from *kāma loka*. A *Sotāpanna* is incapable of committing an “*apāyagāmi* deed” in order to satisfy any kind of sensory pleasure.
- I hope you get the basic idea. The above reasoning applies to any of the five physical sense inputs.

Some Examples for Clarification

9. We can clarify with some examples. Sugar has a “*kāma guṇa*” of sweetness for humans; that holds for everyone from an average person to an *Arahant*.

- A beautiful woman will be seen as such by anyone from an average person to an *Arahant*.
- An average person may generate *kāma* to *kāmacchanda* for that woman.
- A *Sotāpanna* may generate *kāma* to *kāma rāga*.
- An *Anāgāmī* may generate just *kāma*. But there is no “*kāma rāga anusaya*” left in him to go beyond that.
- But an *Arahant* will not generate *kāma* either.

10. The sight of such a woman is a *kamma vipāka*. For anyone (from an average person to an *Arahant*), still living in the human realm will see that she is beautiful.

- If one gets “interested” one generates *kāma saṅkappa* or *vacī saṅkhāra*; see, “[Correct Meaning of Vacī Saṅkhāra](#).” Then it could lead to *kāya saṅkhāra*, i.e., turn one's head to look at her again with *kāma rāga* or *kāmacchanda*, that is a new *kamma*.
- A *Sotāpanna* still has “*kāma rāga anusaya*,” and that is why he/she will return to the *kāma loka*. He/she can be born as a human or *deva* in the future.
- A *Sakadāgāmī* is in between the *Sotāpanna* and *Anāgāmī* stages. He/she will be reborn only in the *deva* realms.
- Of course, an *Anāgāmī* will not be reborn anywhere in the *kāma loka*. since there is no *kāma rāga* left.

Different Types of *Kāma Guṇa* for Different Existences

11. Anyone born in the human realm will have similar “*kāma guṇa*” because they had cultivated corresponding “human *saṅkhāra*.” We all like same things, and any variations we do have are due the variations in those main *saṅkhāra* types.

- **However**, “*kāma guṇa*” of animals can be much more different compared to humans. There are also many variations among animals.
- Pigs eat very unpleasing things, including feces. Tigers or lions like to eat raw meat. Cows don't like meat but like grass. The variations are quite apparent. Again those correspond to ***saṅkhāra that they had cultivated as humans***. Furthermore, each *bhava* (and *jāti*) corresponds to such *saṅkhāra* via *paṭicca samuppāda*. Some of you may be able to see that, but we will discuss this later.

- In *brahma* realms, things with *kāma guṇa* are absent. They were born in those realms because they had preferred and cultivated *jhānic* pleasures, instead of craving for sensual pleasures.

12. In that regard, we just keep in mind for now that (*abhi*)*saṅkhāra* generated by humans have high *javana* power, and thus lead to various “*bhava*” and *jāti*. **Animals cannot generate such *citta* with high *javana* power because of their unfortunate birth. That is an important point.** Animals just pay for past *kamma* until that *kammic* power is exhausted; see, “[Javana of a Citta – The Root of Mental Power](#).”

- Even most *devas* enjoy their *kāma* and “go with the flow,” and enjoy them (while they can.) *Brahmā* too enjoy *jhānic* pleasures that come with their birth.
- It is only those *devas/brahmā* that had become at least *Sotāpanna* that would be motivated to strive for *magga phala*.

Only *abhisāṅkhāra* Lead to Future Rebirths

13. Therefore, it is mostly humans who can cultivate *abhisāṅkhāra* (of both types) and thus make conditions for future “good births or bad births.” That is a critical point in the *Agganna Sutta*.

- All the animals that we see were humans in the beginning. Those with “bad *gathi*” that had been generated via “bad *abhisāṅkhāra*” in their deep past, were reborn as various types of animals as the Earth evolved, and conditions for animal life appeared.
- An introduction to *Aggaṇṇa Sutta* is at “[Buddhism and Evolution – Aggaṇṇa Sutta \(DN 27\)](#).”

Five Kinds of *Kāma Guṇa*

14. Now let us briefly discuss a key *sutta* that is relevant. The “[WebLink: suttacentral: Nibbedhika Sutta \(AN 6.63\)](#)” lists the five *kāma guṇa*:

“..*Pañcime, bhikkhave, kāmaguṇā—cakkhaviññeyyā rūpā iṭṭhā kantā manāpā piyarūpā kāmūpasamhitā rajanīyā, sotaviññeyyā saddā ... ghānaviññeyyā gandhā ... jivhāviññeyyā rasā ... kāyaviññeyyā phoṭṭhabbā iṭṭhā kantā manāpā piyarūpā kāmūpasamhitā rajanīyā. Api ca kho, bhikkhave, nete kāmā kāmaguṇā..*”

Translated: “..*Bhikkhus*, there are five types with characteristics of sensuality (*kāma guṇa*). Which five? **Forms** are cognizable via the eye—agreeable, pleasing, charming, likable, desire-inducing, enticing. **Sounds** are cognizable via the ear. **Aromas** are cognizable via the nose. **Flavors** are cognizable via the tongue. **Body sensations** are cognizable via the body—agreeable, pleasing, charming, likable, desire-inducing, enticing. But, *Bhikkhus*, **these are not sensuality (*kāma*)..**”

- I have translated “*guṇa*” as “characteristics,” but “qualities” would work too.

Kāma Different From *Kāma Guṇa*

15. Then the next verse of the *sutta* says **what *kāma* is:** “*Saṅkappa rāgo purisassa kāmo, Nete kāmā yāni citrāni loke..*”

Translated: “a person’s *kāma* is **getting attached and thinking about (*saṅkappa rāga*)** those **pleasing things in this world (*citrāni loke*)**.” Those beautiful things are not *kāma*.” Here, “*citrāni loke*” means “a world full of delightful things.”

To emphasize: There are many pleasing, desire-inducing, enticing things in the *kāma loka*. **Just experiencing them is not *kāma***. One who has understood the real nature does not get attached to them. But those who do not yet understand the real *anicca* nature of things in the *kāma loka*, value them highly. They crave them, and get a satisfaction (*kāma assāda*) by **thinking about them (generating *kāma saṅkappa* or *vacī saṅkhāra*); that is *kāma***.

- It is essential to realize that conscious thinking or “talking to oneself” is *vacī saṅkhāra*; see, “[Correct Meaning of Vacī Saṅkhāra](#).” Thus, one who does that has *saṅkappa rāga*.
- Such *vacī saṅkhāra* can then lead to *kāya saṅkhāra*, whereby one takes actions to fulfill such desires (if one has *kāma rāga anusaya*).
- Some people go one step further and commit *akusala kamma* to fulfill such desires (then it becomes *kāmacchanda*).

Saṅkappa Rāga Is kāma

16. Therefore, anyone in the *kāma loka* will experience *kāma guṇa*. It is a natural outcome of being in the *kāma loka*. It is the tendency to think about them on a regular basis and enjoy that with *saṅkappa rāga* that elevates to *kāma*. A higher level of *kāma* is *kāma rāga*.

- And giving up that craving comes only with an understanding of the true nature (the *anicca, dukkha, anatta* nature), i.e., realize that they have adverse consequences; see, “[How Perceived Pleasures \(Assāda\) lead to Dukkha](#).” and “[Assāda, Ādīnava, Nissarana – Introduction](#).”
- Getting to the *Sotāpanna* stage means one has understood the dangers of *kāma assāda*. As long as one has cravings for them, one would still have them. However, a *Sotāpanna* will never do an immoral act to gain those sense pleasures.
- For a *Sotāpanna* to be free from such *kāma assāda*, he/she needs to contemplate the dangers (*ādīnava*) of *kāma assāda* as we discussed in the above two posts. That is the “*asubha bhāvanā*.” [*asubha* means unfruitful, detrimental]

What Is Asubha Bhāvanā?

17. Many people misinterpret the *asubha bhāvanā* as to contemplate on disgusting things like rotting dead bodies. **That is entirely wrong; such meditations only lead to *paṭigha* or “friction of the mind.”**

- Instead, one needs to contemplate on the fact that **the cause of future suffering is getting attached to those pleasing sensual things. One needs to see the unfruitful (*asubha*) nature of those things with *kāma guṇa*.** Real *asubha* (detrimental) things are those eye-pleasing, ear-pleasing, ...body-pleasing things in this *kāma loka*. See, “[How Perceived Pleasures \(Assāda\) lead to Dukkha](#).”
- Therefore, it is not even possible to do the *asubha bhāvanā* correctly until one gets to the *Sotāpanna* stage. It is only then one begins to see the dangers **in craving for sense pleasures**.
- However, it is always good to cut down on sense pleasures, even while striving for the *Sotāpanna* stage. It makes one's mind calm and susceptible to grasp more profound concepts.
- Extreme sense pleasures are a burden to the mind. It is possible to avoid those right now; see, “[Satipatthāna Sutta – Relevance to Suffering in This Life](#).” Doing everything in moderation naturally leads to a simpler, healthier, and peaceful life.

7.4.10. Vedanā (Feelings) Arise in Two Ways

4

Revised September 4, 2016; Revised February 9, 2017; October 17, 2017; November 5, 2018; May 5, 2020 (Same at [Vedanā \(Feelings\) Arise in Two Ways @ The Five Aggregates \(Pañcakkhandha\)](#))

Introduction

1. The word *vedanā* comes from (“*vē*” + “*danā*”) which means “විම දනවීම” in Sinhala. That means to “become aware.” When an *ārammaṇa* comes to the mind (via any of the six senses,) we become aware of it.

***Vedanā* can arise in two ways:**

1. One type of *vedanā* is a consequence of a previous *kamma* or previous defiled action, i.e., a ***kamma vipāka***. That *kamma* could have been done many lives ago.
2. For example, when one gets a “pleasant feeling” while eating a piece of cake offered by the friend, that is a *vipāka vedanā*. Then, if we start thinking about how to eat that cake in the future, with such thinking, we generate “pleasant feelings” about such future experiences. Those are “mind-made” or *samphassa-jā-vedanā* associated with greedy thoughts.

Further details on the two types of *vedanā* can be found at, “[Vipāka Vedanā and “Samphassa-jā-Vedanā” in a Sensory Event.](#)” But let us discuss them briefly below.

Vedanā* Arising from *Kamma Vipāka

2. *Vedanā* (feelings) due to *kamma vipāka* are **three kinds** : *Sukha vedanā* (pleasant or joyful feeling), *dukha vedanā* (unpleasant or painful feeling), and *adhukkhamasukha* (without being painful or joyful, just neutral. The word *adukkhamasukha* is a combination of *adukkhamā* and *asukha*.)

- **Those three types of *vedanā* are felt only by the body (*kāya*). All *vedanā* initially coming through other five sense faculties are neutral.**
- *Kamma vipāka* leading to *sukha vedanā* and *dukha vedanā* happen to everyone, including *Arahants*. While everyone can live mindfully (taking necessary precautions) to avoid some of such *dukha vedanā*, others are too strong to be able to avoid.
- For example, the Buddha himself had physical ailments later in his life as *kamma vipāka*. Moggallāna Thero was beaten to death because of a bad *kamma* that he did many lives before.

3. However, *kamma vipāka* are not certain to happen. Some can be reduced in power (see, “[Kamma, Debt, and Meditation.](#)”) Many *vipāka* can be reduced in strength with time if one starts acting with mindfulness.

- Many can be avoided by preventing conditions for them to arise. That means acting with *yoniso manasikāra* or just common sense. For example, going out at night in a bad neighborhood is providing fertile ground for past bad *kamma vipāka* to appear. Many *kamma vipāka* CANNOT take place unless the conditions are right. See, “[Anantara and Samanantara Paccayā.](#)”
- We all have done innumerable *kamma* (both good and bad) in past lives. If we act with common sense, we can suppress bad *kamma vipāka* and make conditions for good *vipāka* to arise.
- Also see the discussion on *kamma bīja* in, “[Saṅkhāra, Kamma, Kamma Bīja, Kamma Vipāka.](#)”
- Now let us look at the second type of *vedanā*.

***Vedanā* Arising from *saṅkhāra* (“*Samphassa-jā-vedanā*”)**

4. These are the *vedanā* (feelings) that we generate on our own. These are the *vedanā* that do not arise in an *Arahant*.

- Based on *vipāka vedanā*, we may generate more types of “mind-made” *vedanā* called *somanassa* and *domanassa vedanā* as we discuss below.
- In #2 above, we saw that *vipāka vedanā* are felt only by the body (*kāya*.)
- Some of the *vedanā* coming through the other senses feel as “pleasant” or “unpleasant” NOT because of *kamma vipāka*, but due to another reason. Those are associated with each realm and are “*kāma guṇa*.” See, “[Kāma Guṇa – Origin of Attachment \(Taṇhā\).](#)” For example, all humans taste sugar to be sweet. But some people get addicted to eating sweets full of sugar. That second category is “mind-made.”

- We may generate “*samphassa-jā-vedanā*” starting with initial *vedanā* due to both mentioned above. But most *samphassa-jā-vedanā* have *kāma guṇa* as the cause.

Some Examples of *Samphassa-jā-Vedanā*

5. These *samphassa-jā-vedanā* arise due to attachment via greed or hate, at that moment (i.e., due to one's *gati*); see, “[Tanhā – How We Attach Via Greed, Hate, and Ignorance.](#)”

These are the *vedanā* (feelings) that *Arahants* do not feel. Since they do not have any “bad *gati*,” they do not commit any (*abhi*)*saṅkhāra*, an *Arahant* avoids any kind of feeling arising from *saṅkhāra*. The easiest way to explain this kind of *vedanā* is to give some examples:

- Three people are walking down the street. One has an ultra-right political bias (A), the second has an ultra-left preference (B), and the third is an *Arahant* who does not have special feelings for anyone (C). They all see a famous politician hated by the political right coming their way. **It is a given that the sight of the politician causes A to have displeasure and B to have a pleasurable feeling.** On the other hand, sight does not cause the *Arahant* to generate any pleasure or displeasure. **Even though all three see and identify the person,** they produce different types of feelings. *It is essential to realize that the feelings were created in A and B by themselves.*
- Two friends go looking for treasure and find a gem. Both are overjoyed. It seems quite valuable and one person kills the other so that he can get all the money. Yet when he tries to sell the “gem,” he finds out that it was not that valuable. His joy turns to sorrow in an instant. *Nothing had changed in the object. It was the same piece of colored rock. What has changed was the perception of it.*
- What could happen if an *Arahant* found the same gem lying on the road? (He would not have gone looking for one.) He might think of donating it to a worthy cause.

Another Example of *Samphassa-jā-Vedanā*

6. A loving couple had lived for many years without any problems and were happy to be together. However, the husband slaps his wife during an argument (this is a *kamma vipāka*). The physical pain from the slap itself did not last more than a few minutes. But for how long the wife would suffer mentally? Those feelings arise due to *saṅkhāra*, i.e., sadness and hate. Even the husband, who did not feel any physical pain, would suffer for days if he really loved his wife. *In both cases, the real mental pain was associated with the attachment to each other.* The wife could have dropped something on her foot and would have suffered about the same amount of physical pain. But she would not have had any lingering mental pain associated with that.

- In all the above cases, the initial sense contact was due to a *kamma vipāka*. **No *kamma* energy was generated at that instant.** However, based on that initial contact, we tend to pursue it with our mind and thus may start generating *kamma* automatically. See, “[Avyākata Paṭicca Samuppāda for Vipāka Viññāna.](#)”

Samphassa-jā-Vedanā Arise Due to *Taṇhā*

7. Thus it is clear that in all the above examples, the “extra” happiness or suffering (other than due to *kamma vipāka*) arose from **within one's own mind**. And *taṇhā* (attachment via greed or hate) was the cause of it. See, “[Tanhā – How We Attach Via Greed, Hate, and Ignorance.](#)”

- When we generate such “mind-made *vedanā*,” we also do *kamma* (via *abhisāṅkhāra*) that will bring more suffering in the future.
- The Buddha pointed out that when he described *dukkha* in the *Dhammacakka Pavattana Sutta*. See, “[Essence of Buddhism – In the First Sutta.](#)”

8. Thus all these feelings arise due to *taṇhā*, some form of attachment: greed (craving, liking) or hate (dislike); all these are due to *mano/vacī/kāya saṅkhāra*. The feelings (or rather, the perceptions that give rise to feelings) reside INSIDE oneself. It does not come from outside. We use external things to CAUSE happiness or suffering by our own volition.

- There is no inherent suffering or happiness in ANYTHING external; the sense contact with an external thing CAUSES pain or happiness depending on our *gati* and *āsavā*. An *Arahant*, who has removed all *āsavā*, will be free of such emotional responses.

Connection to *Paṭicca Samuppāda*

9. It is also clear how the accumulation of *saṅkhāra* via *Paṭicca Samuppāda* leads to such varied feelings: If we attach to something with a “like” or a “dislike,” we generate a mindset accordingly. That is *Paṭicca Samuppāda* (*pati + icca* leading to *sama + uppāda*; see, “[Paṭicca Samuppāda – Introduction](#)”).

- If we attached to something with “greed”, we act with that “greedy mindset.” We will be happy if we get what we wanted. If we got “attached” to something with anger, we would have an “angry mindset” and would be happy if we remove whatever caused that anger.
- In either case, the strength of the feeling is also proportional to the strength of the “like” or “dislike”: *Sama uppāda or Samuppāda means both in quality and quantity*; the higher the strength of “*pati + iccha*”, the higher the strength in “*sama + uppāda*.”
- This is how we form habits (“*gati*”) too. A teenager drinking alcohol with a bunch of friends gets attached to that setting and looks forward to having the same experience again. The more he repeats that activity, the more he gets “bonded”, and thus forms a drinking habit. See, “[Habits and Goals](#)” and “[Samsāric Habits and Āsavā](#).”

The sequel to this post is at, “[Feelings: Sukha, Dukha, Somanassa, and Domanassa](#).”

A deeper discussion on *vedanā* at: “[Does Bodily Pain Arise Only Due to Kamma Vipāka?](#),” “[How Are Paṭicca Samuppāda Cycles Initiated?](#),” and “[Avyākata Paṭicca Samuppāda for Vipāka Viññāna](#).”

7.4.10. Feelings: Sukha, Dukha, Somanassa, and Domanassa

5

December 11, 2015; Revised November 19, 2018

In this post, we will discuss an important classification of *vedanā* based on whether they arise due to *kamma vipāka* or our defiled thoughts (*saṅkhāra*).

1. This is a sequel to the previous post, “[Vedanā \(Feelings\) Arise in Two Ways](#),” where we discussed how feelings arise due to *kamma vipāka* and also due to *mano saṅkhāra*.

- As discussed in several posts, we can avoid certain *kamma vipāka* from actually taking place by not making suitable conditions for them to appear, but some strong ones are hard to avoid; see, “[What is Kamma? – Is Everything Determined by Kamma?](#).”
- However, feelings (both good and bad) that arise due to *saṅkhāra* are totally avoidable, and *Arahants* are completely free of them. We discussed this in the previous post.
- Now let us discuss in detail **what types of feelings** arise due to those two causes.

2. First, let us discuss the feelings that we feel in **our physical bodies**.

- They include *sukha vedanā* such as bodily comforts one feels sleeping in a luxurious bed, eating tasty food, smelling nice odors, seeing something attractive, etc. They arise via the five physical senses.
- Then there are *dukha vedanā* that are again brought in via the five physical senses: injuries to the body, headaches, eating something untasteful, smelling a bad odor, hearing to an ear-piercing sound, etc.

- Both those types of *vedanā* are due to *kamma vipāka*, and *Arahants* feel them too. *Sukha vedanā* arise due to *kusala kamma vipāka* (past good deeds) and *dukha vedanā* arise due to *akusala kamma vipāka* (past bad deeds).
 - These *sukha* and *dukha vedanā* mainly exist in the *kāma loka*, where the dense bodies of the beings are sufficiently dense to impart them. In fact, it is mainly in the lower five realms (including the human realm, that *dukha vedanā* exists as *kamma vipāka*. However, the worst types of *dukha vedanā* are in the lowest four realms (*apāyā*), and that is why a *Sotāpanna* is said to have overcome the worst of the suffering forever.
 - In the *deva lokas*, it is mainly the *sukha vedanā* that results due to good *kamma vipāka*. That is why a *Sakadāgāmī* is never born at or below the human realm, and is said to become “healthy forever.”
 - In the *rūpa loka* and *arūpa loka*, beings mainly have *jhānic* pleasures. Thus an *Anāgāmī*, who will never be reborn in the *kāma loka*, is said to become “peaceful forever.”
3. Some *vipāka vedanā* felt by the body are neutral. Furthermore, all *vipāka vedanā* coming through the other four physical senses are also neutral: *adhukkhamā asukha* (without being painful or joyful, just neutral) *vedanā*, which are commonly called *upekkha vedanā*.
- It is important to note that these *adhukkhamā asukha* or *upekkha vedanā* are the true reality of experience. *Vedanā* comes from (“ve” + “danā”) which means “*veema danaveema*” (වීම දැනවීම) in Sinhala. Basically, when we sense something via our six senses, we **become aware** that something happened, i.e., seeing a picture, hearing a sound, etc.; that is *vedanā*.
 - For example, seeing a person X only leads to an *upekkha vedanā* for ANYONE initially.
4. However, within a fraction of a second of that seeing event, it COULD LEAD TO pleasant (*somanassa*) or unpleasant (*domanassa*) feelings DEPENDING ON WHO IS SEEING X. Person X’s wife or child will generate *somanassa vedanā* upon seeing X. However, an enemy of X will generate *domanassa vedanā* upon seeing X.
- On the other hand, a total stranger (or an *Arahant*) will not generate either *somanassa* or *domanassa vedanā* upon seeing X, and that is the true reality, as mentioned in #3 above.
 - Thus both *somanassa* and *domanassa vedanā* are MIND MADE, and arise due to *mano saṅkhāra*. And those *saṅkhāra* are generated based on one’s own *gathi* and *āsavas*.
 - In another example, if two people who are strong supporters of two opposing political parties see the leader of one political party, one will generate *somanassa vedanā* and the other will generate *domanassa vedanā* upon seeing that politician. Thus, those feelings could not have resided with the politician, but arose entirely due to the *gathi* of those two people.
 - An *Arahant* will not generate either kind, because there is no attachment (or repulsion) to anything or anyone for an *Arahant*.
 - This is a very important point that one could do insight meditation on.
5. We also know that both *sukha* and *dukha vedanā* can LEAD TO *somanassa* and *domanassa vedanā* too. For example, When one gets a headache due to a *kamma vipāka*, one could be agonizing over how long that will last, whether that will prevent one from going to a party next day, etc. Those are *domanassa vedanā* due to that initial *dukha vedanā* from the headache.
- On the other side, when one eats a tasty piece of cake (good *vipāka vedanā*), one could be start thinking about buying more of that cake and enjoying it later; that gives rise to *somanassa vedanā*.
 - Both the *domanassa vedanā* and the *somanassa vedanā* in the above two examples are totally mind-made, i.e., due to *saṅkhāra*.

6. Therefore, based on the three types of *vedanā* (*sukha vedanā*, *dukkha vedanā*, and *upekkha vedanā*) that arise due to *kamma vipāka*, ADDITIONAL two types of *vedanā* (*somanassa* and *domanassa vedanā*) COULD arise depending on the *āsava* and *gathi* of the person experiencing them.

- Those feelings that we feel IN THIS LIFE due to *saṅkhāra* are MOSTLY two kinds: *somanassa vedanā* and *domanassa vedanā*. Those *saṅkhāra* also make *bhava* (via thoughts, speech and actions) and those give rise to *kamma vipāka* mostly in future lives but also in this life itself as we discuss below in #11.
- Thus rebirths are also generated via (*abhi*)*saṅkhāra* and that is how the cycle of rebirths is maintained. That is why it is called *saṃsāra* (“*san*” + “*sāra*,” where “*sāra*” means “good”), i.e., one perceives that it is good to keep doing *saṅkhāra* (“*san*” + “*kāra*”, where “*kāra*” or “*kriya*” is action).

7. This is why *Dukkha Sacca* (First Noble Truth) does not mean that we can ELIMINATE the *dukkha vedanā* arising in our present physical body; those are due to *kamma vipāka* (the causes were already done).

- However, by gradually reducing *saṅkhāra* (with increased understanding of Buddha Dhamma), we can stop making new *saṅkhāra* and thus eliminate FUTURE suffering. This is the key to *dukkha sacca*. These *saṅkhāra* are also called *assāda* (*āsvāda* in Sinhala); see, “[Assāda, Ādīnava, Nissarana](#).”

8. Still, we can reduce bad consequences from past *kamma vipāka* using what are called “strategies” (“*upakrama*”) in Buddha Dhamma.

- One is to be mindful and not to let conditions for past *kamma vipāka* to take place. This is discussed in, “[What Is Kamma? – Is Everything Determined by Kamma?](#)” and “[Anantara and Samanantara Paccaya](#).”
- If the *kamma vipāka* has already started imparting its effects (say, someone finds out that one has cancer), then one can work to alleviate that condition by using another related “strategy”: One can get medical help and adopt a lifestyle that is opposes the spreading of the cancer. Even here what we are doing is to overcome this bad condition by making suitable environment for “opposing good *kamma vipāka*” to bear fruit. Thus, if one does not make an effort, the bad *kamma vipāka* will run its course and one may die in short time.

9. Each living being’s body is designed to impart appropriate good and bad *kamma vipāka* suitable for the *kamma* seed that gave rise to that particular life.

- For example, an animal cannot implement “strategies” (“*upakrama*”) to overcome most of its *kamma vipāka*. For example, it is unable to do anything about a wound (other than licking it) or to think about dragging its cot to a sunny spot (our dog likes to be in the sun but we have to move her cot!).
- Some animals have built-in defenses for their survival, but they cannot make them any better. For example, some birds instinctively know how to build a nest, but that “nest design” has not been improved by them over millions of years. And baby turtles “know” the way to the ocean and start trotting in the right direction minutes after their hatching; see, “[How Character \(Gati\) Leads to Bhava and Jāti](#).”
- Animals also are unable to do strong good or bad *kamma*. Even though most animals kill other animals, that is not done with greed or hate, but just for survival. It is just like the instinct for the birds to build nests or the baby turtles to head in the right direction to the sea. In *Abhidhamma* language, they generate mostly, “*upekkha saḥagata citta*” and those have much less *javana* power.
- Thus, animals cannot accumulate much good or bad *kamma*. Otherwise, they will never be able to escape that “*bhava*,” since most survive by killing other animals. In the same way, whenever they get a “good life” (say as a human)– which is very rare — that is due to a good *kamma vipāka* done in a previous “good life.”
- But not all animals are the same. Those “higher up” animals like monkeys can accumulate *kamma* than “lower ones” such as worms, and cats and dogs are somewhere in between.

10. The potency of human *saṅkhāra* comes from the ability of humans to generate both “*somanassa saḥagata citta*” (thoughts with joy) for *kusala kamma* and *akusala kamma*. The *javana* power of those *citta* are very high.

- Thus when one is doing a good deed with joy, that brings much more merits compared to someone who is doing it just because others are doing it, i.e., with an “*upekkhā saḥagata citta*”; see, “[A Simple Way to Enhance Merits \(Kusala\) and Decrease Demerits \(Akusala\)](#).”
- Even more strong *javana* arise when a good deed is done with knowledge that it will lead to good results and why, i.e., one knows right from wrong.
- But the most potent *javana* arise when a good deed is done with understanding of the *anicca* nature, i.e., when one does it with “*somanassa saḥagata ñāṇa sampayutta citta*.” Thus, *paññā* (or *ñāṇa*) comes from an understanding that is deeper than just knowing right from wrong.
- It works the other way around for bad deeds: the most potent *javana* (with high *kammic* power that can lead to rebirth in the *apāyā*) are generated with “*somanassa saḥagata diṭṭhi sampayutta citta*,” i.e., thoughts with joy and **wrong vision**. A good example is someone who commits murder and enjoys and it is done with the *diṭṭhi* that such an action cannot bring bad consequences.
- But when one commits murder due to anger that is done with aversion and displeasure: “*domanassa saḥagata paṭigha sampayutta citta*”; see, “[Akusala Citta and Akusala Vipāka Citta](#).”

11. Now let us consider the consequences of *saṅkhāra* in this life, that we mentioned in #6 above. Suppose a teenager starts associating with bad friends and start drinking alcohol. Initially, he does not even like the taste of it, i.e., he may be generating a *domanassa vedanā* due to the taste of alcohol. But with the insistence of those friends he continues drinking.

- Then he makes a habit (*gathi*) of it, begins to perceive the taste as a *somanassa vedanā*, and starts making *saṅkhāra* about drinking. Even while in the middle of some other task, he starts thinking about the next party where he can drink, and what types of drinks there will be and so on.
- Now “*saṅkhāra paccayā viññāṇa*” step in the *paṭicca samuppāda* leads to making a “new *viññāṇa* for drinking.” The more he thinks about such parties and generate those *somanassa vedanā*, the more *viññāṇa*, *nāma rūpa*, etc that he makes for such “drinking events.”
- And the stronger that “*viññāṇa* for drinking” gets, the more he will be thinking about it (making more *saṅkhāra*). Then the habit is strengthened; see, “[How Habits are Formed and Broken – A Scientific View](#).”

12. Mind phenomena are complex. But with the background that we have accumulated, we can figure out some of the causes and possible effects. There is no need to memorize all these different terms; they will be carved into the memory as one contemplates and sorts out one's own experiences.

To summarize: *Sukha* and *dukkha vedanā* arise due to *kamma vipāka*. *Somanassa* and *domanassa vedanā* arise due to *saṅkhāra*, which in turn arise due to our *gati* and *āsava*s. The more *saṅkhāra* we do, the stronger a given *gathi* (habit) becomes, which in turn become *āsava*s (cravings) and fuel the *sansāric* journey (rebirth process). This vicious cycle can be broken only through comprehending the *anicca* nature of this world.

7.4.10. ⁶ Kāma Assāda Start with Phassa Paccayā Vedanā or Samphassa Jā Vedana

Revised April 29, 2021

In posts with advanced concepts, I have to use too many Pāli words. There are no short phrases in English to give the same meanings for phrases like “*samphassa jā vedanā*.” Thus it will be beneficial to learn the meanings of these Pāli words and phrases and be able to pronounce them if that seems to be helpful. I have

included some audio files in the post, “[Pāli Glossary \(A-K\)](#) and [Pāli Glossary \(L-Z\)](#).” Here is how to pronounce the Pāli words in the title of this post:

[WebLink: Listen to pronunciation of : kāmā-āsvāda-phassa-paccaya-vedanā-samphassa-ja-vedanā](#)

1. In the previous post, “[What is Kāma? It is not Just Sex](#),” we saw that *kāma* is not sex or even attractive sense objects, ear-pleasing sound, tasty food, nice smell, or a sensual body touch as many believe. ***Kāma* is basically *vacī saṅkhāra* about sense-pleasing objects (constantly thinking about those pleasures)**, whether it is an eye-catching object, ear-pleasing sound, tasty food, nice smell, or a body touch.

- We saw that *kāma* (or *kāma āsvāda*) is *saṅkappa* (*sankalpita* in Sinhala) *rāga* which means **thinking about** such sense objects and giving priority to them. We also saw that such *kāma assāda* (or *asvāda* in Sinhala) are *vacī saṅkhāra* that arise when certain sensory inputs trigger our deep-seated *āsava/anusaya* (which are related to our habits or “*gatī*”).
- Thus we can see that *kāma assāda*, *sankalpita rāga*, *mano saṅkhāra* mean basically the same thing.
- **To re-emphasize: *kāma assāda* are beyond actually experiencing those sense inputs that come our way due to good *kamma vipāka*** (even though one would need to stay away from high-pleasure activities, because one could get used to them and make corresponding habits). ***Kāma assāda* are craving and thinking and planning about such sense inputs.**
- Some extreme *kāma assāda* (or at least actions and speech initiated by them) can be suppressed by understanding the bad consequences (*ādīnava*) of them.
- Without a Buddha appearing in the world, we would not even realize that even milder *kāma assāda* have bad consequences (*ādīnava*). Yet, they do have bad consequences as we saw in the previous post.

2. The critical point that we need to discuss now is how to prevent milder but still harmful *kāma assāda* from arising in our minds. We basically have to use the same tactic discussed in the previous post and also in the introduction to this series, “[Assāda, Ādīnava, Nissaraṇa – Introduction](#).”

- When a mind comprehends that certain actions are harmful, it avoids such actions. As we discussed in that introductory post, the best way to quit smoking is to understand the bad consequences of that habit fully. Another is to cultivate a good habit (say, listening/reading Dhamma) instead.
- In the previous post, we discussed how we avoid immoral actions via speech and bodily actions by comprehending the bad consequences of such actions.
- In other words, the primary way to effectively remove bad habits (*nissaraṇa*) is to comprehend the bad consequences (*ādīnava*) of such *kāma assāda* from arising in our minds.

3. This is where another important aspect of Buddha’s “previously unheard Dhamma” comes into play. This unique message is that in addition to being harmful, *kāma assāda* are unfruitful in the long run. Even though we normally value them, when analyzed with the way the Buddha taught, we can see that they are just mind-made due to our ignorance of the true nature of this world.

4. It is important to understand the big difference between *vipāka vedanā* and *kāma assāda*. We cannot stop *vipāka vedanā* from arising, but we can stop *kāma assāda* by cleansing our minds.

A *vipāka vedanā* normally triggered *kāma assāda*. Also, *kāma assāda* are **totally made up in our minds**. Let us take a simple example to gain more insight.

- Husband and wife are walking down the street, and the wife stops and looks at a beautiful painting on display in a store window. The husband looks at it, shrugs his shoulders and wants to move on. It is somewhat expensive, so she is thinking about whether they can afford it right now, but she would really like to buy it. Husband has no interest in it and thinks that it is a waste of money to buy it.
- They both saw the same painting as a *vipāka vedanā*. That was just the “seeing event,” and as we will discuss in *Abhidhamma*, **most *vipāka vedanā* are neutral**, like seeing or hearing. **The exceptions are**

bodily contacts, which can be either bodily *dukha vedanā* (like a cut or a headache) or *sukha vedanā* (like getting a massage or being in an air-conditioned room on a hot day) depending on whether it is bad or a good *vipāka*.

- Now, any “happy feeling” generated in the wife’s mind would have been due to *kāma assāda*. The mind of the husband did not generate such a “happy feeling.” This is an important point. **The “happy feeling” in the wife’s mind could not have been a property of the painting**; if so, it should have given the same “happy feeling” to the husband!

5. Thus in the above particular case, only the wife enjoyed *kāma assāda* due to seeing the painting. In other words, a *pavutti akusala-mūla Paṭicca Samuppāda* cycle operated only for the wife. Her deep-seated craving (*āsava/anusaya*) for such an object led to acting with *avijjā*.

- We could also state the same process by saying that “*cakkhuñca paṭicca rūpe ca uppajjati cakkhuviññāṇam*” was followed by “*tiṇṇam saṅgati phasso*” and “*phassa paccayā vedanā*”; see, “[Tanhā – How We Attach Via Greed, Hate, and Ignorance.](#)”
- Now she is attached and deliberately looks at the picture, “*avijjā paccayā saṅkhāra*” step started and then went through the step, “*(san)phassa paccayā vedanā*” in a fraction of second; see, “[Idappaccayatā Paṭicca Samuppāda.](#)”
- However, for the husband, who saw the same painting, there was no *āsava/anusaya* for such an object to “attach to it” and to act with *avijjā* and to initiate those processes; also see, “[“Self” and “no-self”: A Simple Analysis – Do We Always Act with Avijjā?](#).”
- For some, this may be crystal clear but those who are not very familiar with the concepts may want to review those relevant posts.

6. Now that she is “attached” to the painting, the wife keeps looking at it for a while, which will lead to numerous such *pavutti akusala-mūla Paṭicca Samuppāda* cycles. Not only that, she will be enjoying “*kāma assāda*” about that picture even after they left that place by thinking back about it. Now she has made a “*viññāṇa*” and a “*bhava*” for it.

- That “*kāma assāda*” can resurface with *Paṭicca Samuppāda* cycles that involve only the mind when she is at home: It starts with “*manañca paṭicca dhamme ca uppajjati manoviññāṇam*,” i.e., she just remembers the painting while washing dishes. How does she start thinking about the painting when she was busy with some other task?
- One way to explain that is to say that “she had ‘cultivated’ a *viññāṇa*” for that painting and now it can sometimes resurface even without a prompt. This is sometimes known as the “subconscious”; see, “[3. Viññāṇa, Thoughts, and the Subconscious.](#)”
- Another way to explain it by saying that she had made a “*bhava*” for liking that painting and it is a *dhamma* that can enter the mind when the conditions are right: “*manañca paṭicca dhamme ca uppajjati manoviññāṇam*.” However, that particular *dhamma* or concept or thought would never make contact with the mind successfully if she was listening to a discourse or thinking about a key concept like *anicca* since she was doing a task that did not motivate her much (washing dishes) that is an opportunity for such “subconscious *viññāṇa*” to come to the surface.

7. Of course, now that “*manañca paṭicca dhamme ca uppajjati manoviññāṇam*” step will be followed by, “*tiṇṇam saṅgati phasso*” and “*(san)phassa paccayā vedanā*”; see, “[Difference between Phassa and Samphassa.](#)” Her “*gati*” for liking such pictures will make her mind “*samphassa*,” which in turn will lead to “*samphassa paccayā vedanā*” or “*samphassa jā vedanā*.”

- This is a *vedanā* that her husband will not get. He did not make a “*viññāṇa*” or a “*bhava*” for that painting and thus it will not come to his mind.

8. Now, suppose that a week later they are walking by the same store. The wife remembers the painting, but finds that it is no longer there; someone had bought it. Now, think about what happens to the two of them.

- The wife will be distraught: “I should have bought it; now I may not be able to find such a nice painting.” But the husband will not have any bad feelings, except may be some bad feelings about his wife not been able to get what she wanted.
- This is the suffering that we can stop from arising even in this life. It is not a *vipāka vedanā* but a “*samphassa jā vedanā*.” The wife got distraught only because she got attached to that painting, but the husband did not.

9. I just gave a straightforward example from real life. Of course it is a relatively insignificant “*taṇhā*” without drastic consequences. I just wanted to use it, because most people can understand it. Of course, the consequences can be much harsher if one gets attached to something of more significant, keep thinking about it and make that “*viññāṇa* grow,” and eventually does something bad to acquire it.

- a) For example, X who “falls in love” with Y, may be thinking about it all day and make a “very strong greedy *viññāṇa*” about X. So, X makes all kinds of plans in his/her mind about Y, and the more he/she does it, the more strong that *viññāṇa* gets.
- b) The more strong that *viññāṇa* is, it is more likely to “come to his/her mind” because it is a *dhamma* that is constantly hovering around his/her mind (or in the subconscious). It is easy to start more PS process with “*manañca paṭicca dhamme ca uppajjati manoviññāṇam*.”

10. Note the difference between a) and b) above. In a), the process starts with “*avijjā paccayā saṅkhāra*” when X first thinks about Y and starts thinking about Y with *avijjā* and gets “bonded to Y” in his/her mind. At this point, a “baby *viññāṇa*” is formed about Y.

- Now, since it is at an early stage, this “baby *viññāṇa* for Y” may not trigger “*manañca paṭicca dhamme ca uppajjati manoviññāṇam*” (process b) often. And that *viññāṇa* may start dying out if X does not get to think about Y for a while.
- But if X sees Y again in a few days, then that “baby *viññāṇa* for Y” gets fed again. The sight of Y makes X go through many PS cycles and strengthen that “*viññāṇa* for Y.”
- If X gets to see Y often and may be even to “hang out with Y,” that “*viññāṇa* for Y” will grow because now X is giving it a lot of food (*āhāra*).
- Now with a “strong *viññāṇa* for Y,” X’s mind will constantly be bothered with “*dhamma* about Y,” and it is more likely that “*manañca paṭicca dhamme ca uppajjati manoviññāṇam*” will be triggered even while X is doing something else.

11. Then, one day, X hears that Y has got engaged to another person. What will happen to X? He/she will be highly distraught, and depending on the level of attraction (and X’s *gati*), X may do something bad.

- For example, if the attraction (level of *taṇhā*) was firm, AND if X has “violent character” (i.e., “violent *gati*”), then X may hurt Y or the person that Y got engaged to. Then not only will X be suffering due to “loss of Y,” but would also have made causes for FUTURE SUFFERING by committing a bad *kamma*.

12. Now we can see how both *taṇhā* and *gati* are two critical issues. One can lessened both by contemplating on the bad consequences (*ādinava*) of acting foolishly.

- Comprehending *anicca, dukkha, anatta* is the best way. Then one’s *gati* will change permanently to the “moral *gati*” of a *Sotāpanna*, and one will never do anything that will lead to the birth in the *apāyā*. Even though a *Sotāpanna* may still generate “*samphassa-jā-vedanā*,” due to some sense inputs, those will be milder, and thus any suffering incurred would be mild.
- I hope that it is clear from this discussion that it is impossible to suppress *kāma assāda* or thoughts about sense objects forcibly. The only way is via purifying the mind by learning Dhamma (especially the *anicca* nature of this world) and thinking about the bad consequences of such thoughts (*ādinava*). This is what

the Buddha realized as the *āsavakkhaya ñāṇa*, the way to get rid of *āsava* (and *anusaya*) via getting rid of bad habits (*gati*) and cultivating good habits (*gati*).

- And this is discussed in the meditation (*Bhāvanā*) section under, “[9. Key to Ānāpānasati – How to Change Habits and Character \(Gati\)](#).”

7.4.11 Sakkāya Diṭṭhi is Personality (Me) View?

March 10, 2017; revised January 20, 2018; June 1, 2019; October 3, 2019; July 24, 2020

In this post, we will discuss why interpretations of two key concepts — *sakkāya diṭṭhi* and *saṃyojana* — in many current English publications (including supposedly *Theravāda* texts) are incorrect.

Difference Between Wrong Views and Wrong Perceptions

1. Most texts describe *sakkāya diṭṭhi* as “self-illusion” or “personality belief,” i.e., “belief that a self or I exist” (you can Google “*sakkāya diṭṭhi*” and see). **Here it is essential to understand that there is a difference between “wrong view” and “wrong perception.”** A *Sotāpanna* would have removed the wrong view (*diṭṭhi*), but not the false perception (*saññā*.)

- But this **perception (*saññā*)** of a “self” (or a “soul” which is also called “*ātma*”) is NOT *sakkāya diṭṭhi* per *Tipiṭaka* as we discuss below. That is a *saññā* (perception) that we have carried from life-to-life. For a discussion on *saññā*, see, “[What is Saññā \(Perception\)?](#).”
- The deeply-embedded idea of a “self” or an innate sense of “me” is rooted in the *māna cetasika*.
- If one gets offended if treated with disrespect, that means one still has *māna* left. Even an *Anāgāmī* could be somewhat perturbed if he/she perceives to be treated badly. A component of *māna* — called *asmi māna* — is still left at the *Anāgāmī* stage. ***Māna* is removed not at the *Sotāpanna* stage, but the *Arahant* stage.**

A Sotāpanna Removes Only Wrong Views About an “Unchanging Self”

2. What is removed at the *Sotāpanna* stage is the **wrong view (*diṭṭhi*)** that there is something unchanging and permanent like a “soul” is associated with oneself. That goes with the belief that lasting happiness can be achieved by just living a moral life (even though that is essential.)

- When one can see that there is no “real essence” (like a “soul” or a “*ātma*”) associated with a living being, this **wrong view** of *sakkāya diṭṭhi* goes away. A lifestream evolves, according to *Paṭicca Samuppāda*; see, “[Anattā in Anattalakkhana Sutta – No Soul or a Ātma](#).”
- **Therefore, it is incorrect to believe that the perception of a “self” will go away at the *Sotāpanna* stage.** It is also dangerous, because one is trying to do something that is **not possible** to do at that stage. It is like a child in the primary school trying to get a Ph.D.

Sotāpanna Stage – Four Conditions

3. In the post, “[Four Conditions for Attaining Sotāpanna Magga/Phala](#),” we discussed the four conditions that need to be satisfied to attain the *Sotāpanna* stage of *Nibbāna*.

- With fulfilling those conditions, one will break through *three saṃyojana* (mental bonds) and be permanently released from rebirths in the *apāyā* (four lowest realms). The Pāli word *saṃyojana* (or *sanyojana* or *sanyoga*) is usually translated as “fettors.” See, for example, the Wikipedia article: “[WebLink: WIKIPEDIA: Fetter \(Buddhism\)](#).”
- But as in many English publications (books, internet posts), the above Wikipedia article misdescribes *saṃyojana*.

4. We are bound to the 31 realms in this world by ten “**mental tethers**” or *saṃyojana*. It can be visualized as someone attached to a post by a rope, except that there is no one else that forcibly bind us to the 31 realms.

- *Saṃyojana* or *sanyoga* (“*san*” + “*yoga*” where “*yoga*” means to bind) means bound via “*san*”; see, [“What is ‘San’? Meaning of Saṃsāra \(or Saṃsāra\).”](#)
- We voluntarily bind ourselves to this world with our minds, because we believe that somewhere in these 31 realms we can find permanent happiness.
- **Most people think they can find happiness in this life itself!** They don’t even pause to contemplate what happens when one gets old and helpless. If one takes time to observe, there are many examples around: famous, wealthy, and powerful, became disabled at old age, and died a miserable death.

Three *Saṃyojana* Removed

5. A *Sotāpanna* breaks through 3 of those ten *saṃyojana* — or “bonds” or “tethers” — and gets permanently released from the four lowest realms (*apāyā*). He/she does this by comprehending the true nature of this world, i.e., attaining *sammā diṭṭhi*.

The keyword “*sammā*” comes from “*san*” + “*mā*,” which means “to become free of *san*.” For example:

- “*Mā hoti jāti, jāti*,” means “may I be free of repeated birth.”
- “*Mā me bāla samāgamo*” means “may I be free of association with those who are ignorant of Dhamma.”
- Thus *sammā diṭṭhi* is to be free of wrong views. One gets some level of *sammā diṭṭhi* at the *Sotāpanna* stage and completes it at the *Arahant* stage.

Importance of Comprehending the Unfruitful/Dangerous Nature of This World (*Tilakkhaṇa*)

6. **One has to break those bonds in one’s mind.** One gains *sammā diṭṭhi* — right view to become free of ‘*san*’ — by comprehending the true nature of this world of 31 realms.

Anicca – that nothing in this world can bring permanent happiness in the long run.

Dukkha – despite our struggles, we will be subjected to much more suffering than pleasures if we remain in the rebirth process.

Anatta – therefore, one is truly helpless in this struggle to attain “something of the essence in this world.” That is just an illusion.

- See, [“Anicca, Dukkha, Anatta – Wrong Interpretations.”](#)

Two Eightfold Paths

7. It is essential to realize that there are two Eightfold Paths with two types of *sammā diṭṭhi*. See, [“Buddha Dhamma – In a Chart”](#) and [“Mahā Cattārīsaka Sutta \(Discourse on the Great Forty\).”](#)

- One first needs to reach a “moral mindset” by staying away from immoral acts embedded in the five precepts. That is attaining “**mundane sammā diṭṭhi**.”
- Then one’s mind is cleansed enough to comprehend the Three Characteristics of this world: *anicca*, *dukkha*, *anatta*.
- When one gains this “**lokuttara sammā diṭṭhi**” to some extent, one will indeed start on the Noble Eightfold Path; see, [“How to Cultivate the Noble Eightfold Path starting with Anicca, Dukkha, Anatta.”](#)

- This distinction is hard to perceive for many people. I encourage them to read the first few subsections of the “[Living Dhamma](#)” section.

8. Now let us discuss how gaining *lokuttara sammā diṭṭhi* leads to the removal of three of the ten mental tethers (or fetters) that bind us to the rebirth process. In particular, to be released from the worst types of suffering in the *apāyā*.

- Those three *samyojana* are *sakkāya diṭṭhi* (also called *sathkāya diṭṭhi*), *vicikicchā*, and *silabbata parāmāsa*.

Two Prevailing Major Wrong Views

9. The Buddha discussed 62 types of *diṭṭhi* that were present during that time in the *Brahmajāla Sutta*. We don't need to address all of them today, because there are only two of those wrong views that are prevalent today.

- Religious people (Creator-based religions), believe that there is a “permanent soul,” and one will be born in heaven or hell forever after this life. This idea of a “*āthma*” or a “self” was the *sassata diṭṭhi*.
- Science today believes that our thoughts arise in our brains, i.e., our mental body is the same as the physical body (“I am my body”). So, when we die, that is the end of the story because the physical body becomes dust; so they say, “enjoy life while it lasts.” That was the “*uccheda diṭṭhi*” (pronounced “uchcheda”) that the Buddha also rejected: “Life terminating with the death of the physical body.”
- Thus the Buddha rejected both wrong views that “a self exists” and “a self does not exist.” Things can exist due to causes, and if those causes do not exist, they cease to exist. That is the principle of cause and effect explained in *Paṭicca Samuppāda*. Beings exist due to *avijjā* and *taṇhā*, and they cease to exist when those cease to exist and reach permanent happiness (i.e., attain *Nibbāna*).

10. Even those religious people may subconsciously have that part of the *uccheda diṭṭhi* of “I am my physical body.”

- Our increasingly materialistic societies always feed this narrative — that it is so important to look beautiful and robust because my body is what I am — via television and movies.
- In other words, *sakkāya diṭṭhi* in the present day is rooted in the view of “I am my physical body.” That leads to the perception, “I can achieve happiness by providing a lot of pleasurable sense inputs to my body.”

Meaning of *Sakkāya* or *Sathkāya*

11. “*Sath*” means “good” or “fruitful.”

- And *kāya* can mean either **one's actions** or **one's body**, as we discussed in *Kāyārupassanā*; see, “[Kāyārupassanā – Section on Postures \(Iriyapathapabba\)](#).”
- ***Sakkāya diṭṭhi* encompasses mainly two views:** (i) “I am my body,” and I need to keep it beautiful above all. (ii) I can achieve happiness by diligently pursuing (good) things in this world.
- **This view is of course related to the perception of *nicca*. That it is possible to maintain things to our liking or *icca* (or *icchā*.)** See, “[Sakkāya Diṭṭhi – “Me and Mine” View](#)”

Getting Rid of *Sakkāya Diṭṭhi*

12. Therefore, getting rid of *sakkāya diṭṭhi* in the present day requires one to realize that this physical body is “just a shell” that we have possession of only for about 100 years.

- That is why it is essential to realize the role played by our mental body, *gandhabba*, which could live for thousands of years. But that also will cease to exist when we grasp a new existence (*bhava*) at the *cuti-paṭisandhi* moment when the *gandhabba* itself dies.
- Our next existence depends not on how well we keep our physical bodies (they need to be healthy), but how well we “improve” our mental body. Learning *Dhamma* and living according to that *Dhamma* helps with the latter.
- I have given a more straightforward explanation of *gandhabba* at the “Living Dhamma” section: “[Mental Body – Gandhabba](#),” and there is a separate section in the *Abhidhamma* section that goes into more detail.

13. The second view associated with *sakkāya diṭṭhi* in #10 above. That one can achieve happiness by diligently pursuing things in this world. *Sakkāya diṭṭhi* can only be removed by comprehending the “*anicca* nature.”

- See, “[Anicca, Dukkha, Anatta](#).”
- When one comprehends *anicca*, one realizes that no matter what we do, staying in the rebirth process leads to net suffering. *Even though there are bouts of happiness to be had, those will be insignificant to suffering in the long run, especially when one is (inevitably) born in the apāyā.*

Cūḷavedalla Sutta (MN 44)

14. It should be noted that a full explanation of *sakkāya diṭṭhi* is given in the [Cūḷavedalla Sutta \(Majjhima Nikāya 44\)](#) where Ven. Dhammadinna explains it to her former husband Visakha:

“..*Kathaṃ paṇāyye, sakkāyadiṭṭhi hotī*”ti? “*Idhāvuso visākha, assutavā puthujjano, ariyānaṃ adassāvī ariyadhammassa akovido ariyadhamme avinīto, sappurisānaṃ adassāvī sappurisa-dhammassa akovido sappurisa-dhamme avinīto, rūpaṃ attato samanupassati, rūpavantaṃ vā attānaṃ, attani vā rūpaṃ, rūpasmiṃ vā attānaṃ. Vedanaṃ ... pe ... saññāṃ ... saṅkhāre ... viññāṇaṃ attato samanupassati, viññāṇavantaṃ vā attānaṃ, attani vā viññāṇaṃ, viññāṇasmiṃ vā attānaṃ. Evaṃ kho, āvuso visākha, sakkāyadiṭṭhi hotī*”ti.

- First, it is essential to realize that “*atta*” in the above verse used in the conventional sense, to denote “I.”
- What we have discussed regarding “I am my body” is stated in the bold text above that can be translated as: “**I am my body, my body is me, my body is in me, I am in my body**”; see, “[Anattā in Anattalakkhaṇa Sutta – No Soul or an Ātma](#).” Thus one may see one’s *rūpakkhanda* as one’s “*attā*” in four ways.
- In the same way, some people could take one’s *vedanā*, *saññā*, *saṅkhāra*, and *viññāṇa* to be oneself in four ways as above. All these mental components give rise to the idea that “I remember this and that happened to me a long time ago; so there must be a continuation of me until the body dies.” Therefore, this wrong view encompasses 20 types of (“*visativatthuka*”) *sakkāya diṭṭhi*.”
- The French Philosopher Rene Descartes famously said, “I think; therefore I am”; he proposed that those thoughts arise in the pineal gland in the brain. That is a part of *uccheda diṭṭhi*.

Two Meanings of Atta

15. When one attains the *Sotāpanna* stage, one “sees with wisdom” (becomes “*dassanena sampanno*”) that it does not make sense to take the stand “I am my body,” etc. as above.

- However, “just seeing” that it makes sense, and verifying and experiencing that to be accurate, are two different things. One finally confirms that to be accurate and thereby gets rid of the perception of “me” (called “*asmi māna*”) only at the *Arahant* stage.

- There was a lengthy discussion on this issue at the discussion forum. I recommend reading it since it is not possible to put it in a short post like this; see, "[WebLink: Wrong English translations of Anicca, Anatta, Sakkāya diṭṭhi.](#)"

16. The confusion in conventional translations of *sakkāya diṭṭhi* seems to arise when they try to connect “*atta*” in the above verse (“*rūpaṃ attāto*”) as the opposite of “*anatta*” in *Tilakkhaṇa*. ***Atta* has two meanings**: one meaning is “I” or “myself” as in “*Atta Hi Attano Nātho*” (“only I can be of salvation to myself”), and that is the meaning implied in the above verse.

- The other meaning of “*atta*” is “in control” or “has an essence”, and the opposite of that is the *anatta* in *Tilakkhaṇa*: “one is helpless in this rebirth process.”
- Those two meanings are explained in “[Attā Hi Attano Nātho](#)” and in detail in, “[Pāli Dictionaries – Are They Reliable?](#).”
- That is why one needs to be cautious when using Pāli dictionaries. **One cannot define and fix the meaning of a Pāli word.** One HAS TO KNOW the context; see, “[Pāli Dictionaries – Are They Reliable?](#).”

What is *Vicikicchā*?

17. The second *saṃyojana* removed at the *Sotāpanna* stage is *vicikicchā*. Does it mean doubts about the Buddha, Dhamma, and Saṅgha as explained in many translations? It is informative to see how such doubts are related to the *Tilakkhaṇa*.

- *Vicikicchā* comes from *vi+chi+ki+icchā*. Our distorted views (*diṭṭhi*) that worldly things can lead to happiness lead to our liking (“*iccā*”) for them. We then take actions (“*kī*” or “*kriyā*”) are based on our craving. And, “*Cha*” means *citta* or the way we think, here based on such *diṭṭhi*. In this case, “*vi*” means “distorted” (විකූල in Sinhala.) **Therefore, to engage in actions (and thoughts) based on the wrong view that it is possible to maintain things to our liking is *vicikicchā*.** See, #11 above.
- Therefore, *vicikicchā* goes away simultaneously with the loss of *sakkāya diṭṭhi*.
- **One dissociates from such wrong views by comprehending “*anicca* nature.”** When one becomes a *Sotāpanna*, one automatically sees the “fruitlessness” in many immoral or inappropriate actions. One truly knows deep down that most of our efforts in pursuing sense pleasures are in vain. However, until one becomes an *Anāgāmī*, one is still attached to sense desires.
- For example, a *Sotāpanna* may still engage in sex, but will not engage in immoral sexual activities outside marriage. While the first can still lead to one’s rebirth in the human and *deva* realms, the latter can lead to births in the *apāyā*. A *Sotāpanna* is released only from the *apāyā*.
- In other words, if one has *vicikicchā*, one MAY do immoral *apāyagāmī* actions under tempting conditions. But a *Sotāpanna* is INCAPABLE of doing such actions under ANY circumstance. A *Sotāpanna* will not have any doubts about which activities are really immoral.

What is *Silabbata Parāmāsa*?

18. The third *saṃyojana*, *silabbata parāmāsa*, is the wrong view that *Nibbāna* can be attained by following specific precepts/rituals. They include five or eight precepts (or just by doing good things).

- Attaining *Nibbāna* REQUIRES *lokuttara sammā diṭṭhi*. To achieve *lokuttara sammā diṭṭhi*, one needs to grasp the *Tilakkhaṇa* (*anicca, dukkha, anatta*). See, “[Anicca, Dukkha, Anatta.](#)”
- **When one comprehends *anicca*, one stays away from immoral actions. That happens not because one is firmly adhering to a set of precepts or rituals. Now one knows deep inside that such activities are fruitless and dangerous in the long run.**

- However, following precepts (i.e., staying away from immoral deeds) is necessary to get to mundane *sammā diṭṭhi*. That enables one's mind cleansed enough to be able to comprehend *Tilakkhaṇa*.

***Kāma Rāga* NOT Removed at *Sotāpanna* Stage**

19. Finally, a *Sotāpanna* needs to break two more *samyojana* or bonds — *kāma rāga* and *paṭigha* — to become free of the *kāma loka*. Only an *Anāgāmi* is free of rebirth anywhere in the *kāma loka*, which includes human and six *deva* realms.

- The last five *samyojana* (including the perception of a “self” or *māna*) will be removed only at the *Arahant* stage; see, “[The Cooling Down Process \(Nibbāna\) – How Root Causes are Removed.](#)”

July 24, 2020: A detailed discussion at “[The Five Aggregates \(Pañcakkhandha\)](#)” and “[Origin of Life.](#)”

7.4.12 Akusala Citta – How a *Sotāpanna* Avoids *Apāyagāmi* Citta

1. First I need to clarify the title. Of course, *citta* (pronounced “chittha”) are thoughts. All *kamma* start as *mano saṅkhāra*, i.e., one starts thinking about something and it escalates into speech and bodily action by the “wheeling” or “*riya*” process; see, “[Nibbāna – Stopping of the Sansāric Vehicle.](#)”

- The complete cessation of doing *saṅkhāra* happens only when one becomes an *Arahant*. But after attaining the *Sotāpanna* stage, this “wheeling process” stops for certain types of initial thoughts or *citta*.

2. We have seen that *apāya* is a common word for the lowest four realms of existence, see, “[The Grand Unified Theory of Dhamma.](#)” *Apāyagāmi* (“*apāya*” + “*gāmi*” means directed towards) *citta* are those that lead to potent *kamma* responsible for rebirth in the lowest four realms.

3. So, what *cittā* or thoughts get one started on the “wheeling process” or a “thought process” that leads to speech or bodily action of very bad consequences, i.e., birth in the *apāyā*? These are thoughts that arise because one does not have a full understanding of the “nature of this world”, i.e., the *Tilakkhaṇa*, or *anicca*, *dukkha*, *anatta*.

Out of the 89 possible *citta* (see, “[The 89 Types of Citta](#)”) 12 are immoral *citta*.

- 8 with the *lobha* (greed) root; *moha* root is there too.
- 2 with the *dosa* (hate, ill will) root; *moha* root is there too.
- 2 with just the *moha* (ignorance) root.

ALL TEN immoral acts (*dasa akusala*; see, “[Ten Immoral Actions \(Dasa Akusala\)](#)”) are done with these 12 types of *citta*.

4. We generate greedy thoughts because we “want to get possession of things that seem to provide happiness.” When we do not get what we want, we generate hate or ill will towards whoever is in the way.

- And we do both types of actions because we do not realize that it is not possible to achieve lasting happiness with anything in “this world.” Not only that, but we also do not realize that by doing those bad actions we accumulate bad *kamma* (i.e., accumulate *kammic* energy) that are going to have bad consequences in the future, either in this very life or in future lives.
- Thus ignorance of the true nature of “this world” is the cause of all bad actions done with greed and hate; this is why the *moha* root is in all of them. We also do certain bad actions just based on ignorance too, like comparing how one is “better” than another, etc.

A. The **two ignorance-rooted *citta*** are:

- One associated with *vicikicchā* (*vichi+ki+ichcha* = liking based on the distorted view, i.e., *diṭṭhi*). Commonly *vicikicchā* is described as “doubt”, which could be taken as “doubt about the true world view.” Just like a fish biting on a bait due to not “seeing” the hook, we just grab things without “seeing”

the consequences, i.e., possible harm to others and the consequences of such harmful actions for ourselves.

- One associated with *uddhacca* (restlessness or agitation of the mind). This is the opposite of *samādhi* or the ability to concentrate and be able to think through the consequences of actions. One could have *uddhacca* even if one knows the “true nature” of this world; it is sort of a cumulative result of all defilements accumulated through beginning-less *samsāra*. This is completely removed only at the *Arahant* stage.

All 12 types of *citta* have ignorance as a root (primary as in the above two types) or as secondary in the other ten *citta*. These ten *citta* can be divided into two categories in another way, i.e., based on whether such *cittā* arise mainly due to *vicikicchā* (i.e., due to not knowing the true nature of this world) or *uddhacca* (i.e., the agitation of the mind due to all accumulated defilements).

B. Out of the **eight greed-rooted *citta***, four arise with wrong view (*diṭṭhi*), i.e., due to lack of understanding of the “true nature of this world”, and that “this world” is much more complex than we perceive with our senses, and that our life does not end here, but what we do will have consequences for very long times into the future. The other four are done anyway, even with the right view, because of the agitation of the mind due to all “gunk” accumulated over the long *sansāric* journey. Thus the eight greed-based *citta* can be divided into two broad categories:

- Four done with wrong views (*diṭṭhi*) are removed at the *Sotāpanna* stage.
- Four dissociated from wrong view (i.e., it does not matter whether one has right view if defilements still cloud the mind; for example even one who has attained the *Sotāpanna* stage may do these four)

C. The **two hate-rooted *citta*** are also done regardless of whether one has the right view (at the *Sotāpanna* stage) or not:

- These two hate-rooted *cittā* are dissociated with wrong views but are due to the agitated mind (*uddhacca*). Thus they persist after the *Sotāpanna* stage, up to the *Anāgāmī* stage.

Now we can see the broad view:

5. Five *cittā* (*vicikicchā* and the four greed-rooted *citta* associated with wrong view) arise because one does not know the true nature of the world, *Tilakkhaṇa*, i.e., *anicca*, *dukkha*, *anatta*. They contribute to one of the four types of *āsava* called the *diṭṭhi āsava* or *diṭṭhāsava*.

These are the same *citta* that could lead to *apāyagāmī kamma*. **Thus when one attains the *Sotāpanna* stage, these five *citta* cease to arise forever, and one WILL NOT BE ABLE to do any such grave *kamma*.** Thus, the *Sotāpanna* stage is a very important stage of *Nibbāna* where *āsavakkhaya* happens to a significant level due to the removal of *diṭṭhāsava*:

- A *Sotāpanna* attains that stage just by getting rid of *diṭṭhi* or wrong views: *sathkāya* (or *sakkāya*) *diṭṭhi* is the view that lasting happiness can be attained via pursuing things in this world. *Vicikicchā* is leads to tendencies and actions associated with wrong worldviews, and *sīlabbata parāmāsa* is the view that *Nibbāna* can be attained by following specific precepts/rituals without cleansing the mind.
- The other seven *citta* are the ones that are harder to remove. They arise due to an agitated mind which is a result of other defilements (*āsavas*) that we have accumulated over the long *samsāra*; see. “[The Way to Nibbāna – Removal of āsavas](#).”
- Out of these, the two hate-rooted *citta* are lessened in strength at the *Sakadāgāmī* stage and are removed at the *Anāgāmī* stage.
- The remaining four greed-rooted *citta* (those dissociated from wrong views) contribute to *kamarāga* (greed for things in the *kāmaloka*). *Kamarāga* is lessened at the *Sakadāgāmī* stage and completely removed at the *Anāgāmī* stage. Thus an *Anāgāmī* is unable to generate hateful thoughts or lustful

thoughts and is free from rebirth anywhere in the *kamaloka*. An *Anāgāmī* has removed *kamasava*, another part of the *āsava*.

- Finally, it is only at the *Arahant* stage that those remaining four greed-rooted *citta* (which still contribute to *bhavasava*) and the *uddhacca citta* (which still contribute to *avijjasava*) are completely removed. This is when all the defilements or *āsavas* are completely removed from one's mind.

6. It is clear that all five *akusala citta* that are removed at the *Sotāpanna* stage arise due to *micchā diṭṭhi*, i.e., not comprehending the Three Characteristics of existence: *anicca*, *dukkha*, *anatta*. Also see, “*Diṭṭhi* (Wrong Views), *Sammā Diṭṭhi* (Good/Correct Views).”

7. This realization of correct views CANNOT be attained by following rituals, such as just obeying precepts. It comes naturally when one COMPREHENDS the true nature of this world of 31 realms: *anicca*, *dukkha*, *anatta*; see, “[Anicca, Dukkha, Anatta](#).” That it is unfruitful to involve in any kind of activities to gain mundane pleasures by hurting other beings. Such an understanding makes irrevocable changes in one's *manomaya kāya*, and thus prevents one from doing such activities even in the future lives.

8. Now it is important to realize that a *Sotāpanna* can be a parent taking care of a family. He/she will be doing a job, driving kids to school, and doing all other daily tasks. But one does all this with the clear understanding that one should NOT do certain things. One could live a moral life suitable for a *Sotāpanna* without giving up ANY responsibilities as a regular “householder.” Actually one could even attain the *Anāgāmī* stage without becoming a *bhikkhu*. And there were many “householders” that had attained *Sotāpanna*, *Sakadāgāmī*, *Anāgāmī* stages at the Buddha's time; there are some even today.

7.4.13 What is the only Akusala Removed by a Sotāpanna?

Revised May 10, 2017; December 1, 2017; July 7, 2018; August 16, 2019; August 14, 2022

Micchā Diṭṭhi – Only Dasa Akusala Completely Removed by a *Sotāpanna*

1. Upon attaining the *Sotāpanna* stage, *micchā diṭṭhi* (the ten types of *micchā diṭṭhi* together with wrong views of *nicca*, *sukha*, and *atta*) is COMPLETELY removed. That is one *akusala* out of *dasa akusala*. But that accounts for more than 99% of *akusala* (defilements) from one's mind since the “*apāyagāmi* strength” of the other nine *akusala kamma* are also removed.

- That illustrates the importance of removing *micchā diṭṭhi* and why I have so many posts on that. Also, see the first discourse in “[Three Marks of Existence – English Discourses](#).”
- Some people think a *Sotāpanna* is incapable of breaking the five precepts based on an incorrect translation of the [WebLink: suttacentral: Gihi Sutta \(AN 5.179\)](#). The relevant verse is: “..*ariyasāvako paṇātipātā paṭivirato hoti, adinnādānā paṭivirato hoti, kāmesumicchācārā paṭivirato hoti, musāvādā paṭivirato hoti, surāmerayamajjapamādaṭṭhānā paṭivirato hoti.*”
- However, “*paṭivirato hoti*” does not mean “abstains from” as translated at many online sites; it means “does not do with liking.” Thus, a *Sotāpanna* may — under some conditions — break the five precepts. It is only an *Arahant* that will not break five precepts or engage in *dasa akusala*.
- The five precepts have deeper meanings, too: “[The Five Precepts – What the Buddha Meant by Them](#).”

2. With the removal of *micchā diṭṭhi*, a *Sotāpanna* will be incapable of doing the following six deeds (per “[WebLink: suttacentral: Bahudhātuka Sutta \(MN 115\)](#)”).

- (i) Killing one's mother.
- (ii) Killing one's father.
- (iii) Killing an *Arahant*.
- (iv) Injuring a Buddha.

- (v.) Causing *saṅgha bheda* (spreading wrong Dhamma is included here).
- (vi.) Taking refuge in anyone other than a Buddha (i.e., believing in other ways of “salvation”).
- Furthermore, a *Sotāpanna* will avoid an unimaginable amount of future suffering.

Future Suffering Removed by a *Sotāpanna*

3. [WebLink: suttacentral: Nakhasikha Sutta \(SN 13.1\)](#) describes the vast amount of defilement removed by a *Sotāpanna*.

- One time the Buddha picked up a little bit of dust with the tip of his fingernail and asked the *bhikkhus*, “What do you think *bhikkhus*? Which is greater: the little bit of dust I have picked up with the tip of my fingernail, or the soil in this great Earth?”
- Of course, the *bhikkhus* answered that the amount of soil on this Earth is vastly more massive than the bit of dust on a fingernail.
- Then the Buddha told the *bhikkhus* that the amount of suffering that a *Sotāpanna* has removed could be compared to the soil on the whole Earth. The amount that he/she has left to stop can be compared to the bit of dust on his fingernail.
- Therefore, the amount of suffering a *Sotāpanna* has left in future rebirths is insignificant compared to that of an average human.

4. More analogies are given in a series of suttas starting with “[WebLink: suttacentral: Pathamasinerupabbatarāja Sutta \(SN 56.49\)](#).” “The amount of suffering a *Sotāpanna* has to endure can be compared to **seven grains of sand** on top of mount Sineru. The amount of suffering a normal human has left to endure can be compared to sand in the whole mountain.”

- That is logical since the suffering encountered in the *niraya* never ceases. One birth in the *niraya* (hell) would lead to much more suffering than thousands of births in the human or higher realms.
- A *Sotāpanna* will NEVER be reborn in the four lowest realms due to the complete removal of ONE *dasa akusala*, that of *micchā diṭṭhi*. Furthermore, he/she will have only **seven future bhava** left and those in the human realm or the realms above it.

Removal of *Micchā Diṭṭhi* Is Enough to Become a *Sotāpanna*

5. That may be why most people tend to think that attaining the *Sotāpanna* stage requires attaining *jhānā*, all sorts of *abhiññā* powers, etc. **None of that is a requirement for achieving the *Sotāpanna* stage.**

- One may think that a *Sotāpanna* would have removed at least half of the ten evils (*dasa akusala*.) **It turns out that a *Sotāpanna* completely removes only one of the *dasa akusala*, that of *niyata micchā diṭṭhi*.** Of course, in achieving that, a *Sotāpanna* would have reduced the “*apāyagāmi* strength” of most of the other *dasa akusala*. That is the key to understanding. In particular, *abhijjā* [*abhijjhā*] or *lobha* reduced to *rāga* level and *vyāpāda* or *dosa* is reduced to *paṭigha* level; see, “[Lobha, Dosa, Moha versus Raga, Patigha, Avijjā](#).”
- For a discussion on *dasa akusala*, see, “[Ten Immoral Actions \(Dasa Akusala\)](#).” As discussed in that post, *Niyata Micchā Diṭṭhi* (established wrong views) is an *akusala* done with the mind.
- A *Sotāpanna* is said to have achieved “*dassanena pahatabba*” or removal of defilements via correct vision. **He/she has removed an unimaginably vast amount of evils (“*keles*” or “*kilesa*” or “*klesha*”) with the removal of *micchā diṭṭhi*,** or attaining the first stage of *Sammā Diṭṭhi*: the true nature of this world of 31 realms.
- How a *Sotāpanna* reduces *dasa akusala* via getting rid of *micchā diṭṭhi* “to overcome *apāyagāmi citta*” is discussed in “[Akusala Citta – How a *Sotāpanna* Avoids Apayagami Citta](#).” Here is it described

how five out of the 12 *akusala citta* do not arise after the *Sotāpanna* stage; those are the five that lead to birth in the *apāyā*.

6. That is a critical point to understand. Removal of *micchā diṭṭhi* leads to the stopping of highly immoral actions. Most people worry excessively about the defilements done with the body and speech. They are afraid of even accidentally killing an insect or telling a “white lie.” Of course, those must be avoided, too, because moral behavior (speech and actions) are a prerequisite for cleansing the mind.

- But having *niyata micchā diṭṭhi* is million-fold more weighty. These and other types of *Niyata Micchā Diṭṭhi* (established wrong views) are discussed in “[Ten Immoral Actions \(Dasa Akusala\)](#)” and “[Mahā Cattārīsaka Sutta \(Discourse on the Great Forty\)](#).”
- It would be beneficial to understand the weights of different types of *kamma*; see “[How to Evaluate Weights of Different Kammās](#).”
- If one has a vessel that is leaking water, there is no point in trying to plug the smaller holes first. One should seal the largest hole first, which in this case is getting rid of *micchā diṭṭhi* or false views (about this world).
- That may still not convince some. If so, see whether this conclusion contradicts anything in the *Tipiṭaka*. One should carefully examine all the “requirements” that must be fulfilled to attain the *Sotāpanna* stage. It should become clear that this is all one needs to do.
- **And that comes only via learning Dhamma, the correct version**, the version discovered by the Buddha and passed down through generations of Noble Persons or *Ariyā*. We discussed in detail in the post, “[Four Conditions for Attaining Sotāpanna Magga/Phala](#).”
- Of course, one needs to have removed *micchā diṭṭhi* even to become a *Sotāpanna Anugāmi*: “[Micchā Diṭṭhi, Gandhabba, and Sotāpanna Stage](#).”

The Next Step

7. A *Sotāpanna* has removed the “wrong views” about the nature of this world. But the tendency to “feel” that there are mind-pleasing things in this world is still there.

- That is why we need to comprehend the term *saññā*, commonly translated into English as “perception.”
- Of course, *Saññā* is one of 52 *cetasika* and one component of *pañcakkhandha*. It is one of the seven universal *cetasika* that arise with every *citta*.

8. *Saññā* works very closely with another universal *cetasika* called *manasikāra*. *Manasikāra* is the *cetasika* that brings old memories and future hopes into a *citta*. When *cetanā* “puts together the *citta*,” the *citta* recognizes the subject (*saññā*) and automatically produces *vedanā* (feelings) about it. Thus we can see the significant roles of those four *cetasika* right away.

- But *saññā* is not limited to “recognizing objects.” *Saññā* is the “inner understanding” of any concept.
- For example, when we hear “fire,” we immediately recognize that. Even a picture of a fire may flash in our minds. But a baby (or someone who does not understand English) does not have a “*saññā*” for that word; it means nothing to them. But the baby (or that person) can understand what “fire” means if we teach it to them.
- Growing up, we acquire innumerable “*saññā*” mostly by becoming familiar with them. We first recognize who “mother” and “father” are, know different colors, different objects, etc. For details, see “[Saññā – What It Really Means](#).”

9. Even though we acquire “*saññā*” for most objects and people, some strong *saññā* may be “passed down” from previous lives. That can take many forms.

- When visiting a place that one had never previously visited in this life, some people may already “know” about that place in great detail. Children who remember past lives have been reported to lead

investigators to various locations in faraway cities where they had lived in previous lives. Many adults have said they can walk a city with complete confidence that they are visiting for the first time.

- Then there is the “ability” to play the piano, recite *suttā*, or just be able to comprehend complex mathematics as a child, etc. Some of these cases discussed in “[Evidence for Rebirth](#).”

10. We “acquire” most *saññā* through our families first, then through friends, schools, workplaces, etc.

- Thus most of our “world views” or *ditṭhis* are acquired through our families. Our first impressions of moral issues, politics, and religions come from our families.
- Those *saññās* are hard to change, depending on how forcefully and frequently they have been used.
- However, the human mind is unique. When given enough substantial evidence, one’s *saññā* about something or some concept can PERMANENTLY change. For example, when one learns how to do algebra (addition and subtraction, etc.) correctly, one will never forget that. And even if an authority figure (a teacher) insists that one plus two is four, even a child will not accept that. He/she can count fingers and show the teacher that the correct answer IS three.

11. As we grow up, we acquire *saññā* for more specialized tasks. One could “learn” to become a carpenter, a doctor, an engineer, etc.

- This “learning” is acquiring “*saññā*” for a particular task. It is not just memorizing how to do things. When a physician finishes his/her learning, he/she can “troubleshoot” a brand new patient and figure out what is wrong. When an engineer builds a new structure, it could be something that has not been made before. One acquires “skills.”
- Once one learns a “skill,” one will never forget that; at least it is easy to “get back to it.” One who had learned to ride a bicycle as a child may never touch a bike for 30-40 years. But even at old age, he can ride a bike with minimal effort.

Removal of “*Micchā Saññā*” or “*Saññā Vipallāsa*” Needed for Higher *Magga Phala*

12. A *Sotāpanna* acquires a basic level of understanding about “this world” and that “knowledge” or “comprehension” does not go away even in future lives.

- Once someone sees a “glimpse” of the Buddha’s core message, in the long run, there is no permanent happiness to be had by wishing for anything in this world
- That kind of a “vision change” does not happen quickly unless one has “*saññā*” about that from previous lives; that is why it is easier for some people to grasp these concepts.
- And this “*saññā*” cannot be acquired via memorizing *suttā*, how to recite the *Paṭicca Samuppāda* cycle, etc. Instead, one needs to COMPREHEND the concepts.
- The KEY concept to grasp is the “*anicca saññā*.”

13. The only way to “build up” the correct *saññā* is to make an effort to understand the key message of the Buddha. Humans usually have wrong perceptions or “*vipareetha saññā*” that one can find happiness in this life by working hard. Most people do not even think beyond this life, even if they believe in rebirth. That is also called the “*nicca saññā*” (pronounced “*nichcha saññā*”), i.e., by working hard or by sheer luck, one can achieve and maintain things in this world to one’s satisfaction.

- The fundamental teaching of the Buddha is about the “*anicca saññā*,” i.e., it is NOT POSSIBLE to maintain ANYTHING to one’s satisfaction in the long run. The *Sotāpanna* stage of *Nibbāna* is attained when the *anicca saññā* is cultivated to some significant extent.
- When one has developed the *anicca saññā* to this level, one’s mind automatically blocks “*apāyagāmi citta*.”

- As we discussed in the *Abhidhamma* section, *citta* flow very fast, and we do not have control over those initial *cittā*. In extreme cases like sudden rages or sheer greed, we will be unable to “control ourselves” without permanently removing “*apāyagāmi gati*” by getting rid of *micchā diṭṭhi*.
- It is this *anicca saññā* that grows as one attains higher stages of *Nibbāna* (*Sakadāgāmī* and *Anāgāmī*) and peaks at the *Arahant* stage. At the *Arahant* stage, one can see the “*anicca* nature” of ALL *saṅkhāra*, not only *abhisāṅkhāra*. That is what is expressed by “*Sabbe saṅkhāra anicca*,” and in the *Girimānanda sutta*, the Buddha told Ven. Ānanda, “*Ayaṃ vuccati Ānanda, sabba saṅkhāresu anicca saññā*”; see, “[Anicca, Dukkha, Anatta – According to Some Key Suttā](#).”
- Therefore, before worrying about *anicca saññā*, one must remove the **wrong diṭṭhi** by becoming a *Sotāpanna*. See, “[Vipallāsa \(Ditthi, Saññā, Citta\) Affect Saṅkhāra](#).”

14. When one develops the *anicca saññā* via learning Dhamma (listening and reading), the tendency to act immorally, even under extreme pressure, will slowly diminish.

- One would be able to see the corresponding “cooling down” (reduced stress level) when one thinks back after several months (it could be sooner for some people). One will gradually feel the *nirāmisa sukha* and be drawn to Dhamma. One would automatically start spending more time learning Dhamma.
- One does not need to force anything except to make an initial determination to verify the truth of what I have discussed above by reading (and listening) and developing the “*Dhamma vicaya*” *sambojjanga*. Make a habit of critically evaluating relevant posts at this site and from other sources. That is the best and most direct meditation technique for attaining the *Sotāpanna* stage. Buddha Dhamma is about learning the true nature of this world, which WILL automatically lead to the purification of the mind; see “[The Importance of Purifying the Mind](#).”
- The more one purifies one’s mind, the easier it will become to grasp the key Dhamma concepts and cultivate the “*anicca saññā*.” **And developing *anicca saññā* itself leads to the purification of the mind.** That is why learning becomes exponentially fast once getting some traction.

More on the *anicca saññā* (for those who may be *Sotāpannas*) at: [How to Cultivate the Anicca Saññā](#)

7.4.14 Udayavaya Ñāṇa

- [Udayavaya \(Udayabbaya\) Ñāṇa – Introduction](#)
- [Nibbatti Lakkhana in Udayavaya Ñāṇa](#)
- [Āhāra \(Food\) in Udayavaya Ñāṇa](#)
- [Udayavaya Ñāṇa – Importance of the Cittaja Kaya](#)

These posts can be better understood if one has a good understanding of the *gandhabba* or *manomaya kāya*: “[Manomaya Kāya](#).”

7.4.14.1 Udayavaya (Udayabbaya) Ñāṇa – Introduction

February 12, 2016; revised October 23, 2018; re-written November 23, 2020; re-written September 25, 2022

Udayabbaya or *udayavaya ñāṇa* is the knowledge of the mechanism responsible for the arising of rebirth (i.e., suffering) and the way to stop such arising (i.e., end of suffering.)

The *udayavaya ñāṇa* (*ñāṇa* pronounced “*ngāna*”; see the pronunciation guide in “[Pāli Glossary – \(L-Z\)](#)”) is also referred to as the *udayabbaya ñāṇa*.

- The actual Pāli word is *udayabbaya* (I had inadvertently used the Sinhala word *udayavaya*). A description of the *udayabbaya ñāṇa* is in the *Paṭisambhidāmagga Pakaraṇa*: “[WebLink: suttacentral](#)”

[1.1.6 Udayabbayañānaniddesa \(KN Patisambhidāmagga 1.1 Ñānakathā\).](#)” [*pakaraṇa* : [nt.] an occasion; a literary work or exposition.]

- However, it is about the arising (*udaya*) and destruction (*vaya*) of a *saṅkhata*. This is another example of two Pāli words combining to sound differently: *udayabbaya*.

Pronunciation of *udayavaya ñāṇa*:

[WebLink: Listen to Pronunciation: Udayavaya ñāṇa](#)

This series of posts needs to be rewritten. It may take some time since I am busy these days with other things.

- However, it is not urgent to study *udayabbaya ñāṇa* in detail. As I explain below, if one understands “[Paṭicca Samuppāda](#),” one would have the *udayabbaya ñāṇa*.

What is *Udaya* (Arising)?

1. Things in this world do not arise without causes. Births in the 31 realms occur due to six causes, which reduces to three root causes *lobha*, *dosa*, and *moha*. That is because the mundane versions of *alobha*, *adosa*, and *amoha* that give rise to births in the “good realms” above the four lowest realms are milder versions of *lobha*, *dosa*, and *moha*. See “[Six Root Causes – Loka Samudaya \(Arising of Suffering\) and Loka Nirodhaya \(Nibbāna\)](#).”

- The “milder versions” of *lobha*, *dosa*, and *moha* can be removed only by comprehending the teachings of the Buddha embedded in “[Paṭicca Samuppāda, Tilakkhaṇa, Four Noble Truths](#).”
- The mechanism of the arising of any *saṅkhata* in this world is systematically described by “[Paṭicca Samuppāda](#).” Upon his Enlightenment, this was the first part of ultimate knowledge gained by our Bodhisatta to become a Buddha: “[WebLink: suttacentral: Pathama Bodhi Sutta \(KN Ud 1.1\)](#).”
- **This forward (or *anuloma*) *Paṭicca Samuppāda* describes the “*udaya*” part of the *udayabbaya ñāṇa*.**

One Meaning of “*Vaya*” – Destruction

2. Anything that comes into existence in this world WILL be destroyed, without exception. That is one meaning of “*vaya*.”

- For example, any *saṅkhata* that comes into existence will exist for a certain duration (during which it will undergo unexpected changes) and then cease to exist. See, for example, “[WebLink: suttacentral: Ānanda Sutta \(SN 22.37\)](#).”
- That is one meaning of “*vaya*.” But that is not the meaning implied in the *udayabbaya ñāṇa*.

Second Meaning of “*Vaya*” – “Stopping of Arising” or Permanent Destruction

3. The second meaning of “permanent destruction” achieved via eliminating all root causes is implied in the *udayabbaya ñāṇa*.

- A human being dies within about 100 years. **That “death of a person” is the previous meaning of *vaya* for a human.**
- However, that “lifestream” does not end at the death of the physical body. If that human *gandhabba* has more lifetime left, it will get into a suitable womb and give rise to another human body.
- Even when that human *gandhabba* dies, that lifestream will just “switch over” to another existence, such as *Deva* or animal.

4. A lifestream will come to an end ONLY at the *Parinibbāna* of an *Arahant*, i.e., when the rebirth process comes to an end. That is the meaning of *vaya* (complete and permanent stopping) in *udayabbaya ñāṇa*.

- That is achieved by eliminating *avijjā* (ignorance of the Four Noble Truths), i.e., “*avijjā nirodhā saṅkhāra nirodho*” leads to “*saṅkhāra nirodhā viññāṇa nirodho*,” etc. ending in “*bhava nirodhā jāti nirodho*” and, thus, to the end of suffering: “*Evametassa kevalassa dukkhakkhandhassa nirodho hoti’ti*.”
- That is the reverse of the *Paṭicca Samuppāda* or the *paṭiloma Paṭicca Samuppāda*, the second part of the *udayabbaya ñāṇa* gleaned by the Buddha: “[WebLink: suttacentral: Dutiya Bodhi Sutta \(KN Ud 1.2\)](#).”

Udayabbaya Ñāṇa – Fifty Types

5. The *Paṭisambhidāmagga Pakaraṇa* analyzes the *udayabbaya ñāṇa* by describing 25 factors that lead to “*udaya*” of the five aggregates and 25 factors leading to their “*vaya*”: “[WebLink: suttacentral: 1.1.6 Udayabbayañānaniddesa \(KN Patissambhidāmagga 1.1 Ñānakathā\)](#).”

- Each of the five aggregates arises via *avijjā*, *taṇhā*, *kamma*, *āhāra*, and *nibbatti lakkhaṇa*. The last refers to the arising of a physical body (for *rūpa*) according to *kammic* energy.
- Each of the five aggregates ceases to arise with the cessation of *avijjā*, *taṇhā*, *kamma*, *āhāra*, and *vipariṇāma lakkhaṇa*. The last is the natural death of a physical body in the case of *rūpa*. That happens at *Parinibbāna* of an *Arahant*.
- That is the basic idea of the *udayavaya* or *udayabbaya ñāṇa*.

7.4.14. Nibbatti Lakkhana in Udayavaya Ñāṇa

2

February 26, 2016

1. In the previous post, we discussed the first 25 factors that encompass what is involved in the “*udaya*” stage of *udayavaya*: “[Udayavaya Ñāṇa – Introduction](#).” Each of the five aggregates has five factors associated with it basically leading to its formation; thus there are 25 factors that give rise to **each person’s world**.

- The five aggregates or the *pañcakkhandha* is much more complex than most realize. Please read the posts on *pañcakkhandha* to familiarize with it if you really want to grasp the *udayavaya ñāṇa*: “[The Five Aggregates \(Pañcakkhandha\)](#).”
- Also note that a given *saṅkhata* (*sankata* in Sinhala) is a tiny fraction of *pañcakkhandha*. We have discussed the five stages of a *saṅkhata* (*sankata* in Sinhala), and it is related to *udayavaya ñāṇa*. Buddha Dhamma is so deep, all these different descriptions are well-connected at some level.
- Do not worry if all this seems to be overwhelming (of course some people will be able to see the connections). It will make sense with time. Just keep reading posts that you have already read. They will make more sense each time you go back and read, especially after reading other relevant posts.

2. It is important to grasp the fact that anything that we experience, we experience only for a fraction of a second. Then it is gone to the “past pile” (*atita*; pronounced “atheetha”) of the five aggregates or piles.

- Anything that we are only imagining or hoping to experience has not yet materialized; those are in the “future pile” (*anāgata*; pronounced “anāgatha”) of the five aggregates.
- Only a negligibly small fraction is being experienced at a given moment: the “present pile” (*paccuppanna*; pronounced “pachchuppanna”); see, “[Five Aggregates – Introduction](#).”

3. All these things arise as a *saṅkhata* (*sankata* in Sinhala), whether it is material (*rūpa*) or mental (*vedanā*, *saññā*, *saṅkhāra*, *viññāṇa*). A given *saṅkhata* (*sankata* in Sinhala) itself (not the experience) may exist for

brief moment, or some may last a long time (especially those belonging to *rūpa* aggregate). But even then parts of it are continually being “passed on” to the past.

- Think about a human being X. He/she starts with a single cell and grows by the day, becomes a baby, a child, a young person, an old person, and then is perished. So, when another person Y, is watching X grow, the “*rūpa khandha*” of Y continuously grew, all the while making the “past *rūpa khandha*” bigger each moment. When X is observing himself, that experience goes to his “*rūpa khandha*.”
- At a given time, we can see only a momentary “snapshot” of a *rūpa khandha*. When X dies, all those stages –moment by moment — had gone to the past, and thus now belong to the “past *rūpa khandha*” of X and Y. Note that they are different: each one’s experience of X is different.
- Now we can see why each person’s *pañcakkhandha* is unique to that person.

4. Now we will analyze why all five aggregates have their origin in *avijjā*, *taṇhā*, and *kamma*: Because we have the wrong perception (*nicca saññā*) that we can eventually reach happiness by craving for things in this world (*avijjā*), we get attached to somethings or hate other things (*taṇhā*), and then act accordingly (*kamma*).

- After one attains *parinibbana* (i.e., when an *Arahant* dies), there is no world to experience. No more *pañcakkhandha*.

5. The other two factors of *āhāra* and *nibbatti lakkhana* describe the “progression” of a *pañcakkhandha* that have the origins in *avijjā*, *taṇhā*, and *kamma*.

- If it is a material thing (*rūpa*) it needs *āhāra* (food) to grow; they can be food that living beings eat or nutrients that plants need.
- If it is a mental thing (*vedanā*, *saññā*, *saṅkhāra*, *viññāṇa*), it needs “mental food”: *phassa* (contact), *mano sañcetanā*, and *viññāṇa āhāra*. We will discuss these later.

6. Any one of those five aggregates needs a “blueprint” or a set mechanism to arise, grow, mature, decay, and eventually cease to exist. This is what the fifth factor, *nibbatti lakkhana*, is about.

- This “blueprint” is made according to those three causes: it is a complex plan which takes into account many aspects that are formed by the level of *avijjā* (ignorance), kind of *taṇhā* (greed, hate), and *kamma* (kind of acts that were done with body, speech, and mind).
- Those complex factors give rise to *nibbatti lakkhana*, “blueprint” for any one of the five aggregates to rise. It can be called “production characteristics” of that particular *saṅkhata* (*sankata* in Sinhala) belonging to one of the five aggregates.
- As we learn more, we will see that all five factors actually become causes, and are inter-related.

7. This is easier to see this with a human (or an animal). When a living being gets a human *bhava*, then based on a specific *kamma vipāka* that came to focus at the time of death in the previous *bhava*, a blueprint for the human *bhava* is automatically generated by *kammic* energy.

- That blueprint is the *manomaya kāya* or the *gandhabba* that we have discussed many times; see, the posts under the section “[Manomaya Kāya](#).”
- The arising of that human starting from a single cell in mother’s womb happens according to the “blueprint” in that *manomaya kāya*: eventual height, eye color, skin color, etc were determined when a suitable womb was automatically selected according to the “*gathi*” of that being. That “selection process” — which happens automatically and not decided by any superior being — had chosen the matching parents for the *gandhabba*.
- That was the role played by the *nibbatti lakkhana* in this particular case.

8. Thus the particular *bhava* is determined by the particular action (*kamma*): if that action was suitable for a dog *bhava*, then one would get a “dog *bhava*.”

- But other characteristics of that dog are determined by the overall “*gathi*” of that being that it had acquired through uncountable previous births.
- Thus *nibbatti lakkhana* is a complex entity that takes into account numerous things, but two are prominent: the specific *kamma* and overall *gathi*.

9. For example two different beings could get the same “dog *bhava*.” But no two dogs will look and behave alike. Some are vicious and some are loving. Some are big and some are small. The possible varieties are basically infinite. Even two “twin dogs” that look exactly the same will have at least some behaviour differences when they grow. Same thing applies to two humans.

- Thus *nibbatti lakkhana* is a complex mold of multiple factors. But only a Buddha can see why certain features are in a given being. Even a spot on dog is said to be due to some reason.
- Even though the “*bhava*” is determined by a specific strong *kamma* (called a *janaka kamma*), the actual body will reflect numerous *kamma vipāka* from numerous lives in the past.
- But as we have discussed elsewhere, what kinds of *kamma vipāka* can bring fruits will depend to a large extent on having suitable conditions available. If one acts foolishly that will allow some bad *kamma vipāka* from the past to bear fruit. In the same way, by acting with mindfulness one can avoid such bad outcomes and even bring about good outcomes due to past good *kamma vipāka*.
- There are several posts that discuss the above important fact. For example, “[What is Kamma? – Is Everything Determined by Kamma?](#)” and “[Anantara and Samanantara Paccayā](#).”

10. Therefore, it is important to realize that it is *manomaya kāya* does not determine one’s future rigidly; some of the “production characteristics” can change. It is not like making a robot in a factory according to a set blueprint.

- It is easy to see that one’s body structure can change according to one’s lifestyle. If one becomes careless and start eating indiscriminately, one will become obese. Even one’s character can change by one’s motivation and due to external influences.
- Thus *nibbatti lakkhana* are not deterministically set. The overall *gathi* can change and the *manomaya kāya* and the physical body in turn can change.

11. The main reason for this flexibility is that the *manomaya kāya* has three “components”: *kammaja kāya*, *cittaja kāya*, and *utuja kāya*; see previous posts on *manomaya kāya*.

- The *kammaja kāya* is the one that is really pre-set. It had taken into account the reasons (*kamma vipāka*) that led to the particular *bhava*.
- The critical component that is under OUR CONTROL is the *cittaja kāya*. This is basically how we think (that leads to our speech and bodily actions). And how we think depends on our level of ignorance (*avijjā*).
- The third component is the *utuja kāya*, which is basically the fine body of the *gandhabba*. It is being created and changed CONTINUOUSLY due to both the *kammaja kāya* and *cittaja kāya*. The fine matter based on *suddhatthaka* are being created due to *kammaja kāya* and *cittaja kāya*; see, “[The Origin of Matter – Suddhatthaka](#).”

12. Thus the evolvement of a human being is a complex process. But one could get a good basic understanding by comprehending the above basic structure. We will go into more details in the future, but let us discuss a few more important aspects.

- Now we can see that the physical body is just a “shell.” There is *gandhabba* inside that physical body and controlling it; see, “[Ghost in the Machine – Synonym for the Manomaya Kāya?](#).”

13. Thus, these physical bodies that we value so much are really lifeless shells. The essence — *gandhabba* — is hidden inside that physical body.

- The *utuja kāya* of the *gandhabba* is the one that is spread over the whole physical body gives it a “life.” It is a fine grid that overlaps our nervous system, and that is how we feel body sensations.
- Under some extreme stresses, the *gandhabba* can get out of the physical body. This is what is known as the out-of-body experience (OBE); see, “[Manomaya Kāya and Out-of-Body Experience \(OBE\)](#).” When that happens the physical body is lifeless, and doctors have declared many heart patients undergoing operations to be dead for several minutes only to find out later that the patient is alive (*gandhabba* had returned to the body).

14. The critical point for our present discussion is the fact that once born with a human body, the human *gandhabba* can determine its own *nibbatti lakkhana* to some extent by wisely using the *cittaja kaya*.

- It is this *cittaja kaya* that ultimately makes it possible for a human to attain *Nibbāna*.
- One can change one's *gathi* (habits/character) by comprehending first moral versus immoral, and then comprehending the *anicca* nature of this world.
- Most people do not realize the importance of the *cittaja kaya*. This is in essence why a Buddha is needed to reveal the true nature of this world, and to teach how to use the *cittaja kaya* (i.e., the way one thinks, and therefore speaks and acts): First to stay away from immoral behavior to cleanse the mind to some extent, and then to comprehend the *anicca* nature.

15. The *nibbatti lakkhana* for any *saṅkhata* (*sankata* in Sinhala) associated with any of the five aggregates work similarly. Let us consider a certain *viññāṇa* that we experience when seeing a person X.

- That *viññāṇa* depends on who is looking at X. If it is a loving parent for Y, then Y will generate a “loving *viññāṇa*” upon seeing X. That *viññāṇa* will arise, stay there for a certain time, and fade away as the mind is directed to something else. But when that *viññāṇa* arises, it arises with some *nibbatti lakkhana* associated with one's own past experiences with X. An enemy of X (say, Z) could generate a “hateful *viññāṇa*.”

16. It is easy to see that other three aggregates in the above example will also arise accordingly.

- Y will generate happy feelings (*vedanā*), will recognize (*saññā*) X as a parent, and may generate some kind of action or speech via *saṅkhāra*. On the other hand, Z will generate an entirely different set.
- Thus the four mental aggregates are related to each other.

17. In Buddha Dhamma everything that we learn about is connected to each other at some level. It is the whole fabric of nature. Each and every piece of information is part of a complex puzzle. When one begins to see how it all fits together, one's mind becomes joyful, and provides incentive and desire to learn more about the true nature of this complex world.

Next in the series, “[Āhāra \(Food\) in Udayavaya Ñāṇa](#).”

7.4.14. **Āhāra (Food) in Udayavaya Ñāṇa**

3

March 19, 2016

1. First part of the *Udayavaya Ñāṇa* involves the causes for the arising of *saṅkhata* (*sankata* in Sinhala) (and hence arising of *pañcakkhandha*). Out of the five main factors (*avijjā*, *taṇhā*, *kamma*, *āhāra*, and *nibbatti lakkhana*), we discussed the *nibbatti lakkhana* in the previous post of the series.

- Many posts at the site discuss the first three factors, so will now discuss the remaining factor, *āhāra* (food), that is both a cause and a condition for the arising of *pañcakkhandha*.

2. When we think of *āhāra* (which means food in both Pāli and Sinhala), we automatically think about food that we consume to stay alive. However, it is clear from the previous two posts that a physical body is just a

shell that is “controlled” by a *gandhabba*. There are many other posts on *gandhabba* in the “[Manomaya Kāya](#)” section. Here is a summary of some concepts discussed there:

- In effect, we have four kinds of bodies (*kāya*): the physical body (*karaja kāya*) is the one people normally associate with the perception of a “me.” But we have three “mental bodies” that are collectively “*manomaya kāya*” or “*gandhabba*.” Those three are *kammaja kaya*, *cittaja kaya*, and *utuja kaya*.
- In a way, the physical body is just a shell that we use for about 100 years or so and discard at death; the *gandhabba* leaves that dead body and waits for a suitable womb to make another physical body, if there is *kammic* energy left in the *human bhava*.
- The foods for the physical body are called *kabaliṅkāra āhāra*. There are three other “mental foods” that are consumed by the *gandhabba*.
- The *gandhabba* consumes three kinds of mental food: *phassa āhāra*, *mano sañcetanā āhāra*, and *viññāṇa āhāra*.

3. A given *Kammaja kāya* was created at the *cuti-paṭisandhi* moment by a powerful previous *kamma*, and its energy just gets depleted with time. For example, if a particular *human bhava* came into existence with enough *kammic* energy to support a human life for 1000 years, then that energy will be slowly spent over 1000 years. In other words, *kammaja kāya* does not need any additional energy, i.e., *āhāra*.

- In a way, all three types of mental foods are consumed by the *cittaja kāya*. And some of the energy from the *kammaja* and *cittaja kaya* are converted to *suddhaṭṭhaka* (matter), and that is what makes the fine body (*utuja kāya*) of the *gandhabba*, which is too fine for us to see.
- As I mentioned in the previous post is this section, “[Nibbatti Lakkhana in Udayavaya Nāna](#),” the critical component that is under OUR CONTROL is the *cittaja kāya*. We can overcome our “loosely preset destiny” embedded in the *kammaja kāya* by cultivating our *cittaja kāya*, or basically our thoughts and thereby our behavior (*gathi*). This is what makes it possible to attain *Nibbāna*!

4. Let us first discuss the *kabaliṅkāra āhāra*. There are two relevant meanings for this name. The first meaning is associated with what this type of *āhāra* does: to energize the physical body. Here “*kabaliṅkāra*” comes from “*kayata bala dena*” in Pāli or Sinhala where “*kāya*” is body, “*bala*” is energy or power, and “*dena*” means provide.

- Therefore, *kabaliṅkāra āhāra* here means the food we eat to make our bodies grow and keep energized. Without food, a physical body that starts in the womb of the mother cannot grow to a baby and then once comes out cannot grow to be an adult. Without *kabaliṅkāra āhāra* that particular *saṅkhata* (*sankata* in Sinhala) cannot survive, and thus is an essential factor contributing to part of the *pañcakkhandha*.
- This kind of *kabaliṅkāra āhāra* is essential for the survival for humans and animals (and also *devas*). *Devas* consume just one kind of *kabaliṅkāra āhāra* called “*amurtha*”; it is a drink that they consume, which leaves no residuals. Thus, they don’t need to worry about sweating, urinating, or defecating.
- Thus *kabaliṅkāra āhāra* are needed only in *kāma loka*. As we will see below, when one loses craving for *kabaliṅkāra āhāra*, one will never be born again in the *kāma loka*, i.e., one becomes an *Anāgāmī*.
- There are no solid bodies (*karaja kāya*) in either *rūpa loka* or *arūpa loka*. In *rūpa loka* there is only the “*thrija kāya*” or the three mental bodies of *kammaja kāya*, *cittaja kāya*, and *utuja kāya*. Thus in the *rūpa loka* beings are essentially *gandhabbas* but that term is normally reserved for humans and animals when they are in the *para loka* waiting for a womb; see, “[Hidden World of the Gandhabba: Netherworld \(Paraloka\)](#).”
- In the *arūpa loka*, there is no *utuja kāya* either. Except for the *hadaya vatthu*, there is no *rūpa* associated with an *arūpa brahma*.
- It is not essential to know all these details, but these details are needed to complete the “big picture”, especially for those who are interested in finer details.

5. The second meaning of *kabaliṅkāra āhāra* has a deeper meaning; here it is a CAUSE for the arising of FUTURE *saṅkhata* (*sankata* in Sinhala). Craving *kabaliṅkāra āhāra* means one is hoping for rebirth in the *kāma loka* to enjoy them; see, “[How Perceived Pleasures \(Assāda\) lead to Dukkha.](#)”

- Thus, the stronger the craving is, harder it is to “escape from the *kāma lokas*.”
- This is a good example of how (*abhi*)*saṅkhāra* or strong cravings/hopes/desires lead to corresponding *bhava* and thus corresponding births (*jāti*).
- In *paṭicca samuppāda*, “*avijjā paccayā saṅkhāra*” is followed by “*saṅkhāra paccayā viññāṇa*,” and leads to “*upādāna paccayā bhava*” and “*bhava paccayā jāti*.” Thus generating (*abhi*)*saṅkhāra* for *kabaliṅkāra āhāra* leads to rebirths in the *kāma loka*, but most times in unexpected way, as we discuss below.

6. One NEEDS to consume *kabaliṅkāra āhāra* to provide one's body with the nutrients it needs to live a healthy life. However, if one craves for tasty foods in excess, *kabaliṅkāra āhāra* can become a CAUSE to for the arising (*udaya*) of future births in the *kāma loka*.

- This is why it is NOT actual consumption of tasty foods that contributes to making “*kāma bhava*.” It is the excess greed for tasty foods (*kāma assāda*); see the section on , “[Assāda, Ādīnava, Nissarana.](#)”
- This second type of “*pada nirukthi*” or the “origin of the phrase” *kabaliṅkāra āhāra* comes from “*kāya bali karana*” which means “leading to distorted body.” Here the word “*bali*” or “distort” applies because **the body that one acquires in a future life** is due to such greedy *saṅkhāra* could be much different than expected. **This is the deeper meaning of *kabaliṅkāra āhāra* in the *udayavaya ṇāṇa*.**

7. Such excessive greed for food matches the “*gathi*” of *pretha* beings. Thus when one cultivates such greedy (*abhi*)*saṅkhāra*, it leads to corresponding “*pretha bhava*” and thus “*pretha jathi*” in the future.

- When encountering delicious food, some people lose any sense of decency. The greediness shows, and when eating such a meal some display “animal like” behavior, spilling food and getting the food all over their face. That is a display of “greedy animal like” *saṅkhāra*. When they cultivate such *saṅkhāra*, the corresponding birth could be that of a pig.
- And then there are some who do not like to share such food and like to keep others away from enjoying such meals. That could cultivate *saṅkhāra* of a “vicious dog.” We see such dogs all the time; they growl when another dog comes even close to their food.

8. Once one gets the basic idea, it is easy to see various kinds of *pretha* and animal *saṅkhāra* can be cultivated even without realizing it, and can lead to future births corresponding to such “*gathi*.”

- And the cultivation of such extreme *gathi* is a consequence of not knowing or not comprehending Buddha Dhamma, specifically *paṭicca samuppāda* (“*pati ichcha*” leading to “*sama uppāda*”); see, “[Paticca Samuppāda – “Pati+ichcha”+“Sama+uppāda.](#)”
- And such *saṅkhāra* CANNOT be suppressed by sheer will power alone. One needs to learn Dhamma and realize that they DO LEAD to bad consequences. Again, see the section on “[Assāda, Ādīnava, Nissarana.](#)”

9. There are “good births” in the *kāma loka* too: the human realms and the *deva* realm. *Bhava* (and birth) in those realms also are according to one's (*abhi*)*saṅkhāra*, which of course are generated according to one's dominant *gathi*.

- Those who cultivate human and *deva saṅkhāra* like to enjoy sense pleasures, but they are not excessively greedy. They don't have mentality of “may all good things come to me, AND not to others.” They are content with what they get and willingly share the excess with others.
- One is not released from the *kāma loka* until one's cravings for sense pleasures completely goes away when one comprehends not only the futility of such sense pleasures but also the possible dangers.

10. At even a deeper level, the tendency to generate such extreme greed goes away AUTOMATICALLY when one starts comprehending the “*anicca* nature.” That it is not possible to achieve and maintain pleasurable worldly things (including food or beautiful bodies that result from eating such foods) as one desires.

- And this change in the mindset and the change in corresponding personal behavior may not reverse in a short time. But as one learns Dhamma, one will be able to see the change over time: Sometimes in a few weeks or even several months.
- The Buddha compared this “gradual transition” to the growth of a tree or a plant. One cannot see the change in the growth of a plant day by day; there is no point in checking it every day to see whether can see the growth. But if one takes care of the plant by providing it with nutrients and keeps the weeds away, one will be able to see the growth over a few weeks or months. And then one day, can reap the benefits of all that work when the plant blossoms and provides the flowers/fruits.

11. Therefore, the key is to LEARN Dhamma and also to comprehend it by contemplating on it, which is MEDITATION. **But it is critical to learn the correct Dhamma.**

- A good example of the wrong way to meditate is what many people are doing with the *paṭikūla manasikāra bhāvanā*. Many translate “*patikūla*” as “*pilikul*” in Sinhala, which means “to be rejected because it is repulsive.” They meditate on contemplating the repulsiveness of the body (sweat, urine, and feces generated by the body) and also the fact that once one chews on even the most delicious food, it becomes “vomit.”
- But the Buddha did not advice that. Just as we should not desire extreme sense pleasures, we also should not be repulsed by the things that we mentioned in the above paragraph. They both generate *taṇhā*, in the first instant by attachment (craving) and in the second by aversion (*paṭigha*). **The neutral mindset (*upekkhā*) comes from understanding the true nature of things.**

12. Now we can see that the connection of *kabalīṅkāra āhāra* in the *udayavaya ñāṇa* has two facets:

- One plays a role in taking care of the physical body that we have inherited due to past causes. If we are not mindful of what we eat, it can lead to bad consequences via the body that we already have. If we are mindful, we can make that body to work optimally for achieving our goals, both mundane and transcendental. And of course, if the physical body does not get enough *kabalīṅkāra āhāra*, it will die.
- The other is to be aware of the role *kabalīṅkāra āhāra* plays in generating physical bodies for us in future births via generating (*abhi*)*saṅkhāra* related to pleasurable foods.
- It is said that one can become an *Anāgāmi* (i.e., stop rebirths in the *kāma loka*) by comprehending the true nature of *kabalīṅkāra āhāra*. Then one loses the craving for any sense pleasures in the *kāma loka*. But such a mindset is unfathomable for a normal human who only sees the immediate sense satisfaction. Furthermore, such a mindset CANNOT be achieved by sheer will power; it has to be through understanding the *anicca* nature of *kāma loka*.

Next in the series, “[Udayavaya Ñāṇa – Importance of the Cittaja Kāya](#).”

7.4.14. Udayavaya Ñāṇa – Importance of the Cittaja Kāya

4

July 22, 2016; December 1, 2017; December 14, 2019

Three Components of Mental Body (*Manomaya Kāya*)

1. In previous posts in this series, we discussed *kabalīṅkāra āhāra* for the physical body and three types of *āhāra* for the “mental body” (or *manomaya kāya* or *gandhabba*): *phassa āhāra*, *mano sañcetanā āhāra*, and *viññāṇa āhāra*.

- The *manomaya kāya* or the *gandhabba* consists of three components: *kammaja kāya*, *citta kāya*, and *utuja kāya*. The *kammaja kāya* gets its energy at the beginning of that *bhava*, and does not require any external *āhāra*. The *utuja kāya* is sustained continuously via fine *rūpa* produced by *kammaja kāya* and *cittaja kāya*.
- Therefore, the three types of *āhāra* for the *manomaya kāya* are all consumed by the *cittaja kāya*. This *cittaja kāya* is nothing else but the stream of thoughts that we generate.
- An aside: Sometimes the *gandhabba* can inhale “aroma” or *gandha* (*kabaliṅkāra āhāra*) and have a fine (misty) physical body too; thus the name *gandhabba*, where “*abbha*” means “inhale” or in this case “absorb.” Such “more solidified” are the ones that people can sometimes see, and even be captured by a camera.

The Big Picture

2. Now we can take a step back and look at the big picture, and it gives a very illuminating view. This “big picture” could be very helpful in comprehending the *anicca* nature. Of course, this is not the only way to grasp *anicca* nature.

- The physical body that we value so much and think about as “me” is just a temporary shell. Just like anything material in this world, it grows and peaks and then starts the downhill march ending in decay and eventual death. At the death of physical body, the *gandhabba* that comes out and has to wait for a suitable womb to start building a new body, if the human *bhava* still has more *kammic* energy left; see, for example, “[Bhava and Jāti – States of Existence and Births Therein](#)” and “[Gandhabba – Only in Human and Animal Realms](#).”
- This is a key factor that contributed to the concept of a “self” (“*āthma*”) in Hinduism. Hindu *yogis* who cultivated *abhiññā* powers could look back at a finite number of previous lives and could see a *gandhabba* giving rise to repeated rebirths in human form (they likely practiced *jhāna* in those recent previous lives, which made it easier for them to attain *abhiññā* powers in this life).
- However, they could not see far back enough to see that one could be born an animal or even worse too.

An Analogy

3. For humans and animals, we can compare the physical body controlled by the *gandhabba* to a car (or any other vehicle) being driven by a person. The body of the vehicle is like our physical body, and the driver is analogous to the *gandhabba*. Without the *gandhabba*, the physical body cannot do anything; it would be a lifeless, i.e., a dead body. It is the *gandhabba* that “operates” the human body; see, “[Ghost in the Machine – Synonym for the Manomaya Kāya?](#).”

- The birth of a *gandhabba*, in turn, is due to the *kammic* energy that was created in a previous life. The *kammaja kāya* represents that energy (which will be slowly depleting with time.) The term *kammaja kāya* comes from “*kamma*” and “*ja*” and “*kāya*.” Here “*ja*” means “birth” or “origin” and “*kāya*” is the body. Thus *kammaja kāya* means the “body that was created due to *kamma*.”
- Similarly, *cittaja kāya* arises due to *citta* (loosely translated as thoughts).
- “*Utu*” means “change” and the *utuja kāya* is that part of the *gandhabba* body which arises by conversion of *kammic* energy and the energy from *citta* (*javana*).

We Have Control Over *Cittaja Kāya*

4. Now, we can see the critical importance of *citta*. *Kammaja kāya* itself arises due to previous *kamma*, i.e., by *citta* in a previous life. More specifically, *javana* in such *citta* provided the energy for a new *bhava* which lead to the *kammaja kāya*; see, “[Javana of a Citta – The Root of Mental Power](#).”

- *Kammaja kāya* is just a result, and it will slowly lose its energy over the human existence. We cannot do anything about (but if one does an *anatariya kamma* it will be shortened). **Thus it is only the *cittaja kāya* that we have control over. This is critically important. We have finally converged to the essence of a human being.**
- This is why the Buddha said “*Mano pubbangama Dhamma....*” The origin of anything in this world can be traced back to the mind (thoughts).
- Here we see the truth of the above statement for living beings. In the future, it will become clear that ANYTHING in this world has origins in the mind. That is the story in the *Aggañña sutta*. But we have to proceed step-by-step. An introduction at, “[Buddhism and Evolution – Aggañña Sutta \(DN 27\)](#).”

5. We have the control over our own destiny via our thoughts or *cittaja kāya*. I cannot emphasize enough the critical importance of the *cittaja kāya*.

- Therefore, we have to pay attention to what kind of *āhāra* (conventionally translated as food, but you can see that is not a good translation) that we provide for our thought stream. But we have control over only those thoughts that we initiate.

Two Types of *Citta* (*Viññāṇa*) and Associated Feelings (*Vedanā*)

6. **There are two types of thoughts. Some *citta* arise due to *kamma vipāka*.** For example, we may get to taste a delicious meal due to a good *kamma vipāka* and while eating it we feel “*jivhā viññāṇa*,” i.e., those come through our sense of taste. These do not have *abhisāṅkhāra*. Also see, “[Moha/Avijjā and Vipāka Viññāṇa/Kamma Viññāṇa](#)” and “[Vedanā \(Feelings\) Arise in Two Ways](#).”

- **There is another set of *citta* that we initiate.** For example, based on that tasty meal, we start thinking about coming back to the same restaurant in the future, how to make it at home, etc. These generate *abhisāṅkhāra*. The worst kind is *apuññābhisāṅkhāra*, where we think about ways to get that meal in an immoral way, say, by stealing.
- But if it is just some food that quenches the hunger, we do not generate that type of *citta* subsequent to the *vipāka citta*.
- In another example, we see millions of things in a day (via *vipāka citta*), but generate *abhisāṅkhāra* only in a few.

The Unending Cycle of *Kamma/Vipāka*

7. The Buddha said, “*kammā vipākā vaddanthi, vipākā kamma sambhavo, thasmā punabbhavo hotthi, evan loko pavatthathathi*.”

- What that means is: “Because of *kamma vipāka* we experience sense inputs; based on those we initiate new *kamma* (*abhisāṅkhāra*), and those, in turn, will bring *vipāka* in the future; that is how the world evolves (rebirth process continues).”
- **Thus the critical part is where we generate *abhisāṅkhāra*. This is done with *javana citta*.** We will discuss this using *citta vīthi* in the future, but let us try to get some basic understanding of how these *javana citta* can be controlled. There are many posts in the “[Mind and Consciousness](#)” and “[Citta and Cetasika](#)” sections on *citta* and *citta vīthi*.

The Key Is to Change Our *Gati*

8. In fact, *javana citta* run too fast to control at that time. Billions of *citta* run in a second. How can we control them? **We cannot control them *in situ*, as they initially arise.**

- ***Javana citta* arise due to our *gati*!** This is the key.

- For example, an *Arahant* is not be tempted by any attractive sense input. He has removed all *āsavas* (cravings) and there is no *anusaya* to bubble up. He/she has “Noble *gati* of an *Arahant*.”
- On the other hand, a *Sotāpanna* may be tempted by that attractive sense input. He has not removed all *āsavas* (cravings); but he/she has removed *gati* suitable for the *apāyā*, so *javana citta* corresponding to highly immoral acts will not arise .
- The *āsava* (or *gati*) are analogous to the dirt in the bottom of a well. If the well water is perturbed, some dirt can come to the surface (*anusaya*). (i.e., if a sense input matching our *gati* comes into play, bad thoughts automatically come into the mind). This is discussed in the post, “[3. The Second Level – Key to Purify the Mind](#)” in the Meditation section.
- When one attains the *Sotāpanna* stage, the worst types of “gunk” will be removed. The rest will be removed in three more stages (*Sakadāgāmi*, *Anāgāmi*, *Arahant*).

Ānāpānasati/Satipaṭṭhāna – Only Way to Change Gati

9. In a normal human, whether or not immoral *javana citta* will be triggered, will depend on his/her set of *āsavas* (or *gati*). If that particular sensory input is attractive (i.e., matches his/her *āsavas*), then he/she may automatically initiate a highly immoral act to pursue that sense input.

- But the key here is the following. Even if such immoral *javana citta* arise, one can still suppress them **before the actual act is done**, if one has learned *Satipaṭṭhāna* (or *Ānāpāna*.) For extremely immoral acts, like killing another human, most people will be able to control such thoughts even without knowing about *Satipaṭṭhāna*. **But the more one learns Dhamma, and the more one understands the consequences, one will be able to have firm control even over minor offenses.**
- Furthermore, the more one controls one's actions this way, the more one's *gati* will change for the better. **This is another key!** This has been discussed in detail in, “[9. Key to Ānāpānasati – How to Change Habits and Character \(Gati\)](#).” There are several posts under that topic.

Irreversible Change of *Gati* with Understanding of *Tilakkhaṇa*

10. A **large chunk** of immoral *gati* goes away just via comprehending *anicca*, *dukkha*, *anatta* at the *Sotāpanna* stage. In fact, those *gati* that are suitable to be born in the *apāyā* will be removed. **This is called “*dassanena pahāthabbā*,” i.e., “removal via correct vision.”**

- Thus highly immoral *javana citta* do not arise in a *Sotāpanna*. A well that has been cleaned of the visible dirt at the bottom can not be muddied by perturbing the water in that well. Just like that, highly immoral thoughts do not arise in a *Sotāpanna* because it is free of “worst gunk.”
- However, to be able to grasp *anicca*, *dukkha*, *anatta*, one's mind needs to be cleansed to some extent. One needs to gradual changing of one's *gati* or *āsava*. The way to get there is to practice the correct *Ānāpāna bhāvanā* (or *Satipaṭṭhāna bhāvanā*.) See, “[Is Ānāpānasati Breath Meditation?](#).”

Udayavaya Ñāṇa – How Suffering Arises and How It Can Be Stopped

11. Thus the key to *Nibbāna* is in the *udayavaya ñāṇa*: future rebirths arise (*uadaya*) due to *abhisankhāra* (or *cetanā*) in our *javana citta*. By controlling immoral thoughts via reducing our *āsava* (bad *gati*), **we can eventually stop them from arising.**

- This is done by always **being vigilant** about the moral or immoral thoughts that come to our minds; **this is *Satipaṭṭhāna***; see, “[Mahā Satipaṭṭhāna Sutta](#).” Then if the **thought is moral, we cultivate it (*āna*)**; if it is **immoral, we stop it (*pāna*)** before it leads to bad speech or actions; **this is *Ānāpāna***; see, “[7. What is Ānāpāna?](#).”
- The other key point is that the more cleans one's mind, the more one will be able to comprehend. **In particular, comprehending *anicca*, *dukkha*, *anatta*, REQUIRES a mind cleansed to some extent.**

- I hope you can see that this is a feedback loop: each time one goes through the loop (being vigilant or *satipaṭṭhāna* to cleansing the mind or *ānāpāna* to more cleansed mind to grasping deeper Dhamma and back to being vigilant), one makes progress.

Importance of *Tilakkhaṇa*

12. This effect is greatly amplified when one finally grasps *Tilakkhaṇa*: One comprehends the futility of staying in this rebirth process (*anatta*.) Anything that we acquire through much effort cannot be kept to our satisfaction in the long run (*anicca*) and eventually lead to nothing but suffering (*dukkha*.) When one can “see” that, one will realize the urgency to reduce and remove one’s *āsava* (bad *gati*). This leads to the *Sotāpanna* stage.

- A huge chunk of *āsava* (bad *gati*) simply disappear just via this understanding of the *anicca* nature at the *Sotāpanna* stage. Highly potent immoral *javana citta* do not arise in the mind of a *Sotāpanna*. Then no more rebirth in the *apāyā* or the four lowest realms.
- Thus with *udayavaya ñāṇa*, one can really clarify the path to the *Sotāpanna* stage.
- Then the remaining *āsava* disappear (*āsavakkhaya*) via three more stages (*Sakadāgāmī*, *Anāgāmī*, *Arahant*) by continuing this process (*Ānāpāna* and *Satipaṭṭhāna*), and one attains *Nibbāna*, permanent happiness or the removal of all future suffering.
- But one also needs to do *Ānāpāna* and *Satipaṭṭhāna* before the *Sotāpanna* stage in order to cleanse the mind to a level that is capable of grasping *anicca*, *dukkha*, *anatta*.

Closing the ‘Gaps’

13. Finally, I would like to close the loop by pointing to the connection to the concepts we have discussed in the early posts. The *gandhabba* consumes three kinds of mental food: *phassa āhāra*, *mano sañcetanā āhāra*, and *viññāṇa āhāra*.

- As we saw in the previous post in this series, “[Āhāra \(Food\) in Udayavaya Ñāṇa](#),” all three types of mental foods are consumed by the *cittaja kāya*. And this confirmed by the above discussion: Our initial sense inputs that COULD trigger *javana citta* come via *phassa*, sense contacts. They are JUST contacts. But based on those, we COULD accumulate new *kamma vipāka* (*abhisankhāra*) by making *samphassa*; also see, “[Vedanā \(Feelings\) Arise in Two Ways](#).”
- *Mano sañcetanā āhāra* (which are *abhisankhāra*) come into play during those *samphassa*; this simply means we start “making plans”, and also keep going back to that sensory input. With repeated triggers for a given sense input (*samphassa*) provides *āhāra* for that *viññāṇa*; for example, see, “[2. Viññāṇa \(Consciousness\) can be of Many Different Types and Forms](#),” and other relevant posts.

By reading the links given (and also using the “Search box” at top right) one should be able to clarify key issues. Please don’t hesitate to comment if you need help in clarifying a given concept.

14. Also, please make sure to enter your email address correctly when making a comment. Recently, one person entered incorrect address, and sent me the same question twice. Unfortunately, I have no way of letting him know that I replied each time.

8.1 Pāli Glossary

1/2/16: It seems that the audio files are not loading, so just removed the audio files.

We now have a [Popup Pāli Glossary with Pronunciation](#).

Possible Confusion in Pronunciation

It seems that the following conventions were adopted in order to make the text shorter.

In many cases:

1. “c” needs to be pronounced “**ch**” as in “**ch**arm” or “**ch**icago.”
2. “t” needs to be pronounced “**th**” as in “**th**ud” or “**th**row.”
 - For example, *citta* pronounced “chiththa”, *cakkhu* is pronounced “chakkhu”, *anicca* as “anichcha”, *anatta* as “anaththa”, *jāti* as “jathi”, *taṇhā* as “thanha”, *tilakkhana* as “thilakkhana.”
3. “d” needs to be pronounced “**th**” as in “**th**is” or “**th**at.” Note the difference in pronouncing “**th**” between 2 and 3.
 - For example, *vedanā* or dāna (as in giving) is pronounced this way.

Pronunciation Key

á rhymes like pat â → care ã → pay ā → father ê → pet ë → bee th → thin dh → this
ö → toe ü → moon ch → chin ng → thing

Common Pāli Words

I will keep adding more words to the glossary. If you would like me to add any missing words to the glossary, please send a comment.

10/6/15: I have added audio files. Please note the volume control below each audio.

Pāli Word	Audio	Pronunciation	Meaning
akusala		akusala	immoral, unwholesome
adosa		adhosa	non-hatred
alobha		alobha	non-greed
amoha		amoha	non-delusion
Anāgāmī		Anāgāmī	Non-Returner (to the human world)
Anariya		Anāriyā	One who is not yet a Noble One or Ariya
anatta		anaththā	not in-control, helpless
anicca		anichchā	inability to maintain to one's satisfaction
anantara			being in storage until retrieval (kamma vipāka)

Pāli Word	Audio	Pronunciation	Meaning
anupassana		anupassanā	contemplate with anicca, dukkha, anatta
anusaya			defilements arising from latent cravings (āsava)
apāya		apāya	common term for four lowest realms
abhijjā [abhijjhā]		abhijjā	strong greed
Arahant			Never to be born in any of the 31 realms
Ariya		āriyā	noble one (Sotāpanna or above)
arūpa		arūpa	without rūpa (not really correct)
avijjā		avijjā	ignorance
ahirika		ahirikā	shamelessness
ahetuka		ahāthuka	without good roots
akasa		ākāsa	space (the void in between rūpa)
aloka		āloka	light, dissociating from “this world”
āpo		āpo	cohesive element
ārammaṇa		ārammana	object of thought
āsava (asaya)		asāva	deep-seated craving
asevana		āsāvanā	repeated practice
bahiddha		bahidhdhā	external
bala			power
bhanga		bhangā	dissolution
bhava			existence level
Bhaudhayā (Buddhist)		Bhaudhdhayā	One striving to stop the rebirth process
bhāvanā		bhāvanā	meditation, constant contemplation & use
Buddha		Budhdha (not “Budhdhā”)	Buddha Gotama
bhavaṅga		bhavangā	life continuum
bhaya			fear
citta		chiththa	early stage of a thought (pure thought)

Pāli Word	Audio	Pronunciation	Meaning
dana		dāna	giving
dasaka			decad
deva		dāva	a being in 6th-11th realms
dhamma		dhammā	Buddha's teachings, phenomenon, mental object
dhammavicaya		dhammavichaya	investigation of concepts like anicca
dhātu		dhāthu	element
diṭṭhi			view, wrong view unless specified
domanassa		dhomanassa	displeasure
dosa		dhosa	hatred
dukha		dhukha	suffering
dukkha		dhukhkha	suffering & it can be overcome
dvara		dhvāra	door (to the outside world)
ekaggata		ekaggathā	one-pointedness (of the mind)
gandha			smell
gati		gathi	character
hadayavatthu		hadayavaththu	seat of mind
hetu		hāthu	root cause
hiri			shame
iddhipada		iddhipāda	means to accomplishment
kāmacchanda		kāmachanda	greed for things in kamaloka
kamaloka		kāmalōka	first 11 realms with five physical senses
kamavacara		kāmavachara	belonging to kamaloka
kamma		kammā	action, deed
kasiṇa		kasiṇa	meditation device (usu. a colored disk)
kāya		kāya	sensing (seeing, hearing, etc)
kaya		kaya	body
khaya			cutting off

Pāli Word	Audio	Pronunciation	Meaning
khana			moment, sub-moment
khandha			aggregate, collection, heap
kilesa (keles)		kilāsa	defilement
kukkucca		kukkuchcha	tendency to do lowly things
kusala			removal of defilements
lahuta		lahūta	lightness
lakkhana		lakhkhana	characteristic
lobha		lobha	greed
loka		loka	world
lokuttara		lokoththara	beyond this world, transcendental
maccariya		machchariya	extreme greed, hiding wealth
magga		magga	path
mana		māna	conceit
manasikara		manasikāra	memory
mano		mano	mind
manodhatu		manodhāthu	mind element
manodvara		manodvāra	mind door
manussa			human being
marana			death
metta		meththā	loving kindness
micchā diṭṭhi		michcha diththi	wrong views
middha		midhdhha	lethargic mind
moha		moha	delusion
mudita		mudhithā	appreciative joy
muduta		mudhuthā	malleability
mūla		mūla or mūla	root
nama		nāma	name, mental
nāmarūpa		nāmarūpa	name and form

Pāli Word	Audio	Pronunciation	Meaning
ñāṇa		ngāna	knowledge
nimitta		nimiththa	sign
nivarana		neevarana	hindrance
niraya			hell
niyama		niyama (not niyāma)	law of nature
oja		ojā	nutritive essence
paccaya		pachchayā	condition
pahāna		pahāna	abandoning
pancadvara		panchadvāra	five sense doors
pañcakkhandha		pancakkhandhā	five aggregates
pancaupadanakkhandha		pancaupādānakkhandhā	grasping/craving of five aggregates
paññā		pangngā	wisdom
pīti		peethi (preethi)	joy
paññindriya			wisdom faculty
paramatta		paramatthā	ultimate reality
pasāda rūpa		pasāda rūpa	sensitive matter (internal rūpa)
passaddhi		passaddhi	tranquility
pathavi			element of hardness
paṭicca		patichcha	bind to something willingly
paṭigha			aversion, dislike
pavutthi		pavutthi	during this life, current
peta (preta)		petā (pretha)	hungry ghost
phala			fruit, fruition
phassa			contact
puggala			individual
purisa			masculine
rāga		rāga	attachment to saṁsāra
rasa			taste

Pāli Word	Audio	Pronunciation	Meaning
rūpa		rūpa	matter (and energy)
rūpa kalapa		rūpa kalāpa	material group unit
rupavacara		rūpavāchara	belonging to rūpa loka
sadda		sadhdha	sound
sadharana		sādhāraṇa	universal, common
saddhā		sadhdhā	faith (through knowledge and understanding)
sahetuka		sahēthuka	with roots
Sakadāgāmī		Sakadagāmi	Once-Returner (one more rebirth as a human)
saḷāyatana		saḷāyathana	six sense bases
samādhi		samādhi	high concentration with pure mind
sammā			quench (defilements)
samāpatti		samāpaththi	meditative attainment
samanantara		samananthara	contiguity, matching with anantara
samatha		samathā	calming the mind
samauppada		samauppāda	birth of a similar kind
saṅkappa			ideas
saṅkhāra		saṅkhāra	actions leading to defilements
saṅkhata (sankata in Sinhala)		sankhatha	conditioned, formed by conditions
saññā		sangngā	perception
saṁsāra (also called saṁsāra)		saṁsāra	beginningless rebirth process
sasava		sāsavā	with craving
sati		sathi	mindful of anicca, dukkha, anatta
satipatṭhāna		sathipattāna	establishment of sati
sanyojana		sanyojana	bind to defilements, fetter
sīla		seela	virtue, moral conduct
sekha		sēkha	trainee (the three stages below the Arahant)
somanassa		somanassa	with joy

Pāli Word	Audio	Pronunciation	Meaning
sota		sotha	ear
Sotāpanna		Sothapanna	Stream Enterer (first stage of Nibbāna)
taṇhā		thanhā	attachment (bondage) due to greed, hate, or delusion
tejo		thājo	heat element
thina		theena	sloth
uddhacca		udhdhachchā	tendency to be high-minded (restlessness)
upādāna		upādhāna	clinging, like to hold onto
upekkha			equanimity, neutrality
uppatthi		uppaththi	birth
vacī		vachi	speech
vaṇṇa (varna)			color
vayama		vayāma	effort
vāyo		vayo	fluidity
vedanā		vādana	feeling
vicara		vichāra	sustained concentration on an object
vicikicchā		vichikichchā	acting without sati
vīmaṁsā		vīmaṁsā	investigation
vinnati		vingngāthi	intimation
viññāṇa		vingngana	(defiled) consciousness
vipāka		vipāka	result
vipassana		vipassanā	insight (via analysis of parts)
virati		virathi	abstinence from indulgence
viriya			effort
visuddhi		visudhdhi	purification
vitakka		vithakka	initial application of the mind on an object
vīthi		veethi	process (sequential)

Pāli Word	Audio	Pronunciation	Meaning
votthapana		voththapana	determining
vyāpāda		vyāpāda	ill will, stronger than paṭigha

8.2 Pāli Glossary – (A-K)

August 12, 2016; Revised May 27, 2017; February 19, 2020; May 29, 2022 (#4 added)

“Tipiṭaka English” Convention

1. I have revised the Pāli words to align with the convention used by most English texts. This convention was apparently adapted by the early European scholars (Rhys Davis and others) in order to keep the length of the word short. I will use this convention in new posts and try to update old posts gradually. See the following two posts for details:

- [“Tipiṭaka English” Convention Adopted by Early European Scholars – Part 1](#)
- [“Tipiṭaka English” Convention Adopted by Early European Scholars – Part 2](#)

Additional Pronunciation Keys:

“a” is pronounced like “u” in cut; “ā” is pronounced like “a” in father

- “ī” is pronounced like “i” in sit; “ī” is pronounced like “ee” in bee
- “u” is pronounced like “u” in “put”; “ū” is pronounced like “oo” in cool
- “o” is pronounced like “oe” in “Moe”; “e” is pronounced like “a” in pay
- “c” needs to be pronounced like “ch” as in “charm” or “chicago”
- “ñ” needs to be pronounced like “gn” in “signor”

2. This glossary is in two posts, because there are a total of over 400 Pāli words included now. This is the first part of the glossary; second part at, [“Pāli Glossary – \(L-Z\).”](#)

- I have been able to get the audio files incorporated, and also have provided links to key posts whenever possible/needed.
- We also have a [Popup Pāli Glossary with Pronunciation](#), thanks to Mr. Seng Kiat Ng. If that GoldenDict dictionary is installed on your computer, you will be able to access this glossary from each post directly. Furthermore, it could provide translations from other online dictionaries as well.

3. Relevant posts on any of the words can be found by using the “Search” box on the top right.

Pāli Word	Meaning	Audio
abhaya	"a" + "bhaya"; doing something to stop someone's fear	
abhaya dāna	saving the life of a living being	
abhijjhā	strong greed	
abhiññā	supermundane powers	
abhisaṅkhāra	strong saṅkhāra that lead to rebirths and strong vipāka	
ādinava	bad outcome: Assāda, Ādinava, Nissarana – Introduction	
adhimokkha	arising to the top; reaching a high value	

Pāli Word	Meaning	Audio
adhivāsana	things one gets used to based on sansāric habits; part of gathi	
adinnādāna	stealing; taking something without permission	
adosa	without hatred	
ajjhatta	internal	
ākāsa	space (the void in between rūpa)	
ākāsānañcāyatana	first arūpa brahma realm	
ākiñcaññāyatana	third arūpa brahma realm	
akusala	immoral act	
āhāra	nutrients (for body or mind)	
ahetuka	without good roots	
ahirika	shamelessness	
akālika	remove defilements or timeless (no birth or death, i.e., Nibbāna)	
alobha	without greed	
āloka	light, dissociating from “this world”	
āmisa	mundane (belonging to 31 realms)	
amoha	without delusion; moral mindset	
amurta	fine food (drink) of devas	
Anāgāmī	Non-Returner (to the human world)	
anāgata	future	
ānāpāna	7. What is Ānāpāna?	
ānāpānasati	6. Ānāpānasati Bhāvanā (Introduction)	
anāriya	not Noble	

Pāli Word	Meaning	Audio
anatoppa	fear of doing immoral deeds	
anatta	not in-control, helpless	
ānenjābhi saṅkhāra	Saṅkhāra, Kamma, Kamma Bīja, Kamma Vipāka	
anicca	inability to maintain to one's satisfaction	
Aniccata	tendency to change unexpectedly; characteristic of a rūpa: Rūpa (Material Form) – Table	
anidassana	Cannot be seen; can also mean pure as in anidassana viññāṇa	
animisa	without pausing for even a moment: Animisa Locana Bodhi Poojā – A Prelude to Acts of Gratitude	
aññamañña	depend on each other	
anantara	being in storage until retrieval (kamma vipāka)	
anumodanā	accept pattidana (transfer of merits or sharing of merits) with joy	
anupassanā	discard kileasa by contemplating with anicca, dukkha, anatta: see #6 of 4. What do all these Different Meditation Techniques Mean?	
anusaya	defilements arising from latent cravings (āśava) and kileasa	
apacāyana	paying respects to those with higher virtues: Puñña Kamma – Dāna, Sīla, Bhāvanā	
aparāpariya vedaniya	kamma vipāka that can materialize at any time in future	
apāya	common term for four lowest realms	
āpo	cohesive element	
Appanā samādhi	almost at jhāna: What is Samādhi? – Three Kinds of Mindfulness	
appaṇāta	not to liking; dislikes	
appaṭigha	cannot be grasped or touched	
apuñña	immoral	
apuññaabhi saṅkhāra	highly immoral saṅkhāra	
Arahant	never to be born in any of the 31 realms	

Pāli Word	Meaning	Audio
ārammaṇa	object of thought	
Ariya	Noble person (Sotāpanna or above)	
arūpa	without rūpa	
asañña	without perception; without sañña	
āsava = āsaya	deep-seated craving	
āsavakkhaya ñāṇa	Knowledge of removing āsava: The Way to Nibbāna – Removal of Āsavas	
āsevana	repeated practice; associate	
asobhana	ugly or defiled (used mainly for cetasika)	
asura	one of the four apāyā; beings there have large bodies and are inactive	
assāda	enjoyment	
atīta	past	
atta	opposite of anatta or eight	
attha	opposite of anatta; perception that one has total control	
avici	one of the niraya (hell)	
avihiṃsā	non-aggressive	
avinibbhoga	constituents not separable, as in a avinibbhoga rūpa kalapa	
avyāpāda = abyāpāda	not angry, kind	
āyatana	an indriya becomes as āyatana: Sorting out Some Key Pāli Terms - Tanhā Lobha Dosa Moha etc	
āyu	lifetime	
avijjā	Ignorance of Tilakkhaṇa	
bahiddhā	external	
bahijja	external	

Pāli Word	Meaning	Audio
bala	power	
bali	distort	
bīja	seed	
bhaṅga	dissolution; destruction	
bhava	realm of existence	
Bhauddhayā (Buddhist)	One striving to stop the rebirth process	
bhāvanā	meditation, constant contemplation & use	
bhavaṅga	life continuum	
bhaya	fear	
Bhikkhu	Buddhist monk	
bodhicitta	a Mahāyāna term denoting "enlightenment-mind"	
bojjhaṅga	bodhi aṅga or facilitating factor for Nibbāna	
brahma	a being in rūpa or arūpa brahma realms	
Buddha	Buddha Gotama	
cakkhu	eye or seeing	
cakkavāḷa	planetary system like our Solar system	
cetanā	intention; but deeper: "Details of Kamma – Intention, Who Is Affected, Kamma Patha."	
cetasika	mental factor	
chanda	liking	
citta	thought (pure thought)	
cittānupassanā	doing anupassana via contemplating on thoughts	
citta vīthi	citta come in packets of a discrete number; a single citta does not arise	

Pāli Word	Meaning	Audio
cutūpapāta ñāṇa	ability to see all previous births	
cuti	death	
cuti citta	moment of death	
dāna	giving	
dasa	ten	
dasaka	decad; group of 10	
dassana	vision; but normally used for "comprehending"	
dassanena pahātabba	removing (kilesa) via comprehension of Dhamma	
desanā	verbal discourse	
deva	a being in 6th-11th realms	
Dhamma	Buddha's teachings, phenomenon, mental object	
dhammavicaya (sambojjhaṅga)	investigation of concepts like anicca	
dhammānudhamm a patipadā	condition for attaining Sotāpanna stage: Four Conditions for Attaining Sotāpanna Magga/Phala	
dhammānupassan ā	doing anupassana via contemplating on Dhamma	
dhātu	element	
dhyāna (same as jhāna)	meditative state with rūpa loka or arūpa loka consciousness	
ditta	observation	
ditthi	view, wrong view unless specified	
diṭṭhijukamma	“diṭṭhi”+“uju”+“kamma” or getting rid of wrong views on kamma: Puñña Kamma – Dāna, Sīla, Bhāvanā	
domanassa	mental agony, displeasure; not bodily suffering	
dosa	hatred	
dosakkhaya	dosa + khaya or removal of hate	

Pāli Word	Meaning	Audio
dugathi	"du" + "gathi" or habits that can lead to bad rebirths	
dukha	suffering	
dukkha	suffering & it can be stopped from arising	
dvāra	door (to the external world)	
ehipassiko	a quality of Dhamma, removing defilements in real time: Supreme Qualities of Buddha, Dhamma, Saṅgha	
ekaggatā	one-pointedness (of the mind)	
gandha	smell, odor	
gandhabba	Gandhabba (Manomaya Kāya)	
gati	character, habits	
ghāṇa	nose or smelling	
gotrabhu	change of lineage ("gotra") when getting close to a jhāna	
hadaya vatthu	seat of mind (in the gandhabbayā)	
hetu	root cause	
hiri	shamefulness for doing akusala kamma	
iddhi	special powers or knowledges	
iddhipāda	means to special (mental) accomplishment	
indriya	one of the six sense faculties when used without lobha, dosa, moha	
issa (irisiyā in Sinhala)	jealousy	
Itthi (sthree in Sinhala)	feminine	
jarā	getting old or weak	
Jaratā	one of 28 rūpa: Rūpa (Material Form)	
jāti	birth of a living being OR birth of anything	

Pāli Word	Meaning	Audio
javana	those citta with which saṅkhāra committed or kamma vipāka generated: Javana of a Citta – The Root of Mental Power	
jhāna (same as dhyana)	meditative state with rūpa loka or arūpa loka consciousness	
jivhā	tongue (more accurately jivha indriya) OR taste	
jīvita	life: jivita indriya maintains life	
Jīvitindriya	one of the 7 universal cetasika: Cetasika (Mental Factors) OR one of the 28 rūpa: Rūpa (Material Form)	
kabaḷikāra	one of the 4 āhāra: Āhāra (Food) in Udayavaya Ñāna	
kappa (kalpa in Sinhala)	time duration of an entity: kappa of a human is about 100 years; mahā kappa is lifetime of the universe	
kalyāṇa mittā (or mitrā in Sinhala)	Noble friend: Four Conditions for Attaining Sotāpanna Magga/Phala	
kāmacchanda	greed for things in kamaloka	
kāma loka	first 11 realms with five physical senses	
kāma rāga	attachment to sense pleasures in kamaloka	
kāmāvacara	belonging to kamaloka	
kāmesumicchācārā	immoral ways of enjoying sense pleasures: The Five Precepts – What the Buddha Meant by Them	
kamma	action, deed	
kammanta	actions as in sammā kammanta	
kammaṭṭhāna	meditation verses or procedures	
kandha	heap, pile, or aggregate	
karuṇā	compassion in the suffering of others	
kasiṇa	meditation object in anāriya jhāna (eg. a colored disk)	
kāya	pertaining to the body or action	
kaya	physical or mental body	
kāyānupassanā	doing anupassana via contemplating on the bodily actions	

Pāli Word	Meaning	Audio
khaṇika samādhi	What is Samādhi? – Three Kinds of Mindfulness	
khaya	cutting off or gradually reduce	
khaṇa	moment, sub-moment	
kriyā	action, deed

3. Relevant posts on any of the words can be found by using the “Search” box on the top right.

Pāli Word	Meaning	Audio
lobha	excess greed: Lobha, Rāga and Kāmaccaṇḍa, Kāmarāga	
lahutā	lightness (e.g., <i>kāya lahutā</i> is lightness in body)	
lakkhaṇa	characteristic of	
loka	realm or world depending on the context	
lokiya	belonging to this world of 31 realms	
lokuttara	beyond this world of 31 realms, transcendental	
macchariya	hiding wealth due to extreme greed	

Pāli Word	Meaning	Audio
magga	path; procedure	
mahā	large or important	
māna	arrogance, self-admiration	
manasikāra	memory. Details at: Citta and Cetasika – How Viññāna (Consciousness) Arises	
mano	mind	
mano sañcetanā	<i>vedanā, saññā</i> that arise due to one's gati	
manodhatu	mind element	
manodvāra	mind door to <i>nāmaloka</i> ; see, Our Two Worlds: Material and Immaterial	
manodvāravajjana	a citta coming to the mind door as in <i>manodvāravajjana citta</i>	
manussa	human being	
marana	death (death of a physical body is not necessarily the end of human bhava; see, " Antarābhava and Gandhabba ")	
mettā	kindness. Has two meanings: " Ariya Mettā Bhāvanā "	
micchā dīṭṭhi	wrong views; see. " Wrong Views (Micchā Dīṭṭhi) – A Simpler Analysis "	
middha	lethargic mind	
moha	delusion; mind totally covered; see, " Lobha, Dosa, Moha versus Rāga, Patigha, Avijjā "	
mohakkhaya	moha + khaya, removing delusion	
muditā	joy in the success of others	
mudutā	malleability; e.g., kāya midutā	
mūla	root (usually in root cause)	
musāvāda	lies, trying to deceive: The Five Precepts – What the Buddha Meant by Them	
muta	combined word for smelling, tasting, and touching	
nāma	name, mental	

Pāli Word	Meaning	Audio
nāmarūpa	name and form OR mental image of a nāma and rūpa	
namaskāraya (Sinhala)	Namaskāraya – Homage to the Buddha	
ñāṇa	knowledge	
nātha	with refuge, opposite of anātha	
nekkhamma	relinquish sense pleasures: Difference Between Giving Up Valuables and Losing Interest in Worthless	
neva saññā nā saññāyatana	fourth arūpa brahma realm	
Nibbāna	stopping the rebirth process: Nibbāna	
nibbatti lakkhaṇa	Nibbatti Lakkhana in Udayavaya Ñāna	
nicca	having total control, that ability	
niddesa	short description: Sutta Interpretation – Uddesa, Niddesa, Patiniddesa	
nimitta	sign; something resembling	
nirāmisa	neutral thoughts without sense cravings	
nirodha	nir + udā or stop from arising	
nissaraṇa	willingly give up assāda: Assāda, Ādīnava, Nissarana – Introduction	
Nivana (Sinhala)		
nīvaraṇa	hindrance; covered mind	
niraya	hell	
niyama (or niyāma)	law of nature	
niyata	permanent, fixed	
ojā	nutritive essence	
oḷārika	rough, condensed	
opapātika	instantaneous and fully-formed birth as in deva and brahma realms	

Pāli Word	Meaning	Audio
pabhassara	devoid of greed, hate, and ignorance; e.g., pabhassara citta	
paccayā	condition	
paccuppanna	conditional arising; present moment arising due to conditions	
pahāna	abandon; remove	
pahātabba	removal	
pakiṇṇaka	particulars or occasionals as in pakiṇṇaka cetasika: Cetasika – Connection to Gati	
pāṇātipātā	killing a living being: The Five Precepts – What the Buddha Meant by Them	
panca	five	
pañcadvāra	five sense doors	
pañcadvāra vajjana cittā	Citta Vīthi – Processing of Sense Inputs	
pañcakkhandha	five aggregates	
pañcanīvaraṇa	five hindrances that cover the mind	
pañcaupādānakkhandha	grasping/craving of the five aggregates: Pañcaupādānakkhandha – It is All Mental	
paṇīta	likable or good	
paññā	wisdom; comprehension of Tilakkhaṇa	
pāpa kammā	immoral actions	
para loka (paraloka in sinhala)	a human or animal gandhabba lives in para loka until a womb becomes available: Hidden World of the Gandhabba: Netherworld (Paraloka)	
pāramitā	strive through many rebirths: Paramita and Niyata Vivarana – Myths or Realities?	
paribramana	rotating around another body	
perideva	lamentation, especially upon remembering a past mishap	
parivajjana	staying clear of bad influences: The Sotāpanna Stage	

Pāli Word	Meaning	Audio
pīti	joy	
paññindriya	wisdom faculty	
parāmattha	ultimate reality	
pharusāvācā	harsh speech: Ten Immoral Actions (Dasa Akusala)	
pasāda rūpā	sensitive matter (five internal senses; not physical senses): Brain – Interface between Mind and Body	
passaddhi	tranquility	
pathavi	element of hardness	
paṭicca	get bonded to something willingly	
paṭigha	aversion, dislike	
patikūla manasikāra bhāvanā	4. What do all these Different Meditation Techniques Mean?	
paṭipadā	a procedure; way of living, like in majjima paṭipāda	
paṭiniddesa	detailed description: Sutta Interpretation – Uddesa, Niddesa, Patiniddesa	
paṭisandhi	Grasping a new existence (bhava)	
paṭisevana	good associations as in paṭisevana pahātabba: The Sotāpanna Stage	
pattānumodanā	Transfer of Merits (Pattidāna) – How Does it Happen?	
pattidāna	transfer of merits: Transfer of Merits (Pattidāna) – How Does it Happen?	
pavutthi	during this life, current	
pīḷama (peleema in Sinhala)	incessant stress, agitation: Anicca – The Incessant Distress (“Pīḷana”)	
peta (pretha)	hungry ghost; one of the four apāyā	
phala (pala in Sinhala)	fruit, fruition	
phassa	sense contact; most times it is defiled or samphassa: Difference between Phassa and Samphassa	

Pāli Word	Meaning	Audio
pisuṇāvācā	slandering: Ten Immoral Actions (Dasa Akusala)	
phoṭṭhabba	"poththa" + "abba", where "poththa" is skin: sense of touch	
pubbe	previous	
pubbenivāsānussa ti ñāṇa	see #12 of Antarābhava and Gandhabba	
puggala	individual	
puñña kriyā	deed that makes one's heart joyful	
purisa	masculine	
rāga	attachment to the 31 realms: Lobha, Rāga and Kāmaccanda, Kāmarāga	
rāgakkhaya	rāga + khaya: removal of attachment to the 31 realms	
rasa	taste	
rūpa	matter AND energy	
rūpa kalāpa	elementary material group unit: Rūpa Kalāpa (Grouping of Matter)	
rupavacara	belonging to rūpa loka	
sabba	all	
sacca	truth, as in a Noble Truth	
sadda	sound	
saddhā	faith (through knowledge and understanding)	
sahajāta	born together	
sahetuka	with good roots as in dvihetuka and tihetuka; if no good roots it is an ahetuka birth	
Sakadāgāmī	Once-Returner (one more rebirth in kāma loka)	
saḷāyatana	six sense bases for a normal human	
samādhi	concentration on a good or bad mindset: What is Samādhi? – Three Kinds of Mindfulness	

Pāli Word	Meaning	Audio
samanantara	matching with anantara: Anantara and Samanantara Paccayā	
samāpatti	different from jhāna, see: Citta Vīthi – Processing of Sense Inputs	
sammā	quench (defilements): What is “San”? Meaning of Sansāra (or Saṁsāra)	
sammappadhāna	four main efforts to stop "san" from arising: Two Versions of 37 Factors of Enlightenment	
samatha	calming the mind	
sāmisa	citta with kilesa or akusala cetasika	
sampajāna	sorting defiled thoughts: Satipatthāna Sutta – Structure	
sampappalāpa	frivolous talk: Ten Immoral Actions (Dasa Akusala)	
samphassa	"san" + "phassa": Difference between Phassa and Samphassa	
sampañcāna	where "gati" are incorporated into a citta vīthi: Citta Vīthi – Processing of Sense Inputs	
sampayutta	together and inseparable, like a dye dissolved in water	
samudaya	arising due to "san": "san" + "udaya"	
samuppāda	birth of a similar kind: sama + uppada	
saṁvega or saṁvega	"san" + "vega": javana power in a citta due to "san": see #9 of Javana of a Citta – The Root of Mental Power	
san	San	
sandiṭṭhiko	"san" + "diṭṭhi" or enable seeing "san": Supreme Qualities of Buddha, Dhamma, Saṅgha	
saṅkappa	thoughts, ideas	
saṅkhāra	actions leading to defilements, habits	
saṅkhata (sankata Sinhala)	in arisen by conditions	
saññā	perception, identification	
saṁsāra or saṁsāra	beginningless rebirth process: What is “San”? Meaning of Sansāra (or Saṁsāra)	

Pāli Word	Meaning	Audio
saṁsāric	related to the rebirth process	
santati	one of the 28 types of rūpa: Rūpa (Material Form)	
saṁvara	"san" + "vara" or stop "san" by moral behavior: What is "San"? Meaning of Sansāra (or Saṁsāra)	
saṁvarena	via sanvara as in sanvarena pahatabba: The Sotāpanna Stage	
saṁvega	"san" + "vega": enhanced javana of a citta due to "san", i.e., highly emotional	
sapta or saptha	seven	
sāsana	Buddha sāsana is Ministry of the Buddha	
sasankhārika	immoral citta arising due to shrunken mind (thīna middha)	
sāsava	with craving	
satara (in Sinhala)	four	
sakkāya diṭṭhi (or sathkāya diṭṭhi)	perception that things in this world are worth striving for: How do we Decide which View is Wrong View (Diṭṭhi)?	
sati	in the mindset of anicca, dukkha, anatta: Satipatthāna – Introduction	
satipatṭhāna	maintain sati: Mahā Satipatṭhāna Sutta	
santīraṇa	where a decision is made in a citta vīthi: Citta Vīthi – Processing of Sense Inputs	
sanyojana or saṁyojana	bind to defilements or "san"	
sīla	virtue, moral conduct	
silabbata paramasa	perception that Nibbāna can be attained via just obeying set precepts or procedures	
sekha	trainee (the three stages below the Arahant stage)	
sobhana	good, likable, moral	
soka	sorrow due to personal loss	
somanassa	with joy	
sota	Two possible meanings: ear and Noble Eightfold Path	

Pāli Word	Meaning	Audio
Sotāpanna	Stream Enterer (first stage of Nibbāna)	
Suddhaṭṭhaka	smallest material element: The Origin of Matter – Suddhatthaka	
suddhāvāsa	Brahma realms reserved for the Anāgāmīs	
sugati	"su" + "gathi" or moral habits/behavior; also good realms: Sansāric Habits, Character (Gati), and Cravings (Āsava)	
sukha	bodily pleasure, like with a massage; somannasa is mental	
sukuma	fine; not coarse	
suññatā	emptiness: What is Sunyata or Sunnata (Emptiness)?	
suta	sound	
sutta	discourse in the Tipiṭaka	
suva	as in Nīvan suva:	
taṇhā	attachment (bondage) due to greed, hate, or delusion	
tatramajjhataṭṭhā	neutrality of mind; not upekkhā: Cetasika – Connection to Gati	
tejo	heat element	
Thero	One who has attained Nibbāna; nowadays it is used for non-Arahants bhikkhus too	
thīna	shrinking of the mind, not alert	
tuccha	lowly (behavior)	
tiparivaṭṭa	Three rounds of bondage to this world.	
tīhetuka	paṭisandhi with three good roots	
tilakkhana	Three characteristics of the 31 realms: Anicca, Dukkha, Anatta	
Tipiṭaka	three piṭaka: sutta, vinaya, abhidhamma: Preservation of the Dhamma	
tisarana	refuge in Buddha, Dhamma, Saṅgha: Tisarana Vandana and Its Effects on One's Gati	
tivijjā	Three special knowledges of the Buddha: The Way to Nibbāna – Removal of Āsavā	

Pāli Word	Meaning	Audio
uccheda diṭṭhi	wrong view that death of the physical body is the end of a living being, i.e., disbelief in rebirth process	
udayavaya	arising and destruction of a saṅkhata (sankata in Sinhala): Udayavaya Ñāṇa	
udayavaya or udayabbaya ñāṇa	Udayavaya Ñāṇa	
uddhacca	tendency to be high-minded (restlessness)	
uddesa	very short description: Sutta Interpretation – Uddesa, Niddesa, Paṭiniddesa	
upacāra	close to	
upacāra samādhi	samādhi close to jhānic state	
upādāna	clinging, like to hold onto	
upekkha	equanimity, neutrality	
uppatti	birth	
utu	natural change kammaja and cittaja energies to rūpa	
utuja rūpa	rūpa produced via the transformation of kammaja and cittaja rūpa	
vacī	speech	
vaṇṇa (varna in sinhala)	color	
vaya	destruction or deviating to immorality	
vāyāma	effort	
vāyo	element of movement, motion	
vedanā	feeling or more precisely "sensing of an event": Vedanā (Feelings)	
vedanānupassanā	anupassanā on feelings: Satipatṭhāna – Introduction	
veyyāvacca	paying homage to and taking care of Holy places: Puñña Kamma – Dāna, Sīla, Bhāvanā	
vibhava	disbelief in rebirth: Kāma Taṇhā, Bhava Taṇhā, Vibhava Taṇhā	
vicāra	sustained concentration on a thought object	

Pāli Word	Meaning	Audio
vicikicchā	acting without sati; uncertainty of what to do; doing inappropriate things	
vipassanā	insight meditation with and for clear vision: 4. What do all these Different Meditation Techniques Mean?	
vimāna	residence, normally of a deva	
vimansā	contemplation, investigation	
vimutti	release (from the rebirth process)	
vinaya	rules of discipline for bhikkhus: Kamma, Debt, and Meditation	
viññāṇaṇḍīyatana	second arūpi brahma realm: 31 Realms of Existence	
viññata	comprehension via viññāṇa	
viññāti	intimation. For example, kāya viññāti is express intention via body movement.	
viññāṇa	defiled consciousness	
viññāṇaṇḍīyatana	second arūpa brahma realm: 31 Realms of Existence	
vinodanā	in vinodanaā pahatabba: The Sotāpanna Stage	
vipāka	result (of a kamma)	
viparināma	unexpected change	
vipassanā	removing defilements via insight of Tilakkhaṇa	
vippayutta	appear together, but separable; like a current in a wire	
virati	lose craving for indulgence	
viriya	effort	
visuddhi	purification	
vitakka	initial application of the mind on an object	
vīthi	street; but in a citta vīthi means a "packet of thoughts" with a certain number of citta	
votthapana	determining (citta)	

Pāli Word	Meaning	Audio
vyāpāda or byāpāda	ill will, stronger than paṭigha	
yojanā	distance of about 7 miles	
yoniso manasikāra	ability to see consequences of one's actions for future rebirths: Four Conditions for Attaining Sotāpanna Magga/Phala

8.4 List of “San” Words and Other Pāli Roots

June 29, 2017; revised November 9, 2018

1. Pāli is a phonetic language. It does not have its own alphabet. *Tipiṭaka* was originally written down in Pāli with the Sinhala alphabet.

- Pāli verses are composed for ease of oral transmission. *Tipiṭaka* was orally transmitted faithfully for several hundred years.
- So, in many cases, root words are hidden in combined words in verses that were composed to rhyme better for easy oral transmission.

2. Rather than trying to find roots in Sanskrit, that is the way to find the roots. As I explained with evidence from the *Tipiṭaka*, **the Buddha prohibited the use of Sanskrit words, or even to translate the *Tipiṭaka* to Sanskrit**; see, “[Preservation of the Buddha Dhamma](#).”

- That is because despite some similarities, Sanskrit many words were composed to sound more “impressive”, without paying attention to embedded meanings.
- For example, *Pratītyasamutpāda* is the Sanskrit term for *Paṭicca Samuppāda*. *Pratītyasamutpāda* sounds impressive but the meaning is not clear at all.
- On the other hand, it is clear in *pati + icca* leading to *sama + uppāda*; see, “[Paṭicca Samuppāda – “Pati+ichcha”+“Sama+uppāda](#).”

3. Pali words are combined in ways to rhyme better. By finding key root-words embedded in such “combined words”, one can easily figure out the meaning.

- “*yadaniccā tam dukkham, yam dukkham tadanattā*” verse appears in many *suttā*.
- In order to understand it, we need to “expand it” or “unfold it”: “*yad aniccā tam dukkham, yam dukkham tad anattā*.”
- Now the meaning becomes clear: “*aniccā* nature leads to *dukkha*, *dukkha* nature leads to *anatta* nature”; see, “[Anicca, Dukkha, Anatta – Wrong Interpretations](#).”

4. The following are some examples of combination of words to make a verse rhyme better for oral transmission.

Naidham = *na idham* or “not the case.”

Ayamantimā jāti = *ayam + antima + jāti* or “my last birth.”

Nūppajjati = *na + uppajjati*: “will not arise.”

Cittappasāda = *citta + pasāda*; note the two p’s in the combined word that allow it to rhyme better.

Similarly in: *Rūpakkhanda* = *rūpa khandha*: “*rūpa* aggregate.”

Aveccappasāda = *ava icca pasāda* or “faith that leads to overcoming *taṇhā* (attachment).”

Buddha = *bhava + uddha*: one who figured out how to stop existences (*bhava*) from arising.

Bhavaṅga = *bhava + aṅga*; intrinsic aspect of *bhava*.

Sakkāya = *sath + kāya*: good collections usually referring to the five aggregates. *Sakkāya diṭṭhi* is the view that the five aggregates should be embraced.

Anāpāna = *āna + āpāna*: “taking in” and “putting out.”

Note the pronunciation of the following words sort of backwards to rhyme better:

- *Anāgāmi* = *na āgāmi*: not coming back (in reference to not to come back to *kāma loka* for a person who has attained the *Anāgāmi* stage of *Nibbāna*).
- *Anatimāna* = *na + atimāna*: *atimāna* is “high-mindedness” and *anatimāna* is opposite or “humble.”

5. Just by knowing what is meant by the root “*san*,” many Pāli words can be understood easily; see, “[What is “San”? Meaning of Sansara \(or Samsara\).](#)”

- Note that some words are written and pronounced with emphasis on “m” rather than “n”, because it rhymes better that way; a good example is *saṃsāra* (*saṃsāra*) which can be written and pronounced either way.
- On the other hand, *sammā* comes from “*san*” + “*mā*,” but always pronounced as “*sammā*,” because it rhymes easier that way; eg., *sammā diṭṭhi*, *sammā saṅkappa*, etc.
- It must be kept in mind that “*san*” has various levels. First one needs to remove ‘*san*’ that lead to immoral activities that can lead to births in the *apāyā*; after one becomes a *Sotāpanna*, one should strive to eliminate “*san*” involving sense pleasures; after becoming an *Anāgāmi*, the goal is to remove “*san*” associated with *rūpa* and *arūpa jhāna*. I only stated “sense pleasures” in the Table.

6. I plan to add another table for Pāli words with a few more key “roots.”

Pāli Words with “San” Root

No	Pāli Word	Roots	Meaning of added word	Meaning of whole word
1	Sammā	san + mā	mā means to "remove"	associated with removing "san"
2	sammāpaṭipatti	san + mā + patipatti	patipatti is a process	method or effort to remove "san"
3	sammāvimutti	san + mā + vimutti	vimutti is complete release	Arahant phala; Nibbāna
4	Sammanti	san + mā	like gaccā to gaccanti	attaining peacefulness by removing "san"
5	samantano	san + anta; rhymes like samananta	anta is end	a process that gets rid of "san"
6	Sammā diṭṭhi	Sammā + diṭṭhi	diṭṭhi is vision (here to see Tilakkhaṇa)	clear vision to see danger of (and how to remove) "san"
7	Sammā saṅkappa	Sammā + saṅkappa	saṅkappa are conscious/unconscious thoughts	thoughts to removing "san"
8	Sammā vācā	Sammā + vācā	vācā is conscious thoughts/speech	speech to remove "san"
9	Sammā kammanta	Sammā + kammanta	kammanta is actions	bodily actions to remove "san"
10	Sammā ajīva	Sammā + ajīva	ajīva is way one lives	living style to remove "san"
11	Sammā vāyāma	Sammā + vāyāma	vāyāma is effort	effort to remove "san"
12	Sammā sati	Sammā + sati	sati is mindfulness (about Tilakkhaṇa)	mindfulness to remove "san"
13	Sammā samādhi	Sammā + samādhi	samādhi is the state of equanimity (sama + adhi)	state of samādhi resulting from removing "san"

No	Pāli Word	Roots	Meaning of added word	Meaning of whole word
14	Sambhava	san + bhava	bhava is existence	existence due to "san"
15	Sambuddha	san + bhava + uddha	uddha is rooting out	one who rooted out existence in 31 realms
16	Sambodhi			state attained by a sambuddha; Nibbāna
17	Sambhūta	san + bhūta	bhūta refers to satara mahā bhūta	creation of bhūta via "san" in the mind; The Origin of Matter – <u>Suddhatthaka</u>
18	Sammapañña	sammā + pañña	pañña is wisdom	wisdom to see the way to remove "san"
19	Sammā-Sambodhi (Sammā-Sambuddha)		Emphasizing the achievement of sambodhi on one's own	reserved for the Buddhas
20	Sammatta	san+mā+atta	atta means the "truths leading to sammā"	Sammatta niyama is a knowledge of a Sotāpanna.
21	Sambojjanga	san +bodhi+aṅga; rhymes as sambojjanga	"aṅga" means factors	Factors that lead to Sambodhi
22	Sampajāna (Sampajanna)	san + pajāna	pajāna is to comprehend	to figure out defilements (san)
23	sammappadhāna	san + mā+ padhāna	mā is to remove; padhāna means "first"	first to do to remove "san"
24	Sambandha	san + bandha	bandha is to bind, associate with	bind with someone/something with "san"
25	sambhāvitā	san + bhāvitā	bhāvitā is to use	engage in "san" or sense pleasures
26	Sambheda	san + bheda	bheda means to quarrel	fighting over pleasurable things or "san"
27	Sambhīta	san + bhīta	bhīta means to terrify	"san" leading to terror (in mind or in future births)
28	Sambhoga	san + bhoga	bhoga means pleasurable things, especially food	sense pleasures
29	Sambhunjati	san + bhunja	bhunja means to eat or consume	engage in sense pleasures
30	sammoha	san + moha	moha is delusion	extreme delusion
31	sampādesi / sampādetā	san + pādesi	pādesi is to sort out and see	to clarify what is "san", as in "vaya dhammā saṅkhāra, appamādena sampādetā".
32	sampahanseti	san +pahāna	pahāna is to remove	to remove "san"
33	sampañño	san + pañño	pañño means with wisdom, possessive of paññā	attained wisdom to see 'san'
34	Sampajāna	san + pajāna	pajāna is to clarify	sort out or to clarify "san"

No	Pāli Word	Roots	Meaning of added word	Meaning of whole word
35	sampayoga	san + payoga	payoga is a clever plan to get something done	plan to access a pleasurable thing
36	Samphassa	san + phassa	contact with san (in the mind)	Vedanā (Feelings) Arise in Two Ways
37	Sampassati	san + passati	passati means to comprehend	comprehend "san"
38	sankilitttha or sanṅkilitttha	san + kilitttha	kilitttha is to defile	making mind defiled by adding "san"
39	sankilesa or sanṅkilesa	san + kilesa	kilesa are defilements	things that defile the mind
40	Samsāra (Saṁsāra)	san + sāra	sāra means "good"	perception that san (things in this world) are good.
41	Sanseva (Samseva)	san + seva	seva means to "associate"	to indulge in worldly pleasures
42	Samucceda (as in samucceda pahāna)	san + ucceda	ucceda means to "remove from the roots"; pahāna is remove	samucceda pahāna means to "get rid of permanently"
43	saṁyoga or sanyoga	san + yoga	yoga is to bind	bound with "san" (to this world)
44	saṁyojanā or sanyojanā	san + yo + ja	"yo" is to bind; "ja" is to produce	factors that leads to bonds to rebirth process
45	samudaya	san + udaya	udaya is to arise	arising due to "san"
46	Samutthāna	san + utthāna	utthāna means "where it arises"	Samutthāna citta is same as cittaja; where "san" originates (mind)
47	samvāsa or sanvāsa	san + vāsa	vāsa live with	live together; sexual intercourse
48	Samvara (Sanvara)	san + vara	vara means to stop, avoid	moral behavior
49	Samvaddha	san + vaddha	vaddha is to "grow"	to add "san", i.e., defilements
50	Samvannanā	san + vannanā	vannanā is to praise	to praise immoral acts
51	Samvattana (Samvattati)	san + vattana	vattana is to "drop"	aiding in removing "san"
52	samvedanā or sanvedanā	san + vedanā	vedanā is to feel	feelings due to "san": samphassa jā vedanā
53	saṁvidhāna or sanvidhāna	san + vidhāna	vidhāna means ordering	giving orders, organize (normally used mundanely)
54	saṁsaraṇa or sansaraṇa	san + saraṇa	saraṇa means move around, travel	wandering in saṁsāra
55	Samyutta (as in Saṁyutta Nikāya)	san + yutta	yutta means "contains"	Suttā in the Saṁyutta Nikāya explain "san" terms
56	Sancetanā	san + cetanā	cetanā is intention (in a thought)	defiled thoughts

No	Pāli Word	Roots	Meaning of added word	Meaning of whole word
57	sanditthika	san + diṭṭhi	diṭṭhi is seeing, vision	seeing "san" with Buddha Dhamma
58	Sangāyanā	san + gāyanā	gāyanā is to recite	Buddhist Council where suttā describing "san" are recited.
59	Sanga	san + ga	ga is to attach,	attach to "san"
60	Sangati	san + gati	gati is character, habit	bad character/habits
61	Saṅgha	san + gha	gha is to remove	Those who have removed "san" belong to Saṅgha; Nobles or Ariyā, but usu. include bhikkhus
62	Sāṅghika	possessive of Saṅgha		offered to Saṅgha
63	Saṅgīta (Sangeetha)	san + gīta	gīta is a poem, song	music that bend mind towards sense pleasures
64	sankalpana or saṅkappa	san + kalpana	kalpana means conscious thoughts	defiled thoughts
65	sankhitta	san + kitta	kitta is action (kriya)	anything done with 'san' (defilements) in mind
66	Sansun	san + sūn (û rhymes like put)	sūn means to destroy	calming the mind via removing "san"
67	Sanvara	san + vara	vara is to stay away from	discipline via staying away from "san", i.e., moral behavior
68	sanvega or samvega	san + vega	vega is speed or rapidity	enhanced javana of a citta due to "san", i.e., highly emotional
69	saṅkhāra (should really be sankāra)	san + kāra	kāra is action (all actions are initiated via thoughts)	Saṅkhāra – What It Really Means
70	Sankata	san + kata	kata is a result	produced via saṅkhāra; anything in this world
71	Sansāra (Saṁsāra)	San + Sāra	Sāra is good, beneficial	What is “San”? Meaning of Sansāra (or Saṁsāra)
72	Santāpa	san + tāpa	tāpa is heat	heating of the mind due to "san"
73	Santutti (or Santhutti)	san + thutti	thutti is to remove: Arogya Parama Labha..	ease of mind when "san" removed; but commonly used to indicate happiness

8.5 The 89 (121) Types of Citta

Revised: October 29, 2015; August 31, 2017; June 3, 2018; July 31, 2018; August 28, 2022

Citta for *Kāma loka* (in the 11 sense realms) - 54 in all

There are three main types of *citta* here: The differentiation is based on whether they have immoral roots (*lobha*, *dosa*, *moha*), *kammically* moral roots (*alobha*, *adosa*, *amoha*), or are *kammically* neutral, i.e., no roots.

- **12 immoral *citta***: 8 with *lobha* roots; 2 with *dosa* roots; 2 with *moha* roots. All ten immoral acts (*dasa akusala*) are done with these 12 types of *cittā*. Because of the 12 immoral *cittā*, **seven rootless (*ahetuka*) *vipāka citta*** can arise in the future. Thus, altogether there are **19 *cittā* in this category**.
- **Eight moral *cittā***: four with all three moral roots and 4 with two moral roots (lacking in wisdom). They can give rise to two types of *vipāka citta*: **eight *vipāka citta* with no roots** and **eight *vipāka citta* with moral roots** (four of them have all three moral roots, and the other four are lacking in wisdom). Thus **24 types of *citta* are mentioned here**, of which 16 have moral roots, and eight are rootless (*ahetuka*).
- When these same **eight moral *citta* arise in *Arahants*, they are called *kiriya citta*** or functional *citta*. They have the same moral roots as the eight moral *citta* mentioned above but do not have any *kammic* potential or *kammic* consequences.
- All those *citta* with moral roots (8 *kiriya cittā* for *Arahants* and 16 for others) are called *sobhana* (beautiful) *citta*.
- Finally, **three types of *kiriya citta* arise in *citta vīthi*: they are neither *kamma* nor *kamma vipāka***. These are the three *kiriya citta* without any roots, and thus are rootless (*ahetuka*) *citta*. Two of these perform functions of (i) five-sense-door adverting consciousness (*pañcadvārāvajjana citta*) and the *votthapana citta*, and (ii) mind-door-adverting consciousness (*manodvārāvajjana citta*). (iii) The third one arises in only *Arahants* (when they smile about sense-sphere phenomena).
- Note that none of the seven *akusala vipāka citta* has roots. Also, eight *kusala vipāka citta* associated with *pavutti vipāka* (i.e, not giving rise to rebirth) also do not have any roots. Those 15 *citta* together with the three *ahetuka kiriya citta* are involved in the *vipāka* phase of a given *citta vīthi*. They do not have any *sobhana* or *asobhana cetasika* other than the 7 universal *cetasika* and the 6 *pakiṇṇaka* (particulars) *cetasika*; see, “[Cetasika – Connection to Gati](#)” for various types of *cetasika*. Those 18 *cittā* are listed on p. 112 of [Ref.1](#) under the second group below the group of *akusala citta*.

2, The **54 *kāmaloka cittā*** can be categorized in different ways.

Asobhana (Unbeautiful)		Sobhana (Beautiful)
Immoral- 12	Rootless – 18	Moral -24
<i>Lobha</i> (8)	Immoral <i>Vipāka</i> (7)	<i>Moral</i> (8)
<i>Dosa</i> (2)	Moral <i>Vipāka</i> (8)	Moral <i>Vipāka</i> (8)
<i>Moha</i> (2)	<i>Kiriya</i> (3)	<i>Kiriya</i> (8)

Citta for *Rūpaloka* (in the 16 *Rūpa* realms) - 15 in all

3. There are only 15 *citta* that are predominantly present in the *Rūpaloka*. Five are *jhānic* moral *citta*, and five are *vipāka cittā* due to those.

4. The five *jhānic* moral *citta* can be experienced by humans when they develop *samādhi* and attain these (first through fifth) *jhānā*. However, they can only experience the corresponding five *vipāka citta* when they are born in *Rūpalokas*.

5. The five *jhānic* states are characterized by five *jhāna* factors or mental concomitants: *vitakka* (initial application), *vicāra* (sustained application), *pīti* (zest), *sukha* (happiness), and *ekaggatā* (one-pointedness). All five factors are present in the first *jhāna*, and as one moves to higher *jhānā*, these factors are lost one by one, and in the fifth *jhāna*, only *ekaggatā* is left.

Pīti (zest) is the happiness in the mind, and *sukha* (happiness) is the tranquility of the body.

6. There are five more *jhānic kīriya citta* experienced by *Arahants* when they attain these *jhānā*.

Thus there are 15 *cittā* in all that predominantly belong to the *Rūpaloka*.

Citta for Arūpaloka (in the 4 Arūpa realms)- 12 in all

7. There are only 12 *cittā* that are predominantly present in the *Arūpaloka*. Four are *jhānic* moral *citta* and four are *vipāka citta* due to those.

8. The four *jhānic* moral *cittā* can be experienced by humans when they develop *samādhi* and attain these (fifth through eighth) *jhānā*. However, they can experience the corresponding four *vipāka citta* only when they are born in *Arūpaloka*.

9. The first of the four *Arūpaloka jhānā* is the attainment of the base of infinite space (*Ākāsānancāyatana*). A human must master the fourth *jhāna* (*Rūpaloka*) to attain this *jhāna*.

The second is the base of infinite consciousness (*Viññāṇāṇcāyatana*). The third is the base of nothingness (*Ākiñcaṇṇāyatana*), and the fourth is the base of neither-perception-nor-non-perception (*Nevasaññānāsaññāyatana*). In this last type of consciousness, the perception factor (*saññā*) is so subtle that it can no longer perform the function of perception, i.e., one is unaware of the “world.” Yet perception is not altogether absent. This is another reason why the ancient *yogis* erroneously assumed this eighth *jhāna* to be *Nibbāna*.

10. There are four more *Arūpaloka jhānic kīriya citta* experienced by *Arahants* when they attain these *jhānā*.

Thus there are 12 *cittā* in all that predominantly belong to the *Arūpa loka*.

Lokuttara (Supermundane) Citta – 8 in all

11. These pertain to the four stages of *Nibbānic* attainment: *Sotāpanna*, *Sakadāgāmī*, *Anāgāmī*, and *Arahant*.

12. Each stage involves two types of *citta*: path consciousness (*magga citta*), and fruition consciousness (*phala citta*). The *magga citta* has the function of eradicating or permanently attenuating defilements. The *phala citta* has the function of experiencing the degree of liberation made possible by the *magga citta*.

13. Each *magga citta* arises only once and endures for one thought-moment. It is never repeated. The corresponding *phala citta* (which corresponds to a *vipāka citta* but is not called a *vipāka citta*) arises immediately after the *magga citta*. This is in contrast to mundane *vipāka citta* where they can occur even many lifetimes after the corresponding *kusala* or *akusala citta*.

14. The *phala citta* can be repeated after one attains it. With practice, it can be sustained for long times, up to 7 days for an *Arahant*.

Thus, there are $54 + 15 + 12 + 8 = 89$ *cittā* in all.

How 121 Types of Citta are Possible

15. It is possible to further analyze the types of citta by refining the above method by considering that each *magga phala* can be reached from the vicinity of each *anāriya jhānic* state.

- One can attain *Nibbānic* states via the vicinity of each of the five *rūpa loka jhānic* states (**here, the *Abhidhamma* method of 5 *jhānā* is used, instead of the four mentioned in the *suttā***, where the first two *jhāna* in *Abhidhamma* categorization are taken to be one *jhāna*; in the *Abhidhamma* analysis *vitakka* and *vicāra* are removed in two steps, whereas in the *sutta* analysis it is assumed that they are removed in one step).
- Therefore, the five *jhānic* states can lead to the four *magga cittā* and four *phala cittā*.
- Thus here, there are 40 ways to attain *lokuttara cittā*. Therefore, in this case, the total number of *cittā* in this case would be 121 (= 54 + 15 + 12 + 40) instead of 89.

16. Therefore, *magga phala* (including the *Arahant* stage) can be reached via going through any of the *jhānic* states or without going through any *jhānic* state.

- Of course, the eight *lokuttara cittā* (i.e., the four stages of *Nibbāna*) arrived are the same, regardless of whether they arrived via *jhāna* or not.
- To attain the first *Ariya jhāna*, one must be at least an *Anāgāmi*. See #6 of “[Samādhi, Jhāna, Magga Phala – Introduction](#).”

Important Conclusion Regarding *Jhāna* and *Magga Phala*

17. From the above it is clear that *magga phala* can be attained without *jhāna* (89 *cittā* analysis applicable). *Magga phala* can also be attained via each of the five *jhānic* states (in the *Abhidhamma* method), which correspond to the four *jhānā* discussed in the *suttā*; here the 121 *cittā* analysis is applicable.

- Furthermore, these *jhānic* states can be reached via either *anāriya jhāna* or *Ariya jhāna*. The experience seems to be the same.
- The only difference is that while *kāma rāga* is suppressed (*vikkhambhana pahāna*) in *anāriya jhāna*, it is REMOVED (*samuccheda pahāna*) in *Ariya jhāna*.
- For details, see, “[Samādhi, Jhāna \(Dhyāna\), Magga Phala](#).”

8.6 Cetasika (Mental Factors)

Revised January 24, 2020; May 15, 2020; June 8, 2020; August 23, 2022

Cetasika (mental factors; pronounced “chethasikā”) appear concomitantly with *citta* (thoughts; pronounced “chiththā”), and they cease together with *citta*. They define the character (good or bad or neutral) of the *citta*.

- The way to “[Lead a Moral Life](#),” or to “[Seek Good Rebirths](#),” or to “[Seek Nibbāna](#),” is to get rid of the bad (non-beautiful) *cetasika* and cultivate good (beautiful) *cetasika*. This is done by changing one’s habits via learning Dhamma and practicing it: see, “[Habits and Goals](#),” “[Sansāric Habits and āsavas](#),” and “[The Way to Nibbāna – Removal of Āsavā](#),” in that order.

1. Seven *cetasika* are in every *citta*. These are called **universals** (*sabba citta sādhāraṇa*):

- *Phassa* (contact); *vedanā* (feeling); *saññā* (perception); *cetanā* (volition); *ekaggatā* (One-pointedness) can become *Sammā Samādhi*; *jīvitindriya* (life faculty) *manasikāra* (memory).

2. Since they are universals, the above *cetasika* appears in both *kusala* and *akusala citta*. All are important mental factors:

- *Saññā* and *vedanā* are in *pañcakkhandha*.
- *Cetanā* determines *kamma*; it is the *cetasika* that “puts together a *citta*” by automatically incorporating other relevant *cetasika* according to one’s “*gati*.”
- *Ekaggatā* is the salient factor in *samādhi*.
- Consciousness cannot arise without *phassa*. Note that *samphassa* differs from *phassa*; see, “[Difference between Phassa and Samphassa](#).”
- *Jīvitindriya* maintains life.
- *Manasikāra* can be either *yoniso manasikāra* (important in attaining the *Sotāpanna* stage), and *ayoniso manasikāra* can lead to the accumulation of *akusala kamma*.

3. There are six *cetasika* that CAN appear in both types of *cittā*: *kusala* and *akusala*. However, they are found in only particular types of *cittā*. They are called **particulars** or *pakiṇṇaka*: [*pakiṇṇaka* : (adj.) [*pa+kiṇṇa* (pp. of *kirati*)+*ka*] scattered about; fig. miscellaneous, particular, opp. to *sādhāraṇa*.]

- *Vitakka* (focused application) can become *Sammā Saṅkappa*; *vicāra* (sustained application); *adhimokkha* (dominate). *Adhimokkha* is the *cetasika* that makes another *cetasika* to dominate a given *citta*; for example, to get *uddhacca*, *vicikicchā*, or *paṭigha* to strengthen.
- *Viriya* (effort) can become *Sammā Vāyāma*; *pīti* (joy); *chanda* (desire, not greed).
- **These are important *cetasika* and play key roles in morality/immorality since they can appear in both *kusala* and *akusala citta*.** For example, when one’s mind is covered with deep ignorance (*moha*), one may enjoy immoral deeds (*pīti*), makes a liking for them (*chanda*), and strive more (*virīya*) to do such acts.

4. Just like universals, these particulars can appear in either type of *cittā*, *kusala* or *akusala*. *Vitakka*, *vicāra*, and *pīti* are *jhāna* factors as well.

- *Viriya* and *chanda* are two factors in the four bases of mental power; see, “[The Four Bases of Mental Power \(Cattāro Iddhipāda\)](#).”
- *Adhimokkha* is important in decision making by making another *cetasika* dominant. All these factors can go in an *immoral* direction too.

5. There are 14 *asobhana cetasika* (**non-beautiful mental factors**) that appear only in *akusala citta*. Out of these, four universals appear in ALL *akusala citta*:

- **Moha** (delusion); *Ahirika* (shamelessness); *Anottapa* (fearlessness in the wrong); *uddhacca* (restlessness or agitation).
- Both shamelessness and fearlessness of wrong encourage doing immoral acts. Restlessness causes unwise decision making.

The other ten are “occasionals” that appear in only particular types of *akusala citta*:

- **Lobha** (greed); *diṭṭhi* (wrong view); *māna* (conceit); **dosa** (hatred); *issā* (envy); *macchhariya* (extreme greed, also pretending one does not have wealth); *kukkucca* (worry, also feeling low); *thīna* (sloth, sluggishness); *middha* (torpor); *vicikicchā* (doubt arising from temptations).
- *Lobha* and *dosa* are two of the three immoral roots. Sloth and torpor normally rise together and are opposite of *virīya*; they are listed as one factor in Five Hindrances; see, “[Key to Calming the Mind](#).”

6. Twenty-five *sobhana cetasika* (**beautiful mental factors**) appear only in *kusala citta*. Out of those, 19 of them appear in every *kusala citta* and thus are called beautiful universals:

- *Saddhā* (faith); *sati* (moral mindfulness) can become *Sammā Sati*; *hiri* (shame of wrong); *ottappa* (fear of wrong); **alobha** (absence of greed); **adosa** (absence of hate/anger, of which *mettā* or “loving-kindness” is a part); *tatramajjhataṭṭhā* (neutrality of mind, of which *upekkhā* is a part); *kāyapassaddhi* (tranquility of mental body); *cittapassaddhi* (tranquility of consciousness); *kāyalahutā* (lightness of mental body); *cittalahutā* (lightness of consciousness); *kāyamudutā* (malleability of the mental body); *cittamudutā* (malleability of consciousness); *kāyakammaññatā* (wieldliness of mental body); *cittakammaññatā* (wieldliness of consciousness); *kāyapāguññatā* (proficiency of mental body); *cittapāguññatā* (proficiency of consciousness); *kāyujjukatā* (rectitude of mental body); *cittujjukatā* (rectitude of consciousness).

The other six are occasionals that appear in only particular types of *kusala citta*:

- There are three abstinences: *Sammā Vācā* (right speech); *Sammā Kammanta* (right action); *Sammā Ājīva* (right livelihood).
- Two Illimitables (limit-less): *karuṇā* (compassion); *muditā* (appreciative joy; joy at other’s moral success).
- **Paññā** or *paññindriya* (wisdom or wisdom faculty). *Sammā Diṭṭhi* leads to *paññā*.

7. Mental factors in the **Noble Eightfold Path** are highlighted in green.

8. **Immoral roots** are highlighted in red. **Moral roots** are highlighted in purple.

9. As a rule, *sobhana* and *asobhana cetasika* CANNOT appear together in a given *citta*.

8.7 Rūpa (Material Form) – Table

Revised April 22, 2020; August 16, 2020; September 5, 2022

We discuss the 28 types of *rūpa* (material form) in Buddha Dhamma. For discussions on *rūpa*, see, “[What are Rūpa? \(Relation to Nibbāna\)](#)” and “[Rūpa \(Material Form\)](#).”

Concretely Produced (<i>Nipphanna</i>)	Abstract (<i>Anipphanna</i>) Rūpa
I. Great Elements (<i>Mahā Bhūta</i>)	VII. Limiting Phenomenon
1. <i>Pathavi</i> (Extension/Hardness)	19. <i>Ākasa dhātu</i> (space element)
2. <i>Āpo</i> (Cohesion/Fluidity)	IX. Communicating (<i>Viññati</i>) Rūpa
3. <i>Tejo</i> (Heat/Hotness)	20. <i>Kāya Viññati</i>
4. <i>Vāyo</i> (Motion/Pushing & Supporting)	21. <i>Vacī Viññati</i>
II. Internal (<i>Pasāda</i>) Rūpa	X. Mutable (<i>Vikāra</i>) Rūpa
5. <i>Cakkhu</i> (eye element)	22. <i>Lahutā</i> (lightness)
6. <i>Sota</i> (ear element)	23. <i>Mudutā</i> (Elasticity)
7. <i>Ghana</i> (nose element)	24. <i>Kammaññatā</i> (weirdness)
8. <i>Jivhā</i> (tongue element)	XI. Material Qualities (<i>Lakkhaṇa Rūpa</i>)
9. <i>Kāya</i> (body element)	25. <i>Upacaya</i> (production)
III. Gocara (Objective) Rūpa	26. <i>Santati</i> (continuity)
10. <i>Vaṇṇa</i> (visible)	27. <i>Jaratā</i> (Decay)
11. <i>Sadda</i> (Sound)	28. <i>Aniccatā</i> (Dissolving)
12. <i>Gandha</i> (Smell)	
13. <i>Rasa</i> (Taste)	
* <i>Phoṭṭhabba</i> (Tangibility, warmth, and movement) comes from 3 <i>mahā bhūta</i> of <i>pathavi, tejo, vāyo</i>	
IV. Bhāva (Faculties of sex) Rūpa	
14. <i>Itthi</i> (Feminine)	
15. <i>Purisa</i> (Masculine)	
V. Hadaya (Mind Base)	
16. <i>Hadaya Vatthu</i> (seat of the mind)	
VI. Life	
17. <i>Jīvitindriya</i> (Life faculty)	
VII. Nutritional	

18. *Oja* (Nutriment)**Types of *Rupā***

- The four great elements (#1 through #4), three *gocara rūpa* (#10, #12, #13), and nutriment (#18), ALWAYS appear together. They can NEVER be detected by themselves. They come together as *suddhaṭṭhaka* (meaning the smallest collection of those eight types of *rūpa*.) See “[The Origin of Matter – Suddhaṭṭhaka](#).”
- **There are nine *rūpā* created ONLY by kammic energy at the *paṭisandhi* moment.** Those are the five *pasāda rūpa* (#5 through #9), and four other *rūpa* (#14 through #17), including the seat of the mind (*hadaya vatthu*).
- **The 16 *rūpa* that are highlighted in blue are fine (*sukuma*) *rūpa*.** The other 12 are coarse (*oḷārika*) *rūpa*.
- *Nipphanna rūpa* are caused by *kamma*, *citta*, *utu* (*tejo*), and *āhāra* (*oja*). The other 10 (*anipphanna rūpa*) are not caused or conditioned by *kamma*, *citta*, *utu* (*tejo*), and *āhāra* (*oja*).
- The ten types of *anipphanna rūpa* (on the right side of the Table) are abstract *rūpa*.

Types of *Rūpā* Present in Different Realms

- All 28 *rūpā* arise in the *kāma*-realms. Eight *rūpā* comprising *sadda*, five *viññatti/vikāra-rūpā*, *jaratā-rūpa*, and *aniccatā-rūpa*, do not arise at the moment of birth (*paṭisandhi*.) During life time, they can arise.
- In the 15 *rūpa* realms, except for *Asañña*-realm, 23 *rūpā* arise (*ghāṇa-pasāda*, *jivhā-pasāda*, *kāya-pasāda*, *itthi-bhava* and *purisa-bhava* being excluded).
- Only 17 *rūpā* arise in the *Asañña* realm. They are the eight *avinibbhoga* (four *mahā bhūta* and *vaṇṇa*, *gandha*, *rasa*, *oja*), *jivita rūpa*, *ākāsa dhātu*, three *lahutadi*, and four *lakkhana-rūpā*;
- No *rūpa* above the *suddhaṭṭhaka* level arises (except for *hadaya vatthu*) in the *arūpa*-realms. Thus, only that trace of “matter” is present anywhere in the 31 realms. Ancient *yogis*, who attained all eight *anāriya jhānā*, could not see any *rūpa* in the *arūpa loka* and deduced that was *Nibbāna*. Only a Buddha can see a *hadaya vatthu*, i.e., a *suddhaṭṭhaka*. Thus, linkage to matter has not been severed in *arūpa loka*.

Definitions from *Dhammasaṅgaṇī*

The following are quoted from the “[WebLink: suttacentral: *Rūpavibhatti* DS 2.2.3](#)” section of *Dhammasaṅgaṇī* of the *Tiṭṭaka*.

- *Katamaṃ taṃ rūpaṃ itthindriyaṃ? Yaṃ itthiyā itthiliṅgaṃ itthinimittaṃ itthikuttaṃ itthākappa itthattaṃ itthibhāvo—idaṃ taṃ rūpaṃ itthindriyaṃ.*
- *Katamaṃ taṃ rūpaṃ purisindriyaṃ? Yaṃ purisassa purisaliṅgaṃ purisanimittaṃ purisakuttaṃ purisākappa purisattaṃ purisabhāvo—idaṃ taṃ rūpaṃ purisindriyaṃ.*
- *Katamaṃ taṃ rūpaṃ jīvitindriyaṃ? Yo tesaṃ rūpīnaṃ dhammānaṃ āyu ṭhiti yapaṇā yāpanā iriyaṇā vattanā pālanā jīvitaṃ jīvitindriyaṃ—idaṃ taṃ rūpaṃ jīvitindriyaṃ.*
- *Katamaṃ taṃ rūpaṃ kāyaviññatti? Yā kusalacittassa vā akusalacittassa vā abyākatacittassa vā abhikkamantassa vā paṭikkamantassa vā āloketassa vā vilokentassa vā samiñjentassa vā pasārentassa vā kāyassa thambhaṇā santhambhaṇā santhambhitattaṃ viññatti viññāpanā viññāpitattaṃ—idaṃ taṃ rūpaṃ kāyaviññatti.*

- *Katamaṃ taṃ rūpaṃ **vacīviññatti**? Yā kusalacittassa vā akusalacittassa vā abyākatacittassa vā vācā girā byappatho udīraṇaṃ ghoso ghosakammaṃ vācā vacībhedo—ayaṃ vuccati vācā. Yā tāya vācāya viññatti viññāpanā viññāpitattam—idaṃ taṃ rūpaṃ vacīviññatti.*
- *Katamaṃ taṃ rūpaṃ **ākāsadhātu**? Yo ākāso ākāśagataṃ aghaṃ aghagataṃ vivaro vivaragataṃ asamphuṭṭhaṃ catūhi mahābhūtehi—idaṃ taṃ rūpaṃ ākāśadhātu.*
- *Katamaṃ taṃ rūpaṃ rūpassa **lahutā**? Yā rūpassa lahutā lahupariṇāmatā adandhanatā avitthanatā—idaṃ taṃ rūpaṃ rūpassa lahutā.*
- *Katamaṃ taṃ rūpaṃ rūpassa **mudutā**? Yā rūpassa mudutā maddavatā akakkhaḷatā akathinatā—idaṃ taṃ rūpaṃ rūpassa mudutā.*
- *Katamaṃ taṃ rūpaṃ rūpassa **kammaññatā**? Yā rūpassa kammaññatā kammaññattam kammaññabhāvo—idaṃ taṃ rūpaṃ rūpassa kammaññatā.*
- *Katamaṃ taṃ rūpaṃ rūpassa **upacayo**? Yo āyatanānaṃ ācayo, so rūpassa upacayo— idaṃ taṃ rūpaṃ rūpassa upacayo.*
- *Katamaṃ taṃ rūpaṃ rūpassa **santati**? Yo rūpassa upacayo, sā rūpassa santati— idaṃ taṃ rūpaṃ rūpassa santati.*
- *Katamaṃ taṃ rūpaṃ rūpassa **jaratā**? Yā rūpassa jarā jīraṇatā khaṇḍiccaṃ pāliccaṃ valittacatā āyuno saṃhāni indriyānaṃ paripāko—idaṃ taṃ rūpaṃ rūpassa jaratā.*
- *Katamaṃ taṃ rūpaṃ rūpassa **aniccatā**? Yo rūpassa khayō vayo bhedo paribhedo aniccatā antaradhānaṃ—idaṃ taṃ rūpaṃ rūpassa aniccatā.*
- *Katamaṃ taṃ rūpaṃ kabalīkāro **āhāro**? Odano kummāso sattū maccho mamsaṃ khīraṃ dadhi sappi navanītaṃ telaṃ madhu phāṇitaṃ, yaṃ vā panaññampi atthi rūpaṃ yaṃhi yaṃhi janapade tesaṃ tesaṃ sattānaṃ mukhāsiyaṃ dantavikhādanaṃ galajjhoharaṇīyaṃ kucchivitthambhanaṃ, yāya ojāya sattā yāpenti—idaṃ taṃ rūpaṃ kabalīkāro āhāro.*

8.8 Rūpa – Generation Mechanisms

1. *Rūpa* (or matter) can be generated by four causes: *kamma*, *citta*, *utu*, and *Āhāra* (food). I will discuss these in detail later.

- *Kamma* here refers to volition (*cetanā*). The 25 kinds of *kamma* that produce *rūpā* are the volitions of the 12 *akusala citta*, 8 great *kusala citta*, and the five *rūpa loka kusala citta*. These *rūpa* are created with a time lag, when *kamma vipāka* bear fruits, like at the *paṭisandhi* to a new life. The three *rūpa dasaka* of *vatthu*, *kāya*, and *bhava* are created at *paṭisandhi* by *kamma vipāka*.
- The *rūpa* produced by the *citta* arise **at the same time as the *citta*** themselves, and only at the rising part of the *citta*. Out of the 89 possible *citta*, 75 *citta* can produce *rūpa* (4 *arūpa loka vipāka citta* and the two sets of fivefold sense consciousness cannot produce *rūpa*).
- Thus both *kammaja* and *cittaja* *rūpa* have mind as the direct cause. Both of these decay rapidly and are converted to *utuja rūpa*. What we normally see are the *utuja rūpa* and *āhārajā rūpa*, which have their origins also in the great elements of *tejo* and *oja*.
- The great element *tejo* is responsible for producing *utu samutthana rūpa*: Beginning from the moment of rebirth-linking, the internal *tejo* element found in the *rūpa kalāpas* born of *kamma* combines with the external *tejo* and starts producing organic material phenomena originating from *tejo*. Thereafter the *tejo* element in the *rūpa kalāpas* born of all four causes produces organic material phenomena born of *tejo* element throughout the life. Externally, *tejo* element also produces inorganic material phenomena, such as climatic and geological transformations.
- The nutritive essence, *oja*, is present in all *rūpa-kalāpas* both inside the body (internal) and outside the body (external). The external food, which is eaten, is digested in the stomach and dispersed through blood to all parts of the body. So the internal *oja* and the external *oja* meet in every part of the body. The combination of internal and external *oja* produce *āhārajā rūpas*.

2. The 8 *avinibbhoga rūpā* of *pathavi*, *āpo*, *tejo*, *vāyo*, *vaṇṇa*, *gandha*, *rasa*, and *oja* are ALWAYS found together. That unit or *kalāpa* is the smallest *rūpa* unit and is called the pure octad (*suddhaṭṭhaka*). **Those 8 *avinibbhoga rūpā* and the *ākāsa dhātu* are produced by all four causes.**

3. The four *lakkhaṇa rūpā* of *upacaya*, *santati*, *jaratā*, and *aniccatā* are not produced by any cause. They represent the nature of *rūpā*.

4. The remaining 15 *rūpa* are produced by different combination of the four possible causes as shown in the table below:

	Kamma Born	Citta Born	Utu Born	Āhāra Born
Cakkhu (eye)	Yes			
Sota (ear)	Yes			
Ghana (nose)	Yes			
Jivhā (tongue)	Yes			
Kāya (body)	Yes			
Sadda (sound)		Yes	Yes	
Itthi Bhva (femininity)	Yes			

Purisa (masculine)	Yes			
Hadaya vatthu (heart base)	Yes			
Jivitindriya (life faculty)	Yes			
Kāya viññatti (bodily intimation)		Yes		
Vacī Viññatti (vocal intimation)		Yes		
Lahuta (lightness)		Yes	Yes	Yes
Muduta (malleability)		Yes	Yes	Yes
Kammaññata (wieldiness)		Yes	Yes	Yes

8.9 Rūpa Kalāpa (Grouping of Matter)

Revised September 15, 2020; September 6, 2022

1. There are 28 *rūpa* types discussed in *Abhidhamma*: “[Rūpa \(Material Form\) – Table](#).” They are not found separately in nature. They four causes produce them through tiny material groups called *rūpa kalāpā* or “elementary groups of matter.”

- All *rūpā* have origins in the four great elements of *pathavī*, *āpo*, *tejo*, and *vāyo*. However, they all arise together in the smallest unit of matter, a *suddhaṭṭhaka*. See, “[The Origin of Matter – Suddhaṭṭhaka](#).” Four more *rūpā* (*vaṇṇa*, *gandha*, *rasa*, *oja*) derived from the great elements are in a *suddhaṭṭhaka* making it an **octad** (composed of **eight** or an **aṭṭaka**.)
- There are 15 other elementary units (*rūpa kalāpā*) that derive from *suddhaṭṭhaka*. All 16 types of *rūpa kalāpā* are not further divisible. They are *avinibbhoga rūpa*.
- Let us briefly discuss them.

2. There are three *rūpa kalāpā* that have **nine units**: A *suddhaṭṭhaka* “energized” by *kammic* energy becomes a *jīvita navaka* (vital **nonad**) of nine units. That added unit is an “energy unit” called a *jīvita rūpa*. That *jīvita rūpa* keeps a physical body alive. Another element of nine units, a *sadda navaka* (sound nonad) is responsible for the sound created by *utu*, i.e., it is an *utuja rūpa*. Another is *kāyaviññatti navaka* created by *cittā* responsible for bodily intimation.

- Eight types of *rūpa kalāpā* have **ten units (dasaka or decade)** created by *kammic* energy: Here a *suddhaṭṭhaka* combines with a *jīvita rūpa* and another unit created by *kammic* energy to become a *dasaka*. Those eight types of *dasaka* are vital parts of a living being. For example, a *cakkhu pasāda rūpa* (together with the other nine units) creates a *cakkhu dasaka* responsible for seeing. In the same way *sota dasaka*, *ghana dasaka*, *jivhā dasaka*, *kāya dasaka* arise. *itthibhāva rūpa* and *purisabhāva rūpa* give rise to *itthibhāva dasaka* and *purisabhāva dasaka*. The seat of the mind, *vatthu dasaka* arises with the *hadaya vatthu*.
- The following are created only by *citta* (thoughts): One is *vacivīññatti-sadda-dasaka* (vocal intimation decad) responsible for speech. *Kāyaviññatti-lahutādi-dvadasaka* (dodecad of bodily intimation) of 12 units with *kāyaviññatti* and three *lahutādi rūpa*. Another is *vacivīññatti-sadda-lahutādi-terāsaka* (tricad of sound) of 13 units with *vacivīññatti*, three *lahutādi rūpa*, and *sadda*.
- Then there is *lahutādi-ekadasaka* (*suddhaṭṭhaka* + *lahuta* + *muduta* + *kammaññata*) with 11 units created by *citta*. There is also *sadda-lahutādi-dvadasaka* (*suddhaṭṭhaka* + *lahuta* + *muduta* + *kammaññata* + *sadda*) with 12 units created by *utu*.

3. All *rūpa kalāpā* have the following characteristics.

1. All the *rūpā* in a *rūpa kalāpa* arise together, i.e. they have a common genesis.
2. They also cease or dissolve together, i.e. they have a common cessation.
3. They all depend on the four great essentials present in the *kalāpa* for their arising, i.e. they have a common dependence.
4. They are so thoroughly mixed that they cannot be distinguished, i.e. they co-exist.

4. It should be noted that *kalāpā* are so small that they are indistinguishable from pure energy. The origin of *rūpa* is a *javana citta*, which is formless and mass-less. Science has shown that the smallest “particle” detected, the Higgs boson, is indistinguishable from energy. See, “[The Origin of Matter – Suddhaṭṭhaka](#).”

5. There are 17 types of *kalāpā* produced in 21 ways:

9 *kammaja kalāpā* 6 *cittaja kalāpā* 4 *utuja kalāpā* 2 *āhāraja kalāpā* as shown below:

	Kamma Born	Citta Born	Utu Born	Āhāra Born
Cakkhu dasaka (eye decad)	Yes			
Sota dasaka (ear decad)	Yes			
Ghana dasaka (nose decad)	Yes			
Jivha dasaka (tongue decad)	Yes			
Kāya dasaka (body decad)	Yes			
Itthi dasaka (female decad)	Yes			
Purisa dasaka (male decad)	Yes			
Vatthu dasaka (base decad)	Yes			
Jivita navaka (vital nonad)	Yes			
Suddhaṭṭaka (pure octad)		Yes	Yes	Yes
Kayavinnati navaka (body intimation nonad)		Yes		
Vacī viññati sadda dasaka (vocal intimation decad)		Yes		
Lahutādi eka dasaka (undecad of mutability)		Yes	Yes	Yes
Kayaviññati Lahutādi dva dasaka (undecad of mutability)		Yes	Yes	
Vaciviññati Sadda Lahutādi terasaka (tridecad of mutability)		Yes		
Sadda navaka (sound decad)			Yes	

6. Internal and External *Kalāpā*

All the 21 *rūpa kalāpā* mentioned above occur internally in living beings. *Itthibhāva-dasaka* does not occur in males. Similarly, *pumbhava-dasaka* (or *purisabhāva-dasaka*) does not occur in females. For those who are born blind or deaf, *cakkhu-dasaka* or *sota-dasaka* are not present.

- **In the external (*bahiddha*) world, only the two *utuja-kalāpā* are found.** All inanimate things such as trees, stones, earth, water, fire, corpses, etc., are made up of *utuja-suddhaṭṭhaka kalāpā*. The sounds produced by beating two sticks together, rubbing branches in the wind, or by instruments such as violin, piano, radio, cassettes, etc., are *utuja-sadda-navaka kalāpā*.

- From the internal *rūpas*, *kāya-pasāda*, *bhava-rūpa* (femininity and masculinity), *cittaja-rūpa*, *utuja-rūpa* and *āhāraja-rūpa* spread all over the body. So they will be present in the eye, the ear, the nose, the tongue and in every part of the body.

7. *Rūpa* in *Kāmaloka*

If circumstances permit, all the 28 material qualities occur undiminished in an individual during a lifetime in *kāmaloka* (sense-sphere).

- In womb-born creatures, only three *kammaja-kalāpā* comprising body-decad, sex-decad and heart decad are manifested at the moment of conception (at *paṭisandhi*).

Here again, the sex-decad may not be manifested in some particular individuals. After conception, during life, the eye-decad and the rest are manifested slowly in due order. Of the groups of material qualities produced in four ways, *kammaja-rūpa* starts to form at the moment of conception and forms incessantly at every minor instant. *Cittaja-rūpa* begins to form from the second moment of consciousness, i.e., from the arising instant of the first *bhavaṅga* which follows the rebirth-consciousness. *Cittaja-rūpa* continues to be formed for a life-time.

- *Utuja-rūpa* starts to form from the existing instant of rebirth consciousness. The reason is that the *tejo-dhātu* (*utu*) present in the first *kammaja-kalāpā* comes to the static stage (*ṭhiti*) at that instant. From that time onward, the *tejo-dhātu* produces *utuja-rūpa* at every moment. Since *tejo-dhātu* is present in every *kalapa*, every *kalapa*, from the time it reaches the static stage, produces new *utuja-kalāpā* at every minor instant. And the new *utuja-kalāpā*, from the time they reach the static stage, again produce new *utuja-kalāpā* at every minor instant. So this process goes on forever.

Every *kalapa* also contains the nutritive essence, *oja*. But *āhāraja-rūpa* forms when internal *oja* meets external *oja* at the time of diffusion of nutritive essence and the combination of internal and external *oja* comes to the static stage. From that instant, *āhāraja-rūpa* is also formed at every minor instant. As new groups of material qualities are incessantly produced, old groups dissolve and disappear. Thus, the material phenomena go on uninterruptedly in the sense-sphere till the end of life like the flame of a lamp, or river stream.
